The medicine and surgery of St. Luke, then, was probably not inferior to that commonly in demand among educated Asiatic Greeks, and must have been, as regards its basis, Greek medicine, and not Jewish. Hence a standard Gentile medical writer, if any is to be found of that period, would best represent the profession to which the evangelist belonged. Without absolute certainty as to date,[n] we seem to have such a writer in Aretaeus, commonly called "the Cappadocian," who wrote certainly after Nero's reign began, and probably flourished shortly before and after the decade in which St. Paul visited Rome and Jerusalem fell. If he were of St. Luke's age, it is striking that he should also be perhaps the only ancient medical authority in favour of demoniacal possession as a possible account of epilepsy (see p. 298, note k). If his country be rightly indicated by his surname, we know that it gave him the means of intercourse with both the Jews and the Christians of the Apostolic period (Acts ii. 9; 1 Pet. i. 1). It is very likely that Tarsus, the nearest place of academic repute to that region, was the scene of at any rate the earlier studies of Aretaeus, nor would any chronological difficulty prevent his having been a pupil in medicine there when Paul and also, perhaps, Barnabas were, as is probable, pursuing their early studies in other subjects at the same spot. Aretaeus, then, assuming the date above indicated, may be taken as expounding the medical practice of the Asiatic Greeks in the latter half of the first century. There is, however, much of strongly marked individuality in his work, more especially in the minute verbal portraiture of disease. That of pulmonary consumption in particular is traced with the careful description of an eye-witness, and represents with a curious exactness the curved nails, shrunken fingers, slender sharpened nostrils, hollow glazy eye, cadaverous look and hue, the waste of muscle and startling prominence of bones, the scapula standing off like the wing of a bird; as also the habit of body marking youthful predisposition to the malady, the thin veneer-like frames, the limbs like pinions,[o] the prominent throat and shallow chest, with a remark that moist and cold climates are the haunts of it (Aret. *περὶ φθίσεος*). His work exhibits strong traits here and there of the Pneumatic school, as in his statement regarding lethargy, that it is frigidity implanted by nature; concerning elephantiasis even more emphatically, that it is a refrigeration of the innate heat, "or rather a congelation—as it were one great winter of the system."[p] The same views betray themselves in his statement regarding the blood, that it is the warming principle of all the parts; that diabetes is a sort of dropsy, both exhibiting the watery principle; and that the effect of white hellebore is as that of fire: "so that whatever fire does by burning, hellebore effects still more by penetrating inwardly." The last remark shows that he gave some scope to his imagination, which indeed we might illustrate from some of his pathological descriptions, *e.g.* that of elephantiasis, where the resemblance of the beast to the afflicted human being is wrought to a fanciful parallel. Allowing for such overstrained touches here and there, we may say that he generally avoids extravagant crotchets, and rests chiefly on wide observation, and on the common sense which sobers theory and rationalises facts. He hardly ever quotes an authority; and though much of what he states was taught before, it is dealt with as the common property of science, or as become *sui juris* through being proved

maniacal and epileptic disorders. See this subject discussed in the Notes on the "Sacred Diseases" in the Oxford Soc. ed. of Hippocr. Aretaeus, on the contrary, assumes the opinion of demoniac agency in disease. His words are: *ἰερὴν συλλήψεσθαι τὴν νοῦσον· ἀνὴρ καὶ δι' ὅλας προφασίας, ἢ μέγεθος τοῦ κακοῦ, ἱερὸν γὰρ τὸ νόσημα· ἢ ἰήσιος οὐκ ἀνθρωπίης ἀλλὰ θείης ἢ δαίμονος δεῖται ὅτι τὸν ἄνθρωπον εἰσέδυσαν, ἢ ἐνεμείναντων ἀμοῦ, τοῦ ἐκλαμψαντος ἱεροῦ.* Περὶ ἐπιλήψιος. (*De Caus. et Sign. Morb. Chron.* i. 4.)

[m] Ir. Ferguson, *Prof. Essay to Gooch on Diseases of Women*, New Sydenham Society, London, 1859, p. xlvi. [n] adds, "Such has been the case with smallpox, measles, [illegible], and the plague . . . The yellow fever has lately ravaged Lisbon under a temperature perfectly similar to that of London or Paris."

[n] The date here given is favoured by the introductory review of Aretaeus' life and writings prefixed to Boerhaave's edition of his works, and by Dr. Greenhill in Smith's *Dictionary of Biog. and Myth.* sub voc. *Aretaeus*. A view that he was about a century later—a contemporary, in short, of Galen—is advanced in the Syd. Soc. edition, and ably supported. Still the evidence being purely negative, is slender, and the opposite arguments are not taken into account. [o] *πτερυγώδεες.*

[p] *Φύσις ἐστὶ τοῦ ἐμφύτου θερμοῦ οὐ μικρά τε, ἢ καὶ πάγος, ὡς ἂν τι μέγα χεῖμα* (*De Caus. et Sign. Morb. Chron.* ii. 13).

by his own experience. The freedom with which he follows or rejects earlier opinions, has occasioned him to be classed by some amongst the eclectic school. His work is divided into—I. the causes and signs of (1) acute, and (2) chronic diseases; and, II. the curative treatment of (1) acute, and (2) chronic diseases. His boldness of treatment is exemplified in his selection of the vein to be opened in a wide range of parts, the arm, ancle, tongue, nose, &c. He first has a distinct mention of leeches, which Themison is said to have introduced; and in this respect his surgical resources appear to be in advance of Celsus. He was familiar with the operation for the stone in the bladder and prescribes, as Celsus also does, the use of the catheter, where its insertion is not prevented by inflammation, then the incision[q] into the neck of the bladder, nearly as in modern lithotomy. His views of the internal economy were a strange mixture of truth and error, and the disuse of anatomy was no doubt the reason why this was the weak point of his teaching. He held that the work of producing the blood pertained to the liver, "which is the root of the veins;" that the bile was distributed from the gall bladder to the intestines; and, if this vesica became gorged, the bile was thrown back into the veins, and by them diffused over the system. He regarded the nerves as the source of sensation and motion; and had some notion of them as branching in pairs from the spine.[r] Thus he has a curious statement as regards paralysis, that in the case of any sensational point *below* the head, *e.g.* from the membrane of the spinal marrow being affected injuriously, the parts on the right side will be paralysed if the nerve towards the right side be hurt, and similarly, conversely, of the left side; but that if the head itself be so affected, the inverse law of consequence holds concerning the parts related, since each nerve passes over to the other side from that of its origin, decussating each other in the form of the letter X. The doctrine of the Pneuma, or etherial principle existing in the microcosm by which the mind performs all the functions of the body, holds a more prominent position in the works of Aretaeus than in those of any of the other authorities (Dr. Adams' pref. to Aret. pp. x. xi.). He was aware that the nervous function of sensation was distinct from the motive power; that either might cease and the other continue. His pharmacopoeia is copious and reasonable, and the limits of the usefulness of this or that drug are laid down judiciously. He makes large use of wine,[s] and prescribing the kind and the number of *cyathi* to be taken; and some words of his on stomach disorders (*περὶ καρδιαλγίης*) forcibly recall those of St. Paul to Timothy (1 Tim. v. 23), and one might almost suppose them to have been suggested by the intenser spirituality of his Jewish or Christian patients. "Such disorders, he says, "are common to those who toil in teaching, whose yearning is after divine instruction, who despise delicate and varied diet, whose nourishment is fasting, and whose drink is water." And as a purge of melancholy he prescribes "a little wine, and some other more liberal sustenance." In his essay on *Causus*, or "brain fever, he describes the powers acquired by the soul before dissolution in the following remarkable words: "Every sense is pure, the intellect acute, the gnostic power prophetic; for they prognosticate to themselves in the first place their own departure from life; then they foretell what will afterwards take place to those present, who fancy sometimes that they are delirious: but these persons wonder at the result of what has been said. Others, also, talk to certain of the dead, perchance they alone perceiving them to be present, in virtue of their acute and pure sense, or perchance from their soul seeing beforehand, and announcing the men with whom they are about to associate. For formerly they were immersed in humours, as if in mud and darkness; but when the disease has drained these off, and taken away the mist from their eyes, they perceive those things which are in the air, and through the soul being unencumbered become true prophets."[t] To those who wish further to pursue the study of medicine at this era the edition of Aretaeus by the Sydenham Society, and in a less degree that by Boerhaave, (Lugd. Bat. 1735), to which the references have here been made, may be recommended.

As the general science of medicine and surgery at this period may be represented by Aretaeus, so we have nearly a representation of its *Materia Medica* by Dioscorides. He too was of the same general region—a Cilician Greek—and his first lessons were probably learnt at Tarsus. His period is tinged by the same uncertainty as that of Aretaeus; but he has usually been assigned to the end of the 1st or beginning of the 2nd century (see *Dict. of Biog. and Mythol.* s. v.). He was the first author of high mark who devoted his attention to *Materia Medica*. Indeed this branch of ancient science remained as he left it till the times of the Arabians; and these, though they enlarged the supply of drugs and pharmacy, yet copy and repeat Dioscorides, as indeed Galen himself often does, on all common subject matter. Above 90 minerals, 700 plants, and 168 animal substances, are said to be described in the researches of Dioscorides, displaying an industry and skill which has remained the marvel of all subsequent commentators. Pliny, copious, rare, and curious as he is, yet for want of scientific medical knowledge, is little esteemed in this particular branch, save when he follows Dioscorides. The third volume of *Paulus Aegin.* (ed. Sydenham Soc.), contains a catalogue of medicines simple and compound, and the large proportion in which the authority of Dioscorides has contributed to form it will be manifest at the most cursory inspection. To abridge such a subject is impossible, and to transcribe it in the most meagre form would be far beyond the limits of this article.

Before proceeding to the examination of diseases in detail, it may be well to observe that the question of identity between any ancient malady known by description, and any modern one known by experience, is often doubtful. Some diseases, just as some plants and some animals, will exist almost anywhere; others can only be produced within narrow limits depending on the conditions of climate,

[q] *τάμνειν τὴν τραχεῖαν καὶ τὸν τῆς κύστιος τράχηλον.*

[r] Spengel (*ub. sup.* iv. 52-5) thinks that an approximately right conception of the nervous system was attained by Hierophilus of the Alexandrian school of medicine.

[s] Galen (*Hyg.* v.) strenuously recommends the use of wine to the aged, stating the wines best adapted to them. Even Plato (*Leg.* ii.) allows old men thus to restore their youth, and correct the austerity of age

[t] So Sir R. Halford renders it, Essay VI., in which occur some valuable comments on the subject treated by Aretaeus

[u] Aret. *de Sign et Caus. Morb. Acut.* ii. 4.

habit, &c.; and were only equal observation applied to the two, the *habitat* of a disease might be mapped as accurately as that of a plant. It is also possible that some diseases once extensively prevalent, may run their course and die out, or occur only casually; just as it seems certain that, since the middle ages, some maladies have been introduced into Europe which were previously unknown (*Bibloth. Script. Med.* Genev. 1731, *s. v.*; Hippocrates, Celsus, Galen; Leclerc's *History of Med.* Par. 1723, transl. Lond. 1699; Freind's *History of Med.*).

Eruptive diseases of the acute kind are more prevalent in the East than in colder climes. They also run their course more rapidly; *e. g.* common itch, which in Scotland remains for a longer time vesicular, becomes, in Syria, pustular as early sometimes as the third day. The origin of it is now supposed to be an acarus, but the parasite perishes when removed from the skin. Disease of various kinds is commonly regarded as a divine infliction, or denounced as a penalty for transgression; "the evil diseases of Egypt" (perhaps in reference to some of the ten plagues) are especially so characterised (Gen. xx. 18; Ex. xv. 26; Lev. xxvi. 16; Deut. vii. 15, xxviii. 60; 1 Cor. xi. 30); so the emerods (see EMERODS)[a] of the Philistines (1 Sam. v. 6); the severe dysentery[y] (2 Chr. xxi. 15, 19) of Jehoram, which was also epidemic [BLOOD, ISSUE OF; and FEVER], the peculiar symptom of which may perhaps have been *prolapsus ani* (Dr. Mason Good, i. 311-13, mentions a case of the entire colon exposed); or, perhaps, what is known as *diarrhoea tubularis*, formed by the coagulation of fibrine into a membrane discharged from the inner coat of the intestines, which takes the mould of the bowel, and is thus expelled (Kitto, *s. v.* "Diseases"); so the sudden deaths of Er, Onan (Gen. xxxviii. 7, 10), the Egyptian first-born (Ex. xi. 4, 5), Nabal, Bathsheba's son, and Jeroboam's (1 Sam. xxv. 38; 2 Sam. xii. 15; 1 K. xiv. 1, 5), are ascribed to action of Jehovah immediately, or through a prophet. Pestilence (Hab. iii. 5) attends His path (comp. 2 Sam. xxiv. 15), and is innoxious to those whom He shelters (Ps. xci. 3-10). It is by Jeremiah, Ezekiel, and Amos associated (as historically in 2 Sam. xxiv. 13) with "the sword" and "famine" Jer. xiv. 12, xv. 2, xvi. 7, 9, xxiv. 10, xxvii. 8, 13, xxviii. 8, xxix. 17, 18, xxxii. 24, 36, xxxiv. 17, xxxviii. 2, xlii. 17, 22, xliv. 13; Ez. v. 12, 17, vi. 11, 12, vii. 15, xii. 16, xiv. 21, xxxiii. 27; Am. iv. 6, 10).

The sicknesses of the widow's son of Zarephath, of Ahaziah, Benhadad, the leprosy of Uzziah, the boil of Hezekiah, are also noticed as diseases sent by Jehovah, or in which He interposed, 1 K. xvii. 17, 20; 2 K. i. 3, xx. 1. In 2 Sam. iii. 29, disease is invoked as a curse, and in Solomon's prayer, 1 K. viii. 37 (comp. 2 Chr. xx. 9), anticipated as a chastisement. Job and his friends agree in ascribing his disease to divine infliction; but the latter urge his sins as the cause. So, conversely, the healing character of God is invoked or promised, Ps. vi. 2, xli. 3, ciii. 3; Jer xxx. 17. Satanic agency appears also as procuring disease, Job ii. 7; Luke xiii. 11, 16. Diseases are also mentioned as ordinary calamities, *e. g.* the sickness of old age, headache (perhaps by sunstroke), as that of the Shunammite's son, that of Elisha, and that of Benhadad, and that of Joram, Gen. xlviii. 1; 1 Sam. xxx. 13; 2 K. iv. 20, viii. 7, 29, xiii. 14; 2 Chr. xxii. 6.

Among special diseases named in the O. T. are, ophthalmia (Gen. xxix. 17, מְכֹלֹת עֵינַיִם), which is perhaps more common in Syria and Egypt than anywhere else in the world; especially in the fig season,[z] the juice of the newly-ripe fruit having the power of giving it. It may occasion partial or total blindness (2 K. vi. 18). The eye-salve (*κολλύριον*, Rev. iii. 18; Hor. *Sat.* i.), was a remedy common to Orientals, Greeks, and Romans (see Hippocr. *κολλούριον*; Celsus, vi. 8, *de oculorum morbis*, (2) *de diversis collyriis*). Other diseases are—barrenness of women, which mandrakes were supposed to have the power of correcting (Gen. xx. 18; comp. xii. 17, xxx. 1, 2, 14-16)—"consumption,"[a] and several, the names of which are derived from various words, signifying to burn or to be hot (Lev. xxvi. 16; Deut. xxviii. 22; see FEVER); compare the kinds of fever distinguished by Hippocrates as *καῦσος* and *πῦρ*. The "burning boil," or "of a boil" (Lev. xiii. 23, צָרֶבֶת חִשָּׁחִין, LXX. *οὐλὴ τοῦ ἕλκους*) is again merely marked by the notion of an effect resembling that of fire, like the Greek *φλεγμονή*, or our "carbuncle;" it may possibly find an equivalent in the Damascus boil of the present time. The "botch (שְׁחִין) of Egypt" (Deut. xxviii. 27), is so vague a term as to yield a most uncertain sense; the plague, as known by its attendant *bubo*, has been suggested by Scheuchzer.[b] It is possible that the *Elephantiasis*

[a] To the authorities there adduced may be added some remarks by Michel Lévy (*Traité d'Hygiène*, 206-7), who ascribes them to a plethoric state producing a congestion of the veins of the rectum, and followed by piles. Blood is discharged from them periodically or continuously; thus the plethora is relieved, and hence the ancient opinion that hemorrhoids were beneficial. Sanguineous flux of the part may, however, arise from other causes than three various—*e. g.* ulceration, cancer, &c., of rectum. Wunderbar (*Bib. Talm. Med.* iii. 17 *d*) mentions a bloodless kind, distinguished by the Talmudists as even more dangerous, and these he supposes meant in 1 Sam. v. To these is added (vi. 5, 11, 18) a mention of עַכְבְּרֵיהֶם. (A. V. "mice;") but according to Lichtenstein in Ekrabura's *Biblioth.* vi. 467-86) a venomous solpuga is with some plausibility intended, so large, and so similar in form to a mouse, as to admit of its being even named by the same word. It is said to destroy and feed upon scorpions, and to attack in the parts alluded to. The reference given to Pliny, *H. N.* xxix. 4; but Pliny only merely the name, "solpuga:" the rest of the statement finds no foundation in him. See below, p. 306 *b*.

Wunderbar (3ttes Heft, p. 19) has another interpretation of the "mice."

[y] See a singular quotation from the Talmud *Shabbath*, 82, concerning the effect of tenesmus on the sphincter, Wunderbar, *Bib.-Tal. Med.* 3ttes Heft, p. 17. The Talmudists say that those who die of such sickness as Jehoram's die painfully, but with full consciousness.

[z] Comp. Hippocr. περὶ ὄψιος. *a.* ὀφθαλμίης τῆς ἐνετείου καὶ ἐνθημίου ξυμφέρει κάθαρσις κεφαλῆς καὶ τῆς κάτω κοιλίης.

[a] Possibly the pulmonary tuberculation of the West, which is not unknown in Syria, and common enough in Smyrna and in Egypt. The word שַׁחֶפֶת is from a root meaning "to waste away." In Zech. xiv. 12 a plague is described answering to that meaning,—an intense emaciation or atrophy; although no link of causation is hinted at, such sometimes results from severe internal abscesses.

[b] It should be noted that Hippocrates, in his *Epidemics*, makes mention of fevers attended with buboes, which affords presumption in favour of plague being not unknown. It is at any rate as old as the 1st century, A.D. (see Littré's *Hippocrates*, tom. ii. p. 585, and iii. p. 5. The

Graecorum may be intended by שְׁחִין, understood in the widest sense of a continued ulceration until the whole body, or the portion affected, may be regarded as one שְׁחִין. Of this disease some further notice will be taken below; at present it is observable that the same word is used to express the "boil" of Hezekiah. This was certainly a single locally confined eruption, and was probably a carbuncle, one of which may well be fatal, though a single "boil" in our sense of the word seldom is so. Dr. Mead supposes it to have been a fever terminating in an abscess. The diseases rendered "scab"[c] and "scurvy" in Lev. xxi. 20, xxii. 22, Deut. xxviii. 27, may be almost any skin disease, such as those known under the names of lepra, psoriaris, pityriasis, icthyosis, favus, or common itch. Some of these may be said to approach the type of leprosy [LEPROSY] as laid down in Scripture, although they do not appear to have involved ceremonial defilement, but only a blemish disqualifying for the priestly office. The quality of being incurable is added as a special curse, for these diseases are not generally so, or at any rate are common in milder forms. The "running of the reins" (Lev. xv. 2, 3, xxii. 4, marg.) may perhaps mean *gonorrhoea*.[d] If we compare Num. xxv. 1, xxxi. 7 with Josh. xxii. 17, there is ground for thinking that some disease of this class, derived from polluting sexual intercourse, remained among the people. The "issue" of xv. 19, may be [BLOOD, ISSUE OF] the *menorrhagia*, the duration of which in the East is sometimes, when not checked by remedies, for an indefinite period (Matt. ix. 20), or uterine hemorrhage from other causes. In Deut. xxviii. 35, is mentioned a disease attacking the "knees and legs," consisting in a "sore botch which cannot be healed," but extended, in the sequel of the verse, from the "sole of the foot to the top of the head." The latter part of the quotation would certainly accord with *Elephantiasis Graecorum;* but this, if the whole verse be a mere continuation of one described malady, would be in contradiction to the fact that this disease commences in the face, not in the lower members. On the other hand, a disease which affects the knees and legs, or more commonly one of them only—its principal feature being intumescence, distorting and altering all the proportions—is by a mere accident of language known as Elephantiasis *Arabum, Bucnemia Tropica* (Rayer, vol. iii. 839-841), or "Barbadoes leg," from being well known in that island. Supposing, however, that the affection of the knees and legs is something distinct, and that the latter part of the description applies to the *Elephantiasis Graecorum*,[f] the inertness and the all-pervading character of the mass are well expressed by it. This disease is what now passes under the name of "leprosy" (Michaelis, iii. 259)—the lepers, *e.g.* of the hill near the Zion gate of modern Jerusalem are elephantisiacs.[g] It has been asserted that there are two kinds, one painful, the other painless; but as regards Syria and the East this is contradicted. There the parts affected are quite benumbed and lose sensation. It is classed as a tubercular disease, not confined to the skin, but pervading the tissues and destroying the bones. It is not confined to any age or either sex. It first appears in person, but not always, about the face, as an indurated nodule (hence it is improperly called tubercular), which gradually enlarges, inflames, and ulcerates. Sometimes it commences in the neck or arms. The ulcers will heal spontaneously, but only after a long period, and after destroying a great deal of the neighbouring parts. If a joint be attacked, the ulceration will go on till its destruction is complete, the joints of finger, toe, &c., dropping off one by one. Frightful dreams and fetid breath are symptoms mentioned by some pathologists. Very nodules will develope themselves; and, if the face be the chief seat of the disease, it assumes a leonine[h] aspect, loathsome and hideous; the skin becomes

plague is referred to by writers of the 1st century, viz. Poseidonius and Rufus.

[c] Their terms in the respective versions are:—

גָּרָב, ψώρα ἀγρία, *scabies jugis.*

יַלֶּפֶת, λειχήν, *impetigo.*

[d] Or more probably *blennorrhoea* (mucous discharge). The existence of *gonorrhoea* in early times—save in the mild form—has been much disputed. Michel Lévy (*Traité d'Hygiène*, p. 7) considers the affirmative as established by the above passage, and says of syphilis, "Que pour notre part, nous n'avons jamais pu considérer comme une nouveauté du xv.e siecle." He certainly gives some strong historical evidence against the view that it was introduced into France by Spanish troops under Gonzalvo de Cordova on their return from the New World, and so into the rest of Europe, where it was known as the *morbus Gallicus*. He adds, "La syphilis est perdue confusement dans la pathologie ancienne par la diversité de ses symptômes et de ses altérations; leur interprétation collective, et leur redaction en une seule unité morbide, a fait croire à l'introduction d'une maladie nouvelle." See also Freind's *History of Med.*, Dr. Mead, Michaelis, Reinhart (*Bibelkrankheiten*), Schmidt (*Biblischer Med.*), and others. Wunderbar (*Bib.-Talm. Med.* iii. 20, commenting on Lev. xv., and comparing Mishna, *Zabim*, ii. 2, and Maimon. *ad loc.*) thinks that *gonorrhoea benigna* was in the mind of the latter writers. Dr. Adams, the editor of *Paul. Aegin.* (Sydenh. Soc., ii. 14), considers syphilis a modified form of elephantiasis. For all ancient notices of the cognate diseases see that work, i. 593 foll.

[e] The Arabs call *Elephantiasis Graecorum* جذام (*judhâm*) = mutilation, from the gradual dropping off of the joints of the extremities. They give to *E. Arabum* the name of داء الفيل. *Dâ'l-fîl* = *morbus elephantis* from the leg when swelled resembling that of the animal: but the latter disease is quite distinct from the former.

[f] For its ancient description see Celsus, iii. 25, *de Elephantiasi*. Galen (*de Arte Curatorià ad Glauc.*, iii. 8, *de Cancro et Eleph.*) recommends viper's flesh, gives anecdotes of cases, and adds that the disorder was common in Alexandria. In Hippocr. (*Prorrhetic.* ii. *ap. fin.*) is mentioned ἡ νοῦσος ἡ φθινική καλεομένη, but in the glossary of Galen is found, ἡ Φοινικὴ νοῦσος· ἡ καὶ Φοινίκην καὶ κατὰ τὰ ἀνατολικὰ μέρη πλεονάζουσα. Δηλοῦσθαι δὲ κἀνταῦθα δοκεῖ ἡ ἐλεφαντίασις.

[g] Schilling *de Leprâ, Animadv. in* Casselium ad § xix. says, "persuasum habeo lepram ab elephantiasi non differre nisi gradu; ad § xxiii. he illustrates Num. xii. 12, by his own experience, in dissecting a woman dead in childbed, as follows:—"Corrupti fetus dimidia pars in utero adhuc haerebat. Aperto utero tam immanis sparsa batur fetor, ut non solum omnes adstantes suffocarentur" &c. He thinks that the point of Moses' simile is the ill odour, which he ascribes to lepers, *i. e.* elephantiasis.

[h] Hence called also *Leontiasis*. Many have attributed to these wretched creatures a *libido inexplebilis* (see *Proceedings of Med. and Chirurg. Soc. of London*, Jan. 1860, iii. 164, from which some of the above remarks are taken). This is denied by Dr. Robert Sim (from a close study of the disease in Jerusalem), save in so far as idleness and inactivity, with animal wants supplied, may conduce to it.

thick, rugose, and livid; the eyes are fierce and staring, and the hair generally falls off from all the parts affected. When the throat is attacked the voice shares the affection, and sinks to a hoarse, husky whisper. These two symptoms are eminently characteristic. The patient will become bed-ridden, and, though a mass of bodily corruption, seem happy and contented with his sad condition, until sinking exhausted under the ravages of the disease, he is generally carried off, at least in Syria, by diarrhoea. It is hereditary, and may be inoculated, but does not propagate itself by the closest contact;[l] *e.g.* two women in the aforesaid leper-huts remained uncontaminated though their husbands were both affected, and yet the children born to them were, like the fathers, elephantisiac, and became so in early life. On the children of diseased parents a watch for the appearance of the malady is kept; but no one is afraid of infection, and the neighbours mix freely with them, though, like the lepers of the O. T., they live "in a several house." It became first prevalent in Europe during the crusades, and by their means was diffused, and the ambiguity of designating it leprosy then originated, and has been generally since retained. Pliny (*Nat. Hist.* xxvi. 5) asserts that it was unknown in Italy till the time of Pompey the Great, when it was imported from Egypt, but soon became extinct (*Paul. Aegin.* ed. Sydenh. Soc. ii. 6). It is, however, broadly distinguished from the *Λέπρα*, *λεύκη*, &c. of the Greeks by name and symptoms, no less than by Roman medical and even popular writers; comp. Lucretius, whose mention of it is the earliest—

"Est elephas morbus, qui propter flumina Nili,
Gignitur Aegypto in mediâ, neque praeterea usquam."

It is nearly extinct in Europe, save in Spain and Norway. A case was seen lately in the Crimea, but may have been produced elsewhere. It prevails in Turkey and the Greek Archipelago. One case, however, indigenous in England, is recorded amongst the medical fac-similes at Guy's Hospital. In Granada it was generally fatal after eight or ten years, whatever the treatment.

This favours the correspondence of this disease with one of those evil diseases of Egypt,[k] possibly its "botch," threatened Deut. xxviii. 27, 35. This "botch," however, seems more probably to mean the foul ulcer mentioned by Aretaeus (*de Sign. et Cur. Morb. Acut.* i. 9), and called by him *ἄφθα* or *ἰσχάδη*. He ascribes its frequency in Egypt to the mixed vegetable diet there followed, and to the use of the turbid water of the Nile, but adds that it is common in Coelo-Syria. The Talmud speaks of the Elephantiasis (*Baba Kama*, 80 *b.*) as being "moist without and dry within" (Wunderbar, *Bibl.-Talmudische Med.* 3ttes Heft, 10, 11). Advanced cases are said to have a cancerous aspect, and some[m] even class it as a form of cancer, a disease dependent on faults of nutrition. It has been asserted that this, which is perhaps the most dreadful disease of the East, was Job's malady. Origen, *Hexapla* on Job ii. 7, mentions, that one of the Greek versions gives it, *loc. cit.*, as the affliction which befel him. Wunderbar (*ut sup.* p. 10) supposes it to have been the Tyrian leprosy, resting chiefly on the itching[n] implied, as he supposes, by Job ii. 7, 8. Schmidt (*Biblischer Med.* iv. 4) thinks the "sore boil" may indicate some graver[o] disease, or concurrence of diseases. But there is no need to go beyond the statement of Scripture, which speaks not only of this "boil," but of "skin loathsome and broken," "covered with worms and clods of dust;" the second symptom is the result of the first, and the "worms" are probably the larvae of some fly, known so to infest and make its *nidus* in any wound or sore exposed to the air, and to increase rapidly in size. The "clods of dust" would of course follow from his "sitting in ashes." The "breath strange to his wife," if it be not a figurative expression for her estrangement from him, may imply a fetor, which in such a state of body hardly requires explanation. The expression my "bowels boiled" (xxx. 27), may refer to the burning sensation in the stomach and bowels, caused by acrid bile, which is common in ague. Aretaeus (*de Cur. Morb. Acut.* ii. 3) has a similar expression, *θερμασίη τῶν σπλάγχνων οἷον ἀπὸ πυρὸς*, as attending syncope.

The "scaring dreams" and "terrifying visions," are perhaps a mere symptom[p] of the state of mind bewildered by unaccountable afflictions. The intense emaciation was (xxxiii. 21) perhaps the mere result of protracted sickness.

The disease of king Antiochus (2 Macc. ix. 5-10, &c.) is that of a boil breeding worms (*ulcus verminosum*). So Sulla, Pherecydes, and Alcman the poet are mentioned (Plut. *vita Sullae*) as similar cases. The examples of both the Herods (Jos. *Ant.* xvii. 6, §5, *B. J.* i. 33, §5) may also be adduced, as that of Pheretime (Herod. iv. 205). There is some doubt whether this disease be not allied to phthiriasis, in which lice are bred, and cause ulcers. This condition may originate either in a sore, or in a morbid habit of body brought on by uncleanliness, suppressed perspiration, or neglect; but the vermination, if it did not commence in a sore, would produce one. Dr. Mason Good, (iv. 504-6), speaking of *μάλις*, *μαλιασμός* = cutaneous vermination, mentions a case in the Westminster Infirmary, and an opinion that universal phthiriasis was no unfrequent disease among the ancients; he also states (p. 500) that in gangrenous ulcers, especially in warm climates, innumerable grubs or maggots will appear almost every morning. The camel, and other creatures, are known to be the habitat of similar parasites. There are also cases of vermination without any wound or faulty outward state, such as the *Vena Medinensis*, known in Africa as the Guinea-worm,[q] of which Galen had heard only, breeding

[l] Jahn (*Heb. Ant.*, Upham's translation, p. 206) denies this.

[k] The editor of *Paul. Aegin.* (Sydenham Society, ii. 14) is convinced that the syphilis of modern times is a modified form of the elephantiasis.

[m] Such is the opinion of Dr. R. Sim, expressed in a private letter to the writer. But see a letter of his to the *Times and Gazette*, April 14, 1860.

[n] The suppuration, &c., of ulcers, appears at least equally likely to be intended.

[o] He refers to Hippocr. *Lib. de Med.* tom. viii. *μειζόνων ἢ κατὰ κακοήθειαν.*

[p] Hippocrates mentions, ii. 514, ed. Kühn, Lips. 1826, as a symptom of fever, that the patient *φοβέεται ἀπὸ ἐνυπνίων*. See also i. 592, *περὶ ἱερῆς νόσου . . . δείματα νυκτὸς καὶ φόβοι.*

[q] Rayer, vol. iii. 808-819 gives a list of parasites, most of them in the skin. This "Guinea-worm," it appears, is also found in Arabia Petraea, on the coasts of the Caspian and Persian Gulf, on the Ganges, in Upper Egypt and Abyssinia (*ib.* 814). Dr. Mead refers Herod's disease to *ἐντοζῶα*, or intestinal worms. Shapter, without due foundation, objects that the word in that case should have been not *σκώληξ*, but *ἕλμινθ* (*Medica Sacra*, p. 182).

under the skin and needing to be drawn out carefully by a needle, lest it break, when great soreness and suppuration succeed (Freind, *Hist. of Med.* i. 49; De Mandelslo's *Travels*, p. 4; and *Paul. Aegin.* t. iv. Sydenh. Soc. ed.).

In Deut. xxviii. 65, it is possible that a palpitation of the heart is intended to be spoken of (comp. Gen. xlv. 26). In Mark ix. 17 (compare Luke ix. 38) we have an apparent case of epilepsy, shown especially in the foaming, falling, wallowing, and similar violent symptoms mentioned; this might easily be a form of demoniacal manifestation. The case of extreme hunger recorded, 1 Sam. xiv., was merely the result of exhaustive fatigue; but it is remarkable that the Bulimia of which Xenophon speaks (*Anab.* iv. 5, 7), was remedied by an application in which "honey" (comp. 1 Sam. xiv. 27) was the chief ingredient.

Besides the common injuries of wounding, bruising, striking out eye, tooth, &c., we have in Ex. xxi. 22, the case of miscarriage produced by a blow, push, &c., damaging the fetus.

The plague of "boils and blains" is *not* said to have been fatal to man, as the murrain preceding was to cattle; this alone would seem to contradict the notion of Shapter (*Medic. Sacr.* p. 113), that the disorder in question was smallpox,[f] which, wherever it has appeared, until mitigated by vaccination, has been fatal to a great part, perhaps a majority of those seized. The smallpox also generally takes some days to pronounce and mature, which seems opposed to the Mosaic account. The expression of Ex. ix. 10, a "boil"[g] flourishing, or ebullient with blains, may perhaps be a disease analogous to phlegmonous erysipelas, or even common erysipelas, which is often accompanied by vesications such as the word "blains" might fitly describe.[h]

The "withered hand" of Jeroboam (1 K. xiii. 4-6), and of the man, Mat. xii. 10-13 (comp. Luke vi. 10), is such an effect as is known to follow from the obliteration of the main artery of any member, or from paralysis of the principal nerve, either through disease or through injury. A case with a symptom exactly parallel to that of Jeroboam is mentioned in the life of Gabriel, an Arab physician. It was that of a woman whose hand had become rigid in the act of swinging,[i] and remained in the extended posture. The most remarkable feature in the case, as related, is the remedy, which consisted in alarm acting on the nerves, inducing a sudden and spontaneous effort to use the limb—an effort which, like that of the dumb son of Croesus (Herod. i. 85), was paradoxically successful. The case of the widow's son restored by Elisha (2 K. iv. 19), was probably one of sunstroke.

The disease of Asa "in his feet" (Schmidt, *Bibl. Med.* iii. 5, §2), which attacked him in his old age (1 K. xv. 23; 2 Chr. xvi. 12) and became exceeding great, may have been either *oedema*, swelling, or *podagra*, gout. The former is common in aged persons, in whom, owing to the difficulty of the return upwards of the sluggish blood, its watery part stays in the feet. The latter, though rare in the East at present, is mentioned by the Talmudists (*Sotah*, 10 *a*, and *Sanhedrin*, 48 *b*), and there is no reason why it may not have been known in Asa's time. It occurs in Hippocr. *Aphor.* vi., *Prognost.* 15; Celsus, iv. 24; Aretaeus, *Morb. Chron.* ii. 12, and other ancient writers.[k]

In 1 Macc. vi. 8, occurs a mention of "sickness of grief;" in Eccles. xxxvii. 30, of sickness caused by excess, which require only a passing mention. The disease of Nebuchadnezzar has been viewed by John as a mental and purely subjective malady. It is not easy to see how this satisfies the plain emphatic statement of Dan. iv. 33, which seems to include, it is true, mental derangement, but to assert a degraded bodily state[l] to some extent, and a corresponding change of habits. We may regard it as Mead (*Med. Sacr.* vii.), following Burton's Anatomy of Melancholy, does, as a species of the melancholy known as Lycanthropia[m] (*Paulus Aegin.* iii. 16; *Avicenna*, iii. 1, 5, 22). Persons so affected wander like wolves in sepulchres by night, and imitate the howling of a wolf or a dog. Further, there are well attested accounts of wild or half-wild human creatures, of either sex, who have lived as beasts, losing human consciousness, and acquiring a superhuman ferocity, activity, and swiftness. Either the lycanthropic patients or these latter may furnish a partial analogy to Nebuchadnezzar, in regard to the various points of modified outward appearance and habits ascribed to him. Nor would it seem impossible that a sustained lycanthropia might produce this latter condition.

Here should be noticed the mental malady of Saul.[n] His melancholy seems to have had its origin in his sin; it was therefore grounded in his moral nature, but extended its effects, as commonly, to the intellectual. The "evil spirit from God," whatever it mean, was no part of the medical features of his case, and may therefore be excluded from the present notice. Music, which soothed him for a while, has entered largely into the milder modern treatment of lunacy.

The palsy meets us in the N. T. only, and its features too familiar to need special remark. The words "grievously tormented" (Matt. viii. 6) have been commented on by Baier (*de Paral.* 32), to the effect that examples of acutely painful paralysis are not wanting in modern pathology, *e.g.* when paralysis is complicated with neuralgia. But if the statement be viewed with doubt, we might under-

[f] It has been much debated whether the smallpox be an ancient disease. On the whole, perhaps, the arguments in favour of its not being such predominate, chiefly on account of the strongly marked character of the symptoms, which makes the negative argument of unusual weight.

[g] שְׁחִין אַבַעְבֻּעוֹת פֹּרֵחַ.

[h] This is Dr. Robert Sim's opinion. On comparing, however, the means used to produce the disorder (Ex. ix. 8), an analogy is perceptible to what is called "bricklayer's itch," and therefore to leprosy. [LEPROSY.] A disease involving a white spot breaking forth from a boil related to leprosy, and clean or unclean according to symptoms specified, occurs under the general *locus* of leprosy (Lev. xiii. 18 23).

[i] "Inter jactandum se funibus... remanavit illa (manus) extensa, ita ut retrahere ipsam nequiret (Freind's *Hist. Med.* ii. Append. p. 2).

[k] Seneca mentions it (*Epist.* 95) as an extreme note of the female depravity current in his own times, that even the female sex was become liable to gout.

[l] The "eagles' feathers" and "birds' claws" are probably used only in illustration, not necessarily as describing a new type to which the hair, &c., approximated. Comp. the simile of Ps. ciii. 5, and that of 2 K. v. 14.

[m] Comp. Virg. *Bucol.* viii. 97:—

"Saepe lupum fieri et se condere silvis."

[n] The Targ. of Jonathan renders the Heb. מְשֻׁגָּע, 1 Sam. x. 10, by "he was mad or insane" (Jahn, Pilpan's transl. 213-3).

stand the Greek expression (*βασανιζόμενος*) as used of paralysis agitans, or even of chorea[b] (St. Vitus' dance), in both of which the patient, being never still for a moment save when asleep, might well be so described. The woman's case who was "bowed together" by "a spirit of infirmity," may probably have been paralytic (Luke xiii. 11). If the dorsal muscles were affected, those of the chest and abdomen, from want of resistance would undergo contraction, and thus cause the patient to suffer as described.

Gangrene (*γάγγραινα*, Celsus, vii. 33, *de gangrenâ*), or mortification in its various forms, is a totally different disorder from the "canker" of the A. V. in 2 Tim. ii. 17. Both gangrene and cancer were common in all the countries familiar to the Scriptural writers, and neither differs from the modern disease of the same name (Dr. M. Good, ii. 669, &c., and 579, &c.).

In Is. xxvi. 18; Ps. vii. 14, there seems an allusion to false conception, in which, though attended by pains of quasi-labour and other ordinary symptoms, the womb has been found unimpregnated, and no delivery has followed. The medical term (Dr. M. Good, iv. 188) *ἐμπνευμάτωσις*, *mola ventosa*, suggests the Scriptural language, "we have as it were brought forth wind;" the whole passage is figurative for disappointment after great effort.[c]

Poison, as a means of destroying life, hardly occurs in the Bible, save as applied to arrows (Job vi. 4). In Zech. xii. 2, the marg. gives "poison" as an alternative rendering, which does not seem preferable; intoxication being probably meant. In the annals of the Herods poisons occur as the resource of stealthy murder.[d]

The bite or sting of venomous beasts can hardly be treated as a disease; but in connexion with the "fiery (*i. e.* venomous) serpents" of Num. xxi. 6, and the deliverance from death of those bitten, it deserves a notice. Even the Talmud acknowledges that the healing power lay not in the brazen serpent itself, but "as soon as they feared the Most High, and uplifted their hearts to their Heavenly Father they were healed, and in default of this were brought to nought." Thus the brazen figure was symbolical only; or, according to the lovers of purely natural explanation, was the stage-trick to cover a false miracle. It was customary to consecrate the image of the affliction, either in its cause or in its effect, as in the golden emerods, golden mice, of 1 Sam. vi. 4, 8, and in the ex-votos common in Egypt even before the exodus; and these may be compared with this setting up of the brazen serpent. Thus we have in it only an instance of the current custom, fanciful or superstitious, being sublimed to a higher purpose.

The bite of a white she-mule, perhaps in the rutting season, is according to the Talmudists fatal; and they also mention that of a mad dog, with certain symptoms by which to discern his state (Wunderbar, *ut sup.* 21). The scorpion and centipede are natives of the Levant (Rev. ix. 5, 10), and, with a large variety of serpents, swarm there. To these, according to Lichtenstein, should be added a venomous solpuga,[e] or large spider, similar to the Calabrian Tarantula; but the passage in Pliny[f] adduced (*H.N.* xxix. 29), gives no satisfactory ground for the theory based upon it, that its bite was the cause of the emerods.[g] It is however remarkable that Pliny mentions with some fulness, a *mus araneus*—not a spider resembling a mouse, but a mouse resembling a spider—the shrew-mouse, and called *araneus*, Isidorus[h] says from this resemblance, or from its eating spiders. Its bite was venomous, caused mortification of the part, and a spreading ulcer attended with inward griping pains, and when crushed on the wound was its own best antidote.[i]

The disease of old age has acquired a place in Biblical nosology chiefly owing to the elegant allegory into which "The Preacher" throws the successive tokens of the ravage of time on man (Eccl. xii.). The symptoms enumerated have each their significance for the physician, for, though his art can do little to arrest them, they yet mark an altered condition calling for a treatment of its own. "The Preacher" divides the sum of human existence into that period which involves every mode of growth, and that which involves every mode of decline. The first reaches from the point of birth or even of generation, onwards to the attainment of the "grand climacteric," and the second from that epoch backwards through a corresponding period of decline till the point of dissolution is reached.[k] This latter course is marked in metaphor by the darkening of the

[b] John (Upham's transl. 332) suggests that cramp, twisting the limb round as if in torture, may have been intended. This suits *βασανιζόμενος*, no doubt, but not *παραλυόμενος*.

[c] For an account of the complaint, see *Paul. Aegin.*, ed. Syd. Soc. i. p. 632.

[d] In Chwolson's *Ueberreste d. Altbab. Literatur*, p. 129, Ibn Wahschijjah's treatise on poisons contains references to several older writings by authors of other nations on that subject. His commentator, Jârbûqâ, treats of the existence and effects of poisons and antidotes, and in an independent work of his own thus classifies the subject: (1) of poisons which kill at sight (wenn sie man nur ansieht); (2) of those which kill through sound (Schall oder Laut); (3) of those which kill by smelling; (4) of those which kill by reaching the interior of the body; (5) of those which kill by contact, with special mention of the poisoning of garments.

[e] Comp. Lucan, *Pharsalia*, ix. 837-8: "Quis calcare tuas timuit solpuga latebras," &c.

[f] His words are: "Est et formicarum genus venenatum, nam fere in Italiâ solpugas Cicero appellat."

[g] He says that the solpuga causes such swellings on the parts of the female camel, and that they are called by the same name in Arabic as the Heb. עֳפָלִים, which simply means "swellings." He supposes the men might have been "versetzt bei der Befriedigung natürlicher Bedürfnisse." He seems not to have given due weight to the expression of 1 Sam. vi. 5, "mice which mar the land," which seems to distinguish the "land" from the people in a way fatal to the ingenious notion he supports. For the multiplication of these and similar creatures to an extraordinary and fatal degree, comp. Varro, *Fragm. ap. fin.* "M. Varro autor est, a cuniculis suffossum in Hispaniâ oppidum, a talpis in Thessaliâ, ab ranis civitatem in Galliâ pulsam, ab locustis in Africâ, ex Gyaro Cycladum insulâ *incolas a muribus fugatos.*"

[h] His words are: "Mus araneus cujus morsu aranea moritur est in Sardiniâ animal perexiguum aranese formâ quae solifuga dicitur, eo quod diem fugiat" (*Orig.* xii. 3).

[i] As regards the scorpion, this belief and practice still prevails in Palestine. Pliny says (*H. N.* xxix. 21), after prescribing the ashes of a ram's hoof, young of a weasel, &c., "si jumenta momorderit mus (*i. e.* araneus) recens cum sale imponitur, aut fel vespertilionis ex aceto. Et ipse mus araneus contra se remedio est divulsus et impositus," &c. In cold climates, it seems, the venom of the shrew-mouse is not perceptible.

[k] These are respectively called the ימי העליה see the ימי העמידה of the Rabbins (Wunderbar, 21st Heft). The same idea appears in Soph. *Trachin.*

great lights of nature, and the ensuing senson of life is compared to the broken weather of the wet season, setting in when summer is gone, when after every shower fresh clouds are in the sky, as contrasted with the showers of other seasons, which pass away into clearness. Such he means are the ailments and troubles of declining age, as compared with those of advancing life. The "keepers of the house" are perhaps the ribs which support the frame, or the arms and shoulders which enwrap and protect it. Their "trembling," especially that of the arms, &c., is a sure sign of vigour past. The "strong men" are its supporters, the lower limbs "bowing themselves" under the weight they once so lightly bore. The "grinding" hardly needs to be explained of the teeth now become "few." The "lookers from the windows" are the pupils of the eyes, now "darkened," as Isaac's were, and Eli's; and Moses, though spared the dimness, was yet in that very exemption a marvel (Gen. xxvii., comp. xlviii. 10; 1 Sam. iv. 15; Deut. xxxiv. 7). The "doors shut" represent the dulness of those other senses which are the portals of knowledge; thus the taste and smell, as in the case of Barzillai, become impaired, and the ears stopped against sound. The "rising up at the voice of a bird" pourtrays the light, soon-fleeting, easily-broken slumber of the aged man; or possibly, and more literally, actual waking in the early morning, when first the cock crows, may be intended. The "daughters of music brought low," suggest the

> —— "big manly voice
> Now turn'd again to childish treble;"

and also, as illustrated again by Barzillai, the failure in the discernment and the utterance of musical notes. The fears of old age are next noticed: "They shall be afraid of *that which is high*;"[m] an obscure expression, perhaps, for what are popularly called "nervous" terrors, exaggerating and magnifying every object of alarm, and "making," as the saying is, "mountains of molehills." "Fear in the way"[n] is at first less obvious; but we observe that nothing unnerves and agitates an old person more than the prospect of a long journey. Thus regarded, it becomes a fine and subtile touch in the description of decrepitude. All readiness to haste is arrested and a numb despondency succeeds. The "flourishing" of "the almond-tree" is still more obscure; but we observe this tree in Palestine blossoming when others show no sign of vegetation, and when it is dead winter all around—no ill type, perhaps, of the old man who has survived his own contemporaries and many of his juniors.[o] Youthful lusts die out, and their organs, of which "the grasshopper"[p] is perhaps a figure, are relaxed. The "silver cord" may be that of nervous sensation,[q] or motion, or even the spinal marrow itself. Perhaps some incapacity of retention may be signified by the "golden bowl broken;" the "pitcher broken at the well" suggests some vital supply stopping at the usual source—derangement perhaps of the digestion or of the respiration; the "wheel shivered at the cistern," conveys, through the image of the water-lifting process familiar in irrigation, the notion of the blood, pumped, as it were, through the vessels, and fertilising the whole system; for "the blood is the life."

This careful register of the tokens of decline might lead us to expect great care for the preservation of health and strength; and this indeed is found to mark the Mosaic system, in the regulations concerning diet,[r] the "divers washings," and the pollution imputed to a corpse—nay, even in circumcision itself. These served not only the ceremonial purpose of imparting self-consciousness to the Hebrew, and keeping him distinct from alien admixture, but had a sanitary aspect of rare wisdom, when we regard the country, the climate, and the age. The laws of diet had the effect of tempering by a just admixture of the organic substances of the animal and vegetable kingdoms the regimen of Hebrew families, and thus providing for the vigour of future ages, as well as checking the stimulus which the predominant use of animal food gives to the passions. To these effects may be ascribed the immunity often enjoyed by the Hebrew race[s] amidst epidemics devastating the countries of their sojourn. The best and often the sole possible exercise of medicine is to prevent disease. Moses could not legislate for cure, but his rules did for the great mass of the people what no therapeutics however consummate could do,—they gave the best security for the public health by provisions incorporated in the public economy. Whether we regard the laws which secluded the leper, as designed to prevent infection or repress the dread of it, their wisdom is nearly equal, for of all terrors the imaginary are the most terrible. The laws restricting marriage have in general a similar tendency, degeneracy being the penalty of a departure from those which forbid commixture of near kin. Michel Levy remarks on the salubrious tendency of the law of marital separation (Lev. xv.) imposed (**Lévy**, *Traité d'Hygiène*, p. 8). The precept also concerning purity on the necessary occasions in a desert encampment (Deut. xxiii. 12-14), enjoining the return of the elements of productiveness to the soil, would probably become the basis of the municipal regulations having for their object a similar purity in towns. The consequences of its neglect in such encampments is shown by an example quoted by Michel Levy, as mentioned by M. de Lamartine (*ib.* 8, 9). Length of life was regarded as a mark of divine favour, and the divine legislator had pointed out the means of ordinarily ensuring a

[m] Or, even more simply, these words may be understood as meaning that old men have neither vigour nor breath for going up hills, mountains, or anything else that is "high;" nay, for them the plain even road has its terrors—they walk timidly and cautiously even along that.

[n] Compare also perhaps the dictum of the slothful man, Prov. xxii. 13, "There is a lion in the way."

[o] In the same strain Juvenal (Sat. x. 243-5) says:—

> Haec data poena diu viventibus, ut renovatâ
> Semper clade domûs, multis in luctibus inque
> Perpetuo moerore et nigrâ veste senescant."

[p] Dr Mead (*Med. Sacr.* vii.) thinks that the scrotum, swoln by a rupture, is perhaps meant to be typified by the shape of the grasshopper. He renders the Hebrew וְיִסְתַּבֵּל חָגָב after the LXX. ἐναχύνθη ἡ ἀκρὶς, Vulg. *impinguabitur locusta*. Comp. Hor. *Odes*, ii. xi. 7, 8

[q] We find hints of the nerves proceeding in pairs from the brain, both in the Talmudical writers and in Aretæus (See below in the text.

[r] Michel Lévy quotes Hallé as acknowledging the salutary character of the prohibition to eat pork, which he says is "sujet à une altération du tissu graisseux très analogue à la dégenérescence lépreuse."

[s] This was said of the Jews in London during the cholera attack of 1848.

taller measure of it to the people at large than could, according to physical laws, otherwise be hoped for. Perhaps the extraordinary means taken to prolong vitality may be referred to this source (1 K. i. 2), and there is no reason why the case of David should be deemed a singular one. We may also compare the apparent influence of vital warmth enhanced to a miraculous degree, but having, perhaps, a physical law as its basis, in the cases of Elijah, Elisha, and the sons of the widow of Zarephath, and the Shunammite. Wunderbar[1] has collected several examples of such influence similarly exerted, which however he seems to exaggerate to an absurd pitch. Yet it would seem not against analogy to suppose, that, as pernicious exhalations, miasmata, &c., may pass from the sick and affect the healthy, so there should be a reciprocal action in favour of health. The climate of Palestine afforded a great range of temperature within a narrow compass,—*e. g.* a long sea-coast, a long deep valley (that of the Jordan), a broad flat plain (Esdraelon), a large portion of table-land (Judah and Ephraim), and the higher elevations of Carmel, Tabor, the lesser and greater Hermon, &c. Thus it partakes of nearly all supportable climates.[a] In October its rainy season begins with moist westerly winds. In November the trees are bare. In December snow and ice are often found, but never lie long, and only during the north wind's prevalence. The cold disappears at the end of February, and the "latter rain" sets in, lasting through March to the middle of April, when thunderstorms are common, torrents swell, and the heat rises in the low grounds. At the end of April the hot season begins, but preserves moderation till June, thence till September becomes extreme; and during all this period rain seldom occurs, but often heavy dews prevail. In September it commences to be cool, first at night, and sometimes the rain begins to fall at the end of it. The migration with the season from an inland to a sea-coast position, from low to high ground, &c., was a point of social development never systematically reached during the Scriptural history of Palestine. But men inhabiting the same regions for centuries could hardly fail to notice the connexion between the air and moisture of a place and human health, and those favoured by circumstances would certainly turn their knowledge to account. The Talmudists speak of the north wind as preservative of life, and the south and east winds as exhaustive, but the south as the most insupportable of all, coming hot and dry from the deserts, producing abortion, tainting the babe yet unborn, and corroding the pearls in the sea. Further, they dissuade from performing circumcision or venesection during its prevalence (*Jebamoth*, 72 *a*, *ap.* Wunderbar, 2tes Heft, ii. *A.*). It is stated that "the marriage-bed placed between north and south will be blessed with male issue" (*Berachoth*, 15, *b.*), which may, Wunderbar thinks, be interpreted of the temperature when moderate, and in neither extreme (which these winds respectively represent), as most favouring fecundity. If the fact be so, it is more probably related to the phenomena of magnetism, in connexion with which the same theory has been lately revived. A number of precepts are given by the same authorities in reference to health, *e g.* eating slowly, not contracting a sedentary habit, regularity in natural operations, cheerfulness of temperament, due sleep (especially early morning sleep is recommended), but not somnolence by day (Wunderbar, *ut sup.*).

The rite of circumcision, besides its special surgical operation, deserves some notice in connexion with the general question of the health, longevity, and fecundity of the race with whose history it is identified. Besides being a mark of the covenant and a symbol of purity, it was perhaps also a protest against the phallus-worship, which has a remote antiquity in the corruption of mankind, and of which we have some trace in the Egyptian myth of Osiris. It has been asserted also (Wunderbar, 3tes Heft, p. 25) that it distinctly contributed to increase the fruitfulness of the race, and to check inordinate desires in the individual. Its beneficial effects in such a climate as that of Egypt and Syria, as tending to promote cleanliness, to prevent or reduce irritation, and thereby to stop the way against various disorders, have been the subject of comment to various writers on hygiene.[x] In particular a troublesome and sometimes fatal kind of boil (*phymosis* and *paraphymosis*) is mentioned as occurring commonly in those regions, but only to the uncircumcised. It is stated by Josephus (*Cont. Ap.* ii. 13) that Apion, against whom he wrote, having at first derided circumcision, was circumcised of necessity by reason of such a boil, of which, after suffering great pain, he died. Philo also appears to speak of the same benefit when he speaks of the "anthrax" infesting those who retain the foreskin. Medical authorities have also stated that the capacity of imbibing syphilitic virus is less, and that this has been proved experimentally by comparing Jewish with other, *e. g.* Christian populations (Wunderbar, 3tes Heft, p. 27). The operation itself[y] consisted of originally a mere[a] incision; to which a further stripping[a] off the skin from the part, and a custom of sucking[b] the blood from the wound was in a later period added, owing to the attempts of Jews of the Maccabean period, and later (1 Macc. i. 15; Joseph. *Ant.* xii. 5, §1: comp. 1 Cor. vii. 8) to cultivate heathen practices. [CIRCUMCISION.] The reduction of the remaining portion of the *praeputium* after the more simple operation, so as to cover what it had exposed, known as *epispasmus*, accomplished by the elasticity of the skin itself, was what this anti-Judaic practice sought to effect, and what the later, more complicated and severe, operation frustrated. To these were subjoined the use of

[1] Biblisch-Talmud. Med. 2tes Heft, I. D. pp. 15-17. He speaks of the result ensuing from shaking hands with men's hands, &c.

[a] The possession of an abundance of salt tended to banish much disease (Ps. lx. 2; 2 Sam. viii. 13; 1 Chr. xviii. 12). Salt-pits (Zeph. ii. 9) are still dug by the Arabs on the shore of the Dead Sea. For the use of salt to a newborn infant, Ex. xvi. 4, comp. Galen *de Sanit.* Hb. i. cap. 7.

[x] So some remarks in Michel Lévy, *Traité d'Hygiène*, Paris 1850: "Rien de plus rebutant que cette sorte de mutilation rien de plus favorable au developpement des accidents syphilitiques." Circumcision is said to be also practised among the natives of Madagascar, "qui ne paraissent avoir aucune notion du Judaisme ni du Mahométisme" (p. 11, note).

[y] There is a good modern account of circumcision in the *Dublin Medical Press*, May 19, 1858, by Dr. Joseph Hirschfeld (from *Oesterreich. Zeitschrift*).

[a] Known as the חֹתֶךְ, a word meaning "cut."

[a] Called the פְּרִיעָה, from פָּרַע, "to expose."

[b] Called Mezixa, from מָצַץ, "to suck." This counteracted a tendency to inflammation.

the warm-bath, before and after the operation. pounded cummin as a styptic, and a mixture of wine and oil to heal the wound. It is remarkable that the tightly-swathed rollers which formed the first covering of the new-born child (Luke ii. 7) are still retained among modern Jews at the circumcision of a child, effectually preventing any movement of the body or limbs (Wunderbar,[c] p. 29). No surgical operation beyond this finds a place in Holy Scripture, unless indeed that adverted to under the article Eunuch. [EUNUCH.] The Talmudists speak of two operations to assist birth, one known as קריעת הדופן (*gastrotomia*), and intended to assist parturition, not necessarily fatal to the mother; the other known as קריעת הבטן, (*hysterotomia, sectio caesarea*), which was seldom practised save in the case of death in the crisis of labour, or if attempted on the living was either fatal, or at least destructive of the powers of maternity. An operation is also mentioned by the same authorities having for its object the extraction piecemeal of an otherwise inextricable foetus (*ibid.* pp. 53, &c.). Wunderbar enumerates from the Mishna and Talmud fifty-six surgical instruments or pieces of apparatus; of these, however, the following only are at all alluded to in Scripture.[d] A cutting instrument, called צור, supposed a "sharp stone" (Ex. iv. 25). Such was probably the "Aethiopian stone" mentioned by Herodotus (ii. 86), and Pliny speaks of what he calls *Testa samia*, as a similar implement. Zipporah seems to have caught up the first instrument which came to hand in her apprehension for the life of her husband. The "knife" (מאכלת) of Josh. v. 2 was probably a more refined instrument for the same purpose. An "awl" (מרצע), is mentioned (Ex. xxi. 6) as used to bore through the ear of the bondman who refused release, and is supposed to have been a surgical instrument.

A seat of delivery called in Scripture אבנים, Ex. i. 16, by the Talmudists משבר (comp. 2 K. xix. 3), "the stools;" but some have doubted whether the word used by Moses does not mean rather the uterus itself, as that which moulds[e] and shapes the infant. Delivery upon a seat or stool is, however, a common practice in France at this day, and also in Palestine.

The "roller to bind" of Ez. xxx. 21 was for a broken limb, as still used. Similar bands wound with the most precise accuracy involve the mummies.

A scraper (חרס), for which the "potsherd" of Job was a substitute (Job ii. 8).

Ex. xxx. 23-5 is a prescription in form. It may be worth while also to enumerate the leading substances which, according to Wunderbar, composed the pharmacopoeia of the Talmudists—a much more limited one—which will afford some insight into the distance which separates them from the leaders of Greek medicine. Besides such ordinary appliances as water, wine (Luke x. 34), beer, vinegar, honey, and milk, various oils are found; as opobalsamum[f] ("balm of Gilead"), the oil of olive,[g] myrrh, rose, palma christi, walnut, sesamum, colocynth, and fish; figs (2 K. xx. 7), dates, apples (Cant. ii. 5), pomegranates, pistachio-nuts,[h] and almonds (a produce of Syria, but not of Egypt, Gen. xliii. 11); wheat, barley, and various other grains; garlic, leeks, onions, and some other common herbs; mustard, pepper, coriander seed, ginger, preparations of beet, fish, &c., steeped in wine or vinegar, whey, eggs, salt, wax, and suet (in plasters), gall of fish (Tob. vi. 8, xi. 11), ashes, cowdung, &c.; fasting-saliva[k], urine, bat's blood, and the following rarer herbs, &c.: *ammeisision*, *menta gentilis*, saffron, mandragora, *Lawsonia spinosa* (Arab. *alhenna*), juniper, broom, poppy, acacia, pine, lavender or rosemary, clover-root, jujub, hyssop, fern, *scampsuchum*, milk-thistle, laurel, *Eruca muralis*, absynth, jasmine, narcissus, madder, curled mint, fennel, endive, oil of cotton, myrtle, myrrh, aloes, sweet cane (*acorus calamus*), cinnamon, *canella alba*, cassia, *ladanum*, *galbanum*, frankincense, *storax*, nard, gum of various trees, musk, *blatta byzantina*; and these minerals—bitumen, natrum, borax, alum, clay, aëtites,[m] quicksilver, litharge, yellow arsenic. The following preparations were also well known:—*Theriacas*, an antidote prepared from serpents: various medicinal drinks, *e.g.* from the fruit-bearing rosemary; decoction of wine with vegetables; mixture of wine, honey, and pepper; of oil, wine, and water; of asparagus and other roots steeped in wine; emetics, purging draughts, soporifics, potions to produce abortion or fruitfulness; and various salves, some used cosmetically,[n] *e. g.* to remove hair; some for wounds, and other injuries.[o] The forms of medicaments were cataplasm, electuary liniment, plaister (Is. i. 6; Jer. viii. 22, xlvi. 11, li. 8; Joseph. *B. J.* i. 33, §5), powder, infusion, decoction, essence, syrup, mixture.

An occasional trace occurs of some chemical knowledge, *e. g.* the calcination of the gold by Moses; the effect of "vinegar upon nitre"[p] (Ex.

[c] This writer gives a full account of the entire process as now in practice, with illustrations from the Turkish mode of operating, gathered, it seems, from a fragment of a rare work on the healing art by an anonymous Turkish author of the 16th century, in the public library at Leipsic. The Persians, Tartars, &c., have furnished him with further illustrations.

[d] Yet it by no means follows that the rest were not known in Scriptural times, "it being a well-known fact in the history of inventions that many useful discoveries have long been kept as family secrets." Thus an obstetrical forceps was found in a house excavated at Pompeii, though the Greeks and Romans, so far as their medical works show, were unacquainted with the instrument (*Paul. Aeg.* i. 652, ed. Sydenham Soc.).

[e] In Jer. xviii. 3 the same word appears, rendered "wheels" in the A. V.; margin, "frames or seats;" that which gives shape to the work of the potter.

[f] See Tacit. *Hist.* v. 7, and Orelli's note *ad. loc.*

[g] Tacitus, *Ibid.* v. 6.

[h] Commended by Pliny as a specific for the bite of a serpent (Plin. *H. N.* xxiii. 78).

[i] Rhases speaks of a fish named *sabot*, the gall of which healed inflamed eyes (ix. 27); and Pliny says, "Callionymi fel cicatrices sanat et carnes oculorum supervacuas consumit" (*N. H.* xxxii. 24).

[k] Comp. Mark viii. 23, John ix. 6; also the mention by Tacitus (*Hist.* iv. 81) of a request made of Vespasian at Alexandria. Galen (*De Simpl. Facult.* i. 10) and Pliny (*H. N.* xxviii. 7) ascribe similar virtues to it.

[m] Said by Pliny to be a specific against abortion (*N. H.* xxx. 44).

[n] Antimony was and is used as a dye for the eye-lids, the *kohol*. See Rosenmüller in the *Biblical Cabinet*, xxvii. 67.

[o] The Arabs suppose that a cornelian stone (the *Sardius lapis*, Ex. xxviii. 13, but in Joseph. *Ant.* iii. 7, §5, *Sardonyx*) laid on a fresh wound will stay hemorrhage.

[p] נתר meaning natron: the Egyptian kind was found in two lakes between Naukratis and Memphis (Bibl. Cab. xxvii. p. 71).

xxii. 20; Prov. xxv. 20; comp. Jer. ii. 22); the mention of "the apothecary" (Ex. xxx. 35; Eccl. x. 1), and of the merchant in "powders" (Cant. iii. 6), shows that a distinct and important branch of trade was set up in these wares, in which, as at a modern druggist's, articles of luxury &c., are combined with the remedies of sickness; see further, Wunderbar, 1stes Heft, pp. 73, *ad fin.* Among the most favourite of external remedies has always been the bath. As a preventive of numerous disorders its virtues were known to the Egyptians, and the scrupulous levitical bathings prescribed by Moses would merely enjoin the continuance of a practice familiar to the Jews, from the example especially of the priests in that country. Besides the significance of moral purity which it carried, the use of the bath checked the tendency to become unclean by violent perspirations from within and effluvia from without; it kept the porous system in play, and stopped the outset of much disease. In order to make the sanction of health more solemn, most oriental nations have enforced purificatory rites by religious mandates —and so the Jews. A treatise collecting all the dicta of ancient medicine on the use of the bath has been current ever since the revival of learning, under the title *De Balneis*. According to it Hippocrates and Galen prescribe the bath medicinally in peripneumonia rather than in burning fever, as tending to allay the pain of the sides, chest, and back, promoting various secretions, removing lassitude, and suppling joints. A hot bath is recommended for those suffering from *lichen* (*De Baln.* 464). Those, on the contrary, who have looseness of the bowels, who are languid, loathe their food, are troubled with nausea or bile, should not use it, as neither should the epileptic. After exhausting journeys in the sun the bath is commended as the restorative of moisture to the frame (456-458). The four objects which ancient authorities chiefly proposed to attain by bathing are—1, to warm and distil the elements of the body throughout the whole frame, to equalise whatever is abnormal, to rarefy the skin, and promote evacuations through it; 2, to reduce a dry to a moister habit; 3 (the cold-bath), to cool the frame and brace it; 4 (the warm-bath), a sudorific to expel cold. Exercise before bathing is recommended, and in the season from April till November inclusive it is the most conducive to health; if it be kept up in the other months it should then be but once a week, and that fasting. Of natural waters some are nitrous, some saline, some aluminous,[q] some sulphureous, some bituminous, some copperish, some ferruginous, and some compounded of these. Of all the natural waters the power is, on the whole, desiccant and calefacient; and they are peculiarly fitted for those of a humid and cold habit. Pliny (*H. N.* xxxi.) gives the fullest extant account of the thermal springs of the ancients (*Paul. Aegin.* ed. Sydenh. Soc. i. 71). Avicenna gives precepts for salt and other mineral baths; the former he recommends in case of scurvy and itching, as rarefying the skin, and afterwards condensing it. Water medicated with alum, natron, sulphur, naphtha, iron, litharge, vitriol, and vinegar, are also specified by him. Friction and unction are prescribed, and a caution given against staying too long in the water (*ibid.* 338-340; comp. Aëtius, *de Baln.* iv. 484). A sick bather should lie quiet, and allow others to rub and anoint him, and use no strigil (the common instrument for scraping the skin), but a sponge (456). Maimonides chiefly following Galen, recommends the bath, especially for phthisis in the aged, as being a case of dryness with cold habit, and to a hectic fever patient as being a case of dryness with hot habit; also in cases of ephemeral and tertian fevers, under certain restrictions, and in putrid fevers, with the caution not to incur shivering. Bathing is dangerous to those who feel pain in the liver after eating. He adds cautions regarding the kind of water, but these relate chiefly to water for drinking (*De Baln.* 438-9). The bath of oil was formed, according to Galen and Aëtius, by adding the fifth part of heated oil to a water-bath. Josephus speaks (*B. J.* i. 33, §5) as though oil had, in Herod's case, been used pure.

There were special occasions on which the bath was ceremonially enjoined, after a leprous eruption healed, after the conjugal act, or an involuntary emission, or any gonorrhoeal discharge, after menstruation, child-bed, or touching a corpse; so for the priests before and during their times of office such a duty was prescribed. [BATHS.] The Pharisees and Essenes aimed at scrupulous strictness of all such rules (Matt. xv. 2; Mark vii. 5; Luke xi. 38). River-bathing[r] was common, but houses soon began to include a bath-room (Lev. xv. 13; 2 K. v. 10; 2 Sam. xi. 2; Susanna 15). Vapour-baths, as among the Romans, were latterly included in these, as well as hot and cold-bath apparatus, and the use of perfumes and oils after quitting it was everywhere diffused (Wunderbar, 2tes Heft, ii. B.). The vapour was sometimes sought to be inhaled, though this was reputed mischievous to the teeth. It was deemed healthiest after a warm to take also a cold bath (*Paul. Aegin.* ed. Sydenh. Soc. i. 68). The Talmud has it—"Whoso takes a warm-bath, and does not also drink thereupon some warm water, is like a stove hot only from without, but not heated also from within. Whoso bathes and does not withal anoint, is like the liquor outside a vat. Whoso having had a warm-bath does not also immediately pour cold water over him, is like an iron made to glow in the fire, but not thereafter hardened in the water." This succession of cold water to hot vapour is commonly practised in Russian and Polish baths, and is said to contribute much to robust health (Wunderbar, *ibid.*).

Besides the usual authorities on Hebrew antiquities, Talmudical and modern, Wunderbar (1stes Heft, pp. 57-69) has compiled a collection of writers on the special subject of Scriptural &c. medicine, including its psychological and botanical aspects, as also its political relations; a distinct section of thirteen monographs treats of the leprosy; and every various disease mentioned in Scripture appears elaborated in one or more such short trea-

[q] Dr. Adams (*Paul. Aegin.* ed. Syd. Soc. i. 72) says that the alum of the ancients found in mineral springs cannot have been the alum of modern commerce, since it is very rarely to be detected there; but the *alumen plumosum*, or hair alum, said to consist chiefly of the sulphate of magnesia and iron. The former exists, however, in great abundance in the aluminous spring of the Isle of Wight. The ancient nitre or natron was a native carbonate of soda (*ibid.*).

[r] The case of Naaman may be paralleled by Herod. iv. 90, where we read of the Tearus, a tributary of the Hebrus—λέγεται εἶναι ποταμῶν ἄριστον, τά τε ἄλλα ἐς ἄκεσιν φέροντα, καὶ δὴ καὶ ἀνδράσι καὶ ἵπποισι φύσιν λειόσασθαι.

tises. Those out of the whole number which appear most generally in esteem, to judge from references made to them, are the following:—

METEDA (Μεεδά: *Meedda*) = **MEHIDA** (1 Esdr. v. 32).

MEGID'DO (מְגִדּוֹ; in Zech. xii. 11, מְגִדּוֹן: in the LXX. Μαγεδδώ or Μαγεδδών, except in 1 K. ix. 15, where it is Μαγδώ) was in a very marked position on the southern rim of the plain of ESDRAELON, on the frontier-line (speaking generally) of the territories of the tribes of ISSACHAR and MANASSEH, and commanding one of those passes from the north into the hill-country which were of such critical importance on various occasions in the history of Judaea (τὰς ἀναβάσεις τῆς ὀρεινῆς, ὅτι δι' αὐτῶν ἦν ἡ εἴσοδος εἰς τὴν Ἰουδαίαν, Judith iv. 7).

Megiddo is usually spoken of in connexion with TAANACH, and frequently in connexion with BETH-SHAN and JEZREEL. This combination suggests a wide view alike over Jewish scenery and Jewish history. The first mention occurs in Josh. xii. 21, where Megiddo appears as the city of one of the "thirty and one kings," or petty chieftains, whom Joshua defeated on the west of the Jordan. This was one of the places within the limits of Issachar assigned to Manasseh (Josh. xvii. 11; 1 Chr. vii. 29). But the arrangement gave only an imperfect advantage to the latter tribe, for they did not drive out the Canaanites, and were only able to make them tributary (Josh. xvii. 12, 13; Judg. i. 27, 28). The song of Deborah brings the place vividly before us, as the scene of the great conflict between Sisera and Barak. The chariots of Sisera were gathered "unto the river of KISHON" (Judg. iv. 13); Barak went down with his men "from Mount TABOR"

[a] This writer has several monographs of much interest on detached points, all to be found in his *Dissertationes Acad. Medic.* Jena, 17th and 18th centuries.

[b] This writer is remarkable for carefully abstaining from any reference to the O.T., even where such would be most apposite.

[c] The writer wishes to acknowledge his obligations to Dr. Rolleston, Linacre Professor of Physiology; Dr. Greenhill of Hastings; Dr. Adams, editor of several of the Sydenham Society's publications Mr. R. Rumsey of Cheltenham, and Mr. J. Cooper Forster of Guy's Hospital, London, for their kindness in revising and correcting this article, and that on LEPROSY, in their passage through the press; at the same time that he does not wish to imply any responsibility on their part for the opinions or statements contained in them, save so far as they are referred to by name. Dr. Robert Sim has also greatly assisted him with the results of large actual experience in Oriental pathology.

into the plain (iv. 14); "then fought the kings of Canaan in Taanach by the waters of Megiddo" v. 19). The course of the Kishon is immediately in front of this position; and the river seems to have been flooded by a storm: hence what follows:—"The river of Kishon swept them away, that ancient river, the river Kishon" (v. 21). Still we do not read of Megiddo being firmly in the occupation of the Israelites, and perhaps it was not really so till the time of Solomon. That monarch placed one of his twelve commissariat officers, named Baana, over "Taanach and Megiddo," with the neighbourhood of Beth-shean and Jezreel (1 K. iv. 12). In this reign it appears that some costly works were constructed at Megiddo (ix. 15). These were probably fortifications, suggested by its important military position. All the subsequent notices of the place are connected with military transactions. To this place Ahaziah fled when his unfortunate visit to Joram had brought him into collision with Jehu; and here he died (2 K. ix. 27) within the confines of what is elsewhere called Samaria (2 Chr. xxii. 9).

But the chief historical interest of Megiddo is concentrated in Josiah's death. When Pharaoh-Necho came from Egypt against the king of Assyria, Josiah joined the latter, and was slain at Megiddo (2 K. xxiii. 29), and his body was carried from thence to Jerusalem (*ib.* 30). The story is told in the Chronicles in more detail (2 Chr. xxxv. 22-24). There the fatal action is said to have taken place "in the valley of Megiddo." The words in the LXX. are, *ἐν τῷ πεδίῳ Μαγεδδών*. This calamity made a deep and permanent impression on the Jews. It is recounted again in 1 Esd. i. 25-31, where in the A. V. "the plain of Magiddo" represents the same Greek words. The lamentations for this good king became "an ordinance in Israel" (2 Chr. xxxv. 25). "In all Jewry" they mourned for him, and the lamentation was made perpetual "in all the nation of Israel" (1 Esd. i. 32). "Their grief was no land-flood of present passion, but a constant channell of continued sorrow, streaming from an annuall fountain" (Fuller's *Pisgah Sight of Palestine*, p. 165). Thus, in the language of the prophets (Zech. xii. 11), "the mourning of Hadadrimmon in the valley (*πεδίῳ*, LXX.) of Megiddon" becomes a poetical expression for the deepest and most despairing grief; as in the Apocalypse (Rev. xvi. 16) ARMAGEDDON, in continuance of the same imagery, is presented as the scene of terrible and final conflict. For the Septuagintal version of this passage of Zechariah we may refer to Jerome's note on the passage. "Adadremmon, pro quo LXX. transtulerunt *Ῥοῶνος*, urbs est juxta Jezraelem, quae hoc olim vocabulo nuncupata est, et hodie vocatur Maximianopolis in Campo Mageddon." That the prophet's imagery is drawn from the occasion of Josiah's death there can be no doubt. In Stanley's *S. & P.* (p. 347) the calamitous event is made very vivid to us by an allusion to the "Egyptian archers, in their long array, so well known from their sculptured monuments." For the mistake in the account of Pharaoh-Necho's campaign in Herodotus, who has evidently put Migdol by mistake for Megiddo (ii. 159), it is enough to refer to Bähr's *excursus* on the passage. The Egyptian king may have landed his troops at Acre; but it is far more likely that he marched northwards along the coast-plain, and then turned round Carmel into the plain of Esdraelon, taking the left bank of the Kishon, and that there the Jewish king came upon him by the gorge of Megiddo.

The site thus associated with critical passages of Jewish history from Joshua to Josiah has been identified beyond any reasonable doubt. Robinson did not visit this corner of the plain on his first journey, but he was brought confidently to the conclusion that Megiddo was the modern *el-Lejjûn*, which is undoubtedly the Legio of Eusebius and Jerome, an important and well-known place in their day, since they assume it as a central point from which to mark the position of several other places in this quarter (*Bib. Res.* ii. 328-330). Two of the distances are given thus: 15 miles from Nazareth and 4 from Taanach. There can be no doubt that the identification is substantially correct. The *μέγα πεδίον Λεγεώνος* (*Onomast.* s. v. *Γαβαθών*) evidently corresponds with the "plain (or valley) of Megiddo" of the O. T. Moreover *el-Lejjûn* is on the caravan-route from Egypt to Damascus, and traces of a Roman road are found near the village. Van de Velde visited the spot in 1852, approaching it through the hills from the S.W. He describes the view of the plain as seen from the highest point between it and the sea, and the huge *tells* which mark the positions of the "key-fortresses" of the hills and the plain, *Taanûk* and *el-Lejjûn*, the latter being the most considerable, and having another called *Tell-Metzellîm*, half an hour to the N.W. (*Syr. & Pal.* i. 350-356). About a month later in the same year Dr. Robinson was there, and convinced himself of the correctness of his former opinion. He too describes the view over the plain, northwards to the wooded hills of Galilee, eastwards to Jezreel, and southwards to Taanach, *Tell-Metzellim* being also mentioned as on a projecting portion of the hills which are continuous with Carmel, the Kishon being just below (*Bib. Res.* ii. 116-119). Both writers mention a copious stream flowing down this gorge (March and April), and turning some mills before joining the Kishon. Here are probably the "waters of Megiddo" of Judg. v. 19, though it should be added that by Professor Stanley (*S. & P.* p. 339) they are supposed rather to be "the pools in the bed of the Kishon" itself. The same author regards the "plain (or valley) of Megiddo" as denoting not the whole of the Esdraelon level, but that broadest part of it which is immediately opposite the place we are describing (pp. 335, 336).

The passage quoted above from Jerome suggests a further question, viz. whether Von Raumer is right in "identifying *el-Lejjûn* also with Maximianopolis, which the Jerusalem Itinerary places at 20 miles from Caesarea and 10 from Jezreel." Van de Velde (*Memoir*, p. 333) holds this view to be correct. He thinks he has found the true Hadadrimmon in a place called *Rummaneh*, "at the foot of the Megiddo-hills, in a notch or valley about an hour and a half S. of *Tell-Metzellîm*," and would place the old fortified Megiddo on this *tell* itself, suggesting further that its name, "the *tell* of the Governor," may possibly retain a reminiscence of Solomon's officer, Baana the son of Ahilud. [J. S. H.]

MEGID'DON, THE VALLEY OF (מְגִדּוֹן: *πεδίον ἐκκοπτομένου*: *campus Mageddon*). The extended form of the preceding name. It occurs only in Zech. xii. 11. In two other cases the LXX. retain the *n* at the end of the name, viz. 2 K. ix. 27, and 2 Chr. xxxv. 22, though it is not their

general custom. In this passage it will be observed that they have translated the word. [G.]

MEHETABEEL (מְהֵיטַבְאֵל: Μεταβεήλ; Alex. Μεταβεήλ: *Metabeel*). Another and less correct form of MEHETABEL. The ancestor of Shemaiah the prophet who was hired against Nehemiah by Tobiah and Sanballat (Neh. vi. 10). He was probably of priestly descent; and it is not unlikely that Delaiah, who is called his son, is the same as the head of the 23rd course of priests in the reign of David (1 Chr. xxiv. 18).

MEHETABEL (מְהֵיטַבְאֵל: Samaritan Cod. מחיטבאל: Μετεβεήλ: *Meetabel*). The daughter of Matred, and wife of Hadad, or Hadar, the eighth and last-mentioned king of Edom, who had Pai or Pau for his birthplace or chief city, before royalty was established among the Israelites (Gen. xxxvi. 39). Jerome (*de Nomin. Hebr.*) writes the name in the form *Mettabel*, which he renders "quam bonus est Deus."

ME'HIDA (מְחִידָא: Μαουδά; Alex. Μειδά; in Ezr. Μιδά; Alex. Μειδά in Neh.: *Mahida*), a family of Nethinim, the descendants of Mehida, returned from Babylon with Zerubbabel (Ezr. ii. 52; Neh. vii. 54). In 1 Esdr. the name occurs in the form MEEDA.

MEHI'R (מְחִיר: Μαχίρ; Alex. Μαχείρ: *Mahir*), the son of Chelub, the brother of Shuah, or as he is described in the LXX., "Caleb the father of Ascha" (1 Chr. iv. 11). In the Targum of R. Joseph, Mehir appears as "Perug," its Chaldee equivalent, both words signifying "price."

MEHOL'ATHITE, THE (הַמְּחֹלָתִי: Alex. ὁ μοθυλαθειτης; Vat. omits: *Molathita*), a word occurring once only (1 Sam. xviii. 19), as the description of Adriel, son of Barzillai, to whom Saul's daughter Merab was married. It no doubt denotes that he belonged to a place called Meholah, but whether that was Abel-Meholah afterwards the native place of Elisha, or another, is as uncertain as it is whether Adriel's father was the well-known Barzillai the Gileadite or not. [G.]

MEHU'JAEL (מְחוּיָאֵל and מְחִיָּאֵל: Μαλελεήλ; Alex. Μαϊήλ: *Maviaël*), the son of Irad, and fourth in descent from Cain (Gen. iv. 18). Ewald, regarding the genealogies in Gen. iv. and v. as substantially the same, follows the Vat. LXX., considering Mahalaleel as the true reading, and the variation from it the result of careless transcription. It is scarcely necessary to say that this is a gratuitous assumption. The Targum of Onkelos follows the Hebrew even in the various forms which the name assumes in the same verse. The Peshito-Syriac, Vulgate, and a few MSS. retain the former of the two readings; while the Sam. text reads מיחאל, which appears to have been followed by the Aldine and Complutensian editions, and the Alex. MS. [W. A. W.]

MEH'UMAN (מְהוּמָן: Ἀμάν: *Mathuman*), one of the seven eunuchs (A. V. "chamberlains," who served before Ahasuerus (Esth. i. 10). The LXX. appear to have read לְהָמָן for לְמְהוּמָן.

MEH'UNIM (מְעוּנִים, without the article: Μαωεμείν; Alex. Μοουνείμ: *Munim*), Ezr. ii. 50. Elsewhere called MEHUNIMS and MEUNIM; and in the parallel list of 1 Esdr. MEANI.

MEH'UNIMS, THE (הַמְּעוּנִים, *i. e.* the Me'ûnim: *ol* Μεϊναῖοι; Alex. *ol* Μιναιοι: *Ammonitae*), a people against whom king Uzziah waged a successful war (2 Chr. xxvi. 7). Although so different in its English[a] dress, yet the name is in the original merely the plural of MAON (מָעוֹן), a nation named amongst those who in the earlier days of their settlement in Palestine harassed and oppressed Israel. Maon, or the Maonites, probably inhabited the country at the back of the great range of Seir, the modern *esh-Sherah*, which forms the eastern side of the *Wady el-Arabah*, where at the present day there is still a town of the same name[b] (Burckhardt, *Syria*, Aug. 24). And this is quite in accordance with the terms of 2 Chr. xxvi. 7, where the Mehunim are mentioned with "the Arabians of Gur-baal," or, as the LXX. render it, Petra.

Another notice of the Mehunims in the reign of Hezekiah (cir. B.C. 726-697) is found in 1 Chr. iv. 41.[c] Here they are spoken of as a pastoral people, either themselves Hamites, or in alliance with Hamites, quiet and peaceable, dwelling in tents. They had been settled from "of old," *i. e.* aboriginally, at the east end of the Valley of Gedor or Gerar, in the wilderness south of Palestine. A connexion with Mount Seir is hinted at, though obscurely (ver. 42). [See vol. i. p. 669 *a*.] Here, however, the A. V. —probably following the translations of Luther and Junius, which in their turn follow the Targum—treats the word as an ordinary noun, and renders it "habitations;" a reading now relinquished by scholars, who understand the word to refer to the people in question (Gesenius, *Thes.* 1002*a*, and *Notes on Burckhardt*, 1069; Bertheau, *Chronik*).

A third notice of the Mehunim, corroborative of those already mentioned, is found in the narrative of 2 Chr. xx. There is every reason to believe that in ver. 1 "the Ammonites" should be read as "the Maonites," who in that case are the "men of Mount Seir" mentioned later in the narrative (ver. 10, 22).[d]

In all these passages, including the last, the LXX. render the name by *ol* Μεϊναῖοι—the Minaeans—a nation of Arabia renowned for their traffic in spices, who are named by Strabo, Ptolemy, and other ancient geographers, and whose seat is now ascertained to have been the S.W. portion of the great Arabian peninsula, the western half of the modern Hadramaut (*Dict. of Geography*, "Minaei").

[a] The instances of H being employed to render the strange Hebrew guttural *Ain* are not frequent in the A. V. "Hebrew" (עִבְרִי) — which in earlier versions was "Ebrew" (comp. Shakspere, *Henry IV.* Part I. Act 2, Sc. 4)—is oftenest encountered.

[b] معان, *Ma'an*, all but identical with the Hebrew *Maon*.

[c] Here the *Cethîb*, or original Hebrew text, has *Meînîm*, which is nearer the Greek equivalent than *Meunim* or *Mounim*.

[d] The text of this passage is accurately as follows — "The children of Moab and the children of Ammon, and with them of the Ammonites;" the words "other beside" being interpolated by our translators.

The change from "Ammonites" to "Mehunim" is not so violent as it looks to an English reader. It is a simple transposition of two letters, מעונים for עמונים; and it is supported by the LXX. and by Josephus (*Ant.* ix. 1, §2, Ἀραβες); and by modern scholars, as De Wette (*Einl.*), Ewald (*Gesch.* iii. 474, note). A reverse transposition will be found in the Syriac version of Judg. x. 12, where

Bochart has pointed out (*Phaleg*, ii. cap. xxi.), with reason, that distance alone renders it impossible that these Minaeans can be the Meunim of the Bible, and also that the people of the Arabian peninsula are Shemites, while the Meunim appear to have been descended from Ham (1 Chr. iv. 41). But with his usual turn for etymological speculation he endeavours nevertheless to establish an identity between the two, on the ground that *Oarn al-Manasil*, a place two days' journey south of Mecca, one of the towns of the Minaeans, signifies the "horn of habitations," and might therefore be equivalent to the Hebrew *Meonim*.

Josephus (*Ant.* ix. 10, §3) calls them "the Arabs who adjoined Egypt," and speaks of a city built by Uzziah on the Red Sea to overawe them.

Ewald (*Geschichte*, i. 323 *note*) suggests that the southern Minaeans were a colony from the Maonites of Mount Seir, who in their turn he appears to consider a remnant of the Amorites (see the text of the same page).

That the Minaeans were familiar to the translators of the LXX. is evident from the fact that they not only introduce the name on the occasions already mentioned, but that they further use it as equivalent to NAAMATHITE. Zophar the Naamathite, one of the three friends of Job, is by them presented as "Sophar the Minaean," and "Sophar king of the Minaeans." In this connexion it is not unworthy of notice that as there was a town called Maon in the mountain-district of Judah, so there was one called Naamah in the lowland of the same tribe. *El-Mizeiy*, which is, or was, the first station south of Gaza, is probably identical with Minoïs, a place mentioned with distinction in the Christian records of Palestine in the 5th and 6th centuries (Reland, *Palaestina*, 899; Le Quien, *Oriens Christ.* iii. 669), and both may retain a trace of the Minaeans. BAAL-MEON, a town on the east of Jordan, near Heshbon, still called *Ma'in*, probably also retains a trace of the presence of the Maonites or Mehunim north of their proper locality.

The latest appearance of the name MEHUNIMS in the Bible is in the lists of those who returned from the Captivity with Zerubbabel. Amongst the non-Israelites from whom the Nethinim—following the precedent of what seems to have been the foundation of the order—were made up, we find their name (Ezr. ii. 50, A. V. "Mehunim;" Neh. vii. 52, A. V. "Meunim"). Here they are mentioned with the Nephishim, or descendants of Nephish, an Ishmaelite people whose seat appears to have been on the east of Palestine (1 Chr. v. 19), and therefore certainly not far distant from *Ma'an* the chief city of the Maonites. [G.]

ME-JARKON (מֵי הַיַּרְקוֹן: Θάλασσα Ἰεμεσσων: *Aquae Jercon*), a town in the territory of Dan (Josh. xix. 46 only); named next in order to Gath-rimmon, and in the neighbourhood of Joppa or Japho. The lexicographers interpret the name as meaning 'the yellow waters." No attempt has been made to identify it with any existing site. It is difficult not to suspect that the name following that of Me-hajjarkon, har-Rakon (A. V. Rakkon), is a mere corrupt repetition thereof, as the two bear a very close similarity to each other, and occur nowhere else. [G.]

MEKO'NAH (מְכֹנָה[a]: LXX. omits: *Mochona*), one of the towns which were re-inhabited after the captivity by the men of Judah (Neh. xi. 28). From its being coupled with Ziklag, we should infer that it was situated far to the south, while the mention of the "daughter towns" (בְּנוֹת, A. V. "villages"), dependent on it, seem to show that it was a place of some magnitude. Mekonah is not mentioned elsewhere, and it does not appear that any name corresponding with it has been yet discovered. The conjecture of Schwarz—that it is identical with the *Mechanum*, which Jerome[b] (*Onomasticon*, "Bethmacha") locates between Eleutheropolis and Jerusalem, at eight miles from the former—is entirely at variance with the above inference. [G.]

MELATI'AH (מְלַטְיָה: Μαλτίας: *Meltias*), a Gibeonite, who, with the men of Gibeon and Mizpah, assisted in rebuilding the wall of Jerusalem under Nehemiah (Neh. iii. 7).

MEL'CHI (Μελχεί in Vat. and Alex. MSS., Μελχί, Tisch.: *Melchi*). 1. The son of Janna, and ancestor of Joseph in the genealogy of Jesus Christ (Luke iii. 24). In the list given by Africanus Melchi appears as the father of Heli, the intervening Levi and Matthat being omitted (Hervey, *Geneal.* p. 137).

2. The son of Addi in the same genealogy (Luke iii. 28).

MELCHI'AH (מַלְכִּיָּה: Μελχίας: *Melchias*), a priest, the father of Pashur (Jer. xxi. 1). He is elsewhere called Malchiah and Malchijah. (See MALCHIAH 7, and MALCHIJAH 1.)

MELCHI'AS (Μελχίας: *Melchias*). 1. The same as MALCHIAH 2 (1 Esdr. ix. 26).

2. = MALCHIAH 3 and MALCHIJAH 4 (1 Esdr. ix. 32).

3. (*Malachias*). The same as MALCHIAH 6 (1 Esdr. ix. 44).

[a] "Amnon" is read for the "Maon" of the Hebrew. The LXX. make the change again in 2 Chr. xxvi. 8; but here there is no apparent occasion for it.

The Jewish gloss on 2 Chr. xx. 1 is curious. "By Ammonites Edomites are meant, who, out of respect for the fraternal relation between the two nations, would not come against Israel in their own dress, but disguised themselves as Ammonites." (Jerome, *Quaest. Hebr.* ad loc.)

The institution of the Nethinim, *i.e.* "the given ones," seems to have originated in the Midianite war (Num. xxxi.), when a certain portion of the captives was "given" (the word in the original is the same) to the Levites who kept the charge of the Sacred Tent (ver. 30, 47). The Gibeonites were probably the next accession, and the invaluable lists of Ezra and Nehemiah alluded to above seem to show that the captives from many a foreign battle went to swell the numbers of the Order. See Mehunim, Nephusim, Harsha, Sisera, and other foreign names contained in these lists.

[b] Our translators have here represented the Hebrew Caph by K, which they usually reserve for the Koph. Other instances are KITHLISH and KITTIM.

[b] This passage of Jerome is one of those which completely startle the reader, and incline him to mistrust altogether Jerome's knowledge of sacred topography. He actually places the Beth-maacha, in which Joab besieged Sheba the son of Bichri, and which was one of the first places taken by Tiglath-Pileser on his entrance into the north of Palestine, among the mountains of Judah, south of Jerusalem! A mistake of the same kind is found in Benjamin of Tudela and Hap-Parchi, who place the Maon of David's adventures in the neighbourhood of Mount Carmel.

MEL'CHIEL (Μελχιήλ). Charmis, the son of Melchiel, was one of the three governors of Bethulia (Jud. vi. 15). The Vulgate has a different rending, and the Peshito gives the name *Manshajel*.

MELCHI'SEDEC (Μελχισεδέκ), the form of the name MELCHIZEDEK adopted in the A.V. of the New Testament (Heb. v. vi. vii).

MELCHI-SHUA (מַלְכִּישׁוּעַ, *i. e.* Malchishua: Μελχεισά; Alex. Μελχισουε; Joseph. Μέλχισος: *Melchisua*), a son of Saul (1 Sam. xiv. 49, xxxi. 2), An erroneous manner of representing the name, which is elsewhere correctly given MALCHISHUA.

MELCHIZ'EDEK (מַלְכִּי־צֶדֶק, *i. e.* Malcitzedek: Μελχισεδέκ: *Melchisedech*), king of Salem and priest of the Most High God, who met Abram in the valley of Shaveh [or, the level valley], which is the king's valley, brought out bread and wine, blessed Abram, and received tithes from him (Gen. xiv. 18-20.). The other places in which Melchizedek is mentioned are Ps. cx. 4, where Messiah is described as a priest for ever, "after the order of Melchizedek," and Heb. v., vi., vii., where these two passages of the O. T. are quoted, and the typical relation of Melchizedek to our Lord is stated at great length.

There is something surprising and mysterious in the first appearance of Melchizedek, and in the subsequent references to him. Bearing a title which Jews in after ages would recognize as designating their own sovereign, bearing gifts which recall to Christians the Lord's Supper, this Canaanite crosses for a moment the path of Abram, and is unhesitatingly recognized as a person of higher spiritual rank than the friend of God. Disappearing as suddenly as he came in, he is lost to the sacred writings for a thousand years; and then a few emphatic words for another moment bring him into sight as a type of the coming Lord of David. Once more, after another thousand years, the Hebrew Christians are taught to see in him a proof that it was the consistent purpose of God to abolish the Levitical priesthood. His person, his office, his relation to Christ, and the seat of his sovereignty, have given rise to innumerable discussions, which even now can scarcely be considered as settled.

The faith of early ages ventured to invest his person with superstitious awe. Perhaps it would be too much to ascribe to mere national jealousy the fact that Jewish tradition, as recorded in the Targums of Pseudo-Jonathan and Jerusalem, and in Rashi on Gen. xiv., in some cabalistic (*apud* Bochart, *Phaleg*, pt. 1, b. ii. 1, §69) and Rabbinical (*ap.* Schöttgen, *Hor. Heb.* ii. 645) writers, pronounces Melchizedek to be a survivor of the Deluge, the patriarch Shem, authorised by the superior dignity of old age to bless even the father of the faithful, and entitled, as the paramount lord of Canaan (Gen. ix. 26) to convey (xiv. 19) his right to Abram. Jerome in his *Ep.* lxxiii. *ad Evangelum* (*Opp.* i. 438), which is entirely devoted to a consideration of the person and dwelling-place of Melchizedek, states that this was the prevailing opinion of the Jews in his time; and it is ascribed to the Samaritans by Epiphanius, *Haer.* lv. 6, p. 472. It was afterwards embraced by Luther and Melanchthon, by our own countrymen, H. Broughton, Selden, Lightfoot (*Chor. Marco praem.* ch. x. 1, §2), Jackson (*On the Creed*, b. ix. §2), and by many others. It should be noted that this supposition does not appear in the Targum of Onkelos,—a presumption that it was not received by the Jews till after the Christian era — nor has it found favour with the Fathers. Equally old, perhaps, but less widely diffused, is the supposition not unknown to Augustine (*Quaest. in Gen.* lxiii.—*Opp.* iii. 396), and ascribed by Jerome (*l. c.*) to Origen and Didymus, that Melchizedek was an angel. The Fathers of the fourth and fifth centuries record with reprobation the tenet of the Melchizedekians that he was a Power, Virtue, or Influence of God (August. *de Haeresibus* §34, *Opp.* viii. 11; Theodoret, *Haeret. fab.* ii. 6, p. 332; Epiphan. *Haer.* lv. 1, p. 468; compare Cyril Alex. *Glaph. in Gen.* ii. p. 57) superior to Christ (Chrysost. *Hom. in Melchis. Opp.* vi. p. 269), and the not less daring conjecture of Hieracas and his followers that Melchizedek was the Holy Ghost (Epiphan. *Haer.* lxvii. 3, p. 711 and lv. 5, p. 472). Epiphanius also mentions (lv. 7, p. 474) some members of the church as holding the erroneous opinion that Melchizedek was the Son of God appearing in human form, an opinion which St. Ambrose (*De Abrah.* i. §3, *Opp.* t. i. p. 268) seems willing to receive, and which has been adopted by many modern critics. Similar to this was a Jewish opinion that he was the Messiah (*apud* Deyling, *Obs. Sacr.* ii. 73, Schöttgen, *l. c.*; compare the Book Sohar *ap.* Wolf, *Curae Phil.* in Heb. vii. 1. Modern writers have added to these conjectures that he may have been Ham (Jurieu), or a descendant of Japhet (Owen), or of Shem (*apud* Deyling, *l. c.*), or even Enoch (Hulse), or Job (Kohlreis). Other guesses may be found in Deyling (*l. c.*) and in Pfeiffer (*De personâ Melch.*—Opp. p. 51). All these opinions are unauthorised additions to Holy Scripture—many of them seem to be irreconcileable with it. It is an essential part of the Apostle's argument (Heb. vii. 6) that Melchizedek is "without father," and that his "pedigree is not counted from the sons of Levi;" so that neither their ancestor Shem, nor any other son of Noah can be identified with Melchizedek; and again, the statements that he fulfilled on earth the offices of Priest and King and that he was "made like unto the Son of God" would hardly have been predicated of a Divine Person. The way in which he is mentioned in Genesis would rather lead to the immediate inference that Melchizedek was of one blood with the children of Ham, among whom he lived, chief (like the King of Sodom) of a settled Canaanitish tribe. Perhaps it is not too much to infer from the silence of Philo (*Abraham*, xl.) and Onkelos (*in Gen.*) as to any other opinion, that they held this. It certainly was the opinion of Josephus (*B. J.* vii. 18), of most of the early Fathers (*apud* Jerome, *l. c.*), of Theodoret (*in Gen.* lxiv. p. 77), and Epiphanius (*Haer.* lxvi. p. 716), and is now generally received (see Grotius *in Hebr.*; Patrick's *Commentary in Gen.*; Bleek, *Hebräer*, ii. 303; Ebrard, *Hebräer*; Fairbairn, *Typology*, ii. 313, ed. 1854). And as Balaam was a prophet, so Melchizedek was a priest among the corrupted heathen (Philo, *Abrah.* xxxix.; Euseb. *Praep. Evang.* i. 9), not self-appointed (as Chrysostom suggests, *Hom. in Gen.* xxxv. §5, cf. Heb. v. 4), but constituted by a special gift from God, and recognised as such by Him.

Melchizedek combined the offices of priest and king, as was not uncommon in patriarchal times. Nothing is said to distinguish his kingship from that of the contemporary kings of Canaan; but the

emphatic words in which he is described, by a title never given even to Abraham, as a "priest of the most High God," as blessing Abram and receiving tithes from him, seem to imply that his priesthood was something more (see Hengstenberg, *Christol.*, Ps. cx.) than an ordinary patriarchal priesthood, such as Abram himself and other heads of families (Job i. 5) exercised. And although it has been observed (Pearson, *On the Creed*, p. 122, ed. 1843) that we read of no other sacerdotal act performed by Melchizedek, but only that of blessing [and receiving tithes, Pfeiffer], yet it may be assumed that he was accustomed to discharge all the ordinary duties of those who are "ordained to offer gifts and sacrifices," Heb. viii. 3; and we might concede (with Philo, Grotius, *l. c.* and others) that his regal hospitality to Abram was possibly preceded by an unrecorded sacerdotal act of oblation to God, without implying that his hospitality was in itself, as recorded in Genesis, a sacrifice.

The "order of Melchizedek," in Ps. cx. 4, is explained by Gesenius and Rosenmüller to mean "manner" = likeness in official dignity = a king and priest. The relation between Melchizedek and Christ as type and antitype is made in the Ep. to the Hebrews to consist in the following particulars. Each was a priest, (1) not of the Levitical tribe; (2) superior to Abraham; (3) whose beginning and end are unknown; (4) who is not only a priest, but also a king of righteousness and peace. To these points of agreement, noted by the Apostle, human ingenuity has added others which, however, stand in need of the evidence of either an inspired writer or an eye-witness, before they can be received as facts and applied to establish any doctrine. Thus J. Johnson (*Unbloody Sacrifice*, i. 123, ed. 1847) asserts on very slender evidence, that the Fathers who refer to Gen. xiv. 18, understood that Melchizedek offered the bread and wine to God; and hence he infers that one great part of our Saviour's Melchizedekian priesthood consisted in offering bread and wine. And Bellarmine asks in what other respects is Christ a priest after the order of Melchizedek. Waterland, who does not lose sight of the deep significancy of Melchizedek's action, has replied to Johnson in his *Appendix* to "the Christian Sacrifice explained," ch. iii. §2, *Works*, v. 165, ed. 1843. Bellarmine's question is sufficiently answered by Whitaker, *Disputation on Scripture*, Quest. ii. ch. x. 168, ed. 1849. And the sense of the Fathers, who sometimes expressed themselves in rhetorical language, is cleared from misinterpretation by Bp. Jewel, *Reply to Harding*, art. xvii. (*Works*, ii. 731, ed. 1847). In Jackson on *the Creed*, Bk. ix. §2, ch. vi.–xi. 955, et sq., there is a lengthy but valuable account of the priesthood of Melchizedek; and the views of two different theological schools are ably stated by Aquinas, *Summa* iii. 22, §6, and Turretinus, *Theologia* vol. ii. p. 443-453.

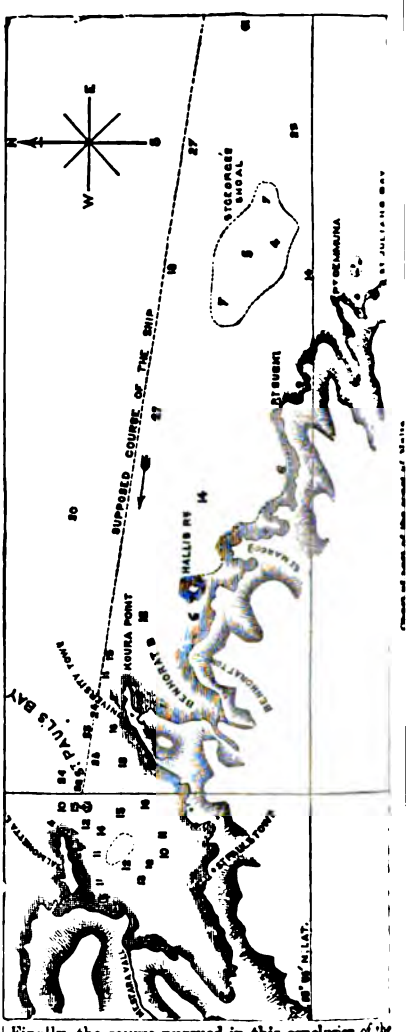
Another fruitful source of discussion has been found in the site of Salem and Shaveh, which certainly lay in Abram's road from Hobah to the plain of Mamre, and which are assumed to be near to each other. The various theories may be briefly enumerated as follows:—(1) Salem is supposed to have occupied in Abraham's time the ground on which afterwards Jebus and then Jerusalem stood; and Shaveh to be the valley east of Jerusalem through which the Kidron flows. This opinion, broached by Reland, *Pal.* 833, but adopted by Winer, is supported by the facts that Jerusalem is called Salem in Ps. lxxvi. 2, and that Josephus (*Ant.* i. 10, §2) and the Targums distinctly assert their identity that the king's dale (2 Sam. xviii. 18), identified in Gen. xiv. 17 with Shaveh, is placed by Josephus (*Ant.* vii. 10, §3), and by mediæval and modern tradition (see Ewald, *Gesch.* iii. 239) in the immediate neighbourhood of Jerusalem: that the name of a later king of Jerusalem, Adonizedek (Josh. x. 1, sounds like that of a legitimate successor of Melchizedek: and that Jewish writers (*ap.* Schöttgen, *Hor. Heb.* in Heb. vii. 2) claim Zedek = righteousness, as a name of Jerusalem. (2) Jerome (*Opp.* i. 446) denies that Salem is Jerusalem, and asserts that it is identical with a town near Scythopolis or Bethshan, which in his time retained the name of Salem, and in which some extensive ruins were shown as the remains of Melchizedek's palace. He supports this view by quoting Gen. xxx. 18, where, however, the translation is questionable; compare the mention of Salem in Judith iv. 4, and in John iii. 23. (3) Professor Stanley (*S. & P* 237, 8) is of opinion that there is every probability that Mount Gerizim is the place where Melchizedek, the priest of the Most High, met Abram. Eupolemus (ap. Euseb. *Præp. Evang.* ix. 17), in a confused version of this story, names Argerizim, the mount of the Most High, as the place in which Abram was hospitably entertained. (4) Ewald (*Gesch.* iii. 239) denies positively that it is Jerusalem, and says that it must be north of Jerusalem on the other side of Jordan (i. 410): an opinion which Rödiger (Gesen. *Thesaurus*, 1422 *b*) condemns. There too Professor Stanley thinks that the king's dale was situate, near the spot where Absalom fell.

Some Jewish writers have held the opinion that Melchizedek was the writer and Abram the subject of Ps. cx. See Deyling, *Obs. Sacr.* iii. 137.

It may suffice to mention that there is a fabulous life of Melchizedek printed among the spurious works of Athanasius, vol. iv. p. 189.

Reference may be made to the following works in addition to those already mentioned: two tracts on Melchizedek by M. J. H. von Elswick, in the *Thesaurus Novus Theolog.-philologicus*; L. Borgisius, *Historia Critica Melchisedeci*, 1706: Gaillard, *Melchisedecus Christus*, &c., 1686: M. C. Hoffman, *De Melchisedeco*, 1669: H. Broughton, *Treatise of Melchizedek*, 1591. See also J. A. Fabricius, *Cod. Pseudepig. V. T.*: P. Molinæus, *Vates*, &c., 1640, iv. 11: J. H. Heidegger, *Hist. Sacr. Patriarcharum*, 1671, ii. 288: Hottinger, *Ennead. Disput.*: and P. Cunæus, *De Repubi. Heb.* iii. 3, apud *Crit. Sacr.* vol. v. [W. T. B.]

MEL'EA (Μελεᾶ: *Melea*). The son of Menan, and ancestor of Joseph in the genealogy of Jesus Christ (Luke iii. 31).



MEL'ECH (מֶלֶךְ, = "king": Μελάχ; Alex. Μαλώθ; in 1 Chr. viii. 35, Μαλάχ; Alex. Μαλάχ, 1 Chr. ix. 41: *Melech*). The second son of Micah, the son of Merib-baal or Mephibosheth, and therefore great-grandson of Jonathan the son of Saul.

MEL'ICU (מַלּוּכִי; *Keri*, מַלִּיכוּ: Ἀμελούχ; Alex. Μαλούχ: *Milicho*). The same as MALLUCH 6 (Neh. xii. 14; comp. ver. 2).

MEL'ITA (Μελίτη), the modern *Malta*. This island has an illustrious place in Scripture, as the scene of that shipwreck of St. Paul which is described in such minute detail in the Acts of the

Apostles.' An attempt has been made, more than once, to connect this occurrence with another island, bearing the same name, in the Gulf of Venice; and our best course here seems to be to give briefly the points of evidence by which the true state of the case has been established.

(1.) We take St. Paul's ship in the condition in which we find her about a day after leaving FAIR HAVENS, *i. e.* when she was under the lee of CLAUDA (Acts xxvii. 16), laid-to on the starboard tack, and strengthened with "undergirders" [SHIP], the boat being just taken on board, and the gale blowing hard from the E.N.E. [EUROCLYDON] (2.) Assuming (what every practised sailor would allow) that the ship's direction of drift would be about W. by N., and her rate of drift about a mile and a half an hour, we come at once to the conclusion, by measuring the distance on the chart, that she would be brought to the coast of Malta on the thirteenth day (see ver. 27). (3.) A ship drifting in this direction to the place traditionally known as St. Paul's Bay would come to that spot on the coast without touching any other part of the island previously. The coast, in fact, trends from this bay to the S.E. This may be seen on consulting any map or chart of Malta. (4.) On *Koura Point*, which is the south-easterly extremity of the bay, there must infallibly have been breakers, with the wind blowing from the N.E. Now the alarm was certainly caused by breakers, for it took place in the night (ver. 27), and it does not appear that the passengers were at first aware of the danger which became sensible to the quick ear of the "sailors." (5.) Yet the vessel did not strike: and this corresponds with the position of the point, which would be some little distance on the port side, or to the left, of the vessel. (6.) Off this point of the coast the soundings are 20 fathoms (ver. 28), and a little further, *in the direction of the supposed drift*, they are 15 fathoms (ib.). (7.) Though the danger was imminent, we shall find from examining the chart that there would still be time to anchor (ver. 29) before striking on the rocks ahead. (8.) With bad holding ground there would have been great risk of the ship dragging her anchors. But the bottom of St. Paul's Bay is remarkably tenacious. In Purdy's *Sailing Directions* (p. 180) it is said of it that "while the cables hold there is no danger, as the anchors will never start." (9.) The other geological characteristics of the place are in harmony with the narrative, which describes the creek as having in one place a sandy or muddy beach (*κόλπον ἔχοντα αἰγιαλόν*, ver. 39), and which states that the bow of the ship was held fast in the shore, while the stern was exposed to the action of the waves (ver. 41). For particulars we must refer to the work (mentioned below) of Mr. Smith, an accomplished geologist. (10.) Another point of local detail is of considerable interest—viz., that as the ship took the ground, the place was observed to be *διθάλασσος*, *i. e.* a connexion was noticed between two apparently separate pieces of water. We shall see, on looking at the chart, that this would be the case. The small island of Salmonetta would at first appear to be a part of Malta itself; but the passage would open on the right as the vessel passed to the place of shipwreck. (11.) Malta is in the track of ships between Alexandria and Puteoli: and this corresponds with the fact that the "Castor and Pollux," an Alexandrian vessel which ultimately conveyed St. Paul to Italy, had wintered in the island (Acts xxviii. 11). (12.)

Finally, the course pursued in this conclusion of the voyage, first to Syracuse and then to Rhegium, contributes a last link to the chain of arguments by which we prove that Melita is *Malta*.

The case is established to demonstration. Still it may be worth while to notice one or two objections. It is said, in reference to xxvii. 27, that the wreck took place in the Adriatic, or Gulf of Venice. It is urged that a well-known island like Malta could not have been unrecognised (xxviii. 39), nor its inhabitants called "barbarous" (xxviii. 2). And as regards the occurrence recorded in xxviii. 3, stress is laid on the facts that Malta has no poisonous serpents, and hardly any wood. To these objections we reply at once that ADRIA, in the language of the period, denotes not the Gulf of Venice, but the open sea between Crete and Sicily; that it is no wonder if the sailors did not recognise a strange part of the coast on which they were thrown in stormy weather, and that they did recognise the place when they did leave the ship (xxviii. 1); that the kindness recorded of the natives (xxviii. 2

A0), shows they were not "barbarians" in the sense of being savages, and that the word denotes simply that they did not speak Greek; and lastly, that the population of Malta has increased in an extraordinary manner in recent times, that probably there was abundant wood there formerly, and that with the destruction of the wood many indigenous animals would disappear.

In adducing positive arguments and answering objections, we have indirectly proved that Melita in the Gulf of Venice was not the scene of the shipwreck. But we may add that this island could not have been reached without a miracle under the circumstances of weather described in the narrative; that it is not in the track between Alexandria and Puteoli; that it would not be natural to proceed from it to Rome by means of a voyage embracing Syracuse; and that the soundings on its shore do not agree with what is recorded in the Acts.

An amusing passage in Coleridge's *Table Talk* (p. 185) is worth noticing as the last echo of what is now an extinct controversy. The question has been set at rest for ever by Mr. Smith of Jordan Hill, in his *Voyage and Shipwreck of St. Paul*, the first published work in which it was thoroughly investigated from a sailor's point of view. It had, however, been previously treated in the same manner, and with the same results, by Admiral Penrose, and copious notes from his MSS. are given in *The Life and Epistles of St. Paul*. In that work (2nd ed. p. 426 *note*) are given the names of some of those who carried on the controversy in the last century. The ringleader on the Adriatic side of the question, not unnaturally, was Padre Georgi, a Benedictine monk connected with the Venetian or Austrian *Melada*, and his *Paulus Naufragus* is extremely curious. He was, however, not the first to suggest this untenable view. We find it, at a much earlier period, in a Byzantine writer, Const. Porphyrog. *De Adm. Imp.* (c. 36, v. iii. p. 164 of the Bonn ed.)

As regards the condition of the island of Melita, when St. Paul was there, it was a dependency of the Roman province of Sicily. Its chief officer (under the governor of Sicily) appears from inscriptions to have had the title of πρῶτος Μελιταίων, or *Primus Melitensium*, and this is the very phrase which St. Luke uses (xxviii. 7). Mr. Smith could not find these inscriptions. There seems, however, no reason whatever to doubt their authenticity (see Bochart, *Opera*, i. 502; Abela, *Descr. Melitae*, p. 160, appended to the last volume of the *Antiquities* of Graevius; and Boeckh, *Corp. Insc.* vol. iii. 5754). Melita, from its position in the Mediterranean, and the excellence of its harbours, has always been important both in commerce and war. It was a settlement of the Phoenicians at an early period, and their language, in a corrupted form, continued to be spoken there in St. Paul's day. (Gesenius, *Versuch üb. malt. Sprache*, Lpz. 1810.) From the Carthaginians it passed to the Romans in the Second Punic War. It was famous for its honey and fruits, for its cotton-stuffs, for excellent building-stone, and for a well-known breed of dogs. A few years before St. Paul's visit, corsairs from his native province of Cilicia had made Melita a frequent resort; and through subsequent periods of its history, Vandal and Arabian, it was often associated with piracy. The Christianity, however, introduced by St. Paul was never extinct. This island had a brilliant period under the knights of St. John; and it is associated with the most exciting passages of the struggle between the French and English at the close of the last century and the beginning of the present. No island so small has so great a history, whether Biblical or political. [J. S. H.]

MELONS (אֲבַטִּחִים,[a] *abattichim*: πέπονες: *pepones*) are mentioned only in the following verse: "We remember the fish, which we did eat in Egypt freely; the cucumbers, and the melons," &c. (Num. xi. 5); by the Hebrew word we are probably to understand both the Melon (*Cucumis melo*) and the water Melon (*Cucurbita citrullus*), for the Arabic noun singular, *batêkh*, which is identical with the Hebrew word, is used generically, as we learn from Prosper Alpinus, who says (*Rerum Aegypt. Hist.* i. 17) of the Aegyptians "they often dine and sup on fruits alone, such as cucumbers, pumpkins, melons, which are known by the generic name *batech*." The Greek πέπων, and the Latin *pepo*, appear to be also occasionally used in a generic sense. According to Forskål (*Descr. Plant.* p. 167) and Hasselquist (*Trav.* 255), the Arabs designated the water melon *Batech*, while the same word was used with some specific epithet to denote other plants belonging to the order *Cucurbitaceae*. Though the water melon is now quite common in Asia, Dr. Royle thinks it doubtful whether it was known to the ancient Egyptians, as no distinct mention of it is made in Greek writers; it is uncertain at what time the Greeks applied the term ἀγγούριον (*anguria*) to the water melon, but it was probably at a comparatively recent date. The modern Greek word for this fruit is ἀγγοῦρι. Galen (*de Fac. Alim.* ii. 566) speaks of the common melon (*Cucumis melo*) under the name μηλοπέπων. Serapion, according to Sprengel (*Comment. in Dioscor.* ii. 162) restricts the Arabic *Batikh* to the water melon.

Cucurbita citrullus.

The water melon is by some considered to be indigenous to India, from which country it may have been introduced into Egypt in very early times; according to Prosper Alpinus, medical Arabic writers sometimes use the term *batikh-Indi*, or *anguria*

[a] From root בָּטַח, transp. for טָבַח (טַבָּח). "to cook." Precisely similar is the derivation of πέπων, from πέσσω. Gesenius compares the Spanish *budiecas*, the French *pastèques*.

Indica, to denote this fruit, whose common Arabic name is according to the same authority, *battikh et Maovi* (water); but Hasselquist says (*Trav.* 256) that this name belongs to a softer variety, the juice of which when very ripe, and almost putrid, is mixed with rose-water and sugar and given in fevers; he observes that the water-melon is cultivated on the banks of the Nile, on the rich clayey earth after the inundations, from the beginning of May to the end of July, and that it serves the Egyptians for meat, drink, and physic; the fruit, however, he says, should be eaten "with great circumspection, for if it be taken in the heat of the day when the body is warm bad consequences often ensue." This observation no doubt applies only to persons before they have become acclimatised, for the native Egyptians eat the fruit with impunity.

Melon. (Cucumis melo.)

The common melon (*Cucumis melo*) is cultivated in the same places and ripens at the same time with the water-melon; but the fruit in Egypt is not so delicious as in this country (see Sonnini's *Travels*, ii. 328); the poor in Egypt do not eat this melon. "A traveller in the East," says Kitto (note on Num. xi. 5), "who recollects the intense gratitude which a gift of a slice of melon inspired while journeying over the hot and dry plains, will readily comprehend the regret with which the Hebrews in the Arabian desert looked back upon the melons of Egypt." The water-melon, which is now extensively cultivated all over India and the tropical parts of Africa and America, and indeed in hot countries generally, is a fruit not unlike the common melon, but the leaves are deeply lobed and gashed, the flesh is pink or white, and contains a large quantity of cold watery juice without much flavour; the seeds are black. The melon is too well known to need description. Both these plants belong to the order *Cucurbitaceae*, the Cucumber family, which contains about sixty known genera and 300 species—*Cucurbita*, *Bryonia*, *Momordica*, *Cucumis*, are examples of the genera. [CUCUMBER; GOURD.] [W. H.]

MEL'ZAR (מֶלְצַר). The A. V. is wrong in regarding Melzar as a proper name; it is rather an official title, as is implied in the addition of the article in each case where the name occurs (Dan. i. 11, 16): the marginal reading, "the steward" is therefore more correct. The LXX. regards the article as a part of the name, and renders it Ἀμελσάρ; the Vulgate, however, has *Malasar*. The warder was subordinate to the "master of the eunuchs;" his office was to superintend the nurture and education of the young; he thus combined the duties of the Greek παιδαγωγός and τροφεύς, and more nearly resembles our "tutor" than any other officer. As to the origin of the term, there is some doubt; it is generally regarded as of Persian origin, the words *mal*, *çara* giving the sense of "head cupbearer;" Fürst (Lex. *s. v.*) suggests its connexion with the Hebrew *nazar*, "to guard." [W. L. B.]

MEM'MIUS, QUINTUS (Κόϊντος Μέμμιος), 2 Macc. xi. 34. [MANLIUS, T.]

MEMPHIS, a city of ancient Egypt, situated on the western bank of the Nile, in latitude 30° 6' N. It is mentioned by Isaiah (xix. 13), Jeremiah (ii. 16, xlvi. 14, 19), and Ezekiel (xxx. 13, 16), under the name of NOPH; and by Hosea (ix. 6) under the name of MOPH in Hebrew, and MEMPHIS in our English version. The name is compounded of two hieroglyphics "*Men*" = foundation, station; and "*Nofre*" = good. It is variously interpreted; *e. g.* "haven of the good;" "tomb of the good man"—Osiris; "the abode of the good;" "the gate of the blessed." Gesenius remarks upon the two interpretations proposed by Plutarch (*De Isid. et Os.* 20)—viz. ὅρμος ἀγαθῶν, "haven of the good," and τάφος Ὀσιρίδος, "the tomb of Osiris"—that "both are applicable to Memphis, as the sepulchre of Osiris, the Necropolis of the Egyptians, and hence also the haven of the blessed, since the right of burial was conceded only to the good." Bunsen, however, prefers to trace in the name of the city a connexion with Menes, its founder. The Greek coins have *Memphis*; the Coptic is *Memfi* or *Menfi* and *Menf*; Hebrew, sometimes *Moph* (Mph), and sometimes *Noph*; Arabic *Memf* or *Menf* (Bunsen, *Egypt's Place*, vol. ii. 53). There can be no question as to the identity of the *Noph* of the Hebrew prophets with *Memphis*, the capital of lower Egypt.

Though some regard Thebes as the more ancient city, the monuments of Memphis are of higher antiquity than those of Thebes. Herodotus dates its foundation from Menes, the first really historical king of Egypt. The era of Menes is not satisfactorily determined. Birch, Kenrick, Poole, Wilkinson, and the English school of Egyptologists generally, reduce the chronology of Manetho's lists by making several of his dynasties contemporaneous instead of successive. Sir G. Wilkinson dates the era of Manes from B.C. 2690; Mr. Stuart Poole, B.C. 2717 (Rawlinson, *Herod.* ii. 342; Poole, *Horae Aegypt.* p. 97). The German Egyptologists assign to Egypt a much longer chronology. Bunsen fixes the era of Menes at B.C. 3643 (*Egypt's Place*, vol. ii. 579); Brugsch at B.C. 4455 (*Histoire d'Egypte*, i. 287); and Lepsius at B.C. 3892 (*Königsbuch der alten Aegypter*). Lepsius also registers about 18,000 years of the dynasties of gods, demigods, and pre-historic kings, before the accession of Menes. But indeterminate, and conjectural, as the early chronology of Egypt yet is, all agree that the known history of the empire begins with Menes, who founded Memphis. The city belongs to the earliest periods of authentic history.

The building of Memphis is associated by tradition with a stupendous work of art which has permanently changed the course of the Nile and the face of the Delta. Before the time of Menes the river emerging from the upper valley into the head of the Delta, bent its course westward toward the

falls of the Libyan desert, or at least discharged a large portion of its waters through an arm in that direction. Here the generous flood whose yearly overflow gives life and fertility to Egypt, was largely absorbed in the sands of the desert, or wasted in stagnant morasses. It is even conjectured that up to the time of Menes the whole Delta was an uninhabitable marsh. The rivers of Damascus, the Barada and 'Awaj, now lose themselves in the same way in the marshy lakes of the great desert plain south-east of the city. Herodotus informs us, upon the authority of the Egyptian priests of his time, that Menes "by banking up the river at the bend which it forms about a hundred furlongs south of Memphis, laid the ancient channel dry, while he dug a new course for the stream halfway between the two lines of hills. To this day," he continues, "the elbow which the Nile forms at the point where it is forced aside into the new channel is guarded with the greatest care by the Persians, and strengthened every year; for if the river were to burst out at this place, and pour over the mound, there would be danger of Memphis being completely overwhelmed by the flood. Mên, the first king, having thus, by turning the river, made the tract where it used to run, dry land, proceeded in the first place to build the city now called Memphis, which lies in the narrow part of Egypt; after which he further excavated a lake outside the town, to the north and west, communicating with the river, which was itself the eastern boundary" (Herod. ii. 99). From this description it appears, that—like Amsterdam dyked in from the Zuyder Zee, or St. Petersburg defended by the mole at Cronstadt from the gulf of Finland, or more nearly like New Orleans protected by its levee from the freshets of the Mississippi, and drained by lake Pontchartrain,—Memphis was erected upon a marsh reclaimed by the dyke of Menes and drained by his artificial lake. New Orleans is situated on the left bank of the Mississippi, about 90 miles from its mouth, and is protected against inundation by an embankment

The Sphinx and Pyramids at Memphis.

21 feet wide and 4 feet high, which extends from 20 miles above the city to 40 miles below it. Lake Pontchartrain affords a natural drain for the swamps that form the margin of the city upon the east. The dyke of Menes began 12 miles south of Memphis, and deflected the main channel of the river about two miles to the eastward. Upon the line of the Nile, a canal still conducted a portion of the waters westward through the old channel, thus irrigating the plain beyond the city in that direction, while an inundation was guarded against on that side by a large artificial lake or reservoir at Memphis. The skill in engineering which these works required, and which their remains still indicate, argues a high degree of material civilisation, at least in the mechanic arts, in the earliest known period of Egyptian history.

The political sagacity of Menes appears in the position of his capital where it would at once command the Delta and hold the key of upper Egypt, controlling the commerce of the Nile, defended upon the west by the Libyan mountains and desert, and on the east by the river and its artificial embankments. The climate of Memphis may be inferred from that of the modern Cairo—about 10 miles to the north—which is the most equable that Egypt affords. The city is said to have had a circumference of about 19 miles (Diod. Sic. i. 50), and the houses or inhabited quarters, as was usual in the great cities of antiquity, were interspersed with numerous gardens and public areas.

Herodotus states, on the authority of the priests, that Menes "built the temple of Hephaestus, which stands within the city, a vast edifice, well worthy of mention" (ii. 99). The divinity whom Herodotus thus identifies with Hephaestus was *Ptah*, "the creative power, the maker of all material things" (Wilkinson in Rawlinson's *Herod.* ii. 289; Bunsen, *Egypt's Place*, i. 367, 384). *Ptah* was worshipped in all Egypt, but under different representations in different Nomes; ordinarily "as a god holding before him with both hands the Nilo-

meter, or emblem of stability, combined with the sign of life" (Bunsen, i. 382). But at Memphis his worship was so prominent that the primitive sanctuary of his temple was built by Menes: successive monarchs greatly enlarged and beautified the structure, by the addition of courts, porches, and colossal ornaments. Herodotus and Diodorus describe several of these additions and restorations, but nowhere give a complete description of the temple with measurements of its various dimensions (Herod. ii. 99, 101, 108-110, 121, 136, 153, 176; Diod. Sic. i. 45, 51, 62, 67). According to these authorities, Moeris built the northern gateway; Sesostris erected in front of the temple colossal statues (varying from 30 to 50 feet in height) of himself, his wife, and his four sons; Rhampsinitus built the western gateway, and erected before it the colossal statues of Summer and Winter; Asychis built the eastern gateway, which "in size and beauty far surpassed the other three;" Psammetichus built the southern gateway; and Amosis presented to this temple "a recumbent colossus 75 feet long, and two upright statues, each 20 feet high." The period between Menes and Amosis, according to Brugsch, was 3731 years; but according to Wilkinson only about 2100 years; but upon either calculation, the temple as it appeared to Strabo was the growth of many centuries. Strabo (xvii. 807) describes this temple as "built in a very sumptuous manner, both as regards the size of the Naos and in other respects." The Dromos, or grand avenue leading to the temple of Ptah, was used for the celebration of bull-fights, a sport pictured in the tombs. But these fights were probably between animals alone—no captive or gladiator being compelled to enter the arena. The bulls having been trained for the occasion, were brought face to face and goaded on by their masters;—the prize being awarded to the owner of the victor. But though the bull was thus used for the sport of the people, he was the sacred animal of Memphis.

Apis was believed to be an incarnation of Osiris. The sacred bull was selected by certain outward symbols of the in-dwelling divinity; his colour being black, with the exception of white spots of a peculiar shape upon his forehead and right side. The temple of Apis was one of the most noted structures of Memphis. It stood opposite the southern portico of the temple of Ptah; and Psammetichus, who built that gateway, also erected in front of the sanctuary of Apis a magnificent colonnade, supported by colossal statues or Osiride pillars, such as may still be seen at the temple of Medeenet Habou at Thebes (Herod. ii. 153). Through this colonnade the Apis was led with great pomp upon state occasions. Two stables adjoined the sacred vestibule (Strab. xvii. 807). Diodorus (i. 85) describes the magnificence with which a deceased Apis was interred and his successor installed at Memphis. The place appropriated to the burial of the sacred bulls was a gallery some 2000 feet in length by 20 in height and width, hewn in the rock without the city. This gallery was divided into numerous recesses upon each side; and the embalmed bodies of the sacred bulls, each in its own sarcophagus of granite, were deposited in these "sepulchral stalls." A few years since this burial place of the sacred bulls was discovered by M. Mariette, and a large number of the sarcophagi have already been opened. These catacombs of mummied bulls were approached from Memphis by a paved road, having colossal lions upon either side.

At Memphis was the reputed burial place of Isis (Diod. Sic. i. 22), it had also a temple to that "myriad-named" divinity, which Herodotus (ii. 176) describes as "a vast structure, well worthy of notice," but inferior to that consecrated to her at Busiris, a chief city of her worship (ii. 59). Memphis had also its Serapeium, which probably stood in the western quarter of the city, toward the desert; since Strabo describes it as very much exposed to sand-drifts, and in his time partly buried by masses of sand heaped up by the wind (xvii. 807). The sacred cubit and other symbols used in measuring the rise of the Nile, were deposited in the temple of Serapis.

Herodotus describes "a beautiful and richly ornamented inclosure," situated upon the south side of the temple of Ptah, which was sacred to Proteus, a native Memphite king. Within this enclosure there was a temple to "the foreign Venus" (Astarte?), concerning which the historian narrates a myth connected with the Grecian Helen. In this enclosure was "the Tyrian camp" (ii. 112). A temple of Ra or Phre, the Sun, and a temple of the Cabiri, complete the enumeration of the sacred buildings of Memphis.

The mythological system of the time of Menes is ascribed by Bunsen to "the amalgamation of the religion of Upper and Lower Egypt;"—religion having "already united the two provinces before the power of the race of This in the Thebaid extended itself to Memphis, and before the giant work of Menes converted the Delta from a desert, chequered over with lakes and morasses, into a blooming garden." The political union of the two divisions of the country was effected by the builder of Memphis. "Menes founded the *Empire of Egypt*, by raising the people who inhabited the valley of the Nile from a little provincial station to that of an historical nation" (*Egypt's Place*, i. 441, ii. 409).

The Necropolis, adjacent to Memphis, was on a scale of grandeur corresponding with the city itself. The "city of the pyramids" is a title of Memphis in the hieroglyphics upon the monuments. The great field or plain of the Pyramids lies wholly upon the western bank of the Nile, and extends from *Aboo-Roâsh*, a little to the north-west of Cairo, to *Meydoom*, about 40 miles to the south, and then in a south-westerly direction about 25 miles further to the pyramids of *Howara* and of *Biahmo* in the *Fayoura*. Lepsius computes the number of pyramids in this district at sixty-seven; but in this he counts some that are quite small, and others of a doubtful character. Not more than half this number can be fairly identified upon the whole field. But the principal seat of the pyramids, the Memphite Necropolis, was in a range of about 15 miles from *Sakkara* to *Gizeh*, and in the groups here remaining nearly thirty are probably tombs of the imperial sovereigns of Memphis (Bunsen, *Egypt's Place*, ii. 88). Lepsius regards the "Pyramid fields of Memphis" as a most important testimony to the civilisation of Egypt (*Letters*, Bohn, p. 25; also *Chronologie der Aegypter*, vol. i.). These royal pyramids, with the subterranean halls of Apis, and numerous tombs of public officers erected on the plain or excavated in the adjacent hills, gave to Memphis the pre-eminence which it enjoyed as "the haven of the blessed."

Memphis long held its place as a capital: and for centuries a Memphite dynasty ruled over all Egypt. Lepsius, Bunsen, and Brugsch, agree in regarding the 3rd, 4th, 6th, 7th, and 8th dynasties

f the Old Empire as Memphite, reaching through a eriod of about a thousand years. During a portion f this period, however, the chain was broken, or here were contemporaneous dynasties in other parts f Egypt.

The overthrow of Memphis was distinctly predicted by the Hebrew prophets. In his "burden of Egypt," Isaiah says, "The princes of Zoan are become fools, the princes of *Noph* are deceived" (Is. xix. 13). Jeremiah (xlvi. 19) declares that "*Noph* shall be waste and desolate without an inhabitant." Ezekiel predicts: "Thus saith the Lord God: I will also destroy the idols, and I will cause [their] images to cease out of *Noph*; and there shall be no more a prince of the land of Egypt." The latest of these predictions was uttered nearly 600 years before Christ, and half a century before the invasion of Egypt by Cambyses (cir. B.C. 525). Herodotus informs us that Cambyses, enraged at the opposition he encountered at Memphis, committed many outrages upon the city. He killed the sacred Apis, and caused his priests to be scourged. "He opened the ancient sepulchres, and examined the bodies that were buried in them. He likewise went into the temple of Hephaestus (Ptah) and made great sport of the image. . . . He went also into the temple of the Cabeiri, which it is unlawful for any one to enter except the priests, and not only made sport of the images but even burnt them" (Her. iii. 37). Memphis never recovered from the blow inflicted by Cambyses. The rise of Alexandria hastened its decline. The Caliph conquerors founded Fostát (Old Cairo) upon the opposite bank of the Nile, a few miles north of Memphis, and brought materials from the old city to build their new capital (A.D. 638). The Arabian physician, Abd-el-Latif, who visited Memphis in the 13th century, describes its ruins as then marvellous beyond description (see De Sacy's translation, cited by Brugsch, *Histoire d'Egypte*, p. 18). Abulfeda, in the 14th century, speaks of the remains of Memphis as immense; for the most part in a state of decay, though some sculptures of variegated stone still retained a remarkable freshness of colour (*Descriptio Aegypti*, ed. Michaelis, 1776). At length so complete was the ruin of Memphis, that for a long time its very site was lost. Pococke could find no trace of it. Recent explorations, especially those of Messrs. Mariette and Linant, have brought to light many of its antiquities, which have been dispersed to the museums of Europe and America. Some specimens of sculpture from Memphis adorn the Egyptian hall of the British Museum; other monuments of this great city are in the Abbott Museum in New York. The dykes and canals of Menes still form the basis of the system of irrigation for Lower Egypt; the insignificant village of Meet Raheeneh occupies nearly the centre of the ancient capital. Thus the site and the general outlines of Memphis are nearly restored; but "the images have ceased out of Noph, and it is desolate, without inhabitant."

[J. P. T.]

MEMUCAN (מְמוּכָן: *Μουχαῖος*: *Mamuchan*). One of the seven princes of Persia in the reign of Ahasuerus, who "saw the king's face," and sat first in the kingdom (Esth. i. 14). They were "wise men who knew the times" (skilled in the planets, according to Aben Ezra), and appear to have formed a council of state; Josephus says that one of their offices was that of interpreting the laws (*Ant.* xi. 6, §1). This may also be inferred from the manner in which the royal question is put to them when assembled in council; "*According to law* what is to be done with the queen Vashti?" Memucan was either the president of the council on this occasion, or gave his opinion first in consequence of his acknowledged wisdom, or from the respect allowed to his advanced age. Whatever may have been the cause of this priority, his sentence for Vashti's disgrace was approved by the king and princes, and at once put into execution; "and the king did according to the word of Memucan" (Esth. i. 16, 21). The Targum of Esther identifies him with "Haman the grandson of Agag." The reading of the *Cethîb*, or written text, in ver. 16 is מוּמכן. [W. A. W.]

MEN'AHEM (מְנַחֵם: *Μαναήμ*: *Manaem*), son of Gadi, who[a] slew the usurper Shallum and seized the vacant throne of Israel, B.C. 772. His reign, which lasted ten years, is briefly recorded in 2 K. xv. 14-22. It has been inferred from the expression in verse 14, "from Tirzah," that Menahem was a general under Zechariah stationed at Tirzah, and that he brought up his troops to Samaria and avenged the murder of his master by Shallum (Joseph. *Ant.* ix. 11, §1; Keil, Thenius).

In religion Menahem was a stedfast adherent of the form of idolatry established in Israel by Jeroboam. His general character is described by Josephus as rude and exceedingly cruel. The contemporary prophets, Hosea and Amos, have left a melancholy picture of the ungodliness, demoralisation, and feebleness of Israel; and Ewald adds to their testimony some doubtful references to Isaiah and Zechariah.

In the brief history of Menahem, his ferocious treatment of Tiphsah occupies a conspicuous place. The time of the occurrence, and the site of the town have been doubted. Keil says that it can be no other place than the remote Thapsacus on the Euphrates, the north-east boundary (1 K. iv. 24) of Solomon's dominions; and certainly no other place bearing the name is mentioned in the Bible. Others suppose that it may have been some town which Menahem took in his way as he went from Tirzah to win a crown in Samaria (Ewald); or that it is a transcriber's error for Tappuah (Josh. xvii. 8), and that Menahem laid it waste when he returned from Samaria to Tirzah (Thenius). No sufficient reason appears for having recourse to such conjectures where the plain text presents no insuperable difficulty. The act, whether perpetrated at the beginning of Menahem's reign or somewhat later, was doubtless intended to strike terror into the hearts of reluctant subjects throughout the whole extent of dominion which he claimed. A precedent for such cruelty might be found in the border wars between Syria and Israel, 2 K. viii. 12. It is a striking sign of the increasing degradation of the land, that a

[a] Ewald (*Gesch. Isr.* iii. 696), following the LXX., would translate the latter part of 2 K. xv. 10, "And Kobokam (or Kebkam) smote him, and slew him, and reigned in his stead." Ewald considers the fact of such a king's existence a help to the interpretation of Zech. xi. 8; and he accounts for the silence of Scripture as to his end by saying that he may have thrown himself across the Jordan, and disappeared among the subjects of king Uzziah. It does not appear, however, how such a translation can be made to agree with the subsequent mention (ver. 13) of Shallum, and with the express ascription of Shallum's death (ver. 14) to Menahem. Thenius excuses the translation of the LXX. by supposing that their MSS. may have been in a defective state, but ridicules the theory of Ewald.

king of Israel practises upon his subjects a brutality from the mere suggestion of which the unscrupulous Syrian usurper recoiled with indignation.

But the most remarkable event in Menahem's reign is the first appearance of a hostile force of Assyrians on the north-east frontier of Israel. King Pul, however, withdrew, having been converted from an enemy into an ally by a timely gift of 1000 talents of silver, which Menahem exacted by an assessment of 50 shekels a head on 60,000 Israelites. It seems perhaps too much to infer from 1 Chr. v. 26, that Pul also took away Israelite captives. The name of Pul (LXX. Phaloch or Phalos) appears according to Rawlinson (*Bampton Lecture* for 1859, Lect. iv. p. 133) in an Assyrian inscription of a Ninevite king, as Phallukha, who took tribute from Beth Khumri (=the house of Omri=Samaria) as well as from Tyre, Sidon, Damascus, Idumaea, and Philistia; the king of Damascus is set down as giving 2300 talents of silver besides gold and copper, but neither the name of Menahem, nor the amount of his tribute is stated in the inscription. Rawlinson also says that in another inscription the name of Menahem is given, probably by mistake of the stone-cutter, as a tributary of Tiglath-pileser.

Menahem died in peace, and was succeeded by his son Pekahiah. [W. T. B.]

MEN'AN (Μαννᾶ: *Menna*). The son of Mattatha, one of the ancestors of Joseph in the genealogy of Jesus Christ (Luke iii. 31). This name and the following Melea are omitted in some Latin MSS., and are believed by Ld. A. Hervey to be corrupt (*Genealogies*, p. 88).

MENE' (מְנָא: Μανή, Theodot.: *Mane*). The first word of the mysterious inscription written upon the wall of Belshazzar's palace, in which Daniel read the doom of the king and his dynasty (Dan. v. 25, 26). It is the Peal past participle of the Chaldee מְנָה, *menâh*, "to number," and therefore signifies "numbered," as in Daniel's interpretation, "God hath *numbered* (מְנָה, *menâh*) thy kingdom and finished it." [W. A. W.]

MENELA'US (Μενέλαος), a usurping high-priest who obtained the office from Antiochus Epiphanes (c. B.C. 172) by a large bribe (2 Macc. iv. 23-5.), and drove out Jason, who had obtained it not long before by similar means. When he neglected to pay the sum which he had promised, he was summoned to the king's presence, and by plundering the temple gained the means of silencing the accusations which were brought against him. By a similar sacrilege he secured himself against the consequences of an insurrection which his tyranny had excited, and also procured the death of Onias (ver. 27-34). He was afterwards hard pressed by Jason, who taking occasion from his unpopularity, attempted unsuccessfully to recover the high-priesthood (2 Macc. v. 5-10). For a time he then disappears from the history (yet comp. ver. 23), but at last he met with a violent death at the hands of Antiochus Eupator (cir. B.C. 163), which seemed in a peculiar manner a providential punishment of his sacrilege (xiii. 3, 4).

According to Josephus (*Ant.* xii. 5, §1) he was a younger brother of Jason and Onias, and, like Jason, changed his proper name Onias, for a Greek name. In 2 Maccabees, on the other hand, he is called a brother of Simon the Benjamite (2 Macc. iv. 23), whose treason led to the first attempt to plunder the temple. If this account be correct, the profanation of the sacred office was the more marked by the fact that it was transferred from the house of Aaron. [B. F. W.]

MENES'THEUS (Μενεσθεύς; Alex. Μενεθεσις: *Menestheus*). The father of APOLLONIUS (2 Macc. iv. 21).

MENI'. The last clause of Is. lxv. 11 is rendered in the A. V. "and that furnish the drink-offering unto that *number*" (לַמְנִי), the marginal reading for the last word being "Meni." That the word is rendered is a proper name, and also the proper name of an object of idolatrous worship cultivated by the Jews in Babylon, is a supposition which there seems no reason to question, as it is in accordance with the context, and has every probability to recommend it. But the identification of Meni with any known heathen god is still uncertain. The versions are at variance. In the LXX. the word is rendered ἡ τύχη, "fortune" or "luck." The old Latin version of the clause is "impletis *daemoni* potorum;" while Symmachus (as quoted by Jerome) must have had a different reading, מִנִּי, *minni*, "without me," which Jerome interprets as signifying that the act of worship implied in the drink-offering was not performed for God, but for the daemon ("ut sciam non sibi fieri sed daemoni"). The Targum of Jonathan is very vague—"and mingle cups for the idols;" and the Syriac translators either omit the word altogether, or had a different reading, perhaps לָמוֹ, *lâmô*, "for them." Some variation of the same kind apparently gave rise to the *super eam* of the Vulgate, referring to the "table" mentioned in the first clause of the verse. From the old versions we come to the commentators, and their judgments are equally conflicting. Jerome (*Comm. in Is.* lxv. 11) illustrates the passage by reference to an ancient idolatrous custom which prevailed in Egypt, and especially at Alexandria, on the last day of the last month of the year, of placing a table covered with dishes of various kinds, and a cup mixed with mead, in acknowledgment of the fertility of the past year, or as an omen of that which was to come (comp. Virg. *Aen.* ii. 763). But he gives no clue to the identification of Meni, and his explanation is evidently suggested by the renderings of the LXX. and the old Latin version; the former, as he quotes them, translating *Gad* by "fortune," and *Meni* by "daemon," in which they are followed by the latter. In the later mythology of Egypt, as we learn from Macrobius (*Saturn.* i. 19), Δαίμων and Τύχη were two of the four deities who presided over birth, and represented respectively the Sun and Moon. A passage quoted by Selden (*de Dis Syris, Synt.* i. c. 1) from a MS. of Vettius Valens of Antioch, an ancient astrologer, goes also to prove that in the astrological language of his day the sun and moon were indicated by δαίμων and τύχη, as being the arbiters of human destiny.[a] This circumstance, coupled with the similarity between Meni and Μήν or Μήνη, the ancient name of the moon, has induced the majority of commentators to conclude that Meni is the Moon god

[a] Κλῆροι τῆς τύχης καὶ τοῦ δαίμονος σημαινουσιν Ἥλιόν τε καὶ Σελήνην. The order of the words here seems to favour the received reading of the LXX.; while the reading given by Jerome is supported by the fact that in Gen. xxx. 11, גָּד, *gad*, is rendered τύχη.

goddess, the *Deus Lunus*, or *Dea Luna* of the Romans; masculine as regards the earth which she illumines (*terras maritus*), feminine with respect to the sun (*Solis uxor*), from whom she receives her light. This twofold character of the moon is thought by David Millius to be indicated in the two names Gad and Meni, the former feminine, the latter masculine (*Diss.* v. § 23); but as both are masculine in Hebrew, his speculation falls to the ground. Le Moyne, on the other hand, regarded both words as denoting the sun, and his double worship among the Egyptians: *Gad* is then the goat of Mendes, and *Meni* = Mnevis worshipped at Heliopolis. The opinion of Huetius that the *Meni* of Isaiah and the Μήν of Strabo (xii. c. 31) both denoted the sun was refuted by Vitringa and others. Among those who have interpreted the word literally "number," may be reckoned Jarchi and Abarbanel, who understand by it the "number" of the priests who formed the company of revellers at the feast, and later Hoheisel (*Obs. ad. diffic. Jes. loca*, p 349) followed in the same track. Kimchi, in his note on Is. lxv. 11, says of Meni, "it is a star, and some interpret it of the stars which are *numbered*, and they are the seven stars of motion," i. e. the planets. Buxtorf (*Lex. Hebr.*) applies it to the "number" of the stars which were worshipped as gods; Schindler (*Lex. Pentagl.*) to "the number and multitude" of the idols, while according to others it refers to "Mercury the god of numbers;" all which are mere conjectures, *quot homines, tot sententiæ*, and take their origin from the play upon the word Meni, which is found in the verse next following that in which it occurs ("therefore will I *number* (וּמְנִיתִי, *ûmânîthî*) you to the sword"), and which is supposed to point to its derivation from the verb מָנָה, *mânâh*, to number. But the origin of the name of Noah, as given in Gen. v. 29,[b] shows that such plays upon words are not to be depended upon as the bases of etymology. On the supposition, however, that in this case the etymology of Meni is really indicated, its meaning is still uncertain. Those who understand by it the moon, derive an argument for their theory from the fact, that anciently, years were *numbered* by the courses of the moon. But Gesenius (*Comm. üb. d. Jesaia*), with more probability, while admitting the same origin of the word, gives to the root *mânâh* the sense of assigning, or distributing,[c] and connects it with *manâh*,[d] one of the three idols worshipped by the Arabs before the time of Mohammad, to which reference is made in the Koran (Sura 53), "What think ye of Allat, and Al Uzzah, and *Manah*, that other third goddess?" *Manah* was the object of worship of "the tribes of *Hudheyl* and *Khuzá'ah*, who dwelt between Mekkeh and El-Medeeneh, and as some say, of the tribes of Aus, El-Khazraj, and Thakeek also. This idol was a large stone, demolished by one Saad, in the 8th year of the Flight, a year so fatal to the idols of Arabia" (Lane's *Sel. from the Kur-án*, pref. pp. 30, 31, from Pococke's *Spec. Hist. Ar.* p. 93. ed. White). But Al Zamakhshari, the commentator on the Koran, derives *Manah* from the root مَنَى, "to flow," because of the blood which flowed at the sacrifices to this idol, or, as Millius explains it, because the ancient idea of the moon was that it was a star full of moisture, with which it filled the sublunary regions.[e] The etymology given by Gesenius is more probable; and Meni would then be the personification of fate or destiny, under whatever form it was worshipped.[f] Whether this form, as Gesenius maintains, was the planet Venus, which was known to Arabic astrologers as "the lesser good fortune" (the planet Jupiter being the "greater"), it is impossible to say with certainty; nor is it safe to reason from the worship of *Manah* by the Arabs in the times before Mohammad to that of Meni by the Jews more than a thousand years earlier. But the coincidence is remarkable, though the identification may be incomplete. [W. A. W.]

MEON'ENIM, THE PLAIN OF (אֵלוֹן מְעוֹנְנִים: Ἠλων μαωνεμείν; Alex. and Aquila. ὄρυος ἀποβλεποντων: *quae respicit querctum*), an oak, or terebinth, or other great tree—for the translation of the Hebrew *Elon* by "plain" is most probably incorrect, as will be shown under the head of PLAIN—which formed a well-known object in central Palestine in the days of the Judges. It is mentioned—at least under this name—only in Judg. ix. 37, where Gaal ben-Ebed standing in the gateway of Shechem sees the ambushes of Abimelech coming towards the city, one by the middle of the land, and another "by the way (מִדֶּרֶךְ) of Elon-Meonenim," that is, the road leading to it. In what direction it stood with regard to the town we are not told.

The meaning of Meonenim, if interpreted as a Hebrew word, is enchanters,[g] or "observers of times," as it is elsewhere rendered (Deut. xviii. 10, 14; in Mic. v. 12 it is "soothsayers"). This connexion of the name with magical arts has led to the suggestion[h] that the tree in question is identical with that beneath which Jacob hid the foreign idols and amulets of his household, before going into the presence of God at the consecrated ground of Bethel (Gen. xxxv. 4). But the inference seems hardly a sound one, for *meonenim* does not mean "enchant*ments*" but "enchant*ers*," nor is there any ground for connecting it in any way with amulets or images; and there is the positive reason against the identification that while this tree seems to have been at a distance from the town of Shechem, that of Jacob was in it, or in very close proximity to it (the Hebrew particle used is עִם, which implies this).

[b] "And he called his name Noah (נֹחַ), saying, This one shall comfort us," &c. (יְנַחֲמֵנוּ, *yĕnachămēnû*). Yet no one would derive נֹחַ, *nâcah*, from נָחַם, *nâcham*. The play on the word may be retained without detriment to the sense if we render Meni "destiny," and the following ver. 14, "therefore will I *destine* you for the sword."

[c] Like the Arab. مَنَى, *mana*, whence مَنًا, "death," مُنَةٌ, "fate," "destiny."

[d] مَنَاةٌ.

[e] "The moist star
Upon whose influence Neptune's empire stands."
SHAKSP. *Hamlet*, i. 1.

[f] The presence of the article seems to indicate that "Meni" was originally an appellative.

[g] Gesenius (*Thes.* 51 b), *incantatores* and *Zauberer* Michaelis and Fürst, *Wahrsager*. The root of the word is עָנַן, probably connected with עַיִן, the eye, which bears so prominent a part in Eastern magic. Of this there is a trace in the *respicit* of the Vulgate. (See Gesen. *Thes.* 1052, 3; also DIVINATION, vol. i. 443, 444.)

[h] See Stanley, *S & P.* 142.

Five trees are mentioned in connexion with Shechem:—

1. The oak (not "plain" as in A. V.) of Moreh, where Abram made his first halt and built his first altar in the Promised Land (Gen. xii. 6).

2. That of Jacob, already spoken of.

3. "The oak which was in the holy place of Jehovah" (Josh. xxiv. 26), beneath which Joshua set up the stone which he assured the people had heard all his words, and would one day witness against them.

4. The Elon-Muttsab, or "oak (not "plain," as in A. V.) of the pillar in Shechem," beneath which Abimelech was made king (Judg. ix. 6).

5. The Elon-Meonenim.

The first two of these may, with great probability, be identical. The second, third, and fourth, agree in being all specified as in or close to the town. Joshua's is mentioned with the definite article—"the oak"—as if well known previously. It is therefore possible that it was Jacob's tree, or its successor. And it seems further possible that during the confusions which prevailed in the country after Joshua's death, the stone which he had erected beneath it, and which he invested, even though only in metaphor, with qualities so like those which the Canaanites attributed to the stones they worshipped—that during these confused times this famous block may have become sacred among the Canaanites, one of their "mattsebahs" [see IDOL, vol. i. 850, §15], and thus the tree have acquired the name of "the oak of Muttsab" from the fetish below it.

. That Jacob's oak and Joshua's oak were the same tree seems still more likely, when we observe the remarkable correspondence between the circumstances of each occurrence. The point of Joshua's address—his summary of the early history of the nation—is that they should "put away the foreign gods which were among them, and incline their hearts to Jehovah the God of Israel." Except in the mention of Jehovah, who had not revealed Himself till the Exodus, the words are all but identical with those in which Jacob had addressed his followers; and it seems almost impossible not to believe that the coincidence was intentional on Joshua's part, and that such an allusion to a well-known passage in the life of their forefather, and which had occurred on the very spot where they were standing, must have come home with peculiar force to his hearers.

But while four of these were thus probably one and the same tree, the oak of Meonenim for the reasons stated above seems to have been a distinct one.

It is perhaps possible that Meonenim may have originally been Maonim, that is Maonites or Mehunim; a tribe or nation of non-Israelites elsewhere mentioned. If so it furnishes an interesting trace of the presence at some early period of that tribe in Central Palestine, of which others have been noticed in the case of the Ammonites, Avites, Zemarites, &c. [See vol. i. 188 *note* [a].] [G.]

MEONOTHAI (מְעוֹנֹתָי: Μαωνάθ: *Maonathi*). One of the sons of Othniel, the younger brother of Caleb (1 Chr. iv. 14). In the text as it now stands there is probably an omission, and the true reading of ver. 13 and 14 should be, as the Vulgate and the Complutensian edition of the LXX. give it, "and the sons of Othniel, Hathath, *and Meonothai*; and Meonothai begat Ophrah." It is not clear whether this last phrase implies that he founded the town of Ophrah or not: the usage of the word "father in the sense of "founder," is not uncommon.

MEPHA'ATH (מֵיפַעַת; in Chron. and Jerem. מֵיפָעַת; in the latter the *Cethîb*, or original text, has מופעת: Μαιφαάθ; Alex. [a] Μηφααθ: *Mephaath*, *Mephath*), a city of the Reubenites, one of the towns dependent on Heshbon (Josh. xiii. 18), lying in the district of the Mishor (comp. 17, and Jer. xlviii. 21, A. V. "plain"), which probably answers to the modern *Belka*. It was one of the cities allotted with their suburbs to the Merarite Levites (Josh. xxi. 37; 1 Chr. vi. 79; the former does not exist in the Rec. Hebr. Text). At the time of the conquest it was no doubt, like Heshbon, in the hands of the Amorites (Num. xxi. 26), but when Jeremiah delivered his denunciations it had been recovered by its original possessors, the Moabites (xlviii. 21).

Mephaath is named in the above passages with Dibon, Jahazah, Kirjathaim, and other towns, which have been identified with tolerable certainty on the north of the Arnon (*Wady Mojeb*); but no one appears yet to have discovered any name at all resembling it, and it must remain for the further investigation of those interesting and comparatively untrodden districts. In the time of Eusebius (*Onomast.* Μηφάθ) it was used as a military post for keeping in check the wandering tribes of the desert, which surrounded, as it still surrounds, the cultivated land of this district.

The extended, and possibly later, form of the name which occurs in Chronicles and Jeremiah, as if *Mei Phaath*, "waters of Phaath," may be, as in other cases, an attempt to fix an intelligible meaning on an archaic or foreign word. [G.]

MEPHIBO'SHETH (מְפִיבֹשֶׁת: Μεφιβοσθέ; Joseph. Μεμφίβοσθος: *Miphibosheth*), the name borne by two members of the family of Saul—his son and his grandson.

The name itself is perhaps worth a brief consideration. Bosheth appears to have been a favourite appellation in Saul's family, for it forms a part of the names of no fewer than three members of it—Ish-bosheth and the two Mephi-bosheths. But in the genealogies preserved in 1 Chronicles these names are given in the different forms of Esh-baal and Merib-baal. The variation is identical with that of Jerub-baal and Jerub-besheth, and is in accordance with passages in Jeremiah (xi. 13) and Hosea (ix. 10), where Baal and Bosheth[b] appear to be convertible, or at least related, terms, the latter being used as a contemptuous or derisive synonym of the former. One inference from this would be that the persons in question were originally[c] named Baal; that this appears in the two fragments of the family records preserved in Chronicles; but that in Samuel the hateful heathen name has been uniformly erased, and the nickname Bosheth substituted for it. It is some support to this to find

[a] The name is given in the LXX. as follows:—Josh. xiii. 18, Μαφαάθ, Alex. Μηφααθ; xxi. 37, τὴν Μαφά, Alex. τ. Μαφαα; 1 Chr. vi. 79, τὴν Μαφαλά, Alex. τ. Φααθ; Jer. xlviii. (xxxi.) 21, Μωφάθ. Alex. Νωφαθ.

[b] Translated in A. V. "shame."

[c] Some of the ancient Greek versions of the Hexapla give the name in Samuel as Memphi-baal (see Bahr's *Hexapla*, pp. 594, 599, 614). Also Procopius Gazæus, *Scholia* on 2 Sam. xvi. No trace of this, however, appears in any MS. of the Hebrew text.

that Saul had an ancestor named BAAL, who appears in the lists of Chronicles only (1 Chr. viii. 30, ix. 36). But such a change in the record supposes an amount of editing and interpolation which would hardly have been accomplished without leaving more obvious traces, in reasons given for the change, &c. How different it is, for example, from the case of Jerub-besheth, where the alteration is mentioned and commented on. Still the facts are as above stated, whatever explanation may be given of them.

1. Saul's son by Rizpah the daughter of Aiah, his concubine (2 Sam. xxi. 8). He and his brother Armoni were among the seven victims who were surrendered by David to the Gibeonites, and by them crucified[d] in sacrifice to Jehovah, to avert a famine from which the country was suffering. The seven corpses, protected by the tender care of the mother of Mephibosheth from the attacks of bird and beast, were exposed on their crosses to the fierce sun[e] of at least five of the midsummer months, on the sacred eminence of Gibeah. At the end of that time the attention of David was called to the circumstance, and also possibly to the fact that the sacrifice had failed in its purpose. A different method was tried: the bones of Saul and Jonathan were disinterred from their resting-place at the foot of the great tree at Jabesh-Gilead, the blanched and withered remains of Mephibosheth, his brother, and his five relatives, were taken down from the crosses, and father, son, and grandsons found at last a resting-place together in the ancestral cave of Kish at Zelah. When this had been done, "God was entreated for the land," and the famine ceased. [RIZPAH.]

2. The son of Jonathan, grandson of Saul, and nephew of the preceding.

1. His life seems to have been, from beginning to end, one of trial and discomfort. The name of his mother is unknown. There is reason to think that she died shortly after his birth, and that he was an only child. At any rate we know for certain that when his father and grandfather were slain on Gilboa he was an infant of but five years old. He was then living under the charge of his nurse, probably at Gibeah, the regular residence of Saul. The tidings that the army was destroyed, the king and his sons slain, and that the Philistines, spreading from hill to hill of the country, were sweeping all before them, reached the royal household. The nurse fled, carrying the child on her [f] shoulder. But in her panic and hurry she stumbled, and Mephibosheth was precipitated to the ground with such force as to deprive him for life of the use of both [g] feet (2 Sam. iv. 4). These early misfortunes threw a shade over his whole life, and his personal deformity—as is often the case where it has been the result of accident—seems to have exercised a depressing and depreciatory influence on his character. He can never forget that he is a poor lame slave (2 Sam. xix. 26), and unable to walk; a dead dog (ix. 8); that all the house of his father were dead (xix. 28); that the king is an angel of God (ib. 27), and he his abject dependent (ix. 6, 8). He receives the slanders of Ziba and the harshness of David alike with a submissive equanimity which is quite touching, and which effectually wins our sympathy.

2. After the accident which thus embittered his whole existence, Mephibosheth was carried with the rest of his family beyond the Jordan to the mountains of Gilead, where he found a refuge in the house of Machir ben-Ammiel, a powerful Gadite or Manassite sheykh at Lo-debar, not far from Mahanaim, which during the reign of his uncle Ishbosheth was the head-quarters of his family. By Machir he was brought up (Jos. *Ant.* vii. 5, §5), there he married, and there he was living at a later period, when David, having completed the subjugation of the adversaries of Israel on every side, had leisure to turn his attention to claims of other and hardly less pressing descriptions. The solemn oath which he had sworn to the father of Mephibosheth at their critical interview by the stone Ezel, that he "would not cut off his kindness from the house of Jonathan for ever: no! not when Jehovah had cut off the enemies of David each one from the face of the earth" (1 Sam. xx. 15); and again, that "Jehovah should be between Jonathan's seed and his seed for ever" (ver. 42), was naturally the first thing that occurred to him, and he eagerly inquired who was left of the house of Saul, that he might show kindness to him for Jonathan's sake (2 Sam. ix. 1). So completely had the family of the late king vanished from the western side of Jordan, that the only person to be met with in any way related to them was one ZIBA, formerly a slave of the royal house, but now a freed man, with a family of fifteen sons, who by arts which, from the glimpse we subsequently have of his character, are not difficult to understand, must have acquired considerable substance, since he was possessed of an establishment of twenty slaves of his own. [ZIBA.] From this man David learnt of the existence of Mephibosheth. Royal messengers were sent to the house of Machir at Lo-debar in the mountains of Gilead, and by them the prince and his infant son MICHA were brought to Jerusalem. The interview with David was marked by extreme

[d] There is no doubt about this being the real meaning of the word יקע, translated here and in Num. xxv. 4 "hanged up." (See Michaelis' *Supplement*, No. 1046; also Gesenius, *Thes.* 620; and Fürst, *Handwb.* 539*b*.) Aquila has ἀνασχινιάσωμεν, understanding them to have been not crucified but impaled. The Vulgate reads *crucifixerunt* (ver. 9), and *qui affixi fuerant* (13). The Hebrew term יקע is entirely distinct from הלה, also rendered "to hang" in the A. V., which is its real signification. It is this latter word which is employed in the story of the five kings at Makkedah; in the account of the indignities practised on Saul's body, 2 Sam. xxi. 12, on Baanah and Rechab by David, 2 Sam. iv. 12; and elsewhere.

[e] This follows from the statement that they hung from barley harvest (April) till the commencement of the rains (October); but it is also worthy of notice that the LXX. have employed the word ἐξηλιάζειν, "to expose to the sun." It is also remarkable that on the only other occasion on which this Hebrew term is used—Num. xxv. 4—an express command was given that the victims should be crucified "in front of the sun."

[f] This is the statement of Josephus—ἀπὸ τῶν ὤμων (*Ant.* vii. 5, §5); but it is hardly necessary, for in the East children are always carried on the shoulder. See the woodcut in Lane's *Mod. Egyptians*, ch. i. p. 6.

[g] It is a remarkable thing, and very characteristic of the simplicity and unconsciousness of these ancient records, of which the late Professor Blunt has happily illustrated so many other instances, that this information concerning Mephibosheth's childhood, which contains the key to his whole history, is inserted, almost as if by accident, in the midst of the narrative of his uncle's death, with no apparent reason for the insertion, or connexion between the two, further than that of their being relatives and having somewhat similar names.

kindness on the part of the king, and on that of Mephibosheth by the fear and humility which has been pointed out as characteristic of him. He leaves the royal presence with all the property of his grandfather restored to him, and with the whole family and establishment of Ziba as his slaves, to cultivate the land and harvest the produce. He himself is to be a daily guest at David's table. From this time forward he resided at Jerusalem.

3. An interval of about seventeen years now passes, and the crisis of David's life arrives. Of Mephibosheth's behaviour on this occasion we possess two accounts—his own (2 Sam. xix. 24-30), and that of Ziba (xvi. 1-4). They are naturally at variance with each other. (1.) Ziba meets the king on his flight at the most opportune moment, just as David has undergone the most trying part of that trying day's journey, has taken the last look at the city so peculiarly his own, and completed the hot and toilsome ascent of the Mount of Olives. He is on foot, and is in want of relief and refreshment. The relief and refreshment are there. There stand a couple of strong he-asses ready saddled for the king or his household to make the descent upon; and there are bread, grapes, melons, and a skin of wine, and there—the donor of these welcome gifts—is Ziba, with respect in his look and sympathy on his tongue. Of course the whole, though offered as Ziba's, is the property of Mephibosheth: the asses are his, one of them his own [b] riding animal: the fruits are from his gardens and orchards. But why is not their owner here in person? Where is the "son of Saul"? He, says Ziba, is in Jerusalem, waiting to receive from the nation the throne of his grandfather, that throne from which he has been so long unjustly excluded. It must be confessed that the tale at first sight is a most plausible one, and that the answer of David is no more than was to be expected. So the base ingratitude of Mephibosheth is requited with the ruin he deserves, while the loyalty and thoughtful courtesy of Ziba are rewarded by the possessions of his master, thus once more reinstating him in the position from which he had been so rudely thrust on Mephibosheth's arrival in Judah. (2.) Mephibosheth's story—which, however, he had not the opportunity of telling until several days later, when he met David returning to his kingdom at the western bank of Jordan—was very different to Ziba's. He had been desirous to fly with his patron and benefactor, and had ordered Ziba to make ready his ass that he might join the cortége. But Ziba had deceived him, had left him, and not returned with the asses. In his helpless condition he had no alternative, when once the opportunity of accompanying David was lost, but to remain where he was. The swift pursuit which had been made after Ahimaaz and Jonathan (2 Sam. xvii.) had shown what risks even a strong and able man must run who would try to follow the king. But all that he could do under the circumstances he had done. He had gone into the deepest mourning possible [c] for his lost friend. From the very day that David left he had allowed his beard to grow ragged, his crippled feet were unwashed [b] and untended, his linen remained unchanged. That David did not disbelieve this story is shown by his revoking the judgment he had previously given. That he did not entirely reverse his decision, but allowed Ziba to retain possession of half the lands of Mephibosheth, is probably due partly to weariness at the whole transaction, but mainly to the conciliatory frame of mind in which he was at that moment. "Shall then any man be put to death this day?" is the key-note of the whole proceeding. Ziba probably *was* a rascal, who had done his best to injure an innocent and helpless man: but the king had passed his word that no one was to be made unhappy on this joyful day; and so Mephibosheth, who believed himself ruined, has half his property restored to him, while Ziba is better off than he was before the king's flight, and far better off than he deserved to be.

4. The writer is aware that this is not the view generally taken of Mephibosheth's conduct, and in particular the opposite side has been maintained with much cogency and ingenuity by the late Professor Blunt in his *Undesigned Coincidences* (part ii. §17). But when the circumstances on both sides are weighed, there seems to be no escape from the conclusion come to above. Mephibosheth could have had nothing to hope for from the revolution. It was not a mere anarchical scramble in which all had equal chances of coming to the top, but a civil war between two parties, led by two individuals, Absalom on one side, David on the other. From Absalom, who had made no vow to Jonathan, it is obvious that he had nothing to hope. Moreover, the struggle was entirely confined to the tribe of Judah, and, at the period with which alone we are concerned, to the chief city of Judah. What chance could a Benjamite have had there?—more especially one whose very claim was his descent from a man known only to the people of Judah as having for years hunted their darling David through the hills and woods of his native tribe: least of all when that Benjamite was a poor nervous timid cripple, as opposed to Absalom, the handsomest, readiest, and most popular man in the country. Again, Mephibosheth's story is throughout valid and consistent. Every tie, both of interest and of gratitude, combined to keep him faithful to David's cause. As not merely lame, but deprived of the use of both feet, he must have been entirely dependent on his ass and his servant: a position which Ziba showed that he completely appreciated by not only making off himself, but taking the asses and their equipments with him. Of the impossibility of flight, after the king and the troops had gone, we have already spoken. Lastly, we have, not his own statement, but that of the historian, to the fact that he commenced his mourning, not when his supposed designs on the throne proved futile, but on the very day of David's departure (xix. 24).

So much for Mephibosheth. Ziba, on the other hand, had everything to gain and nothing to lose by any turn affairs might take. As a Benjamite and an old adherent of Saul all his tendencies

[b] This word used both in xvi. 1, 2, and xix. 26, is חֲמוֹר, *i.e.* the strong he-ass, a farm animal, as opposed to the she-ass, more commonly used for riding. For the first see ISSACHAR, vol. i. p. 902 *a*; for the second, ELISHA, ibid. 537 *b*.

[c] The same mourning as David for his child (xii. 20).

[a] A singular Jewish tradition is preserved by Jerome in his *Quaest. Heb.* on this passage, to the effect that the correct reading of the Hebrew is not "undressed," but rather "ill-made"—*non illotis pedibus, sed pedibus infectis*—alluding to false wooden feet which he was accustomed to wear. The Hebrew word—the same to mar feet and beard, though rendered in A.V. "dressed" and "trimmed"—is עָשָׂה, answering to our word "do."

must have been hostile to David. It was David, moreover, who had thrust him down from his independent position, and brought himself and his fifteen sons back into the bondage from which they had before escaped, and from which they could now be delivered only by the fall of Mephibosheth. He had thus every reason to wish his master out of the way, and human nature must be different to what it is if we can believe that either his good offices to David or his accusation of Mephibosheth was the result of anything but calculation and interest.

With regard to the absence of the name of Mephibosheth from the dying words of David, which is the main occasion of Mr. Blunt's strictures, it is most natural—at any rate it is quite allowable—to suppose that, in the interval of eight years which elapsed between David's return to Jerusalem and his death, Mephibosheth's painful life had come to an end. We may without difficulty believe that he did not long survive the anxieties and annoyances which Ziba's treachery had brought upon him. [G.]

ME'RAB (מֵרַב: **Μερόβ**,[a] Alex. also **Μερωβ**; Joseph. **Μερόβη**: *Merob*), the eldest daughter, possibly the eldest child, of king Saul (1 Sam. xiv. 49). She first appears after the victory over Goliath and the Philistines, when David had become an inmate in Saul's house (1 Sam. xviii. 2), and immediately after the commencement of his friendship with Jonathan. In accordance with the promise which he made before the engagement with Goliath (xvii. 25), Saul betrothed Merab to David (xviii. 17), but it is evidently implied that one object of thus rewarding his valour was to incite him to further feats, which might at last lead to his death by the Philistines. David's hesitation looks as if he did not much value the honour—at any rate before the marriage Merab's younger sister Michal had displayed her attachment for David, and Merab was then married to Adriel the Meholathite, who seems to have been one of the wealthy sheikhs of the eastern part of Palestine, with whom the house of Saul always maintained an alliance. To Adriel she bore five sons, who formed five of the seven members of the house of Saul who were given up to the Gibeonites by David, and by them crucified to Jehovah on the sacred hill of Gibeah (2 Sam. xxi. 8). [RIZPAH.]

The Authorized Version of this last passage is an accommodation. The Hebrew text has "the five sons of Michal, daughter of Saul, which she bare to Adriel," and this is followed in the LXX. and Vulgate. The Targum explains the discrepancy thus:—"The five sons of Merab (which Michal, Saul's daughter, brought up) which she bare," &c. The Peshito substitutes Merab (in the present state of the text "Nadab") for Michal. J. H. Michaelis, in his Hebrew Bible (2 Sam. xxi. 10), suggests that there were two daughters of Saul named Michal, as there were two Elishamas and two Eliphalets among David's sons. Probably the most feasible solution of the difficulty is that "Michal" is the mistake of a transcriber for "Merab." But if so it is manifest from the agreement of the versions and of Josephus (*Ant.* vii. 4, §30) with the present text, that the error is one of very ancient date.

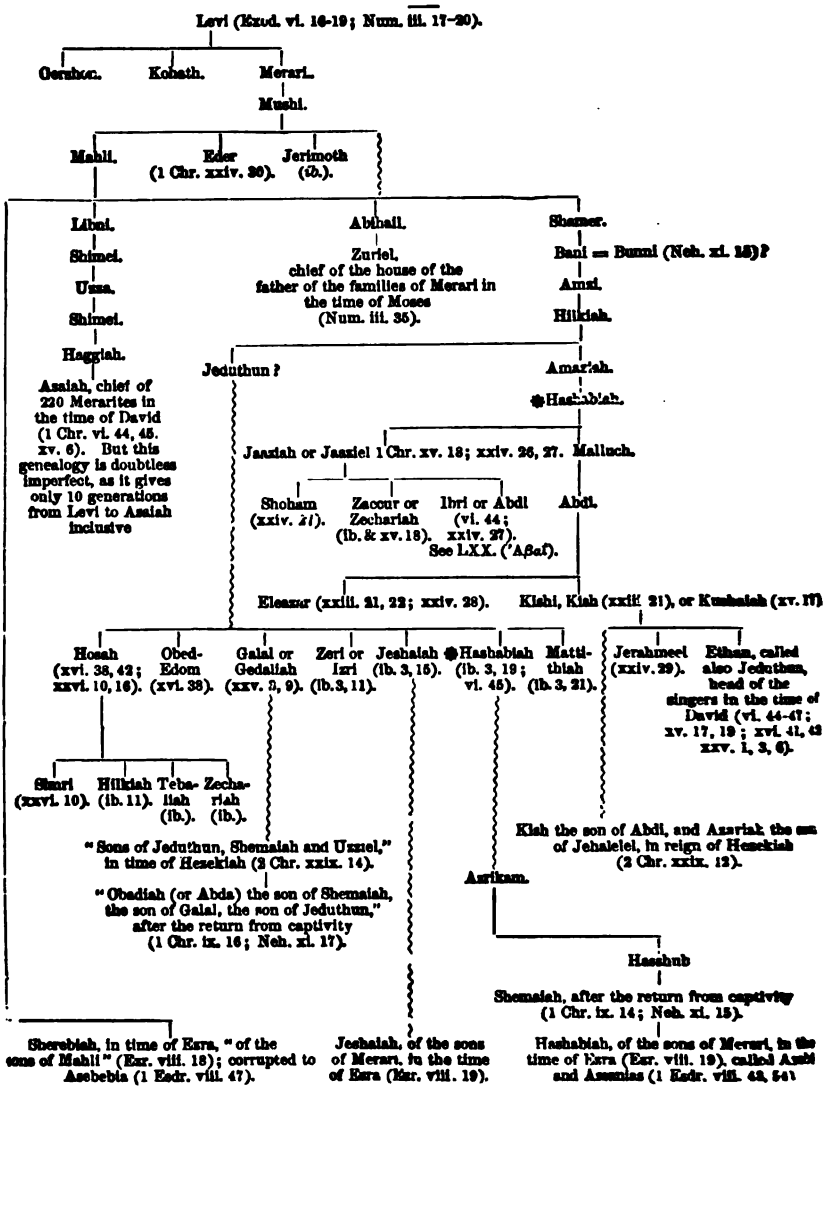
Is it not possible that there is a connexion between Merab's name and that of her nephew MERIB-BAAL or Mephibosheth as he is ordinarily called? [G.]

MERAI'AH (מְרָיָה: **Ἀμαρία**; F. A. **Μαραια** *Maraia*). A priest in the days of Joiakim, the son of Jeshua. He was one of the "heads of the fathers," and representative of the priestly family of Seraiah, to which Ezra belonged (Neh. xii. 12). The reading of the LXX.—**Ἀμαρία**, is supported by the Peshito-Syriac.

MERAI'OTH (מְרָיוֹת: **Μαριήλ**, in 1 Chr. vi 6, 7, 52; **Μαραϊώθ**, 1 Chr. ix. 11; **Μαρεώθ**, Ezr vii. 3; **Μαριώθ**, Neh. xi. 11; Alex. **Μαραιώθ**, 1 Chr. vi. 6, 7, Ezr. vii. 3; **Μεραώθ**, 1 Chr. vi. 52; **Μαριώθ**, 1 Chr. ix. 11, Neh. xi. 11: *Meraioth*, except 1 Chr. ix. 11, Ezr. vii. 3, *Maraioth*). 1. A descendant of Eleazar the son of Aaron, and head of a priestly house. It was thought by Lightfoot that he was the immediate predecessor of Eli in the office of high-priest, and that at his death the high-priesthood changed from the line of Eleazar to the line of Ithamar (*Temple Service*, iv. §1). Among his illustrious descendants were Zadok and Ezra. He is called elsewhere MEREMOTH (1 Esdr. vii.; 2), and MARIMOTH (2 Esdr. i. 2). It is apparently another Meraioth who comes in between Zadok and Ahitub in the genealogy of Azariah (1 Chr. ix. 11, Neh. xi. 11), unless the names Ahitub and Meraioth are transposed, which is not improbable.

2. (**Μαριώθ**: *Maraioth*). The head of one of the houses of priests, which in the time of Joiakim the son of Jeshua was represented by Helkai (Neh. xii. 15). He is elsewhere called MEREMOTH (Neh. xii. 3), a confusion being made between the letters ר and ם. The Peshito-Syriac has *Marmuth* in both passages. [W. A. W.]

MER'AN (**Μερράν**: *Merrha*). The merchants of Meran and Theman are mentioned with the Hagarenes (Bar. iii. 23) as "searchers out of understanding." The name does not occur elsewhere, and is probably a corruption of "Medan" or "Midian." Junius and Tremellius give *Medanaei*, and their conjecture is supported by the appearance of the Midianites as nomade merchants in Gen. xxxvii. Both Medan and Midian are enumerated among the sons of Keturah in Gen. xxv. 2, and are closely connected with the Dedanim, whose "travelling companies," or caravans, are frequently alluded to (Is. xxi. 13; Ez. xxvii. 15). Fritzsche suggests that it is the *Marane* of Pliny (vi. 28, 32). [W. A. W.]



MER'ARI (מְרָרִי: **Μεραρί**: unhappy, sorrowful, or, my sorrow, *i. e.* his mother's), third son of Levi, and head of the third great division (מִשְׁפַּחַת הַמְּרָרִי) of the Levites, THE MERARITES, whose designation in Hebrew is the same as that of their progenitor, only with the article prefixed, viz., הַמְּרָרִי. Of Merari's personal history, beyond the fact of his birth before the descent of Jacob into Egypt, and of his being one of the seventy who accompanied Jacob thither, we know nothing whatever (Gen. xlvi. 8, 11). At the time of the Exodus, and the numbering in the wilderness, the Merarites consisted of two families, the Mahlites and the Mushites, Mahli and Mushi being either the two sons, or the son and grandson, of Merari (1 Chr.

[a] The omission of the name in the LXX. is remarkable. In the Vatican Codex it occurs in 1 Sam. xiv. 49 only. The Alexandrine MS. omits it there, and inserts it in xviii. 17 and 19.

vi. 19, 47). Their chief at that time was Zuriel, and the whole number of the family, from a month old and upwards, was 6200; those from 30 years old to 50 were 3200. Their charge was the boards, bars, pillars, sockets, pins, and cords of the tabernacle and the court, and all the tools connected with setting them up. In the encampment their place was to the north of the tabernacle; and both they and the Gershonites were "under the hand" of Ithamar the son of Aaron. Owing to the heavy nature of the materials which they had to carry, four waggons and eight oxen were assigned to them; and in the march both they and the Gershonites followed immediately after the standard of Judah, and before that of Reuben, that they might set up the tabernacle against the arrival of the Kohathites (Num. iii. 20, 33-37, iv. 29-33, 42-45, vii. 8, x. 17, 21). In the division of the land by Joshua, the Merarites had twelve cities assigned to them out of Reuben, Gad, and Zebulun, of which one was Ramoth-Gilead, a city of refuge, and in later times a frequent subject of war between Israel and Syria (Josh. xxi. 7, 34-40; [a] 1 Chr. vi. 63, 77-81). In the time of David Asaiah was their chief, and assisted with 220 of his family in bringing up the ark (1 Chr. xv. 6). Afterwards we find

[a] Their cities were Jokneam, Kartah, Dimnah, Nahalal, in Zebulun; Beser, Jahasah, Kedemoth, Mephaath, in Reuben; Ramoth, Mahanaim, Heshbon, and Jazer, in Gad. But in 1 Chr. vi., instead of the four in Zebulun, only Rimmon and Tabor are named, though the total is given as twelve in ver. 63.

TABLE OF THE MERARITES.

the Merarites still sharing with the two other Levitical families the various functions of their state (1 Chr. xxiii. 6, 21-23). Thus a third part of the singers and musicians were Merarites, and Ethan or Jeduthun was their chief in the time of David. [JEDUTHUN.] A third part of the door-keepers were Merarites (1 Chr. xxiii. 5, 6, xxvi. 10, 19), unless indeed we are to understand from ver. 19 that the doorkeepers were all either Kohathites or Korhites, to the exclusion of the Gershonites, which does not seem probable. In the days of Hezekiah the Merarites were still flourishing, and Kish the son of Abdi, and Azariah the son of Jehalelel, took their part with their brethren of the two other Levitical families in promoting the reformation, and purifying the house of the Lord (2 Chr. xxix. 12, 15). After the return from captivity Shemaiah represents the sons of Merari, in 1 Chr. ix. 14, Neh. xi. 15, and is said, with other chiefs of the Levites, to have "had the oversight of the outward business of the house of God." There were also at that time sons of Jeduthun under Obadiah or Abda, the son of Shemaiah (1 Chr. ix. 16; Neh. xi. 17). A little later again, in the time of Ezra, when he was in great want of Levites to accompany him on his journey from Babylon to Jerusalem, "a man of good understanding of the sons of Mahli" was found, whose name, if the text here and at ver. 24 is correct, is not given. "Jeshaiah also of the sons of Merari," with twenty of his sons and brethren, came with him at the same time (Ezr. viii. 18, 19). But it seems pretty certain that Sherebiah, in ver. 18, is the name of the Mahlite, and that both he and Hashabiah, as well as Jeshaiah, in ver. 19, were Levites of the family of Merari, and not, as the actual text of ver. 24 indicates, priests. The copulative ו has fallen out before their names in ver. 24, as appears from ver. 30 (see also 1 Chr. ix. 14; Neh. xii. 24).

The subjoined table gives the principal descents, as far as it is possible to ascertain them. But the true position of Jaaziah, Mahli, and Jeduthun is doubtful. Here too, as elsewhere, it is difficult to decide when a given name indicates an individual, and when the family called after him, or the head of that family. It is sometimes no less difficult to decide whether any name which occurs repeatedly designates the same person, or others of the family who bore the same name, as *e. g.* in the case of Mahli, Hilkiah, Shimri, Kishi or Kish, and others. As regards the confusion between Ethan and Jeduthun, it may perhaps be that Jeduthun was the patronymic title of the house of which Ethan was the head in the time of David. Jeduthun might have been the brother of one of Ethan's first ancestors before Hashabiah, in which case Hashabiah in 1 Chr. xxv. 3, 19, might be the same as Hashabiah in vi. 45. Hosah and Obed-edom seem to have been other descendants or clansmen of Jeduthun, who lived in the time of David; and, if we may argue from the names of Hosah's sons, Shimri and Hilkiah, that they were descendants of Shimri and Hilkiah, in the line of Ethan, the inference would be that Jeduthun was a son either of Hezekiah or Amaziah, since he lived after Hilkiah, but before Hashabiah. The great advantage of this supposition is, that while it leaves to Ethan the patronymic designation Jeduthun, it draws a wide distinction between the term "sons of Jeduthun" and "sons of Ethan," and explains how in David's time there could be sons of those who are called sons of Jeduthun above thirty years of age (since they filled offices, 1 Chr. xxvi. 10), at the same time that Jeduthun was said to be the chief of the singers. In like manner it is possible that Jaaziah may have been a brother of Malluch or of Abdi, and that if Abdi or Ibri had other descendants besides the sons of Kish and Eleazar, they may have been reckoned under the headship of Jaaziah. The families of Merari which were so reckoned were, according to 1 Chr. xxiv. 27, Shoham, Zaccur (apparently the same as Zechariah in 1 Chr. xv. 18, where we probably ought to read "Z. son of Jaaziah," and xxvi. 11), and Ibri, where the LXX. have Ὀβδί, Ἀβαί, and Ἀββί. [A. C. H.]

2. (Μεραρί; Alex. in Jud. viii. 1 Μεραρεί: *Merari*). The father of Judith (Jud. viii. 1, xvi. 7).

MERATHA'IM, THE LAND OF (הָאָרֶץ מְרָתָיִם: *terra dominantium*), that is "of double rebellion" (a dual form from the root מָרָה; Gesenius, *Thes.* 819*a*; Fürst, *Hdwb.* 791*b*), alluding to the country of the Chaldeans, and to the double captivity which it had inflicted on the nation of Israel (Jer. l. 21). This is the opinion of Gesenius, Fürst, Michaelis (*Bibel für Ungelehrten*), &c., and in this sense the word is taken by all the versions which the writer has consulted, excepting that of Junius and Tremellius, which the A. V.—as in other instances—has followed here. The LXX. ἐπὶ τῆς γῆς, λέγει κύριος. πικρῶς ἐπιβηθι, &c., take the root in its second sense of "bitter." [G.]

MEROU'RIUS (Ἑρμῆς: *Mercurius*), properly Hermes, the Greek deity, whom the Romans identified with their Mercury the god of commerce and bargains. In the Greek mythology Hermes was the son of Zeus and Maia the daughter of Atlas, and is constantly represented as the companion of his father in his wanderings upon earth. On one of these occasions they were travelling in Phrygia, and were refused hospitality by all save Baucis and Philemon, the two aged peasants of whom Ovid tells the charming episode in his *Metam.* viii. 620–724, which appears to have formed part of the folk-lore of Asia Minor, and strikingly illustrates the readiness with which the simple people of Lystra recognized in Barnabas and Paul the gods who, according to their wont, had come down in the likeness of men (Acts xiv. 11). They called Paul "Hermes, because he was the chief speaker," identifying in him as they supposed by this characteristic, the herald of the gods (Hom. *Od.* v. 28; *Hym. in Herm.* 3), and of Zeus (*Od.* i. 38, 84; *Il.* xxiv. 333, 461), the eloquent orator (*Od.* i. 86; Hor. *Od.* i. 10, 1), inventor of letters, music, and the arts. He was usually represented as a slender beardless youth, but in an older Pelasgic figure he was bearded. Whether St. Paul wore a beard or not is not to be inferred from this for the men of Lystra identified him with their god Hermes, not from any accidental resemblance in figure or appearance to the statues of that deity, but because of the act of healing which had been done upon the man who was lame from his birth. [W. A. W.]

MERCY-SEAT (כַּפֹּרֶת: ἱλαστήριον: *propitiatorium*). This appears to have been merely the lid of the Ark of the Covenant, not another surface affixed thereto. It was that whereon the blood of the yearly atonement was sprinkled by the high-priest; and in this relation it is doubtful whether the sense of the word in the Heb. is based on the material

fact of its "covering" the Ark, or from this notion of its reference to the "covering," (*i. e.* atonement) of sin. But in any case the notion of a "seat," as conveyed by the name in English, seems superfluous and likely to mislead. Jehovah is indeed spoken of as "dwelling" and even as "sitting" (Ps. lxxx. 1, xcix. 1) between the cherubim, but undoubtedly his seat in this conception would not be on the same level as that on which they stood (Ex. xxv. 18), and an enthronement in the glory above it must be supposed. The idea with which it is connected is not merely that of "mercy," but of formal atonement made for the breach of the covenant (Lev. xvi. 14), which the Ark contained in its material vehicle—the two tables of stone. The communications made to Moses are represented as made "from off the Mercy-Seat that was upon the Ark of the Testimony" (Num. vii. 89; comp. Ex. xxv. 22, xxx. 6); a sublime illustration of the moral relation and responsibility into which the people were by covenant regarded as brought before God. [H. H.]

MER'ED (מֶרֶד: **Μαράδ**, 1 Chr. iv. 17; **Μαρδά**, 1 Chr. iv. 18: *Mered*). This name occurs in a fragmentary genealogy in 1 Chr. iv. 17, 18, as that of one of the sons of Ezra. He is there said to have taken to wife BITHIAH the daughter of Pharaoh, who is enumerated by the Rabbins among the nine who entered Paradise (Hottinger, *Smegma Orientale*, p. 315), and in the Targum of R. Joseph on Chronicles is said to have been a proselyte. In the same Targum we find it stated that Caleb the son of Jephunneh, was called Mered because he withstood or rebelled against (מָרַד), the counsel of the spies, a tradition also recorded by Jarchi. But another and very curious tradition is preserved in the *Quaestiones in libr. Paral.*, attributed to Jerome. According to this, Ezra was Amram; his sons Jether and Mered were Aaron and Moses; Epher was Eldad, and Jalon Medad. The tradition goes on to say that Moses, after receiving the law in the desert, enjoined his father to put away his mother because she was his aunt, being the daughter of Levi: that Amram did so, married again, and begat Eldad and Medad. Bithiah, the daughter of Pharaoh, is said, on the same authority, to have been "taken" by Moses, because she forsook idols, and was converted to the worship of the true God. The origin of all this seems to have been the occurrence of the name "Miriam" in 1 Chr. iv. 17, which was referred to Miriam the sister of Moses. Rabbi D. Kimchi would put the first clause of ver. 18 in a parenthesis. He makes Bithiah the daughter of Pharaoh the first wife of Mered, and mother of Miriam, Shammai, and Ishbah; Jehudijah, or "the Jewess," being his second wife. But the whole genealogy is so intricate that it is scarcely possible to unravel it. [W. A. W.]

MER'EMOTH (מְרֵמוֹת: **Μεριμώθ**; Alex. **Μαριμώθ**, Ezr. viii. 33; **Ραμώθ**, Neh. iii. 4; **Μεσαμώθ**, Neh. iii. 21: *Meremoth*). 1. Son of Uriah, or Urijah, the priest, of the family of Koz or Hakkoz, the head of the seventh course of priests as established by David. On the return from Babylon the children of Koz were among those priests who were unable to establish their pedigree, and in consequence were put from the priesthood as polluted (Ezr. ii. 61, 62). This probably applied to only one family of the descendants of Koz, for in viii. 33, Meremoth is clearly recognised as a priest and is appointed to weigh and register the gold and silver vessels belonging to the Temple, which Ezra had brought from Babylon, a function which priests and Levites alone were selected to discharge (Ezr viii. 24–30). In the rebuilding of the wall of Jerusalem under Nehemiah we find Meremoth taking an active part, working between Meshullam and the sons of Hassenaah who restored the fish-gate (Neh. iii. 4), and himself restoring the portion of the Temple wall on which abutted the house of the high-priest Eliashib (Neh. iii. 21). Burrington (*Genealogies*, ii. 154) is inclined to consider the two mentioned in Neh. iii. by the same name as distinct persons, but his reasons do not appear sufficient.

In 1 Esdr. viii. 62, he is called "MAEMOTH the son of Iri."

2. (**Μαριμώθ**: *Marimuth*). A layman of the sons of Bani, who had married a foreign wife after the return from Babylon and put her away at Ezra's bidding (Ezr. x. 36).

3. (**Μεραμώθ**: *Merimuth*). A priest, or more probably a family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). The latter supposition is more probable, because in Neh. xii. 3 the name occurs, with many others of the same list, among those who went up with Zerubbabel a century before. In the next generation, that is in the days of Joiakim the son of Jeshua, the representative of the family of Meremoth was Helkai (Neh. xii. 15); the reading Meraioth in that passage being an error. [MERAIOTH 2.] The A. V. of 1611 has "Merimoth" in Neh. xii. 3. like the Geneva version. [W. A. W.]

MER'ES (מֶרֶס: *Mares*). One of the seven counsellors of Ahasuerus king of Persia, "wise men which knew the times" (Esth. i. 14). His name is not traceable in the LXX., which in this passage is corrupt. Benfey (quoted by Gesenius, *Thes.* s. v.) suggests that it is derived from the Sanscrit *mahrsha* "worthy," which is the same as the Zend *marsha* and is probably also the origin of *Marsena*, the name of another Persian counsellor. [W. A. W.]

MER'IBAH (מְרִיבָה: **Λοιδόρησις** Ex. xvii. 7, **ἀντιλογία** Num. xx 13, xxvii. 14; Deut. xxxii. 51; **λοιδορία** Num. xx. 24: *contradictio*). In Ex. xvii. 7 we read, "he called the name of the place Massah and Meribah," [a] where the people murmured, and the rock was smitten. [For the situation see REPHIDIM.] The name is also given to Kadesh (Num. xx. 13, 24, xxvii. 14; Deut. xxii. 51 "Meribah-kadesh"), because there also the people, when in want of water, strove with God. There, however, Moses and Aaron incurred the Divine displeasure because they "believed not," because they "rebelled," and "sanctified not God in the midst" of the people. Impatience and self-willed assumption of plenary power are the prominent features of their behaviour in Num. xx. 10; the "speaking to the rock" (which perhaps was to have been in Jehovah's name) was neglected, and another symbol, suggestive rather of themselves as the source of power, was substituted. In spite of these plain and distinctive features of difference between the event at Kadesh and that at Rephidim some commentators have regarded the one as a mere duplicate of the other, owing to a mixture of earlier and later legend. [H. H.]

[a] Chiding, or strife. מַסָּה וּמְרִיבָה; **πειρασμὸς καὶ λοιδόρησις**, also **ἀντιλογία**; marg. "temptation," Deut. xxxiii. 8.

MERIB-BA'AL (מְרִיב בַּעַל, except on its 4th occurrence, and there less accurately מְרִי־בַעַל, i. e. Meri-baal, though in many MSS. the fuller form is preserved · Μεριβδαλ, Μαριβδαλ; Alex. Μεφριβαλ, Μεχριβαλ: *Meri-baal*), son of Jonathan the son of Saul (1 Chr. viii. 34, ix. 40), doubtless the same person who in the narrative of 2 Samuel is called MEPHI-BOSHETH. The reasons for the identification are, that in the history no other son but Meph'bosheth is ascribed to Jonathan; that Mephibosheth, like Merib-baal, had a son named Micah; and that the terms "bosheth" and "baal" appear from other examples (*e. g.* Esh-Baal = Ish-bosheth) to be convertible. What is the significance of the change in the former part of the name, and whether it is more than a clerical error between the two Hebrew letters ב and ר, does not appear to have been ascertained. It is perhaps in favour of the latter explanation that in some of the Greek versions of 1 Chr. viii. and ix. the name is given as Memphi-baal. A trace of the same thing is visible in the reading of the Alex. LXX. given above. If it is not a mere error, then there is perhaps some connexion between the name of Merib-baal and that of his aunt Merab.

Neither is it clear why this name and that of Ishbosheth should be given in a different form in these genealogies to what they are in the historical narrative. But for this see ISH-BOSHETH and MEPHI-BOSHETH. [G.]

MER'ODACH (מְרֹדָךְ: Μαρωδαχ: *Merodach*) is mentioned once only in Scripture, namely in Jer. l. 2, where Bel and Merodach are coupled together, and threatened with destruction in the fall of Babylon. It has been commonly concluded from this passage that Bel and Merodach were separate gods; but from the Assyrian and Babylonian inscriptions it appears that this was not exactly the case. Merodach was really identical with the famous Babylonian Bel or Belus, the word being probably at first a mere epithet of the god, which by degrees superseded his proper appellation. Still a certain distinction appears to have been maintained between the names. The golden image in the great temple at Babylon seems to have been worshipped distinctly as Bel rather than Merodach, while other idols of the god may have represented him as Merodach rather than Bel. It is not known what the word Merodach means, or what the special aspect of the god was, when worshipped under that title. In a general way Bel-Merodach may be said to correspond to the Greek Jupiter. He is "the old man of the gods," "the judge," and has the gates of heaven under his especial charge. Nebuchadnezzar calls him "the great lord, the senior of the gods, the most ancient," and Neriglissar "the first-born, of the gods, the layer-up of treasures." In the earlier period of Babylonian history he seems to share with several other deities (as Nebo, Nergal, Bel-Nimrod, Anu, &c.) the worship of the people, but in the later times he is regarded as the source of all power and blessings, and thus concentrates in his own person the greater part of that homage and respect which had previously been divided among the various gods of the Pantheon. Astronomically he is identified with the planet Jupiter. His name forms a frequent element in the appellations of Babylonian kings, *e. g.* Merodach-Baladan, Evil-Merodach, Merodach-adin-akhi, &c.; and is found in this position as early as B.C. 1650. (See the *Essay* by Sir H. Rawlinson "*On the Religion of the Babylonians and Assyrians*," in Rawlinson's *Herodotus*, i. 627-631.) [G. R.]

MER'ODACH-BAL'ADAN (מְרֹאדָךְ בִּלְאֲדָן: Μαρωδαχ-Βαλαδαν: *Merodach-Baladan*) is mentioned as king of Babylon in the days of Hezekiah, both in the second book of Kings (xx. 12) and in Isaiah (xxxix. 1). In the former place he is called Berodach-Baladan, by the ready interchange of the letters ב and מ, which was familiar to the Jews, as it has been to many other nations. The orthography "Merodach" is, however, to be preferred; since this element in the king's name is undoubtedly identical with the appellation of the famous Babylonian deity, who is always called "Merodach," both by the Hebrews and by the native writers. The name of Merodach-Baladan has been clearly recognised in the Assyrian inscriptions. It appears under the form of Marudachus-Baldanes, or Marudach-Baldan, in a fragment of Polyhistor, preserved by Eusebius (*Chron. Can.* pars i. v. 1); and under that of Mardoo-empad (or rather Mardoo-empal*) in the famous "Canon of Ptolemy." Josephus abbreviates it still more, and calls the monarch simply "Baladas" (*Ant. Jud.* x. 2, §2).

The Canon gives Merodach-Baladan (*Mardoc-empal*) a reign of 12 years—from B.C. 721 to B.C. 709—and makes him then succeeded by a certain Arceanus. Polyhistor assigns him a six months' reign, immediately before Elibus, or Belibus, who (according to the Canon) ascended the throne B.C. 702. It has commonly been seen that these must be two different reigns, and that Merodach-Baladan must therefore have been deposed in B.C. 709, and have recovered his throne in B.C. 702, when he had a second period of dominion lasting half a year. The inscriptions contain express mention of both reigns. Sargon states that in the twelfth year of his own reign he drove Merodach-Baladan out of Babylon, after he had ruled over it for twelve years; and Sennacherib tells us that in his first year he defeated and expelled the same monarch, setting up in his place "a man named Belib." Putting all our notices together, it becomes apparent that Merodach-Baladan was the head of the popular party, which resisted the Assyrian monarchs, and strove to maintain the independence of the country. It is uncertain whether he was self-raised or was the son of a former king. In the second Book of Kings he is styled "the son of Baladan;" but the inscriptions call him "the son of *Yagin*;" whence it is to be presumed that Baladan was a more remote ancestor. *Yagin*, the real father of Merodach-Baladan, is possibly represented in Ptolemy's Canon by the name Jugaeus—which in some copies replaces the name Elulaeus, as the appellation of the immediate predecessor of Merodach-Baladan. At any rate, from the time of Sargon, Merodach-Baladan and his family were the champions of Babylonian independence and fought with spirit the losing battle of their country. The king of whom we are here treating sustained two contests with the power of Assyria, was twice defeated, and twice compelled to fly his

* In the uncial writing Δ is very liable to be mistaken for Λ, and in the ordinary manuscript character Λ is not unlike δ. M. Bunsen was (we believe) the first to suggest that there had been a substitution of the δ for the Λ in this instance. See his work, *Egypt's Place in Universal History*, vol. i. p. 726, E. T. The abbreviation of the name has many parallels. (See Rawlinson's *Herodotus*, vol. i p. 436, note 1).

country. His sons, supported by the king of Elam, or Susiana, continued the struggle, and are found among the adversaries of Esar-Haddon, Sennacherib's son and successor. His grandsons contend against *Asshur-bani-pal*, the son of Esar-Haddon. It is not till the fourth generation that the family seems to become extinct, and the Babylonians, having no champion to maintain their cause, contentedly acquiesce in the yoke of the stranger.

There is some doubt as to the time at which Merodach-Baladan sent his ambassadors to Hezekiah, for the purpose of enquiring as to the astronomical marvel of which Judaea had been the scene (2 Chr. xxxii. 31). According to those commentators who connect the illness of Hezekiah with one or other of Sennacherib's expeditions against him, the embassy has to be ascribed to Merodach-Baladan's second or shorter reign, when alone he was contemporary with Sennacherib. If however we may be allowed to adopt the view that Hezekiah's illness preceded the first invasion of Sennacherib by several years (see above, *ad voc.* HEZEKIAH, and compare Rawlinson's *Herodotus*, i. 479, note [2]), synchronising really with an attack of Sargon, we must assign the embassy to Merodach-Baladan's earlier reign, and bring it within the period, B.C. 721-709, which the Canon assigns to him. Now the 14th year of Hezekiah, in which the embassy should fall (2 K. xx. 6; Is. xxxviii. 5), appears to have been B.C. 713. This was the year of Merodach-Baladan's first reign.

The increasing power of Assyria was at this period causing alarm to her neighbours, and the circumstances of the time were such as would tend to draw Judaea and Babylonia together, and to give rise to negotiations between them. The astronomical marvel, whatever it was, which accompanied the recovery of Hezekiah, would doubtless have attracted the attention of the Babylonians; but it was probably rather the pretext than the motive for the formal embassy which the Chaldaean king despatched to Jerusalem on the occasion. The real object of the mission was most likely to effect a league between Babylon, Judaea, *and Egypt* (Is. xx. 5, 6), in order to check the growing power of the Assyrians.[b] Hezekiah's exhibition of "all his precious things" (2 K. xx. 13) would thus have been, not a mere display, but a mode of satisfying the Babylonian ambassadors of his ability to support the expenses of a war. The league, however, though designed, does not seem to have taken effect. Sargon, acquainted probably with the intentions of his adversaries, anticipated them. He sent expeditions both into Syria and Babylonia—seized the stronghold of Ashdod in the one, and completely defeated Merodach-Baladan in the other. That monarch sought safety in flight, and lived for eight years in exile. At last he found an opportunity to return. In B.C. 703 or 702, Babylonia was plunged in anarchy—the Assyrian yoke was thrown off, and various native leaders struggled for the mastery. Under these circumstances the exiled monarch seems to have returned, and recovered his throne. His adversary, Sargon, was dead or dying, and a new and untried prince was about to rule over the Assyrians. He might hope that the reins of government would be held by a weaker hand, and that he might stand his ground against the son, though he had been forced to yield to the father. In this hope however, he was disappointed. Sennacherib had scarcely established himself on the throne, when he proceeded to engage his people in wars; and it seems that his very first step was to invade the kingdom of Babylon. Merodach-Baladan had obtained a body of troops from his ally, the king of Susiana; but Sennacherib defeated the combined army in a pitched battle; after which he ravaged the entire country, destroying 79 walled cities and 820 towns and villages, and carrying vast numbers of the people into captivity. Merodach-Baladan fled to "the islands at the mouth of the Euphrates" (Fox Talbot's *Assyrian Texts*, p. 1)—tracts probably now joined to the continent—and succeeded in eluding the search which the Assyrians made for him. If we may believe Polyhistor however, this escape availed him little. That writer relates (*ap.* Euseb. *Chron. Can.* i. 5), that he was soon after put to death by Elibus, or Belibus, the viceroy whom Sennacherib appointed to represent him at Babylon. At any rate he lost his recovered crown after wearing it for about six months, and spent the remainder of his days in exile and obscurity. [G. E.]

MEROM, THE WATERS OF (מֵי מֵרוֹם: τὸ ὕδωρ Μαρρών; Alex. in ver. 5, Μερρων: *aqua. Merom*), a place memorable in the history of the conquest of Palestine. Here, after Joshua had gained possession of the southern portions of the country, a confederacy of the northern chiefs assembled under the leadership of Jabin, king of Hazor (Josh. xi. 5), and here they were encountered by Joshua, and completely routed (ver. 7). The battle of Merom was to the north of Palestine what that of Beth-horon had been to the south,—indeed more, for there do not appear to have been the same number of important towns to be taken in detail after this victory that there had been in the former case.

The name of Merom occurs nowhere in the Bible but in the passage above[a] mentioned; nor is it found in Josephus. In his account of the battle (*Ant.* v. 1, §18), the confederate kings encamp "near Beroth, a city of upper Galilee, not far from Kedes;" nor is there any mention of water. In the *Onomasticon* of Eusebius the name is given as "Merrus," and it is stated to be "a village twelve miles distant from Sebaste (Samaria), and near Dothaim." It is a remarkable fact that though by common consent the "waters of Merom" are identified with the lake through which the Jordan runs between Banias and the Sea of Galilee—the Semechonitis[b] of Josephus, and *Bahr el Huleh* of the modern Arabs—yet that identity cannot be proved by any ancient record. The nearest approach to proof is an inference from the statement of Josephus (*Ant.* v. 5, §1), that the second Jabin (Judg. iv. v.) "belonged to the city

[b] Josephus expressly states that Merodach-Baladan sent the ambassadors in order to form an *alliance* with Hezekiah (*Ant. Jud.* x. 2, §2).

[a] The mention of the name in the Vulgate of Judg. v. 18—*in regione Meroms*—is only apparent. It is a literal transference of the words עַל מְרוֹמֵי שָׂדֶה rightly rendered in the A. V "in the high places of the field," and has no connexion with Merom.

[b] ἡ Σεμεχωνίτις, or Σεμεχωνιτῖνι, λίμνη (*Ant.* v. 5 §1; *B. J.* iii. 10, §7, iv. 1, §1). This name does not occur in any part of the Bible; nor has it been discovered in any author except Josephus. For the possible derivations of it, see Reland (*Pal.* 262-4), and the summary of Stanley (*S. & P.* 391 *note*). To these it should be added that the name *Semakh* is not confined to this lake. A wady of that name is the principal torrent on the east of the Sea of Tiberias.

Asor (Hazor), which lay above the lake of Semechonitis." There is no reason to doubt that the Hazor of the first and the Hazor of the second Jabin were one and the same place; and as the waters of Merom are named in connexion with the former, it is allowable to infer that they are identical with the lake of Semechonitis. But it should be remembered that this inference is really all the proof we have, while against it we have to set the positive statements of Josephus and Eusebius just quoted; and also the fact that the Hebrew word *Mê* is not that commonly used for a large piece of standing water, but rather *Yam*, "a sea," which was even employed for so small a body of water as the artificial pond or tank in Solomon's Temple. This remark would have still more force if, as was most probably the case, the lake was larger in the time of Joshua than it is at present. Another and greater objection, which should not be overlooked, is the difficulty attendant on a flight and pursuit across a country so mountainous and impassable to any large numbers, as the district which intervenes between the *Huleh* and Safed. The tremendous ravine of the *Litâny* and the height of *Kalat es-Shuklf* are only two of the obstacles which stand in the way of a passage in this direction. As however the lake in question is invariably taken to be the "waters of Merom," and as it is an interesting feature in the geography of the upper part of the Jordan, it may be well here to give some account of it.

The region to which the name of *Hûleh*[a] is attached—the *Ard el-Hûleh*—is a depressed plain or basin, commencing on the north of the foot of the slopes which lead up to the *Merj Ayûn* and *Tell el-Kady*, and extending southwards to the bottom of the lake which bears the same name—*Bahr el-Hûleh*. On the east and west it is enclosed between two parallel ranges of hills; on the west the highlands of Upper Galilee—the *Jebel Safed*; and on the east a broad ridge or table-land of basalt, thrown off by the southern base of Hermon, and extending downwards beyond the *Huleh* till lost in the high ground east of the lake of Tiberias. The latter rises abruptly from the low ground, but the hills on the western side break down more gradually, and leave a tract of undulating table-land of varying breadth between them and the plain. The basin is in all about 15 miles long and 4 to 5 wide, and thus occupies an area about equal to that of the lake of Tiberias. It is the receptacle for the drainage of the highlands on each side, but more especially for the waters of the *Merj Ayûn*, an elevated plateau which lies above it amongst the roots of the great northern mountains of Palestine. In fact the whole district is an enormous swamp, which, though partially solidified at its upper portion by the gradual deposit of detritus from the hills, becomes more swampy as its length is descended, and at last terminates in the lake or pool which occupies its southern extremity. It was probably at one time all covered with water, and even now in the rainy seasons it is mostly submerged. During the dry season, however, the upper portions, and those immediately at the foot of the western hills, are sufficiently firm to allow the Arabs to encamp and pasture their cattle, but the lower part, more immediately bordering on the lake, is absolutely impassable, not only on account of its increasing marshiness, but also from the very dense thicket of reeds which covers it. At this part it is difficult to say where the swamp terminates and the lake begins, but farther down on both sides the shores are perfectly well defined.

In form the lake is not far from a triangle, the base being at the north and the apex at the south. It measures about 3 miles in each direction. Its level is placed by Van de Velde at 120 feet above the Mediterranean. That of *Tell el Kady*, 20 miles above, is 647 feet, and of the Lake Tiberias, 20 miles below, 653 feet, respectively above and below the same datum (Van de Velde, *Memoir*, 181). Thus the whole basin has a considerable slope southwards. The *Hasbâny* river, which falls almost due south from its source in the great *Wady et-Teim*, is joined at the north-east corner of the *Ard el-Huleh* by the streams from *Banias* and *Tell el-Kady*, and the united stream then flows on through the morass, rather nearer its eastern than its western side, until it enters the lake close to the eastern end of its upper side. From the apex of the triangle at the lower end the Jordan flows out. In addition to the *Hasbâny* and to the innumerable smaller watercourses which filter into it the waters of the swamp above, the lake is fed by independent springs on the slopes of its enclosing mountains. Of these the most considerable is the *Ain el-Mellahah*,[b] near the upper end of its western side, which sends down a stream of 40 or 50 feet in width. The water of the lake is clear and sweet; it is covered in parts by a broad-leaved plant, and abounds in water-fowl. Owing to its triangular form a considerable space is left between the lake and the mountains, at its lower end. This appears to be more the case on the west than on the east, and the rolling plain thus formed is very fertile, and cultivated to the water's edge.[c] This cultivated

[a] *Il Hûleh*, الحولة, is probably a very ancient name, derived from or connected with Hul, or more accurately Chul, who appears in the lists of Gen. x. as one of the sons of Aram (Syria, ver. 23). In the Arabic version of Judah of this passage, the name of Hul is given exactly in the form of the modern name—el-Hûleh. Josephus (*Ant.* i. 6, §4), in his account of the descendants of Noah, gives Hul as Ολλας, while he also calls the district in question Ολλαΐτις (*Ant.* xv. 10, §3). The word used in Hebrew and Arabic seems to have the force of *swamp*—the low land (see Michaelis, *Suppl.* Nos 687, 791; and Michaelis most ingeniously suggests that it is the root of the name Κοίλη *Συρία*, although in its present form it may have been sufficiently modified to transform it into an intelligible Greek word (Idem, *Spicilegium*, ii. 32, 33).

[b] This name seems sometimes to have been applied to the lake itself. See the quotation from William of Tyre, "lacum Melaha"—in Rob. ii. 428, note. Burckhardt did not visit it, but possibly guided by the meaning of the Arabic word (salt), says that "the S.W. shore bears the name of Melaha from the ground being covered with a saline crust" (June 20, 1812). The same thing seems to be affirmed in the Talmud (Ahaloth, end of chap. iii. quoted by Schwarz p. 42 *note*); but nothing of the kind appears to have been observed by other travellers. See especially Wilson, *Lands*, &c., ii. 163. By Schwarz (p. 29) the name is given as "Ein al-Maicha, the King's spring." If this could be substantiated, it would be allowable to see in it a traditional reference to the encampment of the Kings. Schwarz also mentions (pp. 41, 42 *note*) the following names for the lake: "Sibchi," perhaps a mistake for "Somcho," *i. e.* Semechonitis; "Kaldayeh 'the high,' identical with the Hebrew Merom;" "Yam Chavilah, יַם חֲוִילָה;" though this may merely be his translator's blunder for Chuileh, *i. e.* Hûleh.

[c] This undulating plain appears to be of volcanic origin, Van de Velde (*Syr. & Pal.* 415, 416), speaking of the part

district is called the *Ard el-Khait*, perhaps "the undulating land," *el-Khait*[1] being also the name which the Arabs call the lake (Thomson, *Bibl. Sacra*, 199; Rob. *Bib. Res.* 1st ed. iii. App. 135, 136). In fact the name *Huleh* appears to belong rather to the district, and only to the lake as occupying a portion thereof. It is not restricted to this spot, but is applied to another very fertile district in northern Syria lying below *Hamah*. A town of the same name is also found south of and close to the *Kasimiyeh* river a few miles from the castle of *Hums*.

Supposing the lake to be identical with the "waters of Merom," the plain just spoken of on its south-western margin is the only spot which could have been the site of Joshua's victory, though, as the Canaanites chose their own ground, it is difficult to imagine that they would have encamped in a position from which there was literally no escape. But this only strengthens the difficulty already expressed as to the identification. Still the district of the Huleh will always possess an interest for the Biblical student, from its connexion with the Jordan, and from the cities of ancient fame which stand on its border —Kedesh, Hazor, Dan, Laish, Caesarea, Philippi, &c.

The above account is compiled from the following sources:—*The Sources of the Jordan*, &c., by Rev. W. M. Thomson, in *Bibl. Sacra*, Feb. 1846, pp. 198-201; Robinson's *Bib. Res.* (1st ed. iii. 341-343, and App. 135) ii. 435, 436, iii. 395, 396; Wilson, *Lands*, &c. ii. 316; Van de Velde, *Syria and Pal.* ii. 416; Stanley, *S. & P.* chap. xi.

The situation of the Beroth, at which Josephus (as above) places Joshua's victory, is debated at some length by Michaelis (*Allg. Bibliothek* &c., No. 64) with a strong desire to prove that it is Berytus, the modern *Beirût*, and that Kedesh is on the Lake of *Hums* (Emessa). His argument is grounded mainly on an addition of Josephus (*Ant.* v. 1, §18) to the narrative as given both by the Hebrew and LXX., viz. that it occupied Joshua five days to march from Gilgal to the encampment of the kings. For this the reader must be referred to Michaelis himself. But Josephus elsewhere mentions a town called Meroth, which may possibly be the same as Beroth. This seems to have been a place naturally strong, and important as a military post (*Vita*, §37; *B. J.* ii. 20, §6), and moreover was the western limit of Upper Galilee (*B. J.* iii. 3, §1). This would place it somewhere about the plain of *Akka*, much more suitable ground for the chariots of the Canaanites than any to be found near the *Huleh*, while it also makes the account of the pursuit to Sidon more intelligible. [G.]

MERON'OTHITE, THE (הַמְּרֹנָתִי: *ὁ ἐκ Μεραθών*, Alex. *Μαραθων*; in Neh. *ὁ μηραθωθείτης*: *Meronothites*), that is, the native of a place called probably Meronoth, of which, however, no further traces have yet been discovered. Two Meronothites are named in the Bible:—1. JEHDEIAH, who had the charge of the royal asses of King David (1 Chr. xxvii. 30); and 2. JADON, one of those who assisted in the repair of the wall of Jerusalem after the return from the captivity (Neh. iii. 7). In the latter case we are possibly afforded a clue to the situation of Meronoth by the fact that Jadon is mentioned between a Gibeonite and the men of Gibeon, who again are followed by the men of Mizpah: but no name like it is to be found among the towns of that district, either in the lists of Joshua (xviii. 11-28), of Nehemiah (xi. 31-35), or in the catalogue of modern towns given by Robinson (*B. R.* 1st ed. iii. Append. 121-125). For this circumstance compare MECHERATHITE. [G.]

ME'ROZ (מֵרוֹז: *Μηρόζ*; Alex. *Μαζω*: *terra Meroz*), a place mentioned only in the Song of Deborah and Barak in Judg. v. 23, and there denounced because its inhabitants had refused to take any part in the struggle with Sisera:—

> Curse ye Meroz, said the messenger of Jehovah,
> Curse ye, curse ye, its inhabitants;
> Because they came not to the help of Jehovah,
> To the help of Jehovah against the mighty.

The denunciation of this faint-heartedness is made to form a pendant to the blessing proclaimed on the prompt action of Jael.

Meroz must have been in the neighbourhood of the Kishon, but its real position is not known: possibly it was destroyed in obedience to the curse. A place named Merrus (but Eusebius *Μερρών*), is named by Jerome (*Onom.* "Merrom" as 12 miles north of Sebaste, near Dothain, but this is too far south to have been near the scene of the conflict. Far more feasible is the conjecture of Schwarz (168, and see 36) that Meroz is to be found at *Merasas*—more correctly *el-Mirâssus*—a ruined site about 4 miles N.W. of *Beisan*, on the southern slopes of the hills, which are the continuation of the so-called "Little Hermon," and form the northern side of the valley (*Wady Jaîdi*), which leads directly from the plain of Jezreel to the Jordan. The town must have commanded the Pass, and if any of Sisera's people attempted, as the Midianites did when routed by Gideon, to escape in that direction, its inhabitants might no doubt have prevented their doing so, and have slaughtered them. *El-Mirâssus* is mentioned by Burckhardt (July 2: he calls it *Merassrass*), Robinson (ii. 356), and others.

Fürst (*Handwb.* 786*a*) suggests the identity of Meroz with Merom, the place which may have given its name to the waters of Merom, in the neighbourhood of which Kedesh, the residence of Jael, where Sisera took refuge, was situated. But putting aside the fact of the non-existence of any town named Merom, there is against this suggestion the consideration that Sisera left his army and fled alone in another direction.

In the Jewish traditions preserved in the Commentary on the Song of Deborah attributed to St Jerome, Meroz, which may be interpreted as secret, is made to signify the evil angels who led on the Canaanites, who are cursed by Michael the angel of Jehovah the leader of the Israelites. [G.]

ME'RUTH (*Ἐμμηρούθ*: *Emeruth*). A corruption of IMMER 1, in Ezr. ii. 37 (1 Esd. v. 24).

MES'ECH, MESH'ECH (מֶשֶׁךְ: *Μεσέχ*: *Mosoch*), a son of Japheth (Gen. x. 2; 1 Chr. i. 5, and the progenitor of a race frequently noticed in

below the *Wady Feraim*, a few miles only S. of the lake calls it "a plain entirely composed of lava;" and at the *Jisr-Benat-Yakûb* he speaks of the "black lava sides" of the Jordan. Wilson, however (ii. 316), calls the soil of the same part the "détritus of basaltic rocks and dykes."

[1] The writer has not succeeded in ascertaining the signification of this Arabic word. By Schwarz (p. 47) it is given as "Bachr Chit," 'wheat sea,' because much wheat is sown in its neighbourhood.' This is probably what Prof. Stanley alludes to when he reports the name as Bahr Hit or 'sea of wheat' (*S. & P.* 391 note).

Scripture in connexion with Tubal, Magog, and other northern nations. They appear as allies of Gog (Ez. xxxviii. 2, 3, xxxix. 1), and as supplying the Tyrians with copper and slaves (Ez. xxvii. 13; in Ps. cxx. 5,[a] they are noticed as one of the remotest, and at the same time rudest nations of the world. Both the name and the associations are in favour of the identification of Meshech with the *Moschi*: the form of the name adopted by the LXX. and the Vulg. approaches most nearly to the classical designation, while in Procopius (*B. G.* iv. 2) we meet with another form (*Μέσχοι*) which assimilates to the Hebrew. The position of the Moschi in the age of Ezekiel was probably the same as is described by Herodotus (iii. 94), viz. on the borders of Colchis and Armenia, where a mountain chain connecting Anti-Taurus with Caucasus, was named after them the *Moschici Montes*, and where was also a district named by Strabo (xi. 497-499) *Moschica*. In the same neighbourhood were the *Tibareni*, who have been generally identified with the Biblical Tubal. The Colchian tribes, the Chalybes more especially, were skilled in working metals, and hence arose the trade in the "vessels of brass" with Tyre; nor is it at all improbable that slaves were largely exported thence as now from the neighbouring district of *Georgia*. Although the Moschi were a comparatively unimportant race in classical times, they had previously been one of the most powerful nations of Western Asia. The Assyrian monarchs were engaged in frequent wars with them, and it is not improbable that they had occupied the whole of the district afterwards named Cappadocia. In the Assyrian inscriptions the name appears under the form of *Muskai*: a somewhat similar name *Mashoash* appears in an Egyptian inscription, which commemorates the achievements of the third Rameses (Wilkinson, *Anc. Eg.* i. 398, Abridg.). The subsequent history of Meshech is unknown; Knobel's attempt to connect them with the Ligurians (*Völkertaf.* p. 119 &c.) is devoid of all solid ground. As far as the name and locality are concerned, *Muscovite* is a more probable hypothesis (Rawlinson, *Herod.* i. 652-3). [W. L. B.]

ME'SHA (מֵשָׁא, perhaps = מְשִׂיאָה, "retreat," Gen.: *Μασσῆ*; *Messa*), the name of one of the geographical limits of the Joktanites when they first settled in Arabia: "And their dwelling was from *Mesha* (מִמֵּשָׁא בֹּאֲכָה סְפָרָה הַר הַקֶּדֶם), [as their guest] unto Sephar, a mount of the East" (Gen. x. 30). The position of the early Joktanite colonists is clearly made out from the traces they have left in the ethnology, language, and monuments of Southern Arabia; and without putting too precise a limitation on the possible situation of Mesha and Sephar, we may suppose that these places must have fallen within the south-western quarter of the peninsula; including the modern Yemen on the west, and the districts of 'Omán, Mahreh, Shihr, &c., as far as Ḥadramáwt, on the east. These general boundaries are strengthened by the identification of Sephar with the port of Zafári, or Dhafári; though the site of Sephar may possibly be hereafter connected with the old Himyerite metropolis in the Yemen [see ARABIA, p. 94, and SEPHAR], but this would not materially alter the question. In Sephar we believe we have the eastern limit of the early settlers, whether its site be the sea-port or the inland city; and the correctness of this supposition appears from the Biblical record, in which the migration is apparently from west to east, from the probable course taken by the immigrants, and from the greater importance of the known western settlements of the Joktanites, or those of the Yemen.

If then Mesha was the western limit of the Joktanites, it must be sought for in north-western Yemen. But the identifications that have been proposed are not satisfactory. The sea-port called *Μοῦσα* or *Μοβζα*, mentioned by Ptolemy, Pliny, Arrian, and others (see the *Dictionary of Geography*, s. v. Muza) presents the most probable site. It was a town of note in classical times, but has since fallen into decay, if the modern Moosà be the same place. The latter is situate in about 13° 40′ N. lat., 43° 20′ E. long., and is near a mountain called the *Three Sisters*, or Jebel Moosà, in the Admiralty Chart of the Red Sea, drawn from the surveys of Captain Pullen, R.N. Gesenius thinks this identification probable, but he appears to have been unaware of the existence of a modern site called Moosà, saying that Muza was nearly where now is Maushid. Bochart, also, holds the identification with Muza (*Phaleg*, xxx.). Mesha may possibly have lain inland, and more to the north-west of Sephar than the position of Moosà would indicate; but this is scarcely to be assumed. There is, however, a Mount Moosh,[a] situate in Nejd, in the territory of the tribe of Teiyi (*Mardsid* and *Mushtarak*, s. v.). There have not been wanting writers among the late Jews to convert Mesha and Sephar into Mekkah and El-Medeeneh (*Phaleg*, *l. c.*). [E. S. P.]

ME'SHA (מֵישָׁע: *Μωσά*; Jos. *Μισᾶν*: *Mesa*).

1. The king of Moab in the reigns of Ahab and his sons Ahaziah and Jehoram, kings of Israel (2 K. iii. 4), and tributary to the first. Probably the allegiance of Moab, with that of the tribes east of Jordan, was transferred to the northern kingdom of Israel upon the division of the monarchy, for there is no account of any subjugation of the country subsequent to the war of extermination with which it was visited by David, when Benaiah displayed his prowess (2 Sam. xxiii. 20), and "the Moabites became David's servants, bearers of gifts" (2 Sam. viii. 2). When Ahab had fallen in battle at Ramoth Gilead, Mesha seized the opportunity afforded by the confusion consequent upon this disaster, and the feeble reign of Ahaziah, to shake off the yoke of Israel and free himself from the burdensome tribute of "a hundred thousand wethers and a hundred thousand rams with their wool." The country east of the Jordan was rich in pasture for cattle (Num. xxxii. 1), the chief wealth of the Moabites consisted in their large flocks of sheep, and the king of this pastoral people is described as *nôḳêd* (נֹקֵד), "a sheep-master,"

[a] Various explanations have been offered to account for the juxtaposition of two such remote nations as Meshech and Kedar in this passage. The LXX. does not recognise it as a proper name, but renders it *ἀναστροφῆς*. Bötticher suggests the identity of *Meseck* with *Damascus*, or Damascene. It is, however, quite possible that the Psalmist selects the two nations for the very reason which is regarded as an objection, viz., their *remoteness* from each other as well as the same time their wild and uncivilized character may have been the ground of the selection, as Hengstenberg (*Comm.* in loc.) suggests. We have already had to notice Knobel's idea, that the Mesech in this passage is the Meshech of 1 Chr. i. 5, and the Babylonian Mesene [MASH].

[a] מוֹשׁ

or owner of herds.[a] About the signification of this word *nôkêd* there is not much doubt, but its origin is obscure. It occurs but once besides in Am. i. 1, where the prophet Amos is described as "among the *herdmen* (נֹקְדִים, *nôkedîm*) of Tekoah." On this Kimchi remarks that a herdman was called *nôkêd*, because most cattle have black or white spots (comp. נָקוֹד, *nâkôd*, Gen. xxx. 32, A. V. "speckled"), or as Buxtorf explains it, because sheep are generally marked with certain signs so as to be known. But it is highly improbable that any such etymology should be correct, and Fürst's conjecture that it is derived from an obsolete root, signifying to keep or feed cattle, is more likely to be true (*Concord.* s. v.).

When, upon the death of Ahaziah, his brother Jehoram succeeded to the throne of Israel, one of his first acts was to secure the assistance of Jehoshaphat, his father's ally, in reducing the Moabites to their former condition of tributaries. The united armies of the two kings marched by a circuitous route round the Dead Sea, and were joined by the forces of the king of Edom. [JEHORAM.] The disordered soldiers of Moab, eager only for spoil, were surprised by the warriors of Israel and their allies, and became an easy prey. In the panic which ensued they were slaughtered without mercy, their country was made a desert, and the king took refuge in his last stronghold and defended himself with the energy of despair. With 700 fighting men he made a vigorous attempt to cut his way through the besieging army, and when beaten back, he withdrew to the wall of his city, and there, in sight of the allied host, offered his first-born son, his successor in the kingdom, as a burnt-offering to Chemosh, the ruthless fire-god of Moab. His bloody sacrifice had so far the desired effect that the besiegers retired from him to their own land. There appears to be no reason for supposing that the son of the king of Edom was the victim on this occasion, whether, as R. Joseph Kimchi supposed, he was already in the power of the king of Moab, and was the cause of the Edomites joining the armies of Israel and Judah; or whether, as R. Moses Kimchi suggested, he was taken prisoner in the sally of the Moabites, and sacrificed out of revenge for its failure. These conjectures appear to have arisen from an attempt to find in this incident the event to which allusion is made in Am. ii. 1, where the Moabite is charged with burning the bones of the king of Edom into lime. It is more natural, and renders the narrative more vivid and consistent, to suppose that the king of Moab, finding his last resource fail him, endeavoured to avert the wrath and obtain the aid of his god by the most costly sacrifice in his power. [MOAB.]

2. (מֵישָׁע: Μαισά; Alex. Μαισάς: *Mesa*). The eldest son of Caleb the son of Hezron by his wife Azubah, as Kimchi conjectures (1 Chr. ii. 42). He is called the father, that is the prince or founder, of Ziph. Both the Syriac and Arabic versions have "Elishamai," apparently from the previous verse, while the LXX., unless they had a different reading, מרשע, seem to have repeated "Mareshah," which occurs immediately afterwards.

3. (מֵישָׁא: Μισά; Alex. Μασά: *Mesa*). A Benjamite, son of Shaharaim, by his wife Hodesh, who bare him in the land of Moab (1 Chr. viii. 9). The Vulgate and Alex. MS. must have had the reading מוֹשָׁא. [W. A. W.]

ME'SHACH (מֵישַׁךְ: Μισάχ; Alex. Μασάκ *Misach*). The name given to Mishael, one of the companions of Daniel, and like him of the blood-royal of Judah, who with three others was chosen from among the captives to be taught "the learning and the tongue[a] of the Chaldaeans" (Dan. i. 4), so that they might be qualified to "stand before" king Nebuchadnezzar (Dan. i. 5) as his personal attendants and advisers (i. 20). During their three years of preparation they were maintained at the king's cost, under the charge of the chief of the eunuchs, who placed them with "the Melzar," or chief butler. The story of their simple diet is well known. When the time of their probation was ended, such was "the knowledge and skill in all learning and wisdom" which God had given them, that the king found them "ten times better than all the magicians and astrologers that were in all his realm" (i. 20). Upon Daniel's promotion to be "chief of the magicians," his three companions, by his influence, were set "over the affairs of the province of Babylon" (ii. 49). But, notwithstanding their Chaldaean education, these three young Hebrews were strongly attached to the religion of their fathers; and their refusal to join in the worship of the image on the plain of Dura gave a handle of accusation to the Chaldaeans, who were jealous of their advancement, and eagerly reported to the king the heretical conduct of these "Jewish men" (iii. 12) who stood so high in his favour. The rage of the king, the swift sentence of condemnation passed upon the three offenders, their miraculous preservation from the fiery furnace heated seven times hotter than usual, the king's acknowledgment of the God of Shadrach, Meshach, and Abednego, with their restoration to office, are written in the 3rd chapter of Daniel, and there the history leaves them. The name "Meshach" is rendered by Fürst (*Handw.*) "a ram," and derived from the Sanscrit *méshah*. He goes on to say that it was the name of the Sun-god of the Chaldaeans, without giving any authority, or stopping to explain the phenomenon presented by the name of a Chaldaean divinity with an Aryan etymology. That Meshach was the name of some god of the Chaldaeans is extremely probable, from the fact that Daniel, who had the name of Belteshazzar, was so called after the god of Nebuchadnezzar (Dan. iv. 8), and that Abednego was named after Nego, or Nebo, the Chaldaean name for the planet Mercury. [W. A. W.]

[a] The LXX. leave it untranslated (νωκήδ, Alex. νωκήθ), as does the Peshito Syriac; but Aquila renders it νομιστροφόν, and Symmachus τρέφων βοσκήματα, following the Targum and Arabic, and themselves followed in the margin of the Hexaplar Syriac. In Am. i. 1, Symmachus has simply νομεύς. The Kamoos, as quoted by Bochart (*Hieroz.* i. c. 44), gives an Arabic word, نَقَد, *nakad*, not traced to any origin, which denotes an inferior kind of sheep, ugly and little valued except for its wool. The keeper of such sheep is called نَقَّاد, *nakkâd*, which Bochart identifies with *nôkêd*. But if this be the case it is a little remarkable that the Arabic translator should have passed over a word apparently so appropriate, and followed the version of the Targum, "an owner of flocks." Gesenius and Lee, however, accept this as the solution.

[a] The expression כָּל סֵפֶר וּלְשׁוֹן כ׳ includes the whole of the Chaldaean literature, written and spoken.

MESHELEMI'AH (מְשֶׁלֶמְיָה: *Μοσελλαμί*; Alex. *Μοσολλάμ*: *Mosollamiah*, 1 Chr. ix. 21; מְשֶׁלַמְיָה: *Μοσελλεμία*; Alex. *Μοσολλάμ*, *Μαγελλαούλα*, *Μοσολλεμία*: *Mesellemiah*, 1 Chr. xxvi. 1, 2, 9). A Korhite, son of Kore, of the sons of Asaph, who with his seven sons and his brethren, "sons of might," were porters or gate-keepers of the house of Jehovah in the reign of David. He is evidently the same as SHELEMIAH (1 Chr. xxvi. 14), to whose custody the East-gate, or principal entrance, was committed, and whose son Zechariah was a wise counsellor, and had charge of the north gate. "SHALLUM the son of Kore, the son of Ebiasaph, the son of Korah" (1 Chr. ix. 19), who was chief of the porters (17), and who gave his name to a family which performed the same office, and returned from the captivity with Zerubbabel (Ezr. ii. 42; Neh. vii. 45), is apparently identical with Shelemiah, Meshelemiah, and Meshullam (comp. 1 Chr. ix. 17, with Neh. xii. 25). [W. A. W.]

MESHEZABE'EL (מְשֵׁיזַבְאֵל: *Μαζεβήλ*; Alex. *Μοσεζεήλ*; F. A. *Μοσεζεβήλ*: *Mesezebel*).

1. Ancestor of Meshullam, who assisted Nehemiah in rebuilding the wall of Jerusalem (Neh. iii. 4). He was apparently a priest.

2. (*Μοσουζεβήλ*: *Mesizabel*). One of the "heads of the people," probably a family, who sealed the covenant with Nehemiah (Neh. x. 21).

3. (*Βασηζέ*: F. A. 3rd hand, *Βασηζαβεήλ*: *Mesezebel*). The father of Pethahiah, and descendant of Zerah the son of Judah (Neh. xi. 24).

MESHIL'LEMITH (מְשִׁלֵּמִית: *Μοσελλαμέθ*: Alex. *Μοσολλαμέθ*: *Mosollamith*). The son of Immer, a priest, and ancestor of Amashai or Massiai, according to Neh. xi. 13, and of Pashur and Adaiah, according to 1 Chr. ix. 12. In Neh. xi. 13 he is called MESHILLEMOTH.

MESHIL'LEMOTH (מְשִׁלֵּמוֹת: *Μοσολλαμέθ*; Alex. *Μοσολλαμέθ*: *Mosollamoth*). An Ephraimite, ancestor of Berechiah, one of the chiefs of the tribe in the reign of Pekah (2 Chr. xxviii. 12).

2. (*Μοσαμιλθ*). Neh. xi. 13. The same as MESHILLEMITH.

MESHUL'LAM (מְשֻׁלָּם: *Μοσολλάμ*; Alex. *Μοσολλάν*: *Mosullam*). 1. Ancestor of Shaphan the scribe (2 K. xxii. 3).

2. (*Μοσολλάμ*; Alex. *Μοσολλαμός*: *Mosollam*). The son of Zerubbabel (1 Chr. iii. 19).

3. (Vat. and Alex. *Μοσολλάμ*). A Gadite, one of the chief men of the tribe, who dwelt in Bashan at the time the genealogies were recorded in the reign of Jotham king of Judah (1 Chr. v. 13).

4. A Benjamite, of the sons of Elpaal (1 Chr. viii. 17).

5. (*Μοσουλάμ*; F. A. *Ἀμοσουλάμ* in Neh.). A Benjamite, the son of Hodaviah or Joed, and father of Sallu, one of the chiefs of the tribe who settled at Jerusalem after the return from Babylon (1 Chr. ix. 7, Neh. xi. 7).

6. (Alex. *Μοσολλάμ*). A Benjamite, son of Shephathiah, who lived at Jerusalem after the captivity (1 Chr. ix. 8).

7. (*Μοσουλάμ* in Neh.; Alex. *Μοσολλάμ*). The same as SHALLUM, who was high-priest probably in the reign of Amon, and father of Hilkiah (1 Chr. ix. 11; Neh. xi. 11). His descent is traced through *Zadok* and Meraioth to Ahitub; or, as is more probable, the names Meraioth and Ahitub are transposed, and his descent is from Meraioth as the more remote ancestor (comp. 1 Chr. vi. 7).

8. A priest, son of Meshillemith, or Meshillemoth, the son of Immer, and ancestor of Massiai or Amashai (1 Chr. ix. 12; comp. Neh. xi. 13). His name does not occur in the parallel list of Nehemiah, and we may suppose it to have been omitted by a transcriber in consequence of the similarity of the name which follows; or in the passage in which it occurs it may have been added from the same cause.

9. A Kohathite, or family of Kohathite Levites, in the reign of Josiah, who were among the overseers of the work of restoration in the Temple (2 Chr. xxxiv. 12).

10. (*Μοσολλάμ*). One of the "heads" (A. V. "chief men") sent by Ezra to Iddo "the head," to gather together the Levites to join the caravan about to return to Jerusalem (Ezr. viii. 16). Called MOSOLLAMON in 1 Esd. viii. 44.

11. (Alex. *Μοσασολλάμ*: *Mesollam*). A chief man in the time of Ezra, probably a Levite, who assisted Jonathan and Jahaziah in abolishing the marriages which some of the people had contracted with foreign wives (Ezr. x. 15). Also called MOSOLLAM in 1 Esd. ix. 14.

12. (*Μοσολλάμ*: *Mosollam*). One of the descendants of Bani, who had married a foreign wife and put her away (Ezr. x. 29). OLAMUS in 1 Esd. ix. 30, is a fragment of this name.

13. (*Μοσουλάμ*, Neh. iii. 30, vi. 18). The son of Berechiah, who assisted in rebuilding the wall of Jerusalem (Neh. iii. 4), as well as the Temple wall, adjoining which he had his "chamber" (Neh. iii. 30). He was probably a priest, and his daughter was married to Johanan the son of Tobiah the Ammonite (Neh. vi. 18).

14. (*Μοσουλάμ*). The son of Besodeiah: he assisted Jehoiada the son of Paseah in restoring the old gate of Jerusalem (Neh. iii. 6).

15. (*Μοσολλάμ*; Alex. *Μοσολλάμ*). One of those who stood at the left hand of Ezra when he read the law to the people (Neh. viii. 4).

16. (*Μοσουλάμ*). A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 7).

17. (*Μοσουλλάμ*; Alex. *Μοσουλάμ*). One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 20).

18. (*Μοσουλάμ*). A priest in the days of Joiakim the son of Jeshua, and representative of the house of Ezra (Neh. xii. 13).

19. (*Μοσουλάμ*). Likewise a priest at the same time as the preceding, and head of the priestly family of Ginnethon (Neh. xii. 16).

20. (Omitted in LXX.). A family of porters, descendants of Meshullam (Neh. xii. 25), who is also called Meshelemiah (1 Chr. xxvi. 1), Shelemiah (1 Chr. xxvi. 14), and Shallum (Neh. vii. 45).

21. (*Μοσολλάμ*; Alex. *Μοσολλάμ*). One of the princes of Judah who were in the right hand company of those who marched on the wall of Jerusalem upon the occasion of its solemn dedication (Neh. xii. 33). [W. A. W.]

MESHULLEMETH (מְשֻׁלֶּמֶת: *Μοσολλάμ*; Alex. *Μασαλαμεθ*: *Messalemeth*). The daughter of Haruz of Jotbah, wife of Manasseh king of Judah, and mother of his successor Amon (2 K. xxi. 19).

MESO'BAITE, THE (חַמְּצֹבָיָה, *i. e.* "the Metsobayah": ὁ *Μεσσαβεία*; Alex. *Μεσσβεα*

de Maccabæis), a title which occurs only once, and then attached to the name of JASIEL, the last of David's guard in the extended list of 1 Chronicles (xi. 47). The word retains strong traces of ZOBAH, one of the petty Aramite kingdoms, in which there would be nothing surprising, as David had a certain connexion with these Aramite states, while this very catalogue contains the names of Moabites, Ammonites, and other foreigners. But on this it is impossible to pronounce with any certainty, as the original text of the passage is probably in confusion. Kennicott's conclusion (*Dissertation*, 233, 234) is that originally the word was "the Metzobaites" (הַמִּצְעֲבִיִּם), and applied to the three names preceding it.

It is an unusual thing in the A. V. to find צ (ts) rendered by *z*, as in the present case. Another instance is SIDON. [G.]

MESOPOTAMIA (אֲרַם־נַהֲרַיִם: *Μεσοποταμία*: *Mesopotamia*) is the ordinary Greek rendering of the Hebrew *Aram-Naharaim*, or "Syria of the two rivers," whereof we have frequent mention in the earlier books of Scripture (Gen. xxiv. 10; Deut. xxiii. 4; Judg. iii. 8, 10). It is also adopted by the LXX. to represent the פַּדַּן־אֲרָם (*Paddan-Aram*) of the Hebrew text, where our translators keep the term used in the original (Gen. xxv. 20, xxviii. 2, 5, &c.).

If we look to the signification of the name, we must regard Mesopotamia as the entire country between the two rivers—the Tigris and the Euphrates. This is a tract nearly 700 miles long, and from 20 to 250 miles broad, extending in a south-easterly direction from *Telek* (lat. 38° 23', long. 39° 18') to *Kurnah* (lat. 31°, long. 47° 30'). The Arabian geographers term it "the Island," a name which is almost literally correct, since a few miles only intervene between the source of the Tigris and the Euphrates at *Telek*. It is for the most part a vast plain, but is crossed about its centre by the range of the *Sinjar* hills, running nearly east and west from about Mosul to a little below *Rakkeh*; and in its northern portion it is even mountainous, the upper Tigris valley being separated from the Mesopotamian plain by an important range, the Mons Masius of Strabo (xi. 12, §4; 14, §2, &c.), which runs from *Birehjik* to *Jezireh*. This district is always charming; but the remainder of the region varies greatly according to circumstances. In early spring a tender and luxuriant herbage covers the whole plain, while flowers of the most brilliant hues spring up in rapid succession, imparting their colour to the landscape, which changes from day to day. As the summer draws on, the verdure recedes towards the streams and mountains. Vast tracts of arid plain, yellow, parched, and sapless, fill the intermediate space, which ultimately becomes a bare and uninhabitable desert. In the *Sinjar*, and in the mountain-tract to the north, springs of water are tolerably abundant, and corn, vines, and figs, are cultivated by a stationary population; but the greater part of the region is only suited to the nomadic hordes, which in spring spread themselves far and wide over the vast flats, so utilising the early verdure, and in summer and autumn gather along the banks of the two main streams and their affluents, where a delicious shade and a rich pasture may be found during the greatest heats. Such is the present character of the region. It is thought, however that by a careful water-system, by deriving channels from the great streams or their affluents, by storing the superfluous spring-rains in tanks, by digging wells and establishing *kanâts*, or subterraneous aqueducts, the whole territory might be brought under cultivation, and rendered capable of sustaining a permanent population. That some such system was established in early times by the Assyrian monarchs seems to be certain, from the fact that the whole level country on both sides of the *Sinjar* is covered with mounds marking the sites of cities, which wherever opened have presented appearances similar to those found on the site of Nineveh. [ASSYRIA.] If even the more northern portion of the Mesopotamian region is thus capable of being redeemed from its present character of a desert, still more easily might the southern division be reclaimed and converted into a garden. Between the 35th and 34th parallels, the character of the Mesopotamian plain suddenly alters. Above, it is a plain of a certain elevation above the courses of the Tigris and Euphrates, which are separated from it by low limestone ranges; below, it is a mere alluvium, almost level with the rivers, which frequently overflow large portions of it. Consequently, from the point indicated, canalisation becomes easy. A skilful management of the two rivers would readily convey abundance of the life-giving fluid to every portion of the Mesopotamian tract below the 34th parallel. And the innumerable lines of embankment, marking the course of ancient canals, sufficiently indicate that in the flourishing period of Babylonia a network of artificial channels covered the country. [BABYLONIA.]

To this description of Mesopotamia in the most extended sense of the term, it seems proper to append a more particular account of that region, which bears the name *par excellence*, both in Scripture, and in the classical writers. This is the north-western portion of the tract already described, or the country between the great bend of the Euphrates (lat. 35° to 37° 30') and the upper Tigris. (See particularly Ptolem. *Geograph.* v. 18; and compare Eratosth. ap. Strab. ii. 1, § 29; Arr. *Exp. Al.* iii. 7; *Dexipp. Fr.* 1, &c.) It consists of the mountain country extending from *Birehjik* to *Jezireh* upon the north; and, upon the south, of the great undulating Mesopotamian plain, as far as the Sinjar hills, and the river *Khabour*. The northern range, called by the Arabs *Karajah Dagh* towards the west and *Jebel Tur* towards the east, does not attain to any great elevation. It is in places rocky and precipitous, but has abundant springs and streams which support a rich vegetation. Forests of chestnuts and pistachio-trees occasionally clothe the mountain sides; and about the towns and villages are luxuriant orchards and gardens, producing abundance of excellent fruit. The vine is cultivated with success; wheat and barley yield heavily; and rice is grown in some places. The streams from the north side of this range are short, and fall mostly into the Tigris. Those from the south are more important. They flow down at very moderate intervals along the whole course of the range, and gradually collect into two considerable rivers—the *Belik* (ancient Bilichus), and the *Khabour* (Habor or Chaboras)—which empty themselves into the Euphrates. [HABOR.] South of the mountains is the great plain already described, which between the *Khabour* and the Tigris is interrupted only by the *Sinjar* range, but west of the *Khabour* is broken by several spurs from the *Karajah Dagh*, having a

general direction from north to south. In this district are the two towns of *Orfa* and *Harran*, the former of which is thought by many to be the native city of Abraham, while the latter is on good grounds identified with Haran, his resting-place between Chaldæa and Palestine. [HARAN.] Here we must fix the Padan-Aram of Scripture—the "plain Syria," or "district stretching away from the foot of the hills" (Stanley's *Sin. & Pal.* p. 129 *note*), without, however, determining the extent of country thus designated. Besides *Orfa* and *Harran*, the chief cities of modern Mesopotamia are *Mardin* and *Nisibin*, south of the *Jebel Tur*, and *Diarbekr*, north of that range, upon the Tigris. Of these places two, *Nisibin* and *Diarbekr*, were important from a remote antiquity, *Nisibin* being then Nisibis, and *Diarbekr* Amida.

We first hear of Mesopotamia in Scripture as the country where Nahor and his family settled after quitting Ur of the Chaldees (Gen. xxiv. 10). Here lived Bethuel and Laban; and hither Abraham sent his servant, to fetch Isaac a wife "of his own kindred" (ib. ver. 38). Hither too, a century later, came Jacob on the same errand; and hence he returned with his two wives after an absence of 21 years. After this we have no mention of Mesopotamia, till, at the close of the wanderings in the wilderness, Balak the king of Moab sends for Balaam "to Pethor of Mesopotamia" (Deut. xxiii. 4), which was situated among "the mountains of the east" (Num. xxiii. 7), by a river (ib. xxii. 5), probably the Euphrates. About half a century later, we find, for the first and last time, Mesopotamia the seat of a powerful monarchy. Chushan-Rishathaim, king of Mesopotamia, establishes his dominion over Israel shortly after the death of Joshua (Judg. iii. 8), and maintains his authority for the space of eight years, when his yoke is broken by Othniel, Caleb's nephew (ib. vers. 9, 10). Finally, the children of Ammon, having provoked a war with David, "sent a thousand talents of silver to hire them chariots and horsemen out of Mesopotamia, and out of Syria Maachah, and out of Zobah" (1 Chr. xix. 6). It is uncertain whether the Mesopotamians were persuaded to lend their aid at once. At any rate, after the first great victory of Joab over Ammon and the Syrians who took their part, these last "drew forth the Syrians that were beyond the river" (ib. ver. 16), who participated in the final defeat of their fellow-countrymen at the hands of David. The name of Mesopotamia then passes out of Scripture, the country to which it had applied becoming a part, first of Assyria, and afterwards of the Babylonian empire.

According to the Assyrian inscriptions, Mesopotamia was inhabited in the early times of the empire B.C. 1200-1100) by a vast number of petty tribes, each under its own prince, and all quite independent of one another. The Assyrian monarchs contended with these chiefs at great advantage, and by the time of Jehu (B.C. 880) had fully established their dominion over them. The tribes were all called "tribes of the Nairi," a term which some compare with the *Naharain* of the Jews, and translate "tribes of the *stream-lands*." But this identification is very uncertain. It appears, however, in close accordance with Scripture, first, that Mesopotamia was independent of Assyria till after the time of David; secondly, that the Mesopotamians were warlike and used chariots in battle; and thirdly, that not long after the time of David they lost their independence, their country being absorbed by Assyria, of which it was thenceforth commonly reckoned a part.

On the destruction of the Assyrian empire, Mesopotamia seems to have been divided between the Medes and the Babylonians. The conquests of Cyrus brought it wholly under the Persian yoke, and thus it continued to the time of Alexander, being comprised (probably) in the ninth, or Assyrian satrapy. At Alexander's death, it fell to Seleucus, and formed a part of the great Syrian kingdom till wrested from Antiochus V. by the Parthians, about B.C. 160. Trajan conquered it from Parthia in A.D. 115, and formed it into a Roman province; but in A.D. 117 Adrian relinquished it of his own accord. It was afterwards more than once reconquered by Rome, but never continued long under her sceptre, and finally reverted to the Persians in the reign of Jovian, A.D. 363.

(See Quint. Curt. v. 1; Dio Cass. lxviii. 22-26, Amm. Marc. xv. 8, &c.; and for the description of the district, compare C. Niebuhr's *Voyage en Arabie*, &c., vol. ii. pp. 300-334; Pococke's *Description of the East*, vol. ii. part i. ch. 17; and Layard's *Nineveh and Babylon*, chs. xi.–xv.). [G. R.]

MESSI'AH. This word (מָשִׁיחַ, *Masiach*), which answers to the word Χριστός in the N. T., means *anointed*; and is applicable in its first sense to any one anointed with the holy oil. It is applied to the high priest in Lev. iv. 3, 5, 16; and possibly to the shield of Saul in a figurative sense in 2 Sam. i. 21. The kings of Israel were called *anointed*, from the mode of their consecration (1 Sam. ii. 10, 35, xii. 3, 5, xvi. 6, xxiv. 6, 10, xxvi. 9, 11, 23; 2 Sam. i. 14, 16, xix. 21, xxiii. 1).

This word also refers to the expected Prince of the chosen people who was to complete God's purposes for them, and to redeem them, and of whose coming the prophets of the old covenant in all time spoke. It is twice used in the N. T. of Jesus (John i. 41, iv. 25, A. V. "Messias"); but the Greek equivalent, *the Christ*, is constantly applied, at first with the article as a title, exactly *the Anointed One*, but later without the article, as a proper name, *Jesus Christ*.

Three points belong to this subject: 1. The expectation of a Messiah among the Jews; 2. The expectation of a suffering Messiah; 3. The nature and power of the expected Messiah. Of these the second will be discussed under SAVIOUR, and the third under SON OF GOD. The present article will contain a rapid survey of the first point only. The interpretation of particular passages must be left in a great measure to professed commentators.

The earliest gleam of the Gospel is found in the account of the fall, where it is said to the serpent "I will put enmity between thee and the woman, and between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel" (Gen. iii. 15). The tempter came to the woman in the guise of a serpent, and the curse thus pronounced has a reference both to the serpent which was the instrument, and to the tempter that employed it; to the natural terror and enmity of man against the serpent, and to the conflict between mankind redeemed by Christ its Head, and Satan that deceived mankind. Many interpreters would understand by the seed of the woman, the Messiah only; but it is easier to think with Calvin that mankind, after they are gathered into one army by Jesus the Christ, the Head of the Church, are to achieve a victory over evil. The Messianic character of this

prophecy has been much questioned by those who see in the history of the fall nothing but a fable: to those who accept it as true, this passage is the primitive germ of the Gospel, the protevangelium.

The blessings in store for the children of Shem are remarkably indicated in the words of Noah, "Blessed be the Lord God of Shem," or (lit.) "Blessed be Jehovah the God of Shem" (Gen. ix. 26), where instead of blessing Shem, as he had cursed Canaan, he carries up the blessing to the great fountain of the blessings that shall follow Shem. Next follows the promise to Abraham, wherein the blessings to Shem are turned into the narrower channel of one family—"I will make of thee a great nation, and I will bless thee, and make thy name great; and thou shalt be a blessing; and I will bless them that bless thee and curse him that curseth thee; and in thee shall all families of the earth be blessed" (Gen. xii. 2, 3). The promise is still indefinite; but it tends to the undoing of the curse of Adam, by a blessing to all the earth through the seed of Abraham, as death had come on the whole earth through Adam. When our Lord says "Your father Abraham rejoiced to see my day, and he saw it and was glad" (John viii. 56), we are to understand that this promise of a real blessing and restoration to come hereafter was understood in a spiritual sense, as a leading back to God, as a coming nearer to Him, from whom the promise came; and he desired with hope and rejoicing (gestivit cum desiderio, *Bengel*) to behold the day of it.

A great step is made in Gen. xlix. 10, "The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come; and unto him shall the gathering of the people be." The derivation of the word Shiloh (שִׁילֹה) is probably from the root שָׁלַה; and if so, it means *rest*, or, as Hengstenberg argues, it is for Shilon, and is a proper name, *the man of peace or rest, the peacemaker*. For other derivations and interpretations see Gesenius (*Thesaurus*, sub voc.) and Hengstenberg (*Christologie*, vol. i.). Whilst *man of peace* is far the most probable meaning of the name, those old versions which render it "He to whom the sceptre *belongs*," see the Messianic application equally with ourselves. This then is the first case in which the promises distinctly centre in one person; and He is to be a man of peace; He is to wield and retain the government, and the nations shall look up to Him and obey Him.

The next passage usually quoted is the prophecy of Balaam (Num. xxiv. 17-19). The *star* points indeed to the glory, as the sceptre denotes the power, of a king. And Onkelos and Jonathan (Pseudo) see here the Messiah. But it is doubtful whether the prophecy is not fulfilled in David (2 Sam. viii. 2, 14); and though David is himself a type of Christ, the direct Messianic application of this place is by no means certain.

The prophecy of **Moses** (Deut. xviii. 18) "I will raise them up a prophet from among their brethren, like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him," claims attention. Does this refer to the Messiah? The reference to Moses in John v. 45-47—"He wrote of me," seems to point to this passage; for it is a cold and forced interpretation to refer it to the whole types and symbols of the Mosaic Law. On the other hand, many critics would fain find here the divine institution of the whole prophetic order, which if so here, does not occur at all. Hengstenberg thinks that it does promise that an order of prophets should be sent, but that the singular is used in direct reference to the greatest of the prophets, Christ himself, without whom the words would not have been fulfilled. "The Spirit of Christ spoke in the prophets, and Christ is in a sense the only prophet." (1 Pet. i. 11.) Jews in earlier times might have been excused for referring the words to this or that present prophet; but the Jews whom the Lord rebukes (John v.) were inexcusable; for, having the words before them, and the works of Christ as well, they should have known that no prophet had so fulfilled the words as He had.

The passages in the Pentateuch which relate to "the Angel of the Lord" have been thought by many to bear reference to the Messiah.

The second period of Messianic prophecy would include the time of David. In the promises of a kingdom to David and his house "for ever" (2 Sam. vii. 13), there is more than could be fulfilled save by the eternal kingdom in which that of David merged; and David's last words dwell on this promise of an everlasting throne (2 Sam. xxiii.). Passages in the Psalms are numerous which are applied to the Messiah in the N. T.: such are Ps. ii., xvi., xxii., xl., cx. Other Psalms quoted in the N. T. appear to refer to the actual history of another king; but only those who deny the existence of types and prophecy will consider this as an evidence against an ulterior allusion to Messiah: such Psalms are xlv., lxviii., lxix., lxxii. The advance in clearness in this period is great. The name of **Anointed**, *i. e.* King, comes in, and the Messiah is to come of the lineage of David. He is described in His exaltation, with His great kingdom that shall be spiritual rather than temporal, Ps. ii., xxi., xl., cx. In other places He is seen in suffering and humiliation, Ps. xxii., xvi., xl.

After the time of David the predictions of the Messiah ceased for a time; until those prophets arose whose works we possess in the canon of Scripture. They nowhere give us an exact and complete account of the nature of Messiah; but different aspects of the truth are produced by the various needs of the people, and so they are led to speak of Him now as a Conqueror or a Judge, or a Redeemer from sin; it is from the study of the whole of them that we gain a clear and complete image of His Person and kingdom. This third period lasts from the reign of Uzziah to the Babylonish captivity. The Messiah is a king and Ruler of David's house, who should come to reform and restore the Jewish nation and purify the church, as in Is. xi., xl.–lxvi. The blessings of the restoration, however, will not be confined to Jews; the heathen are made to share them fully (Is. ii. lxvi.). Whatever theories have been attempted about Isaiah liii., there can be no doubt that the most natural is the received interpretation that it refers to the suffering Redeemer; and so in the N. T. it is always considered to do. The passage of Micah v. 2 (comp. Matt. ii. 6) left no doubt in the mind of the Sanhedrim as to the birthplace of the Messiah. The lineage of David is again alluded to in Zechariah xii. 10-14. The time of the second Temple is fixed by Haggai ii. 9 for Messiah's coming; and the coming of the Forerunner and of the Anointed are clearly revealed in Mal. iii. 1, iv. 5, 6.

The fourth period after the close of the canon of the O. T. is known to us in a great measure from

allusions in the N. T. to the expectation of the Jews. From such passages as Ps. ii. 2, 6, 8; Jer. xxiii. 5, 6; Zech. ix. 9, the Pharisees and those of the Jews who expected Messiah at all, looked for a temporal prince only. The Apostles themselves were infected with this opinion, till after the Resurrection, Matt. xx. 20, 21; Luke xxiv. 21; Acts i. 6. Gleams of a purer faith appear, Luke ii. 30, xxiii. 42; John iv. 25. On the other hand there was a sceptical school which had discarded the expectation altogether. No mention of Messiah appears in the Book of Wisdom, nor in the writings of Philo; and Josephus avoids the doctrine. Intercourse with heathens had made some Jews ashamed of their fathers' faith.

The expectation of a golden age that should return upon the earth, was common in heathen nations (Hesiod, *Works and Days*, 109; Ovid, *Met.* i. 89; Virg. *Ecl.* iv.; and passages in Euseb. *Præp. Ev.* i. 7, xii. 13). This hope the Jews also shared; but with them it was associated with the coming of a particular Person, the Messiah. It has been asserted that in Him the Jews looked for an earthly king, and that the existence of the hope of a Messiah may thus be accounted for on natural grounds and without a divine revelation. But the prophecies refute this: they hold out not a Prophet only, but a King and a Priest, whose business it should be to set the people free from sin, and to teach them the ways of God, as in Ps. xxii., xl., cx.; Is ii., xi., liii. In these and other places too the power of the coming One reaches beyond the Jews and embraces all the Gentiles, which is contrary to the exclusive notions of Judaism. A fair consideration of all the passages will convince that the growth of the Messianic idea in the prophecies is owing to revelation from God. The witness of the N. T. to the O. T. prophecies can bear no other meaning; it is summed up in the words of Peter—"We have also a more sure word of prophecy; whereunto ye do well that ye take heed, as unto a light that shineth in a dark place, until the day dawn, and the day star arise in your hearts: knowing this first, that no prophecy of the Scripture is of any private interpretation. For the prophecy came not in old time by the will of man: but holy men of God spake as they were moved by the Holy Ghost" (2 Pet. i. 19–21; compare the elaborate essay on this text in Knapp's *Opuscula*, vol. i.). Our Lord affirms that there are prophecies of the Messiah in O. T., and that they are fulfilled in Him, Matt. xxvi. 54; Mark ix. 12; Luke xviii. 31-33, xx. 37, xxiv. 27; John v. 39, 46. The Apostles preach the same truth, Acts ii. 16, 25, viii. 28-35, x. 43, xiii. 23, 32, xxvi. 22, 23; 1 Pet. i. 11; and in many passages of St. Paul. Even if internal evidence did not prove that the prophecies were much more than vague longings after better times, the N. T. proclaims everywhere that although the Gospel was the sun, and O. T. prophecy the dim light of a candle, yet both were light, and both assisted those who heeded them, to see aright; and that the prophets interpreted, not the private longings of their own hearts but the will of God, in speaking as they did (see Knapp's Essay for this explanation) of the coming kingdom.

Our own theology is rich in prophetic literature; but the most complete view of this whole subject is found in Hengstenberg's *Christologie*, the second edition of which, greatly altered, is translated in Clark's Foreign Theological Library. [See as already used, SAVIOUR; SON OF GOD.]

MESSI'AS (*Μεσσίας*: *Messias*), the Greek form of Messiah (John i. 41; iv. 25).

METALS. The Hebrews, in common with other ancient nations, were acquainted with nearly all the metals known to modern metallurgy, whether as the products of their own soil or the results of intercourse with foreigners. One of the earliest geographical definitions is that which describes the country of Havilah as the land which abounded in *gold*, and the gold of which was good (Gen. ii. 11, 12). The first artist in metals was a Cainite, Tubal Cain, the son of Lamech, the forger or sharpener of every instrument of *copper* (A. V. "brass") and *iron* (Gen. iv. 22). "Abram was very rich in cattle, in *silver*, and in *gold*" (Gen. xiii. 2); silver, as will be shown hereafter, being the medium of commerce, while gold existed in the shape of ornaments, during the patriarchal ages. *Tin* is first mentioned among the spoils of the Midianites which were taken when Balaam was slain (Num. xxxi. 22), and *lead* is used to heighten the imagery of Moses' triumphal song (Ex. xv. 10). Whether the ancient Hebrews were acquainted with *steel*, properly so called, is uncertain; the words so rendered in the A. V. (2 Sam. xxii. 35; Job xx. 24; Ps. xviii. 34; Jer. xv. 12) are in all other passages translated *brass*, and would be more correctly *copper*. The "northern iron" of Jer. xv. 12 is believed by commentators to be iron hardened and tempered by some peculiar process, so as more nearly to correspond to what we call steel [STEEL]; and the "flaming torches" of Nah. ii. 3 are probably the flashing steel scythes of the war-chariots which should come against Nineveh. Besides the simple metals, it is supposed that the Hebrews used the mixture of copper and tin known as *bronze*, and probably in all cases in which copper is mentioned as in any way manufactured, bronze is to be understood as the metal indicated. But with regard to the *chashmal* (A. V. "amber") of Ex. i. 4, 27, viii. 2, rendered by the LXX. *ἤλεκτρον*, and the Vulg. *electrum*, by which our translators were misled, there is considerable difficulty. Whatever be the meaning of *chashmal*, for which no satisfactory etymology has been proposed, there can be but little doubt that by *ἤλεκτρον* the LXX. translators intended, not the fossil resin known by that name to the Greeks and to us as "amber," but the metal so called, which consisted of a mixture of four parts of gold with one of silver, described by Pliny (xxxiii. 23) as more brilliant than silver by lamp-light. There is the same difficulty attending the *χαλκολίβανον* (Rev. i. 15, ii. 18, A. V. "fine brass"), which has hitherto successfully resisted all the efforts of commentators, but which is explained by Suidas as a kind of *electron*, more precious than gold. That it was a mixed metal of great brilliancy is extremely probable, but it has hitherto been impossible to identify it. In addition to the metals actually mentioned in the Bible, it has been supposed that *mercury* is alluded to in Num. xxxi. 23, as "the water of separation," being "looked upon as the mother by which all the metals were fructified, purified, and brought forth," and on this account kept secret, and only mysteriously hinted at (Napier, *Metal. of the Bible*, Intr. p. 6). Mr. Napier adds, "there is not the slightest foundation for this supposition."

With the exception of iron, gold is the most widely diffused of all metals. Almost every country in the world has in its turn yielded a certain supply, and as it is found most frequently in alluvial soil

among the debris of rocks washed down by the torrents, it was known at a very early period, and was procured with little difficulty. The existence of gold and the prevalence of gold ornaments in early times are no proof of a high state of civilization, but rather the reverse. Gold was undoubtedly used before the art of working copper or iron was discovered. We have no indications of gold streams or mines in Palestine. The Hebrews obtained their principal supply from the south of Arabia, and the commerce of the Persian Gulf. The ships of Hiram king of Tyre brought it for Solomon (1 K. ix. 11, x. 11), and at a later period, when the Hebrew monarch had equipped a fleet and manned it with Tyrian sailors, the chief of their freight was the gold of Ophir (1 K. ix. 27, 28). It was brought thence in the ships of Tarshish (1 K. xxii. 48), the Indiamen of the ancient world; and Parvaim (2 Chr. iii. 6), Raamah (Ez. xxvii. 22), Sheba (1 K. x. 2, 10; Ps. lxxii. 15; Is. lx. 6; Ez. xxvii. 22), and Uphaz (Jer. x. 9), were other sources of gold for the markets of Palestine and Tyre. It was probably brought in the form of ingots (Josh. vii. 21; A. V. "wedge," lit. "tongue"), and was rapidly converted into articles of ornament and use. Earrings, or rather nose-rings, were made of it, those given to Rebecca were half a shekel (¼ oz.) in weight (Gen. xxiv. 22), bracelets (Gen. xxiv. 22), chains (Gen. xli. 42), signets (Ex. xxxv. 22), *bullae* or spherical ornaments suspended from the neck (Ex. xxxv. 22), and chains for the legs (Num. xxxi. 50; comp. Is. iii. 18; Plin. xxxiii. 12). It was used in embroidery (Ex. xxxix. 3; 2 Sam i. 24; Plin. viii. 74); the decorations and furniture of the tabernacle were enriched with the gold of the ornaments which the Hebrews willingly offered (Ex. xxxv.–xl.); the same precious metal was lavished upon the Temple (1 K. vi., vii); Solomon's throne was overlaid with gold (1 K. x. 18), his drinking-cups and the vessels of the house of the forest of Lebanon were of pure gold (1 K. x. 21), and the neighbouring princes brought him as presents vessels of gold and of silver (1 K. x. 25). So plentiful indeed was the supply of the precious metals during his reign that silver was esteemed of little worth (1 K. x. 21, 27). Gold and silver were devoted to the fashioning of idolatrous images (Ex. xx. 23, xxxii. 4; Deut. xxix. 17; 1 K. xii. 28). The crown on the head of Malcham (A. V. "their king"), the idol of the Ammonites at Rabbah, weighed a talent of gold, that is 125 lbs. troy, a weight so great that it could not have been worn by David among the ordinary insignia of royalty (2 Sam. xii. 30). The great abundance of gold in early times is indicated by its entering into the composition of every article of ornament and almost all of domestic use. Among the spoils of the Midianites taken by the Israelites, in their bloodless victory when Balaam was slain, were ear-rings and jewels to the amount of 16,750 shekels of gold (Num. xxxi. 48-54), equal in value to more than 30,000*l.* of our present money. 1700 shekels of gold (worth more than 3000*l.*) in nose jewels (A. V. "ear-rings") alone were taken by Gideon's army from the slaughtered Midianites (Judg. viii. 26). These numbers, though large, are not incredibly great, when we consider that the country of the Midianites was at that time rich in gold streams which have been since exhausted, and that like the Malays of the present day, and the Peruvians of the time of Pizarro, they carried most of their wealth about them. But the amount of treasure accumulated by David from spoils taken in war, is so enormous, that we are tempted to conclude the numbers exaggerated. From the gold shields of Hadadezer's army of Syrians and other sources he had collected, according to the chronicler (1 Chr. xxii. 14), 100,000 talents of gold, and 1,000,000 talents of silver; to these must be added his own contribution of 3000 talents of gold and 7000 of silver (1 Chr. xxix. 2-4), and the additional offerings of the people. the total value of which, estimating the weight of a talent to be 125 lbs. Troy, gold at 73*s.* per oz., and silver at 4*s.* 4½*d.* per oz., is reckoned by Mr. Napier to be 939,929,687*l.* Some idea of the largeness of this sum may be formed by considering that in 1855 the total amount of gold in use in the world was calculated to be about 820,000,000*l.* Undoubtedly the quantity of the precious metals possessed by the Israelites might be greater in consequence of their commercial intercourse with the Phoenicians who were masters of the sea; but in the time of David they were a nation struggling for political existence, surrounded by powerful enemies, and without the leisure necessary for developing their commercial capabilities. The numbers given by Josephus (*Ant.* vii. 14, §2) are only one-tenth of those in the text, but the sum, even when thus reduced, is still enormous.[a] But though gold was thus common, silver appears to have been the ordinary medium of commerce. The first commercial transaction of which we possess the details was the purchase of Ephron's field by Abraham for 400 shekels of *silver* (Gen. xxiii. 16); slaves were bought with *silver* (Gen. xvii. 12); *silver* was the money paid by Abimelech as a compensation to Abraham (Gen. xx. 16); Joseph was sold to the Ishmaelite merchants for twenty pieces of *silver* (Gen. xxxvii. 28); and generally in the Old Testament, "money" in the A. V. is literally *silver*. The first payment in gold is mentioned in 1 Chr. xxi. 25, where David buys the threshing-floor of Ornan, or Araunah, the Jebusite, for six hundred shekels of *gold* by weight."[b] But in the parallel narrative of the transaction in 2 Sam. xxiv. 24, the price paid for the threshing-floor and the oxen is fifty shekels of silver. An attempt has been made by Keil to reconcile these two passages, by supposing that in the former the purchase referred to was that of the entire hill on which the threshing-floor stood, and in the latter that of the threshing-floor itself. But the close resemblance between the two narratives renders it difficult to accept this explanation, and to imagine that two different circumstances are described. That there is a discrepancy between the numbers in 2 Sam. xxiv. 9 and 1 Chr. xxi. 5 is admitted, and it seems impossible to avoid the conclusion that the present case is but another instance of the same kind. With this one exception there is no case in the O. T. in which gold is alluded to as a medium of commerce; the Hebrew coinage may have been partly gold, but we have no proof of it.

Silver was brought into Palestine in the form of plates from Tarshish, with gold and ivory (1 K. x. 22; 2 Chr. ix. 21; Jer. x. 9). The accumulation of wealth in the reign of Solomon was so great that silver was but little esteemed; "the king made

[a] As an illustration of the enormous wealth which it was possible for one man to collect, we may quote from Herodotus (vii. 28) the instance of Pythius the Lydian, who placed at the disposal of Xerxes, on his way to Greece, 2000 talents of silver, and 3,993,000 gold darics; a sum which in these days would amount to about 5½ millions of pounds sterling

[b] Literally, "shekels of gold, a weight of 600."

silver to be in Jerusalem as stones" (1 K. x. 21, 27). With the treasures which were brought out of Egypt, not only the ornaments but the ordinary metal-work of the tabernacle were made. Silver was employed for the sockets of the boards (Ex. xxvi. 19, xxxvi. 24), and for the hooks of the pillars and their fillets (Ex. xxxviii. 10). The capitals of the pillars were overlaid with it (Ex. xxxviii. 17), the chargers and bowls offered by the princes at the dedication of the tabernacle (Num. vii. 13, &c.), the trumpets for marshalling the host (Num. x. 2), and some of the candlesticks and tables for the Temple were of silver (1 Chr. xxviii. 15, 16). It was used for the setting of gold ornaments (Prov. xxv. 11) and other decorations (Cant. i. 11), and for the pillars of Solomon's gorgeous chariot or palanquin (Cant. iii. 10).

From a comparison of the different amounts of gold and silver collected by David, it appears that the proportion of the former to the latter was 1 to 9 nearly. Three hundred talents of silver and thirty talents of gold were demanded of Hezekiah by Sennacherib (2 K. xviii. 14); but later, when Pharaoh-necho took Jehoahaz prisoner, he imposed upon the land a tribute of 100 talents of silver, and only one talent of gold (2 K. xxiii. 33). The difference in the proportion of gold to silver in these two cases is very remarkable, and does not appear to have been explained.

Brass, or more properly copper, was a native product of Palestine, "a land whose stones are iron, and out of whose hills thou mayest dig *copper*" (Deut. viii. 9; Job xxviii. 2). It was so plentiful in the days of Solomon that the quantity employed in the Temple could not be estimated, it was so great (1 K. vii. 47). Much of the copper which David had prepared for this work was taken from the Syrians after the defeat of Hadadezer (2 Sam. viii. 8), and more was presented by Toi, king of Hamath. The market of Tyre was supplied with vessels of the same metal by the merchants of Javan, Tubal, and Meshech (Ez. xxvii. 13). There is strong reason to believe that brass, a mixture of copper and zinc, was unknown to the ancients. To the latter metal no allusion is found. But tin was well known, and from the difficulty which attends the toughening pure copper so as to render it fit for hammering, it is probable that the mode of deoxidising copper by the admixture of small quantities of tin had been early discovered. "We are inclined to think," says Mr. Napier, "that Moses used no copper vessels for domestic purposes, but bronze, the use of which is less objectionable. Bronze, not being so subject to tarnish, takes on a finer polish, and besides being much more easily melted and cast, would make it to be more extensively used than copper alone. These practical considerations, and the fact of almost all the antique castings and other articles in metal that are preserved from these ancient times being composed of bronze, prove in our opinion that where the word 'brass' occurs in Scripture, except where it refers to an ore, such as Job xxviii. 2 and Deut. viii. 9, it should be translated bronze" (*Metal. of the Bible*, p. 66). Arms (2 Sam. xxi. 16; Job xx. 24; Ps. xviii. 34) and armour (1 Sam. xvii. 5, 6, 38) were made of this metal, which was capable of being so wrought as to admit of a keen and hard edge. The Egyptians employed it in cutting the hardest granite. The Mexicans, before the discovery of iron, "found a substitute in an alloy of tin and copper; and with tools made of this bronze could cut not only metals, but, with the aid of a siliceous dust, the hardest substances, as basalt, porphyry, amethysts, and emeralds" (Prescott, *Conq. of Mexico*, ch. 5). The great skill attained by the Egyptians in working metals at a very early period throws light upon the remarkable facility with which the Israelites, during their wanderings in the desert, elaborated the works of art connected with the structure of the tabernacle, for which great acquaintance with metals was requisite. In the troublous times which followed their entrance into Palestine this knowledge seems to have been lost, for when the Temple was built the metal-workers employed were Phoenicians.

Iron, like copper, was found in the hills of Palestine. The "iron mountain" in the trans-Jordanic region is described by Josephus (*B. J.* iv. 8, §2), and was remarkable for producing a particular kind of palm (Mishna, *Succa*, ed. Dachs, p. 182). Iron mines are still worked by the inhabitants of *Kefr Hûneh* in the S. of the valley *Zahardni*; smelting works are found at *Shemuster*, 3 hours W. of Baalbek, and others in the oak-woods at *Masbek* (Ritter, *Erdkunde*, xvii. 73, 201); but the method employed is the simplest possible, like that of the old Samothracians, and the iron so obtained is chiefly used for horse-shoes.

Tin and lead were both known at a very early period, though there is no distinct trace of them in Palestine. The former was among the spoils of the Midianites (Num. xxxi. 22), who might have obtained it in their intercourse with the Phoenician merchants (comp. Gen. xxxvii. 25, 36), who themselves procured it from Tarshish (Ez. xxvii. 12) and the tin countries of the west. The allusions to it in the Old Testament principally point to its admixture with the ores of the precious metals (Is. i. 25; Ez. xxii. 18, 20). It must have occurred in the composition of bronze: the Assyrian bowls and dishes in the British Museum are found to contain one part of tin to ten of copper. "The tin was probably obtained from Phoenicia, and consequently that used in the bronzes in the British Museum may actually have been exported, nearly three thousand years ago, from the British Isles" (Layard, *Nin. and Bab.* 191).

Antimony (2 K. ix. 30; Jer. iv. 30, A. V "painting"), in the form of powder, was used by the Hebrew women, like the *kohl* of the Arabs, for colouring their eyelids and eyebrows. [PAINT.]

Further information will be found in the articles upon the several metals, and whatever is known of the metallurgy of the Hebrews will be discussed under MINING. [W. A. W.]

METE'RUS (Βαστηρούς). According to the list in 1 Esd. v. 17, "the sons of Meterus" returned with Zorobabel. There is no corresponding name in the lists of Exr. ii. and Neh. vii., nor is it traceable in the Vulgate.

METH'EG-AM'MAH (מֶתֶג הָאַמָּה: τὴν ἀφορισμένην: *Froenum tributi*), a place which David took from the Philistines, apparently in his last war with them (2 Sam. viii. 1). In the parallel passage of the Chronicles (1 Chr. xviii. 1), "Gath and her daughter-towns" is substituted for Metheg ha-Ammah.

The renderings are legion, almost each translator having his own;[a] but the interpretations may be

[a] A large collection of these will be found in Glassii *Philologia Sacra* (lib. iv. tr. 3, obs. 17) together with a singular Jewish tradition bearing upon the point. The

reduced to two:—1. That adopted by Gesenius (*Thesaur.* 113) and Fürst (*Handwb.* 102 *b*), in which Ammah is taken as meaning "mother-city" or "metropolis" (comp. 2 Sam. xx. 19), and Metheg-ha-Ammah "the bridle of the mother-city"—viz. of Gath, the chief town of the Philistines. If this is correct, the expression "daughter-towns" in the corresponding passage of Chronicles is a closer parallel, and more characteristic, than it appears at first sight to be. 2. That of Ewald (*Gesch.* iii. 190), who, taking Ammah as meaning the "forearm," treats the words as a metaphor to express the perfect manner in which David had smitten and humbled his foes, had torn the bridle from their arm, and thus broken for ever the dominion with which they curbed Israel, as a rider manages his horse by the rein held fast on his arm.

The former of these two has the support of the parallel passage in Chronicles; and it is no valid objection to it to say, as Ewald in his note to the above passage does, that Gath cannot be referred to, because it had its own king still in the days of Solomon, for the king in Solomon's time may have been, and probably was, tributary to Israel, as the kings "on this side the Euphrates" (1 K. iv. 24) were. On the other hand, it is an obvious objection to Ewald's interpretation that to control his horse a rider must hold the bridle not on his arm but fast in his hand. [G.]

METHU'SAEL (מְתוּשָׁאֵל, "man of God:" Μαθουσάλα: *Mathusael*), the son of Mehujael, fourth in descent from Cain, and father of Lamech (Gen. iv. 18). [A. B.]

METHU'SELAH (מְתוּשֶׁלַח, "man of offspring," or possibly "man of a dart:"[a] Μαθουσάλα: *Mathusala*), the son of Enoch, sixth in descent from Seth, and father of Lamech. The resemblance of the name to the preceding, on which (with the coincidence of the name Lamech in the next generation in both lines) some theories have been formed, seems to be apparent rather than real. The life of Methuselah is fixed by Gen. v. 27 at 969 years, a period exceeding that of any other patriarch, and, according to the Hebrew chronology, bringing his death down to the very year of the Flood. The LXX. reckoning makes him die six years before it; and the Samaritan, although shortening his life to 720 years, gives the same result as the Hebrew. [CHRONOLOGY.] On the subject of Longevity, see PATRIARCHS. [A. B.]

MEU'NIM (מְעוּנִים, Μεσενώμ; Alex. Μεεινωμ: *Munim*), Neh. vii. 52. Elsewhere given in A. V. as MEHUNIM and MEHUNIMS.

ME'ZAHAB (מֵי זָהָב: Μαζοάβ; Alex. Μεζοάβ in Gen., omitted in 1 Chr.: *Mezaab*). The father of Matred and grandfather of Mehetabel, was wife of Hadar or Hadad, the last named king of Edom (Gen. xxxvi. 39; 1 Chr. i. 50). His name, which, if it be Hebrew, signifies "waters of gold," has given rise to much speculation. Jarchi renders it, "what is gold?" and explains it, "he was a rich man, and gold was not valued in his eyes at all." Abarbanel says he was "rich and great, so that on this account he was called Mezahab, for the gold was in his house as water." "Haggaon" (writes Aben Ezra) "said he was a refiner of gold, but others said that it pointed to those who make gold from brass." The Jerusalem Targum of course could not resist the temptation of punning upon the name, and combined the explanations given by Jarchi and Haggaon. The latter part of Gen. xxxvi. 39 is thus rendered: "the name of his wife was Mehetabel, daughter of Matred, the daughter of a refiner of gold, who was wearied with labour (מַמְרְדָא, *matredâ*) all the days of his life; after he had eaten and was filled, he turned and said, what is gold? and what is silver?" A somewhat similar paraphrase is given in the Targum of the Pseudo-Jonathan, except that it is there referred to Matred, and not to Mezahab. The Arabic Version translates the name "water of gold," which must have been from the Hebrew, while in the Targum of Onkelos it is rendered "a refiner of gold," as in the *Questiones Hebraicae in Paralip.*, attributed to Jerome, and the traditions given above; which seems to indicate that originally there was something in the Hebrew text, now wanting, which gave rise to this rendering, and of which the present reading, מִי, *mî*, is an abbreviation. [W. A. W.]

MI'AMIN (מִיָּמִן: Μεαμίν; Alex. Μεαμίς: *Miamin*). 1. A layman of Israel of the sons of Parosh, who had married a foreign wife and put her away at the bidding of Ezra (Ezr. x. 25). He is called MAELUS in 1 Esd. ix. 26.

2. (Omitted in Vat. MS.; Alex. Μελμίν: *Mermin*). A priest or family of priests who went up from Babylon with Zerubbabel (Neh. xii. 5); probably the same as MIJAMIN in Neh. x. 7. In Neh. xii. 17 the name appears in the form MINIAMIN.

MIB'HAR (מִבְחָר: Μεβαδλ; Alex. Μαβδρ *Mibahar*). "Mibhar the son of Haggeri" is the name of one of David's heroes in the list given in 1 Chr. xi. The verse (38) in which it occurs appears to be corrupt, for in the corresponding catalogue of 2 Sam. xxiii. 36 we find, instead of "Mibhar the son of Haggeri," "of Zobah, Bani the Gadite." It is easy to see, if the latter be the true reading, how בְּנִי הַגָּדִי, *Bani haggadi*, could be corrupted into בֶּן־הַגְּדֹרִי, *ben-haggeri*; and הגדי is actually the reading of three of Kennicott's MSS. in 1 Chr., as well as of the Syriac and Arab. versions, and the

most singular rendering, perhaps, is that of Aquila. χαλινὸς τοῦ ὑδραγωγίου, "the bridle of the aqueduct," perhaps with some reference to the irrigation of the rich district in which Gath was situated. Aqueduct is derived from the Chaldee version, אַמְתָּא, which has that signification amongst others. Aquila adopts a similar rendering in the case of the hill AMMAH.

[a] There is some difficulty about the derivation of this name. The latter portion of the root is certainly שָׁלַח, from שָׁלַח, "to send"), used for a "missile" in 2 Chr. xxxii. 5, Joel ii. 8, and for a "branch" in Cant. iv. 13, Is xvi. 8. The former portion is derived by many of the older Hebraists from מוּת, "to die," and various interpretations given accordingly. See in Leusden's *Onomasticon*, "mortem suam misit," "mortis suae arma," &c. Others make it, "he dies, and it [*i. e.* the Flood] is sent," supposing it either a name given afterwards from the event, or one given in prophetic foresight by Enoch. The later Hebraists (see Gen. *Lex.*) derive it from מְתִי, the constructive form of מָת, "man," the obsolete singular, of which the plural מְתִים is found. This gives one or other of the interpretations in the text. We can only decide between them (if at all) by internal probability, which seems to incline to the former.

Targum of R. Joseph. But that "Mibhar" is a corruption of מִצֹּבָא (or מִצֹּבָה, acc. to some MSS.), *mitstsōbhā*, "of Zobah," as Kennicott (*Dissert.* p. 215) and Cappellus (*Crit. Sacr.* i. c. 5) conclude, is not so clear, though not absolutely impossible. It would seem from the LXX. of 2 Sam., where instead of "of Zobah" we find τολυδυνάμεως, that both readings originally co-existed, and were read by the LXX. מִבְּחַר הַצֹּבֶא, *mibchar hatstsōbhā*, "choice of the host." If this were the case, the verse in 1 Chr. would stand thus: "Igal the brother of Nathan, flower of the host; Bani the Gadite." [W. A. W.]

MIB'SAM (מִבְשָׂם, "sweet odour," Ges.: Μασσάμ: *Mabsam*). 1. A son of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), not elsewhere mentioned. The signification of his name has led some to propose an identification of the tribe sprung from him with some one of the Abrahamic tribes settled in Arabia aromatifera, and a connexion with the *balsam* of Arabia is suggested (Bunsen, *Bibelwerk*; Kalisch, *Gen.* 483). The situation of Mekkeh is well adapted for his settlements, surrounded as it is by traces of other Ishmaelite tribes; nevertheless the identification seems fanciful and far-fetched.

2. A son of Simeon (1 Chr. iv. 25), perhaps named after the Ishmaelite Mibsam, for one of his brothers was named MISHMA, as was one of those of the older Mibsam. [E. S. P.]

MIB'ZAR (מִבְצָר: Μαζάρ in Gen.; Βαβσαρ; Alex. Μαβσάρ in 1 Chr.: *Mabsar*). One of the phylarchs or "dukes" of Edom (1 Chr. i. 53) or Esau (Gen. xxxvi. 42) after the death of Hadad or Hadar. They are said to be enumerated "according to their settlements in the land of their possession;" and Knobel (*Genesis*), understanding Mibzar (lit. "fortress") as the name of a place, has attempted to identify it with the rocky fastness of Petra, "the strong city" (עִיר מִבְצָר, *'ir mibtsar* Ps. cviii. 11; comp. Ps. lx. 11), "the cliff," the chasms of which were the chief stronghold of the Edomites (Jer. xlix. 16; Obad. 3). [W. A. W.]

MIC'AH (מִיכָה, but in vers. 1 and 4, מִיכָיְהוּ, *i. e.* Micâyehu: Μιχαίας, but once Μειχαίας; Alex. Μεσχα, but once Μιχα: *Michas, Micha*), an Ephraimite whose familiar story is preserved in the xviith and xviiith chapters of Judges. That it is so preserved would seem to be owing to Micah's accidental connexion with the colony of Danites who left the original seat of their tribe to conquer and found a new Dan at Laish—a most happy accident, for it has been the means of furnishing us with a picture of the "interior" of a private Israelite family of the rural districts, which in many respects stands quite alone in the sacred records, and has probably no parallel in any literature of equal age.

But apart from this the narrative has several points of special interest to students of biblical history in the information which it affords as to the condition of the nation, of the members of which Micah was probably an average specimen.

We see (1.) how completely some of the most solemn and characteristic enactments of the Law had become a dead letter. Micah was evidently a devout believer in Jehovah. While the Danites in their communications use the general term *Elohim*, "God" ("ask counsel of God," xviii. 5; "God hath given it into your hands," ver. 10), with Micah and his household the case is quite different. His one anxiety is to enjoy the favour of Jehovah[a] (xvii. 13); the formula of blessing used by his mother and his priest invokes the same awful name (xvii. 2, xviii. 6); and yet so completely ignorant is he of the Law of Jehovah, that the mode which he adopts of honouring Him is to make a molten and a graven image, teraphim or images of domestic gods, and to set up an unauthorised priesthood, first in his own family (xvii. 5), and then in the person of a Levite not of the priestly line (ver. 12)—thus disobeying, in the most flagrant manner, the second of the Ten Commandments, and the provisions for the priesthood—both laws which lay in a peculiar manner at the root of the religious existence of the nation. Gideon (viii. 27) had established an ephod; but here was a whole chapel of idols, a "house of gods" (xvii. 5), and all dedicated to Jehovah.

(2.) The story also throws a light on the condition of the Levites. They were indeed "divided in Jacob and scattered in Israel" in a more literal sense than that prediction is usually taken to contain. Here we have a Levite belonging to Bethlehem-judah, a town not allotted to the Levites, and with which they had, as far as we know, no connexion; next wandering forth, with the world before him, to take up his abode wherever he could find a residence; then undertaking, without hesitation, and for a mere pittance, the charge of Micah's idol-chapel; and lastly, carrying off the property of his master and benefactor, and becoming the first priest to another system of false worship, one too in which Jehovah had no part, and which ultimately bore an important share in the disruption of the two kingdoms.[b]

But the transaction becomes still more remarkable when we consider (3.) that this was no obscure or ordinary Levite. He belonged to the chief family in the tribe, nay, we may say to the chief family of the nation, for though not himself a priest, he was closely allied to the priestly house, and was the grandson of no less a person than the great Moses himself. For the "Manasseh" in xviii. 30 is nothing else than an alteration of "Moses," to shield that venerable name from the discredit which such a descendant would cast upon it. [MANASSEH No. 4; p. 234 *b*.] In this fact we possibly have the explanation of the much-debated passage, xviii. 3: "they knew the voice[c] of the young man the Levite." The grandson of the Lawgiver was not unlikely to be personally known to the Danites; when they heard his voice (whether in casual speech or in loud devotion we are not told) they recognized it, and their inquiries as to who brought

[a] One of a thousand cases in which the point of the sentence is lost by the translation of "Jehovah" by "the Lord."

[b] It does not seem at all clear that the words "molten image" and "graven image" accurately express the original words *Pesel* and *Massecah*. [IDOL, vol. i. 851 *b*.] As the Hebrew text now stands, the "graven image" only was carried off to Laish, and the "molten" one remained behind with Micah (xviii. 20, 30; comp. 18). True the LXX. add the molten image in ver. 20, but in ver. 30 they agree with the Hebrew text.

[c] קוֹל = voice. The explanation of J. D. Michaelis (*Bibl für Ungelehrten*) is that they remarked that he did not speak with the accent of the Ephraimites. But Gesenius rejects this notion as repugnant alike to "the expression and the connexion," and adopts the explanation given above (*Gesch. der hebr. Sprache*, §15 2, p. 55).

him hither, what he did there, and what he had there, were in this case the eager questions of old acquaintances long separated.

(4.) The narrative gives us a most vivid idea of the terrible anarchy in which the country was placed, when "there was no king in Israel, and every man did what was right in his own eyes," and shows how urgently necessary a central authority had become. A body of six hundred men completely armed, besides the train of their families and cattle, traverses the length and breadth of the land, not on any mission for the ruler or the nation, as on latter occasions (2 Sam. ii. 12, &c., xx. 7, 14), but simply for their private ends. Entirely disregarding the rights of private property, they burst in wherever they please along their route, and plundering the valuables and carrying off persons, reply to all remonstances by taunts and threats. The Turkish rule, to which the same district has now the misfortune to be subjected, can hardly be worse.

At the same time it is startling to our Western minds—accustomed to associate the blessings of order with religion—to observe how religious were these lawless freebooters:—"Do ye know that in these houses there is an ephod, and teraphim, and a graven image, and a molten image? Now therefore consider what ye have to do" (xviii. 14). "Hold thy peace, and go with us, and be to us a father and a priest" (Ib. 19).

As to the date of these interesting events, the narrative gives us no direct information beyond the fact that it was before the beginning of the monarchy; but we may at least infer that it was also before the time of Samson, because in this narrative (xviii. 12) we meet with the origin of the name of Mahaneh-dan, a place which already bore that name in Samson's childhood (xiii. 25, where it is translated in the A. V. "the camp of Dan"). That the Danites had opponents to their establishment in their proper territory before the Philistines enter the field is evident from Judg. i. 34. Josephus entirely omits the story of Micah, but he places the narrative of the Levite and his concubine, and the destruction of Gibeah (chaps. xix. xx. xxi.)—a document generally recognized as part of the same[d] with the story of Micah, and that document by a different hand to the previous portions of the book—at the very beginning of his account of the period of the Judges, before Deborah or even Ehud. (See *Ant.* v. 2, §8-12.) The writer is not aware that this arrangement has been found in any MS. of the Hebrew or LXX. text of the book of Judges; but the fact of its existence in Josephus has a certain weight, especially considering the accuracy of that writer when his interests or prejudices are not concerned; and it is supported by the mention of Phinehas the grandson of Aaron in xx. 28. An argument against the date being before the time of Deborah is drawn by Bertheau (p. 197) from the fact that at that time the north of Palestine was in the possession of the Canaanites—"Jabin king of Canaan, who reigned in Hazor," in the immediate neighbourhood of Laish. The records of the southern Dan are too scanty to permit of our fixing the date from the statement that the Danites had not yet entered on their[e] allotment—that is to say the allotment specified in Josh. xix. 40-48. But that statement strengthens the conclusion arrived at from other passages, that these lists in Joshua contain the towns *allotted* but not therefore necessarily *possessed* by the various tribes. "Divide the land first, in confidence, and then possess it afterwards," seems to be the principle implied in such passages as Josh. xiii. 7 (comp. 1); xix. 49, 51 (LXX. "so they went to take possession of the land").

The date of the record itself may perhaps be more nearly arrived at. That, on the one hand, it was after the beginning of the monarchy is evident from the references to the ante-monarchical times (xviii. 1, xix. 1, xxi. 25); and, on the other hand, we may perhaps infer from the name of Bethlehem being given as "Bethlehem-Judah,"—that it was before the fame of David had conferred on it a notoriety which would render any such addition unnecessary. The reference to the establishment of the house of God in Shiloh (xviii. 31) seems also to point to the early part of Saul's reign, before the incursions of the Philistines had made it necessary to remove the Tabernacle and Ephod to Nob in the vicinity of Gibeah, Saul's head-quarters. [G.]

MI'CAH (מִיכָה, מִיכָיָה,[a] Cethib, Jer. xxvi. 18; Μιχαίας: *Michaeas*). The sixth in order of the minor prophets, according to the arrangement in our present canon; in the LXX. he is placed third, after Hosea and Amos. To distinguish him from Micaiah the son of Imlah, the contemporary of Elijah, he is called the MORASHTITE, that is a native of Moresheth, or some place of similar name, which Jerome and Eusebius call Morasthi, and identify with a small village near Eleutheropolis to the east, where formerly the prophet's tomb was shown, but which in the days of Jerome had been succeeded by a church (*Epit. Paulae*, c. 6). As little is known of the circumstances of Micah's life as of many of the other prophets. Pseudo-Epiphanius (*Op.* ii. p. 245) makes him, contrary to all probability, of the tribe of Ephraim; and besides confounding him with Micaiah the son of Imlah, who lived more than a century before, he betrays additional ignorance in describing Ahab as king of Judah. For rebuking this monarch's son and successor Jehoram for his impieties, Micah, according to the same authority, was thrown from a precipice, and buried at Morathi in his own country, hard by the cemetery of Enakim (Ἐνακείμ, a place which apparently exists only in the LXX. of Mic. i. 10), where his sepulchre was still to be seen. The Chronicon Paschale (p. 148 *c*) tells the same tale. Another ecclesiastical tradition relates that the remains of Habakkuk and Micah were revealed in a vision to Zebennus bishop of Eleutheropolis, in the reign of Theodosius the Great, near a place called Berathsatis, which is apparently a corruption of Morasthi (Sozomen, *H. E.* vii. 29; Nicephorus, *H. E.* xii. 48). The prophet's tomb was called by the inhabitants *Nephsameemana*, which Sozomen renders *μνῆμα πιστόν*.

The period during which Micah exercised the prophetical office is stated, in the superscription,

[d] The proofs of this are given by Bertheau in his Commentary on the Book in the *Kurzgef. Exeg. Handb.* (iii. §2; p. 192).

[e] xviii. 1. It will be observed that the words "all their" are interpolated by our translators.

[a] The full form of the name is מִיכָיָהוּ, *Michâyâh*, "who is like Jehovah," which is found in 2 Chr. xxxiv. 8; xvii. 7. This is abbreviated to מִיכָיְהוּ, *Michâyehû*, in Judg. xvii 1, 4; still further to מִיכָיְהוּ, *Michâyehû* (Jer. xxxvi. 11), מִיכָיָה, *Michâyâh* (1 K. xxii. 13); and finally to מִיכָה, *Michâh*, or מִיכָא, *Micâ* (2 Sam. ix. 12).

his prophecies, to have extended over the reigns of Jotham, Ahaz, and Hezekiah, kings of Judah, giving thus a maximum limit of 59 years (B.C. 756-697), from the accession of Jotham to the death of Hezekiah, and a minimum limit of 16 years (B.C. 742-726), from the death of Jotham to the accession of Hezekiah. In either case he would be contemporary with Hosea and Amos during part of their ministry in Israel, and with Isaiah in Judah. According to Rabbinical tradition he transmitted to the prophets Joel, Nahum, and Habakkuk, and to Zeniah the priest, the mysteries of the Kabbala, which he had received from Isaiah (R. David Ganz, *Tzemach David*), and by Syncellus (*Chronogr.* p. 199 c) he is enumerated in the reign of Jotham as contemporary with Hosea, Joel, Isaiah, and Oded. With respect to one of his prophecies (iii. 12) it is distinctly assigned to the reign of Hezekiah (Jer. xxvi. 18), and was probably delivered before the great passover which inaugurated the reformation in Judah. The date of the others must be determined, if at all, by internal evidence, and the periods to which they are assigned are therefore necessarily conjectural. Reasons will be given hereafter for considering that none are later than the sixth year of Hezekiah. Bertholdt, indeed, positively denies that any of the prophecies can be referred to the reign of Hezekiah, and assigns the two earlier of the four portions into which he divides the book to the time of Ahaz, and the two later to that of Manasseh (*Einleitung*, §411), because the idolatry which prevailed in their reigns is therein denounced. But in the face of the superscription, the genuineness of which there is no reason to question, and of the allusion in Jer. xxvi. 18, Bertholdt's conjecture cannot be allowed to have much weight. The time assigned to the prophecies by the only direct evidence which we possess, agrees so well with their contents that it may fairly be accepted as correct. Why any discrepancy should be perceived between the statement in Jeremiah, that "Micah the Morasthite prophesied in the days of Hezekiah king of Judah," and the title of his book which tells us that the word of the Lord came to him "in the days of Jotham, Ahaz, and Hezekiah," it is difficult to imagine. The former does not limit the period of Micah's prophecy, and at most applies only to the passage to which direct allusion is made. A confusion appears to have existed in the minds of those who see in the prophecy in its present form a connected whole, between the actual delivery of the several portions of it, and their collection and transcription into one book. In the case of Jeremiah we know that he dictated to Baruch the prophecies which he had delivered in the interval between the 13th year of Josiah and the 4th of Jehoiakim, and that when thus committed to writing they were read before the people on the fast day (Jer. xxxvi. 2, 4, 6). There is reason to believe that a similar process took place with the prophecies of Amos. It is, therefore, conceivable, to say the least, that certain portions of Micah's prophecy may have been uttered in the reigns of Jotham and Ahaz, and for the probability of this there is strong internal evidence, while they were collected as a whole in the reign of Hezekiah and committed to writing. Caspari (*Micha*, p. 78) suggests that the book thus written may have been read in the presence of the king and the whole people, on some great fast or festival day, and that this circumstance may have been in the minds of the elders of the land in the time of Jehoiakim, when they appealed to the impunity which Micah enjoyed under Hezekiah.[b] It is evident from Mic. i. 6, that the section of the prophecy in which that verse occurs must have been delivered before the destruction of Samaria by Shalmaneser, which took place in the 6th year of Hezekiah (cir. B.C. 722), and connecting the "high-places" mentioned in i. 5 with those which existed in Judah in the reigns of Ahaz (2 K. xvi. 4; 2 Chr. xxviii. 4, 25), and Jotham (2 K. xv. 35), we may be justified in assigning ch. i. to the time of one of these monarchs, probably the latter; although, if ch. ii. be considered as part of the section to which ch. i. belongs, the utter corruption and demoralisation of the people there depicted agree better with what history tells us of the times of Ahaz. Caspari maintains that of the two parallel passages, Mic. iv. 1-5, Is. ii. 2-5, the former is the original and the latter belongs to the times of Uzziah and Jotham.[c] The denunciation of the horses and chariots of Judah (v. 10) is appropriate to the state of the country under Jotham, after the long and prosperous reign of Uzziah, by whom the military strength of the people had been greatly developed (2 Chr. xxvi. 11-15, xxvii. 4-6). Compare Is. ii. 7, which belongs to the same period. Again, the forms in which idolatry manifested itself in the reign of Ahaz correspond with those which are threatened with destruction in Mic. v. 12-14, and the allusions in vi. 16 to the "statutes of Omri," and the "works of the house of Ahab" seem directly pointed at the king, of whom it is expressly said that "he walked in the way of the kings of Israel" (2 K. xvi. 3). It is impossible in dealing with internal evidence to assert positively that the inferences deduced from it are correct; but in the present instance they at least establish a probability, that in placing the period of Micah's prophetical activity between the times of Jotham and Hezekiah the superscription is correct. In the first years of Hezekiah's reign the idolatry which prevailed in the time of Ahaz was not eradicated, and in assigning the date of Micah's prophecy to this period there is no anachronism in the allusions to idolatrous practices. Maurer contends that ch. i. was written not long before the taking of Samaria, but the 3rd and following chapters he places in the interval between the destruction of Samaria and the time that Jerusalem was menaced by the army of Sennacherib in the 14th year of Hezekiah. But the passages which he quotes in support of his conclusion (iii. 12, iv. 9, &c., v 5, &c., vi. 9, &c., vii. 4, 12, &c.) do not appear to be more suitable to that period than to the first years of Hezekiah, while the context in many cases requires a still earlier date. In the arrangement adopted by Wells (pref. to Micah, § iv.—vi.) ch. i. was delivered in the contemporary reigns of Jotham king of Judah and of Pekah king of Israel; ii. 1—iv. 8 in those of Ahaz, Pekah, and Hosea; iii. 12 being assigned to the last year of Ahaz, and the remainder of the book to the reign of Hezekiah.

But, at whatever time the several prophecies were first delivered, they appear in their present

[b] Knobel (*Prophetismus*, ii. 320) imagines that the prophecies which remain belong to the time of Hezekiah, and that those delivered under Jotham and Ahaz have perished.

[c] Mic. iv. 1-4 may possibly, as Ewald and others have suggested, be a portion of an older prophecy current at the time, which was adopted both by Micah and Isaiah (Is. ii. 2-4).

form as an organic whole, marked by a certain regularity of development. Three sections, omitting the superscription, are introduced by the same phrase, שִׁמְעוּ "hear ye," and represent three natural divisions of the prophecy — i., ii., iii.-v., vi.-vii. — each commencing with rebukes and threatenings and closing with a promise. The first section opens with a magnificent description of the coming of Jehovah to judgment for the sins and idolatries of Israel and Judah (i. 2-4), and the sentence pronounced upon Samaria (5-9) by the Judge Himself. The prophet, whose sympathies are strong with Judah, and especially with the owlands which gave him birth, sees the danger which threatens his country, and traces in imagination the devastating march of the Assyrian conquerors from Samaria onward to Jerusalem and the south (i. 8-16). The impending punishment suggests its cause, and the prophet denounces a woe upon the people generally for the corruption and violence which were rife among them, and upon the false prophets who led them astray by pandering to their appetites and luxury (ii. 1-11). The sentence of captivity is passed upon them (10) but is followed instantly by a promise of restoration and triumphant return (ii. 12, 13). The second section is addressed especially to the princes and heads of the people, their avarice and rapacity are rebuked in strong terms, and as they have been deaf to the cry of the suppliants for justice, they too "shall cry unto Jehovah, but He will not hear them" (iii. 1-4). The false prophets who had deceived others should themselves be deceived: "the sun shall go down over the prophets, and the day shall be dark over them" (iii. 6). For this perversion of justice and right, and the covetousness of the heads of the people who judged for reward, of the priests who taught for hire, and of the prophets who divined for money, Zion should "be ploughed as a field," and the mountain of the temple become like the uncultivated woodland heights (iii. 9-12). But the threatening is again succeeded by a promise of restoration, and in the glories of the Messianic kingdom the prophet loses sight of the desolation which should befal his country. Instead of the temple mountain covered with the wild growth of the forest, he sees the mountain of the house of Jehovah established on the top of the mountains, and nations flowing like rivers unto it. The reign of peace is inaugurated by the recal from captivity, and Jehovah sits as king in Zion, having destroyed the nations who had rejoiced in her overthrow. The predictions in this section form the climax of the book, and Ewald arranges them in four strophes, consisting of from seven to eight verses each (iv. 1-8, iv. 9-v. 2, v. 3-9, v. 10-15), with the exception of the last, which is shorter, and in which the prophet reverts to the point whence he started: all objects of politic and idolatrous confidence must be removed before the grand consummation. In the last section (vi. vii.) Jehovah, by a bold poetical figure, is represented as holding a controversy with His people, pleading with them in justification of His conduct towards them and the reasonableness of His requirements. The dialogue form in which chap. vi. is cast renders the picture very dramatic and striking. In vi. 3-5 Jehovah speaks; the inquiry of the people follows in ver. 6, indicating their entire ignorance of what was required of them; their inquiry is met by the almost impatient rejoinder, "Will Jehovah be pleased with thousands of rams, with myriads of torrents of oil?" The still greater sacrifice suggested by the people, "Shall I give my firstborn for my transgression?" calls forth the definition of their true duty, "to do justly, and to love mercy, and to walk humbly with their God." How far they had fallen short of this requirement is shown in what follows (9-12), and judgment is pronounced upon them (13-16). The prophet acknowledges and bewails the justice of the sentence (vii. 1-6), the people in repentance patiently look to God, confident that their prayer will be heard (7-10), and are reassured by the promise of deliverance announced as following their punishment (11-13) by the prophet, who in his turn presents his petition to Jehovah for the restoration of His people (14, 15). The whole concludes with a triumphal song of joy at the great deliverance, like that from Egypt, which Jehovah will achieve, and a full acknowledgment of His mercy and faithfulness to His promises (16-20). The last verse is reproduced in the song of Zacharias (Luke i. 72, 73).[d]

The predictions uttered by Micah relate to the invasions of Shalmaneser (i. 6-8; 2 K. xvii. 4, 6) and Sennacherib (i. 9-16; 2 K. xviii. 13), the destruction of Jerusalem (iii. 12, vii. 13), the captivity in Babylon (iv. 10), the return (iv. 1-8, vv. 11), the establishment of a theocratic kingdom in Jerusalem (iv. 8), and the Ruler who should spring from Bethlehem (v. 2). The destruction of Assyria and Babylon is supposed to be referred to in v. 5, 6, vii. 8, 10. It is remarkable that the prophecy commence with the last words recorded of the prophet's namesake, Micaiah the son of Imlah: "Hearken, O people, every one of you" (1 K. xxii 28). From this, Bleek (*Einleitung*, p. 539) concludes that the author of the history, like the ecclesiastical historians, confounded Micah the Moraschite with Micaiah; while Hengstenberg (*Christology*, iii. 409, Eng. tr.) infers that the coincidence was intentional on the part of the later prophet, and that "by this very circumstance he gives intimation of what may be expected from him, shows that his activity is to be considered as a continuation of that of his predecessor, who was so jealous for God, and that he had more in common with him than the mere name." Either conclusion rests on the extremely slight foundation of the occurrence of a formula which was at once the most simple and most natural commencement of a prophetic discourse.

The style of Micah has been compared with that of Hosea and Isaiah. The similarity of their subject may account for many resemblances in language with the latter prophet, which were almost unavoidable (comp. Mic. i. 2 with Is. i. 2; Mic. ii. 3 with Is. v. 8; Mic. ii. 6, 11 with Is. xxx. 10; Mic. ii. 12 with Is. x. 20-22; Mic. vi. 6-8 with Is. i. 11-17). The diction of Micah is vigorous and forcible, sometimes obscure from the abruptness of its transitions, but varied and rich in figures derived from the pastoral (i. 8, ii. 12, v. 4, 5, 7, 8, vii. 14) and rural life of the lowland country (i. 6, iii. 12, iv. 3, 12, 13, vi. 15), whose vines and olives and fig-trees were celebrated (1 Chr. xxvii. 27, 28), and supply the prophet with so many striking allusions

[d] Ewald now maintains that Mic. vi. vii. is by another hand; probably written in the course of the 7th cent. B.C., and that v. 9-16 is the original conclusion of Micah's prophecy (*Jahrb.* vi. p. 29).

i. 6, iv. 3, 4, vi. 15, vii. 1, 4) as to suggest that, like Amos, he may have been either a herdsman or a vine-dresser, who had heard the howling of the jackals (i. 8, A. V. "dragons") as he watched his flocks or his vines by night, and had seen the lions slaughtering the sheep (v. 8). One peculiarity which he has in common with Isaiah is the frequent use of paronomasia; in i. 10-15 there is a succession of instances of this figure in the plays upon words suggested by the various places enumerated (comp. also ii. 4), which it is impossible to transfer to English, though Ewald has attempted to render them into German (*Propheten des A. B.* i. 329, 330). The poetic vigour of the opening scene and of the dramatic dialogue sustained throughout the last two chapters has already been noticed.

The language of Micah is quoted in Matt. ii. 5, 6, and his prophecies alluded to in Matt. x. 35, 36; Mark xiii. 12; Luke xii. 53; John vii. 42.

2. (Μιχά: *Micha*). A descendant of Joel the Reubenite [JOEL, 5], and ancestor of Beerah, who was prince of his tribe at the time of the captivity of the northern kingdom (1 Chr. v. 5).

3. The son of Merib-baal, or Mephibosheth, the son of Jonathan (1 Chr. viii. 34, 35, ix. 40, 41). In 2 Sam. ix. 12 he is called MICHA.

4. A Kohathite Levite, eldest son of Uzziel the brother of Amram, and therefore cousin to Moses and Aaron (1 Chr. xxiii. 20). In Ex. vi. 22 neither Micah nor his brother Jesiah, or Isshiah, appears among the sons of Uzziel, who are there said to be Mishael, Elzaphan, and Zithri. In the A. V. of 1 Chr. xxiv. 24, 25, the names of the two brothers are written MICHAH and ISSHIAH, though the Hebrew forms are the same as in the preceding chapter. This would seem to indicate that chaps. xxiii., xxiv., were translated by different hands.

5. (Μιχαΐα). The father of Abdon, a man of high station in the reign of Josiah. In 2 K. xxii. 12 he is called "MICHAIAH the father of Achbor." [W. A. W.]

MICAI'AH (מִיכָיְהוּ: Μιχαΐας: *Michaeas*). There are seven persons of this name in the O.T. besides Micah the Levite, to whom the name is twice given in the Hebrew (Judg. xvii. 1, 4); Micah and Micaiah meaning the same thing, "Who like Jehovah?" In the A. V. however, with the one exception following, the name is given as MICHAIAH.

The son of Imlah, a prophet of Samaria, who, in the last year of the reign of Ahab, king of Israel, predicted his defeat and death, B.C. 897. The circumstances were as follows:—Three years after the great battle with Benhadad, king of Syria, in which the extraordinary number of 100,000 Syrian soldiers is said to have been slain, without reckoning the 27,000, who, it is asserted, were killed by the falling of the wall at Aphek, Ahab proposed to Jehoshaphat king of Judah that they should jointly go up to battle against Ramoth Gilead; which Benhadad was, apparently, bound by treaty to restore to Ahab. Jehoshaphat, whose son Jehoram had married Athaliah, Ahab's daughter, assented in cordial words to the proposal; but suggested that they should first "enquire at the word of Jehovah." Accordingly, Ahab assembled 400 prophets, while, in an open space at the gate of the city of Samaria, he and Jehoshaphat sat in royal state to meet and consult them. The prophets unanimously gave a favourable response; and among them, Zedekiah the son of Chenaanah, made horns of iron as a symbol, and announced, from Jehovah, that with those horns Ahab would push the Syrians till he consumed them. For some reason which is unexplained, and can now only be conjectured, Jehoshaphat was dissatisfied with the answer, and asked if there was no other prophet of Jehovah, at Samaria? Ahab replied that there was yet one—Micaiah, the son of Imlah; but, in words which obviously call to mind a passage in the *Iliad* (i. 106), he added, "I hate him, for he does not prophecy good concerning me, but evil." Micaiah was, nevertheless, sent for; and after an attempt had in vain been made to tamper with him, he first expressed an ironical concurrence with the 400 prophets, and then openly foretold the defeat of Ahab's army and the death of Ahab himself. And in opposition to the other prophets, he said, that he had seen Jehovah sitting on His throne, and all the host of Heaven standing by Him, on His right hand and on His left: that Jehovah said, Who shall persuade Ahab to go up and fall at Ramoth Gilead; that a Spirit[a] came forth and said that he would do so; and on being asked, Wherewith? he answered, that he would go forth and be a lying spirit in the mouth of all the prophets. Irritated by the account of this vision, Zedekiah struck Micaiah on the cheek, and Ahab ordered Micaiah to be taken to prison, and fed on bread and water, till his return to Samaria. Ahab then went up with his army to Ramoth Gilead; and in the battle which ensued, Benhadad, who could not have failed to become acquainted with Micaiah's prophecy, uttered so publicly, which had even led to an act of public, personal, violence on the part of Zedekiah, gave special orders to direct the attack against Ahab, individually. Ahab, on the other hand, requested Jehoshaphat to wear his royal robes, which we know that the king of Judah had brought with him to Samaria (1 K. xxii. 10); and then he put himself into disguise for the battle; hoping thus, probably, to baffle the designs of Benhadad, and the prediction of Micaiah—but he was, nevertheless, struck and mortally wounded in the combat by a random arrow. See 1 K. xxii. 1-35; and 2 Chr. xviii.—the two accounts in which are nearly word for word the same.

Josephus dwells emphatically on the death of Ahab, as showing the utility of prophecy, and the impossibility of escaping destiny, even when it is revealed beforehand (*Ant.* viii. 15, §6). He says that it steals on human souls, flattering them with cheerful hopes, till it leads them round to the point whence it will gain the mastery over them. This was a theme familiar to the Greeks in many tragic tales, and Josephus uses words in unison with their ideas. (See Euripides, *Hippolyt.* 1256, and compare Herodot. vii. 17, viii. 77, i. 91.) From his interest in the story, Josephus relates several details not contained in the Bible, some of which are probable, while others are very unlikely; but for none of which does he give any authority. Thus, he says, Micaiah was already in prison, when sent for to prophesy before Ahab and Jehoshaphat, and that it was Micaiah who had predicted death by a lion to the son of a prophet, under the circumstances mentioned in 1 K. xx. 35, 36; and had rebuked Ahab after his brilliant victory over the Syrians for

[a] As the definite article is prefixed in Hebrew, Thenius, Fürstman, and Bunsen translate *the* Spirit, and understand a personification of the Spirit of Prophecy. But the original words seem to be merely an extreme instance of the Hebrews conceiving as definite what would be indefinite in English. (See Gesen. *Gram.* §107, and 1 K. iii. 24.) The Spirit is conceived as definite from its corresponding to the requirements in the preceding question of Jehovah.

not putting Benhadad to death. And there is no doubt that these facts would be not only consistent with the narrative in the Bible, but would throw additional light upon it; for the rebuke of Ahab in his hour of triumph, on account of his forbearance, was calculated to excite in him the intensest feelings of displeasure and mortification; and it would at once explain Ahab's hatred of Micaiah, if Micaiah was the prophet by whom the rebuke was given. And it is not unlikely that Ahab in his resentment might have caused Micaiah to be thrown into prison, just as the princes of Judah, about 300 years later, maltreated Jeremiah in the same way (Jer. xxxvii. 15). But some other statements of Josephus cannot so readily be regarded as probable. Thus he relates that when Ahab disguised himself, he gave his own royal robes to be worn by Jehoshaphat, in the battle of Ramoth Gilead—an act, which would have been so unreasonable and cowardly in Ahab, and would have shown such singular complaisance in Jehoshaphat, that although supported by the translation in the Septuagint, it cannot be received as true. The fact that some of the Syrian captains mistook Jehoshaphat for Ahab is fully explained by Jehoshaphat's being the only person, in the army of Israel, who wore royal robes. Again, Josephus informs us, that Zedekiah alleged, as a reason for disregarding Micaiah's prediction, that it was directly at variance with the prophecy of Elijah, that dogs should lick the blood of Ahab, where dogs had licked the blood of Naboth, in the city of Samaria: inasmuch as Ramoth Gilead, where, according to Micaiah, Ahab was to meet his doom, was distant from Samaria a journey of three days. It is unlikely, however, that Zedekiah would have founded an argument on Elijah's insulting prophecy, even to the meekest of kings who might have been the subject of it; but that, in order to prove himself in the right as against Micaiah, he should have ventured on such an allusion to a person of Ahab's character, is absolutely incredible.

It only remains to add, that besides what is dwelt on by Josephus, the history of Micaiah offers several points of interest, among which the two following may be specified; 1st. Micaiah's vision presents what may be regarded as transitional ideas of one origin of evil actions. In Exodus, Jehovah Himself is represented as directly hardening Pharaoh's heart (vii. 3, 13, xiv. 4, 17, x. 20, 27.) In the Book of Job, the name of Satan is mentioned; but he is admitted without rebuke, among the Sons of God, into the presence of Jehovah (Job i. 6–12). After the Captivity, the idea of Satan, as an independent principle of evil, in direct opposition to goodness, becomes fully established (1 Chr. xxi. 1; and compare Wisd. ii. 24). [SATAN.] Now the ideas presented in the vision of Micaiah are different from each of these three, and occupy a place of their own. They do not go so far as the Book of Job—much less so far as the ideas current after the Captivity; but they go farther than Exodus. See Ewald, *Poet. Bücher*, 3ter Theil, 65. 2ndly. The history of Micaiah is an exemplification in practice, of contradictory predictions being made by different prophets. Other striking instances occur in the time of Jeremiah (xiv. 13, 14; xxviii. 15, 16; xxiii. 16, 25, 26). The only rule bearing on the judgment to be formed under such circumstances, seems to have been a negative one, which would be mainly useful after the event. It is laid down in Deut. xviii. 21, 22, where the question is asked, how the children of Israel *were to know* the word which Jehovah had not spoken? And the whole is, that "if *the thing follow not nor come to pass, that* is the thing which Jehovah has not spoken." [E. T.]

MI'CHA (מִיכָא: Μιχά: *Micha*). 1. The son of Mephibosheth (2 Sam. ix. 12); elsewhere (1 Ch. ix. 40) called MICAH.

2. A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 11).

3. (Alex. Ἀμεχά, Neh. xi. 22). The father of Mattaniah, a Gershonite Levite and descendant of Asaph (Neh. xi. 17, 22). He is elsewhere called MICAH (1 Ch. ix. 15) and MICHAIAH (Neh. xii. 35).

4. (Μιχά; Alex. Χεμά: *Micha*). A Simeonite, father of Ozias, one of the three governors of the city of Bethulia in the time of Judith (Jud. vi. 15). His name is remarkable as being connected with one of the few specific allusions to the ten tribes after the captivity.

MI'CHAEL (מִיכָאֵל: Μιχαήλ: *Michael*).

1. An Asherite, father of Sethur, one of the twelve spies (Num. xiii. 13).

2. The son of Abihail, one of the Gadites who settled in the land of Bashan (1 Chr. v. 13).

3. Another Gadite, ancestor of Abihail (1 Chr. v. 14).

4. A Gershonite Levite, ancestor of Asaph (1 Chr. vi. 40).

5. One of the five sons of Izrahiah of the tribe of Issachar, "all of them chiefs," who with their "troops of the battle-host" mustered to the number of 36,000 in the days of David (1 Chr. vii. 3).

6. A Benjamite of the sons of Beriah (1 Chr. viii. 16).

7. One of the captains of the "thousands" of Manasseh who joined the fortunes of David at Ziklag (1 Chr. xii. 20).

8. The father, or ancestor of Omri, chief of the tribe of Issachar in the reign of David (1 Chr. xxvii. 18); possibly the same as No. 5.

9. One of the sons of Jehoshaphat who were murdered by their elder brother Jehoram (2 Chr. xxi. 2, 4).

10. The father or ancestor of Zebadiah of the sons of Shephatiah who returned with Ezra (Ezr. viii. 8; 1 Esdr. viii. 34). [W. A. W.]

11. "One," or "the first of the chief princes" or archangels (Dan. x. 13; comp. ὁ ἀρχάγγελος in Jude 9), described in Dan. x. 21 as the "prince" of Israel, and in xii. 1 as "the great prince which standeth" in time of conflict "for the children of thy people." All these passages in the O. T. belong to that late period of its Revelation when, to the general declaration of the angelic office, was added the division of that office into parts, and the assignment of them to individual angels. [See ANGELS vol. i. p. 70 *a*.] This assignment served, not only to give that vividness to man's faith in God's supernatural agents, which was so much needed at a time of captivity, during the abeyance of His local manifestations and regular agencies, but also to mark the finite and ministerial nature of the angels, lest they should be worshipped in themselves. Accordingly, as Gabriel represents the ministration of the angels towards man, so Michael is the type and leader of their strife, in God's name and His strength, against the power of Satan. In the O. T. therefore he is the guardian of the Jewish people in their antagonism to godless power and heathenism. In the N. T. (see Rev. xii. 7) he fights in heaven against

the dragon—"that old serpent called the Devil and Satan, which deceiveth *the whole world*:" and so takes part in that struggle, which is the work of the Church on earth. The nature and method of his war against Satan are not explained, because the knowledge would be unnecessary and perhaps impossible to us: the fact itself is revealed rarely, and with that mysterious vagueness which hangs over all angelic ministration, but yet with plainness and certainty.

There remains still one passage (Jude 9; comp. 2 Pet. ii. 11) in which we are told that "Michael the archangel, when contending with the devil he disputed about the body of Moses, durst not bring against him a railing accusation, but said, The Lord rebuke thee." The allusion seems to be to a Jewish legend attached to Deut. xxxiv. 6. The Targum of Jonathan attributes the burial of Moses to the hands of the angels of God, and particularly of the archangel Michael, as the guardian of Israel. Later traditions (see Oecumen. *in Jud.* cap. i.) set forth how Satan disputed the burial, claiming for himself the dead body because of the blood of the Egyptian (Ex. ii. 12) which was on Moses's hands. The reply of Michael is evidently taken from Zech. iii. 1, where, on Satan's "resisting" Joshua the high-priest, because of the filthy garments of his iniquity, Jehovah, or "the angel of Jehovah" (see vol. i. p. 651), said unto Satan, "Jehovah rebuke thee, O Satan! Is not this a brand plucked from the fire?" The spirit of the answer is the reference to God's mercy alone for our justification, and the leaving of all vengeance and rebuke to Him; and in this spirit it is quoted by the Apostle.[a]

The Rabbinical traditions about Michael are very numerous. They oppose him constantly to Sammael, the accuser and enemy of Israel, as disputing for the *soul* of Moses; as bringing the ram the substitute for Isaac, which Sammael sought to keep back, &c. &c.: they give him the title of the "great high-priest in heaven," as well as that of the "great prince and conqueror;" and finally lay it down that "wherever Michael is said to have appeared, there the glory of the Shechinah is intended." It is clear that the sounder among them, in making such use of the name, intended to personify the Divine Power, and typify the Messiah (see Schoettgen, *Hor. Hebr.* i. 1079, 1119, ii. 8, 15, ed. Dresd. 1733). But these traditions, as usual, are erected on very slender Scriptural foundation. [A. B.]

MICHAH (מִיכָה: Μιχά: *Micha*), eldest son of Izrael, the son of Kohath (1 Chr. xxiv. 24, 25), elsewhere (1 Chr. xxiii. 20) called MICAH.

MICHAI'AH (מִיכָיָה: Μιχαΐας: *Micha*). The name is identical with that elsewhere rendered Michaiah. 1. The father of Achbor, a man of high rank in the reign of Josiah (2 K. xxii. 12). He is the same as MICAH the father of Abdon (2 Chr. xxxiv. 20).

2. Μιχαΐα; Alex. Μιχαΐα: *Michaïa*). The son of Zaccur, a descendant of Asaph (Neh. xii. 35). He is the same as MICAH the son of Zichri (1 Chr. ix. 15) and MICHA the son of Zabdi (Neh. xi. 17).

3. (Omitted in Vat. MS.; Alex. Μιχαΐας: *Michaea*). One of the priests who blew the trumpets at the dedication of the wall of Jerusalem by Nehemiah (Neh. xii. 41).

4. (מִיכָיְהוּ: Μααχά: *Michaïa*). The daughter of Uriel of Gibeah, wife of Rehoboam, and mother of Abijah king of Judah (2 Chr. xiii. 2). She is elsewhere called "Maachah the daughter of Abishalom" (1 K. xv. 2), or "Absalom" (2 Chr. xi. 20), being, in all probability, his granddaughter, and daughter of Tamar according to Josephus. [MAACHAH, 3.] The reading "Maachah" is probably the true one, and is supported by the LXX. and Peshito-Syriac.

5. (Μιχαΐα: *Michaea*). One of the princes of Jehoshaphat whom he sent with certain priests and Levites to teach the law of Jehovah in the cities of Judah (2 Chr. xvii. 7). [W. A. W.]

6. (מִכָיְהוּ: Μιχαΐας: F.A. Μιχέας: *Michaeas*). The son of Gemariah. He is only mentioned on one occasion. After Baruch had read, in public, prophecies of Jeremiah announcing imminent calamities, Michaiah went and declared them to all the princes assembled in king Zedekiah's house; and the princes forthwith sent for Baruch to read the prophecies to them (Jer. xxxvi. 11-14). Michaiah was the third in descent of a princely family, whose names are recorded in connexion with important religious transactions. His grandfather Shaphan was the scribe, or secretary of king Josiah, to whom Hilkiah the high-priest first delivered the book of the law which he said he had found in the House of Jehovah—Shaphan first perusing the book himself, and then reading it aloud to the youthful king (2 K. xxii. 10). And it was from his father Gemariah's chamber in the Temple, that Baruc hread the prophecies of Jeremiah, in the ears of all the people. Moreover, Gemariah was one of the three who made intercession to king Zedekiah, although in vain, that he would not burn the roll containing Jeremiah's prophecies. [E. T.]

MICH'AL (מִיכַל: Μελχόλ; Joseph. Μιχόλα: *Michol*), the younger of Saul's two daughters (1 Sam. xiv. 49). The king had proposed to bestow on David his eldest daughter MERAB; but before the marriage could be arranged an unexpected turn was given to the matter by the behaviour of Michal, who fell violently in love with the young hero. The marriage with her elder sister was at once put aside. Saul eagerly caught at the opportunity which the change afforded him of exposing his rival to the risk of death. The price fixed on Michal's hand was no less than the slaughter of a hundred Philistines.[a] For these the usual "dowry" by which, according to the custom of the East, from the time of Jacob down to the present day, the father is paid for his daughter, was relinquished. David by a brilliant feat doubled the tale of victims, and Michal became his wife. What her age was we do not know—her husband cannot have been more than sixteen.

[a] From unwillingness to acknowledge a reference to a non-Jewish tradition (in spite of vers. 14, 15), some have supposed St. Jude's reference to be to Zech. iii. 1, and explained the "body of Moses" to be the Jewish, as the "body of Christ" is the Christian, Church. The whole explanation is forced; but the analogy on which the last part is based is absolutely unwarrantable; and the very attempt to draw it shews a forgetfulness of the true meaning of that communion with Christ, which is implied by the latter expression.

[a] Perhaps nothing in the whole Bible gives so complete an example of the gap which exists between Eastern and Western ideas, as the manner in which the tale of these uncircumcised enemies of Israel was to be counted. Josephus softens it by substituting heads for foreskins, but it is obvious that heads would not have answered the same purpose. The LXX., who often alter obnoxious expressions, adhere to the Hebrew text

It was not long before the strength of her affection was put to the proof. They seem to have been living at Gibeah, then the head-quarters of the king and the army. After one of Saul's attacks of frenzy, in which David had barely escaped being transfixed by the king's great spear, Michal learned that the house was being watched by the myrmidons of Saul, and that it was intended on the next morning to attack her husband as he left his door (xix. 11). That the intention was real was evident from the behaviour of the king's soldiers, who paraded round and round the town, and "returning" to the house "in the evening," with loud cries, more like the yells of the savage dogs of the East than the utterances of human beings, "belched out" curses and lies against the young warrior who had so lately shamed them all (Ps. lix.[b] 3, 6, 7, 12). Michal seems to have known too well the vacillating and ferocious disposition of her father when in these demoniacal moods. The attack was ordered for the morning; but before the morning arrives the king will probably have changed his mind and hastened his stroke. So like a true soldier's wife, she meets stratagem by stratagem. She first provided for David's safety by lowering him out of the window: to gain time for him to reach the residence of Samuel she next dressed up the bed as if still occupied by him: the teraphim, or household god, was laid in the bed, its head enveloped, like that of a sleeper, in the usual net[c] of goat's hair for protection from gnats, the rest of the figure covered with the wide *beged* or plaid. It happened as she had feared; Saul could not delay his vengeance till David appeared out of doors, but sent his people into the house. The reply of Michal is that her husband is ill and cannot be disturbed. At last Saul will be baulked no longer: his messengers force their way into the inmost apartment and there discover the deception which has been played off upon them with such success. Saul's rage may be imagined: his fury was such that Michal was obliged to fabricate a story of David's having attempted to kill her.

This was the last time she saw her husband for many years; and when the rupture between Saul and David had become open and incurable, Michal was married to another man, Phalti or Phaltiel of Gallim (1 Sam. xxv. 44; 2 Sam. iii. 15), a village probably not far from Gibeah. After the death of her father and brothers at Gilboa, Michal and her new husband appear to have betaken themselves with the rest of the family of Saul to the eastern side of the Jordan. If the old Jewish tradition inserted by the Targum in 2 Sam. xxi. may be followed, she was occupied in bringing up the sons of her sister Merab and Adriel of Meholah. At any rate it is on the road leading up from the Jordan valley to the Mount of Olives that we first encounter her with her husband—Michal under the joint escort of David's messengers and Abner's twenty men, *en route* to David at Hebron, the submissive Phaltiel behind, bewailing the wife thus torn from him. It was at least fourteen years since David and she had parted at Gibeah, since she had watched him disappear down the cord into the darkness and had perilled her own life for his against the rage of her own father. That David's love for his absent wife has undergone no change in the interval seems certain from the eagerness with which he reclaims her as soon as the opportunity is afforded him. Important as it was to him to make an alliance with Ishbosheth and the great tribe of Benjamin, and much as he respected Abner, he will not listen for a moment to any overtures till his wife is restored. Every circumstance is fresh in his memory. "I will not see thy face except thou first bring Saul's daughter my wife Michal whom I espoused to me for a hundred foreskins of the Philistines" (2 Sam. iii. 13, 14). The meeting took place at Hebron. How Michal comported herself in the altered circumstances of David's household, how she received or was received by Abigail and Ahinoam we are not told; but it is plain from the subsequent occurrences that something had happened to alter the relations of herself and David. They were no longer what they had been to each other. The alienation was probably mutual. On her side must have been the recollection of the long contests which had taken place in the interval between her father and David; the strong anti-Saulite and anti-Benjamite feeling prevalent in the camp at Hebron, where every word she heard must have contained some distasteful allusion, and where at every turn she must have encountered men like Abiathar the priest or Ismaiah the Gibeonite (1 Chr. xii. 4; compare 2 Sam. xxi. 2), who had lost the whole or the greater part of their relatives in some sudden burst of her father's fury. Add to this the contrast between her husband and the Philistines who had killed her father and brothers; and, more than all perhaps, the inevitable difference between the boy-husband of her recollections and the matured and occupied warrior who now received her. The whole must have come upon her as a strong contrast to the affectionate husband whose tears had followed her along the road over Olivet, and to the heart over which we cannot doubt she ruled supreme. On the side of David it is natural to put the advanced years, in a climate where women are old at thirty, and probably a petulant and jealous temper inherited from her father, one outburst of which certainly produced the rupture between them which closes our knowledge of Michal.

It was the day of David's greatest triumph when he brought the Ark of Jehovah from its temporary resting-place to its home in the newly-acquired city. It was a triumph in every respect peculiarly his own. The procession consisted of priests, Levites, the captains of the host, the elders of the nation; and conspicuous in front, "in the midst of the damsels playing on the timbrels,"[d] was the king dancing and leaping. Michal watched this procession approach from the window of her apartments in the royal harem; the motions of her husband[e] shocked

[b] This Psalm by its title in the Hebrew, LXX., Vulgate, and Targum, is referred to the event in question, a view strenuously supported by Hengstenberg.

[c] כְּבִיר עִזִּים. This is Ewald's explanation of a term which has puzzled all other commentators (*Gesch.* iii. 101). For כְּבִיר, the LXX. seem to have read כָּבֵד, a liver; since they state that Michal "put the liver of a goat at David's head." For an ingenious suggestion founded on this, see MAGIC, p. 179a.

[d] No doubt a similar procession to that alluded to in Ps. lxviii. 25, where it will be observed that the words interpolated by our translators—"among them were the damsels"—alter the sense. The presence of the women as stated above is implied in the words of Michal in 2 Sam. vi. 20, when compared with the statement of Ps. lxviii.

[e] It seems from the words of Michal (vi. 20), which must be taken in their literal sense, coupled with the statement of 1 Chr xv. 27, that David was clad in nothing but the ephod of thin linen. So it is understood

her as undignified and indecent — "she despised him in her heart." It would have been well if her contempt had rested there; but it was not in her nature to conceal it, and when, after the services of the long day were over, the last burnt-offering and the last peace-offering offered, the last portion distributed to the crowd of worshippers, the king entered his house to bless his family, he was received by his wife not with the congratulations which he had a right to expect and which would have been so grateful to him, but with a bitter taunt which showed how incapable she was of appreciating either her husband's temper or the service in which he had been engaged. David's retort was a tremendous one, conveyed in words which once spoken could never be recalled. It gathered up all the differences between them which made sympathy no longer possible, and we do not need the assurance of the sacred writer that "Michal had no child unto the day of her death," to feel quite certain that all intercourse between her and David must have ceased from that date. Josephus (*Ant.* vii. 4, §3) intimates that she returned to Phaltiel, but of this there is no mention in the records of the Bible; and, however much we may hesitate at doubting a writer so accurate as Josephus when his own interests are not concerned, yet it would be difficult to reconcile such a thing with the known ideas of the Jews as to women who had once shared the king's bed.[f] [See ELIPHAL, AHINOAM, ADONIJAH.]

Her name appears but once again (2 Sam. xxi. 8) as the bringer-up, or more accurately the mother, of five of the grandchildren of Saul who were sacrificed to Jehovah by the Gibeonites on the hill of Gibeah. But it is probably more correct to substitute Merab for Michal in this place, for which see p. 327. [G.]

MICHE'AS (*Michaeas*), the prophet Micah the Morasthite (2 Esd. i. 39).

MICH'MAS (מִכְמָס: *Μαχμάς*; Alex. *Χαμεσ*: *Machmas*), a variation, probably a later[a] form, of the name MICHMASH (Ezr. ii. 27; Neh. vii. 31). In the parallel passage of 1 Esdras it is given as MACALON. See the following article. [G.]

MICH'MASH (מִכְמָשׁ: *Μαχμάς*: *Machmas*), a town which is known to us almost solely by its connection with the Philistine war of Saul and Jonathan (1 Sam. xiii. xiv.). It has been identified with great probability in a village which still bears the name of *Mükhmas*, and stands at about 7 miles north of Jerusalem, on the northern edge of the pass of *Wady Suweinit*—in some Maps *W. Fusar*—which forms the main pass of communication between the central highlands on which the village stands, and the Jordan valley at Jericho. Immediately facing *Mukhmas*, on the opposite side of the ravine, is the modern representative of Geba; and behind this again are Ramah and Gibeah—all memorable names in the long struggle which has immortalised Michmash. Bethel is about 4 miles to the north of Michmash, and the interval is filled up by the heights of *Burka*, *Deir Diwan*, *Tell el-Hajar*, &c., which appear to have constituted the "Mount Bethel" of the narrative (xiii. 2). So much is necessary to make the notices of Michmash contained in the Bible intelligible.

The place was thus situated in the very middle of the tribe of Benjamin. If the name be, as some scholars assert (Fürst, *Handwb.* 600*b*, 732*b*), compounded from that of Chemosh, the Moabite deity, it is not improbably a relic of some incursion or invasion of the Moabites, just as *Chephar-haammonai*, in this very neighbourhood, is of the Ammonites. But though in the heart of Benjamin, it is not named in the list of the towns of that tribe (comp. Josh. xviii.), but first appears as one of the chief points of Saul's position at the outbreak of the war. He was occupying the range of heights just mentioned, one end of his line resting on Bethel, the other at Michmash (1 Sam. xiii. 2). In Geba, close to him but separated by the wide and intricate valley, the Philistines had a garrison, with a chief officer.[a] The taking of the garrison or the killing of the officer by Saul's son Jonathan was the first move. The next was for the Philistines to swarm up from their sea-side plain in such numbers, that no alternative was left for Saul but to retire down the Wady to Gilgal, near Jericho, that from that ancient sanctuary he might collect and reassure the Israelites. Michmash was then occupied by the Philistines, and was their furthest post to the East.[b] But it was destined to witness their sudden overthrow. While he was in Geba, and his father in Michmash, Jonathan must have crossed the intervening valley too often not to know it thoroughly; and the intricate paths which render it impossible for a stranger to find his way through the mounds and hummocks which crowd the bottom of the ravine—with these he was so familiar—the "passages" here, the "sharp rocks" there—as to be able to traverse them even in the dark. It was just as the day dawned (Joseph. *Ant.* vi. 6, §2) that the watchers in the garrison at Michmash descried the two Hebrews clambering up the steeps beneath. We learn from the details furnished by Josephus, who must have had an opportunity of examining the spot when he passed it with Titus

Prepuce of Gaza (in 1 Chr. xv.). The ephod seems to have been a kind of tippet which went over the shoulders (*ἐπωμίς*), and cannot have afforded much protection to the person, especially of a man in violent action.

[f] The Jewish tradition, preserved in the Targum on Isaiah li. 4, states that Phaltiel had from the first acted in accordance with the idea alluded to in the text. He is placed in the same rank with Joseph, and is commemorated as "Phaltiel, son of Laish, the pious (חַסִידָא, the word used for the Puritans of the New Testament times), who placed a sword between himself and Michal David's daughter, lest he should go in unto her." [Ass-Sanhedrin]

[a] The change of ע into כ is frequent in the later Hebrew (see Gesen. *Thes.* 931*b*).

[a] The Hebrew word נְצִיב, or נָצִיב, means both an officer and a garrison (Gesen. *Thes.* 903). It is rendered in the A. V. by the former in 1 K. iv. 19, and by the latter in the passage in question. Ewald (*Gesch.* iii. 41) affirms unhesitatingly that the former is correct; but not so Michaelis, Zunz and De Wette, in their translations, or Gesenius as above. The English word "post" embraces some of the significations of *Netsib*.

[b] See xiv. 31, where Michmash is named as the point on the east at which the slaughter began, and Ajalon, on the west, that at which it terminated. Unlike the Canaanites (Josh. . .), who probably made off in the direction of Phoenicia, and therefore chose the upper road by the two Beth-horons, the Philistines when they reached Gibeon took the left hand and lower road, by the *Wady Suleiman* —where *Yalo* still exists—the most direct access to their own maritime plain.

on their way to the siege of Jerusalem (see *B. J.* v. 2, §1), that the part of Michmash in which the Philistines had established themselves, consisted of three summits, surrounded by a line of rocks like a natural entrenchment, and ending in a long and sharp precipice believed to be impregnable. Finding himself observed from above, and taking the invitation as an omen in his favour, Jonathan turned from the course which he was at first pursuing, and crept up in the direction of the point reputed impregnable. And it was there, according to Josephus, that he and his armour-bearer made their entrance to the camp (Joseph. *Ant.* vi. 6, §2). [GIBEAH, vol. i. 690*b*; JONATHAN.]

Unless MAKAZ be Michmash—an identification for which we have only the authority of the LXX. —we hear nothing of the place from this time till the invasion of Judah by Sennacherib in the reign of Hezekiah, when it is mentioned by Isaiah (x. 28). He is advancing by the northern road, and has passed Ai and Migron. At Michmash, on the further side of the almost impassable ravine, the heavy baggage (A. V. "carriages," see vol. i. 281 *a*) is deposited, but the great king himself crosses the pass, and takes up his quarters for the night at Geba. All this is in exact accordance with the indications of the narrative of 1 Samuel, and with the present localities.

After the captivity the men of the place returned, 122 in number (Ezr. ii. 27; Neh. vii. 31; in both these the name is slightly altered to MICHMAS), and re-occupied their former home (Neh. xi. 31).

At a later date it became the residence of Jonathan Maccabaeus, and the seat of his government (1 Macc. ix. 73, "Machmas;" Joseph. *Ant.* xiii. 1, §6). In the time of Eusebius and Jerome (*Onomasticon*, "Machmas") it was "a very large village retaining its ancient name, and lying near Ramah in the district of Aelia (Jerusalem) at 9 miles distance therefrom."

Later still it was famed for the excellence of its corn. See the quotation from the Mishna (Menachoth) in Reland (*Pal.* 897), and Schwarz (131). Whether this excellence is still maintained we do not know. There is a good deal of cultivation in and amongst groves of old olives in the broad shallow wady which slopes down to the north and east of the village; but *Mukhmas* itself is a very poor place, and the country close to it has truly "a most forbidding aspect." "Huge gray rocks raise up their bald crowns, completely hiding every patch of soil, and the gray huts of the village, and the gray ruins that encompass them can hardly be distinguished from the rocks themselves." There are considerable remains of massive foundations, columns, cisterns, &c., testifying to former prosperity, greater than that of either Anathoth or Geba (Porter, *Handbk.* 215, 216).

Immediately below the village the great wady spreads out to a considerable width—perhaps half a mile; and its bed is broken up into an intricate mass of hummocks and mounds, some two of which, before the torrents of 3000 winters had reduced and rounded their forms, were probably the two "teeth of cliff"—the Bozez and Seneh of Jonathan's adventure. Right opposite is *Jeba*, on a curiously terraced hill. To the left the wady contracts again, and shows a narrow black gorge of almost vertical limestone rocks pierced with mysterious caverns and fissures, the resort, as the writer was assured, of hyenas, porcupines, and eagles. In the wet season the stream is said to be often deeper than a man's neck, very strong, and of a bright yellow colour.

In the middle ages *el-Birah* was believed to be Michmash (see Maundrell, March 25; and the copious details in Quaresmius, *Elucidatio*, ii. 786, 787). But *el-Birah* is now ascertained on good grounds to be identical with BEEROTH. [G.]

MICH'METHAH (מִכְמְתָת, *i. e.* the Michmethath: Ἰκασμών, Δηλαιθά; Alex. Μαχθαθ, in both cases: *Mechmethath*, *Machmathath*), a place which formed one of the landmarks of the boundary of the territories of Ephraim and Manasseh on the western side of Jordan. (1.) It lay "facing (עַל פְּנֵי) Shechem;" it also was the next place on the boundary west of ASHER[a] (Josh. xvii. 7), if indeed the two are not one and the same place—ham-Micmethath a distinguishing affix to the commoner name of Asher. The latter view is taken by Reland (*Pal.* 596)—no mean authority—and also by Schwarz (147), but it is not supported by the Masoretic accents of the passage. The former is that of the Targum of Jonathan, as well as our own A. V. Whichever may ultimately be found correct, the position of the place must be somewhere on the east of and not far distant from Shechem. But then (2.) this appears quite inconsistent with the mention of the same name in the specification of a former boundary (Josh. xvi 6). Here the whole description seems to relate to the boundary between Benjamin and Ephraim (*i. e.* Ephraim's southern boundary), and Michmethath follows Bethhoron the upper, and is stated to be on its west or seaward side. Now Bethhoron is at least 20 miles, as the crow flies, from Shechem, and more than 30 from Asher. The only escape from such hopeless contradictions is the belief that the statements of chap. xvi. have suffered very great mutilation, and that a gap exists between verses 5 and 6, which if supplied would give the landmarks which connected the two remote points of Bethhoron and Michmethath. The place has not been met with nor the name discovered by travellers, ancient or modern. [G.]

MICH'RI (מִכְרִי: Μαχίρ; Alex. Μαχαρί: *Mochori*). Ancestor of Elah, one of the heads of the fathers of Benjamin (1 Chr. ix. 8) after the captivity.

MICH'TAM (מִכְתָּם: στηλογραφία: title *inscriptio*). This word occurs in the titles of six Psalms (xvi., lvi.–lx.), all of which are ascribed to David. The marginal reading of our A. V. is "a *golden* Psalm," while in the Geneva version it is described as "a certain tune." From the position which it occupies in the title, compared with that of *Mizmor* (A. V. "Psalm," Ps. iv.–vi., &c.), *Maschil* (Ps. xxxii., &c.), and *Shiggaion* (Ps. vii.), the first of which certainly denotes a song with an instrumental accompaniment (as distinguished from *shir*, a song for the voice alone), we may infer that *michtam* is a term applied to these Psalms to denote their musical character, but beyond this everything is obscure. The very etymology of the word is uncertain. 1. Kimchi and Aben Ezra, among Rabbinical writers, trace it to the root כָּתַם, *cotham*, as it appears in פָּתָם, *cethem*, which is rendered by the A. V "gold" (Job xxviii. 16), "pure

[a] For the situation of the town of ASHER see note to MANASSEH, p. 220.

gold (Job xxviii. 19), "fine gold" (Job xxxi. 24); because the Psalm was to David precious as fine gold. They have been followed by the translators in the margin of our version, and the *Michtam* Psalms have been compared with the "Golden Sayings" of Pythagoras and the Proverbs of Ali. Others have thought the epithet "golden" was applied to these Psalms, because they were written in letters of gold and suspended in the Sanctuary or elsewhere, like the *Moallahát*, or suspended poems of Mecca, which were called *Modhahabát*, or "golden," because they were written in gold characters upon Egyptian linen. There is, however, no trace among the Hebrews of a practice analogous to this. Another interpretation, based upon the same etymology of the word, is given to *Michtam* by an unknown writer quoted by Jarchi (Ps. xvi. 1). According to this it signifies "a crown," because David asked God for His protection, and He was as a crown to him (Ps. v. 12).

2. In Syriac the root in conj. *Pael*, כַּתֵּם, *cathem*, signifies "to stain," hence "to defile," the primary meaning in *Peal* being probably "to spot, mark with spots," whence the substantive is in common use in Rabbinical Hebrew in the sense of "spot" or "mark" (comp. Kimchi, *on Am.* i. 1). In this sense the Niphal participle occurs in Jer. ii. 22, "thine iniquity is *spotted* before me," which makes the parallelism more striking than the "marked" of our A. V. From this etymology the meanings have been given to *Michtam* of "a *noted* song" (Junius and Tremellius, *insignis*), or a song which was *graven* or carved upon stone, a monumental inscription; the latter of which has the merit of antiquity in its favour, being supported by the renderings of the LXX., Theodotion, the Chaldee Targum, and the Vulgate. (See Michaelis, *Suppl. ad Lex. Heb.* No. 1242.) There is nothing in the character of the Psalms so designated to render the title appropriate; had the Hebrews been acquainted with musical notes, it would be as reasonable to compare the word *Michtam* with the old English "prick-song," [a] a song *pricked* or *noted*. In the utter darkness which envelopes it, any conjecture is worthy of consideration; many are valueless as involving the transference to one language of the metaphors of another.

3. The corresponding Arab. كَتَمَ, *katama*, "to conceal, repress," is also resorted to for the explanation of *Michtam*, which was a title given to certain Psalms according to Hezel, because they were written while David was in concealment. This, however, could not be appropriate to Ps. lviii., lx. From the same root Hengstenberg attributes to them a *hidden*, mystical import, and renders Michtam *by Geheimniss*, which he explains as "ein Lied tiefen Sinnes." Apparently referring the word to the same origin, Ewald (*Jahrb.* viii. p. 68) suggests that it may designate a song accompanied by bass instruments, like "the cymbals of trumpet-sound" of Ps. cl. 5, which would be adapted to the plaintive character of Ps. xvi. and others of the series to which it is applied. The same mournful tone is also believed to be indicated in *Michtam* as derived from a root analogous to the Arab. كَتَمَ, *cathama* which in conj. vii. signifies "to be sad," in which case it would denote "an elegy." [b]

4. But the explanation which is most approved by Rosenmüller and Gesenius, is that which finds in Michtam the equivalent of מִכְתָּב, *mictáb*; a word which occurs in Is. xxxviii. 9 (A. V. "writing"), and which is believed by Capellus (*Crit. Sacr.* iv. 2, §11) to have been the reading followed by the LXX. and Targum. Gesenius supports his decision by instances of similar interchanges of ב and מ in roots of cognate meaning. In accordance with this De Wette renders "Schrift."

5. For the sake of completeness another theory may be noticed, which is quite untenable in itself, but is curious as being maintained in the versions of Aquila [b] and Symmachus, [c] and of Jerome [d] according to the Hebrew, and was derived from the Rabbinical interpreters. According to these, מִכְתָּם is an enigmatic word, equivalent to תָּם וְיָשָׁר, "humble and perfect," epithets applied to David himself.

It is evident from what has been said, that nothing has been really done to throw light upon the meaning of this obscure word, and there seems little likelihood that the difficulty will be cleared away. Beyond the general probability that it is a musical term, the origin of which is uncertain and the application lost, nothing is known. The subject will be found discussed in Rosenmüller's *Scholia* (*Psalm.* vol. i. *explic. titul.* xlii.–xlvi.), and by Hupfeld (*Die Psalmen* i. 308-311), who has collected all the evidence bearing upon it, and adheres to the rendering *kleinod* (jewel, treasure), which Luther also gives, and which is adopted by Hitzig and Mendelssohn. [W. A. W.]

MID'DIN (מִדִּין: Αἰνών; Μαδών: *Middin*), a city of Judah (Josh. xv. 61), one of the six specified as situated in the district of "the midbar" (A. V. "wilderness"). This midbar, as it contained Beth ha-Arabah, the city of Salt, and Engedi, must have embraced not only the waste lands on the upper level, but also the cliffs themselves and the strip of shore at their feet, on the edge of the lake itself. Middin is not mentioned by Eusebius or Jerome, nor has it been identified or perhaps sought for by later travellers. By Van de Velde (*Memoir*, 256, and *map*) mention is made of a valley on the south-western side of the Dead Sea, below Masada, called *Um el-Bedun*, which may contain a trace of the ancient name. [G.]

MID'IAN (מִדְיָן, "strife, contention," Ges.: Μαδιάμ: *Madian*), a son of Abraham and Keturah (Gen. xxv. 2; 1 Chr. i. 32); progenitor of the Midianites, or Arabians dwelling principally in the desert north of the peninsula of Arabia. [e] Southwards they extended along the eastern shore of the Gulf of Eyleh (*Sinus Aelaniticus*); and northwards they stretched along the eastern frontier of Palestine;

[a] Shakspeare, *Rom. and Jul.* ii. 4: "He fights as you sing *prick-song*, keeps time, distance, and proportion."

[b] τοῦ ταπεινόφρονος καὶ ἡλεοῦ τοῦ Δαυΐδ.

[c] ταπεινόφρονος καὶ ἡμέρου.

[d] "Humilis et simplicis David."

[e] The notion that there were two peoples called Midian, founded on the supposed shortness of the interval for any considerable multiplication from Abraham to Moses, and on the mention of Moses' Cushite wife, the writer thinks to be untenable. Even conceding the former objection, which is unnecessary, one tribe has often become merged into another, and older one, and only the name of the later retained. See below and Moses.

while the oases in the peninsula of Sinai seem to have afforded them pasture grounds and caused it to be included in the "land of Midian" (but see below on this point). The *people* is always spoken of, in the Hebrew, as "Midian," מִדְיָן, except in Gen. xxxvii. 36; Num. xxv. 17, xxxi. 2, where we find the pl. מִדְיָנִים. In Gen. xxxvii. 28, the form מִדְנִים occurs, rendered in the A. V. as well as in the Vulg.[f] Midianites; and this is *probably* the correct rendering, since it occurs in ver. 36 of the same chap.; though the people here mentioned may be descendants of MEDAN (which see). The gentilic form מִדְיָנִי, "Midianite," occurs once, Num. x. 29.

After the chronological record of Midian's birth, with the names of his sons, in the xxvth chapter of Genesis, the name disappears from the Biblical history until the time of Moses; Midian is first mentioned, as a people, when Moses fled, having killed the Egyptian, to the "land of Midian" (Ex. ii. 15), and married a daughter of a priest of Midian (21). The "land of Midian," or the portion of it specially referred to, was probably the peninsula of Sinai, for we read in the next chapter (ver. 1) that Moses led the flock of Jethro his father-in-law, the priest of Midian "to the backside of the desert, and came to the mountain of God, even Horeb," and this agrees with a natural supposition that he did not flee far beyond the frontier of Egypt (compare Ex. xviii. 1-27, where it is recorded that Jethro came to Moses to the mount of God after the Exodus from Egypt; but in v. 27 "he went his way into his own land:" see also Num. x. 29, 30). It should, however, be remembered that the name of Midian (and hence the "land of Midian") was perhaps often applied, as that of the most powerful of the northern Arab tribes, to the northern Arabs generally, *i. e.* those of Abrahamic descent (comp. Gen. xxxvii. 28, but see respecting this passage above; and Judg. viii. 24); just as BENE-KEDEM embraced all those peoples, and, with a wider signification, other Eastern tribes. If this reading of the name be correct, "Midian" would correspond very nearly with our modern word "Arab;" limiting, however, the modern word to the Arabs of the northern and Egyptian deserts: all the Ishmaelite tribes of those deserts would thus be Midianites, as we call them Arabs, the desert being their "land." At least, it cannot be doubted that the descendants of Hagar and Keturah intermarried; and thus the Midianites are apparently called Ishmaelites, in Judg. viii. 24, being connected, both by blood and national customs, with the father of the Arabs. The wandering habits of nomadic tribes must also preclude our arguing from the fact of Moses' leading his father's flock to Horeb, that Sinai was necessarily more than a station of Midian: those tribes annually traverse a great extent of country in search of pasturage, and have their established summer and winter pastures. The Midianites were mostly (not always) dwellers in tents, not towns; and Sinai has not sufficient pasture to support more than a small, or a moving people. But it must be remembered that perhaps (or we may say *probably*) the Peninsula of Sinai has considerably changed in its physical character since the time of Moses; for the adjacent isthmus has, since that period, risen many feet, so that "the tongue of the Egyptian Sea" has "dried up:" and this supposition would much diminish the difficulty of accounting for the means of subsistence found by the Israelites in their wanderings in the wilderness, when not miraculously supplied. Apart from this consideration, we know that the Egyptians afterwards worked mines at Sarábet el-Khádim, and a small mining population may have found sufficient sustenance, at least in some seasons of the year, in the few watered valleys, and wherever ground could be reclaimed: rock-inscriptions (though of later date) testify to the number of at least passers-by; and the remains of villages of a mining population have been recently discovered.—Whatever may have been the position of Midian in the Sinaitic peninsula, if we may believe the Arabian historians and geographers, backed as their testimony is by the Greek geographers, the city of Midian was situate on the opposite, or Arabian, shore of the Arabian gulf, and thence northwards and spreading east and west we have the true country of the wandering Midianites. See further in SINAI.

The next occurrence of the name of this people in the sacred history marks their northern settlements on the border of the Promised Land, "on this side Jordan [by] Jericho" in the plains of Moab (Num. xxii. 1-4), when Balak said, of Israel, to the elders (זְקֵנִים, or "old men," the same as the Arab "sheykhs") of Midian, "Now shall this company lick up all [that are] round about us, as the ox licketh up the grass of the field." In the subsequent transaction with Balaam, the elders of Midian went with those of Moab, "with the rewards of divination in their hand" (7); but in the remarkable words of Balaam, the Midianites are not mentioned. This might be explained by the supposition that Midian was a wandering tribe, whose pasture-lands reached wherever, in the Arabian desert and frontier of Palestine pasture was to be found, and who would not feel, in the same degree as Moab, Amalek, or the other more settled and agricultural inhabitants of the land allotted to the tribes of Israel, the arrival of the latter. But the spoil taken in the war that soon followed, and more especially the mention of the dwellings of Midian, render this suggestion very doubtful, and point rather to a considerable pastoral settlement of Midian in the trans-Jordanic country. Such settlements of Arabs have, however, been very common. In this case the Midianites were evidently *tributary* to the Amorites, being "dukes of Sihon, dwelling in the country" (יֹשְׁבֵי הָאָרֶץ): this inferior position explains their omission from Balaam's prophecy. It was here, "on this side Jordan," that the chief doings of the Midianites with the Israelites took place. The latter, while they abode in Shittim, "joined themselves unto Baal-Peor" (Num. xxv. 1, &c.—apparently a Midianite as well as a Moabitish deity—the result of the sin of whoredom with the Moabitish women; and when "the anger of the Lord was kindled against Israel . . . and the congregation of the children of Israel [were] weeping [before] the door of the tabernacle of the congregation," an Israelite brought a Midianitish woman openly into the camp. The rank of this woman COZBI, that of a daughter of Zur, who was "head over a people, of a chief house in Midian,"[g] throws a strange light

[f] The LXX. have here Μαδιηναῖοι, which seems to be an unusual mode of writing the name of the people descended from Μαδιάμ. The Samaritan has מדינים.

[g] רֹאשׁ אֻמּוֹת בֵּית־אָב, "head of families of a patriarchal house;" afterwards in ver. 18, called פַּחַת (See next note.)

over the obscure page of that people's history. The vices of the Canaanites, idolatry and whoredom, had infected the descendants of Abraham, doubtless connected by successive intermarriages with those tribes; and the prostitution of this chief's daughter, caught as it was from the customs of the Canaanites, is evidence of the ethnological type of the latter tribes. Some African nations have a similar custom: they offer their unmarried daughters to show hospitality to their guests. Zur was one of the five "kings" (מַלְכֵי),[1] slain in the war with Midian, recorded in ch. xxxi.

The influence of the Midianites on the Israelites was clearly most evil, and directly tended to lead them from the injunctions of Moses. Much of the dangerous character of their influence may probably be ascribed to the common descent from Abraham. While the Canaanitish tribes were abhorred, Midian might claim consanguinity, and more readily seduce Israel from their allegiance. The events at Shittim occasioned the injunction to vex Midian and smite them—"for they vex you with their wiles, wherewith they have beguiled you in the matter of Peor and in the matter of Cozbi, the daughter of a prince of Midian, their sister, which was slain in the day of the plague for Peor's sake" (Num. xxv. 18); and further on, Moses is enjoined, "Avenge the children of Israel of the Midianites: afterward shalt thou be gathered unto thy people" (xxxi. 2). Twelve thousand men, a thousand from each tribe, went up to this war, a war in which all the males of the enemy were slain, and the five kings of Midian—Evi, Rekem, Zur, Hur, and Reba, together with Balaam; and afterwards, by the express command of Moses, only the virgins and female infants, of the captives brought into the camp, were spared alive. The cities and castles of the vanquished, and the spoil taken, afford facts to which we shall recur. After a lapse of some years (the number is very doubtful, see CHRONOLOGY), the Midianites appear again as the enemies of the Israelites. They had recovered from the devastation of the former war, probably by the arrival of fresh colonists from the desert tracts over which their tribes wandered; and they now were sufficiently powerful to become the oppressors of the children of Israel. The advocates of a short chronology must, however unwillingly, concede a considerable time for Midian thus to recover from the severe blow inflicted by Moses. Allied with the Amalekites, and the *Bene-Kedem*, they drove them to make dens in the mountains and caves and strongholds, and wasted their crops even to Gaza, on the Mediterranean coast, in the land of Philistia. The judgeship of Gideon was the immediate consequence of these calamities; and with the battle he fought in the valley of Jezreel, and his pursuit of the flying enemy over Jordan to Karkor, the power of Midian seems to have been broken. It is written, "Thus was Midian subdued before the children of Israel, so that they lifted up their heads no more" (viii. 28). The part taken by Gideon in this memorable event has been treated of elsewhere, but the Midianite side of the story is important with interest. [GIDEON.]

Midian had oppressed Israel for seven years. As a numberless eastern horde they entered the land with their cattle and their camels. The imagination shows us the green plains of Palestine sprinkled with the black goats' hair tents of this great Arab tribe, their flocks and herds and camels let loose in the standing corn, and foraging parties of horsemen driving before them the possessions of the Israelites; for "they came like locusts (A. V. "grasshoppers," אַרְבֶּה) for multitude" (Judg. vi. 5), and when the "angel of the Lord" came to Gideon, so severe was the oppression that he was threshing wheat by the wine-press *to hide it from the Midianites* (11). When Gideon had received the Divine command to deliver Israel, and had thrown down the altar of Baal, we read, "Then all the Midianites and the Amalekites and the Bene-Kedem were gathered together, and went over," descended from the desert hills and crossed Jordan, "and pitched in the valley of Jezreel" (33)—part of the plain of Esdraelon, the battle-field of Palestine—and there, from "the grey, bleak crowns of Gilboa," where Saul and Jonathan perished, did Gideon, with the host that he had gathered together of Israel, look down on the Midianites, who "were on the north side of them, by the hill of Moreh, in the valley" (vii. 1). The scene over that fertile plain, dotted with the enemies of Israel, "the Midianites and the Amalekites and all the Bene-Kedem, [who] lay along[2] in the valley like locusts for multitude, and their camels were without number, as the sand by the sea-side for multitude" (vii. 12), has been picturesquely painted by Professor Stanley (*S. & P.*).

The descent of Gideon and his servant into the camp, and the conversation of the Midianite watch forms a vivid picture of Arab life. It does more; it proves that as Gideon, or Phurah, his servant, or both, understood the language of Midian, the Semitic languages differed much less in the 14th or 13th century B.C. than they did in after times [see ARABIA, vol. i. p. 96]; and we besides obtain a remarkable proof of the consanguinity of the Midianites, and learn that, though the name was probably applied to all or most of the northern Abrahamic Arabs, it was not applied to the Canaanites, who certainly did not then speak a Semitic language that Gideon could understand.

The stratagem of Gideon receives an illustration from modern Oriental life. Until lately the police in Cairo were accustomed to go their rounds with a lighted torch thrust into a pitcher, and the pitcher was suddenly withdrawn when light was required (Lane's *Mod. Eg.* 5th ed. p. 120)—a custom affording an exact parallel to the ancient expedient adopted by Gideon. The consequent panic of the great multitude in the valley, if it has no parallels in modern European history, is consistent with Oriental character. Of all peoples, the nations of the East are most liable to sudden and violent emotions; and a panic in one of their heterogeneous, undisciplined, and excitable hosts has always proved disastrous. In the case of Gideon, however, the result of his attack was directed by God, the Divine hand being especially shown in the small number of Israel, 300 men, against 135,000 of the enemy. At the sight of the 300 torches, suddenly blazing round

[1] These are afterwards (Josh. xiii 21) called "princes" (נְסִיכֵי), which may also be rendered the leader or captain of a tribe, or ever of a family (Gen.). and "dukes" (אַלּוּפֵי), not the word rendered duke in the enumeration of the "dukes of Edom"), "one anointed, a prince consecrated by anointing" (Ges.) of Sihon king of the Amorites; apparently lieutenants of the Amorite, or princes of his appointing. [HUR; IRAM.]

[2] Prof. Stanley reads here "wrapt in sleep." Though the Heb. will bear this interpretation, Gesenius has "encamped"

about the camp in the beginning of the middle-watch (which the Midianites had newly set), with the confused din of the trumpets, "for the three companies blew the trumpets, and brake the pitchers, and held the lamps in their left hands, and the trumpets in their right hands to blow [withal], and they cried, [The sword] of the Lord and of Gideon" (vii. 20), "all the host ran, and cried, and fled" (21). The panic-stricken multitude knew not enemy from friend, for "the Lord set every man's sword against his fellow even throughout all the host" (22). The rout was complete, the first places made for being Beth-shittah ("the house of the acacia") in Zererath, and the "border" [שִׂפַת] of Abel-meholah, "the meadow of the dance," both being probably down the Jordan valley, unto Tabbath, shaping their flight to the ford of Bethbarah, where probably they had crossed the river as invaders. The flight of so great a host, encumbered with slow-moving camels, baggage, and cattle, was calamitous. All the men of Israel, out of Naphtali, and Asher, and Manasseh, joined in the pursuit; and Gideon roused the men of Mount Ephraim to "take before" the Midianites "the waters unto Beth-barah and Jordan" (23, 24). Thus cut off, two princes, Oreb and Zeeb (the "raven," or, more correctly "crow," and the "wolf"), fell into the hands of Ephraim, and Oreb they slew at the rock Oreb, and Zeeb they slew at the wine-press of Zeeb (vii. 25; comp. Is. x. 26, where the "slaughter of Midian at the rock Oreb" is referred to).[k] But though we have seen that many joined in a desultory pursuit of the rabble of the Midianites, only the 300 men who had blown the trumpets in the valley of Jezreel crossed Jordan with Gideon, "faint yet pursuing" (viii. 4). With this force it remained for the liberator to attack the enemy on his own ground, for Midian had dwelt on the other side Jordan since the days of Moses. Fifteen thousand men, under the "kings" [מַלְכֵי] of Midian, Zebah and Zalmunna, were at Karkor, the sole remains of 135,000, "for there fell an hundred and twenty thousand men that drew sword" (viii. 10). The assurance of God's help encouraged the weary three hundred, and they ascended from the plain (or ghôr) to the higher country by a ravine or torrent-bed in the hills, "by the way of them that dwelt in tents [that is, the pastoral or wandering people as distinguished from towns-people], on the east of Nobah and Jogbehah, and smote the host, for the host was secure" (viii. 11)—secure in that wild country, on their own ground, and away from the frequent haunts of man. A sharp pursuit seems to have followed this fresh victory, ending in the capture of the kings and the final discomfiture of the Midianites. The overthrow of Midian in its encampment, when it was "secure," by the exhausted companies of Gideon (they were "faint," and had been refused bread both at Succoth and at Penuel, viii. 5-9), sets the seal to God's manifest hand in the deliverance of His people from the oppression of Midian. Zebah and Zalmunna were slain, and with them the name itself of Midian almost disappears from sacred history. That people never afterwards took up arms against Israel, though they may have been allied with the nameless hordes who under the common designation as "the people of the East," Bene-Kedem, harassed the eastern border of Palestine.

Having traced the history of Midian, it remains to show what is known of their condition and customs &c., besides what has already been incidentally mentioned. The whole account of their doings with Israel—and it is only thus that they find a place in the sacred writings, plainly marks them as characteristically Arab. We have already stated our opinion that they had intermarried with Ishmael's descendants, and become nationally one people, so that they are apparently called Ishmaelites; and that, conversely, it is most probable their power and numbers, with such intermarriages, had caused the name of Midian to be applied to the northern Abrahamic Arabs generally. They are described as true Arabs—now Bedawees, or "people of the desert;" anon pastoral, or settled Arabs—the "flock" of Jethro; the cattle and flocks of Midian, in the later days of Moses; their camels without number, as the sand of the sea-side for multitude when they oppressed Israel in the days of the Judges—all agree with such a description. Like Arabs, who are predominantly a nomadic people, they seem to have partially settled in the land of Moab, under the rule of Sihon the Amorite, and to have adapted themselves readily to the "cities" (עָרֵיהֶם), and forts? (A. V. "goodly castles," מְעוֹזֹתָם), which they did not build, but occupied, retaining even then their flocks and herds (Num. xxxi. 9, 10), but not their camels, which are not common among settled Arabs, because they are not required, and are never, in that state, healthy.[m] Israel seems to have devastated that settlement, and when next Midian appears in history it is as a desert-horde, pouring into Palestine with innumerable camels; and, when routed and broken by Gideon, fleeing "by the way of them that dwelt in tents" to the east of Jordan. The character of Midian we think is thus unmistakeably marked. The only glimpse of their habits is found in the vigorous picture of the camp in the valley of Jezreel, when the men talked together in the camp, and one told how he had dreamt that "a cake of barley-bread tumbled into the host of Midian, and came into a tent, and smote it that it fell, and overturned it, that the tent lay along" Judg. vii. 13).

We can scarcely doubt, notwithstanding the disputes of antiquaries, that the more ancient of the remarkable stone buildings in the *Lejâ*, and stretching far away over the land of Moab, are at least as old as the days of Sihon; and reading Mr. Porter's descriptions of the wild old-world character of the scenery, the "cities," and the "goodly castles," one may almost fancy himself in presence of the hosts of Midian. (See *Handbook*, 501, 508, 523, &c.)

The spoil taken in both the war of Moses and that of Gideon is remarkable. On the former occasion, the spoil of 575,000 sheep, 72,000 beeves, and 61,000 asses, seems to confirm the other indications of the then pastoral character of the Midianites; the omission of any mention of camels has been already explained. But the gold, silver, brass, iron, tin, and lead (Num. xxxi. 22), the "jewels of gold, chains, and bracelets, rings, earrings, and

[k] It is added, in the same verse, that they pursued Midian, and brought the heads of the princes to Gideon "on the other side Jordan." This anticipates the account of his crossing Jordan (viii. 4), but such transpositions are frequent, and the Hebrew may be read "on this side Jordan."

[m] Thus an Arab, believing in contagious diseases, asked Mahommad why camels in the desert are like gazelles, and become mangy as soon as they mix with camels in towns. The prophet answered, "Who made the first camel mangy?"

tablets" (50)—the offering to the Lord being 16,750 shekels (52),—taken by Moses, is especially noteworthy; and it is confirmed by the booty taken by Gideon; for when he slew Zebah and Zalmunna he "took away the ornaments that [were] on their camels' necks" (Judg. viii. 21), and (24-26) he asked of every man the earrings of his prey, "for they had golden earrings, because they [were] Ishmaelites." "And the weight of the golden earrings that he requested was a thousand and seven hundred [shekels] of gold; besides ornaments and collars, and purple raiment that [was] on the kings of Midian, and beside the chains that [were] about their camels' necks." (The rendering of A. V. is sufficiently accurate for our purpose here, and any examination into the form or character of these ornaments, tempting though it is, belongs more properly to other articles.) We have here a wealthy Arab nation, living by plunder, delighting in finery (especially their women, for we may here read "nose-ring"); and, where forays were impossible, carrying on the traffic southwards into Arabia, the land of gold—if not naturally, by trade—and across to Chaldaea; or into the rich plains of Egypt.

Midian is named authentically only in the Bible. It has no history elsewhere. The names of places and tribes occasionally throw a feeble light on its past dwellings; but the stories of Arabian writers, borrowed, in the case of the northern Arabs, too frequently from late and untrustworthy Jewish writers, cannot be seriously treated. For reliable facts we must rest on the Biblical narrative. The city of "Medyen [say the Arabs] is the city of the people of Shu'eyb, and is opposite Tabook, on the shore of Bahr el-Kulzum [the Red Sea]: between these is six days' journey. It [Medyen] is larger than Tabook; and in it is the well from which Moses watered the flock of Shu'eyb" (*Marásid*, s. v.). El-Makreezee (in his *Khitat*) enters into considerable detail respecting this city and people. The substance of his account, which is full of incredible fables, is as follows:—Medyen are the people of Shu'eyb, and are the offspring of Medyán[a] [Midian], son of Abraham, and their mother was Kantoorá, the daughter of Yuktán [Joktan] the Canaanite: she bare him eight children, from whom descended peoples. He here quotes the passage above cited from the *Marásid* almost *verbatim*, and adds, that the Arabs dispute whether the name be foreign or Arabic, and whether Medyen spoke Arabic, so-called. Some say that they had a number of kings, who were respectively named Abjad, Hawwez, Huttee, Kelemen, Saafas, and Karashet. This absurd enumeration forms a sentence common in Arabic grammars, which gives the order of the Hebrew and ancient Arabic alphabets, and the numerical order of the letters. It is only curious as possibly containing some vague reference to the *language* of Midian, and it is therefore inserted here. These kings are said to have ruled at Mekkeh, Western Nejd, the Yemen, Medyen, and Egypt, &c., contemporaneously. That Midian penetrated into the Yemen is, it must be observed, extremely improbable, as the writer of this article has remarked in ARABIA, notwithstanding the hints of Arab authors to the contrary, Yákoot, in the *Moojam* (cited in the *Journal of the Deutsch. Morgenl. Gesellschaft*), saying that a southern Arabian dialect is of Midian; and El-Mes'oodee (*ap.* Schultens, p. 158, 9) inserting a Midianite king among the rulers of the Yemen: the latter being, however, more possible than the former, as an accidental and individual, not a national occurrence. The story of Shu'eyb is found in the Kur-án. He was sent as a prophet to warn the people of Midian, and being rejected by them, they were destroyed by a storm from heaven (Sale's *Kur-án*, vii. and xi.). He is generally supposed to be the same as Jethro, the father-in-law of Moses; but some, as Sale informs us, deny this; and one of these says "that he was first called Buyoon, and afterwards Shu'eyb, that he was a comely person, but spare and lean, very thoughtful, and of few words."—The whole Arab story of Medyen and Shu'eyb, even if it contain any truth, is encumbered by a mass of late Rabbinical myths.

El-Makreezee tells us that in the land of Midian were many cities, of which the people had disappeared, and the cities themselves had fallen to ruin; that when he wrote (in the year 825 of the Flight) forty cities remained, the names of some being known, and of others, lost. Of the former, he says, there were, between the Hijáz and Palestine and Egypt, sixteen cities; and ten of these in the direction of Palestine. They were El-Khalasah, Es-Saneetah, El-Medereh, El-Minyeh, El-Aawaj, El-Khuweyrak, El-Beereyn, El-Má-eyn, El-Seba, and El-Mu'allak.[c] The most important of these cities were El-Khalasah[b] and El-Saneetah; the stones of many of them had been removed to El-Ghazzah (Gaza) to build with them. This list, however, must be taken with caution.

In the A. V. of Apocr. and N. T. the name is given as MADIAN. [E. S. P.]

MIDWIFE.[a] Parturition in the East is usually easy.[b] The office of a midwife is thus, in many eastern countries, in little use, but is performed, when necessary, by relatives (Chardin, *Voy.* vii.

مديان. [a]

الخلصة. [b]

المنية. المدرة. السنيطة.

اليمين. الخويرق. الاعوج.

المعلق. السبع. الماءين.

[b] El-Khalasah (sometimes written El-Khulusah, and El-Khulsah), or Dhu-l-Khalasah, possessed an idol-temple, destroyed by order of Mohammad: the idol being named El-Khalasah, or the place, or "growing-place" of El-Khalasah. The place is said to be four days' journey from Ma'kreh, in the 'Ahlá, and called "the southern Kaabeh."

El-Kaaben el-Yemáneeyeh (*Marásid*, s. v., and El-Bekree, and the *Kámoos* there cited). El-Medereh seems also to be the same as Dhu-l-Medereh (*Marásid*, s. v.), and therefore (from the name) probably the site of an idol-temple also.

[a] מְיַלֶּדֶת, part. in P. of יָלַד, "to bring forth:" *maia: obstetrix*. It must be remarked that חָיוֹת, A. V., Ex. i. 19, "lively," is also in Rabbinical Hebrew "midwives," an explanation which appears to have been had in view by the Vulg., which interprets *chayoth* by "ipsae obstetricandi habent scientiam." It is also rendered "living creatures," implying that the Hebrew women were, like animals, quick in parturiton. Gesenius renders "vividae, robustae," p. 468. In any case the general sense of the passage Ex. i. 19 is the same, viz., that the Hebrew women stood in little or no need of the midwives' assistance.

[b] See an illustration of Cant. viii. 5, suggested in Miabna, *Pesach*, x. 5

23; Harmer, *Obs.* iv. 425). [CHILDREN.] It may be for this reason that the number of persons employed for this purpose among the Hebrews was so small, as the passage Ex. i. 19 seems to show; unless, as Knobel and others suggest, the two named were the principal persons of their class.

In the description of the transaction mentioned in Ex. i. one expression "upon the [a]stools" receives remarkable illustration from modern usage. Gesenius doubts the existence of any custom such as the direct meaning of the passage implies, and suggests a wooden or stone trough for washing the new-born child. But the modern Egyptian practice, as described by Mr. Lane, exactly answers to that indicated in the book of Exodus. "Two or three days before the expected time of delivery, the *Layeh* (midwife) conveys to the house the *kursee el-wilâdeh*, a chair of a peculiar form, upon which the patient is to be seated during the birth" (Lane, *Mod. Egypt.* iii. 142).

The moral question arising from the conduct of the midwives does not fall within the scope of the present article. The reader, however, may refer to St. Augustine, *Contr. mendacium*, c. xv. 32, and *Quaest. in Hept.* ii. 1; also Corn. a Lap. *Com. on Ex.* i.

When it is said, "God dealt well with the midwives, and built them houses," we are probably to understand that their families were blessed either in point of numbers or of substance. Other explanations of inferior value have been offered by Kimchi, Calvin, and others (Calmet, *Com. on Ex.* i.; Patrick; Corn. a Lap.; Knobel; Schleusner, *Lex. V. T. oixía*; Ges. p. 193, *Crit. Sacr.*).

It is worth while to notice only to refute on its own ground the Jewish tradition which identified Siphrah and Puah with Jochebed and Miriam, and interpreted the "houses" built for them as the so-called royal and sacerdotal families of Caleb and Moses (Joseph. *Ant.* iii. 2, §4; Corn. a Lap. and *Crit. Sacr. l. c.*; Schöttgen. *Hor. Hebr.* ii. 450; *De Mess.* c. iv.). [H. W. P.]

MIG'DAL-EL (מִגְדַּל־אֵל: Μαγαλαφελμ; Alex. Μαγδαλιηφραμ—both including the succeeding name: *Magdal-El*), one of the fortified towns of the possession of Naphtali (Josh. xix. 38 only), named between IRON and HOREM, possibly deriving its name from some ancient tower—the "tower of El, or God." In the present unexplored condition of the part of Palestine allotted to Naphtali, it is dangerous to hazard conjectures as to the situations of the towns: but if it be possible that *Hurah* is Horem and *Yarûn* Iron, the possibility is strengthened by finding a *Mujeidel*, at no great distance from them, namely, on the left bank of the *Wady Kerkerah*, 8 miles due east of the *Ras en-Nakurah*, 6 miles west of *Hurah* and 8 of *Yarûn* (see Van de Velde's Map, 1858). At any rate the point is worth investigation.

By Eusebius (*Onomasticon*, Μαγδιήλ) it is spoken of as a large village lying between Dora (*Tantura*) and Ptolemais (*Akka*) at 9 miles from the former, that is just about *Athlît*, the ancient "Castellum peregrinorum." No doubt the Castellum was anciently a migdol [b] or tower: but it is hard to locate a town of Naphtali below Carmel, and at least 25 miles from the boundaries of the tribe. For a similar reason *Mejdel* by Tiberias, or the shore of the Lake of Gennesareth, is not likely to be Migdal-el (Rob. *B. R.* ii. 397), since it must be outside the ancient limits of Naphtali and within those of Zebulun. In this case, however, the distance is not so great.

Schwarz (184), reading Migdal-el and Horem as one word, proposes to identify it with *Mejdel el-Kerûm*, a place about 12 miles east of *Akka*.

A *Mejdel* is mentioned by Van de Velde (*Syr. and Pal.* ii. 307) in the central mountains of Palestine, near the edge of the *Ghor*, at the upper end of the *Wady Fasail*, and not far from *Dummeh*, the ancient Edumia. This very possibly represents an ancient Migdal, of which no trace has yet been found in the Bible. It was also visited by Dr. Robinson (*B. R.* iii. 295), who gives good reasons for accepting it as the Magdal-senna mentioned by Jerome (*Onomast.* "Senna") as seven miles north of Jericho, on the border of Judaea. Another Migdal probably lay about two miles south of Jerusalem, near the Bethlehem road, where the cluster of ruins called *Kirbet Um-Mughdala* is now situated (Tobler, *Dritte Wanderung*, 81).

The Migdal-Eder, at which Jacob halted on his way from Bethlehem to Hebron, was a short distance south of the former. [EDAR, TOWER OF.] [G.]

MIG'DAL-GAD (מִגְדַּל־גָּד: Μαγαλγαδ; Alex. Μαγδαλγαδ: *Magdal-Gad*), a city of Judah (Josh. xv. 37); in the district of the *Shefelah*, or maritime lowland; a member of the second group of cities, which contained amongst others LACHISH, EGLON, and MAKKEDAH. By Eusebius and Jerome in the *Onomasticon*, it appears to be mentioned as "Magdala," but without any sign of its being actually known to them. A village called *el Mejdel* lies in the maritime plain, a couple of miles inland from Ascalon, 9 from *Um Lakhis*, and 11 from *Ajlan*. So far this is in support of Van de Velde's identification (*Syr. & P.* ii. 237, 338; *Memoir*, 334; Rob. 1st ed. vol. iii. Appendix 118 *b*) of the place with Migdal-gad, and it would be quite satisfactory if we were not uncertain whether the other two places are Lachish and Eglon. Makkedah at any rate must have been much further north. But to appreciate these conditions, we ought to know the principles on which the groups of towns in these catalogues are arranged, which as yet we do not. Migdal-gad was probably dedicated to or associated with the worship of the ancient deity Gad, another of whose sanctuaries lay at the opposite extremity of the country at BAAL-GAD under Mount Hermon. [G.]

MIG'DOL (מִגְדּוֹל: Μάγδωλον, or Μαγδωλόν: *Magdalum*), proper name of one or two places on the eastern frontier of Egypt, cognate to מִגְדָּל, which appears properly to signify a military watch-tower, as of a town (2 K. ix. 17), or isolated (xvii. 9), and the look-out of a vineyard (Is. v. 2: comp. Matt. xxi. 33, Mark xii. 1), or a shepherd's look-out, if we may judge from the proper name, מִגְדַּל עֵדֶר, "the tower of the flock,"

[a] עַל־הָאֲבָנָיִם, rendered in the LXX. ὅταν δοκῇ τρίβε τὸ τίκτειν; Vulg. *quum partus tempus advenerit*.

[b] May this not be the Magdôlus named by Herodotus, ii. 159, as the site of Pharaoh Necho's victory over Josiah? (See Rawlinson's *Herod.* ii. 246, note.) But this was not the only Migdol along this coast. The Ἱερόπολις τύφων or "Strato's tower," must have been another, and a third possibly stood near Ashkelon. [MEGIDDO; MIGDAL-GAD.]

in which, however, it is possible that the second word is a proper name (Gen. xxxv. 21; and comp. Mic. iv. 8, where the military signification seems to be implied, though perhaps rhetorically only). This form occurs only in Egyptian geography, and it has therefore been supposed by Champollion to be substituted for an Egyptian name of similar sound, the Coptic equivalent in the Bible, ⲙⲁⲅⲇⲱⲗ, ⲙⲁⲕⲧⲱⲗ (Sah.), being, according to him, of Egyptian origin (*L'Égypte sous les Pharaons*, ii. 79, 80; comp. 69). A native etymology has been suggested, giving the signification "multitude of hills"[a] (*Thes.* s. v.). The ancient Egyptian form of Migdol having, however, been found, written in a manner rendering it not improbable that it was a foreign word,[b] MAKTUR or MAKTeRU, as well as so used that it must be of similar meaning to the Hebrew מִגְדּוֹל, and the Coptic equivalent occurring in a form, ⲙⲁⲅⲇⲱⲗ (Sah.), slightly differing from that of the geographical name, with the significations "a circuit, citadels, towers, bulwarks," a point hitherto strangely overlooked, the idea of the Egyptian origin and etymology of the latter must be given up.

Another name on the frontier, Baal-zephon, appears also to be Hebrew or Semitic, and to have a similar signification. [BAAL-ZEPHON.] The ancient Egyptian name occurs in a sculpture on the outer side of the north wall of the great hypostyle hall of the temple of El-Karnak at Thebes, where a fort, or possibly fortified town, is represented, with the name PA-MAKTUR EN RA-MA-MEN, "the tower of Pharaoh, establisher of justice;" the last four words being the prenomen of Sethee I. (B.C. cir. 1322). The sculpture represents the king's triumphal return to Egypt from an eastern expedition, and the place is represented as if on a main road, to the east of Leontopolis.

1. A Migdol is mentioned in the account of the Exodus. Before the passage of the Red Sea the Israelites were commanded "to turn and encamp before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon" (Ex. xiv. 2). In Numbers we read, "And they removed from Etham, and turned again unto Pi-hahiroth, which [is] before Baal-zephon: and they pitched before Migdol. And they departed from before Pi-hahiroth, and passed through the midst of the sea into the wilderness" (xxxiii. 7, 8). We suppose that the position of the encampment was before or at Pi-hahiroth, behind which was Migdol, and on the other hand Baal-zephon and the sea, these places being near together. The place of the encampment and of the passage of the sea we believe to have been not far from the Persepolitan monument, which is made in Linant's map the site of the Serapeum. [EXODUS, THE.]

2. A Migdol is spoken of by Jeremiah and Ezekiel. The latter prophet mentions it as a boundary-town, evidently on the eastern border, corresponding to Seveneh, or Syene, on the southern. He prophesies the desolation of Egypt "from Migdol to Seveneh even unto the border of Cush," מִמִּגְדֹּל סְוֵנֵה וְעַד־גְּבוּל כּוּשׁ (xxix. 10), and predicts slaughter "from Migdol to Seveneh" (xxx. 6). That the eastern border is that on which Migdol was situate is shewn not only by this being the border towards Palestine, and that which a conqueror from the east would pass, but also by the notices in the book of Jeremiah, where this town is spoken of with places in Lower Egypt. In the prophecy to the Jews in Egypt they are spoken of as dwelling at Migdol, Tahpanhes, and Noph, and in the country of Pathros (xliv. 1), and in that foretelling, apparently, an invasion of Egypt by Nebuchadnezzar, Migdol, Noph, and Tahpanhes are again mentioned together (xlvi. 14). It seems plain, from its being spoken of with Memphis, and from Jews dwelling there, that this Migdol was an important town, and not a mere fort, or even military settlement.[c] After this time there is no notice of any place of this name in Egypt, excepting of Magdolus, by Hecataeus of Miletus,[d] and in the *Itinerary of Antoninus*, in which *Magdolo* is placed twelve Roman miles to the southward of Pelusium, in the route from the Serapeum to that town.[e] This latter place most probably represents the Migdol mentioned by Jeremiah and Ezekiel. Its position on the route to Palestine would make it both strategically important and populous, neither of which would be the case with a town in the position of the Migdol of the Pentateuch. Gesenius, however, holds that there is but one Migdol mentioned in the Bible (*Lex.* s. v.). Lepsius distinguishes two Migdols, and considers Magdolo to be the same as the Migdol of Jeremiah and Ezekiel. He supposes the name to be only the Semitic rendering of "the Camp," Στρατόπεδα, the settlement made by Psammetichus I. of Ionian and Carian mercenaries on the Pelusiac branch of the Nile.[f] He ingeniously argues that Migdol is

[a] The derivation is from ⲙⲁⲅ, "multitude," and ⲑⲁⲗ, ⲧⲁⲗ (Sah.), "a hill," which is daring, notwithstanding the instability of the vowels in Coptic. The form ⲙⲁⲅⲑⲁⲗ would better suit this etymology, were there not other reasons than its rashness against it. Forster (J. R.) gives it, on what authority we know not: perhaps it is a misprint (*Epist. ad Michaelis*, p. 29).

[b] Foreign words are usually written with all or most of the vowels in ancient Egyptian: native words, rarely.

[c] We have no account of Jews in the Egyptian military service as early as this time; but it is not impossible that some of the fugitives who took Jeremiah with them may have become mercenaries in Pharaoh Hophra's army.

[d] Steph. Byz. s. v., comp. *Fragmenta Historicorum Graecorum*, i. 20. If the latter part of the passage be from Hecataeus, the town was important in his time. Μαγδωλός, πόλις Αἰγύπτου. Ἑκαταῖος περιηγήσει. τὸ ἐθνικὸν Μαγδωλίτης, κ.τ.λ.

[e] The route is as follows:—"a Serapiu Pelusio mpm lx Thanbasio viii Sile xxviii Magdolo xii Pelusio xii" (Ed. Parthey et Pinder, p. 76). These distances would place the Serapeum somewhat further southward than the site assigned to it in Linant's map [see EXODUS, THE], unless the route were very indirect, which in the desert might well be the case.

[f] Herodotus describes "the Camps" as two places, one on either side of the Nile, and puts them "near the sea, a little below the city Bubastis, on the mouth of the Nile called the Pelusiac." εἰσὶ δὲ οὗτοι οἱ χῶροι πρὸς θαλάσσης ὀλίγον ὑπερθε Βουβάστιος πόλιος, ἐπὶ τῷ Πηλουσίῳ καλεομένῳ στόματι τοῦ Νείλου (ii. 154). This statement is contradictory, as Bubastis is far from the Pelusiac mouth or the sea. Lepsius (*l. c.*) merely speaks of this settlement as near Pelusium, on the Pelusiac mouth below Bubastis, citing the last clause of the following passage of Diodorus Siculus, who gives but a loose repetition of Herodotus, and is not to be taken, here at least, as an independent authority, besides that he may fix the position of a territory only, and not of "the Camp."

mentioned in the Bible at the time of the existence —he rather loosely says foundation—of this settlement, but omitted by the Greek geographers—he should have said after Hecataeus of Miletus—the mercenaries having been removed by Amasis to Memphis (ii. 154), and not afterwards noticed excepting in the *Itinerary of Antoninus* (*Chronologie der Aegypter*, i. 340, and note 5). The Greek and Hebrew or Semitic words do not however offer a sufficient nearness of meaning, nor does the Egyptian usage appear to sanction any deviation in this case; so that we cannot accept this supposition, which, moreover, seems repugnant to the fact that Migdol was a town where Jews dwelt. Champollion (*L'Egypte sous les Pharaons*, ii. 69-71) and others (Ewald, *Geschichte*, 2nd ed., ii. 7 *note*; Schleiden, *Die Landenge von Sués*, pp. 140, 141) have noticed the occurrence of Arabic names which appear to represent the ancient name Migdol, and to be derived from its Coptic equivalent. These names, of which the most common form appears to be Mashtool,[a] are found in the Census of El-Melek en-Nâsir (Mohammad Ibn Kalâoon), given by De Sacy in his translation of 'Abd el-Lateef's History of Egypt. Their frequency favours the opinion that Migdol was a name commonly given in Egypt to forts, especially on or near the eastern frontier. Dr. Schleiden (*l. c.*) objects that Mashtool has an Arabic derivation; but we reply that the modern geography of Egypt offers examples that render this by no means a serious difficulty.

It has been conjectured that the **Μάγδολον** mentioned by Herodotus, in his reference to an expedition of Necho's (ii. 159), supposed to be that in which he slew Josiah, is the Migdol of the prophets (Mannert, *Afrika*, i. 489), and it has even been proposed to read in the Heb. text Migdol for Megiddo (Harenberg, *Bibl. Brem.* vi. 281, seqq.; Rosenmüller, *Alterth.* ii. 99); but the latter idea is unworthy of modern scholarship. [R. S. P.]

MIG'RON (מִגְרוֹן: **Μαγών**; in Isai. **Μαγεδών**, and Alex. **Μαγεδδω**: *Magron*[a]), a town, or a spot —for there is nothing to indicate which—in the neighbourhood of Saul's city, Gibeah, on the very edge of the district belonging to it (1 Sam. xiv. 2); distinguished by a pomegranate-tree, under which on the eve of a memorable event we discover Saul and Ahiah surrounded by the poor remnants of their force. Josephus (*Ant.* vi. 6, §2) presents it as a high hill (**βουνὸς ὑψηλός**), from which there was a wide prospect over the district devastated by the Philistines. But this gives no clue, for Palestine is full of elevated spots commanding wide prospects.

Migron is presented to our view only once again, viz. in the invaluable list of the places disturbed by Sennacherib's approach to Jerusalem (Is. x. 28). But here its position seems a little further north than that indicated in the former passage—supposing, that is, that Gibeah was at *Tuleil el Ful*. It here occurs between Aiath—that is Ai—and Michmash, in other words was on the north of the great ravine of the *Wady-Suweinit*, while Gibeah was more than 2 miles to the south thereof. [GIBEAH, vol. i. 690 *b*, 691.] In Hebrew, *Migron* may mean a "precipice," a frequent feature of the part of the country in question, and it is not impossible therefore that two places of the same name are intended—a common occurrence in primitive countries and tongues where each rock or ravine has its appellation, and where no reluctance or inconvenience is found in having places of the same name in close proximity. As easily two Migrons, as two Gibeahs, or two Shochos.

The LXX. seem to have had MEGIDDO in their intentions, but this is quite inadmissible. (See Josephus, *Ant.* vi. 6, §2.) [G.]

MI'JAMIN (מִיָּמִן: **Μειαμίν**; Alex. **Μειαμείν**: *Maïman*). 1. The chief of the sixth of the 24 courses of priests established by David (1 Chr. xxiv. 9).

2. (**Μιαμίν**; Alex. **Μιαμείν**; F. A. **Μειαμάν**: *Miamin*). A family of priests who signed the covenant with Nehemiah; probably the descendants of the preceding, and the same as MIAMIN 2 (Neh. x. 7), and MINIAMIN 2.

MIK'LOTH (מִקְלוֹת: **Μακελλώθ**; Alex. **Μακεδώθ** in 1 Chr. ix.: *Macelloth*). 1. One of the sons of Jehiel, the father or prince of Gibeon, by his wife Maachah (1 Chr. viii. 32, ix. 37, 38). His son is variously called Shimeah or Shimeam.

2. (**Μακελλώθ**). The leader (נָגִיד. *nâgîd*) of the second division of David's army (1 Chr. xxvii. 4), of which Dodai the Ahohite was captain (שַׂר, *sar*). The *nâgîd*, in a military sense, appears to have been an officer superior in rank to the captains of thousands and the captains of hundreds (1 Chr. xiii. 1).[b]

MIKNEI'AH (מִקְנְיָהוּ: **Μακελλία**; Alex. **Μακενία**; F. A. **Μακελλά**, 1 Chr. xv. 18; **Μακενία**: Alex. **Μακενίας**, 1 Chr. xv. 21: *Macenias*). One of the Levites of the second rank, gatekeepers of the ark, appointed by David to play in the Temple band "with harps upon Sheminith."

MILALA'I (מִלַּלַי: om. in LXX.: *Malalâ*). Probably a Gershonite Levite of the sons of Asaph, who, with Ezra at their head, played "the musical instruments of David the man of God" in the solemn procession round the walls of Jerusalem which accompanied their dedication (Neh. xii. 36). [MATTANIAH 2.]

MIL'CAH (מִלְכָּה: **Μελχά**: *Melcha*). 1. Daughter of Haran and wife of her uncle Nahor, Abraham's brother, to whom she bare eight children: the youngest, Bethuel, was the father of Rebekah (Gen. xi. 29, xxii. 20, 23, xxiv. 15, 24, 47). She was the sister of Lot, and her son Bethuel is distinguished as "Nahor's son, whom Milcah bare unto him," apparently to indicate that he was of the purest blood of Abraham's ancestry, being descended both from Haran and Nahor.

2. The fourth daughter of Zelophehad (Num. xxvi. 33, xxvii. 1, xxxvi. 11; Josh. xvii. 3).

MIL'COM (מִלְכֹם: **ὁ βασιλεὺς αὐτῶν**: *Moloch*, 1 K. xi. 5, 33; **ὁ Μολόχ**; Alex. **Ἀμελχόμ**. *Melchom*, 2 K. xxiii. 13). The "abomination" of the children of Ammon, elsewhere called MOLECH

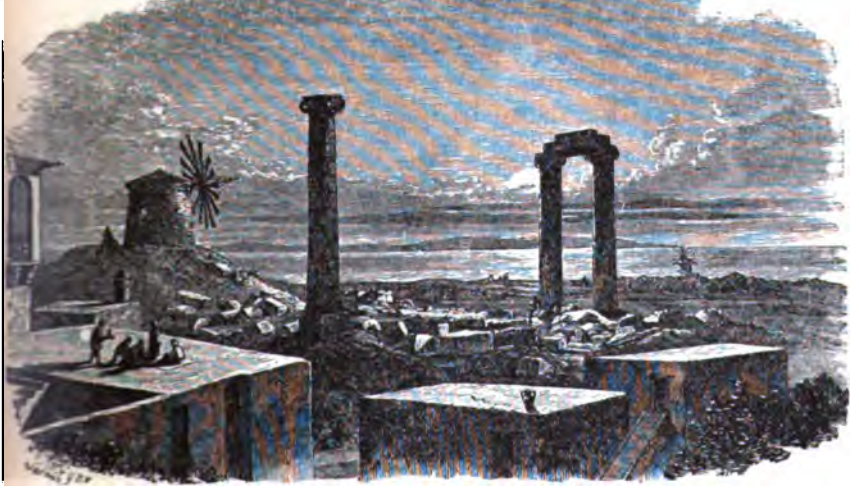
τοῖς δὲ μισθοφόροις τὰ καλούμενα στρατόπεδα τόπον (var. τοῖς καλουμένοις στρατοπέδοις τόπον) οἰκεῖν ἔδωκε, καὶ χώραν πολλὴν κατεκληροῦχησε μικρὸν ἐπάνω τοῦ Πηλουσιακοῦ στόματος (I. 67).

[a] مشتول.

[a] Or in some MSS. *in agrum Gabaa*.

[b] This verse should be rendered, "And David consorted with the captains of thousands and hundreds, belonging to each leader" (*nâgîd*).

(1 K. xi. 7, &c.) and MALCHAM (Zeph. i. 5, marg. "their king"), of the latter of which it is probably a dialectical variation. Movers (*Phönizier*, i. 358) calls it an Aramaic pronunciation.



MILE (Μίλιον, the Greek form of the Latin *milliarium*), a Roman measure of length equal to 1618 English yards. It is only once noticed in the Bible (Matt. v. 41), the usual method of reckoning both in it and in Josephus being by the stadium. The Roman system of measurement was fully introduced into Palestine, though probably at a later date; the Talmudists admitted the term "mile" (מִיל) into their vocabulary: both Jerome (in his *Onomasticon*) and the Itineraries compute the distances in Palestine by miles; and to this day the old milestones may be seen, here and there, in that country (Robinson's *Bib. Res.* ii. 161 *note*, iii. 306). The mile of the Jews is said to have been of two kinds, long or short, dependent on the length of the pace, which varied in different parts, the long pace being double the length of the short one (Carpzov's *Apparat.* p. 679). [W. L. B.]

MILETUS (Μίλητος: *Miletus*) Acts xx. 15, 17, less correctly called MILETUM in 2 Tim. iv. 20. The first of these passages brings before us the scene of the most pathetic occasion of St. Paul's life; the second is interesting and important in reference to the question of the Apostle's second imprisonment.

St. Paul, on the return voyage from his third missionary journey, having left Philippi after the passover (Acts xx. 6), and desirous, if possible, to be in Jerusalem at Pentecost (*ib.* 16), determined to pass by Ephesus. Wishing, however, to communicate with the church in which he had laboured so long, he sent for the presbyters of Ephesus to meet him at Miletus. In the context we have the geographical relations of the latter city brought out as distinctly, as if it were St. Luke's purpose to state them. In the first place it lay on the coast to the S. of Ephesus. Next, it was a day's sail from Trogyllium (ver. 15). Moreover, to those who are sailing from the north, it is in the direct line for Cos. We should also notice that it was near enough to Ephesus by land communication, for the message to be sent and the presbyters to come within a very narrow space of time. All these details correspond with the geographical facts of the case. As to the last point, Ephesus was by land only about 20 or 30 miles distant from Miletus. There is a further and more minute topographical coincidence, which may be seen in the phrase. "They accompanied him to the ship," implying as it does that the vessel lay at some distance from the town. The site of Miletus has now receded ten miles from the coast, and even in the Apostle's time it must have lost its strictly maritime position. This point is noticed by Prof. Hackett in his *Comm. on the Acts* (2nd ed. p. 344); compare Acts xxi. 5. In each case we have a low flat shore, as a marked and definite feature of the scene.

The passage in the second Epistle to Timothy where Miletus is mentioned, presents a very serious difficulty to the theory that there was only one Roman imprisonment. When St. Paul visited the place on the occasion just described, Trophimus was indeed with him (Acts xx. 4); but he certainly did not "leave him sick at Miletus;" for at the conclusion of the voyage we find him with the Apostle at Jerusalem (Acts xxi. 29). Nor is it possible that he could have been so left on the voyage from Caesarea to Rome: for in the first place there is no reason to believe that Trophimus was with the Apostle then at all; and in the second place the ship was never to the north of Cnidus (Acts xxvii. 7). But on the hypothesis that St. Paul was liberated from Rome and revisited the neighbourhood of Ephesus, all becomes easy, and consistent with the other notices of his movements in the Pastoral Epistles. Various combinations are possible. See *Life and Epistles of St. Paul*, ch. xxvii., and Birks, *Horae Apostolicae*.

As to the history of Miletus itself, it was far more famous five hundred years before St. Paul's day

Temple of Apollo at Miletus.

than it ever became afterwards. In early times it was the most flourishing city of the Ionian Greeks. The ships which sailed from it were celebrated for their distant voyages. Miletus suffered in the progress of the Lydian kingdom and became tributary to Croesus. In the natural order of events, it was absorbed in the Persian empire: and, revolting, it was stormed and sacked. After a brief period of spirited independence, it received a blow from which it never recovered, in the siege conducted by Alexander, when on his Eastern campaign. But still it held, even through the Roman period, the rank of a second-rate trading town, and Strabo mentions its four harbours. At this time it was politically in the province of ASIA, though CARIA was the old ethnological name of the district in which it was situated. Its pre-eminence on this coast had now long been yielded up to EPHESUS. These changes can be vividly traced by comparing the whole series of coins of the two places. In the case of Miletus, those of the autonomous period are numerous and beautiful, those of the imperial period very scanty. Still Miletus was for some time an episcopal city of Western Asia. Its final decay was doubtless promoted by that silting up of the Maeander, to which we have alluded. No remains worth describing are now found in the swamps which conceal the site of the city of Thales and Hecataeus. [J. S. H.]

MILK. As an article of diet, milk holds a more important position in Eastern countries than with us. It is not a mere adjunct in cookery, or restricted to the use of the young, although it is naturally the characteristic food of childhood, both from its simple and nutritive qualities (1 Pet. ii. 2), and particularly as contrasted with meat (1 Cor. iii. 2; Heb. v. 12): but beyond this it is regarded as substantial food adapted alike to all ages and classes. Hence it is enumerated among "the principal things for the whole use of a man's life" (Ecclus. xxxix. 26), and it appears as the very emblem of abundance[a] and wealth, either in conjunction with honey (Ex. iii. 8; Deut. vi. 3, xi. 9) or wine (Is. lv. 1), or even by itself (Job xxi. 24[b]): hence also to "suck the milk" of an enemy's land was an expression betokening its complete subjection (Is. lx. 16; Ez. xxv. 4). Not only the milk of cows, but of sheep (Deut. xxxii. 14), of camels (Gen. xxxii. 15), and of goats (Prov. xxvii. 27) was used; the latter appears to have been most highly prized. The use of camel's milk still prevails among the Arabs Burckhardt's *Notes*, i. 44).

Milk was used sometimes in its natural state, and sometimes in a sour, coagulated state: the former was named *khâlâb*,[c] and the latter *khemah*.[d] In the A. V. the latter is rendered "butter," but there can be no question that in every case (except perhaps Prov. xxx. 33) the term refers to a preparation of milk well known in Eastern countries under the name of *leben*. The method now pursued in its preparation is to boil the milk over a slow fire, adding to it a small piece of old *leben* or some other acid in order to make it coagulate (Russell, *Aleppo*, i. 116, 370; Burckhardt, *Arabia*, i. 60). The refreshing draught which Jael offered "in a lordly dish" to Sisera (Judg. v. 25) was *leben*, as Josephus particularly notes (γάλα διαφθορὸς ἥδη, *Ant.* v. 5, §4): it was produced from one of the goatskin bottles which are still used for the purpose by the Bedouins (Judg. iv. 19; comp. Burckhardt's *Notes*, i. 45). As it would keep for a considerable time it was particularly adapted to the use of travellers (2 Sam. xvii. 29). The amount of milk required for its production was of course considerable; and hence in Is. vii. 22 the use of *leben* is predicted as a consequence of the depopulation of the land, when all agriculture had ceased, and the fields were covered with grass. In Job xx. 17, xxix. 6, the term is used as an emblem of abundance in the same sense as milk. *Leben* is still extensively used in the East: at certain seasons of the year the poor almost live upon it, while the upper classes eat it with salad or meat (Russell, i. 118). It is still offered in hospitality to the passing stranger, exactly as of old in Abraham's tent (Gen. xviii. 8; comp. Robinson, *Bib. Res.* i. 571, ii. 70, 211), so freely indeed that in some parts of Arabia it would be regarded a scandal if money were received in return (Burckhardt's *Arabia*, i. 120, ii. 106). Whether milk was used instead of water for the purpose of boiling meat, as is at present not unusual among the Bedouins, is uncertain. [COOKING.] The prohibition against seething a kid in its mother's milk (occurring as it does amid the regulations of the harvest festival, Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21) was probably directed against some heathen usage practised at the time of harvest. [W. L. B.]

MILL. The mills (רֵחַיִם, *rechaim*)[e] of the ancient Hebrews probably differed but little from those at present in use in the East. These consist of two circular stones, about 18 in. or two feet in diameter, the lower of which (Lat. *meta*) is fixed, and has its upper surface slightly convex, fitting into a corresponding concavity in the upper stone (Lat. *catillus*). The latter, called by the Hebrews *recab* (רֶכֶב), "chariot," and by the Arabs *rekkâs*, "rider," has a hole in it through which the grain passes, immediately above a pivot or shaft which rises from the centre of the lower stone, and about which the upper stone is turned by means of an upright handle fixed near the edge. It is worked by women, sometimes singly and sometimes two together, who are usually seated on the bare ground (Is. xlvii. 1, 2) "facing each other; both have hold of the handle by which the upper is turned round on the 'nether' millstone. The one whose right hand is disengaged throws in the grain as occasion requires through the hole in the upper stone. It is not correct to say that one pushes it half round,

[a] This is expressed in the Hebrew term for milk, *chalab*, the etymological force of which is "fatness." We may compare with the Scriptural expression, "a land flowing with milk and honey," the following passages from the classical writers:—

Ῥεῖ δὲ γάλακτι πέδον,
Ῥεῖ δ' οἴνῳ, ῥεῖ δὲ μελισσοῦν
Νέκταρι.—EURIP. *Bacch.* 142.

"Fluminа jam lactis, jam flumina nectaris ibant:
Flavaque de viridi stillabant ilice mella."
Ov. *Met.* i. 111.

[b] In this passage the marginal reading, 'milk pails,' is preferable to the text, "breasts." The Hebrew word does not occur elsewhere, and hence its meaning is doubtful. Perhaps its true sense is "farm-yard" or "field."

[c] חָלָב. [d] חֶמְאָה.

[e] Compare Arabic رحيان, *rahayán*, the dual of رحى, *rahá*, a mill. The dual form of course refers to the pair of stones composing the mill.

and then the other seizes the handle. This would be slow work, and would give a spasmodic motion to the stone. Both retain their hold, and pull *to*, or push *from*, as men do with the whip or cross-cut saw. The proverb of our Saviour (Matt. xxiv. 41) is true to life, for *women* only grind. I cannot recall an instance in which men were at the mill" (Thomson, *The Land and the Book*, c. 34). The labour is very hard, and the task of grinding in consequence performed only by the lowest servants (Ex. xi. 5; comp. Plaut. *Merc.* ii. 3), and captives (Judg. xvi. 21; Job. xxxi. 10; Is. xlvii. 1, 2; Lam. v. 13; comp. Hom. *Od.* vii. 103; Suet. *Tib.* c. 51).[b] So essential were mill-stones for daily domestic use, that they were forbidden to be taken as pledge (Deut. xxiv. 6; Jos. *Ant.* iv. 8, §26), in order that a man's family might not be deprived of the means of preparing their food. Among the Fellahs of the Hauran one of the chief articles of furniture described by Burckhardt (*Syria*, p. 292) is the "*hand-mill* which is used in summer when there is no water in the wadys to drive the mills." The sound of the mill is the indication of peaceful household life, and the absence of it is a sign of desolation and abandonment, "When the sound of the mill is low" (Eccl. xii. 4). No more affecting picture of utter destruction could be imagined than that conveyed in the threat denounced against Judah by the mouth of the prophet Jeremiah (xxv. 10), "I will take from them the voice of mirth, and the voice of gladness, the voice of the bridegroom and the voice of the bride, *the sound of the mill-stones*, and the light of the candle" (comp. Rev. xviii. 22). The song of the women grinding is supposed by some to be alluded to in Eccl. xii. 4, and it was evidently so understood by the LXX,[c] but Dr. Robinson says (i. 485) "we heard no song as an accompaniment to the work," and Dr. Hackett (*Bibl. Illust.* p. 49) describes it rather as shrieking than singing. It is alluded to in Homer (*Od.* xx. 105–119): and Athenaeus (xiv. p. 619*a*) refers to a peculiar chant which was sung by women winnowing corn and mentioned by Aristophanes in the *Thesmophoriazusae*.

The hand-mills of the ancient Egyptians appear to have been of the same character as those of their descendants, and like them were worked by women (Wilkinson, *Anc. Eg.* ii. p. 118, &c.). "They had also a large mill on a very similar principle; but the stones were of far greater power and dimensions; and this could only have been turned by cattle or asses, like those of the ancient Romans, and of the modern Cairenes." It was the mill-stone of a mill of this kind, driven by an ass,[d] which is alluded to in Matt. xviii. 6 (*μύλος ὀνικός*), to distinguish it, says Lightfoot (*Hor. Hebr.* in loc.) from those small mills which were used to grind spices for the wound of circumcision, or for the delights of the sabbath, and to which both Kinchi and Jarchi find a reference in Jer. xxv. 10. Of a married man with slender means it is said in the Talmud (*Kiddushin*, p. 29*b*), "with a millstone on his neck he studies the law," and the expression is still proverbial (Tendlau, *Sprichwörter*, p. 181).

It was the moveable upper millstone of the hand-mill with which the woman of Thebez broke Abimelech's skull (Judg. ix. 53). It is now generally made, according to Dr. Thomson, of a porous lava brought from the Hauran, both stones being of the same material, but, says the same traveller, "I have seen the *nether* made of a compact sandstone, and quite thick, while the *upper* was of this lava, probably because from its lightness it is the more easily driven round with the hand" (*The Land and the Book*, ch. 34). The porous lava to which he refers is probably the same as the black tufa mentioned by Burckhardt (*Syria*, p. 57), the blocks of which are brought from the Lejah, and are fashioned into millstones by the inhabitants of Ezra, a village in the Hauran. "They vary in price according to their size, from 15 to 60 piastres, and are preferred to all others on account of the hardness of the stone."

The Israelites, in their passage through the desert, had with them hand-mills, as well as mortars [MORTAR] in which they ground the manna (Num. xi. 8). One passage (Lam. v. 13) is deserving of notice, which Hoheisel (*de Molis Manual. Vet.* in Ugolini, vol. xxix) explains in a manner which gives it a point which is lost in our A. V. It may be rendered, "the choice (men) bore the mill (רֵחַיִם, *rechôn*),[e] and the youths stumbled beneath the wood;" the wood being the woodwork or shaft of the mill, which the captives were compelled to carry. There are besides allusions to other apparatus connected with the operation of grinding, the sieve, or bolter (נָפָה, *nâphâh*, Is. xxx. 28; or כְּבָרָה, *cĕbârâh*, Am. ix. 9) and the hopper, though the latter is only found in the Mishna (*Zabim*, iv. 3), and was a late invention. We also find in the Mishna (*Demai*, iii. 4) that mention is made of a miller (טוֹחֵן, *tôchên*), indicating that grinding corn was recognized as a distinct occupation. Wind-mills and water-mills are of more recent date. [W. A. W.]

MILLET (דֹּחַן,[a] *dôchan*: *κέγχρος*: *milium*), in all probability the grains of *Panicum miliaceum* and *italicum*, and of the *Holcus sorghum*, Linn. (the *Sorghum vulgare* of modern writers), may all be comprehended by the Hebrew word. Mention of millet occurs only in Ez. iv. 9, where it is enumerated together with wheat, barley, beans, lentils, and fitches, which the prophet was ordered to make into bread. Celsius (*Hierob.* i. 454) has given the names of numerous old writers who are in favour of the interpretation adopted by the LXX. and Vulg.; the Chaldee, Syriac, and Arabic versions have a word identical with the Hebrew. That "millet" is the correct rendering of the original word there can be no doubt; the only question that remains for consideration is, what is the particular species of millet intended: is it the *Panicum miliaceum*, or the *Sorghum vulgare*, or may both kinds be denoted? The Arabs to this day apply the term *dukhan*

[b] Grinding is reckoned in the Mishna (*Shabbath*, vii. 2) among the chief household duties, to be performed by the wife unless she brought with her one servant (*Cethubath*, v 5); in which case she was relieved from grinding, baking, and washing, but was still obliged to suckle her child, make her husband's bed, and work in wool.

[c] *ἐν ἀσθενείᾳ φωνῆς τῆς ἀληθούσης*, reading טְחֹנֶת, *techônâth*, "a woman grinding," for טְחֹנֶת, *tachônâth*, "a mill."

[d] Comp. Ovid, *Fast.* vi. 318 "*et quae pumicea versat molla Mycon.*"

[e] Compare the Arabic طاحون, *tahoon*, a mill.

[a] From root דָּחַן, "to be dusky," in allusion to the colour of the seeds

to the *Panicum miliaceum*, but Forskål (*Descr. Plant.* p. 174) uses the name of the *Holcus dochna*, "a plant," says Dr. Royle (Kitto's *Cyc.* art. "Dokhan"), "as yet unknown to botanists." The *Holcus durrha* of Forskål, which he says the Arabs call *tdam*, and which he distinguishes from the *H. dochna*, appears to be identical with the *durrha*, *Sorghum vulgare*, of modern botanists. It is impossible in the case of these and many other cereal grains to say to what countries they are indigenous. Sir G. Wilkinson enumerates wheat, beans, lentiles, and *dourrha*, as being preserved by seeds, or by representation on the ancient tombs of Egypt, and has no doubt that the *Holcus sorghum* was known to the ancient inhabitants of that country. Dr. Royle maintains that the true *dukhun* of Arab authors is the *Panicum miliaceum*, which is universally cultivated in the East. Celsius (*Hierob.* l. c.) and Hiller (*Hierophyt.* ii. 124) give *Panicum* as the rendering of *Dochan*; the LXX. word κέγχρος, in all probability is the *Panicum italicum*, a grass cultivated in Europe as an article of diet. There is, however, some difficulty in identifying the precise plants spoken of by the Greeks and Romans under the names of κέγχρος, ἕλυμος, *panicum*, *milium*, &c.

Sorghum vulgare.

The *Panicum miliaceum* is cultivated in Europe and in tropical countries, and like the *dourrha*, is often used as an ingredient in making bread; in India it is cultivated in the cold weather with wheat and barley. Tournefort (*Voyage*, ii. 95) says that the poor people of Samos make bread by mixing half wheat and half barley and white millet. The seeds of millet in this country are, as is well known, extensively used as food for birds. It is probable that both the *Sorghum vulgare*, and the *Panicum miliaceum*, were used by the ancient Hebrews as Egyptians, and that the Heb. *Dochan* may denote either of these plants. Two cultivated species of *Panicum* are named as occurring in Palestine, viz. *P. miliaceum* and *P. italicum*, (Strand's *Flor. Palaest.* Nos. 35, 37). The genera *Sorghum* and *Panicum* belong to the natural order *Gramineæ*, perhaps the most important order in the vegetable kingdom. [W. H.]

Panicum Miliaceum.

MIL'LO (הַמִּלּוֹא, always with the definite article: ἡ ἄκρα, once τὸ ἀνάλημμα; Alex. in 1 K. ix. only, ἡ μελω: *Mello*), a place in ancient Jerusalem. Both name and thing seem to have been already in existence when the city was taken from the Jebusites by David. His first occupation after getting possession was to build "round about, from the Millo and to the house" (A. V. "inward;" 2 Sam. v. 9): or as the parallel passage has it, "he built the city round about, and from the Millo round about" (1 Chr. xi. 8). Its repair or restoration was one of the great works for which Solomon raised his "levy" (1 K. ix. 15, 24, x. 27); and it formed a prominent part of the fortifications by which Hezekiah prepared for the approach of the Assyrians (2 Chr. xxxii. 5). The last passage seems to show that "the Millo" was part of the "city of David," that is of Zion, a conclusion which is certainly supported by the singular passage 2 K. xii. 20, where, whichever view we take of Silla, the "house of Millo" must be in the neighbourhood of the Tyropoeon valley which lay at the foot of Zion. More than this it seems impossible to gather from the notices quoted above—all the passages in which the name is found in the O. T.

If "Millo" be taken as a Hebrew word, it would be derived from a root which has the force of "filling" (see Gesenius, *Thes.* 787, 789). This notion has been applied by the interpreters after their custom in the most various and opposite ways:—a rampart (*agger*); a mound; an open space used for assemblies, and therefore often filled with people; a ditch or valley; even a trench filled with water. It has led the writers of the Targums to render Millo by מְלִיתָא, *i. e. Millētha*, the term

by which in other passages they express the Hebrew מְסִלָּה, *sol'lah*, the mound which in ancient warfare was used to besiege a town. But unfortunately none of these guesses enable us to ascertain what Millo really was, and it would probably be nearer the truth—it is certainly safer—to look on the name as an ancient or archaic term, Jebusite, or possibly even still older, adopted by the Israelites when they took the town, and incorporated into their own nomenclature.[a] That it was an antehebraic term is supported by its occurrence in connection with Shechem, so eminently a Canaanite place. (See the next article.) The only ray of light which we can obtain is from the LXX. Their rendering in every case (excepting[b] only 2 Chr. xxxii. 5) is ἡ ἄκρα, a word which they employ nowhere else in the O. T. Now ἡ ἄκρα means "the citadel," and it is remarkable that it is the word used with unvarying persistence throughout the Books of Maccabees for the fortress on Mount Zion, which was occupied throughout the struggle by the adherents of Antiochus, and was at last razed and the very hill levelled by Simon. [JERUSALEM, vol. i. p. 1000 *b*, 1002 *a*, &c.] It is therefore perhaps not too much to assume that the word *millo* was employed in the Hebrew original of 1 Maccabees. The point is exceedingly obscure, and the above is at the best little more than mere conjecture, though it agrees so far with the slight indications of 2 Chr. xxxii. 5, as noticed already. [G.]

MIL'LO, THE HOUSE OF. 1. (בֵּית מִלּוֹא: ὁ οἶκος Βηθμαδλων; Alex. οικος μαελλων: *urbs Mello; oppidum Mello*). Apparently a family or clan, mentioned in Judg. ix. 6, 20 only, in connexion with the men or lords of Shechem, and concerned with them in the affair of Abimelech. No clue is given by the original or any of the versions as to the meaning of the name.

2. (בֵּית מִלּוֹא: οἶκος Μαδλω: *domus Mello*). The "house of Millo that goeth down to Silla" was the spot at which king Joash was murdered by his slaves (2 K. xii. 20). There is nothing to lead us to suppose that the murder was not committed in Jerusalem, and in that case the spot must be connected with the ancient Millo (see preceding article). Two explanations have been suggested of the name SILLA. These will be discussed more fully under that head, but whichever is adopted would equally place Beth Millo in or near the Tyropoeon, taking that to be where it is shown in the plan of Jerusalem, at vol. i. p. 1018. More than this can hardly be said on the subject in the present state of our knowledge. [G.]

MINES, MINING. "Surely there is a source for the *silver*, and a place for the *gold* which they refine. *Iron* is taken out of the soil, and stone man melts (for) copper. He hath put an end to darkness, and to all perfection (*i. e.*, most thoroughly) he searcheth the stone of thick darkness and of the shadow of death. He hath sunk a shaft far from the wanderer; they that are forgotten of the foot are suspended, away from man they waver to and fro. (As for) the earth, from her cometh forth bread, yet her nethermost parts are upturned as (by) fire. The place of sapphire (are) her stones, and dust of gold is his. A track which the bird of prey hath not known, nor the eye of the falcon glared upon; which the sons of pride (*i. e.* wild beasts) have not trodden, nor the roaring lion gone over; in the flint man hath thrust his hand, he hath overturned mountains from the root; in the rocks he hath cleft channels,[a] and every rare thing hath his eye seen: the streams hath he bound that they weep not, and that which is hid he bringeth forth to light" (Job xxviii. 1-11). Such is the highly poetical description given by the author of the book of Job of the operations of mining as known in his day, the only record of the kind which we inherit from the ancient Hebrews. The question of the date of the book cannot be much influenced by it; for indications of a very advanced state of metallurgical knowledge are found in the monuments of the Egyptians at a period at least as early as any which would be claimed for the author. Leaving this point to be settled independently, therefore, it remains to be seen what is implied in the words of the poem.

It may be fairly inferred from the description that a distinction is made between gold obtained in the manner indicated, and that which is found in the natural state in the alluvial soil, among the debris washed down by the torrents. This appears to be implied in the expression "the gold they refine," which presupposes a process by which the pure gold is extracted from the ore, and separated from the silver or copper with which it may have been mixed. What is said of gold may be equally applied to silver, for in almost every allusion to the process of refining the two metals are associated. In the passage of Job which has been quoted, so far as can be made out from the obscurities with which it is beset, the natural order of mining operations is observed in the description. The whole point is obviously contained in the contrast, "Surely there is a source for the silver, and a place for the gold which men refine,—but where shall wisdom be found, and where is the place of understanding?" No labour is too great for extorting from the earth its treasures. The shaft is sunk, and the adventurous miner, far from the haunts of men, hangs in mid-air (v. 4): the bowels of the earth—which in the course of nature grows but corn—are overthrown as though wasted by fire. The path which the miner pursues in his underground course is unseen by the keen eye of the falcon, nor have the boldest beasts of prey traversed it, but man wins his way through every obstacle, hews out tunnels in the rock, stops the water from flooding his mine, and brings to light the precious metals as the reward of his adventure. No description could be more complete. The poet might have had before him the copper mines of the Sinaitic peninsula. In the Wady Maghâreh, "the valley of the Cave," are still traces of the Egyptian colony of miners who settled there for the purpose of extracting copper from the freestone rocks, and left their hieroglyphic inscriptions upon the face of the cliff. That these inscriptions are of great antiquity there can be little doubt, though Lepsius may not be justified in placing them at a date

[a] Just as the Knichtens-guild Lane of Saxon London became Nightingale Lane, as the Saxon name grew unintelligible.

[b] Here, and here only, the LXX. have τὸ ἀνάλημμα, perhaps the "foundation" or "substruction"; though Schleusner gives also the meaning *altitudo*.

[a] It is curious that the word יְאֹר, *yeôr*, here used, is apparently Egyptian in origin, and if so may have been a technical term among the Egyptian miners of the Sinaitic peninsula.

B.C. 4000. "Already, under the fourth dynasty of Manetho," he says, "the same which erected the great pyramids of Gizeh, 4000 B.C., copper mines had been discovered in this desert, which were worked by a colony. The peninsula was then inhabited by Asiatic, probably Semitic races; therefore do we often see in those rock sculptures, the triumphs of Pharaoh over the enemies of Egypt. Almost all the inscriptions belong to the Old Empire, only one was found of the co-regency of Tuthmosis III. and his sister" (*Letters from Egypt*, p. 346, Eng. tr.). In the Maghârah tablets Mr. Drew (*Scripture Lands*, p. 50 *note*) "saw the cartouche of Suphis, the builder of the Great Pyramid, and on the stones at Sûrâbît el Khâdim there are those of kings of the eighteenth and nineteenth dynasties." But the most interesting description of this mining colony is to be found in a letter to the Athenaeum (June 4, 1859, No. 1649, p. 747), signed M. Δ. and dated from "Sarabut el Khadem, in the Desert of Sinai, May, 1859." The writer discovered on the mountain exactly opposite the caves of Maghârah, traces of an ancient fortress intended, as he conjectures, for the protection of the miners. The hill on which it stands is about 1000 feet high, nearly insulated, and formed of a series of precipitous terraces, one above the other, like the steps of the pyramids. The uppermost of these was entirely surrounded by a strong wall within which were found remains of 140 houses, each about ten feet square. There were, besides, the remains of ancient hammers of green porphyry, and reservoirs "so disposed that when one was full the surplus ran into the others, and so in succession, so that they must have had water enough to last for years. The ancient furnaces are still to be seen, and on the coast of the Red Sea are found the piers and wharves whence the miners shipped their metal in the harbour of Abu Zelîmeh. Five miles from Sarabut el Khadem the same traveller found the ruins of a much greater number of houses, indicating the existence of a large mining population, and, besides, five immense reservoirs formed by damming up various wadys. Other mines appear to have been discovered by Dr. Wilson in the granite mountains east of the Wady Mokatteb. In the Wady Nasb the German traveller Rüppell, who was commissioned by Mohammed Alî, the Viceroy of Egypt, to examine the state of the mines there, met with remains of several large smelting furnaces, surrounded by heaps of slag. The ancient inhabitants had sunk shafts in several directions, leaving here and there columns to prevent the whole from falling in. In one of the mines he saw huge masses of stone rich in copper (Ritter, *Erdkunde*, xiii. 786). The copper mines of Phaeno in Idumaea, according to Jerome, were between Zoar and Petra: in the persecution of Diocletian the Christians were condemned to work them.

The gold mines of Egypt in the Bishâree desert, the principal station of which was Eshuranib, about three days' journey beyond Wady Allaga, have been discovered within the last few years by M. Linant and Mr. Bonomi, the latter of whom supplied Sir G. Wilkinson with a description of them, which he quotes (*Anc. Eg.* iii. 229, 230). Ruins of the miners' huts still remain as at Surâbît el-Khâdim. "In those nearest the mines lived the workmen who were employed to break the quartz into small fragments, the size of a bean, from whose hands the pounded stone passed to the persons who ground it in hand-mills, similar to those now used for corn in the valley of the Nile made of granitic stone, one of which is to be found in almost every house at these mines, either entire or broken. The quartz thus reduced to powder was washed on inclined tables, furnished with two cisterns, all built of fragments of stone collected there; and near these inclined planes are generally found little white mounds, the residue of the operation." According to the account given by Diodorus Siculus (iii. 12-14), the mines were worked by gangs of convicts and captives in fetters, who were kept day and night to their task by the soldiers set to guard them. The work was superintended by an engineer, who selected the stone and pointed it out to the miners. The harder rock was split by the application of fire, but the softer was broken up with picks and chisels. The miners were quite naked, their bodies being painted according to the colour of the rock they were working, and in order to see in the dark passages of the mine they carried lamps upon their heads. The stone as it fell was carried off by boys, it was then pounded in stone mortars with iron pestles by those who were over 30 years of age till it was reduced to the size of a lentil. The women and old men afterwards ground it in mills to a fine powder. The final process of separating the gold from the pounded stone was entrusted to the engineers who superintended the work. They spread this powder upon a board slightly inclined table, and rubbed it gently with the hand, pouring water upon it from time to time so as to carry away all the earthy matter, leaving the heavier particles upon the board. This was repeated several times; at first with the hand and afterwards with fine sponges gently pressed upon the earthy substance, till nothing but the gold was left. It was then collected by other workmen, and placed in earthen crucibles with a mixture of lead and salt in certain proportions, together with a little tin and some barley bran. The crucibles were covered and carefully closed with clay, and in this condition baked in a furnace for five days and nights without intermission. Of the three methods which have been employed for refining gold and silver, 1. by exposing the fused metal to a current of air; 2. by keeping the alloy in a state of fusion and throwing nitre upon it; and 3. by mixing the alloy with lead, exposing the whole to fusion upon a vessel of bone-ashes or earth, and blowing upon it with bellows or other blast; the latter appears most nearly to coincide with the description of Diodorus. To this process, known as the cupelling process [LEAD], there seems to be a reference in Ps. xii. 6; Jer. vi. 28-30; Ez. xxii. 18-22, and from it Mr. Napier (*Met. of the Bible*, p. 24) deduces a striking illustration of Mal. iii. 2, 3, "he shall sit as a refiner and purifier of silver," &c. "When the alloy is melted . . . upon a cupell, and the air blown upon it, the surface of the melted metals has a deep orange-red colour, with a kind of flickering wave constantly passing over the surface . . . As the process proceeds the heat is increased . . . and in a little the colour of the fused metal becomes lighter. . . . At this stage the refiner watches the operation, either standing or sitting, with the greatest earnestness, until all the orange colour and shading disappears, and the metal has the appearance of a highly-polished mirror, reflecting every object around it; even the refiner, as he looks upon the mass of metal, may see himself as in a looking

glass, and thus he can form a very correct judgment respecting the purity of the metal. If he is satisfied, the fire is withdrawn, and the metal removed from the furnace; but if not considered pure more lead is added and the process repeated."

Silver mines are mentioned by Diodorus (i. 33) with those of gold, iron, and copper, in the island of Meroe, at the mouth of the Nile. But the chief supply of silver in the ancient world appears to have been brought from Spain. The mines of that country were celebrated (1 Macc. viii. 3). Mt. Orospeda, from which the Guadalquivir, the ancient Bætis, takes its rise, was formerly called "the silver mountain," from the silver-mines which were in it (Strabo, iii. p. 148). Tartessus, according to Strabo, was an ancient name of the river, which gave its name to the town which was built between its two mouths. But the largest silver-mines in Spain were in the neighbourhood of Carthago Nova, from which, in the time of Polybius, the Roman government received 25,000 drachmae daily. These, when Strabo wrote, had fallen into private hands, though most of the gold-mines were public property (iii. p. 148). Near Castulo there were lead-mines containing silver, but in quantities so small as not to repay the cost of working. The process of separating the silver from the lead is abridged by Strabo from Polybius. The lumps of ore were first pounded, and then sifted through sieves into water. The sediment was again pounded, and again filtered, and after this process had been repeated five times the water was drawn off, the remainder of the ore melted, the lead poured away and the silver left pure. If Tartessus be the Tarshish of Scripture, the metal workers of Spain in those days must have possessed the art of hammering silver into sheets, for we find in Jer. x. 9, "silver spread into plates is brought from Tarshish, and gold from Uphaz."

We have no means of knowing whether the gold of Ophir was obtained from mines or from the washing of gold-streams.[b] Pliny (vi. 32), from Juba, describes the *littus Hammaeum* on the Persian Gulf as a place where gold-mines existed, and in the same chapter alludes to the gold-mines of the Sabaeans. But in all probability the greater part of the gold which came into the hands of the Phoenicians and Hebrews was obtained from streams; its great abundance seems to indicate this. At a very early period Jericho was a centre of commerce with the East, and in the narrative of its capture we meet with gold in the form of ingots (Josh. vii. 21, A. V. "wedge," lit. "tongue"),[c] in which it was probably cast for the convenience of traffic. That which Achan took weighed 25 oz.

As gold is seldom if ever found entirely free from silver, the quantity of the latter varying from 2 per cent. to 30 per cent., it has been supposed that the ancient metallurgists were acquainted with some means of parting them, an operation performed in modern times by boiling the metal in nitric or sulphuric acid. To some process of this kind it has been imagined that reference is made in Prov. xvii. 3, "The *fining-pot* is for silver, and the *furnace* for gold;" and again in xxvii. 21. "If, for example," says Mr. Napier, "the term *fining-pot* would refer to the vessel or pot in which the silver is dissolved from the gold in parting, as it may be called with propriety, then these passages have a meaning in our modern practice" (*Met. of the Bible*, p. 28); but he admits this is at best but plausible, and considers that "the constant reference to certain qualities and kinds of gold in Scripture is a kind of presumptive proof that they were not in the habit of perfectly purifying or separating the gold from the silver."

A strong proof of the acquaintance possessed by the ancient Hebrews with the manipulation of metals is found by some in the destruction of the golden calf in the desert by Moses. "And he took the calf which they had made, and burnt it in fire, and ground it to powder, and strawed it upon the water, and made the children of Israel drink" (Ex. xxxii. 20). As the highly malleable character of gold would render an operation like that which is described in the text almost impossible, an explanation has been sought in the supposition that we have here an indication that Moses was a proficient in the process known in modern times as calcination. The object of calcination being to oxidise the metal subjected to the process, and gold not being affected by this treatment, the explanation cannot be admitted. M. Goguet (quoted in Wilkinson's *Anc. Eg.* iii. 221) confidently asserts that the problem has been solved by the discovery of an experienced chemist that "in the place of tartaric acid, which we employ, the Hebrew legislator used nation, which is common in the East." The gold so reduced and made into a draught is further said to have a most detestable taste. Goguet's solution appears to have been adopted without examination by more modern writers, but Mr. Napier ventured to question its correctness, and endeavoured to trace it to its source. The only clue which he found was in a discovery by Stahll, a chemist of the 17th century, "that if 1 part gold, 3 parts potash, and 3 parts sulphur are heated together, a compound is formed which is partly soluble in water. If," he adds, "this be the discovery referred to, which I think very probable,[d] it certainly has been made the most of by Biblical critics" (*Met. of the Bible*, p. 49). The whole difficulty appears to have arisen from a desire to find too much in the text. The main object of the destruction of the calf was to prove its worthlessness and to throw contempt upon idolatry, and all this might have been done without any refined chemical process like that referred to. The calf was first heated in the fire to destroy its shape, then beaten and broken up by hammering or filing into small pieces, which were thrown into the water, of which the people were made to drink as a symbolical act. "Moses threw the atoms into the water as an emblem of the perfect annihilation of the calf, and he gave the Israelites that water to drink, not only to impress upon them the abomination and despicable character of the image which they had made, but as a symbol of purification, to remove the object of the transgression by those very persons who had committed it" (Dr. Kalisch, *Comm. on* Ex. xxxii. 20).

How far the ancient Hebrews were acquainted with the processes at present in use for extracting copper from the ore it is impossible to assert, as

[b] The Hebrew זָהָב, *betser* (Job xxii. 24, 25), or פָּז *kethem* (Job xxxvi. 19), which is rendered "gold" in the A. V., and is mentioned in the first-quoted passage in connexion with Ophir, is believed to signify gold and silver ore.

[c] Compare the Fr. *lingot*, which is from Lat. *lingua*, and is said to be the origin of *ingot*.

[d] This uncertainty might have been at once removed by a reference to Goguet's *Origine des Lois*, &c (ii. 1. 2, c. 4), where Stahll (*Vitulus aureus* · opusc. chym. pars med. p. 585) is quoted as the authority for the statement

there are no references in Scripture to anything of the kind, except in the passage of Job already quoted. Copper smelting, however, is in some cases attended with comparatively small difficulties, which the ancients had evidently the skill to overcome. Ore composed of copper and oxygen mixed with coal and burnt to a bright red heat, leaves the copper in the metallic state, and the same result will follow if the process be applied to the carbonates and sulphurets of copper. Some means of toughening the metal so as to render it fit for manufacture must have been known to the Hebrews as to other ancient nations. The Egyptians evidently possessed the art of working bronze in great perfection at a very early time, and much of the knowledge of metals which the Israelites had must have been acquired during their residence among them.

Of tin there appears to have been no trace in Palestine. That the Phoenicians obtained their supplies from the mines of Spain and Cornwall there can be no doubt, and it is suggested that even the Egyptians may have procured it from the same source, either directly or through the medium of the former. It was found among the possessions of the Midianites, to whom it might have come in the course of traffic; but in other instances in which allusion is made to it, tin occurs in conjunction with other metals in the form of an alloy. The lead mines of Gebel e' Rossass, near the coast of the Red Sea, about half way between Berenice and Kossayr (Wilkinson, *Handb. for Egypt*, p. 403), may have supplied the Hebrews with that metal, of which there were no mines in their own country, or it may have been obtained from the rocks in the neighbourhood of Sinai. The hills of Palestine are rich in iron, and the mines are still worked there [METALS] though in a very simple rude manner, like that of the ancient Samothracians; of the method employed by the Egyptians and Hebrews we have no certain information. It may have been similar to that in use throughout the whole of India from very early times, which is thus described by Dr. Ure (*Dict. of Arts, &c.*, art. *Steel*). "The furnace or bloomery in which the ore is smelted is from four to five feet high; it is somewhat pear-shaped, being about five feet wide at bottom and one foot at top. It is built entirely of clay There is an opening in front about a foot or more in height, which is built up with clay at the commencement and broken down at the end of each smelting operation. The bellows are usually made of a goat's skin The bamboo nozzles of the bellows are inserted into tubes of clay, which pass into the furnace The furnace is filled with charcoal, and a lighted coal being introduced before the nozzles, the mass in the interior is soon kindled. As soon as this is accomplished, a small portion of the ore, previously moistened with water to prevent it from running through the charcoal, but without any flux whatever, is laid on the top of the coals and covered with charcoal to fill up the furnace. In this manner ore and fuel are supplied, and the bellows are urged for three or four hours. When the process is stopped and the temporary wall in front broken down, the bloom is removed with a pair of tongs from the bottom of the furnace."

It has seemed necessary to give this account of a very ancient method of iron smelting, because, from the difficulties which attend it, and the intense heat which is required to separate the metal from the ore, it has been asserted that the allusions to iron and iron manufacture in the Old Testament are anachronisms. But if it were possible among the ancient Indians in a very primitive state of civilization, it might have been known to the Hebrews, who may have acquired their knowledge by working as slaves in the iron furnaces of Egypt (comp. Deut. iv. 20).

The question of the early use of iron among the Egyptians, is fully disposed of in the following remarks of Sir Gardner Wilkinson (*Ancient Egyptians*, ii. pp. 154-156):—

"In the infancy of the arts and sciences, the difficulty of working iron might long withhold the secret of its superiority over copper and bronze; but it cannot reasonably be supposed that a nation so advanced, and so eminently skilled in the art of working metals as the Egyptians and Sidonians, should have remained ignorant of its use, even if we had no evidence of its having been known to the Greeks and other people; and the constant employment of bronze arms and implements is not a sufficient argument against their knowledge of iron, since we find the Greeks and Romans made the same things of bronze long after the period when iron was universally known. To conclude, from the want of iron instruments, or arms, bearing the names of early monarchs of a Pharaonic age, that bronze was alone used, is neither just nor satisfactory; since the decomposition of that metal, especially when buried for ages in the nitrous soil of Egypt, is so speedy as to preclude the possibility of its preservation. Until we know in what manner the Egyptians employed bronze tools for cutting stone, the discovery of them affords no additional light, nor even argument; since the Greeks and Romans continued to make bronze instruments of various kinds so long after iron was known to them; and Herodotus mentions the iron tools used by the builders of the Pyramids. Iron and copper mines are found in the Egyptian desert, which were worked in old times; and the monuments of Thebes, and even the tombs about Memphis, dating more than 4000 years ago, represent butchers sharpening their knives on a round bar of metal attached to their apron, which from its blue colour can only be steel; and the distinction between the bronze and iron weapons in the tomb of Rameses III., one painted red, the other blue, leaves no doubt of both having been used (as in Rome) at the same periods. In Ethiopia iron was much more abundant than in Egypt, and Herodotus states that copper was a rare metal there; though we may doubt his assertion of prisoners in that country having been bound with fetters of gold. The speedy decomposition of iron would be sufficient to prevent our finding implements of that metal of an early period, and the greater opportunities of obtaining copper ore, added to the facility of working it, might be a reason for preferring the latter whenever it answered the purpose instead of iron." [W. A. W.]

MINGLED PEOPLE. This phrase (עֶרֶב, *hâ'ereb*), like that of "the mixed multitude," which the Hebrew closely resembles, is applied in Jer. xxv. 20, and Ez. xxx. 5, to denote the miscellaneous foreign population of Egypt and its frontier-tribes, including every one, says Jerome, who was not a native Egyptian, but was resident there. The Targum of Jonathan understands it in this passage as well as in Jer. l. 37, of the foreign mercenaries, though in Jer. xxv. 24, where the word again occurs, it is rendered "Arabs." It is difficult to

attach to it any precise meaning, or to identify with the mingled people any race of which we have knowledge. "The kings of the mingled people that dwell in the desert,"[a] are the same apparently as the tributary kings (A. V. "kings of Arabia") who brought presents to Solomon (1 K. x. 15);[b] the Hebrew in the two cases is identical. These have been explained (as in the Targum on 1 K. x. 15) as foreign mercenary chiefs who were in the pay of Solomon, but Thenius understands by them the sheykhs of the border tribes of Bedouins, living in Arabia Deserta, who were closely connected with the Israelites. The "mingled people" in the midst of Babylon (Jer. l. 37), were probably the foreign soldiers or mercenary troops, who lived among the native population, as the Targum takes it. Kimchi compares Ex. xii. 38, and explains *hâ'ereb* of the foreign population of Babylon[c] generally, "foreigners who were in Babylon from several lands," or it may, he says, be intended to denote the merchants, *'ereb* being thus connected with the עֵרְבֵי מַשָּׂרְבָּךְ, *'orĕbê ma'ărâbêc*, of Ez. xxvii. 27, rendered in the A. V. "the occupiers of thy merchandize." His first interpretation is based upon what appears to be the primary signification of the root עָרַב, *'ârab*, to mingle, while another meaning, "to pledge, guarantee," suggested the rendering of the Targum "mercenaries,"[d] which Jarchi adopts in his explanation of "the kings of *hâ'ereb*," in 1 K. x. 15, as the kings who were pledged to Solomon and dependent upon him. The equivalent which he gives is apparently intended to represent the Fr. *garantie*.

The rendering of the A. V. is supported by the LXX. σύμμικτος in Jer., and ἐπίμικτος in Ezekiel. [W. A. W.]

MIN'IAMIN (מִנְיָמִין: Βενιαμίν; Alex. Βενιαμείν: *Benjamin*). 1. One of the Levites in the reign of Hezekiah appointed to the charge of the freewill offerings of the people in the cities of the priests, and to distribute them to their brethren 2 Chr. xxxi. 15). The reading "Benjamin" of the LXX. and Vulg. is followed by the Peshito Syriac.

2. (Μιαμίν; *Miamin*). The same as MIAMIN 2 and MIJAMIN 2 (Neh. xii. 17).

3. (Βενιαμείν; Alex. Βενιαμείν). One of the priests who blew the trumpets at the dedication of the wall of Jerusalem (Neh. xii. 41).

MIN'NI (מִנִּי: *Menni*), a country mentioned in connexion with Ararat and Ashchenaz (Jer. li. 27). The LXX. erroneously renders it παρ' ἐμοῦ. It has been already noticed as a portion of Armenia. [ARMENIA.] The name may be connected with the *Minyas* noticed by Nicolaus of Damascus (Joseph. *Ant.* i. 3, §6), with the *Minnai* of the Assyrian inscriptions, whom Rawlinson (*Herod.* i. 464) places about lake *Urumiyeh*, and with the *Minnus* who appears in the list of Armenian kings in the inscription at *Wan* (Layard's *Nin. and Bab.* p. 401). At the time when Jeremiah prophesied, Armenia had been subdued by the Median kings (*Herod.* i. 103, 177). [W. L. B.]

MINISTER. This term is used in the A. V. to describe various officials of a religious and civil character. In the O. T. it answers to the Hebrew *meshâreth*,[a] which is applied, (1) to an attendant upon a person of high rank, as to Joshua in relation to Moses (Ex. xxiv. 13; Josh. i. 1) and to the attendant on the prophet Elisha (2 K. iv. 43); (2) to the *attachés* of a royal court (1 K. x. 5, where, it may be observed, they are distinguished from the "servants" or officials of higher rank, answering to our *ministers*, by the different titles of the chambers assigned to their use, the "sitting" of the servants meaning rather their *abode*, and the "attendance" of the ministers the ante-room in which they were stationed); persons of high rank held this post in the Jewish kingdom (2 Chron. xxii. 8); and it may be in this sense, as the attendants of the King of Kings, that the term is applied to the angels (Ps. civ. 4); (3) to the Priests and Levites, who are thus described by the prophets and later historians (Is. lxi. 6; Ez. xliv. 11; Joel i. 9, 13; Exr. viii. 17; Neh. x. 36), though the verb, whence *meshâreth* is derived, is not uncommonly used in reference to their services in the earlier books (Ex. xxviii. 43; Num. iii. 31; Deut. xviii. 5, *al.*). In the N. T. we have three terms, each with its distinctive meaning — λειτουργός, ὑπηρέτης, and διάκονος. The first answers most nearly to the Hebrew *meshâreth* and is usually employed in the LXX. as its equivalent. It betokens a subordinate public administrator, whether civil or sacerdotal, and is applied in the former sense to the magistrates in their relation to the Divine authority (Rom. xiii. 6), and in the latter sense to our Lord in relation to the Father (Heb. viii. 2), and to St. Paul in relation to Jesus Christ (Rom. xv. 16), where it occurs among other expressions of a sacerdotal character, "ministering" (ἱερουργοῦντα), "offering up" (προσφορά, &c.). In all these instances the original and special meaning of the word, as used by the Athenians,[b] is preserved, though this comes, perhaps, yet more distinctly forward in the cognate terms λειτουργία and λειτουργεῖν, applied to the sacerdotal office of the Jewish priest (Luke i. 23; Heb. ix. 21, x. 11), to the still higher priesthood of Christ (Heb. viii. 6), and in a secondary sense to the Christian priest who offers up to God the faith of his converts (Phil. ii. 17; λειτουργία τῆς πίστεως), and to any act of public self-devotion on the part of a Christian disciple (Rom. xv. 27; 2 Cor. ix. 12; Phil. ii. 30). The second term, ὑπηρέτης, differs from the two others in that it contains the idea of actual and personal attendance upon a superior. Thus it is used of the attendant in the synagogue, the *kha-*

[a] Kimchi observes that these are distinguished from the mingled people mentioned in ver. 20 by the addition "that dwell in the desert."

[b] In the parallel passage of 2 Chr. ix. 14 the reading is עֲרָב *'Arab*, or Arabia.

[c] The same commentator refers the expression in Is. lx. 14, "they shall every man turn to his own people," to the dispersion of the mixed population of Babylon at its capture.

[d] תרגמיאה

[a] מְשָׁרֵת.

[b] The term is derived from λεῖτον ἔργον, "public work," and the *leitourgia* was the name of certain personal services which the citizens of Athens and some other states had to perform gratuitously for the public good. From the sacerdotal use of the word in the N. T., it obtained the special sense of a "public divine service," which is perpetuated in our word "liturgy." The verb λειτουργεῖν is used in this sense in Acts xiii. 2.

san[c] of the Talmudists (Luke iv. 20), whose duty it was to open and close the building, to produce and replace the books employed in the service, and generally to wait on the officiating priest or teacher[d] (Carpzov, *Apparat.* p. 314). It is similarly applied to Mark, who, as the attendant on Barnabas and Saul (Acts xiii. 5), was probably charged with the administration of baptism and other assistant duties (De Wette, *in loc.*); and again to the subordinates of the high-priests (John vii. 32, 45, xviii. 3, *al.*), or of a jailor (Matt. v. 25 = πράκτωρ in Luke xii. 58; Acts v. 22). The idea of *personal attendance* comes prominently forward in Luke i. 2; Acts xxvi. 16, in both of which places it is alleged as a ground of trustworthy testimony (ipsi *viderunt*, et, quod plus est, *ministrarunt*, Bengel). Lastly, it is used interchangeably with διάκονος in 1 Cor. iv. 1 compared with iii. 5, but in this instance the term is designed to convey the notion of subordination and humility. In all these cases the etymological sense of the word (ὑπὸ ἐρέτης, literally, a "*sub-rower*," one who rows nder command of the steersman) comes out. The term that most adequately represents it in our language is "attendant." The third term, διάκονος, is the one usually employed in relation to the ministry of the Gospel: its application is twofold, in a general sense to indicate ministers of any order, whether superior or inferior, and in a special sense to indicate an order of inferior ministers. In the former sense we have the cognate term διακονία applied in Acts vi. 1, 4, both to the ministration of tables and to the higher ministration of the word, and the term διάκονος itself applied, without defining the office, to Paul and Apollos (1 Cor. iii. 5), to Tychicus (Eph. vi. 21; Col. iv. 7), to Epaphras (Col. i. 7), to Timothy (1 Thess. iii. 2), and even to Christ himself (Rom. xv. 8; Gal. ii. 17). In the latter sense it is applied in the passages where the διάκονος is contradistinguished from the Bishop, as in Phil. i. 1; 1 Tim. iii. 8-13. It is, perhaps, worthy of observation that the word is of very rare occurrence in the LXX. (Esth. i. 10, ii. 2, vi. 3), and then only in a general sense: its special sense, as known to us in its derivative "deacon," seems to be of purely Christian growth. [DEACON.] [W. L. B.]

MIN'NITH (מִנִּית: ἄχρις Ἀννῶν; Alex. εἰς Σεμωειθ;[a] Joseph. πόλις Μαλιδθης: Pesch. Syriac, *Machir*: Vulg. *Mennith*), a place on the east of the Jordan, named as the point to which Jephthah's slaughter of the Ammonites extended (Judg. xi. 33). "From Aroer to the approach to Minnith" (עַד בּוֹאֲךָ מִנִּית) seems to have been a district containing twenty cities. Minnith was in the neighbourhood of Abel-Ceramim, the "meadow of vineyards." Both places are mentioned in the Onomasticon—"Mennith" or "Maanith" as 4 miles from Heshbon, on the road to Philadelphia (*Ammân*), and Abel as 6 or 7 miles from the latter, but in what direction is not stated. A site bearing the name *Menjah*, is marked in Van de Velde's Map, perhaps on the authority of Buckingham, at 7 Roman miles east of Heshbon on *a* road to *Ammân*, though not on the frequented track. But we must await further investigation of these interesting regions before we can pronounce for or against its identity with Minnith.

The variations of the ancient versions as given above are remarkable, but they have not suggested anything to the writer. Schwarz proposes to find Minnith in MAGED, a trans-Jordanic town named in the Maccabees, by the change of ג to נ. An episcopal city of "Palestina secunda," named *Memith*, is quoted by Reland (*Pal.* 211), but with some question as to its being located in this direction (comp. 209).

The "wheat of Minnith" is mentioned in Ez. xxvii. 17, as being supplied by Judah and Israel to Tyre; but there is nothing to indicate that the same place is intended, and indeed the word is thought by some not to be a proper name. Philistia and Sharon were the great corn-growing districts of Palestine—but there were in these eastern regions also "fat of kidneys of wheat, and wine of the pure blood of the grape" (Deut. xxxii. 14). Of that cultivation Minnith and Abel-Ceramim may have been the chief seats.

In this neighbourhood were possibly situated the vineyards in which Balaam encountered the angel on his road from Mesopotamia to Moab (Num. xxii. 24). [G.]

MINSTREL. The Hebrew word in 2 K. iii 15 (מְנַגֵּן, *menaggén*) properly signifies a player upon a stringed instrument like the harp or *kinnor* [HARP], whatever its precise character may have been, on which David played before Saul (1 Sam. xvi. 16, xviii. 10, xix. 9), and which the harlots of the great cities used to carry with them as they walked to attract notice (Is. xxiii. 16). The passage in which it occurs has given rise to much conjecture; Elisha, upon being consulted by Jehoram as to the issue of the war with Moab, at first indignantly refuses to answer, and is only induced to do so by the presence of Jehoshaphat. He calls for a harper, apparently a camp follower (one of the Levites according to Procopius of Gaza;[b] "And now bring me a harper; and it came to pass as the harper harped that the hand of Jehovah was on him." Other instances of the same divine influence or impulse connected with music, are seen in the case of Saul and the young prophets in 1 Sam. x. 5, 6, 10, 11. In the present passage the reason of Elisha's appeal is variously explained. Jarchi says that "on account of anger the Shechinah had departed from him;" Ephrem Syrus, that the object of the music was to attract a crowd to hear the prophecy; J. H. Michaelis, that the prophet's mind, disturbed by the impiety of the Israelites, might be soothed and prepared for divine things by a spiritual song. According to Keil (*Comm. on Kings*, i. 359, Eng. tr.), "Elisha calls for a minstrel, in order to gather in his thoughts by the soft tones of music from the impression of the outer world, and by repressing the life of self and of the world to be transferred into the state of internal vision, by which his spirit would be prepared to receive the Divine revelation." This in effect is the

[c] חָזָן.

[d] The ὑπηρέτης of ecclesiastical history occupied precisely the same position in the Christian Church that the *khasan* did in the synagogue: in Latin he was styled *sub-diaconus*, or sub-deacon (Bingham, *Ant.* iii. 2).

[a] εως του ελθειν εις σεμωειθ, is the reading of the Alex. Codex, ingeniously corrected by Grabe to εως του ελθειν σε εις Μωειθ.

[b] The Targum translates, "and now bring me a man who knows how to play upon the harp, and it came to pass as the harper harped there rested upon him the spirit of prophecy from before Jehovah."

view taken by Josephus (*Ant.* ix. 3, §1), and the same is expressed by Maimonides in a passage which embodies the opinion of the Jews of the Middle Ages. "All the prophets were not able to prophesy at any time that they wished; but they prepared their minds, and sat joyful and glad of heart, and abstracted; for prophecy dwelleth not in the midst of melancholy nor in the midst of apathy, but in the midst of joy. Therefore the sons of the prophets had before them a psaltery, and a tabret, and a pipe, and a harp, and (thus) sought after prophecy" (or prophetic inspiration), (*Yad hachazakah*, vii. 5, Bernard's *Creed and Ethics of the Jews*, p. 16; see also note to p. 114). Kimchi quotes a tradition to the effect that, after the ascension of his master Elijah, the spirit of prophecy had not dwelt upon Elisha because he was mourning, and the spirit of holiness does not dwell but in the midst of joy. In 1 Sam. xviii. 10, on the contrary, there is a remarkable instance of the employment of music to still the excitement consequent upon an attack of frenzy, which in its external manifestations at least so far resembled the rapture with which the old prophets were affected when delivering their prophecies, as to be described by the same term. "And it came to pass on the morrow, that the evil spirit from God came upon Saul, and he *prophesied* in the midst of the house: and David played with his hand as at other times." Weemse (*Christ. Synagogue*, c. vi. §3, par. 6, p. 143) supposes that the music appropriate to such occasions was "that which the Greeks called ἁρμονίαν, which was the greatest and the saddest, and settled the affections."

The "minstrels" in Matt. ix. 23, were the flute-players who were employed as professional mourners to whom frequent allusion is made (Eccl. xii. 5; 2 Chr. xxxv. 25; Jer. ix. 17-20), and whose repretatives exist in great numbers to this day in the cities of the East. [MOURNING.] [W. A. W.]

MINT (ἡδύοσμον: *mentha*) occurs only in Matt. xxiii. 23, and Luke xi. 42, as one of those herbs, the tithe of which the Jews were most scrupulously exact in paying. Some commentators have supposed that such herbs as mint, anise (dill), and cummin, were not titheable by law, and that the Pharisees solely from an overstrained zeal paid tithes for them; but as dill was subject to tithe (*Massroth*, cap. iv. §5), it is most probable that the other herbs mentioned with it were also tithed, and this is fully corroborated by our Lord's own words: "these ought ye to have done." The Pharisees therefore are not censured for paying tithes of things untitheable by law, but for paying more regard to a scrupulous exactness in these minor duties than to important moral obligations.

There cannot be the slightest doubt that the A. V. is correct in the translation of the Greek word, and all the old versions are agreed in understanding some species of mint (*Mentha*) by it. Dioscorides (iii. 36, ed. Sprengel) speaks of ἡδύοσμον ἥμερον (*Mentha sativa*); the Greeks used the terms μίνθα, or μίνθη and μίνθος for mint, whence the derivation of the English word; the Romans have *mentha*, *menta*, *mentastrum*. According to Pliny (*H. N.* xix. 8) the old Greek word for mint was μίνθα, which was changed to ἡδύοσμον ("the sweet smelling"), on account of the fragrant properties of this plant. Mint was used by the Greeks and Romans both as a carminative in medicine and a condiment in cookery. Apicius mentions the use of fresh (*viridis*) and dried (*arida*) mint Compare also Pliny, *H. N.* xix. 8, xx. 14; Dioscor. iii. 36; the *Epityrum* of the Romans had mint as one of its ingredients (Cato, *de R. Rus.* § 120). Martial, Epig. x. 47, speaks of "ructatrix mentha," mint being an excellent carminative. "So amongst the Jews," says Celsius (*Hierob.* i. 547), "the Talmudical writers manifestly declare that mint was used with their food." Tract, *Shem. Ve Jobel*, ch. vii. §2, and Tr. *Oketzin*, ch. i. §2; *Sheb.* ch. 7. 1. Lady Calcott (*Script. Herb.* 280) makes the following ingenious remark: "I know not whether mint was originally one of the bitter herbs with which the Israelites eat the Paschal lamb, but our use of it with roast lamb, particularly about Easter time, inclines me to suppose it was." The same writer also observes that the modern Jews eat horseradish and chervil with lamb. The woodcut represents the horse mint (*M. sylvestris*) which is

Mentha sylvestris.

common in Syria, and according to Russell (*Hist. of Aleppo*, p. 32) found in the gardens at Aleppo; *M. sativa* is generally supposed to be only a variety of *M. arvensis*, another species of mint; perhaps all these were known to the ancients. The mints belong to the large natural order *Labiatae*. [W. H.]

MIPH'KAD, THE GATE (שַׁעַר הַמִּפְקָד πύλη τοῦ Μαφεκάδ: *porta judicialis*), one of the gates of Jerusalem at the time of the rebuilding of the wall after the return from captivity (Neh. iii. 31). According to the view taken in this work of the topography of the city this gate was probably not in the wall of Jerusalem proper, but in that of the city of David, or Zion, and somewhere near to the junction of the two on the north side (see vol. i. p. 1027). The name may refer to some memorable census of the people, as for instance that of David 2 Sam. xxiv. 9, and 1 Chr. xxi. 5 (in each of which the word used for "number" is *miphkad*), or to the superintendents of some portion of the worship (*Pekidim*, see 2 Chr. xxxi. 13). [G.]

MIRACLES. The word "miracle" is the ordinary translation, in our Authorized English version, of the Greek σημεῖον. Our translators did not borrow it from the Vulgate (in which *signum* is the customary rendering of σημεῖον), but, appa-

rently, from their English predecessors, Tyndale, Coverdale, &c.; and it had, probably before their time, acquired a fixed technical import in theological language, which is not directly suggested by its etymology. The Latin *miraculum*, from which it is merely accommodated to an English termination, corresponds best with the Greek *θαῦμα*, and denotes any object of wonder, whether supernatural or not. Thus the "Seven Wonders of the World" were called *miracula*, though they were only miracles of art. It will perhaps be found that the habitual use of the term "miracle" has tended to fix attention too much on the physical *strangeness* of the facts thus described, and to divert attention from what may be called their *signality*. In reality, the practical importance of the *strangeness* of miraculous facts consists in this, that it is one of the circumstances which, taken together, make it reasonable to understand the phenomenon as a mark, seal, or attestation of the Divine sanction to something else. And if we suppose the Divine intention established that a given phenomenon is to be taken as a mark or sign of Divine attestation, theories concerning the *mode* in which that phenomenon was produced become of comparatively little practical value, and are only serviceable as helping our conceptions. In the case of such signs, when they vary from the ordinary course of nature, we may conceive of them as immediately wrought by the authorized intervention of some angelic being merely exerting invisibly his natural powers; or as the result of a provision made in the original scheme of the universe, by which such an occurrence was to take place at a given moment;[a] or as the result of the interference of some higher law with subordinate laws; or as a change in the ordinary working of God in that course of events which we call nature; or as a suspension by His immediate power of the action of certain forces which He had originally given to what we call natural agents. These may be hypotheses more or less probable of the mode in which a given phenomenon is to be conceived to have been produced; but if all the circumstances of the case taken together make it reasonable to understand that phenomenon as a Divine sign, it will be of comparatively little practical importance which of them we adopt. Indeed, in many cases, the phenomenon which constitutes a Divine sign may be one not, in itself, at all varying from the known course of nature. This is the common case of prophecy: in which the fulfilment of the prophecy, which constitutes the sign of the prophet's commission, may be the result of ordinary causes, and yet, from being incapable of having been anticipated by human sagacity, it may be an adequate mark or sign of the Divine sanction. In such cases, the miraculous or wonderful element is to be sought not in the fulfilment, but in the prediction. Thus, although we should suppose, for example, that the destruction of Sennacherib's army was accomplished by an ordinary simoom of the desert, called figuratively the Angel of the Lord, it would still be a SIGN of Isaiah's prophetic mission, and of God's care for Jerusalem. And so, in the case of the passage of the Red Sea by the Israelites under Moses, and many other instances. Our Lord's prediction of the destruction of Jerusalem is a clear example of an event brought about in the ordinary course of things, and yet being a sign of the Divine mission of Jesus, and of the just displeasure of God against the Jews.

It would appear, indeed, that in almost all cases of signs or evidential miracles something prophetic is involved. In the common case, for example, of healing sickness by a word or touch, the word or gesture may be regarded as a *prediction* of the cure; and then, if the whole circumstances be such as to exclude just suspicion of (1) a *natural* anticipation of the event, and (2) a casual coincidence, it will be indifferent to the signality of the cure whether we regard it as effected by the operation of ordinary causes, or by an immediate interposition of the Deity reversing the course of nature. Hypotheses by which such cures are attempted to be accounted for by ordinary causes are indeed generally wild, improbable, and arbitrary, and are (on that ground) justly open to objection; but, if the miraculous character of the predictive antecedent be admitted, they do not tend to deprive the phenomenon of its *signality*: and there are minds who, from particular associations, find it easier to conceive a miraculous agency operating in the region of mind, than one operating in the region of matter.

It may be further observed, in passing, that the proof of the actual occurrence of a sign, when in itself an ordinary event, and invested with signality only by a previous prediction, may be, in some respects, better circumstanced than the proof of the occurrence of a miraculous sign. For the prediction and the fulfilment may have occurred at a long distance of time the one from the other, and be attested by separate sets of independent witnesses, of whom the one was ignorant of the fulfilment, and the other ignorant, or incredulous, of the prediction. As each of these sets of witnesses are deposing to what is *to them* a mere ordinary fact, there is no room for suspecting, in the case of these witnesses, any colouring from religious prejudice, or excited feeling, or fraud, or that craving for the marvellous which has notoriously produced many legends. But it must be admitted that it is only *such* sources of suspicion that are excluded in such a case; and that whatever inherent improbability there may be in a fact considered as *miraculous*—or varying from the ordinary course of nature—remains still: so that it would be a mistake to say that the two facts *together*—the prediction and the fulfilment—required no stronger evidence to make them credible than *any two* ordinary facts. This will appear at once from a parallel case. That A B was seen walking in Bond Street, London, on a certain day, and at a certain hour, is a common ordinary fact, credible on very slight evidence. That A B was seen walking in Broadway, New York, on a certain day, and at a certain hour, is, when taken by itself, similarly circumstanced. But if the day and hour assigned in both reports be the same, the case is altered. We conclude, at once, that one or other of our informants was wrong, or both, until convinced of the correctness of their statements by evidence much stronger than would suffice to establish an ordinary fact. This brings us to consider the peculiar improbability supposed to attach to *miraculous* signs, as such.

The peculiar improbability of *Miracles* is resolved

[a] This is said by Maimonides (*Morah Nevochim*, part ii. c. 29) to have been the opinion of some of the elder Rabbins: "Nam dicunt, quando Deus O. M. hanc existentiam creavit, illum cum unicuique enti naturam suam ordinasse et determinasse, illisque naturis virtutem indidisse miracula illa producendi: et signum prophetae nihil aliud esse, quam quod Deus significarit prophetae tempore quo dicere hoc vel illud debeant," &c.

by Hume, in his famous Essay, into the circumstance that they are "contrary to experience." This expression is, as has often been pointed out, strictly speaking, incorrect. In strictness, that only can be said to be contrary to experience, which is contradicted by the immediate perceptions of persons present at the time when the fact is alleged to have occurred. Thus, if it be alleged that *all* metals are ponderous, this is an assertion contrary to experience; because daily actual observation shows that the metal potassium is not ponderous. But if any one were to assert that a particular piece of potassium, which we had never seen, was ponderous, our experiments on other pieces of the same metal would not prove his report to be, in the same sense, contrary to our experience, but only contrary to the *analogy* of our experience. In a looser sense, however, the terms "contrary to experience," are extended to this secondary application; and it must be admitted that, in this latter, less strict sense, miracles are contrary to general experience, *so far as their mere physical circumstances, visible to us, are concerned.* This should not only be admitted, but strongly insisted upon, by the maintainers of miracles, because it is an essential element of their *signal* character. It is only the analogy of general experience (necessarily narrow as all human experience is) that convinces us that a word or a touch has no efficacy to cure diseases or still a tempest. And, if it be held that the analogy of daily experience furnishes us with no measure of probability, then the so-called miracles of the Bible will lose the character of marks of the Divine Commission of the workers of them. They will not only become as probable as ordinary events, but they will assume the character of ordinary events. It will be just as credible that they were wrought by enthusiasts or impostors, as by the true Prophets of God, and we shall be compelled to own that the Apostles might as well have appealed to any ordinary event in proof of Christ's mission as to His resurrection from the dead. It is so far, therefore, from being true, that (as has been said with something of a sneer) "religion, *following in the wake of science*, has been *compelled* to acknowledge the government of the universe as being on the whole carried on by general laws, and not by special interpositions," that, religion, considered as standing on miraculous evidence, necessarily presupposes a fixed order of nature, and is compelled to assume *that*, not by the discoveries of science, but by the exigency of its own position; and there are few books in which the general constancy of the order of nature is more distinctly recognised than the Bible. The witnesses who report to us miraculous facts are so far from testifying to the absence of general laws, or the instability of the order of nature, that, on the contrary, their whole testimony implies that the miracles which they record were at variance with their own general experience—with the general experience of their contemporaries—with what they believed to have been the general experience of their predecessors, and with what they anticipated would be the general experience of posterity. It is upon the very ground that the apparent *natural* causes, in the cases to which they testify, are known by uniform experience to be incapable of producing the effects said to have taken place, that *therefore* these witnesses refer those events to the intervention of a *supernatural* cause, and speak of these occurrences as Divine Miracles.

And this leads us to notice one grand difference between Divine Miracles and other alleged facts that seem to vary from the ordinary course of nature. It is manifest that there is an essential difference between alleging a case in which, all the real antecedents or causes being similar to those which we have daily opportunities of observing, a consequence is said to have ensued quite different from that which general experience finds to be uniformly conjoined with them, and alleging a case in which there is supposed and *indicated by all the circumstances*, the intervention of an invisible antecedent, or cause, which we know to exist, and to be adequate to the production of such a result, for the special operation of which, in this case, we can assign probable reasons, and also for its not generally operating in a similar manner. This latter is the case of the Scripture-miracles. They are wrought under a solemn appeal to God, in proof of a revelation worthy of Him, the scheme of which may be shewn to bear a striking analogy to the constitution and order of nature; and it is manifest that, in order to make them fit *signs* for attesting a revelation, they *ought* to be phenomena capable of being shewn by a full induction to vary from what is known to us as the ordinary course of nature.

To this it is sometimes replied that, as we collect the existence of God from the course of nature, we have no right to assign to Him powers and attributes in any higher degree than we find them in the course of nature; and consequently neither the power nor the will to alter it. But such persons must be understood *verbis ponere Deum, re tollere*; because it is impossible really to assign Power, Wisdom, Goodness, &c. to the first cause, as an inference from the course of nature, without attributing to Him the power of making it otherwise. There can be no design, for example, or anything analogous to design, in the Author of the Universe, unless out of other *possible* collocations of things, He *selected* those fit for a certain purpose. And it is, in truth, a violation of all analogy, and an utterly wild and arbitrary chimera, to infer, without the fullest evidence of such a *limitation*, the existence of a Being possessed of such power and intelligence as we see manifested in the course of nature, and yet unable to make one atom of matter move an inch in any other direction than that in which it actually does move.

And even if we do not regard the existence of God (in the proper sense of that term) as proved by the course of nature, still if we admit His existence to be in any degree probable, or even possible, the occurrence of miracles will not be incredible. For it is surely going too far to say, that, because the ordinary course of nature leaves us in doubt whether the author of it be able or unable to alter it, or of such a character as to be disposed to alter it for some great purpose, it is *therefore* incredible that He should ever have actually altered it. The true philosopher, when he considers the narrowness of human experience, will make allowance for the possible existence of many causes not yet observed by man, so as that their operation can be reduced to fixed laws understood by us; and the operation of which, therefore, when it reveals itself, must seem to vary from the ordinary course of things. Otherwise, there could be no new discoveries in physical science itself. It is quite true that such forces as magnetism and electricity are *now* to a great extent reduced to known laws: but it is equally true that

so one would have taken the trouble to find out the laws, if he had not *first* believed in the facts. Our knowledge of the law was not the ground of our belief of the fact; but our belief of the fact was that which set us on investigating the law. And it is easy to conceive that there may be forces in nature, unknown to us, the regular periods of the recurrence of whose operations within the sphere of our knowledge (if they ever recur at all) may be immensely distant from each other in time—(as, *e. g.* the causes which produce the appearance or disappearance of stars)—so as that, when they occur, they may seem wholly different from all the rest of man's present or past experience. Upon such a supposition, the *rarity* of the phenomenon should not make it incredible, because such a rarity would be involved in the conditions of its existence. Now this is analogous to the case of miracles. Upon the supposition that there is a God, the immediate volition of the Deity, determined by Wisdom, Goodness, &c., is a VERA CAUSA; because all the phenomena of nature have, on that supposition, such volitions as at least their ultimate antecedents; and that physical effect, whatever it may be, that stands next the Divine volition, is a case of a physical effect having such a volition, so determined, for its immediate antecedent. And as for the unusualness of the way of acting, that is involved in the very conditions of the hypothesis, because this very *unusualness* would be necessary to fit the phenomenon for a miraculous *sign*.

In the foregoing remarks, we have endeavoured to avoid all metaphysical discussions of questions concerning the nature of causation—the fundamental principle of induction, and the like; not because they are unimportant, but because they could not be treated of satisfactorily within the limits which the plan of this work prescribes. They are, for the most part, matters of an abstruse kind, and much difficulty; but (fortunately for mankind) questions of great practical moment may generally be settled, for practical purposes, without solving those higher problems—*i. e.* they may be settled on principles which will hold good, whatever solution we may adopt of those abstruse questions. It will be proper, however, to say a few words here upon some popular forms of expression which tend greatly to increase, in many minds, the natural prejudice against miracles. One of these is the usual description of a miracle, as, "a *violation* of the *laws* of *nature*." This metaphorical expression suggests directly the idea of natural agents breaking, of their own accord, some rule which has the authority and sanctity of a law to them. Such a figure can only be applicable to the case of a supposed *causeless* and arbitrary variation from the uniform order of sequence in natural things, and is wholly inapplicable to a change in that order caused by God Himself. The word "law," when applied to material things, *ought* only to be understood as denoting a number of observed and anticipated sequences of phenomena, taking place with such a resemblance or analogy to each other *as if* a rule had been laid down, which those phenomena were constantly observing. But the *rule*, in this case, is nothing different from the actual order itself; and there is no cause of these sequences but the will of God choosing to produce those phenomena, and choosing to produce them in a certain order.

Again, the term "nature" suggests to many persons the idea of a great system of things endowed with powers and forces of its own—a sort of machine, set a-going originally by a first cause, but continuing its motions *of itself*. Hence we are apt to imagine that a change in the motion or operation of any part of it by God, would produce the same disturbance of the other parts, as such a change would be likely to produce in them, if made by us or any other natural agent. But if the motions and operations of material things be produced really by the Divine will, then His choosing to change, for a special purpose, the ordinary motion of one part, does not necessarily, or probably, infer His choosing to change the ordinary motions of other parts in a way not at all requisite for the accomplishment of that special purpose. It is as easy for Him to continue the ordinary course of the rest, with the change of one part, as of all the phenomena without any change at all. Thus, though the stoppage of the motion of the earth in the ordinary course of nature, would be attended with terrible convulsions, the stoppage of the earth *miraculously*, for a special purpose to be served by *that only*, would not of itself, be followed by any such consequences.

From the same conception of nature, as a machine, we are apt to think of interferences with the ordinary course of nature as implying some imperfection in it. Because machines are considered more and more perfect in proportion as they less and less need the interference of the workman. But it is manifest that this is a false analogy; for, the reason why machines are made is, to save us trouble; and, therefore, they are more perfect in proportion as they answer this purpose. But no one can seriously imagine that the universe is a machine for the purpose of saving trouble to the Almighty.

Again, when miracles are described as "interferences with the laws of nature," this description makes them appear improbable to many minds, from their not sufficiently considering that the laws of nature interfere with one another; and that we cannot get rid of "interferences" upon any hypothesis consistent with experience. When organization is superinduced upon inorganic matter, the laws of inorganic matter are interfered with and controlled; when animal life comes in, there are new interferences; when reason and conscience are superadded to will, we have a new class of controlling and interfering powers, the *laws* of which are *moral* in their character. Intelligences of pure speculation, who could do nothing but observe and reason, surveying a portion of the universe—such as the greater part of the material universe may be—wholly destitute of living inhabitants, might have reasoned that such powers as active beings possess were incredible—that it was incredible that the Great Creator would suffer the majestic uniformity of laws which He was constantly maintaining through boundless space and innumerable worlds, to be controlled and interfered with at the caprice of such a creature as man. Yet we know by experience that God has enabled us to control and interfere with the laws of external nature for our own purposes: nor does this seem less improbable beforehand (but rather more), than that He should Himself interfere with those laws for our advantage. This, at least, is manifest—that the purposes for which man was made, whatever they are, involved the necessity of producing a power capable of controlling and interfering with the laws of external nature; and consequently that those purposes involve in some sense the necessity of interferences with the laws of nature external to man; and how

far that necessity may reach—whether it extend only to interferences proceeding from man himself, or extend to interferences proceeding from other creatures, or immediately from God also, it is impossible for reason to determine beforehand.

Furthermore, whatever ends may be contemplated by the Deity for the laws of nature in reference to the rest of the universe—(in which question we have as little information as interest)—we know that, in respect of us, they answer discernible moral ends—that they place us, practically, under government, conducted in the way of rewards and punishment—a government of which the *tendency* is to encourage virtue and repress vice—and to form in us a certain character by discipline; which character our moral nature compels us to consider as the highest and worthiest object which we can pursue. Since, therefore, the laws of nature have, in reference to us, moral purposes to answer, which (as far as we can judge) they have not to serve in other respects, it seems not incredible that these peculiar purposes should occasionally require modifications of those laws in relation to us, which are not necessary in relation to other parts of the universe. For we see—as has been just observed—that the power given to man of modifying the laws of nature by which He is surrounded, is a power directed by moral and rational influences, such as we do not find directing the power of any other creature that we know of. And how far, in the nature of things, it would be possible or eligible, to construct a system of material laws which should at the same time, and by the same kind of operations, answer the other purposes of the Creator, and also all His moral purposes with respect to a creature endowed with such faculties as free will, reason, conscience, and the other peculiar attributes of man, we cannot be supposed capable of judging. And as the regularity of the laws of nature in themselves, is the very thing which makes them capable of being usefully controlled and interfered with by man—(since, if their sequences were irregular and capricious we could not know how or when to interfere with them)—so that same regularity is the very thing which makes it possible to use Divine interferences with them as attestations of a supernatural revelation from God to us; so that, in both cases alike, the usual regularity of the laws, in themselves, is not superfluous, but necessary in order to make the interferences with that regularity serviceable for their proper ends. In this point of view, miracles are to be considered as cases in which a higher law interferes with and controls a lower: of which circumstance we see instances around us at every turn.

It seems further that, in many disquisitions upon this subject, some essentially distinct operations of the human mind have been confused together in such a manner as to spread unnecessary obscurity over the discussion. It may be useful, therefore, briefly to indicate the mental operations which are chiefly concerned in this matter.

In the first place there seems to be a law of our mind, in virtue of which, upon the experience of any new external event, any phenomenon *limited* by the circumstances of time and place, we refer it to a *cause*, or powerful agent producing it as an *effect*. The relative idea involved in this reference appears to be a simple one, incapable of definition, and is denoted by the term *efficiency*.

From this conception it has been supposed by some that a scientific proof of the stability of the laws of nature could be constructed; but the attempt has signally miscarried. Undoubtedly, while we abide in the strict metaphysical conception of a cause as such, the axiom that "similar causes produce similar effects" is intuitively evident; but it is so because, in that point of view, it is merely a barren truism. For my whole conception, within these narrow limits, of the cause of the given phenomenon B is that it is the cause or power producing B. I conceive of that cause merely as the term of a certain relation to the phenomenon; and therefore my conception of a cause similar to it, precisely as a cause, can only be the conception of a cause of a phenomenon similar to B.

But when the original conception is enlarged into affording the wider maxim, that causes similar *as things*, considered in themselves, and not barely in relation to the effect, are similar in their effects also, the case ceases to be not equally clear.

And, in applying even this to practice, we are met with insuperable difficulties.

For, first, it may reasonably be demanded, on what *scientific* ground we are justified in assuming that any one material phenomenon or substance is, in this proper sense, the cause of any given material phenomenon? It does not appear at all self-evident, *à priori*, that a material phenomenon must have a material cause. Many have supposed the contrary; and the phenomena of the apparent results of our own volitions upon matter seem to indicate that such a law should not be hastily assumed. Upon the possible supposition, then, that the material phenomena by which we are surrounded are the effects of spiritual causes—such as the volitions of the Author of Nature—it is plain that these are causes of which we have no direct knowledge, and the similarities of which to each other we can, without the help of something more than the fundamental axiom of cause and effect, discover only from the effects, and only so far as the effects carry us in each particular.

But, even supposing it conceded that material effects must have material causes, it yet remains to be settled upon what ground we can assume that we have ever yet found the true material cause of any effect whatever, so as to justify us in predicting that, wherever it recurs, a certain effect will follow. All that our abstract axiom tells us is, that if we have the true cause we have that which is always attended with the effect: and all that experience can tell us is that A has, so far as we can observe, been always attended by B: and all that we can infer from these premises, turn them how we will, is merely this: that the case of A and B is, so far as we have been able to observe, *like* a case of true causal connexion; and beyond this we cannot advance a step towards proving that the case of A and B *is* a case of causal connexion, without assuming further another principle (which would have saved us much trouble if we had assumed it in the beginning), that *likeness* or *verisimilitude* is a ground of belief, gaining strength in proportion to the closeness and constancy of the resemblance.

Indeed, physical analysis, in its continual advance, is daily teaching us that those things which we once regarded as the true causes of certain material phenomena are only *marks* of the presence of other things which we now regard as the true causes, and which we may hereafter find to be only assemblages of adjacent appearances, more or less closely connected with what may better claim that title. It is quite possible, for example, that gravitation

may at some future time be demonstrated to be the result of a complex system of forces, *residing* (as some philosophers love to speak) in material substances hitherto undiscovered, and as little suspected to exist as the gases were in the time of Aristotle.

(2.) Nor can we derive much more practical assistance from the maxim, that similar antecedents have similar consequents. For this is really no *more* than the former rule. It differs therefrom only in dropping the idea of efficiency or causal connexion; and, however certain and universal it may be supposed in the abstract, it fails in the concrete just at the point where we most need assistance. For it is plainly impossible to demonstrate that any two actual antecedents are precisely similar in the sense of the maxim; or that any one given apparent antecedent is the true unconditional antecedent of any given apparently consequent phenomenon. Unless, for example, we know the *whole nature* of a given antecedent A, and also the *whole nature* of another given antecedent B, we cannot, by comparing them together, ascertain their precise similarity. They may be similar in all respects that we have hitherto observed, and yet in the very essential quality which may make A the unconditional antecedent of a given effect C, in this respect A and B may be quite dissimilar.

It will be found, upon a close examination of all the logical canons of inductive reasoning that have been constructed for applying this principle, that such an assumption—of the real similarity of things apparently similar—pervades them all. Let us take, *e. g.*, what is called the first canon of the "Method of Agreement," which is this: "If two or more instances of the phenomenon under investigation have *only one* circumstance in common, the circumstance in *which alone* all the instances agree, is the cause (or effect) of the given phenomenon." Now, in applying this to any practical case, how can we be possibly certain that any two instances have *only one* circumstance in common? We can remove, indeed, by nicely varied experiments, all the different agents known to us from contact with the substances we are examining, except those which we choose to employ; but how is it possible that we can remove unknown agents, if such exist, or be sure that no agents do exist, the laws and periods of whose activity we have had hitherto no means of estimating, but which may reveal themselves at any moment, or upon any unlooked-for occasion? It is plain that, unless we can know the whole nature of all substances present at every moment and every place that we are concerned with in the universe, we cannot *know* that any two phenomena have *but one* circumstance in common. All we can say is, that unknown agencies count for nothing in practice; or (in other words) we must assume that things which appear to us similar *are* similar.

This being so, it becomes a serious question whether such intuitive principles as we have been discussing are of any real practical value whatever in mere physical inquiries. Because it would seem that they cannot be made use of without bringing in another principle, which seems quite sufficient without them, that the *likeness* of one thing to another in observable respects, is a ground for presuming likeness in other respects—a ground strong in proportion to the apparent closeness of the resemblances, and the number of times in which we have found ourselves right in acting upon such a presumption. Let us talk as we will of theorems deduced from intuitive axioms, about true causes or antecedents, still all that we can know in fact of any particular case is, that, *as far as we can observe*, it *resembles* what reason teaches us would be the case of a true cause or a true antecedent: and if this justifies us in drawing the inference that it is such a case, then certainly we must admit that *resemblance* is a just ground in itself of inference in practical reasoning.

And "therefore, even granting," it will be said, "the power of the Deity to work miracles, we can have no better grounds of determining how He is likely to exert that power, than by observing how He has actually exercised it. Now we find Him, by experience, by manifest traces and records, through countless ages, and in the most distant regions of space, continually—(if we do but set aside these comparatively few stories of miraculous interpositions)—working according to what we call, and rightly call, a settled order of nature, and we observe Him constantly preferring an adherence to this order before a departure from it, even in circumstances in which (apart from experience) we should suppose that His goodness would lead Him to vary from that order. In particular, we find that the greatest part of mankind have been left wholly in past ages, and even at present, without the benefit of that revelation which you suppose Him to have made. Yet it would appear that the multitudes who are ignorant of it needed it, and deserved it, just as much as the few who have been made acquainted with it. And thus it appears that experience refutes the inference in favour of the likelihood of a revelation, which we might be apt to draw from the mere consideration of His goodness, taken by itself." It cannot be denied that there seems to be much real weight in some of these considerations. But there are some things which diminish that weight:—1. With respect to remote ages, known to us only by physical traces, and distant regions of the universe, we have no record or evidence of the *moral* government carried on therein. We do not know of any. And, if there be or was any, we have no evidence to determine whether it was or was not, is or is not, connected with a system of miracles. There is no shadow of a presumption that, if it be or were, we should have records or traces of such a system. 2. With respect to the non-interruption of the course of nature, in a vast number of cases, where goodness would seem to require such interruptions, it must be considered that the very vastness of the number of such occasions would make such interruptions so frequent as to destroy the whole scheme of governing the universe by general laws altogether, and consequently also any scheme of attesting a revelation by miracles—*i. e.* facts varying from an established general law. This, therefore, is rather a presumption against God's interfering so often as to destroy the scheme of general laws, or makes the sequences of things irregular and capricious, than against His interfering by miracles to attest a revelation, which, after that attestation, should be left to be propagated and maintained by ordinary means; and the very manner of the attestation of which (*i. e.* by miracles) implies that there *is* a regular and uniform course of nature, to which God is to be expected to adhere in all other cases. 3. It should be considered whether the just conclusion from the rest of the premisses be (not so much this—that it is unlikely God would make a revelation—as) this—that it is likely that, if God made a revelation, he would make it subject to similar conditions to those under which

He bestows His other *special* favours upon mankind—*i. e.* bestow it first directly upon some small part of the race, and impose upon them the responsibility of communicating its benefits to the rest. It is thus that He acts with respect to superior strength and intelligence, and in regard to the blessings of civilization and scientific knowledge, of which the greater part of mankind have always been left destitute.

Indeed, if by "the course of nature" we mean the whole course and series of God's government of the universe carried on by fixed laws, we cannot at all determine beforehand that miracles (*i. e.* occasional deviations, under certain moral circumstances, from the mere *physical* series of causes and effects) are not a part of the course of nature in that sense; so that, for aught we *know*, beings with a larger experience than ours of the history of the universe, might be able confidently to predict, from that experience, the occurrence of such miracles in a world circumstanced like ours. In this point of view, as Bishop Butler has truly said, nothing less than knowledge of another world, placed in circumstances similar to our own, can furnish an argument from analogy against the credibility of miracles.

And, again, for aught we know, *personal* intercourse, or what Scripture seems to call "seeing God face to face," may be to myriads of beings the normal condition of God's intercourse with His intelligent and moral creatures; and to them the state of things in which we are, debarred from such direct perceptible intercourse, may be most contrary to their ordinary experience; so that what is to us miraculous in the history of our race may seem most accordant with the course of nature, or their customary experience, and what is to us most natural may appear to them most strange.

After all deductions and abatements have been made, however, it must be allowed that a certain antecedent improbability must always attach to miracles, considered as events varying from the ordinary experience of mankind as known to us: because likelihood, *verisimilitude*, or resemblance to what we know to have occurred, is, by the constitution of our minds, the very ground of probability; and, though we can perceive reasons, from the moral character of God, for thinking it likely that He may have wrought miracles, yet we know too little of His ultimate designs, and of the best mode of accomplishing them, to argue confidently from His character to His acts, except where the connexion between the character and the acts is demonstrably indissoluble—as in the case of acts rendered necessary by the attributes of veracity and justice. Miracles are, indeed, in the notion of them, no breach of the high generalization that "similar antecedents have similar consequents;" nor, necessarily, of the maxim that "God works by general laws;" because we can see some laws of miracles (as *e. g.* that they are infrequent, and that they are used as attesting signs of, or in conjunction with, revelations), and may suppose more; but they do vary, when taken apart from their proper evidence, from this rule, that "what a general experience would lead us to regard as similar antecedents *are* similar antecedents;" because the only assignable specific difference observable by us in the antecedents in the case of miracles, and in the case of the experiments from the analogy of which they vary in their physical phenomena, consists in the moral antecedents; and these, in cases of physical phenomena, we generally throw out of the account; nor have we grounds *à priori* for concluding *with confidence* that these are not to be thrown out of the account here also, although we can see that the moral antecedents here (such as the fitness for attesting a revelation like the Christian) are, in many important respects, different from those which the analogy of experience teaches us to disregard in estimating the probability of physical events.

But, in order to form a fair judgment, we must take in all the circumstances of the case, and, amongst the rest, the *testimony* on which the miracle is reported to us.

Our belief, indeed, in human testimony seems to rest upon the same sort of instinct on which our belief in the testimony (as it may be called) of nature is built, and is to be checked, modified, and confirmed by a process of experience similar to that which is applied in the other case. As we learn, by extended observation of nature and the comparison of analogies, to distinguish the real laws of physical sequences from the casual conjunctions of phenomena, so are we taught in the same manner to distinguish the circumstances under which human testimony is certain or incredible, probable or suspicious. The circumstances of our condition force us daily to make continual observations upon the phenomena of human testimony; and it is a matter upon which we can make such experiments with peculiar advantage, because every man carries within his own breast the whole sum of the ultimate motives which can influence human testimony. Hence arises the aptitude of human testimony for overcoming, and more than overcoming, almost any antecedent improbability in the thing reported.

"The conviction produced by testimony," says Bishop Young, "is capable of being carried much higher than the conviction produced by experience: and the reason is this, because there may be concurrent testimonies to the truth of one individual fact; whereas there can be no concurrent experiments with regard to an individual experiment. There may, indeed, be *analogous* experiments, in the same manner as there may be analogous testimonies; but, in any course of nature, there is but one continued series of events: whereas in testimony, since the same event may be observed by different witnesses, their *concurrence* is capable of producing a conviction more cogent than any that is derived from any other species of events in the course of nature. In material phenomena the probability of an expected event arises solely from analogous experiments made previous to the event; and this probability admits of indefinite increase from the unlimited increase of the number of these previous experiments. The credibility of a witness likewise arises from our experience of the veracity of previous witnesses in similar cases, and admits of unlimited increase according to the number of the previous witnesses. But there is another source of the increase of testimony, likewise unlimited, derived from the number of *concurrent* witnesses. The evidence of testimony, therefore, admitting of unlimited increase on two different accounts, and the physical probability admitting only of one of them, the former is capable of indefinitely surpassing the latter."

It is to be observed also that, in the case of the Christian miracles, the truth of the facts, varying as they do from our ordinary experience, is far more credible than the falsehood of a testimony so circumstanced as that by which they are attested;

because of the former strange phenomena—the miracles—a reasonable known cause may be assigned adequate to the effect—namely, the will of God producing them to accredit a revelation that seems not unworthy of Him; whereas of the latter—the falsehood of such testimony—no adequate cause whatever can be assigned, or reasonably conjectured.

So manifest, indeed, is this inherent power of testimony to overcome antecedent improbabilities, that Hume is obliged to allow that testimony may be so circumstanced as to require us to believe, in some cases, the occurrence of things quite at variance with general experience; but he pretends to shew that testimony to such facts *when connected with religion* can never be so circumstanced. The reasons for this paradoxical exception are partly general remarks upon the proneness of men to believe in portents and prodigies; upon the temptations to the indulgence of pride, vanity, ambition, and such like passions which the human mind is subject to in religious matters, and the strange mixture of enthusiasm and knavery, sincerity and craft, that is to be found in fanatics, and partly particular instances of confessedly false miracles that seem to be supported by an astonishing weight of evidence—such as those alleged to have been wrought at the tomb of the Abbé Paris.

But (1) little weight can be attached to such general reflexions, as discrediting any particular body of evidence, until it can be shewn in detail that they apply to the special circumstances of that particular body of evidence. In reality, most of his general objections are, at bottom, objections to human testimony itself—*i. e.* objections to the medium by which alone we can know what is called the general experience of mankind, from which general experience it is that the only considerable objection to miracles arises. Thus, by general reflexions upon the proverbial fallaciousness of "travellers' stories" we might discredit all antecedently improbable relations of the manners or physical peculiarities of foreign lands. By general reflexions upon the illusions, and even temptations to fraud, under which scientific observers labour, we might discredit all scientific observations. By general reflexions upon the way in which supine credulity, and passion, and party-interest have discoloured civil history, we might discredit all antecedently improbable events in civil history—such as the conquests of Alexander, the adventures of the Buonaparte family, or the story of the late mutiny in India. (2) The same experience which informs us that credulity, enthusiasm, craft, and a mixture of these, have produced many false religions and false stories of miracles, informs us also *what sort* of religions, and *what sort* of legends, these causes have produced, and are likely to produce; and, if, upon a comparison of the Christian religion and miracles with these products of human weakness or cunning, there appear specific differences between the two, unaccountable on the hypothesis of a common origin, this not only diminishes the presumption of a common origin, but raises a distinct presumption the other way—a presumption strong in proportion to the extent and accuracy of our induction. Remarkable specific differences of this kind have been pointed out by Christian apologists in respect of the nature of the religion—the nature of the miracles—and the circumstances of the evidence by which they are attested.

Of the first kind are, for instance, those assigned by Warburton, in his *Divine Legation*; and by Archbp. Whately, in his *Essays on the Peculiarities of the Christian Religion*, and on *Romanism*.

Differences of the second and third kind are largely assigned by almost every writer on Christian evidences. We refer, specially, for sample sake, to Leslie's *Short Method with the Deists*—to Bishop Douglas's *Criterion*, in which he fully examines the pretended parallel of the cures at the tomb of Abbé Paris,—and to Paley's *Evidences*, which may be most profitably consulted in the late edition by Archbp. Whately.

Over and above the direct testimony of human witnesses to the Bible-miracles, we have also what may be called the indirect testimony of events confirming the former, and raising a distinct presumption that some such miracles must have been wrought. Thus, for example, we know, by a copious induction, that, in no nation of the antient world, and in no nation of the modern world unacquainted with the Jewish or Christian revelation, has the knowledge of the one true God as the Creator and Governor of the world, and the public worship of Him, been kept up by the mere light of nature, or formed the groundwork of such religions as men have devised for themselves. Yet we do find that, in the Jewish people, though no way distinguished above others by mental power or high civilization, and with as strong natural tendencies to idolatry as others, this knowledge and worship was kept up from a very early period of their history, and, according to their uniform historical tradition, kept up by revelation attested by undeniable miracles.

Again, the existence of the Christian religion, as the belief of the most considerable and intelligent part of the world, is an undisputed fact; and it is also certain that this religion originated (as far as human means are concerned) with a handful of Jewish peasants, who went about preaching—on the very spot where Jesus was crucified—that He had risen from the dead, and had been seen by, and had conversed with them, and afterwards ascended into heaven. This miracle, attested by them as eyewitnesses, was the very ground and foundation of the religion which they preached, and it was plainly one so circumstanced that, if it had been false, it could easily have been proved to be false. Yet, though the preachers of it were everywhere persecuted, they had gathered, before they died, large churches in the country where the facts were best known, and through Asia Minor, Greece, Egypt, and Italy; and these churches, notwithstanding the severest persecutions, went on increasing till, in about 300 years after, this religion—*i. e.* a religion which taught the worship of a Jewish peasant who had been ignominiously executed as a malefactor—became the established religion of the Roman empire and has ever since continued to be the prevailing religion of the civilized world.

It would plainly be impossible, in such an article as this, to enumerate all the various lines of confirmation—from the prophecies, from the morality, from the structure of the Bible, from the state of the world before and after Christ—&c., which all converge to the same conclusion. But it will be manifest that almost all of them are drawn ultimately from the analogy of experience, and that the conclusion to which they tend cannot be rejected without holding something contrary to the analogies of experience from which they are drawn. For it must be remembered that *disbelieving* one thing necessarily involves *believing its contradictory*.

It is manifest that, if the miraculous facts

Christianity did not really occur, the stories about them must have originated either in fraud, or in fancy. The coarse explanation of them by the hypothesis of unlimited fraud, has been generally abandoned in modern times: but, in Germany especially, many persons of great acuteness have long laboured to account for them by referring them to fancy. Of these there have been two principal schools—the *Naturalistic*, and the *Mythic*.

1. The Naturalists suppose the miracles to have been natural events, more or less unusual, that were mistaken for miracles, through ignorance or enthusiastic excitement. But the result of their labours in detail has been (as Strauss has shewn in his *Leben Jesu*) to turn the New Testament, as interpreted by them, into a narrative far less credible than any narrative of miracles could be: just as a novel, made up of a multitude of surprising natural events crowded into a few days, is less consistent with its own data than a tale of genii and enchanters. "Some infidels," says Archbishop Whately, "have laboured to prove, concerning *some one* of our Lord's miracles that it might have been the result of an accidental conjuncture of natural circumstances; and they endeavour to prove the same concerning *another*, and so on; and thence infer that *all* of them, occurring as a series, might have been so. They might argue, in like manner, that, because it is not very improbable one may throw sixes in any one out of an hundred throws, therefore it is no more improbable that one may throw sixes a hundred times running." The truth is, that everything that is improbable in the mere *physical strangeness* of miracles applies to such a series of odd events as these explanations assume; while the hypothesis of their non-miraculous character deprives us of the means of *accounting for them* by the extraordinary interposition of the Deity. These and other objections to the thorough-going application of the naturalistic method, led to the substitution in its place of

2. The Mythic theory—which supposes the N. T. Scripture-narratives to have been legends, not stating the grounds of men's belief in Christianity, but springing out of that belief, and embodying the idea of what Jesus, if he were the Messiah, must have been conceived to have done in order to fulfil that character, and was therefore supposed to have done. But it is obvious that this leaves the origin of the belief, that a man who *did not fulfil* the idea of the Messiah in any one remarkable particular, *was* the Messiah—wholly unaccounted for. It begins with assuming that a person of mean condition, who was publicly executed as a malefactor, and who wrought no miracles, was so earnestly believed to be their Messiah by a great multitude of Jews, who expected a Messiah that was to work miracles, and was *not* to die, but to be a great conquering prince, that they modified their whole religion, in which they had been brought up, into accordance with that new belief, and imagined a whole cycle of legends to embody their idea, and brought the whole civilized world ultimately to accept their system. It is obvious, also, that all the arguments for the genuineness and authenticity of the writings of the N. T. bring them up to a date when the memory of Christ's real history was so recent, as to make the substitution of a set of mere legends in its place utterly incredible; and it is obvious, also, that the gravity, simplicity, historical decorum, and consistency with what we know of the circumstances of the times in which the events are said to have occurred, observable in the narratives of the N. T., make it impossible reasonably to accept them as mere *myths*. The same appears from a comparison of them with the style of writings really mythic—as the Gospels of the infancy, of Nicodemus, &c.—and with heathen or Mohamedan legends; and from the omission of matters which a mythic fancy would certainly have fastened on. Thus, though John Baptist was typified by Elijah, the great wonder-worker of the Old Testament, there are no miracles ascribed to John Baptist. There are no miracles ascribed to Jesus during His infancy and youth. There is no description of His personal appearance; no account of His adventures in the world of spirits; no miracles ascribed to the Virgin Mary, and very little said about her at all; no account of the martyrdom of any apostle, but of one, and that given in the driest manner, &c.—and so in a hundred other particulars.

It is observable that, in the early ages, the fact that extraordinary miracles were wrought by Jesus and His apostles, does not seem to have been generally denied by the opponents of Christianity. They seem always to have preferred adopting the expedient of ascribing them to art magic and the power of evil spirits. This we learn from the N. T. itself; from such Jewish writings as the *Sepher Toldoth Jeshu*; from the Fragments of Celsus, Porphyry, Hierocles, Julian, &c., which have come down to us, and from the popular objections which the ancient Christian Apologists felt themselves concerned to grapple with. We are not to suppose, however, that this would have been a solution which, even in those days, would have been naturally preferred to a denial of the facts, if the facts could have been plausibly denied. On the contrary, it was plainly, even then, a forced and improbable solution of *such* miracles. For man did not commonly ascribe to magic or evil demons an *unlimited* power, any more than we ascribe an unlimited power to mesmerism, imagination, and the occult and irregular forces of nature. We know that in two instances, in the Gospel narrative,—the cure of the man born blind and the Resurrection—the Jewish priests were unable to pretend such a solution, and were driven to maintain unsuccessfully a charge of fraud; and the circumstances of the Christian miracles were, in almost all respects, so utterly unlike those of any pretended instances of magical wonders, that the apologists have little difficulty in refuting this plea. This they do generally from the following considerations.

(1.) The greatness, number, completeness, and publicity of the miracles. (2.) The natural beneficial tendency of the doctrine they attested. (3.) The connexion of them with a whole scheme of revelation extending from the first origin of the human race to the time of Christ.

It is also to be considered that the circumstance that the world was, in the times of the apostles, full of Thaumaturgists, in the shape of exorcists, magicians, ghost-seers, &c., is a strong presumption that, in order to command any special attention and gain any large and permanent success, the apostles and their followers must have exhibited works quite different from any wonders which people had been accustomed to see. This presumption is confirmed by what we read, in the Acts of the Apostles, concerning the effect produced upon the Samaritans by Philip the Evangelist in opposition to the prestiges of Simon Magus.

This evasion of the force of the Christian mira-

cles, by referring them to the power of evil spirits, has seldom been seriously recurred to in modern times; but the English infidels of the last century employed it as a kind of *argumentum ad hominem*, to tease and embarrass their opponents—contending that, as the Bible speaks of "lying wonders" of Antichrist, and relates a long contest of apparent miracles between Moses and the Egyptian magicians, Christians could not *on their own principles*, have any certainty that miracles were not wrought by evil spirits.

In answer to this, some divines (as Bishop Fleetwood in his *Dialogues on Miracles*) have endeavoured to establish a distinction in the nature of the works themselves, between the *seeming* miracles within the reach of intermediate spirits,—and the *true* miracles, which can only be wrought by God—and others (as Bekker, in his curious work *Le Monde Enchanté*, and Farmer, in his *Case of the Demoniacs*) have entirely denied the power of intermediate spirits to interfere with the course of nature. But, without entering into these questions, it is sufficient to observe—

(1.) That the light of nature gives us no reason to believe that there are any evil spirits having power to interfere with the course of nature at all.

(2.) That it shows us that, if there be, they are continually controlled from exercising any such power.

(3.) That the records we are supposed to have of such an exercise in the Bible, show us the power there spoken of, as exerted completely under the control of God, and in such a manner as to make it evident to all candid observers where the advantage lay, and to secure all well-disposed and reasonable persons from any mistake in the matter.

(4.) That the circumstances alleged by the early Christian apologists—the number, greatness, beneficence, and variety of the Bible miracles—their connexion with prophecy and a long scheme of things extending from the creation down—the character of Christ and His apostles—and the manifest tendency of the Christian religion to serve the cause of truth and virtue—make it as incredible that the miracles attesting it should have been wrought by evil beings, as it is that the order of nature should proceed from such beings. For, as we gather the character of the Creator from His works, and the moral instincts which He has given us; so we gather the character of the author of revelation from His works, and from the drift and tendency of that revelation itself. This last point is sometimes shortly and unguardedly expressed by saying, that "the doctrine proves the miracles:" the meaning of which is *not* that the particular doctrines which miracles attest must first be proved to be *true aliunde*, before we can believe that any such works were wrought—(which would, manifestly, be making the miracles no *attestation* at all)—but the meaning *is*, that the whole body of doctrine in connexion with which the miracles are alleged, and its tendency, if it were divinely revealed, to answer visible good ends, makes it reasonable to think that the miracles by which it is attested were, if they were wrought at all, wrought by God.

Particular theories as to the manner in which miracles have been wrought are matters rather curious than practically useful. In all such cases we must bear in mind the great maxim SUBTILITAS NATURAE LONGE SUPERAT SUBTILITATEM MENTIS HUMANAE. Malebranche regarded the Deity as the sole agent in nature, acting always by *general laws*; but He conceived those general laws to contain the original provision that the manner of the Divine acting should modify itself, under certain conditions, according to the particular volitions of finite intelligences. Hence, He explained many apparent power over external nature; and hence also He regarded miracles as the result of particular volitions of angels, employed by the Deity in the government of the world. This was called the system of *occasional causes*.

The system of Clarke allowed a proper real, though limited, efficiency to the wills of inferior intelligences, but denied any true *powers* to matter. Hence he referred the phenomena of the course of material nature immediately to the will of God as their cause; making the distinction between natural events and miracles to consist in this, that the former happen according to what is, relatively to us, God's *usual* way of working, and the latter according to His *unusual* way of working.

Some find it easier to conceive of miracles as not really taking place in the external order of nature, but in the impressions made by it upon our minds. Others deny that there is, in any miracle, the production of anything new or the alteration of any natural power; and maintain that miracles are produced solely by the *intensifying* of known natural powers already in existence.

It is plain that these various hypotheses are merely ways in which different minds find it more or less easy to conceive the mode in which miracles may have been wrought.

Another question more curious than practical, is that respecting the precise period when miracles ceased in the Christian Church. It is plain, that whenever they ceased in point of fact, they ceased *relatively to us* wherever a sufficient attestation of them to our faith fails to be supplied.

It is quite true, indeed, that a real miracle, and one sufficiently marked out to the spectators as a real miracle, may be so imperfectly reported to us, as that, if we have only that imperfect report, there may be little to show conclusively its miraculous character; and that, therefore, in rejecting accounts of miracles so circumstanced, we *may possibly* be rejecting accounts of what were real miracles. But this is an inconvenience attending *probable* evidence from its very nature. In rejecting the improbable testimony of the most mendacious of witnesses, we *may*, almost always, be rejecting something which is really true. But this would be a poor reason for acting on the testimony of a notorious liar to a story antecedently improbable. The narrowness and imperfection of the human mind is such that our wisest and most prudent calculations are continually baffled by unexpected combinations of circumstances, upon which we *could not* have reasonably reckoned. But this is no good ground for not acting upon the calculations of wisdom and prudence; because, after all, such calculations are in the long run our surest guides.

It is quite true, also, that several of the Scripture miracles are so circumstanced, that if the reports we have of them stood alone, and came down to us only by the channel of ordinary history, we should be without adequate evidence of their miraculous character; and therefore those particular miracles are not *to us* (though they doubtless were to the original spectators, who could mark all the circumstances), by themselves and taken alone, *signal* or proper *evidences* of revelation. But, then, they may be very proper *objects* of faith, though not the

grounds of it. For (1.) these incidents are really reported to us as parts of a course of things which we have good evidence for believing to have been miraculous; and, as Bishop Butler justly observes, "supposing it acknowledged, that our Saviour spent some years in a course of working miracles, there is no more peculiar presumption worth mentioning, against His having exerted His miraculous powers in a certain degree greater, than in a certain degree less; in one or two more instances, than in one or two fewer: in this, than in another manner." And (2.) these incidents are reported to us by writers whom we have good reasons for believing to have been, not ordinary historians, but persons specially assisted by the Divine Spirit, for the purpose of giving a correct account of the ministry of our Lord and His apostles.

In the case of the Scripture miracles, we must be careful to distinguish the *particular occasions* upon which they were wrought, from their *general* purpose and design; yet not so as to overlook the connexion between these two things.

There are but few miracles recorded in Scripture of which the whole character was merely evidential—few, that is, that were merely displays of a supernatural power made for the sole purpose of attesting a Divine Revelation. Of this character were the change of Moses' rod into a serpent at the burning bush, the burning bush itself, the going down of the shadow upon the sun-dial of Ahaz, and some others.

In general, however, the miracles recorded in Scripture have, besides the ultimate purpose of affording evidence of a Divine interposition, some immediate temporary purposes which they were apparently wrought to serve,—such as the curing of diseases, the feeding of the hungry, the relief of grief or the punishment of guilty persons. These immediate temporary ends are not without value in reference to the ultimate and general design of miracles, as providing evidence of the truth of revelation; because they give a *moral character* to the works wrought, which enables them to display not only the power, but the other attributes of the agent performing them. And, in some cases, it would appear that miraculous works of a particular kind were selected as emblematic or typical of some characteristic of the revelation which they were intended to attest. Thus, *e. g.*, the cure of bodily diseases not only indicated the general benevolence of the Divine Agent, but seems sometimes to be referred to as an emblem of Christ's power to remove the disorders of the soul. The gift of tongues appears to have been intended to manifest the universality of the Christian dispensation, by which all languages were consecrated to the worship of God. The casting out of demons was a type and pledge of the presence of a Power that was ready to "destroy the works of the devil," in every sense.

In this point of view, Christian miracles may be justly regarded as *specimens* of a Divine Power, alleged to be present—specimens so circumstanced as to be obvious, and bring under the notice of common understandings, the operations of a Power—the gift of the Holy Ghost—which was really supernatural, if it did not, in its moral effects, reveal itself externally as supernatural. In this sense, they seem to be called the *manifestation or exhibition* of the Spirit—outward phenomena which manifested sensibly His presence and operation in the Church: and the record of these miracles becomes evidence to us of the invisible presence of Christ in His Church, and of His government of it through all ages; though that presence is of such a nature as not to be immediately distinguishable from the operation of known moral motives, and that government is carried on so as not to interrupt the ordinary course of things.

In the case of the Old Testament miracles, again, in order fully to understand their evidential character, we must consider the general nature and design of the dispensation with which they were connected. The general design of that dispensation appears to have been to keep up in one particular race a knowledge of the one true God, and of the promise of a Messiah in whom "all the families of the earth" should be "blessed." And in order to this end, it appears to have been necessary that, for some time, God should have assumed the character of the local Tutelary Deity and Prince of that particular people. And from this peculiar relation in which He stood to the Jewish people (aptly called by Josephus a THEOCRACY) resulted the necessity of frequent miracles, to manifest and make sensibly perceptible His actual presence among and government over them. The miracles, therefore, of the Old Testament are to be regarded as evidential of the theocratic government; and this again is to be conceived of as subordinate to the further purpose of preparing the way for Christianity, by keeping up in the world a knowledge of the true God and of His promise of a Redeemer. In this view, we can readily understand why the miraculous administration of the theocracy was withdrawn, as soon as the purpose of it had been answered by working deeply and permanently into the mind of the Jewish people the two great lessons which it was intended to teach them; so that they might be safely left to the ordinary means of instruction, until the publication of a fresh revelation by Christ and His Apostles rendered further miracles necessary to attest their mission. Upon this view also we can perceive that the miracles of the Old Testament, upon whatever immediate occasions they may have been wrought, were subordinate (and, in general, necessary) to the design of rendering possible the establishment in due time of such a religion as the Christian; and we can perceive further that, though the Jewish theocracy implied in it a continual series of miracles, yet—as it was only temporary and local—those miracles did not violate God's general purpose of carrying on the government of *the world* by the ordinary laws of nature; whereas if the Christian dispensation—which is *permanent* and *universal*—necessarily implied in it a series of constant miracles, *that* would be inconsistent with the general purpose of carrying on the government of the world by those ordinary laws.

With respect to the *character* of the Old Testament miracles, we must also remember that the whole structure of the Jewish œconomy had reference to the peculiar exigency of the circumstances of a people imperfectly civilized, and is so distinctly described in the New Testament, as dealing with men according to the "hardness of their hearts," and being a system of "weak and beggarly elements," and a rudimentary instruction for "children" who were in the condition of "slaves." We are not, therefore, to judge of the probability of the miracles wrought in support of that œconomy (so far as the *forms* under which they were wrought are concerned) as if those miracles were immediately intended for ourselves. We are not justified in arguing either that those miracles are incredible because wrought in such a manner as that, if

addressed to us, they would lower *our* conceptions of the Divine Being; or, on the other hand, that because those miracles—wrought under the circumstances of the Jewish economy—are credible and ought to be believed, there is therefore no reason for objecting against stories of similar miracles alleged to have been wrought under the quite different circumstances of the Christian dispensation.

In dealing with human testimony, it may be further needful to notice (though very briefly) some refined subtilties that have been occasionally introduced into this discussion.

It has been sometimes alleged that the freedom of the human will is a circumstance which renders reliance upon the stability of laws in the case of human conduct utterly precarious. "In arguing," it is said, "that human beings cannot be supposed to have acted in a particular way, because *that* would involve a violation of the analogy of human conduct, so far as it has been observed in all ages, we tacitly assume that the human mind is unalterably determined by fixed laws, in the same way as material substances. But this is not the case on the hypothesis of the freedom of the will. The very notion of a free will is that of a faculty which determines *itself*; and which is capable of choosing a line of conduct quite repugnant to the influence of any motive however strong. There is therefore no reason for expecting that the operations of human volition will be conformable throughout to any fixed rule or analogy whatever."

In reply to this far-sought and barren refinement, we may observe—1. That, if it be worth anything, it is an objection not merely against the force of human testimony in religious matters, but against human testimony in general, and, indeed, against all calculations of probability in respect of human conduct whatsoever. 2. That we have already shown that, even in respect of material phenomena, our practical measure of probability is not derived from any scientific axioms about *cause* and *effect*, or antecedents and consequences, but simply from the likeness or unlikeness of one thing to another; and therefore, not being deduced from premises which assume *causality*, cannot be shaken by the denial of causality in a particular case. 3. That the thing to be accounted for, on the supposition of the falsity of the testimony for Christian miracles, is not accounted for by any such capricious principle as the arbitrary freedom of the human will; because the thing to be accounted for is *the agreement* of a number of witnesses in a falsehood, for the propagation of which they could have no intelligible inducement. Now, if we suppose a *number* of independent witnesses to have determined themselves by rational motives, then, under the circumstances of this particular instance, their *agreement* in a *true* story is sufficiently accounted for. But, if we suppose them to have each determined themselves by mere whim and caprice, then their *agreement* in the same false story is not accounted for at all. The concurrence of such a number of *chances* is utterly incredible. 4. And finally we remark that no sober maintainers of the freedom of the human will claim for it any such unlimited power of self-determination as this objection supposes. The freedom of the human will exhibits itself either in cases where there is no motive for selecting one rather than another among many possible courses of action that lie before us—in which cases it is to be observed that there is nothing *moral* in its elections whatsoever;—or in cases in which there is a conflict of motives, and, *e. g.*, passion and appetite or custom or temporal interest, draw us one way, and reason or conscience another. In these latter cases the maintainers of the freedom of the will contend that, under certain limits, we can determine ourselves (not by no motive at all, but) by *either* of the motives actually operating upon our minds. Now it is manifest that if, in the case of the witnesses to Christianity, we can show that theirs was a case of a conflict of motives (as it clearly was), and can show, further, that their conduct is inconsistent with one set of motives, the reasonable inference is that they determined themselves, in point of fact, by the other. Thus, though in the case of a man strongly tried by a conflict of motives, we might not, even with the fullest knowledge of his character and circumstances, have been able to predict beforehand how he *would* act, that would be no reason for denying that, after we had come to know how he *did act*, we could tell by what motives he had determined himself in choosing that particular line of conduct.

It has been often made a topic of complaint against Hume that, in dealing with testimony as a medium for proving miracles, he has resolved its force entirely into our *experience* of its veracity, and omitted to notice that, antecedently to all experience, we are predisposed to give it credit by a kind of natural instinct. But, however metaphysically erroneous Hume's analysis of our belief in testimony may have been, it is doubtful whether, in this particular question, such a mistake is of any great practical importance. Our original predisposition is doubtless (whether *instinctive* or not) a predisposition to believe all testimony indiscriminately: but this is so completely checked, modified, and controlled, in after-life, by experience of the circumstances under which testimony can be safely relied upon, and of those in which it is apt to mislead us, that, practically, our experience in these respects may be taken as a not unfair measure of its value as rational evidence. It is also to be observed that, while Hume has omitted this original instinct of belief in testimony, as an element in his calculations, he has also omitted to take into account, on the other side, any original *instinctive* belief in the constancy of the laws of nature, or expectation that our future experiences will resemble our past ones. In reality, he seems to have resolved both these principles into the mere association of ideas. And, however theoretically erroneous he may have been in this, still it seems manifest that, by making the same mistake on both sides, he has made one error compensate another; and so—as far as this branch of the argument is concerned—brought out a practically correct result. As we can only learn by various and repeated experience under what circumstances we can safely trust our expectation of the recurrence of apparently similar phenomena, that expectation, being thus continually checked and controlled, modifies itself into accordance with its rule, and ceases to spring at all when it would be manifestly at variance with its director. And the same would seem to be the case with our belief in testimony.

The argument, indeed, in Hume's celebrated *Essay on Miracles*, was very far from being a new one. It had, as Mr. Coleridge has pointed out, been distinctly indicated by South in his sermon on the incredulity of St. Thomas; and there is a remarkable statement of much the same argument put into the mouth of Woolston's Advocate, in Sherlock's

Trial of the Witnesses. The restatement of it, however, by a person of Hume's abilities, was of service in putting men upon a more accurate examination of the true nature and measure of probability; and it cannot be denied that Hume's bold statement of his unbounded scepticism had, as he contended it would have, many useful results in stimulating inquiries that might not otherwise have been suggested to thoughtful men, or, at least, not prosecuted with sufficient zeal and patience.

Bishop Butler seems to have been very sensible of the imperfect state, in his own time, of the logic of Probability; and, though he appears to have formed a more accurate conception of it, than the Scotch school of Philosophers who succeeded and undertook to refute Hume; yet there is one passage in which we may perhaps detect a misconception of the subject in the pages of even this great writer.

"There is," he observes, "a very strong presumption against common speculative truths, and *against the most ordinary facts*, before the proof of them, which yet is overcome by *almost any proof*. There is a presumption of millions to one against the story of Cæsar or *any other man*. *For*, suppose a number of common facts so and so circumstanced, of which one had no kind of proof, *should happen to come into* one's thoughts; every one would, without any possible doubt, conclude them to be false. And the like may be said *of a single common fact*. And from hence it appears that the question of importance, as to the matter before us, is, concerning the degree of the peculiar presumption against miracles: not, whether there be any peculiar presumption at all against them. For *if there be a presumption of millions to one against the most common facts*, what can a small presumption, additional to this, amount to, though it be peculiar? It cannot be estimated, *and is as nothing*." (*Analogy*, part 2, c. ii.)

It is plain that, in this passage, Butler lays no stress upon the *peculiarities* of the story of Cæsar, which he casually mentions. For he expressly adds "or of any other man;" and repeatedly explains that what he says applies equally to any ordinary facts, or to a single fact; so that, whatever be his drift (and it must be acknowledged to be somewhat obscure), he is not constructing an argument similar to that which has been pressed by Archbishop Whately, in his *Historic Doubts respecting Napoleon Bonaparte*. And this becomes still more evident, when we consider the extraordinary medium by which he endeavours to show that there is a presumption of millions to one against such "common ordinary facts" as he is speaking of. For the way in which he proposes to estimate the presumption against ordinary facts is, by considering the likelihood of their being anticipated beforehand by a person *guessing at random*. But, surely, this is not a measure of the likelihood of the facts considered in themselves, but of the likelihood of the *coincidence of the facts* with a rash and arbitrary anticipation. The case of a person guessing beforehand, and the case of a witness reporting what has occurred, are essentially different. In the common instance, for example, of an ordinary die, before the cast, there is nothing to determine my mind, with any probability of a correct judgment, to the selection of any one of the six faces rather than another; and, therefore, we rightly say that there are five chances to one against any one side, considered as one arbitrarily selected. But when a person, who has had opportunities of observing the cast, reports to me the presentation of a particular face, there is evidently, no such presumption against the coincidence of *his* statement and the actual fact; because he *has*, by the supposition, had ample means of ascertaining the real state of the occurrence. And it seems plain that, in the case of a credible witness, we should as readily believe his report of the cast of a die with a million of sides, as of one with only six; though in respect of a random guess beforehand, the chances against the correctness of the guess would be vastly greater in the former case, than in that of an ordinary cube.

Furthermore, if any common by-stander were to report a series of successive throws, as having taken place in the following order—1, 6, 3, 5, 6, 2—no one would feel any difficulty in receiving his testimony; but if we further become aware that he, or anybody else, had beforehand professed to guess or predict that precise series of throws upon that particular occasion, we should certainly no longer give his report the same ready and unhesitating acquiescence. We should at once suspect, either that the witness was deceiving us, or that the die was loaded, or tampered with in some way, to produce a conformity with the anticipated sequence. This places in a clear light the difference between the case of the *coincidence* of an ordinary event with a random predetermination, and the case of an ordinary event considered in itself.

The truth is, that *the chances* to which Butler seems to refer as a presumption against ordinary events, are not in ordinary cases overcome by testimony at all. The testimony has nothing to do with them; because they are chances against the event considered as the subject of a random vaticination, not as the subject of a report made by an actual observer. It is possible, however, that, throughout this obscure passage, Butler is arguing upon the principles of some objector unknown to us; and, indeed, it is certain that some writers upon the doctrine of chances (who were far from friendly to revealed religion) have utterly confounded together the questions of the chances against the coincidence of an ordinary event with a random guess, and of the probability of such an event considered by itself.

But it should be observed that what we commonly call the chances against an ordinary event are not *specific*, but *particular*. They are chances against *this* event, not against *this kind* of event. The chances, in the case of a die, are the chances against a particular face; not against the coming *up of some face*. The coming up of some face is not a thing subject to *random* anticipation, and, therefore, we say that there are no chances against it at all. But, as the presumption that some fact will come up is a *specific* presumption, quite different from the presumption against any particular face; so the presumption against no face coming up (which is really the same thing, and equivalent to the presumption against a miracle, considered merely in its physical strangeness) must be *specific* also, and different from the presumption against any particular form of such a miracle selected beforehand by an arbitrary anticipation. For miraculous facts, it is evident, are subject to the doctrine of chances, each in particular, in the same way as ordinary facts. Thus, *e. g.* supposing a miracle to be wrought, the cube might be changed into any geometrical figure; and we can see no reason for selecting one rather than another, or the substance might be changed from ivory to metal, and then one metal would be as likely as another. But no one

probably, would say that he would believe the specific fact of *such a miracle* upon the same proof, or anything like the same proof, as that on which, *such a miracle being supposed*, he would believe the report of any particular form of it—such form being just as likely beforehand as any other.

Indeed, if "almost any proof" were capable of overcoming presumptions of millions to one against a fact, it is hard to see how we could reasonably reject any report of anything, on the ground of antecedent presumptions against its credibility.

The *Ecclesiastical Miracles* are not delivered to us by inspired historians; nor do they seem to form any part of the same series of events as the miracles of the New Testament.

The miracles of the New Testament (setting aside those wrought by Christ Himself) appear to have been worked by a power conferred upon particular persons according to a regular law, in virtue of which that power was ordinarily transmitted from one person to another, and the only persons privileged thus to *transmit* that power were *the Apostles*. The only exceptions to this rule were, (1.) the Apostles themselves, and (2.) the family of Cornelius, who were the first-fruits of the Gentiles. In all other cases, miraculous gifts were conferred only by the laying on of the *Apostles'* hands. By this arrangement, it is evident that a provision was made for the total ceasing of that miraculous dispensation within a limited period: because, on the death of the last of the Apostles, the ordinary channels would be all stopped through which such gifts were transmitted in the Church.

Thus, in Acts viii., though Philip is described as working many miracles among the Samaritans, he does not seem to have ever thought of imparting the same power to any of his converts. That is reserved for the Apostles Peter and John, who confer the miraculous gifts by the imposition of their hands: and this power, of imparting miraculous gifts to others, is clearly recognized by Simon Magus as a distinct privilege belonging to the Apostles, and quite beyond anything that He had seen exercised before. "When Simon saw that *through laying on of the Apostles' hands* the Holy Ghost was given, he offered them money, saying, Give me also this power, that, on whomsoever I lay hands, he may receive the Holy Ghost."

This separation of the Rite by which miraculous gifts were conferred from Baptism, by which members were admitted into the Church, seems to have been wisely ordained for the purpose of keeping the two ideas, of ordinary and extraordinary gifts, distinct, and providing for the approaching cessation of the former without shaking the stability of an institution which was designed to be a permanent Sacrament in the kingdom of Christ.

And it may also be observed in passing, that this same separation of the effects of these two Rites, affords a presumption that the miraculous gifts, bestowed, as far as we can see, only in the former, were not merely the result of highly raised enthusiasm; because experience shows that violent symptoms of enthusiastic transport would have been much more likely to have shown themselves in the first ardour of conversion than at a later period—in the very crisis of a change, than after that change had been confirmed and settled.

One passage has, indeed, been appealed to as seeming to indicate the permanent residence of miraculous powers in the Christian Church through all ages, Mark xvi. 17, 18. But—

(1.) That passage itself is of doubtful authority, since we know that it was omitted in most of the Greek MSS. which Eusebius was able to examine in the 4th century; and it is still wanting in some of the most important that remain to us.

(2.) It does not necessarily imply more than a promise that such miraculous powers should exhibit themselves among the immediate converts of the Apostles.

And (3.) this latter interpretation is supported by what follows—"And they went forth, and preached everywhere, the Lord working with them, and *confirming the word with the accompanying signs*."

It is, indeed, confessed by the latest and ablest defenders of the ecclesiastical miracles that the great mass of them were essentially a new dispensation; but it is contended, that by those who believe in the Scripture miracles, no strong antecedent improbability against such a dispensation can be reasonably entertained; because, for them, the Scripture miracles have already "borne the brunt" of the infidel objection, and "broken the ice."

But this is wholly to mistake the matter.

If the only objection antecedently to proof against the ecclesiastical miracles were a presumption of their *impossibility* or *incredibility*—simply *as miracles*, this allegation might be pertinent; because he that admits that a miracle has taken place, cannot consistently hold that a *miracle as such* is impossible or incredible. But the antecedent presumption against the ecclesiastical miracles rises upon four distinct grounds, no one of which can be properly called a ground of *infidel* objection.

(1.) It arises from the very nature of probability, and the constitution of the human mind, which compels us to take the analogy of general experience as a measure of likelihood. And this presumption it is manifest is neither religious nor irreligious, but antecedent to, and involved in, all probable reasoning.

A miracle may be said to take place when, under certain moral circumstances, a physical consequent follows upon an antecedent which general experience shows to have no natural aptitude for producing such a consequent; or, when a consequent fails to follow upon an antecedent which is always attended by that consequent in the ordinary course of nature. A blind man recovering sight upon his touching the bones of SS. Gervasius and Protasius, is an instance of the former. St. Alban, walking after his head was cut off, and carrying it in his hand, may be given as an example of the latter kind of miracle. Now, though such occurrences cannot be called impossible, because they involve no self-contradiction in the notion of them, and we know that there is a power in existence quite adequate to produce them, yet they must always remain antecedently improbable, unless we can see reasons for expecting that that power will produce them. The invincible original instinct of our nature—without reliance on which we could not set one foot before another—teaches as its first lesson to expect similar consequents upon what seem similar physical antecedents, and the results of this instinctive belief, checked, modified, and confirmed by the experience of mankind in countless times, places, and circumstances, constitutes what is called our knowledge of the laws of nature. Destroy, or even shake, this knowledge, as applied to practice in ordinary life, and all the uses and purposes of life are at an end. If the real sequences of things were liable, like those

in a dream, to random and capricious variations, on which no one could calculate beforehand, there would be no measures of probability or improbability. If *e. g.* it were a measuring case whether, upon immersing a lighted candle in water, the candle should be extinguished, or the water ignited, —or, whether inhaling the common air should support life or produce death—it is plain that the whole course of the world would be brought to a stand-still. There would be no order of nature at all; and all the rules that are built on the stability of that order, and all the measures of judgment that are derived from it, would be worth nothing. We should be living in fairy-land, not on earth.

(2.) This *general* antecedent presumption against miracles, as varying from the analogy of general experience, is (as we have said) neither religious nor irreligious—neither rational nor irrational—but springs from the very nature of probability: and it cannot be denied without shaking the basis of all probable evidence, whether for or against religion.

Nor does the admission of the existence of the Deity, or the admission of the actual occurrence of the Christian miracles, tend to remove this antecedent improbability against miracles circumstanced as the ecclesiastical miracles generally are.

If, indeed, the *only* presumption against miracles were one against their *possibility*—this might be truly described as an atheistic presumption; and then the proof, from natural reason, of the existence of a God, or the proof of the actual occurrence of any one miracle would *wholly remove* that presumption; and, upon the removal of that presumption, there would remain none at all against miracles, however frequent or however strange; and miraculous occurrences would be as easily proved, *and also as likely beforehand*, as the most ordinary events; so that there would be no improbability of a miracle being wrought at any moment, or upon any conceivable occasion; and the slightest testimony would suffice to establish the truth of any story, however widely at variance with the analogy of ordinary experience.

But the true presumption against miracles is not against their *possibility*, but their *probability*. And this presumption cannot be wholly removed by showing an adequate cause; unless we hold that *all presumptions* drawn from the analogy of experience or the assumed stability of the order of nature are removed by showing the existence of a cause capable of changing the order of nature—*i. e.* unless we hold that the admission of God's existence involves the destruction of *all* measures of probability drawn from the analogy of experience. The ordinary sequences of nature are, doubtless, the result of the Divine will. But to suppose the Divine will to vary its mode of operation in conjunctures, upon which it would be impossible to calculate, and under circumstances apparently similar to those which are perpetually recurring, would be to suppose that the course of things is (to all intents and purposes of human life) as mutable and capricious as if it were governed by mere chance.

Nor can the admission that God *has* actually wrought such miracles as attest the Christian religion, remove the general presumption against miracles as improbable occurrences. The evidence on which revelation stands has proved that the Almighty has, under special circumstances and for special ends, exerted his power of changing the ordinary course of nature. This may be fairly relied on as mitigating the presumption against miracles *under the same circumstances* as those which it has established: but miracles which cannot avail themselves of the benefit of that *law* (as it may be called) of miracles, which such conditions indicate, are plainly involved in all the antecedent difficulties which attach to miracles in general, as varying from the *law of nature*, besides the special difficulties which belong to them as varying from the *law of miracles*, so far as we know anything of that law. And it is vain to allege that God *may* have other ends for miracles than those plain ones for which the Scripture miracles were wrought. Such a plea can be of no weight, unless we can change at pleasure the "*may*" into a "must" or "has." Until the design *appear*, we cannot use it as an element of probability; but we must, in the meanwhile, determine the question by the ordinary rules which regulate the proof of facts. A mere "may" is counterbalanced by a "may not." It cannot surely be meant that miracles have, by the proof of a revelation, ceased to be miracles—*i. e.* rare and wonderful occurrences—so as to make the chances equal of a miracle and an ordinary event. And if this be not held, then it must be admitted that the laws which regulate miracles are, in some way or other, laws which render them essentially *strange* or unusual events, and insure the *general stability* of the course of nature. Whatever other elements enter into the law of miracles, a necessary *infrequency* is one of them: and until we *can see* some of the positive elements of the law of miracles in operation (*i. e.* some of the elements which do not check, but require miracles) this negative element, which we do see, must act strongly against the probability of their recurrence.

It is indeed quite true that Christianity has revealed to us the permanent operation of a supernatural order of things actually going on around us. But there is nothing in the notion of *such* a supernatural system as the Christian dispensation is, to lead us to expect continual interferences with the common course of nature. Not the necessity of *proving* its supernatural character: for (1.) that has been sufficiently proved once for all, and the proof sufficiently attested to us, and (2.) it is not pretended that the mass of legendary miracles are, in this sense, evidential. Nor are such continual miracles involved in it by express promise, or by the very frame of its constitution. For they manifestly are not. "So is the kingdom of God, as if a man should cast seed into the ground, and should sleep and rise, night and day, and the seed should spring and grow up he knoweth not how," &c.—the parable manifestly indicating that the ordinary visible course of things is only interfered with by the Divine husbandman, in *planting* and *reaping* the great harvest. Nor do the answers given to prayer, or the influence of the Holy Spirit on our minds, interfere *discoverably* with any one law of outward nature, or of the inward economy of our mental frame. The system of grace is, indeed, *supernatural*, but, in no sense and in no case, *preternatural*. It disturbs in no way the regular sequences which all men's experience teaches them to anticipate as not improbable.

(3.) It is acknowledged by the ablest defenders of the ecclesiastical miracles that, for the most part, they belong to those classes of miracles which are described as *ambiguous* and *tentative*—*i. e.* they are cases in which the effect if it occurred at all) may

have been the result of natural causes, and where, upon the application of the same means, the desired effect was only sometimes produced. These characters are always highly suspicious marks. And though it is quite true—as has been remarked already—that real miracles, and such as were clearly discernible as such to the original spectators, may be so imperfectly reported to us as to wear an ambiguous appearance—it still remains a violation of all the laws of evidence to admit a narrative which leaves a miracle ambiguous as the *ground* of our belief that a miracle has really been wrought. If an *inspired* author declare a particular effect to have been wrought by the immediate interposition of God, we then admit the miraculous nature of that event *on his authority*, though his description of its outward circumstances may not be full enough to enable us to form such a judgment of it from the report of those circumstances alone: or if, amongst a series of indubitable miracles, some are but hastily and loosely reported to us, we may safely admit them as a part of that series, though if we met them in any other connexion we should view them in a different light. Thus, if a skilful and experienced physician records his judgment of the nature of a particular disorder, well known to him, and in the diagnosis of which it was almost impossible for him to be mistaken, we may safely take his word for that, even though he may have mentioned only a few of the symptoms which marked a particular case: or, if we knew that the plague was raging at a particular spot and time, it would require much less evidence to convince us that a particular person had died of that distemper there and then, than if his death were attributed to that disease in a place which the plague had never visited for centuries before and after the alleged occurrence of his case.

(4.) Though it is not true that the Scripture-miracles have so "borne the brunt" of the *à priori* objection to miracles as to remove all peculiar presumption against them as improbable events, there is a sense in which they may be truly said to have prepared the way for those of the ecclesiastical legends. But it is one which aggravates, instead of extenuating, their improbability. The narratives of the Scripture-miracles may very probably have tended to raise an expectation of miracles in the minds of weak and credulous persons, and to encourage designing men to attempt an imitation of them. And this suspicion is confirmed when we observe that it is precisely those instances of Scripture-miracles which are most easily imitable by fraud, or those which are most apt to strike a wild and mythical fancy, which seem to be the types which—with extravagant exaggeration and distortion—are principally copied in the ecclesiastical miracles. In this sense it may be said that the Scripture narratives "broke the ice," and prepared the way for a whole succession of legends; just as any great and striking character is followed by a host of imitators, who endeavour to reproduce him, not by copying what is really essential to his greatness, but by exaggerating and distorting some minor peculiarities in which his great qualities may sometimes have been exhibited.

But—apart from any leading preparation thus afforded—we know that the ignorance, fraud, and enthusiasm of mankind have in almost every age and country produced such a numerous spawn of spurious prodigies, as to make false stories of miracles under certain circumstances, a thing to be naturally expected. Hence, unless it can be distinctly shown, from the nature of the case, the narratives of miracles are *not attributable* to real causes—that they are *not* the offspring of such a parentage—the reasonable rules of evidence seem to require that we should refer them to their real and best known causes.

Nor can there be, as some weak persons are apt to imagine, any *impiety* in such a course. On the contrary, true piety, or religious reverence of God, requires us to abstain with scrupulous care from attributing to Him any works which we have not good reason for believing Him to have wrought. It is not piety, but profane audacity, which ventures to refer to God that which, according to the best rules of probability which He has Himself furnished us with, is most likely to have been the product of human ignorance, or fraud, or folly.

On the whole, therefore, we may conclude that the mass of the ecclesiastical miracles do not form any part of the same series as those related in Scripture, which latter are, therefore, unaffected by any decision we may come to with respect to the former; and that they are pressed by the weight of three distinct presumptions against them—being improbable (1) as varying from the analogy of nature; (2) as varying from the analogy of the Scripture-miracles; (3) as resembling those legendary stories which are the known product of the credulity or imposture of mankind.

The controversy respecting the possibility of miracles is as old as philosophic literature. There is a very clear view of it, as it stood in the Pagan world, given by Cicero in his books *de Divinatione*. In the works of Josephus there are, occasionally, suggestions of naturalistic explanations of O. T. miracles: but these seem rather thrown out for the purpose of gratifying sceptical Pagan readers than as expressions of his own belief. The other chief authorities for Jewish opinion are, Maimonides, *Moreh Nebochim*, lib. 2, c. 35, and the *Pirke Aboth*, in Surenhusius' *Mishna*, tom. iv. p. 469, and Abarbanel, *Mphaloth Elohim*, p. 93. It is hardly worth while noticing the extravagant hypothesis of Cardan (*De contradictione Medicorum*, l. 2, tract. 2) and of some Italian atheists, who referred the Christian miracles to the influence of the stars. But a new era in the dispute began with Spinoza's *Tractatus Theologico-politici*, which contained the germs of almost all the infidel theories which have since appeared. A list of the principal replies to it may be seen in Fabricius, *Delectus Argumentorum*, &c., c. 43, p. 697, Hamburg, 1725.

A full account of the controversy in England with the deists, during the last century, will be found in Leland's *View of the Deistical Writers*, reprinted at London, 1836.

The debate was renewed, about the middle of that century, by the publication of Hume's celebrated essay—the chief replies to which are: Principal Campbell's *Dissertation on Miracles*; Hey's *Lady Margaret's Lectures*, vol. i. pp. 127-200; Bp. Elrington's *Donnellan Lectures*, Dublin, 1796; Dr. Thomas Brown, *On Cause and Effect*; Paley's *Evidences* (Introduction); Archbp. Whately, *Logic* (Appendix), and his *Historic Doubts respecting Napoleon Bonaparte* [the argument of which the writer of this article has attempted to apply to the objections of Strauss in *Historic Certainties, or the Chronicles of Ecnarf*, Parker, London, 1862]. See also an interesting work by the late Dean Lyall, *Propositiones Prophetiæ*, reprinted 1854, Rivington, London.

Compare also Bp. Douglas, *Criterion, or Miracles Examined*, &c., London, 1754.

Within the last few years the controversy has been reopened by the late Professor Baden Powell in *The Unity of Worlds*, and some remarks on the study of evidences published in the now celebrated volume of *Essays and Reviews*. It would be premature, at present, to give a list of the replies to so recent a work.

The question of the ecclesiastical miracles was slightly touched by Spencer in his notes on Origen against Celsus, and more fully by Le Moine; but did not attract general attention till Middleton published his famous *Free Enquiry*, 1748. Several replies were written by Dodwell (junior), Chapman, Church, &c., which do not seem to have attracted much permanent attention. Some good remarks on the general subject occur in Jortin's *Remarks on Ecclesiastical History*, and in Warburton's *Julian*. This controversy also has of late years been reopened by Dr. Newman, in an essay on miracles originally prefixed to a translation of Fleury's *Ecclesiastical History*, and since republished in a separate form. Dr. Newman had previously, while a Protestant, examined the whole subject of miracles in an article upon Apollonius Tyanaeus in the *Encyclopaedia Metropolitana*. [W. F.]

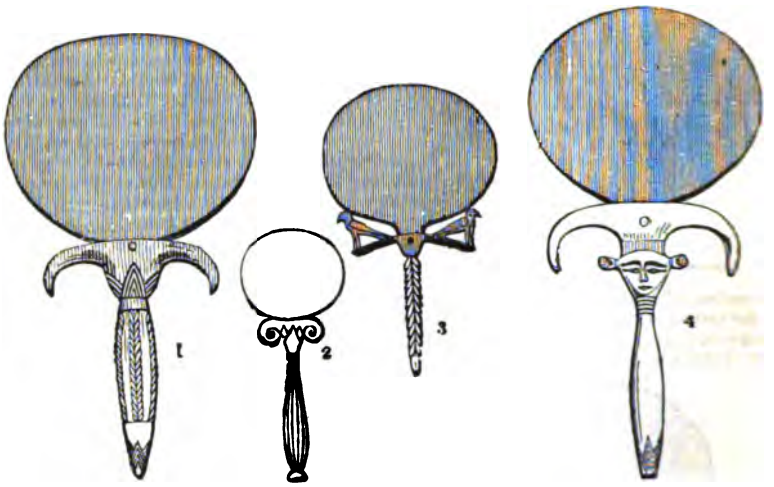
MIR'IAM (מִרְיָם, "their rebellion:" LXX. **Μαριάμ**; hence Joseph. **Μαριάμνη**: in the N. T. **Μαριάμ** or **Μαρία**; **Μαριάμ** being the form always employed for the nominative case of the name of the *Virgin Mary*, though it is declined **Μαρίας, Μαρίᾳ**; while **Μαρία** is employed in all cases for the three other Maries). The name in the O. T. is given to two persons only; the sister of Moses, and a descendant of Caleb. At the time of the Christian era it seems to have been common. Amongst others who bore it was Herod's celebrated wife and victim, Mariamne. And through the Virgin Mary, it has become the most frequent female name in Christendom.

1. MIRIAM, the sister of Moses, was the eldest of that sacred family; and she first appears, probably as a young girl, watching her infant brother's cradle in the Nile (Ex. ii. 4), and suggesting her mother as a nurse (ib. 7). The independent and high position given by her superiority of age she never lost. "The sister of Aaron" is her Biblical distinction (Ex. xv. 20). In Num. xii. 1 she is placed before Aaron; and in Mic. vi. 4 reckoned as amongst the Three Deliverers—"I sent before thee Moses and Aaron and Miriam." She is the first personage in that household to whom the prophetic gifts are directly ascribed—"Miriam the Prophetess" is her acknowledged title (Ex. xv. 20). The prophetic power showed itself in her under the same form as that which it assumed in the days of Samuel and David,—poetry, accompanied with music and processions. The only instance of this prophetic gift is when, after the passage of the Red Sea, she takes a cymbal in her hand, and goes forth, like the Hebrew maidens in later times after a victory (Judg. v. 1, xi. 34; 1 Sam. xviii. 6; Ps. lxviii. 11, 25), followed by the whole female population of Israel, also beating their cymbals and striking their guitars (מְחֹלֹת, mistranslated "dances"). It does not appear how far they joined in the whole of the song (Ex. xv. 1-19); but the opening words are repeated again by Miriam herself at the close, in the form of a command to the Hebrew women. "She answered them, saying, Sing ye to JEHOVAH, for He hath triumphed gloriously: the horse and his rider hath He thrown into the sea."

She took the lead, with Aaron, in the complaint against Moses for his marriage with a Cushite. [ZIPPORAH]. "Hath JEHOVAH spoken by Moses? Hath He not also spoken by us?" (Num. xii. 1, 2). The question implies that the prophetic gift was exercised by them; while the answer implies that it was communicated in a less direct form than to Moses. "If there be a prophet among you, I JEHOVAH will make myself known unto him in a vision, and will speak unto him in a dream. My servant Moses is not so..... With him will I speak mouth to mouth, even apparently, and not in dark speeches" (Num. xii. 6-8). A stern rebuke was administered in front of the sacred Tent to both Aaron and Miriam. But the punishment fell on Miriam, as the chief offender. The hateful Egyptian leprosy, of which for a moment the sign had been seen on the hand of her younger brother, broke out over the whole person of the proud prophetess. How grand was her position, and how heavy the blow, is implied in the cry of anguish which goes up from both her brothers —"Alas, my lord!... Let her not be as one dead, of whom the flesh is half consumed when he cometh out of his mother's womb... Heal her now, O God! I beseech thee." And it is not less evident in the silent grief of the nation: "The people journeyed not till Miriam was brought in again" (Num. xii. 10-15). The same feeling is reflected, though in a strange and distorted form, in the ancient tradition of the drying-up and re-flowing of the marvellous well of the Wanderings. [BEER, vol. i. p. 179 *a*.]

This stroke, and its removal, which took place at Hazeroth, form the last public event of Miriam's life. She died towards the close of the wanderings at Kadesh, and was buried there (Num. xx. 1). Her tomb was shown near Petra in the days of Jerome (*De Loc. Heb.* in voce "*Cades Barnea*"). According to the Jewish tradition (Joseph. *Ant.* iv. 4, §6), her death took place on the new moon of the month Xanthicus (*i. e.* about the end of February); which seems to imply that the anniversary was still observed in the time of Josephus. The burial, he adds, took place with great pomp on a mountain called Zin (*i. e.* the wilderness of Zin); and the mourning—which lasted, as in the case of her brothers, for thirty days—was closed by the institution of the purification through the sacrifice of the heifer (Num. xix. 1-10), which in the Pentateuch immediately precedes the story of her death.

According to Josephus (*Ant.* iii. 2, §4, and 6, §1), she was married to the famous HUR, and, through him, was grandmother of the architect BEZALEEL.



In the Koran (ch. iii.) she is confounded with the Virgin Mary; and hence the Holy Family is called the Family of Amrani, or Imran. (See also D'Herbelot, *Bibl. Orient.* "*Zakaria.*") In other Arabic traditions her name is given as *Kolthum* (see Weil's *Bibl. Legends*, 101).

2. (Both Vat. and Alex. **τὸν Μαιδν**: *Mariam*). A person—whether man or woman does not appear—mentioned in the genealogies of the tribe of Judah and house of Caleb (1 Chr. iv. 17); but in the present state of the Hebrew text it is impossible to say more than that Miriam was sister or brother to the founder of the town of Eshtemoa. Out of the numerous conjectures of critics and translators the following may be noticed: (*a*) that of the LXX., "and Jether begat M.;" and (*b*) that of Bertheau (*Chronik*, ad loc.), that Miriam, Shammai, and

Ishbah are the children of Mered by his Egyptian wife Bithiah, the daughter of Pharaoh: the last clause of ver. 18 having been erroneously transposed from its proper place in ver. 17. [A. P. S.]

MIRMA (מִרְמָה: Μαρμά: *Marma*). A Benjamite, "chief of the fathers," son of Shaharaim by his wife Hodesh; born in the land of Moab (1 Chr. viii. 10).

MIRROR. The two words, מַרְאָה, *mar'āh* (Ex. xxxviii. 8; κάτοπτρον, *speculum*), and רְאִי, *rĕ'î* (Job xxxvii. 18), are rendered "looking glass" in the A. V., but from the context evidently denote a mirror of polished metal. The mirrors of the women of the congregation, according to the former passage, furnished the bronze for the laver of the tabernacle, and in the latter the beauty of the figure is heightened by rendering "Wilt thou beat out with him the clouds, strong as a molten mirror?", the word translated "spread out" in the A. V. being that which is properly applied to the hammering of metals into plates, and from which the Hebrew term for "firmament" is derived. [FIRMAMENT.] The metaphor in Deut. xxviii. 23, "Thy heaven that is over thy head shall be brass," derived its force from the same popular belief in the solidity of the sky.

Egyptian Mirrors. 1, 3, 4, from Mr. Salt's collection; 2, from a painting at Thebes; 4 is about 11 inches high.

The Hebrew women on coming out of Egypt probably brought with them mirrors like those which were used by the Egyptians, and were made of a mixed metal, chiefly copper, wrought with such admirable skill, says Sir G. Wilkinson (*Anc. Eg.* iii. 384), that they were "susceptible of a lustre, which has even been partially revived at the present day, in some of those discovered at Thebes, though buried in the earth for many centuries. The mirror itself was nearly round, inserted into a handle of wood, stone, or metal, whose form varied according to the taste of the owner. Some presented the figure of a female, a flower, a column, or a rod ornamented with the head of Athor, a bird, or a fancy device; and sometimes the face of a Typhonian monster was introduced to support the mirror, serving as a contrast to the features whose beauty was displayed within it." With regard to the metal of which the ancient mirrors were composed there is not much difference of opinion. Pliny mentions that anciently the best were made at Brundusium of a mixture of copper and tin (xxxiii. 45), or of tin alone (xxxiv. 48). Praxiteles, in the time of Pompey the Great, is said to have been the first who made them of silver, though these were afterwards so common as, in the time of Pliny, to be used by the ladies' maids.[a] They are mentioned by Chrysostom among the extravagances of fashion for which he rebuked the ladies of his time, and Seneca long before was loud in his denunciation of similar follies (*Natur. Quaest.* i. 17). Mirrors were used by the Roman women in the worship of Juno (Seneca, *Ep.* 95; Apuleius, *Metam.* xi. *c.* 9, p. 770). In the Egyptian temples, says Cyril of Alexandria (*De ador. in Spir.* ix.; *Opera*, i. p. 314, ed. Paris, 1638), it was the custom for the women to worship in linen garments, holding a mirror in their left hands and a sistrum in their right, and the Israelites, having fallen into the idolatries of the country, had brought with them the mirrors which they used in their worship.[b]

According to Beckmann (*Hist. of Inv.* ii. 64, Bohn), a mirror which was discovered near Naples was tested, and found to be made of a mixture of copper and regulus of antimony, with a little lead. Beckmann's editor (Mr. Francis) gives in a note the result of an analysis of an Etruscan mirror, which he examined and found to consist of 67·12 copper, 24·93 tin, and 8·13 lead, or nearly 8 parts of copper to 3 of tin and 1 of lead, but neither in this, nor in

[a] Silver mirrors are alluded to in Plautus (*Mostell.* i. 4, ver. 101) and Philostratus (*Icon.* i. 6); and one of steel is said to have been found. They were even made of gold (Ear. *Hec.* 925; Sen. *Nat. Quaest.* i. 17).

[b] Apparently in allusion to this custom Moore (*Epicurean*, c. 5), in describing the maidens who danced at the Island Temple of the Moon, says, "As they passed under the lamp, a gleam of light flashed from their bosoms, which, I could perceive, was the reflection of a small mirror, that in the manner of the women of the East each of the dancers wore beneath her left shoulder."

was analysed by Klaproth, was there any trace of antimony, which Beckmann asserts was unknown to the ancients. Modern experiments have shown that the mixture of copper and tin produces the best metal for specula (*Phil. Trans.* vol. 67, p. 296).

Egyptian Mirror (From Mr Salt's collection.)

Much curious information will be found in Beckmann upon the various substances employed by the ancients for mirrors, but which has no bearing upon the subject of this article. In his opinion it was not till

Egyptian Mirror. 2 and 3 show the bottom of the handle, to which something has been fastened. (Was in the possession of Dr. Hogg.)

the 13th century that glass, covered at the back with tin or lead, was used for this purpose, the doubtful allusion in Pliny (xxxvi. 66)[c] to the mirrors made in the glass-houses of Sidon, having reference to experiments which were unsuccessful. Other allusions to bronze mirrors will be found in a fragment of Aeschylus preserved in Stobaeus (*Serm.* xviii. p. 164, ed. Gesner, 1608), and in Callimachus (*Hym. in Lav. Pall.* 21). Convex mirrors of polished steel are mentioned as common in the East, in a manuscript note of Chardin's upon Ecclus. xii. 11, quoted by Harmer (*Observ.* vol. iv. c. 11, obs. 55).

The metal of which the mirrors were composed being liable to rust and tarnish, required to be constantly kept bright (Wisd. vii. 26; Ecclus. xii. 11). This was done by means of pounded pumice-stone, rubbed on with a sponge, which was generally suspended from the mirror. The Persians used emery-powder for the same purpose, according to Chardin (quoted by Hartmann, *die Hebr. am Putztische*, ii. 245). The obscure image produced by a tarnished or imperfect mirror, appears to be alluded to in 1 Cor. xiii. 12. On the other hand a polished mirror is among the Arabs the emblem of a pure reputation. "More spotless than the mirror of a foreign woman," is with them a proverbial expression, which Meïdani explains of a woman who has married out of her country, and polishes her mirror incessantly that no part of her face may escape her observation (De Sacy, *Chrest. Arab.* iii. p. 236).

The obscure word גִּלְיֹנִים, *gilyônîm* (Is. iii. 23), rendered "glasses" in the A. V. after the Vulgate *specula*, and supported by the Targum, and the commentaries of Kimchi, Abarbanel, and Jarchi, is explained by Schroeder (*de Vest. Mul. Hebr.* ch. 18) to signify "transparent dresses" of fine linen, as the LXX. (τὰ διαφανῆ Λακωνικά), and even Kimchi in his Lexicon understand it (comp. *multicia*, Juv. *Sat.* ii. 66, 76). In support of this view, it is urged that the terms which follow denote articles of female attire; but in Is. viii. 1, a word closely resembling it is used for a smooth writing tablet, and the rendering of the A. V. is approved by Gesenius (*Jesaia* i. 215) and the best authorities.

[W. A. W.]

MIS'AEL (Μισαήλ: *Misael*). 1. The same as MISHAEL 2 (1 Esd. ix. 44; comp. Neh. viii. 4).

2. = MISHAEL 3, the Hebrew name of Meshach. (Song of the Three Child. 66).

MIS'GAB (הַמִּשְׂגָּב, with the def. article Ἀμάθ: *fortis, sublimis*), a place in Moab named in company with NEBO and KIRIATHAIM in the denunciation of Jeremiah (xlviii. 1). It appears to be mentioned also in Is. xxv. 12,[a] though there rendered in the A. V. "high fort." [MOAB, p. 397.] In neither passage is there any clue to its situation beyond the fact of its mention with the above two places; and even that is of little avail, as neither of them have been satisfactorily identified.

The name may be derived from a root signifying elevation (Gesenius, *Thes.* 1320), and in that case was probably attached to a town situated on a height. It is possibly identical with MIZPEH OF MOAB, named only in 1 Sam. xxiii. 3. Fürst (*Handwb.* 794 *a*) understands "the Misgab" to mean the highland country of Moab generally, but its mention in company with other places which

[c] "Sidone quondam in officinis nobili: siquidem etiam specula excogitaverat."

[a] In this passage it is without the article. As a mere appellative, the word *Misgab* is frequently used in the poetical parts of Scripture, in the sense of a lofty place of refuge. Thus 2 Sam. xxii. 3; Ps. ix. 9, lix. 9; Is. xxxiii. 16; in which and other places it is variously rendered in the A. V. "high tower," "refuge," "defence," &c. See Stanley, *S. & P.* App. §31.

we know to have been definite spots, even though not yet identified with certainty, seems to forbid this. [G.]

MISH'AEL (מִישָׁאֵל: Μισαήλ in Ex.; Μισαδδή; Alex. Μισαδδι in Lev.: *Misaël, Misaele*). 1. One of the sons of Uzziel, the uncle of Aaron and Moses (Ex. vi. 22). When Nadab and Abihu were struck dead for offering strange fire, Mishael and his brother Elzaphan, at the command of Moses, removed their bodies from the sanctuary, and buried them without the camp, their loose fitting tunics[b] (*cuttŏnŏth*, A. V. "coats"), the simplest of eastern dresses, serving for winding-sheets (Lev. x. 4, 5). The late Prof. Blunt (*Undes. Coincidences*, pt. i. §xiv.) conjectured that the two brothers were the "men who were defiled by the dead body of a man" (Num. ix. 6), and thus prevented from keeping the second passover.

2. (Μισαήλ; Alex. Μεισαήλ: *Misael*). One of those who stood at Ezra's left hand, on the tower of wood in the street of the water gate, when he read the law to the people (Neh. viii. 4). Called MISAEL in 1 Esdr. ix. 44.

3. One of Daniel's three companions in captivity, and of the blood-royal of Judah (Dan. i. 6, 7, 11, 19, ii. 17). He received the Babylonian title of MESHACH, by which he is better known. In the Song of the Three Children he is called MISAEL.

MISH'AL, and MISH'EAL (both מִשְׁאָל: τὴν Βασελλάν, Alex. Μασαδλ; Μαδσά, Alex. Μασάψ: *Messal, Misal*), one of the towns in the territory of Asher (Josh. xix. 26), allotted to the Gershonite Levites (xxi. 30). It occurs between Amad and Carmel, but the former remains unknown, and this catalogue of Asher is so imperfect, that it is impossible to conclude with certainty that Mishal was near Carmel. True, Eusebius (*Onom.* "Masan") says that it was, but he is evidently merely quoting the list of Joshua, and not speaking from actual knowledge. In the catalogue of 1 Chr. vi. it is given as MASHAL, a form which suggests its identity with the MASALOTH of later history; but there is nothing to remark for or against this identification. [G.]

MISH'AM (מִשְׁעָם: Μισαδλ: *Misaam*). A Benjamite, son of Elpaal, and descendant of Shaharaim (1 Chr. viii. 12).

MISH'MA (מִשְׁמָע, Μασμά: *Masma*).

1. A son of Ishmael and brother of MIBSAM (Gen. xxv. 14; 1 Chr. i. 30). The Masamani of Ptolemy (vi. 7, §21), may represent the tribe of Mishma; their modern descendants are not known to the writer, but the name (Misma')[c] exists in Arabia, and a tribe is called the Benee-Misma'. In the Mir-át ez-Zemán (MS.), Mishma is written Misma'—probably from Rabbinical sources; but it is added "and he is Mesmá'ah.[d] The Arabic word has the same signification as the Hebrew.

2. A son of Simeon (1 Chr. iv. 25), brother of MIBSAM. These brothers were perhaps named after the older brothers, Mishma and Mibsam. [E. S. P.]

MISHMAN'NAH (מִשְׁמַנָּה: Μασμανά; Alex. Μασμάν; F. A. Μασεμανή: *Masmana*). The fourth of the twelve lion-faced Gadites, men of the host for the battle, who "separated themselves unto David" in the hold of Ziklag (1 Chr. xii. 10).

MISH'RAITES, THE (הַמִּשְׂרָעִי: Ἡμασαραείμ; Alex. ημασαραειν: *Maserei*), the fourth of the four "families of Kirjath-jearim," *i. e.* colonies proceeding therefrom and founding towns (1 Chr. ii. 53). Like the other three, Mishra is not elsewhere mentioned, nor does any trace of it appear to have been since discovered. But in its turn it founded—so the passage is doubtless to be understood—the towns of Zorah and Eshtaol, the former of which has been identified in our own times, while the latter is possibly to be found in the same neighbourhood. [MAHANEH-DAN.] [G.]

MISPER'ETH (מִסְפֶּרֶת: Μασφαράθ; F. A. Μασφαράθ: *Mespharath*). One of those who returned with Zerubbabel and Jeshua from Babylon (Neh. vii. 7). In Ezr. ii. 2 he is called MIZPAR and in 1 Esdr. v. 8 ASPHARASUS.

MIS'REPHOTH-MA'IM (מִשְׂרְפוֹת מַיִם, and in xiii. 6, מִשְׂרְפֹת מ': Μασερώθ, and Μασερώθ Μεμφαμαίμ; Alex. Μασρεφωθ μαειμ, and Μασρεφωθ μαιμ: *aquae Miscrephoth*), a place in northern Palestine, in close connexion with Zidon-rabbah, *i. e.* Sidon. From "the waters of Merom" Joshua chased the Canaanite kings to Zidon and Misrephoth-maim, and then eastward to the "plain of Mizpeh," probably the great plain of Baalbek—the *Bikah* of the Hebrews, the *Buka'a* of the modern Syrians (Josh. xi. 8). The name occurs once again in the enumeration of the districts remaining to be conquered (xiii. 6)—"all the inhabitants of the mountain from Lebanon unto M. Maim, all the Zidonians." Taken as Hebrew, the literal meaning of the name is "burnings of waters," and accordingly it is taken by the old interpreters to mean "warm waters," whether natural, *i. e.* hot baths or springs—as by Kimchi and the interpolators in the Vulgate; or artificial, *i. e.* salt, glass, or smelting-works—as by Jarchi, and the others mentioned by Fürst (*Hdwb.* 803*b*), Rödiger (in Gesen. *Thes.* 1341), and Keil (*Josua*, ad loc.).

Lord A. Hervey (*Genealogies &c.*, 228 *note*) considers the name as conferred in consequence of the "burning" of Jabin's chariots there. But were they burnt at that spot? and, if so, why is the name the "burning of *waters*?" The probability here, as in so many other cases, is, that a meaning has been forced on a name originally belonging to another language, and therefore unintelligible to the later occupiers of the country.

Dr. Thomson (*Land and Book*, ch. xv.), receiving the conjecture of himself and Schultz (*Bibl. Sacra*, 1855), treats Misrephoth-maim as identical with a collection of springs called *Ain-Musheirifeh*, on the sea-shore, close under the *Ras en-Nakhura*; but this has the disadvantage of being very far from Sidon. May it not rather be the place with which we are familiar in the later history as Zarephath? In Hebrew, allowing for a change not unfrequent of S to Z (reversed in the form of the name current still later—Sarepta), the two are from roots almost identical, not only in sound, but also in meaning: while the close connexion of Zarephath with Zidon—"Zarephath which belongeth to Zidon,"—is another point of strong resemblance. [G.]

[b] Their priestly frocks, or cassocks (Ex. xl. 14), which, as Jarchi remarks, were not burned.

[c] Gesen.

[d] Lumsden.

[e] The "and" here inserted in the A. V. is quite gratuitous.

MITE (λεπτόν), a coin current in Palestine in the time of our Lord. It took its name from a very small Greek copper coin, of which with the Athenians seven went to the χαλκοῦς. It seems in Palestine to have been the smallest piece of money, being the half of the farthing, which was a coin of very low value. The mite is famous from its being mentioned in the account of the poor widow's piety whom Christ saw casting two mites into the treasury (Mark xii. 41-44; Luke xxi. 1-4). From St. Mark's explanation, "two mites, which make a farthing" (λεπτὰ δύο, ὅ ἐστι κοδράντης, ver. 42), it may perhaps be inferred that the κοδράντης or farthing was the commoner coin, for it can scarcely be supposed to be there spoken of as a money of account, though this might be the case in another passage (Matt. v. 26). In the Græco-Roman coinage of Palestine, in which we include the money of the Herodian family, the two smallest coins, of which the assarion is the more common, seem to correspond to the farthing and the mite, the larger weighing about twice as much as the smaller. This correspondence is made more probable by the circumstance that the larger seems to be reduced from the earlier "quarter" of the Jewish coinage. It is noticeable, that although the copper mites struck about the time referred to in the Gospels are rare, those of Alex. Jannæus' coinage are numerous, whose abundant money must have long continued in use. [MONEY; FARTHING.] [R. S. P.]

MITH'CAH (מִתְקָה: Μαθεκά: *Methca*), the name of an unknown desert encampment of the Israelites, meaning, perhaps, "place of sweetness"[a] (Num. xxxiii. 28, 29). [H. H.]

MITH'NITE, THE (הַמִּתְנִי: ὁ Βαθανεί; Alex. ὁ Μαθθαν: *Mathanites*), the designation of JASHAPHAT, one of David's guard in the catalogue of 1 Chr. xi. (ver. 43). No doubt it signifies the native of a place or a tribe bearing the name of Mithan; but no trace exists in the Bible of any such. It should be noticed that Joshaphat is both preceded and followed by a man from beyond Jordan, but it would not be safe to infer therefrom that Mithan was also in that region. [G.]

MITH'REDATH (מִתְרְדָת: Μιθραδάτης: *Mithridates*). 1. The treasurer (גִּזְבַּר, *gizbár*) of Cyrus king of Persia, to whom the king gave the vessels of the Temple, to be by him transferred to the hands of Sheshbazzar (Ezr. i. 8). The LXX. take *gizbár* as a gentilic name, Γασβαρηνός, the Vulgate as a patronymic, *filius Gazabar*, but there is little doubt as to its meaning. The word occurs in a slightly different form in Dan. iii. 2, 3, and is there rendered "treasurer;" and in the parallel story of 1 Esdr. ii. 11, Mithredath is called MITHRIDATES the treasurer (γαζοφύλαξ). The name Mithredath, "given by Mithra," is one of a class of compounds of frequent occurrence, formed from the name of Mithra, the Iranian sun-god.

2. A Persian officer stationed at Samaria, in the reign of Artaxerxes, or Smerdis the Magian (Ezr. iv. 7). He joined with his colleagues in prevailing upon the king to hinder the rebuilding of the Temple. In 1 Esdr. ii. 16 he is called MITHRIDATES.

[a] Derived from מָתַק, "sweetness," with the suffix ה of locality, which (or the plur. וֹת) is often found in names.

MITHRIDA'TES (Μιθραδάτης; Alex. Μιθραδάτης: *Mithridatus*).

1. (1 Esdr. ii. 11) = MITHREDATH 1.
2. (1 Esdr. ii. 16) = MITHREDATH 2.

MITRE. [CROWN.]

MITYLE'NE (Μιτυλήνη, in classical authors and on inscriptions frequently Μυτιλήνη), the chief town of Lesbos, and situated on the east coast of the island. Its position is very accurately, though incidentally, marked (Acts xx. 14, 15) in the account of St. Paul's return-voyage from his third apostolical journey. Mitylene is the intermediate place where he stopped for the night between Assos and CHIOS. It may be gathered from the circumstances of this voyage that the wind was blowing from the N.W.; and it is worth while to notice that in the harbour or in the roadstead of Mitylene the ship would be sheltered from that wind. Moreover it appears that St. Paul was there at the time of dark moon: and this was a sufficient reason for passing the night there before going through the intricate passages to the southward. See *Life and Epistles of St. Paul*, ch. xx., where a view of the place is given, showing the fine forms of the mountains behind. The town itself was celebrated in Roman times for the beauty of its buildings ("Mitylene pulchra," Hor. *Epist.* I. xi. 17; see Cic. *c. Rull.* ii. 16). In St. Paul's day it had the privileges of a free city (Plin. *N. H.* v. 39). It is one of the few cities of the Aegean which have continued without intermission to flourish till the present day. It has given its name to the whole island, and is itself now called sometimes *Castro*, sometimes *Mitylen*. Tournefort gives a rude picture of the place as it appeared in 1700 (*Voyage du Levant*, i. 148, 149). It is more to our purpose to refer to our own Admiralty charts, Nos. 1665 and 1654. Mitylene concentrates in itself the chief interest of Lesbos, an island peculiarly famous in the history of poetry, and especially of poetry in connexion with music. But for these points we must refer to the articles in the *Dict. of Geography*. [J. S. H.]

MIXED MULTITUDE. With the Israelites who journeyed from Rameses to Succoth, the first stage of the Exodus from Egypt, there went up (Ex. xii. 38) "a mixed multitude" (עֵרֶב: ἐπίμικτος: *vulgus promiscuum*), who have not hitherto been identified. In the Targum the phrase is vaguely rendered "many foreigners," and Jarchi explains it as "a medley of outlandish people." Aben Ezra goes further and says it signifies "the Egyptians who were mixed with them, and they are the 'mixed multitude' (אֲסַפְסֻף, Num. xi. 4), who were gathered to them." Jarchi on the latter passage also identifies the "mixed multitude" of Num. and Exodus. During their residence in Egypt marriages were naturally contracted between the Israelites and the natives, and the son of such a marriage between an Israelitish woman and an Egyptian is especially mentioned as being stoned for blasphemy (Lev. xxiv. 11), the same law holding good for the resident or naturalized foreigner as for the native Israelite (Josh. viii. 35). This hybrid race is evidently alluded to by Jarchi and Aben Ezra, and is most probably that to which reference is made in Exodus. Knobel understands by the "mixed multitude" the remains of the Hyksos who left Egypt with the Hebrews. Dr. Kalisch (*Comm. on Ex.* xii. 38) interprets it of the native Egyptians who

were involved in the same oppression with the Hebrews by the new dynasty, which invaded and subdued Lower Egypt; and Kurtz (*Hist. of Old Cov.* ii. 312, Eng. tr.), while he supposes the "mixed multitude" to have been Egyptians of the lower classes, attributes their emigration to their having "endured the same oppression as the Israelites from the proud spirit of caste which prevailed in Egypt," in consequence of which they attached themselves to the Hebrews, "and served henceforth as hewers of wood and drawers of water." That the "mixed multitude" is a general term including all those who were not of pure Israelite blood is evident; more than this cannot be positively asserted. In Exodus and Numbers it probably denoted the miscellaneous hangers-on of the Hebrew camp, whether they were the issue of spurious marriages with Egyptians, or were themselves Egyptians or belonging to other nations. The same happened on the return from Babylon, and in Neh. xiii. 3, a slight clue is given by which the meaning of the "mixed multitude" may be more definitely ascertained. Upon reading in the law "that the Ammonite and the Moabite should not come into the congregation of God for ever," it is said, "they separated from Israel all the *mixed multitude*." The remainder of the chapter relates the expulsion of Tobiah the Ammonite from the Temple, of the merchants and men of Tyre from the city, and of the foreign wives of Ashdod, of Ammon, and of Moab, with whom the Jews had intermarried. All of these were included in the "mixed multitude," and Nehemiah adds, "thus cleansed I them from all *foreigners*." The Targ. Jon. on Num. xi. 4, explains the "mixed multitude" as proselytes, and this view is apparently adopted by Ewald, but there does not seem any foundation for it. [W. A. W.]

MIZ'AR, THE HILL (הַר מִצְעָר: ὄρος μειρόν: *mons modicus*), a mountain — for the reader will observe that the word is *har* in the original (see vol. i. 816*a*)—apparently in the northern part of trans-Jordanic Palestine, from which the author of Psalm xlii. utters his pathetic appeal (ver. 6). The name appears nowhere else, and the only clue we have to its situation is the mention of the "land of Jordan" and the "Hermons," combined with the general impression conveyed by the Psalm that it is the cry of an exile[a] from Jerusalem, possibly on his road to Babylon (Ewald, *Dichter*. ii. 185). If taken as Hebrew, the word is derivable from a root signifying smallness—the same by which Zoar is explained in Gen. xix. 20-22. This is adopted by all the ancient versions, and in the Prayer-book Psalms of the Church of England appears in the inaccurate form of "the little hill of Hermon." [G.]

MIZ'PAH, and MIZ'PEH. The name borne by several places in ancient Palestine. Although in the A. V. most frequently presented as MIZPEH, yet in the original, with but few exceptions, the name is Mizpah, and with equally few[b] exceptions is accompanied with the definite article — הַמִּצְפָּה, *ham-Mitzpah*.

1. MIZPAH (הַמִּצְפָּה; Samar. המצבה, *the pillar*: ἡ θρασις; Veneto-Gk. ὁ ἀτενισμός: Vulg. omits). The earliest of all, in order of the narrative, is the heap of stones piled up by Jacob and Laban (Gen. xxxi. 48) on Mount Gilead (ver. 25), to serve both as a witness to the covenant then entered into, and also as a landmark of the boundary between them (ver. 52). This heap received a name from each of the two chief actors in the transaction—GALEED and JEGAR SAHADUTHA. But it had also a third, viz. MIZPAH, which it seems from the terms of the narrative to have derived from neither party, but to have possessed already; which third name, in the address of Laban to Jacob, is seized and played upon after the manner of these ancient people:—"Therefore he called the name of it Galeed, and the Mizpah; for he said, Jehovah watch (*itzeph*, יִצֶף) between me and thee," &c. It is remarkable that this Hebrew paronomasia is put into the mouth, not of Jacob the Hebrew, but of Laban the Syrian, the difference in whose language is just before marked by "Jegar-Sahadutha." Various attempts[c] have been made to reconcile this; but, whatever may be the result, we may rest satisfied that in Mizpah we possess a Hebraized form of the original name, whatever that may have been, bearing somewhat the same relation to it that the Arabic *Beit-ur* bears to the Hebrew Beth-horon, or—as we may afterwards see reason to suspect—as *Safieh* and *Shafat* bear to ancient Mizpehs on the western side of Jordan. In its Hebraized form the word is derived from the root *tsâphâh*, צָפָה, "to look out" (Gesen. *Lexicon*, ed. Robinson, *s. v.* צָפָה), and signifies a watch-tower. The root has also the signification of breadth—expansion. But that the original name had the same signification as it possesses in its Hebrew form is, to say the least, unlikely; because in such linguistic changes the meaning always appears to be secondary to the likeness in sound.

Of this early name, whatever it may have been, we find other traces on both sides of Jordan, not only in the various Mizpahs, but in such names as Zophim, which we know formed part of the lofty Pisgah; Zaphon, a town of Moab (Josh. xiii. 27); Zuph and Ramathaim-Zophim, in the neighbourhood of Mizpeh of Benjamin; Zephathah in the neighbourhood of Mizpeh of Judah; possibly also in *Safed*, the well-known city of Galilee.

But, however this may be, the name remained attached to the ancient meeting-place of Jacob and Laban, and the spot where their conference had been held became a sanctuary of Jehovah, and a place for solemn conclave and deliberation in times of difficulty long after. On this natural "watch-tower" (LXX. σκοπιά), when the last touch had been put to their "misery" by the threatened attack of the Bene-Ammon, did the children of Israel assemble for the choice of a leader (Judg. x. 17, comp. ver. 16); and when the outlawed Jephthah had been prevailed on to leave his exile and take the head of his people, his first act was to go to "the Mizpah," and on that consecrated ground utter

[a] In the Peshito-Syriac it bears the title, "The Psalm which David sang when he was in exile, and longing to return to Jerusalem."

[b] These exceptions may be collected here with convenience:—1. Mizpeh, without the article, is found in the Hebrew in Josh. xi. 8, Judg. xi. 29, and 1 Sam. xxii. 3 only; 2. Mizpah without the article in Hos. v. 1 only; 3. Mizpeh with the article in Josh. xv. 38 only; 4. In every other case the Hebrew text presents the name as ham-Mitzpah.

[c] See Ewald, *Komposition der Genesis*. Thus in the LXX. and Vulg. versions of ver. 49, the word *Mizpah* is not treated as a proper name at all; and a different reason is given to the verse.

all his words "before Jehovah." It was doubtless from Mizpah that he made his appeal to the king of the Ammonites (xi. 12), and invited, though fruitlessly, the aid of his kinsmen of Ephraim on the other side of Jordan (xii. 2). At Mizpah he seems to have henceforward resided; there the fatal meeting took place with his daughter on his return from the war (xi. 34), and we can hardly doubt that on the altar of that sanctuary the father's terrible vow was consummated. The topographical notices of Jephthah's course in his attack and pursuit (ver. 33) are extremely difficult to unravel; but it seems most probable that the "Mizpeh-Gilead" which is mentioned here, and here only, is the same as the ham-Mizpah of the other parts of the narrative; and both, as we shall see afterwards, are probably identical with the RAMATH-MIZPEH and RAMOTH-GILEAD, so famous in the later history.

It is still more difficult to determine whether this was not also the place at which the great assembly of the people was held to decide on the measures to be taken against Gibeah after the outrage on the Levite and his concubine (Judg. xx. 1, 3, xxi. 1, 5, 8). No doubt there seems a certain violence in removing the scene of any part of so local a story to so great a distance as the other side of Jordan. But, on the other hand, are the limits of the story so circumscribed? The event is represented as one affecting not a part only, but the whole of the nation, east of Jordan as well as west —"from Dan to Beersheba, and the land of Gilead" (xx. 1). The only part of the nation excluded from the assembly was the tribe of Benjamin, and that no communication on the subject was held with them, is implied in the statement that they only "heard" of its taking place (xx. 3); an expression which would be meaningless if the place of assembly were—as Mizpah of Benjamin was—within a mile or two of Gibeah, in the very heart of their own territory, though perfectly natural if it were at a distance from them. And had there not been some reason in the circumstances of the case, combined possibly with some special claim in Mizpah—and that claim doubtless its ancient sanctity and the reputation which Jephthah's success had conferred upon it—why was not either Bethel, where the ark was deposited (xx. 18, 27), or Shiloh, chosen for the purpose? Suppose a Mizpah near Gibeah, and the subject is full of difficulty: remove it to the place of Jacob and Laban's meeting, and the difficulties disappear; and the allusions to Gilead (xx. 1), to Jabesh-Gilead (xxi. 8, &c.), and to Shiloh, as "in the land of Canaan," all fall naturally into their places and acquire a proper force.

Mizpah is probably the same as RAMATH-MIZPEH (רֶמֶת הַמִּצְפֶּה), mentioned Josh. xiii. 26 only. The name merely signifies that the spot was an elevated one, which we already believe it to have been; and if the two are not identical, then we have the unusual of an enumeration of the chief places of Gilead with the omission of its most famous sanctuary. Ramath ham-Mizpeh was most probably identical also with Ramoth-Gilead; but this is a point which will be most advantageously discussed under the latter head.

[a] The word here used—אִיגַר סָהֲדוּתָא—exhibits the transition from the "Jegar" of the ancient Aramaic of Laban to the *Hafar* of the modern Arabs—the word by which they designate the heaps which it is their custom, as it was Laban's, to erect as landmarks of a boundary.

Mizpah still retained its name in the days of the Maccabees, by whom it was besieged and taken with the other cities of Gilead (1 Macc. v. 35). From Eusebius and Jerome (*Onomasticon*, "Maspha") it receives a bare mention. It is probable, both from their notices (*Onom.* "Rammoth") and from other considerations, that Ramoth-Gilead is the modern *es-Salt*; but it is not ascertained whether Mizpah is not rather the great mountain *Jebel Osha*, a short distance to the north-west. The name *Safut* appears in Van de Velde's map a few miles east of *es-Salt*.

A singular reference to Mizpah is found in the title of Ps. lx., as given in the Targum, which runs as follows:—"For the ancient testimony of the sons of Jacob and Laban when David assembled his army and passed over the heap[d] of witness."

2. A second Mizpeh, on the east of Jordan, was the MIZPEH-MOAB (מִצְפֵּה מוֹאָב: Μασσηφὰ τῆς Μωάβ: *Maspha quae est Moab*), where the king of that nation was living when David committed his parents to his care (1 Sam. xxii. 3). The name does not occur again, nor is there any clue to the situation of the place. It may have been, as is commonly conjectured, the elevated and strong natural fortress afterwards known as KIR-MOAB, the modern *Kerak*. But is it not at least equally possible that it was the great Mount Pisgah, which was the most commanding eminence in the whole of Moab, which contained the sanctuary of Nebo, and of which one part was actually called Zophim (Num. xxiii. 14), a name derived from the same root with Mizpeh?

3. A third was THE LAND OF MIZPEH, or more accurately "OF MIZPAH" (אֶרֶץ הַמִּצְפָּה τῆν Μασνμά: [e] *terra Mispha*), the residence of the Hivites who joined the northern confederacy against Israel, headed by Jabin king of Hazor (Josh. xi. 3). No other mention is found of this district in the Bible, unless it be identical with

4. THE VALLEY OF MIZPEH (בִּקְעַת מִצְפֶּה: τῶν πεδίων Μασσάχ: *campus Misphe*), to which the discomfited hosts of the same confederacy were chased by Joshua (xi. 8). It lay eastward from MISREPHOTH-MAIM; but this affords us no assistance, as the situation of the latter place is by no means certain. If we may rely on the peculiar term here rendered "valley"—a term applied elsewhere in the records of Joshua only to the "valley of Lebanon," which is also said to have been "under Mount Hermon," and which contained the sanctuary of Baal-gad (Josh. xi. 17, xii. 7)—then we may accept the "land of Mizpah" or "the valley of Mizpeh" as identical with that enormous tract, the great country of Coele-Syria, the *Buka'a* alike of the modern Arabs and of the ancient Hebrews (comp. Am. i. 5), which contains the great sanctuary of Baal-bek, and may be truly said to lie at the feet of Hermon (see Stanley, *S. & P.* 392 note). But this must not be taken for more than a probable inference, and it should not be overlooked that the name Mizpeh is here connected with a "valley" or "plain"—not, as in the other cases, with an eminence. Still the valley may have de-

[e] Here the LXX. (ed. Mai) omit "Hivites," and perhaps read "Hermon" (חרמן), as "Arabah" (ערבה)—the two words are more alike to the ear than the eye—and thus give the sentence, "they under *the desert* in the Masouma." A somewhat similar substitution is found in the LXX. version of Gen. xxxv. 21.

rived its appellation from an eminence of sanctity or repute situated therein; and it may be remarked that a name not impossibly derived from Mizpeh—*Haush Tell-Safiyeh*—is now attached to a hill a short distance north of Baalbek.

5. MIZPEH (הַמִּצְפֶּה: Μασφέ: *Mespha*), a city of Judah (Josh. xv. 38); in the district of the Shefelah or maritime lowland; a member of the same group with Dilean, Lachish, and Eglon, and apparently in their neighbourhood. Van de Velde (*Memoir*, 335) suggests its identity with the present *Tell es-Sâfiyeh*—the Blanchegarde of the Crusaders; a conjecture which appears very feasible on the ground both of situation and of the likeness between the two names, which are nearly identical—certainly a more probable identification than those proposed with GATH and with LIBNAH. *Tîna*, which is not improbably Dilean, is about 3 miles N.W., and *Ajlun* and *um Lakis*, respectively 10 and 12 to the S.W. of *Tell es-Sâfieh*, which itself stands on the slopes of the mountains of Judah, completely overlooking the maritime plain (Porter, *Handbk.* 252). It is remarkable too that, just as in the neighbourhood of other Mizpahs we find Zophim, Zuph, or Zaphon, so in the neighbourhood of Tell es-Sâfieh it is very probable that the valley of ZEPHATHAH was situated. (See Rob. *B. R.* ii. 31.)

6. MIZPEH, in Josh. and Samuel; elsewhere MIZPAH (הַמִּצְפָּה in Joshua; elsewhere הַמִּצְפֶּה: Μασηφάθ; in Josh. Μάσημα; Chron. and Neh. ἡ Μασφᾶ, and ὁ Μασφέ; Kings and Hos. in both MSS. ἡ σκοπιά; Alex. Μασηφα: *Mespha*; *Maspha*; *Masphath*), a "city" of Benjamin, named in the list of the allotment between Beeroth and Chephirah, and in apparent proximity to Ramah and Gibeon (Josh. xviii. 26). Its connexion with the two last-named towns is also implied in the later history (1 K. xv. 22; 2 Chr. xvi. 6; Neh. iii. 7). It was one of the places fortified by Asa against the incursions of the kings of the northern Israel (1 K. xv. 22; 2 Chr. xvi. 6; Jer. xli. 9); and after the destruction of Jerusalem it became the residence of the superintendent appointed by the king of Babylon (Jer. xl. 7, &c.), and the scene of his murder and of the romantic incidents connected with the name of Ishmael the son of Nethaniah.

But Mizpah was more than this. In the earlier periods of the history of Israel, at the first foundation of the monarchy, it was the great sanctuary of Jehovah, the special resort of the people in times of difficulty and solemn deliberation. In the Jewish traditions it was for some time the residence of the ark (see Jerome, *Qu. Hebr.* on 1 Sam. vii. 2; Reland, *Antiq.* i. §vi.);[f] but this is possibly an inference from the expression "before Jehovah" in Judg. xx. 1. It is suddenly brought before us in the history. At Mizpah, when suffering the very extremities of Philistine bondage, the nation assembled at the call of the great Prophet, and with strange and significant rites confessed their sins, and were blessed with instant and signal deliverance (1 Sam. vii. 5-13). At Mizpah took place no less an act than the public selection and appointment of Saul as the first king of the nation (1 Sam. x. 17-25). It was one of the three holy cities (LXX. τοῖς ἡγιασμένοις τούτοις) which Samuel visited in turn as judge of the people (vii. 6, 16), the other two being Bethel and Gilgal. But, unlike Bethel and Gilgal, no record is preserved of the cause or origin of a sanctity so abruptly announced, and yet so fully asserted. We have seen that there is at least some ground for believing that the Mizpah spoken of in the transactions of the early part of the period of the judges, was the ancient sanctuary in the mountains of Gilead. There is, however, no reason for, or rather every reason against, such a supposition, as applied to the events last alluded to. In the interval between the destruction of Gibeah and the rule of Samuel, a very long period had elapsed, during which the ravages of Ammonites, Amalekites, Moabites, and Midianites (Judg. iii. 13, 14, vi. 1, 4, 33, x. 9) in the districts beyond Jordan, in the Jordan valley itself at both its northern and southern ends—at Jericho no less than Jezreel—and along the passes of communication between the Jordan valley and the western tableland, must have rendered communication between west and east almost, if not quite, impossible. Is it possible that as the old Mizpah became inaccessible, an eminence nearer at hand was chosen and invested with the sanctity of the original spot and used for the same purposes? Even if the name did not previously exist there in the exact shape of Mizpah, it may easily have existed in some shape sufficiently near to allow of its formation by a process both natural and frequent in Oriental speech. To a Hebrew it would require a very slight inflexion to change Zophim or Zuph—both of which names were attached to places in the tribe of Benjamin—to Mizpah. This, however, must not be taken for more than a mere hypothesis. And against it there is the serious objection that if it had been necessary to select a holy place in the territory of Ephraim or Benjamin, it would seem more natural that the choice should have fallen on Shiloh, or Bethel, than on one which had no previous claim but that of its name.

With the conquest of Jerusalem and the establishment there of the Ark, the sanctity of Mizpah, or at least its reputation, seems to have declined. The "men of Mizpah" (Neh. iii. 7), and the "ruler of Mizpah," and also of "part of Mizpah" (19 and 15)—assisted in the rebuilding of the wall of Jerusalem. The latter expressions perhaps point to a distinction between the sacred and the secular parts of the town. The allusion in ver. 7 to the "throne of the governor on this side the river" in connexion with Mizpah is curious, and recals the fact that Gedaliah, who was left in charge of Palestine by Nebuchadnezzar, had his abode there. But we hear of no religious act in connexion with it till that affecting assembly called together thither, as to the ancient sanctuary of their forefathers, by Judas Maccabaeus, "when the Israelites assembled themselves together and came to Massepha over against Jerusalem; for in Maspha was there aforetime a place of prayer (τόπος προσευχῆς) for Israel" (1 Macc. iii. 46). The expression "over against" (κατέναντι), as less than the circumstances of the story, seems to require that from Mizpah the City or the Temple was visible: an indication of some importance, since, scanty as it is, it is the only information given us in the Bible as to the situation of the place. Josephus omits all mention of the circumstance, but on another occasion he names the place so as fully to corroborate the inference. It is in his account of the visit of Alexander the Great to

[f] Rabbi Schwarz (127 *note*) very ingeniously finds a reference to Mizpeh in 1 Sam. iv. 13; where he would point the word מִצַּפָּה (A. V. "watching") as מִצְפָּה, and thus read "by the road to Mizpeh."

Jerusalem (*Ant.* xi. 8, §5), where he relates that Jaddua the high-priest went to meet the king "to a certain place called Sapha (Σαφά); which name, if interpreted in the Greek tongue, signifies a look-out place (σκοπή), for from thence both Jerusalem and the sanctuary are visible." Sapha is doubtless a corruption of the old name Mizpah through its Greek form Maspha; and there can be no reasonable doubt that this is also the spot which Josephus on other occasions—adopting as he often does the Greek equivalent of the Hebrew name as if it were the original (witness the ἄνω ἀγορά, Ἄκρα, ἡ τῶν Τυροποιῶν φάραγξ, &c. &c.)—mentions as "appropriately named Scopus" (Σκοπός), because from it a clear view was obtained both of the city and of the great size of the Temple (*B. J.* v. 2, §3). The position of this he gives minutely, at least twice (*B. J.* ii. 19, §4, and v. 2, §3), as on the north quarter of the city, and about 7 stadia therefrom; that is to say, as is now generally agreed, the broad ridge which forms the continuation of the Mount of Olives to the north and east, from which the traveller gains, like Titus, his first view, and takes his last farewell, of the domes, walls, and towers of the Holy City.

Any one who will look at one of the numerous photographs of Jerusalem taken from this point, will satisfy himself of the excellent view of both city and temple which it commands; and it is the only spot from which such a view is possible, which could answer the condition of the situation of Mizpah. *Neby Samwil*, for which Dr. Robinson argues (*B. R.* i. 460), is at least five miles, as the crow flies, from Jerusalem; and although from that lofty station the domes of the "Church of the Sepulchre," and even that of the Sakrah can be discerned, the distance is too great to allow us to accept it as a spot "over against Jerusalem," or from which either city or temple could with satisfaction be inspected. Nor is the moderate height of Scopus, as compared with *Neby Samwil*, any argument against it, for we do not know how far the height of a "high place" contributed to its sanctity, or indeed what that sanctity exactly consisted in.[h] On the other hand, some corroboration is afforded to the identification of Scopus with Mizpah, in the fact that Mizpah is twice rendered by the LXX. σκοπιά.

Titus's approach through the villages of ancient Benjamin was, as far as we can judge, a close parallel to that of an earlier enemy of Jerusalem—Sennacherib. In his case, indeed, there is no mention of Mizpah. It was at Nob that the Assyrian king remained for a day feasting his eyes on "the house of Zion and the hill of Jerusalem," and menacing with "his hand" the fair booty before him. But so exact is the correspondence, that it is difficult not to suspect that Nob and Mizpah must have been identical, since that part of the rising ground north of Jerusalem which is crossed by the northern road is the only spot from which a view of both city and temple at once can be obtained, without making a long detour by way of the Mount of Olives. This, however, will be best discussed under NOB. Assuming that the hill in question is the Scopus of Josephus, and that that again was the Mizpah of the Hebrews, the *skopia* (σκοπιά) and *Massephath* of the LXX. translators, it is certainly startling to find a village named *Shâfât*[i] lying on the north slope of the mountain a very short distance below the summit—if summit it can be called—from which the view of Jerusalem, and of Zion (now occupied by the Sakrah), is obtained. Can *Shafat*, or *Safat*, be, as there is good reason to believe in the case of *Tell-es Sâfieh*, the remains of the ancient Semitic name? Our knowledge of the topography of the Holy Land, even of the city and environs of Jerusalem, is so very imperfect, that the above can only be taken as suggestions which may be not unworthy the notice of future explorers in their investigations.

Professor Stanley appears to have been the first to suggest the identity of Scopus with Mizpah (*S. & P.* 1st edit. 222). But since writing the above, the writer has become aware that the same view is taken by Dr. Bonar in his *Land of Promise* (Appendix, §viii.). This traveller has investigated the subject with great ability and clearness; and he points out one circumstance in favour of Scopus being Mizpah, and against *Neby Samwil*, which had escaped the writer, viz. that the former lay directly in the road of the pilgrims from Samaria to Jerusalem who were murdered by Ishmael (Jer. xli. 7), while the latter is altogether away from it. Possibly the statement of Josephus (see vol. i. p. 895*b*) that it was at Hebron, not Gibeon, that Ishmael was overtaken, coupled with Dr. B.'s own statement as to the pre-occupation of the districts east of Jerusalem—may remove the only scruple which he appears to entertain to the identification of Scopus with Mizpah. [G.]

MIZ'PAR (מִסְפָּר: Μασφάρ: *Maspher*). Properly MISPAR, as in the A. V. of 1611 and the Geneva version; the same as MISPERETH (Ezr. ii. 2).

MIZPEH. [MIZPAH.]

MIZ'RAIM (מִצְרַיִם: Μεσραΐν: *Mesraim*,[k] the usual name of Egypt in the O. T., the dual of Mazor, מָצוֹר, which is less frequently[a] employed: gent. noun, מִצְרִי.

If the etymology of Mazor be sought in Hebrew it might signify a "mound," "bulwark," or "citadel," or again "distress;" but no one of these meanings is apposite. We prefer, with Gesenius (*Thes.* s. v. מָצוֹר), to look to the Arabic, and we extract the article on the corresponding word

from the *Kámoos*, "مصر, a partition between two things, as also مَاصِر: a limit between two lands: a receptacle: a city or a province [the explanation means both]: and red earth or mud. The well-known city [Memphis]." Gesenius accepts the meaning "limit" or the like, but it is hard to see its fitness with the Shemites, who had no idea that the Nile or Egypt was on the border of two conti-

[g] The word used by Josephus in speaking of it (*B. J.* v. 2, 1) is χωμαλόε; and it will be observed that the root of the word Mizpah has the force of breadth as well as of elevation. See above.

[h] In the East, at the present time, a sanctity is attached to the spot from which any holy place is visible. Such spots may be met with all through the hills a few miles north of Jerusalem, distinguished by the little heaps of stones erected by thoughtful or pious Mussulmans. (See Miss Beaufort's *Egypt. Sepulchres*, &c. ii. 89.)

[i] This is the spelling given by Van de Velde in his map. Robinson gives it as *Shâ'fat* (i. e. with the *Ain*) and Dr. Eli Smith, in the Arabic lists attached to Robinson's 1st edition (iii. App. 121), *Sa'fât*.

[k] It occurs only 2 K. xix. 24; Is. xix. 6, xxxvii. 25 Mic. vii. 12.

nents, unless it be supposed to denote the divided land. We believe that the last meaning but one, "red earth or mud" is the true one, from its correspondence to the Egyptian name of the country, KEM, which signifies "black," and was given to it for the blackness of its alluvial soil. It must be recollected that the term "red" (احمر) is not used in the Kámoos, or indeed in Semitic phraseology, in the limited sense to which Indo-European ideas have accustomed us; it embraces a wide range of tints, from what we call red to a reddish brown. So, in like manner, in Egyptian the word "black" signifies dark in an equally wide sense. We have already shown that the Hebrew word Ham, the name of the ancestor of the Egyptians, is evidently the same as the native appellation of the country, the former signifying "warm" or "hot," and a cognate Arabic word, حما, meaning "black fetid mud" (*Kamoos*), or "black mud" (*Sihák*, MS.), and suggested that Ham and Mazor may be identical with the Egyptian KEM (or KHEM), which is virtually the same in both sound and sense as the former, and of the same sense as the latter. [EGYPT; HAM]. How then are we to explain this double naming of the country? A recent discovery throws light upon the question. We had already some reason for conjecturing that there were Semitic equivalents, with the same sense, for some of the Egyptian geographical names with which the Shemites were well acquainted. M. de Rougé has ascertained that Zoan is the famous Shepherd-stronghold Avaris, and that the Hebrew name צֹעַן, from צָעַן, "he moved tents, went forward," is equivalent to the Egyptian one HA-WAR, "the place of departure" (*Revue Archéologique*, 1861, p. 250). This discovery, it should be noticed, gives remarkable significance to the passage, "Now Hebron was built seven years before Zoan in Egypt" (Num. xiii. 22). Perhaps a similar case may be found in Kush and Phut, both of which occur in Egyptian as well as Hebrew. In the Bible, African Cush is Ethiopia above Egypt, and Phut, an African people or land connected with Egypt. In the Egyptian inscriptions, the same Ethiopia is KEESH, and an Ethiopian people is called ANU-PET-MERU, "the Anu of the island of the bow," probably Meroë, where the Nile makes an extraordinary bend in its course. We have no Egyptian or Hebrew etymology for KEESH, or Cush, unless we may compare קֶשֶׁת, which would give the same connexion with bow that we find in Phut or PET, for which our only derivation is from the Egyptian PET, "a bow." There need be no difficulty in thus supposing that Mizraim is merely the name of a country, and that Ham and Mazor may have been the same person, for the very form of Mizraim forbids any but the former idea, and the tenth chapter of Genesis is obviously not altogether a genealogical list. Egyptian etymologies have been sought in vain for Mizraim; 𓂋𓏏𓊪𓅱𓊪𓏏𓊖, "kingdom" (Gesen. *Thes.* s. v. מְצוֹר), is not an ancient form, and the old name, TO-MAR (Brugsch, *Geog. Inschr.* Pl. x. nos. 367-370, p. 74), suggested as the source of Mizraim by Dr. Hincks, is too different to be accepted as a derivation.

MIZRAIM first occurs in the account of the Hamites in Gen. x., where we read, "And the sons of Ham; Cush, and Mizraim, and Phut, and Canaan" (ver. 6; comp. 1 Chr. i. 8). Here we have conjectured that instead of the dual, the original text had the gentile noun in the plural (suggesting מִצְרִים instead of the present מִצְרַיִם), since it seems strange that a dual form should occur in the first generation after Ham, and since the plural of the gentile noun would be consistent with the plural forms of the names of the Mizraite nations or tribes afterwards enumerated, as well as with the like singular forms of the names of the Canaanites, excepting Sidon. [HAM.]

If the names be in an order of seniority, whether as indicating children of Ham, or older and younger branches, we can form no theory as to their settlements from their places; but if the arrangement be geographical, which is probable from the occurrence of the form Mizraim, which in no case can be a man's name, and the order of some of the Mizraites, the placing may afford a clue to the positions of the Hamite lands. Cush would stand first as the most widely spread of these peoples, extending from Babylon to the upper Nile, the territory of Mizraim would be the next to the north, embracing Egypt and its colonies on the north-west and north-east, Phut as dependent on Egypt might follow Mizraim, and Canaan as the northernmost would end the list. Egypt, the "land of Ham," may have been the primitive seat of these four stocks. In the enumeration of the Mizraites, though we have tribes extending far beyond Egypt, we may suppose that they all had their first seat in Mizraim, and spread thence, as is distinctly said of the Philistines. Here the order seems to be geographical, though the same is not so clear of the Canaanites. The list of the Mizraites is thus given in Gen. x.:—"And Mizraim begat Ludim, and Anamim, and Lehabim, and Naphtuhim, and Pathrusim, and Casluhim (whence came forth the Philistines), and Caphtorim" (13, 14; comp. 1 Chr. i. 11, 12). Here it is certain that we have the names of nations or tribes, and it is probable that they are all derived from names of countries. We find elsewhere Pathros and Caphtor, probably Lud (for the Mizraite Ludim), and perhaps, Lub for the Lubim, which are almost certainly the same as the Lehabim. There is a difficulty in the Philistines being, according to the present text, traced to the Casluhim, whereas in other places they come from the land of Caphtor, and are even called Caphtorim. It seems probable that there has been a misplacement, and that the parenthetic clause originally followed the name of the Caphtorim. Of these names we have not yet identified the Anamim and the Casluhim; the Lehabim are, as already said, almost certainly the same as the Lubim, the REBU of the Egyptian monuments, and the primitive Libyans; the Naphtuhim we put immediately to the west of northern Egypt; and the Pathrusim and Caphtorim in that country, where the Casluhim may also be placed. There would therefore be a distinct order from west to east, and if the Philistines be transferred, this order would be perfectly preserved, though perhaps these last would necessarily be placed with their immediate parent among the tribes.

Mizraim therefore, like Cush, and perhaps Ham, geographically represents a centre whence colonies went forth in the remotest period of post-diluvian history. The Philistines were originally settled in the land of Mizraim, and there is reason to suppose the same of the Lehabim, if they be those Libyans who revolted, according to Manetho, from the Egyptians in a very early age. [LUBIM.] The list, however

probably arranges them according to the settlements they held at a later time, if we may judge from the notice of the Philistines' migration; but the mention of the spread of the Canaanites must be considered on the other side. We regard the distribution of the Mizraites as showing that their colonies were but a part of the great migration that gave the Cushites the command of the Indian Ocean, and which explains the affinity the Egyptian monuments show us between the pre-Hellenic Cretans and Carians (the latter no doubt the Leleges of the Greek writers) and the Philistines.

The history and ethnology of the Mizraite nations have been given under the article HAM, so that here it is not needful to do more than draw attention to some remarkable particulars which did not fall under our notice in treating of the early Egyptians. We find from the monuments of Egypt that the white nations of western Africa were of what we call the Semitic type, and we must therefore be careful not to assume that they formed part of the stream of Arab colonization that has for full two thousand years steadily flowed into northern Africa. The seafaring race that first passed from Egypt to the west, though physically like, was mentally different from, the true pastoral Arab, and to this day the two elements have kept apart, the townspeople of the coast being unable to settle amongst the tribes of the interior, and these tribes again being as unable to settle on the coast.

The affinity of the Egyptians and their neighbours was long a safeguard of the empire of the Pharaohs, and from the latter, whether Cretans, Lubim, or people of Phut and Cush, the chief mercenaries of the Egyptian armies were drawn; facts which we mainly learn from the Bible, confirmed by the monuments. In the days of the Persian dominion Libyan Inaros made a brave stand for the liberty of Egypt. Probably the tie was more one of religion than of common descent, for the Egyptian belief appears to have mainly prevailed in Africa as far as it was civilised, though of course changed in its details. The Philistines had a different religion, and seem to have been identified in this matter with the Canaanites, and thus they may have lost, as they seem to have done, their attachment to their mother country.

In the use of the names Mazor and Mizraim for Egypt there can be no doubt that the dual indicates the two regions into which the country has always been divided by nature as well as by its inhabitants. Under the Greeks and Romans there was indeed a third division, the Heptanomis, which has been called Middle Egypt, as between Upper and Lower Egypt, but we must rather regard it as forming, with the Thebais, Upper Egypt. It has been supposed that Mazor, as distinct from Mizraim, signifies Lower Egypt; but this conjecture cannot be maintained. For fuller details on the subject of this article the reader is referred to HAM, EGYPT, and the articles on the several Mizraite nations or tribes. [R. S. P.]

MIZ'ZAH (מִזָּה: Μοζέ; Alex. Μοχέ in 1 Chr.: *Meza*). Son of Reuel and grandson of Esau; descended likewise through Bashemath from Ishmael. He was one of the "dukes" or chiefs of tribes in the land of Edom (Gen. xxxvi. 13, 17; 1 Chr. i. 37). The settlements of his descendants are believed by Mr. Forster (*Hist. Geog. of Arab.* ii. 55) to be indicated in the *μεσανίτης κόλπος*, or *Persi-Misan*, at the head of the Persian gulf.

MNA'SON (Μνάσων) is honourably mentioned in Scripture, like Gaius, Lydia, and others, as one of the hosts of the Apostle Paul (Acts xxi. 16). One or two questions of some little interest, though of no great importance, are raised by the context. It is most likely, in the first place, that his residence at this time was not Caesarea, but Jerusalem. He was well known to the Christians of Caesarea, and they took St. Paul to his house at Jerusalem. To translate the words *ἄγοντες παρ' ᾧ ξενισθῶμεν*, as in the A. V., removes no grammatical difficulty, and introduces a slight improbability into the narrative. He was, however, a Cyprian by birth, and may have been a friend of Barnabas (Acts iv. 36), and possibly brought to the knowledge of Christianity by him. The Cyprians who are so prominently mentioned in Acts xi. 19, 20, may have included Mnason. It is hardly likely that he could have been converted during the journey of Paul and Barnabas through Cyprus (Acts xiii. 4–13), otherwise the Apostle would have been personally acquainted with him, which does not appear to have been the case. And the phrase *ἀρχαίος μαθητής* points to an earlier period, possibly to the day of Pentecost (compare *ἐν ἀρχῇ*, Acts xi. 15), or to direct intercourse with our blessed Lord Himself. [CYPRUS.] [J. S. H.]

MO'AB (מוֹאָב: Μωάβ; Josephus, Μώαβος: *Moab*), the name of the son of Lot's eldest daughter, the elder brother of Ben-Ammi, the progenitor of the Ammonites (Gen. xix. 37); also of the nation descended from him, though the name "Moabites" is in both the original and A. V. more frequently used for them.

No explanation of the name is given us in the original record, and it is not possible to throw an interpretation into it unless by some accommodation. Various explanations have however been proposed. (*a.*) The LXX. insert the words λέγουσα· ἐκ τοῦ πατρός μου, "saying 'from my father,'" as if מֵאָב. This is followed by the old interpreters; as Josephus (*Ant.* i. 11, §5), Jerome's *Quaest. Hebr. in Genesim*, the gloss of the Pseudojon. Targum; and in modern times by De Wette (*Bibel*), Tuch (*Gen.* 370), and J. D. Michaelis (*B. für Ungelehrten*). (*b.*) By Hiller (*Onom.* 414), Simonis (*Onom.* 479), it is derived from מוֹבָא אָב, "ingressus, *i. e.* coitus, patris." (*c.*) Rosenmüller (see Schumann, *Genesis*, 302) proposes to treat מִן as equivalent for מַיִם, in accordance with the figure employed by Balaam in Num. xxiv. 7. This is countenanced by Jerome—"aqua paterna" (*Comm. in Mic.* vi. 8)—and has the great authority of Gesenius in its favour (*Thes.* 775 *a*); also of Fürst (*Handwb.* 707) and Bunsen (*Bibelwerk*). (*d.*) A derivation, probably more correct etymologically than either of the above, is that suggested by Maurer from the root יָאַב, "to desire"—"the desirable land"—with reference to the extreme fertility of the region occupied by Moab. (See also Fürst, *Hwb.* 707 *b.*) No hint, however, has yet been discovered in the Bible records of such an origin of the name.

Zoar was the cradle of the race of Lot. The situation of this town appears to have been in the district east of the Jordan, and to the north or north-east of the Dead Sea. [ZOAR, p. 1857 *a.*] From this centre the brother-tribes spread themselves. AMMON, whose disposition seems throughout to have been more roving and unsettled, went to the north-east and took possession of the pastures and waste tracts

which lay outside the district of the mountains; that which in earlier times seems to have been known as Ham, and inhabited by the Zuzim or Zamzummim (Gen. xiv. 5; Deut. ii. 20). MOAB, whose habits were more settled and peaceful, remained nearer their original seat. The rich highlands which crown the eastern side of the chasm of the Dead Sea, and extend northwards as far as the foot of the mountains of Gilead, appear at that early date to have borne a name, which in its Hebrew form is presented to us as Shaveh-Kiriathaim, and to have been inhabited by a branch of the great race of the Rephaim. Like the Horim before the descendants of Esau, the Avim before the Philistines, or the indigenous races of the New World before the settlers from the West, this ancient people, the Emim, gradually became extinct before the Moabites, who thus obtained possession of the whole of the rich elevated tract referred to—a district forty or fifty miles in length by ten or twelve in width, the celebrated *Belka* and *Kerrak* of the modern Arabs, the most fertile on that side of Jordan, no less eminently fitted for pastoral pursuits than the maritime plains of Philistia and Sharon, on the west of Palestine, are for agriculture. With the highlands they occupied also the lowlands at their feet, the plain which intervenes between the slopes of the mountains and the one perennial stream of Palestine, and through which they were enabled to gain access at pleasure to the fords of the river, and thus to the country beyond it. Of the valuable district of the highlands they were not allowed to retain entire possession. The warlike Amorites—either forced from their original seats on the west, or perhaps lured over by the increasing prosperity of the young nation—crossed the Jordan and overran the richer portion of the territory on the north, driving Moab back to his original position behind the natural bulwark of the Arnon. The plain of the Jordan-valley, the hot and humid atmosphere of which had perhaps no attraction for the Amorite mountaineers, appears to have remained in the power of Moab. When Israel reached the boundary of the country, this contest had only very recently occurred. Sihon, the Amorite king under whose command Heshbon had been taken, was still reigning there—the ballads commemorating the event were still fresh in the popular mouth (Num. xxi. 27—30).[a]

Of these events, which extended over a period, according to the received Bible chronology, of not less than 500 years, from the destruction of Sodom to the arrival of Israel on the borders of the Promised Land, we obtain the above outline only from the fragments of ancient documents, which are found embedded in the records of Numbers and Deuteronomy (Num. xxi. 26-30; Deut. ii. 10, 11).

The position into which the Moabites were driven by the incursion of the Amorites was a very circumscribed one, in extent not so much as half that which they had lost. But on the other hand its position was much more secure, and it was well suited for the occupation of a people whose disposition was not so warlike as that of their neighbours. It occupied the southern half of the high table-lands which rise above the eastern side of the Dead Sea. On every side it was strongly fortified by nature. On the north was the tremendous chasm of the Arnon. On the west it was limited by the precipices, or more accurately cliffs, which descend almost perpendicularly to the shore of the lake, and are intersected only by one or two steep and narrow passes. Lastly on the south and east, it was protected by a half circle of hills which open only to allow the passage of a branch of the Arnon and another of the torrents which descend to the Dead Sea.

It will be seen from the foregoing description that the territory occupied by Moab at the period of its greatest extent, before the invasion of the Amorites, divided itself naturally into three distinct and independent portions. Each of these portions appears to have had its name by which it is almost invariably designated. (1) The enclosed corner[b] or canton south of the Arnon was the "field of Moab" (Ruth i. 1, 2, 6, &c.). (2) The more open rolling country north of the Arnon, opposite Jericho, and up to the hills of Gilead, was the "land of Moab" (Deut. i. 5, xxxii. 49, &c.). (3) The sunk district in the tropical depths of the Jordan valley, taking its name from that of the great valley itself—the Arabah—was the Arboth-Moab, the dry regions—in the A. V. very incorrectly rendered the "plains of Moab" (Num. xxii. 1, &c.).

Outside of the hills, which enclosed the "field of Moab," or Moab proper, on the south-east, and which are at present called the *Jebel Usdum-Karaiyeh* and *Jebel el Tarfuyeh*, lay the vast pasture grounds of the waste uncultivated country or "Midbar," which is described as "facing Moab" on the east (Num. xxi. 11). Through this latter district Israel appears to have approached the Promised Land. Some communication had evidently taken place, though of what nature it is impossible clearly to ascertain. For while in Deut. ii. 28, 29, the attitude of the Moabites is mentioned as friendly, this seems to be contradicted by the statement of xxiii. 4, while in Judg. xi. 17, again, Israel is said to have sent from Kadesh asking permission to pass through Moab, a permission which, like Edom, Moab refused. At any rate the attitude perpetuated by the provision of Deut. xxiii. 3—a provision maintained in full force by the latest of the Old Testament reformers (Neh. xiii. 1, 2, 23)—is one of hostility.

But whatever the communication may have been, the result was that Israel did not traverse Moab, but turning to the right passed outside the mountains through the "wilderness," by the east side of the territory above described (Deut. ii. 8; Judg. xi. 18), and finally took up their position in the country north of the Arnon, from which Moab had so lately been ejected. Here the head-quarters of the nation remained for a considerable time while the conquest of Bashan was being effected. It was during this period that the visit of Balaam took place. The whole of the country east of the Jordan, with the exception of the one little corner occupied by Moab, was in possession of the invaders, and although at the period in question the main body had descended from the upper level to the plains of Shittim, the Arboth-Moab, in the Jordan valley, yet a great number must have remained on the upper level, and the towns up to the very edge of the ravine of the Arnon were still occupied by their settlements (Num. xxi. 24; Judg. xi. 26). It was a situation

[a] For an examination of this remarkable passage, in some respects without a parallel in the Old Testament, see NUMBERS.

[b] The word פְּאַתי (A.V. "corners") is twice used with respect to Moab (Num. xxiv. 17; Jer. xlviii. 45). No one appears yet to have discovered its force in this relation. It can hardly have any connexion with the shape of the territory as noticed in the text.

ful of alarm for a nation which had already suffered so severely. In his extremity the Moabite king, Balak —whose father Zippor was doubtless the chieftain who had lost his life in the encounter with Sihon (Num. xxi. 26)—appealed to the Midianites for aid (Num. xxii. 2-4). With a metaphor highly appropriate both to his mouth and to the ear of the pastoral tribe he was addressing,[a] he exclaims that "this people will lick up all round about us as the ox licketh up the grass of the field." What relation existed between Moab and Midian we do not know, but there are various indications that it was a closer one than would arise merely from their common descent from Terah. The tradition of the Jews[d] is, that up to this time the two had been one nation, with kings taken alternately from each, and that Balak was a Midianite. This, however, is in contradiction to the statements of Genesis as to the origin of each people. The whole story of Balaam's visit and of the subsequent events, both in the original narrative of Numbers and in the remarkable statement of Jephthah—whose words as addressed to Ammonites must be accepted as literally accurate—bears out the inference already drawn from the earlier history as to the pacific character of Moab.

The account of the whole of these transactions in the Book of Numbers, familiar as we are with its phrases, perhaps hardly conveys an adequate idea of the extremity in which Balak found himself in his unexpected encounter with the new nation and their mighty Divinity. We may realise it better (and certainly with gratitude for the opportunity), if we consider what that last dreadful agony was in which a successor of Balak was placed, when, all hope of escape for himself and his people being cut off, the unhappy Mesha immolated his own son on the wall of Kir-haraseth,—and then remember that Balak in his distress actually proposed the same awful sacrifice—"his first-born for his transgression, the fruit of his body for the sin of his soul" (Mic. vi. 7), a sacrifice from which he was restrained only by the wise, the almost Christian[e] counsels, of Balaam. This catastrophe will be noticed in its proper place.

The connexion of Moab with Midian, and the comparatively inoffensive character of the former, are shown in the narrative of the events which followed the departure of Balaam. The women of Moab are indeed said (Num. xxv. 1) to have commenced the idolatrous fornication which proved so destructive to Israel, but it is plain that their share in it was insignificant compared with that of Midian. It was a Midianitish woman whose shameless act brought down the plague on the camp, the Midianitish women were especially devoted to destruction by Moses (xxv. 16-18, xxxi. 16), and it was upon Midian that the vengeance was taken. Except in the passage already mentioned, Moab is not once named in the whole transaction.

The latest date at which the two names appear in conjunction, is found in the notice of the defeat of Midian "in the field of Moab" by the Edomite king Hadad-ben-Bedad, which occurred five generations before the establishment of the monarchy of Israel (Gen. xxxvi. 35; 1 Chr. i. 46). By the Jewish interpreters—*e. g.* Solomon Jarchi in his commentary on the passage—this is treated as implying not alliance, but war between Moab and Midian (comp. 1 Chr. iv. 22).

It is remarkable that Moses should have taken his view of the Promised Land from a Moabite sanctuary, and been buried in the land of Moab. It is singular too that his resting-place is marked in the Hebrew Records only by its proximity to the sanctuary of that deity to whom in his lifetime he had been such an enemy. He lies in a ravine in the land of Moab, facing Beth-Peor, *i.e.* the abode of Baal-Peor (Deut. xxxiv. 6).

After the conquest of Canaan the relations of Moab with Israel were of a mixed character. With the tribe of Benjamin, whose possessions at their eastern end were separated from those of Moab only by the Jordan, they had at least one severe struggle, in union with their kindred the Ammonites, and also, for this time only, the wild Amalekites from the south (Judg. iii. 12-30). The Moabite king, Eglon, actually ruled and received tribute in Jericho for eighteen years, but at the end of that time he was killed by the Benjamite hero Ehud, and the return of the Moabites being intercepted at the fords, a large number were slaughtered, and a stop put to such incursions on their part for the future.[f] A trace of this invasion is visible in the name of Chephar-ha-Ammonai, the "hamlet of the Ammonites," one of the Benjamite towns; and another is possibly preserved even to the present day in the name of *Mukhmas*, the modern representative of Michmash, which is by some scholars believed to have received its name from Chemosh the Moabite deity.

The feud continued with true Oriental pertinacity to the time of Saul. Of his slaughter of the Ammonites we have full details in 1 Sam. xi., and amongst his other conquests Moab is especially mentioned (1 Sam. xiv. 47). There is not, however, as we should expect, any record of it during Ishbosheth's residence at Mahanaim on the east of Jordan.

But while such were their relations to the tribe of Benjamin, the story of Ruth, on the other hand, testifies to the existence of a friendly intercourse between Moab and Bethlehem, one of the towns of Judah. The Jewish[g] tradition ascribes the death of Mahlon and Chilion to punishment for having broken the commandment of Deut. xxiii. 3, but no trace of any feeling of the kind is visible in the Book of Ruth itself—which not only seems to imply a considerable intercourse between the two nations, but also a complete ignorance or disregard of the precept in question, which was broken in the most flagrant manner when Ruth became the wife of Boaz. By his descent from Ruth, David may be said to have had Moabite blood in his veins. The relationship was sufficient, especially when combined with the blood-feud between Moab and Benjamin, already alluded to, to warrant his visiting the land of his ancestress, and committing his parents to the protection of the king of Moab, when hard pressed by Saul (1 Sam. xxii. 3, 4). But here all friendly relation stops for ever. The next time the name is

[a] Midian was eminently a pastoral people. See the accounts of the spoil taken from them (Num. xxxi. 32-47). For the pastoral wealth of Moab, even at this early period, see the expressions in Mic. vi. 6, 7.

[d] See Targum Pseudo-Jonathan on Num. xxii. 4.

[e] Balaam's words (Mic. vi. 8) are nearly identical with those quoted by our Lord Himself (Matt. ix. 13 and xii. 7).

[f] The account of Shaharaim, a man of Benjamin, who "begat children in the field of Moab," in 1 Chr. viii. 8, seems, from the mention of Ehud (ver. 6), to belong to this time; but the whole passage is very obscure.

[g] See Targum Jonathan on Ruth i. 4. The marriage of Boaz with the stranger is vindicated by making Ruth a proselyte in desire, if not by actual initiation.

mentioned is in the account of David's war, at least twenty years after the last mentioned event (2 Sam. viii. 2· 1 Chr. xviii. 2).

The abrupt manner in which this war is introduced into the history is no less remarkable than the brief and passing terms in which its horrors are recorded. The account occupies but a few words in either Samuel or Chronicles, and yet it must have been for the time little short of a virtual extirpation of the nation. Two-thirds of the people were put to death, and the remainder became bondmen, and were subjected to a regular tribute. An incident of this war is probably recorded in 2 Sam. xxiii. 20, and 1 Chr. xi. 22. The spoils taken from the Moabite cities and sanctuaries went to swell the treasures acquired from the enemies of Jehovah, which David was amassing for the future Temple (2 Sam. viii. 11, 12; 1 Chr. xviii. 11). It was the first time that the prophecy of Balaam had been fulfilled,—"Out of Jacob shall come he that shall have dominion, and shall destroy him that remaineth of Ar," that is of Moab.

So signal a vengeance can only have been occasioned by some act of perfidy or insult, like that which brought down a similar treatment on the Ammonites (2 Sam. x.). But as to any such act the narrative is absolutely silent. It has been conjectured that the king of Moab betrayed the trust which David reposed in him, and either himself killed Jesse and his wife, or surrendered them to Saul. But this, though not improbable, is nothing more than conjecture.

It must have been a considerable time before Moab recovered from so severe a blow. Of this we have evidence in the fact of their not being mentioned in the account of the campaign in which the Ammonites were subdued, when it is not probable they would have refrained from assisting their relatives had they been in a condition to do so. Throughout the reign of Solomon, they no doubt shared in the universal peace which surrounded Israel; and the only mention of the name occurs in the statement that there were Moabites amongst the foreign women in the royal harem, and, as a natural consequence, that the Moabite worship was tolerated, or perhaps encouraged (1 K. xi. 1, 7, 33). The high place for Chemosh, "the abomination of Moab," was consecrated "on the mount facing Jerusalem," where it remained till its "defilement" by Josiah (2 K. xxiii. 13), nearly four centuries afterwards.

At the disruption of the kingdom, Moab seems to have fallen to the northern realm, probably for the same reason that has been already remarked in the case of Eglon and Ehud—that the fords of Jordan lay within the territory of Benjamin, who for some time after the separation clung to its ancient ally the house of Ephraim. But be this as it may, at the death of Ahab, eighty years later, we find Moab paying him the enormous tribute, apparently annual, of 100,000 rams, and the same number of wethers with their fleeces; an amount which testifies at once to the severity of the terms imposed by Israel, and to the remarkable vigour of character, and wealth of natural resources, which could enable a little country, not so large as the county of Huntingdon, to raise year by year the enormous impost, and at the same time support its own people in prosperity and affluence.[h] It is not surprising that the Moabites should have seized the moment of Ahab's death to throw off a burdensome a yoke; but it is surprising, that notwithstanding such a drain on their resources, they were ready to incur the risk and expense of a war with a state in every respect far their superior. Their first step, after asserting their independence, was to attack the kingdom of Judah in company with their kindred the Ammonites, and, as seems probable, the Mehunim, a roving semi-Edomite people from the mountains in the south-east of Palestine (2 Chr. xx.). The army was a huge heterogeneous horde of ill-assorted elements. The route chosen for the invasion was round the southern end of the Dead Sea, thence along the beach, and by the pass of En-gedi to the level of the upper country. But the expedition contained within itself the elements of its own destruction. Before they reached the enemy dissensions arose between the heathen strangers and the children of Lot; distrust followed, and finally panic; and when the army of Jehoshaphat came in sight of them they found that they had nothing to do but to watch the extermination of one half the huge host by the other half, and to seize the prodigious booty which was left on the field.

Disastrous as was this proceeding, that which followed it was even still more so. As a natural consequence of the late events, Israel, Judah, and Edom united in an attack on Moab. For reasons which are not stated, but one of which we may reasonably conjecture was to avoid the passage of the savage Edomites through Judah, the three confederate armies approached not as usual by the north, but round the southern end of the Dead Sea, through the parched valleys of upper Edom. As the host came near, the king of Moab, doubtless the same Mesha who threw off the yoke of Ahab, assembled the whole of his people, from the youngest who were of age to bear the sword-girdle,[i] on the boundary of his territory, probably on the outer slopes of the line of hills which encircles the lower portion of Moab, overlooking the waste which extended below them towards the east.[k] Here they remained all night on the watch. With the approach of morning the sun rose suddenly above the horizon of the rolling plain, and as his level beams burst through the night-mists they revealed no masses of the enemy, but shone with a blood-red glare on a multitude of pools in the bed of the wady at their feet. They did not know that these pools had been sunk during the night by the order of a mighty Prophet who was with the host of Israel, and that they had been filled by the sudden flow of water rushing from the distant highlands of Edom. To them the conclusion was inevitable. The army had, like their own on the late occasion, fallen out in the night; these red pools were the blood of the slain; those who were not killed had fled, and nothing stood between them and the pillage of the camp.

[h] This affluence is shown by the treasures which they left on the field of Berachah (2 Chr. xx. 25), no less than by the general condition of the country, indicated in the narrative of Joram's invasion; and in the passages of Isaiah and Jeremiah which are cited further on in this article.

2 K. iii. 21. This passage exhibits one of the most singular variations of the LXX. The Hebrew text is literally, "and all gathered themselves together that were girt with a girdle and upward." This the LXX. originally rendered ἀνεβόησαν ἐκ παντὸς περιζωσαμένου ζώνην καὶ ἀνώτερον· which the Alexandrine Codex still retains; but in the Vatican MS. the last words have actually been corrupted into καὶ εἶπον, ὦ!—"and they said, Oh!"

[i] Compare Num. xxi. 11—"towards the sun-rising."

The cry "Moab to the spoil!" was raised. Down the slopes they rushed in headlong disorder. But not, as they expected, to empty tents; they found an enemy ready prepared to reap the result of his ingenious stratagem.[m] Then occurred one of those scenes of carnage which can happen but once or twice in the existence of a nation. The Moabites fled back in confusion, followed and cut down at every step by their enemies. Far inwards did the pursuit reach, among the cities and farms and orchards of that rich district: nor when the slaughter was over was the horrid work of destruction done. The towns both fortified and unfortified were demolished, and the stones strewed over the carefully tilled fields. The fountains of water, the life[n] of an eastern land, were choked, and all timber of any size or goodness felled. Nowhere else do we hear of such sweeping desolation; the very besom of destruction passed over the land. At last the struggle collected itself at KIR-HARASETH, apparently a newly constructed fortress, which, if the modern *Kerak*—and there is every probability that they are identical—may well have resisted all the efforts of the allied kings in its native impregnability. Here Mesha took refuge with his family and with the remnants of his army. The heights around, by which the town is entirely commanded, were covered with slingers, who armed partly with the ancient weapon of David and of the Benjamites, partly perhaps with the newly-invented machines shortly to be famous in Jerusalem (2 Chr. xxvi. 15), discharged their volleys of stones on the town. At length the annoyance could be borne no longer. Then Mesha, collecting round him a forlorn hope of 700 of his best warriors, made a desperate sally, with the intention of cutting his way through to his special foe the king of Edom. But the enemy were too strong for him, and he was driven back. And then came a fitting crown to a tragedy already so terrible. An awful spectacle amazed and horrified the besiegers. The king and his eldest son, the heir to the throne, mounted the wall, and, in the sight of the thousands who covered the sides of that vast amphitheatre, the father killed and burnt his child as a propitiatory sacrifice to the cruel gods of his country. It was the same dreadful act to which, as we have seen, Balak had been so nearly tempted in his extremity.[o] But the danger, though perhaps not really greater than his, was more imminent; and Mesha had no one like Balaam at hand, to counsel patience and submission to a mightier Power than Chemosh or Baal-Peor.

Hitherto, though able and ready to fight when necessary, the Moabites do not appear to have been a fighting people; perhaps, as suggested elsewhere, the Ammonites were the warriors of the nation of Lot. But this disaster seems to have altered their disposition at any rate for a time. Shortly after these events we hear of "bands"—that is pillaging marauding parties[p]—of the Moabites making their incursions into Israel in the spring, as if to spoil the early corn before it was fit to cut (2 K. xiii. 20). With Edom there must have been many a contest. One of these marked by savage vengeance—recalling in some degree the tragedy of Kir-haraseth, is alluded to by Amos (ii. 1), where a king of Edom seems to have been killed and burnt by Moab. This may have been one of the incidents of the battle of Kir-haraseth itself, occurring perhaps after the Edomites had parted from Israel, and were overtaken on their road home by the furious king of Moab (Gesenius, *Jesaia*, i. 504); or according to the Jewish tradition (Jerome, on Amos ii. 1), it was a vengeance still more savage because more protracted, and lasting even beyond the death of the king, whose remains were torn from his tomb and thus consumed:—Non dico crudelitatem sed rabiem; ut incenderent ossa regis Idumaese, et non paterentur mortem esse omnium extremum malorum (Ib. ver. 4).

In the "Burden of Moab" pronounced by Isaiah (chaps. xv. xvi.), we possess a document full of interesting details as to the condition of the nation, at the time of the death of Ahaz king of Judah, B.C. 726. More than a century and a half had elapsed since the great calamity to which we have just referred. In that interval, Moab has regained all, and more than all of his former prosperity, and has besides extended himself over the district which he originally occupied in the youth of the nation, and which was left vacant when the removal of Reuben to Assyria, which had been begun by Pul in 770, was completed by Tiglath-pileser about the year 740 (1 Chr. v. 25, 26).

This passage of Isaiah cannot be considered apart from that of Jeremiah, chap. xlviii. The latter was pronounced more than a century later, about the year 600, ten or twelve years before the invasion of Nebuchadnezzar, by which Jerusalem was destroyed. In many respects it is identical with that of Isaiah, and both are believed by the best

[m] The lesson was not lost on king Joram, who proved himself more cautious on a similar occasion (2 K. vii. 12, 13).

[n] Prius erat luxuria propter irriguos agros (Jerome, on Is. xv. 9).

[o] Jerome alone of all the commentators seems to have noticed this. See his *Comm. in Mich.* vi.

[p] גְּדוּדִים. The word "bands," by which this is commonly rendered with A.V. has not now the force of the original term. גְּדוּד is derived from גָּדַד, to rush together and fiercely, and signifies a troop of irregular marauders, as opposed to the regular soldiers of an army. It is employed to denote (1.) the bands of the Amalekites and other Bedouin tribes round Palestine: as 1 Sam. xxx. 8, 15, 23 (A.V. "troop" and "company"): 2 K. vi. 23; xiii. 20, 21; xxiv. 2; 1 Chr. xii. 21; 2 Chr. xxii. 1 (A.V. "band"). It is in this connexion that it occurs in the elaborate play on the name of Gad, contained in Gen. xlix. 19 [see vol. i. 647 *a*], a passage strikingly corroborated by 1 Chr. xii. 18, where the Gadites who resorted to David in his difficulties—swift as roes on the mountains, with faces like the faces of lions—were formed by him into a "band." In 1 K. xi. 24 it denotes the roving troop collected by Rezon from the remnants of the army of Zobah, who took the city of Damascus by surprise, and by their forays molested—literally "played the Satan to"—Solomon (ver. 25). How formidable these bands were, may be gathered from 2 Sam. xxii. 30, where in a moment of most solemn exultation David speaks of breaking through one of them as among the most memorable exploits of his life.

(2.) The word is used in the general sense of hired soldiers—mercenaries; as of the host of 100,000 Ephraimites hired by Amaziah in 2 Chr. xxv. 9, 10, 13; where the point is missed in the A.V. by the use of the word "army." No Bedouins could have shown a keener appetite for plunder than did these Israelites (ver. 13). In this sense it is probably used in 2 Chr. xxvi. 11, for the irregular troops kept by Uzziah for purposes of plunder, and who are distinguished from his "army" (ver. 13) maintained for regular engagements.

(3.) In 2 Sam. iii. 22 ("troop") and 2 K. v. 2 ("by companies") it refers to marauding raids for the purpose of plunder.

modern scholars, on account of the archaisms and other peculiarities of language which they contain, to be adopted from a common source—the work of some much more ancient prophet.[q]

Isaiah ends his denunciation by a prediction—in his own words—that within three years Moab should be greatly reduced. This was probably with a view to Shalmaneser who destroyed Samaria, and no doubt overran the other side of the Jordan[r] in 725, and again in 723 (2 K. xvii. 3, xviii. 9). The only event of which we have a record to which it would seem possible that the passage, as originally uttered by the older prophet, applied, is the invasion of Pul, who about the year 770 appears to have commenced the deportation of Reuben (1 Chr. v. 26), and who very probably at the same time molested Moab.[s] The difficulty of so many of the towns of Reuben being mentioned, as at that early date already in the possession of Moab, may perhaps be explained by remembering that the idolatry of the neighbouring nations—and therefore of Moab, had been adopted by the trans-Jordanic tribes for some time previously to the final deportation by Tiglath-pileser (see 1 Chr. v. 25), and that many of the sanctuaries were probably even at the date of the original delivery of the denunciation in the hands of the priests of Chemosh and Milcom. If, as Ewald (*Gesch.* iii. 588) with much probability infers, the Moabites, no less than the Ammonites, were under the protection of the powerful Uzziah[t] (2 Chr. xxvi. 8), then the obscure expressions of the ancient seer as given in Is. xvi. 1-5, referring to a tribute of lambs (comp. 2 K. iii. 4) sent from the wild pasture-grounds south of Moab to Zion, and to protection and relief from oppression afforded by the throne[u] of David to the fugitives and outcasts of Moab—acquire an intelligible sense.

On the other hand, the calamities which Jeremiah describes, may have been inflicted in any one of the numerous visitations from the Assyrian army, under which these unhappy countries suffered at the period of his prophecy in rapid succession.

But the uncertainty of the exact dates referred to in these several denunciations, does not in the least affect the interest or the value of the allusions they contain to the condition of Moab. They bear the evident stamp of portraiture by artists who knew their subject thoroughly. The nation appears in them as high-spirited,[x] wealthy, populous, and even to a certain extent, civilised, enjoying a wide reputation and popularity. With a metaphor which well expresses at once the pastoral wealth of the country and its commanding, almost regal, position, but which cannot be conveyed in a translation, Moab is depicted as the strong sceptre,[y] the beautiful staff,[z] whose fracture will be bewailed by all about him, and by all who know him. In his cities we discern a "great multitude" of people living in "glory," and in the enjoyment of great "treasure," crowding the public squares, the housetops, and the ascents and descents of the numerous high places and sanctuaries where the "priests and princes" of Chemosh or Baal-Peor, minister to the anxious devotees. Outside the towns lie the "plentiful fields," luxuriant as the renowned Carmel[a]—the vineyards, and gardens of "summer fruits";—the harvest is being reaped, and the "hay stored in its abundance," the vineyards and the presses are crowded with peasants gathering and treading the grapes, the land resounds with the clamour[b] of the vintagers. These characteristics contrast very favourably with any traits recorded of Ammon, Edom, Midian, Amalek, the Philistines, or the Canaanite tribes. And since the descriptions we are considering are adopted by certainly two, and probably three prophets—Jeremiah, Isaiah, and the older seer—extending over a period of nearly 200 years, we may safely conclude that they are not merely temporary circumstances, but were the enduring characteristics of the people. In this case there can be no doubt that amongst the pastoral people of Syria, Moab stood next to Israel in all matters of material wealth and civilisation.

It is very interesting to remark the feeling which actuates the prophets in these denunciations of a people who, though the enemies of Jehovah, were the blood-relations of Israel. Half the allusions of Isaiah and Jeremiah in the passages referred to, must for ever remain obscure. We shall never know who the "lords of the heathen" were who, in that terrible[c] night, laid waste and brought to silence the prosperous Ar-moab and Kir-moab. Or the occasion of that flight over the Arnon, when the Moabite women were huddled together at the ford, like a flock of young birds, pressing to cross to the safe side of the stream,—when the dwellers in Aroer stood by the side of the high road which passed their town, and eagerly questioning the fugitives as they hurried up, "What is done?"—received but one answer from all alike—"All is lost! Moab is confounded and broken down!"

Many expressions, also, such as the "weeping of Jazer," the "heifer of three years old," the "shadow of Heshbon," the "lions," must remain obscure. But nothing can obscure or render obso-

[q] See Ewald (*Prophets*, 229-31). He seems to believe that Jeremiah has preserved the old prophecy more nearly in its original condition than Isaiah.

[r] Amos, B.C. cir. 780, prophesied that a nation should afflict Israel from the entering in of Hamath unto the "torrent of the desert" (probably one of the wadys on the S.E. extremity of the Dead Sea); that is, the whole of the country East of Jordan.

[s] Knobel refers the original of Is. xv. xvi to the time of Jeroboam II., a great conqueror beyond Jordan.

[t] He died 758, *i. e.* 12 years after the invasion of Pul.

[u] The word used in this passage for the palace of David in Zion, viz. "tent" (A. V. "tabernacle"), is remarkable as an instance of the persistence with which the memory of the original military foundation of Jerusalem by the warrior-king was preserved by the Prophets. Thus, in Ps. lxxvi. 2 and Lam. ii. 6 it is the "booth or bivouacking-hut of Jehovah;" and in Is. xxix. 1 the city where David "pitched," or "encamped" (not "dwelt," as in A.V.).

[x] Is. xvi. 6; Jer. xlviii. 29. The word גאון (גְּאוֹן) like our own word "pride," is susceptible of a good as well as a bad sense. It is the term used for the "majesty" and "excellency" of Jehovah (Is. ii. 10, &c., Ex. xv. 7), and is frequently in the A. V. rendered by "pomp."

[y] מַטֶּה; the "rod" of Moses, and of Aaron, and of the heads of the tribes (Num. xvii. 2, &c.). The term also means a "tribe." No English word expresses all these meanings.

[z] מִקְלָ; the word used for the "rods" of Jacob's stratagem; also for the "staves" in the pastoral parable of Zechariah (xi. 7-14).

[a] *Carmel* is the word rendered "plentiful field" in Is. xvi. 10 and Jer. xlviii. 33.

[b] What the din of a vintage in Palestine who may be inferred from Jer. xxv. 30: "Jehovah shall roar from on high. . . . He shall mightily roar. . . . He shall give a shout as those that tread the grapes."

[c] *La nuits tristes.*

lete the tone[d] of tenderness and affection which makes itself felt in a hundred expressions throughout these precious documents. Ardently as the Prophet longs for the destruction of the enemy of his country and of Jehovah, and earnestly as he curses the man "that doeth the work of Jehovah deceitfully, that keepeth back his sword from blood," yet he is constrained to bemoan and lament such dreadful calamities to a people so near him both in blood and locality. His heart mourns—it sounds like pipes—for the men of Kir-heres; his heart cries out, it sounds like a harp for Moab.

Isaiah recurs to the subject in another passage of extraordinary force, and of fiercer character than before, viz., xxv. 10-12. Here the extermination, the utter annihilation, of Moab, is contemplated by the Prophet with triumph, as one of the first results of the re-establishment of Jehovah on Mount Zion: "In this mountain shall the hand of Jehovah rest, and Moab shall be trodden down under Him, even as straw—the straw of his own threshing-floors at Madmenah—is trodden down for the dunghill. And He shall spread forth His hands in the midst of them—namely, of the Moabites—as one that swimmeth spreadeth forth his hands to swim, buffet following buffet, right and left, with terrible rapidity, as the strong swimmer urges his way forward: and He shall bring down their pride together with the spoils of their hands. And the fortress of Misgab[e]—thy walls shall He bring down, lay low, and bring to the ground, to the dust."

If, according to the custom of interpreters, this and the preceding chapter (xxiv.) are understood as referring to the destruction of Babylon, then this sudden burst of indignation towards Moab is extremely puzzling. But, if the passage is examined with that view, it will perhaps be found to contain some expressions which suggest the possibility of Moab having been at least within the ken of the Prophet, even though not in the foreground of his vision, during a great part of the passage. The Hebrew words rendered "city" in xxv. 2—two entirely distinct terms—are positively, with a slight variation, the names of the two chief Moabite strongholds, the same which are mentioned in xv. 1, and one of which[f] is in the Pentateuch a synonym for the entire nation of Moab. In this light, verse 2 may be read as follows: "For Thou hast made of Ar a heap; of Kir the defenced a ruin; a palace[g] of strangers no longer is Ar, it shall never be rebuilt." The same words are found in verses 10 and 12 of the preceding chapter, in company with *hutsoth* (A. V. "streets") which we know from Num. xxii. 39 to have been the name of a Moabite town. [KIRJATH-HUZOTH.] A distinct echo of them is again heard in xxv. 3, 4; and finally in xxvi. 1, 5, there seems to be yet another reference to the same two towns, acquiring new force from the denunciation which closes the preceding chapter:—'Moab shall be brought down, the fortress and the walls of Misgab shall be laid low; but in the land of Judah this song shall be sung, '*Our* Ar, *our* city, is strong Trust in the Lord Jehovah who bringeth down those that dwell on high: the lofty Kir He layeth it low,'" &c.

It is perhaps an additional corroboration to this view to notice that the remarkable expressions in xxiv. 17, "Fear, and the pit, and the snare," &c., actually occur in Jeremiah (xlviii. 43), in his denunciation of Moab, embedded in the old prophecies out of which, like Is. xv. xvi., this passage is compiled, and the rest of which had certainly, as originally uttered, a direct and even exclusive reference to Moab.

Between the time of Isaiah's denunciation and the destruction of Jerusalem we have hardly a reference to Moab. Zephaniah, writing in the reign of Josiah, reproaches them (ii. 8-10) for their taunts against the people of Jehovah, but no acts of hostility are recorded either on the one side or the other. From one passage in Jeremiah (xxv. 9-21) delivered in the fourth year of Jehoiakim, just before the first appearance of Nebuchadnezzar, it is apparent that it was the belief of the Prophet that the nations surrounding Israel—and Moab among the rest—were on the eve of devastation by the Chaldaeans and of a captivity for seventy years (see ver. 11), from which however, they should eventually be restored to their own country (ver. 12, and xlviii. 47). From another record of the events of the same period or of one only just subsequent (2 K. xxiv. 2), it would appear, however, that Moab made terms with the Chaldaeans, and for the time acted in concert with them in harassing and plundering the kingdom of Jehoiakim.

Four or five years later, in the first year of Zedekiah (Jer. xxvii. 1),[h] these hostilities must have ceased, for there was then a regular intercourse between Moab and the court at Jerusalem (ver. 3), possibly, as Bunsen suggests (*Bibelwerk, Propheten*, 536) negotiating a combined resistance to the common enemy. The brunt of the storm must have fallen on Judah and Jerusalem. The neighbouring nations, including Moab, when the danger actually arrived probably adopted the advice of Jeremiah (xxvii. 11) and thus escaped, though not without much damage, yet without being carried away as the Jews were. That these nations did not suffer to the same extent as Judaea is evident from the fact that many of the Jews took refuge there when their own land was laid waste (Jer. xl. 11). Jeremiah expressly testifies that those who submitted themselves to the King of Babylon, though they would have to bear a severe yoke—so severe that their very wild animals[i] would be enslaved—yet by such submission should purchase the privilege

[d] It is thus characterized by Ewald (*Propheten*, 230). Eine so ganz von Trauer und Mitleid hingerissene, von Weichheit zerfliessende, mehr elegisch als prophetisch gestimmte Empfindung steht unter den ältern Propheten einzig da; sogar bei Hosea ist nichts ganz aehnliches.

[e] In the A. V. rendered "the high fort." But there is good reason to take it as the name of a place (Jer. xlviii. 1). [MISGAB.]

[f] Gesenius believes Ar, עָר, to be a Moabite form of Ir, עִיר, one of the two words spoken of above. Num. xxiv. 19 acquires a new force, if the word rendered "city" is interpreted as Ar, that is Moab. So also in Mic. vi. 9, at the close of the remarkable conversation between Balak and Balaam there preserved, the word קוֹל occurs again, in such a manner that it is difficult not to believe that the capital city of Moab is intended: "Jehovah's voice crieth unto Ar hear ye the rod, and who hath appointed it."

[g] *Armôn*. The same word is used by Amos (ii. 2) in his denunciation of Moab.

[h] There can be no doubt that 'Jehoiakim' in this verse should be "Zedekiah." See ver 3 of the same chap., and xxviii. 1.

[i] Jer. xxviii. 6.

of remaining in their own country. The removal from home, so dreadful to the Semitic mind,[k] was to be the fate only of those who resisted (Jer. xxvii. 10, 11, xxviii. 14). This is also supported by the allusion of Ezekiel, a few years later, to the cities of Moab, cities formerly belonging to the Israelites, which, at the time when the Prophet is speaking, were still flourishing, "the glory of the country," destined to become at a future day a prey to the Bene-kedem, the "men of the East"—the Bedouins of the great desert of the Euphrates[m] (Ezek. xxv. 8–11).

After the return from the captivity it was a Moabite, Sanballat of Horonaim, who took the chief part in annoying and endeavouring to hinder the operations of the rebuilders of Jerusalem (Neh. ii. 19, iv. 1, vi. 1, &c.). He confines himself, however, to the same weapons of ridicule and scurrility which we have already noticed Zephaniah[n] resenting. From Sanballat's words (Neh. ii. 19) we should infer that he and his country were subject to "the king," that is, the King of Babylon. During the interval since the return of the first caravan from Babylon the illegal practice of marriages between the Jews and the other people around, Moab amongst the rest, had become frequent. So far had this gone, that the son of the high priest was married to an Ammonite woman. Even among the families of Israel who returned from the captivity was one bearing the name of PAHATH-MOAB (Ezr. ii. 6, viii. 4; Neh. iii. 11, &c.), a name which must certainly denote a Moabite connexion,[o] though to the nature of the connexion no clue seems to have been yet discovered. By Ezra and Nehemiah the practice of foreign marriages was strongly repressed, and we never hear of it again becoming prevalent.

In the book of Judith, the date of which is laid shortly after the return from captivity (iv. 3), Moabites and Ammonites are represented as dwelling in their ancient seats and as obeying the call of the Assyrian general. Their "princes" (ἀρχόντας) and "governors" (ἡγουμένοι) are mentioned (v. 2, vii. 8). The Maccabees, much as they ravaged the country of the Ammonites, do not appear to have molested Moab proper, nor is the name either of Moab or of any of the towns south of the Arnon mentioned throughout those books. Josephus not only speaks of the district in which Heshbon was situated as "Moabitis" (*Ant.* xiii. 15, §4; also *B. J.* iv. 8, §2), but expressly says that even at the time he wrote they were a "very great nation" (*Ant.* i. 11, §5.) (See 5 Macc. xxix. 19).

In the time of Eusebius (*Onomast.* Μωάβ), *i. e.* cir. A.D. 380, the name appears to have been attached to the district, as well as to the town of Rabbath—both of which were called Moab. It also lingered for some time in the name of the ancient Kir-Moab, which, as Charakmoba, is mentioned by Ptolemy[p] (Reland, *Pal.* 463), and as late as the Council of Jerusalem, A.D. 536, formed the see of a bishop under the same title (*ib.* 533). Since that time the modern name *Kerak* has superseded the older one and no trace of Moab has been found either in records or in the country itself.

Like the other countries east of Jordan Moab has been very little visited by Europeans, and beyond its general characteristics hardly anything is known of it. The following travellers have passed through the district of Moab Proper, from *Wady Mojeb* on the N. to *Kerak* on the S.:—

Seetzen, March, 1808, and January, 1807. (U. J. Seetzen's *Reisen*, &c., von Prof. Kruse, &c., vol. i. 405-26; ii. 320-77. Also the editor's notes thereon, in vol. iv.)

Burckhardt, 1812, July 13, to Aug. 4. (*Travels*, London, 1822. See also the notes of Gesenius to the German translation, Weimar, 1824, vol. ii., 1061-64.)

Irby and Mangles, 1818, June 5 to 8. (*Travels in Egypt*, &c., 1822, 8vo.; 1847, 12mo. Chap. viii.)

De Saulcy, 1851, January. (*Voyage autour de la Mer Morte*, Paris, 1853. Also translated into English.)

Of the character of the face of the country these travellers only give slight reports, and among these there is considerable variation even when the same district is referred to. Thus between *Kerak* and *Rabba*, Irby (141 *a*) found "a fine country," of great natural fertility, with "reapers at work and the corn luxuriant in all directions;" and the same district is described by Burckhardt as "very fertile, and large tracts cultivated" (*Syr.* July 15); while De Saulcy, on the other hand, pronounces that "from Shihan (6 miles N. of *Rabba*) to the Wady Kerak the country is perfectly bare, not a tree or a bush to be seen"—"Toujours aussi nu . . . pas un arbre, pas un arbrisseau" (*Voyage*, i. 353); which again is contradicted by Seetzen, who not only found the soil very good, but encumbered with wormwood and other shrubs (Seetzen, i. 410). These discrepancies are no doubt partly due to difference in the time of year, and other temporary causes; but they also probably proceed from the disagreement which seems to be inherent in all descriptions of the same scene or spot by various describers, and which is enough to drive to despair those whose task it is to endeavour to combine them into a single account.

In one thing all agree, the extraordinary number of ruins which are scattered over the country, and which, whatever the present condition of the soil, are a sure token of its wealth in former ages. "Wie schrecklich," says Seetzen, "ist diese Residenz alter Könige und ihr Land verwüstet!" (i. 412).

The whole country is undulating, and, after the general level of the plateau is reached, without any serious inequalities; and in this and the absence of conspicuous vegetation has a certain resemblance to the downs of our own southern counties.

Of the language of the Moabites we know nothing or next to nothing. In the few communications recorded as taking place between them and Israelites no interpreter is mentioned (see Ruth; 1 Sam. xi.

[k] This feeling is brought out very strongly in Jer. xlviii. 11, where even the successive devastations from which Moab had suffered are counted as nothing—as absolute immunity—since captivity had been escaped.

[m] To the incursions of these people, true Arabs, it is possibly due that the LXX. in Is. xv. 9 introduce Ἀραβας—'I will bring Arabs upon Dimon."

[n] The word חֶרְפָּה, rendered "reproach" in Zeph. ii. 8, occurs several times in Nehemiah in reference to the taunts of Sanballat and his companions. (See iv. 4, vi. 13, &c.)

[o] It will be observed that this name occurs in connexion with Joab, who, if the well-known son of Zeruiah would be a descendant of Ruth the Moabitess. But this is uncertain. [Vol. i. 1084*a*.]

[p] From the order of the lists as they now stand, and the latitude affixed to Charakmoba, Ptolemy appears to refer to a place south of Petra.

2, 4, &c.). And from the origin of the nation and other considerations we may perhaps conjecture that their language was more a dialect of Hebrew than a different tongue.[q] This indeed would follow from the connexion of Lot, their founder, with Abraham.

The narrative of Num. xxii.-xxiv. must be founded on a Moabite chronicle, though in its present condition doubtless much altered from what it originally was before it came into the hands of the author of the Book of Numbers. No attempt seems yet to have been made to execute the difficult but interesting task of examining the record, with the view of restoring it to its pristine form.

The following are the names of Moabite persons preserved in the Bible—probably Hebraized in their adoption into the Bible records. Of such a transition we seem to have a trace in Shomer and Shimrith (see below).

Zippor.
Balak.
Egion.
Ruth.
Orpah (עָרְפָּה).
Mesha (מֵישָׁע).
Ithmah (1 Chr. xi. 46).
Shomer (2 K. xii. 21), or Shimrith (2 Chr. xxiv. 26).
Sanballat.

Add to these—

Emim, the name by which they called the Rephaim who originally inhabited their country, and whom the Ammonites called Zamzummim or Zuzim.
Chemosh, or Camish (Jer. xlviii. 7), the deity of the nation.

Of names of places the following may be mentioned:—

Moab, with its compounds, Sedê-Moab, the fields of M. (A. V. "the country of M."); Arboth-Moab, the deserts (A. V. "the plains") of M., that is, the part of the Arabah occupied by the Moabites.
Ham-Mishor, the high undulating country of Moab Proper (A. V. "the plain").
Ar, or Ar-Moab (עָר). This Gesenius conjectures to be a Moabite form of the word which in Hebrew appears as Ir (עִיר), a city.
Arnon, the river (אַרְנֹן).
Bamoth Baal.
Beer Elim.
Beth-diblathaim.
Dibon, or Dimon.
Eglaim, or perhaps Eglath-Shelishiya (Is. xv. 5).
Horonaim.
Kiriathaim.
Kirjath-husoth (Num. xxxii. 39; comp. Is. xxiv. 11).
Kir-haraseth, -hareth, -heres.
Kir-Moab.
Luhith.
Medeba.
Nimrim, or Nimrah.
Nobah or Nophah (Num. xxi. 30).
Nap-Pisgah.
Nap-Peor.
Shaveh-Kariathaim (?)
Zophim.
Zoar.

It should be noticed how large a proportion of these names end in *im*.[s]

For the religion of the Moabites see CHEMOSH, MOLECH, PEOR.

Of their habits and customs we have hardly a trace. The gesture employed by Balak when he found that Balaam's interference was fruitless—"he smote his hands together"—is not mentioned again in the Bible, but it may not on that account have been peculiar to the Moabites. Their mode of mourning, viz. cutting off the hair at the back[t] of the head and cropping the beard (Jer. xlviii. 37), is one which they followed in common with the other non-Israelite nations, and which was forbidden to the Israelites (Lev. xxi. 5), who indeed seem to have been accustomed rather to leave their hair and beard disordered and untrimmed when in grief (see 2 Sam. xix. 24; xiv. 2).

For a singular endeavour to identify the Moabites with the Druses, see Sir G. H. Rose's pamphlet, *The Affghans the Ten Tribes*, &c. (London, 1852), especially the statement therein of Mr. Wood, late British consul at Damascus, (p. 154-157). [G.]

MOADI'AH (מוֹעַדְיָה: *Maadal*; F. A., 3rd hand, *ἐν καιροῖς*: *Moadia*). A priest, or family of priests, who returned with Zerubbabel. The chief of the house in the time of Joiakim the son of Jeshua was Piltai (Neh. xii. 17). Elsewhere (Neh. xii. 5) called MAADIAH.

MOCHMUR, THE BROOK (ὁ χειμάρρους Μοχμούρ; Alex. omits Μοχ.: Vulg. omits: Syr. *Nachal de Peor*), a torrent, *i. e.* a *wady*—the word "brook" conveys an entirely false impression—mentioned only in Jud. vii. 18; and there as specifying the position of Ekrebel—"near unto Chusi, and upon the brook Mochmur." EKREBEL has been identified, with great probability, by Mr. Van de Velde in *Akrabeh*, a ruined site in the mountains of Central Palestine, equidistant from *Nabulus* and *Seilûn*, S.E. of the former and N.E. of the latter; and the torrent Mochmour may be either the *Wady Makfuriyeh*, on the northern slopes of which *Akrabeh* stands, or the *Wady Akmar*, which is the continuation of the former eastwards.

The reading of the Syriac possibly points to the existence of a sanctuary of Baal-Peor in this neighbourhood, but is more probably a corruption of the original name, which was apparently מַחְמוּר (Simonis, *Onomasticon N. T.* &c. p. 111). [G.]

MO'DIN (Μωδεείν; Alex. Μωδεειμ, Μωδιειμ, Μωδαειμ, and in ch. ii. Μωδεειν; Joseph. Μωδιείμ, and once Μωδεείν: *Modin*: the Jewish form is, in the Mishna, חֹמוֹדִיעִים, in Joseph ben-Gorion, ch. xx., המודעית; the Syriac version of Maccabees agrees with the Mishna, except in the absence of the article, and in the usual substitution of *r* for *d*, *Mora'im*), a place not mentioned in either Old or New Testament, though rendered immortal by its connexion with the history of the Jews in the interval between the two. It was the native city of the Maccabaean family (1 Macc. xiii. 25), and as

[q] Some materials for an investigation of this subject may be found in the curious variations of some of the Moabite names—Chemosh, Chemish; Kir-haraseth, Kir-heres &c.; Shomer, Shimrith and—remembering the close connexion of Ammon with Moab—the names of the Ammonite god, Molech, Milcom, Malcham.

[r] If this suggestion is correct—and there must be some truth in it—then this passage of Numbers becomes no less historically important than Gen. xiv., which Ewald (*Geschichte*, i. 73, 131, &c.) with great reason maintains to be the work of a Canaanite chronicler.

[s] So also does Shaharaim, a person who had a special connexion with Moab (1 Chr. viii. 8).

[t] קָרַח, as distinguished from גַּבָּח.

a necessary consequence contained their ancestral sepulchre (τάφος) (ii. 70, ix 19). Hither Mattathias removed from Jerusalem, where up to that time he seems to have been residing, at the commencement of the Antiochian persecution (ii. 1). It was here that he struck the first blow of resistance, by slaying on the heathen altar which had been erected in the place, both the commissioner of Antiochus and a recreant Jew whom he had induced to sacrifice, and then demolishing the altar. Mattathias himself, and subsequently his sons Judas and Jonathan, were buried in the family tomb, and over them Simon erected a structure which is minutely described in the book of Maccabees (xiii. 25-30), and, with less detail, by Josephus (*Ant.* xiii. 6, §6), but the restoration of which has hitherto proved as difficult a puzzle as that of the mausoleum of Artemisia.

At Modin the Maccabaean armies encamped on the eves of two of their most memorable victories—that of Judas over Antiochus Eupator (2 Macc. xiii. 14), and that of Simon over Cendebeus (1 Macc. xvi. 4)—the last battle of the veteran chief before his assassination. The only indication of the position of the place to be gathered from the above notices is contained in the last, from which we may infer that it was near "the plain" (τὸ πεδίον), *i. e.* the great maritime lowland of Philistia (ver. 5). By Eusebius and Jerome (*Onom.* Μηδεείμ and "Modim") it is specified as near Diospolis, *i.e.* Lydda; while the notice in the Mishna (*Pesachim*, ix. 2), and the comments of Bartenora and Maimonides, state that it was 15 (Roman) miles from Jerusalem. At the same time the description of the monument seems to imply (though for this see below) that the spot was so lofty [a] as to be visible from the sea, and so near that even the details of the sculpture were discernible therefrom. All these conditions, excepting the last, are tolerably fulfilled in either of the two sites called *Latrûn* and *Kubâb*.[b] The former of these is, by the shortest road—that through *Wady Ali*—exactly 15 Roman miles from Jerusalem; it is about 8 English miles from *Lydd*, 15 from the Mediterranean, and 9 or 10 from the river *Rubin*, on which it is probable that Cedron—the position of Cendebeus in Simon's battle—stood. *Kubâb* is a couple of miles further from Jerusalem, and therefore nearer to *Lydd* and to the sea, on the most westerly spur of the hills of Benjamin. Both are lofty, and both apparently—*Latrûn* certainly—command a view of the Mediterranean. In favour of *Latrûn* are the extensive ancient remains with which the top of the hill is said to be covered (Rob. *B. R.* iii. 151; Tobler, *Dritte Wand.* 186), though of their age and particulars we have at present no accurate information. *Kubâb* appears to possess no ruins, but on the other hand its name may retain a trace of the monument.

The mediaeval and modern traditions [c] places Modin at *Soba*, an eminence south of *Kuriet el-enab*; but this being not more than 7 miles from Jerusalem, while it is as much as 25 from Lydd and 30 from the sea, and also far removed from the plain of Philistia, is at variance with every one of the conditions implied in the records. It has found advocates in our own day in M. de Saulcy (*l'Art Judaïque*, &c., 377, 8) and M. Salzmann:[d] the latter of whom explored chambers there which may have been tombs, though he admits that there was nothing to prove it. A suggestive fact, which Dr. Robinson first pointed out, is the want of unanimity in the accounts of the mediaeval travellers, some of whom, as William of Tyre (viii. 1), place Modin in a position near Emmaus-Nicopolis, Nob (*Anathoth*), and Lydda. M. Mislin also—usually so vehement in favour of the traditional sites—has recommended further investigation. If it should turn out that the expression of the book of Maccabees as to the monument being visible from the sea has been misinterpreted, then one impediment to the reception of *Soba* will be removed; but it is difficult to account for the origin of the tradition in the teeth of those which remain.

The descriptions of the tomb by the author of the book of Maccabees and Josephus, who had both apparently seen it, will be most conveniently compared by being printed together.

1 Macc. xiii. 27-30.	Josephus, *Ant.* xiii. 6, §6.
"And Simon made a building over the sepulchre of his father and his brethren, and raised it aloft to view with polished [e] stone behind and before. And he set up upon it seven pyramids, one against another, for his father and his mother and his four brethren. And on these he made engines of war, and set great pillars round about, and on the pillars he made suits of armour for a perpetual memory; and by the suits of armour ships carved, so that they might be seen by all that sail on the sea. This sepulchre he made at Modin, and it stands unto this day."	"And Simon built a very large monument to his father and his brethren of white and polished stone. And he raised it up to a great and conspicuous height, and threw cloisters around, and set up pillars of a single stone, a work wonderful to behold: and near to these he built seven pyramids to his parents and his brothers, one for each, terrible to behold both for size and beauty. And these things are preserved even to this day."

The monuments are said by Eusebius (*Onom.*) to have been still shown when he wrote—A. D. circa 320.

Any restoration of the structure from so imperfect an account as the above can never be anything more

[a] Thus the Vulg. of 1 Macc. ii. 1 has *Mons Modin*.

[b] Ewald (*Gesch.* iv. 350 *note*) suggests that the name Modin may be still surviving in *Deir Ma'in*. But is not this questionable on philological grounds? and the position of *Deir Ma'in* is less in accordance with the facts than that of the two named in the text.

[c] See the copious references given by Robinson (*B. R.* ii. 7, note).

[d] The lively account of M. Salzmann (*Jerusalem, Etude*, &c., pp 37, 38) would be more satisfactory if it were less encumbered with mistakes. To name but two. The great obstacle which interposes itself in his quest of Modin is that Eusebius and Jerome state that it was near Diospolis, on a mountain in the tribe of Judah." This difficulty (which however is entirely imaginary, for they do not mention the name of Judah in connexion with Modin) would have been "enough to deter him entirely from the task," if he had not "found in the book of Joshua that M'dim (from which Modim is derived) was part of the territory allotted to the tribe of Judah." Now Mkidin (not M'dim) was certainly in the tribe of Judah, but not within many miles of the spot in question, since it was one of the six towns which lay in the district immediately bordering on the Dead Sea, probably in the depths of the *Ghor* itself (Josh. xv. 61).

[e] λίθῳ ξεστῷ. This Ewald (iv. 388) renders "inscribed," or "graven"—*beschrieben oder Steinern*.

than conjecture. Something has been already attempted under MACCABEES (p. 170). But in its absence one or two questions present themselves.

(1.) The "ships" (πλοῖα, *naves*). The sea and its pursuits were so alien to the ancient Jews, and the life of the Maccabaean heroes who preceded Simon was—if we except their casual relations with Joppa and Jamnia and the battle-field of the maritime plain—so unconnected therewith, that it is difficult not to suppose that the word is corrupted from what it originally was. This was the view of J. D. Michaelis, but he does not propose any satisfactory word in substitution for πλοῖα (see his suggestion in Grimm, *ad loc.*). True, Simon appears to have been to a certain extent alive to the importance of commerce to his country,[f] and he is especially commemorated for having acquired the harbour of Joppa, and thus opened an inlet for the isles of the sea (1 Macc. xiv. 5). But it is difficult to see the connexion between this and the placing of ships on a monument to his father and brothers, whose memorable deeds had been of a different description. It is perhaps more feasible to suppose that the sculptures were intended to be symbolical of the departed heroes. In this case it seems not improbable that during Simon's intercourse with the Romans he had seen and been struck with their war-galleys, no inapt symbols of the fierce and rapid career of Judas. How far such symbolical representation was likely to occur to a Jew of that period is another question.

(2.) The distance at which the "ships" were to be seen. Here again, when the necessary distance of Modin from the sea—*Latrûn* 15 miles, *Kubâb* 13, *Lydda* itself 10—and the limited size of the sculptures are considered, the doubt inevitably arises whether the Greek text of the book of Maccabees accurately represents the original. De Saulcy (*L'Art Judaique*, 377) ingeniously suggests that the true meaning is, not that the sculptures could be discerned from the vessels in the Mediterranean, but that they were worthy to be inspected by those who were sailors by profession. The consideration of this is recommended to scholars. [G.]

MO'ETH (Μωέθ: *Medias*). In 1 Esd. viii. 63, "JOADIAH the son of Binnui" (Ezr. viii. 33), a Levite, is called "Moeth the son of Sabban."

MO'LADAH (מוֹלָדָה; but in Neh. מלדה: Μωλαδά, Alex. Μωβαδα; Καλαλάμ, Alex. Μωλαδα: Μαλλάδ, Alex. Μωλαδα: *Molada*), a city of Judah, one of those which lay in the district of "the south," next to Edom. It is named in the original list between Shema and Hazar-gaddah, in the same group with Beer-sheba (Josh. xv. 26); and this is confirmed by another list in which it appears as one of the towns which, though in the allotment of Judah, were given to Simeon (xix. 2). To the latter tribe it remained at any rate till the reign of David (1 Chr. iv. 28), but by the time of the captivity it seems to have come back into the hands of Judah, by whom it was reinhabited after the captivity (Neh. xi. 26). It is, however, omitted from the catalogue of the places frequented by David during his wandering life (1 Sam. xxx. 27-31).

In the *Onomasticon* it receives a bare mention under the head of "Molada," but under "Ether" and "Iether" a place named Malatha is spoken of as in the interior of Daroma (a district which answered to the *Negeb* or "South" of the Hebrews); and further, under "Arath" or Αραμά (*i. e.* Arad) it is mentioned as 4 miles from the latter place and 20 from Hebron. Ptolemy also speaks of a Maliattha as near Elusa. And lastly, Josephus states that Herod Agrippa retired to a certain tower "in Malatha of Idumaea" (ἐν Μαλάθοις τῆς Ἰδ.). The requirements of these notices are all very fairly answered by the position of the modern *el-Milh*, a site of ruins of some extent, and two large wells, one of the regular stations on the road from Petra and *Ain el-Weibeh* to Hebron. *El-Milh* is about 4 English miles from *Tell Arad*, 17 or 18 from Hebron, and 9 or 10 due east of Beersheba. Five miles to the south is *Ararah*, the AROER of 1 Sam. xxx. 28. It is between 20 and 30 from Elusa, assuming *el-Khulasah* to be that place; and although Dr. Robinson is probably correct in saying that there is no verbal affinity, or only a slight one, between Molada or Malatha and *el-Milh*,[a] yet, taking that slight resemblance into account with the other considerations above named, it is very probable that this identification is correct (see *B. R.* ii. 201). It is accepted by Wilson (*Lands*, i. 347), Van de Velde (*Memoir*, 335), Bonar, and others. [G.]

MOLE, the representative in the A. V. of the Hebrew words *Tinshemeth* and *Chêphôr pêrûth*.

1. *Tinshemeth* (תִּנְשֶׁמֶת: ἀσπάλαξ, Ald. σπάλαξ, in Lev. xi. 30; λᾶρος, Ald. λάρος: *cygnus, talpa, ibis*). This word occurs in the list of unclean birds in Lev. xi. 18; Deut. xiv. 16, where it is translated "swan" by the A. V.; in Lev. xi. 30, where the same word is found amongst the unclean "creeping things that creep upon the earth," it evidently no longer stands for the name of a bird, and is rendered "mole" by the A. V. adopting the interpretation of the LXX., Vulg., Onkelos, and some of the Jewish doctors. Bochart has, however, shown that the Hebrew *Choled*, the Arabic *Khuld* or *Khild*, denotes the "mole," and has argued with much force in behalf of the "chameleon" being the *tinshemeth*. The Syriac version and some Arabic MSS. understand "a centipede" by the original word, the Targum of Jonathan a "salamander," some Arabic versions read *sammâbras*, which Golius renders "a kind of lizard." In Lev. xi. 30, the "chameleon" is given by the

The Chameleon. (*Chamæleo vulgaris.*)

A. V. as the translation of the Hebrew *chôach*, which in all probability denotes some larger kind of lizard. [CHAMELEON.] The only clue to an identification of *tinshemeth* is to be found in its etymology, and in the context in which the word occurs. Bochart conjectures that the root[b] from which the Heb. name of this creature is derived, has reference

[f] For the notice of this fact I am indebted to the Rev. A. P. Wentworth.

[a] By Schumann (100) the Arabic name is quoted as *Muladah*; by Stewart (*Tent and Khan*, 217) as *el-Melech*.

[b] נָשַׁם, "to breathe," whence נְשָׁמָה, "breath."

to a vulgar opinion amongst the ancients that the chameleon lived on air (comp. Ov. *Met.* xv. 411, "Id quoque quod ventis animal nutritur et aura." and see numerous quotations from classical authors cited by Bochart, *Hieroz.* ii. 505). The lung of the chameleon is very large, and when filled with air it renders the body semi-transparent; from the creature's power of abstinence, no doubt arose the fable that it lived on air. It is probable that the animals mentioned with the *tinshemeth* (Lev. xi. 30) denote different kinds of lizards; perhaps therefore, since the etymology of the word is favourable to that view, the chameleon may be the animal intended by *tinshemeth* in Lev. xi. 30. As to the change of colour in the skin of this animal numerous theories have been proposed; but as this subject has no Scriptural bearing, it will be enough to refer to the explanation given by Milne-Edwards, whose paper is translated in vol. xvii. of the *Edinburgh New Philosophical Journal*. The chameleon belongs to the tribe *Dendrosaura*, order *Saura*; the family inhabits Asia and Africa, and the south of Europe; the *C. vulgaris* is the species mentioned in the Bible. As to the bird *tinshemeth*, see SWAN.

2. *Chĕphôr pĕrôth* (חְפוֹר פֵּרוֹת: τὰ μύραινα: *talpae*) is rendered "moles" by the A. V. in Is. ii. 20; three MSS. read these two Hebrew words as one, and so the LXX., Vulg., Aquila, Symmachus, and Theodotion, with the Syriac and Arabic versions, though they adopt different interpretations of the word (Bochart, *Hieroz.* ii. 449). It is difficult to see what Hebrew word the LXX. could have read; but compare Schleusner, *Nov. Thes.* in LXX. *s. v. μύραινα*. Gesenius follows Bochart in considering the Hebrew words to be the plural feminine of the noun *chapharpĕrâh*,[4] but does not limit the meaning of the word to "moles." Michaelis also (*Suppl. ad Lex. Heb.* p. 876 and 2042) believes the words should be read as one, but that "sepulchres," or "vaults" dug in the rocks are intended. The explanation of Oedmann (*Vermischt. Samm.* iii. 82, 83) that the Hebrew words signify "(a bird) that follows cows for the sake of their milk," and that the goat-sucker (*Caprimulgus Europaeus*) is intended, is improbable. Perhaps no reference is made by the Hebrew words (which, as so few MSS. join them, it is better to consider distinct) to any particular animal, but to the holes and burrows of rats, mice, &c., which we know frequent ruins and deserted places. (Harmer's *Observ.* ii. 456.) "Remembering the extent to which we have seen," says Kitto (*Pict. Bib.* on Is. xx.), "the forsaken sites of the East perforated with the holes of various cave-digging animals, we are inclined to suppose that the words might generally denote *any* animals of this description." Rosenmüller's explanation, "*in effossionem*, i. e. foramen *Murium*," appears to be decidedly the best proposed; for not only is it the literal translation of the Hebrew, but it is more in accordance with the natural habits of rats and mice to occupy with bats deserted places than it is with the habits of moles, which for the most part certainly frequent cultivated lands, and this no doubt is true of the particular species, *Spalax typhlus*, the mole-rat of Syria and Mesopotamia, which by some has been supposed to represent the mole of the Scriptures; if, moreover, the prophet intended to speak exclusively of "moles," is it not probable that he would have used the term *Choled* (see above)? [WEASEL.] [W. H.]

[a] "Holes of rats." [4] חַפַרְפֶּרָה, as if the Heb word was from פֶּרֶה, "a cow."

MO'LECH (הַמֹּלֶךְ, with the article, except in 1 K. xi. 7: ἄρχων, in Lev.; ὁ βασιλεὺς αὐτῶν, 1 K. xi. 7; ὁ Μολόχ, 2 K. xxiii. 10; and ὁ Μολὲχ βασιλεύς, Jer. xxxii. 35: *Moloch*). The fire-god Molech was the tutelary deity of the children of Ammon, and essentially identical with the Moabitish Chemosh. Fire-gods appear to have been common to all the Canaanite, Syrian, and Arab tribes, who worshipped the destructive element under an outward symbol, with the most inhuman rites. Among these were human sacrifices, purifications and ordeals by fire, devoting of the first-born, mutilation, and vows of perpetual celibacy and virginity. To this class of divinities belonged the old Canaanitish Molech, against whose worship the Israelites were warned by threats of the severest punishment. The offender who devoted his offspring to Molech was to be put to death by stoning; and in case the people of the land refused to inflict upon him this judgment, Jehovah would Himself execute it, and cut him off from among His people (Lev. xviii. 21, xx. 2-5). The root of the word Molech is the same as that of מֶלֶךְ, *melec*, or "king," and hence he is identified with Malcham ("their king") in 2 Sam. xii. 30, Zeph. i. 5, the title by which he was known to the Israelites, as being invested with regal honours in his character as a tutelary deity, the lord and master of his people. Our translators have recognized this identity in their rendering of Am. v. 26 (where "your Moloch" is literally "your king," as it is given in the margin), following the Greek in the speech of Stephen, in Acts vii. 43. Dr. Geiger, in accordance with his theory that the worship of Molech was far more widely spread among the Israelites than appears at first sight from the Old Testament, and that many traces are obscured in the text, refers "the king," in Is. xxx. 33, to that deity: "for Tophet is ordained of old; yea for *the king* it is prepared." Again, of the Israelite nation, personified as an adulteress, it is said, "Thou wentest to *the king* with oil" (Is. lvii. 9); Amaziah the priest of Bethel forbade Amos to prophesy there, "for it is *the king's* chapel" (Am. vii. 13); and in both these instances Dr. Geiger would find a disguised reference to the worship of Molech (*Urschrift*, &c., pp. 299-308). But whether his theory be correct or not, the traces of Molech-worship in the Old Testament are sufficiently distinct to enable us to form a correct estimate of its character. The first direct historical allusion to it is in the description of Solomon's idolatry in his old age. He had in his harem many women of the Ammonite race, who "turned away his heart after other gods," and, as a consequence of their influence, high places to Molech, "the abomination of the children of Ammon," were built on "the mount that is facing Jerusalem"—one of the summits of Olivet (1 K. xi. 7). Two verses before, the same deity is called MILCOM, and from the circumstance of the two names being distinguished in 2 K. xxiii. 10, 13, it has been inferred by Movers, Ewald, and others, that the two deities were essentially distinct. There does not appear to be sufficient ground for this conclusion. It is true that in the later history of the Israelites the worship of Molech is connected with the valley of Hinnom, while the high place of Milcom was on the Mount of Olives, and that no mention is made of human sacrifices to the latter

But it seems impossible to resist the conclusion that in 1 K. xi. "Milcom the abomination of the Ammonites," in ver. 5, is the same as "Molech the abomination of the children of Ammon," in ver. 7. To avoid this Movers contends, not very convincingly, that the latter verse is by a different hand. Be this as it may, in the reformation carried out by Josiah, the high place of Milcom, on the right hand of the mount of corruption, and Tophet in the valley of the children of Hinnom were defiled, that "no man might make his son or his daughter to pass through the fire to Molech" (2 K. xxiii. 10, 13). In the narrative of Chronicles these are included under the general term "Baalim," and the apostasy of Solomon is not once alluded to. Tophet soon appears to have been restored to its original uses, for we find it again alluded to, in the reign of Zedekiah, as the scene of child-slaughter and sacrifice to Molech (Jer. xxxii. 35).

Most of the Jewish interpreters, Jarchi (on Lev. xviii. 21), Kimchi, and Maimonides (*Mor. Neb.* iii. 38) among the number, say that in the worship of Molech the children were not burnt but made to pass between two burning pyres, as a purificatory rite. But the allusions to the actual slaughter are too plain to be mistaken, and Aben Ezra in his note on Lev. xviii. 21, says that "to cause to pass through" is the same as "to burn." "They sacrificed their sons and their daughters unto devils, and shed innocent blood, the blood of their sons and of their daughters, whom they sacrificed unto the idols of Canaan" (Ps. cvi. 37, 38). In Jer. vii. 31, the reference to the worship of Molech by human sacrifice is still more distinct: "they have built the high places of Tophet . . . *to burn* their sons and their daughters *in the fire*," as "burnt-offerings unto Baal," the sun-god of Tyre, with whom, or in whose character, Molech was worshipped (Jer. xix. 5). Compare also Deut. xii. 31; Ez. xvi. 20, 21, xxiii. 37. But the most remarkable passage is that in 2 Chr. xxviii. 3, in which the wickedness of Ahaz is described: "Moreover, he burnt incense in the valley of the son of Hinnom, and burnt (וַיְבַעֵר) his children in the fire, after the abominations of the nations whom Jehovah had driven out before the children of Israel." Now, in the parallel narrative of 2 K. xvi. 3, instead of וַיְבַעֵר, "and he burnt," the reading is וַיַּעֲבֵר, "he made to pass through," and Dr. Geiger suggests that the former may be the true reading, of which the latter is an easy modification, serving as a euphemistic expression to disguise the horrible nature of the sacrificial rites. But it is more natural to suppose that it is an exceptional instance, and that the true reading is וַיַּעֲבֵר, than to assume that the other passages have been intentionally altered.[a] The worship of Molech is evidently alluded to, though not expressly mentioned, in connexion with star-worship and the worship of Baal in 2 K. xvii. 16, 17, xxi. 5, 6, which seems to shew that Molech, the flame-god, and Baal, the sun-god, whatever their distinctive attributes, and whether or not the latter is a general appellation including the former, were worshipped with the same rites. The sacrifice of children is said by Movers to have been not so much an expiatory, as a purificatory rite, by which the victims were purged from the dross of the body and attained union with the deity. In support of this he quotes the myth of Baaltis or Isis, whom Malcander, king of Byblus, employed as nurse for his child. Isis suckled the infant with her finger, and each night burnt whatever was mortal in its body. When Astarte the mother saw this one uttered a cry of terror, and the child was thus deprived of immortality (Plut. *Is. & Os.* ch. 16). But the sacrifice of Mesha king of Moab, when, in despair at failing to cut his way through the overwhelming forces of Judah, Israel, and Edom, he offered up his eldest son a burnt-offering, probably to Chemosh, his national divinity, has more of the character of an expiatory rite to appease an angry deity, than of a ceremonial purification. Besides, the passage from Plutarch bears evident traces of Egyptian, if not of Indian influence.

According to Jewish tradition, from what source we know not, the image of Molech was of brass, hollow within, and was situated without Jerusalem. Kimchi (on 2 K. xxiii. 10) describes it as "set within seven chapels, and whoso offered fine flour they open to him one of them, (whoso offered) turtle-doves or young pigeons they open to him two; a lamb, they open to him three; a ram, they open to him four; a calf, they open to him five; an ox, they open to him six, and so whoever offered his son they open to him seven. And his face was (that) of a calf, and his hands stretched forth like a man who opens his hands to receive (something) of his neighbour. And they kindled it with fire, and the priests took the babe and put it into the hands of Molech, and the babe gave up the ghost. And why was it called Tophet and Hinnom? Because they used to make a noise with drums (*tophim*), that the father might not hear the cry of his child and have pity upon him, and return to him. Hinnom, because the babe wailed (מְנַהֵם, *menahem*), and the noise of his wailing went up. Another opinion (is that it was called) Hinnom, because the priests used to say—"May it profit (יֹהַנָּה) thee! may it be sweet to thee! may it be of sweet savour to thee!" All this detail is probably as fictitious as the etymologies are unsound, but we have nothing to supply its place. Selden conjectures that the idea of the seven chapels may have been borrowed from the worship of Mithra, who had seven gates corresponding to the seven planets, and to whom men and women were sacrificed (*De Dis Syr.* Synt. i. c. 6). Benjamin of Tudela describes the remains of an ancient Ammonite temple which he saw at Gebal, in which was a stone image richly gilt seated on a throne. On either side sat two female figures, and before it was an altar on which the Ammonites anciently burned incense and offered sacrifice (*Early Travels in Palestine*, p. 79, Bohn). By these chapels Lightfoot explains the allusion in Am. v. 26; Acts vii. 43, to "the tabernacle of Moloch;" "these seven chapels (if there be truth in the thing) help us to understand what is meant by Molech's tabernacle, and seem to give some reason why in the Prophet he is called *Siccuth*, or the *Covert God*, because he was retired within so many *Cancelli* (for that word Kimchi useth) before one could come at him" (*Comm. on Acts* vii. 43). It was more probably a shrine or ark in which the figure of the god was

[a] We may infer from the expression, "after the abominations of the nations whom Jehovah had driven out before the children of Israel," that the character of the Molech-worship of the time of Ahaz was essentially the same as that of the old Canaanites, although Movers maintains the contrary.

carried in processions, or which contained, as Movers conjectures, the bones of children who had been sacrificed and were used for magical purposes. [AMMON, vol. i. p. 60 *a*.]

Many instances of human sacrifices are found in ancient writers, which may be compared with the descriptions in the Old Testament of the manner in which Molech was worshipped. The Carthaginians, according to Augustine (*De Civit. Dei*, vii. 19), offered children to Saturn, and by the Gauls even grown-up persons were sacrificed, under the idea that of all seeds the best is the human kind. Eusebius (*Præp. Ev.* iv. 16) collected from Porphyry numerous examples to the same effect, from which the following are selected. Among the Rhodians a man was offered to Kronos on the 6th July; afterwards a criminal condemned to death was substituted. The same custom prevailed in Salamis, but was abrogated by Diiphilus king of Cyprus, who substituted an ox. According to Manetho, Amosis abolished the same practice in Egypt at Heliopolis sacred to Juno. Sanchoniatho relates that the Phoenicians, on the occasion of any great calamity, sacrificed to Saturn one of their relatives. Istrus says the same of the Curetes, but the custom was abolished, according to Pallas, in the reign of Hadrian. At Laodicea a virgin was sacrificed yearly to Athene, and the Dumatii, a people of Arabia, buried a boy alive beneath the altar each year. Diodorus Siculus (xx. 14) relates that the Carthaginians when besieged by Agathocles, tyrant of Sicily, offered in public sacrifice to Saturn 200 of their noblest children, while others voluntarily devoted themselves to the number of 300. His description of the statue of the god differs but slightly from that of Molech, which has been quoted. The image was of brass, with its hands outstretched towards the ground in such a manner that the child when placed upon them fell into a pit full of fire.

Molech, "the king," was the lord and master of the Ammonites; their country was his possession (Jer. xlix. 1), as Moab was the heritage of Chemosh; the princes of the land were the princes of Malcham (Jer. xlix. 3; Am. i. 15). His priests were men of rank (Jer. xlix. 3), taking precedence of the princes. So the priest of Hercules at Tyre was second to the king (Justin, xviii. 4, §5), and like Molech, the god himself, Baal Chamman, is *Melkart*, "the *king* of the city." The priests of Molech, like those of other idols, were called Chemarim (2 K. xxiii. 5; Hos. x. 5; Zeph. i. 4).

Traces of the root from which Molech is derived are to be found in the Milichus, Malica, and Malcander of the Phoenicians; with the last mentioned may be compared Adrammelech, the fire-god of Sepharvaim. These, as well as Chemosh the fire-god of Moab, Urotal, Dusares, Sair, and Thyandrites, of the Edomites and neighbouring Arab tribes, and the Greek Dionysus, were worshipped under the symbol of a rising flame of fire, which was imitated in the stone pillars erected in their honour (Movers, *Phoen.* i. c. 9). Tradition refers the origin of the fire-worship to Chaldea. Abraham and his ancestors are said to have been fire-worshippers, and the Assyrian and Chaldean armies took with them the sacred fire accompanied by the Magi.

There remains to be noticed one passage (2 Sam. xii. 31) in which the Hebrew written text has מַלְכָּם *malkâm*, while the marginal reading is מַלְכָּן, *malkân*, which is adopted by our translators in their rendering "brick-kiln." Kimchi explains *malkâm* "the place of Molech," where sacrifices were offered to him, and the children of Ammon made their sons to pass through the fire. And Milcom and Malkam, he says, are one.[b] On the other hand Movers, rejecting the points, reads מַלְכֵּנוּ, *malcênu*, "our king," which he explains as the title by which he was known to the Ammonites. Whatever may be thought of these interpretations, the reading followed by the A. V. is scarcely intelligible. [W. A. W.]

MO'LI (Μοολί: *Moholi*). MAHLI the son of Merari (1 Esdr. viii. 47; comp. Exr. viii. 18).

MO'LID (מוֹלִיד: Μαλά; Alex. Μαλεί: *Molid*). The son of Abishur by his wife Abihail, and descendant of Jerahmeel (1 Chr. ii. 29).

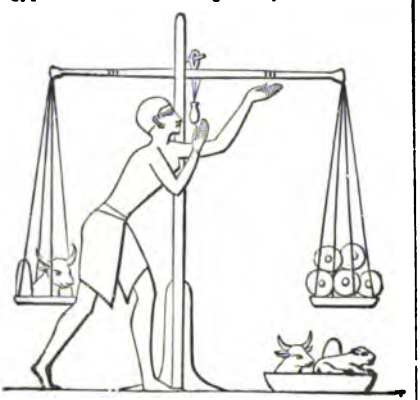
MO'LOCH. The Hebrew corresponding to "your Moloch" in the A. V. of Amos v. 26 is מַלְכְּכֶם, *malkekem*, "your king," as in the margin. In accordance with the Greek of Acts vii. 43 (ὁ Μολόχ: *Moloch*), which followed the LXX. of Amos, our translators have adopted a form of the name MOLECH which does not exist in Hebrew. Kimchi, following the Targum, takes the word as an appellative, and not as a proper name, while with regard to *siccuth* (סִכּוּת, A. V. "tabernacle"), he holds the opposite opinion. His note is as follows:—"*Siccuth* is the name of an idol; and (as for) *malkekem* he spake of a star which was made an idol by its name, and he calls it 'king,' because they thought it a king over them, or because it was a great star in the host of heaven, which was as a king over his host; and so 'to burn incense to the *queen* of heaven,' as I have explained in the book of Jeremiah." Gesenius compares with the "tabernacle" of Moloch the sacred tent of the Carthaginians mentioned by Diodorus (xx. 65). Rosenmüller, and after him Ewald, understood by *siccuth* a pole or stake on which the figure of the idol was placed. It was more probably a kind of palanquin in which the image was carried in processions, a custom which is alluded to in Is. xlvi. 1; Epist. of Jer. 4 (Selden, *De Dis Syr.* synt. i. c. 6). [W. A. W.]

MOM'DIS (Μομδίος; Alex. Μομδεί: *Mondias*). The same as MAADAI, of the sons of Bani (1 Esdr. ix. 34; comp. Exr. x. 34).

MONEY. This article treats of two principal matters, the uncoined money and the coined money mentioned in the Bible. Before entering upon the first subject of inquiry, it will be necessary to speak of uncoined money in general, and of the antiquity of coined money. An account of the principal monetary systems of ancient times is an equally needful introduction to the second subject, which requires a special knowledge of the Greek coinages. A notice of the Jewish coins, and of the coins current in Judæa as late as the time of Hadrian, will be interwoven with the examination of the passages in the Bible and Apocrypha relating to them, instead of being separately given.

I. UNCOINED MONEY. 1. *Uncoined Money in general.*—It has been denied by some that there

[b] The crown of Malcham, taken by David at Rabbah, is said to have had in it a precious stone (a magnet, according to Kimchi), which is described by Cyril on Amos as transparent and like the daystar, whence Moloch has groundlessly been identified with the planet Venus (Vossius, *De Orig. Idol.* ii. c. 5 p. 331).



ever has been any money not coined, but this is merely a question of terms. It is well known that ancient nations that were without a coinage weighed the precious metals, a practice represented on the Egyptian monuments, on which gold and silver are shown to have been kept in the form of rings (see cut, p. 406). The gold rings found in the Celtic countries have been held to have had the same use. It has indeed been argued that this could not have been the case with the latter, since they show no monetary system; yet it is evident from their weights that they all contain complete multiples or parts of a unit, so that we may fairly suppose that the Celts, before they used coins, had, like the ancient Egyptians, the practice of keeping money in rings, which they weighed when it was necessary to pay a fixed amount. We have no certain record of the use of ring-money or other uncoined money in antiquity excepting among the Egyptians. With them the practice mounts up to a remote age, and was probably as constant, and perhaps as regulated with respect to the weight of the rings, as a coinage. It can scarcely be doubted that the highly civilized rivals of the Egyptians, the Assyrians and Babylonians, adopted if they did not originate this custom, clay tablets having been found specifying grants of money by weight (Rawlinson, *Her.* vol. i. p. 684); and there is therefore every probability that it obtained also in Palestine, although seemingly unknown in Greece in the time before coinage was there introduced. There is no trace in Egypt, however, of any different size in the rings represented, so that there is no reason for supposing that this further step was taken towards the invention of coinage.

2. *The Antiquity of Coined Money.*—Respecting the origin of coinage, there are two accounts seemingly at variance: some saying that Phidon king of Argos first struck money, and according to Ephorus, in Aegina; but Herodotus ascribing its invention to the Lydians. The former statement probably refers to the origin of the coinage of European Greece, the latter to that of Asiatic Greece; for it seems, judging from the coins themselves, that the electrum staters of the cities of the coast of Asia Minor were first issued as early as the silver coins of Aegina, both names appearing to comprise the most ancient pieces of money that are known to us. When Herodotus speaks of the Lydians, there can be no doubt that he refers not to the currency of Lydia as a kingdom, which seems to commence with the darics and similar silver pieces now found near Sardis, and probably of the time of Croesus, being perhaps the same as the staters of Croesus (Κροισεῖοι, Julius Poll.), of the ancients; but that he intends the money of Greek cities at the time when the coins were issued or later under the authority of the Lydians. If we conclude that coinage commenced in European and Asiatic Greece about the same time, the next question is whether we can approximately determine the date. This is extremely difficult, since there are no coins of known period before the time of the expedition of Xerxes. The coins of that age are of so archaic a style, that it is hard, at first sight, to believe that there is any length of time between them and the rudest and therefore earliest of the coins of Aegina or the Asiatic cities. It must, however, be recollected that in some countries of art its growth or change is extremely slow, and that this was the case in the early period of Greek art seems evident from the results of the excavations on what we may believe to be the oldest cities in Greece. The lower limit obtained from the evidence of the coins of known date, may perhaps be conjectured to be two, or at most three, centuries before their time; the higher limit is as vaguely determined by the negative evidence of the Homeric writings, of which we cannot guess the age, excepting as before the first Olympiad. On the whole it seems reasonable to carry up Greek coinage to the 8th century B.C. Purely Asiatic coinage cannot be taken up to so early a date. The more archaic Persian coins seem to be of the time of Darius Hystaspis, or possibly Cyrus, and certainly not much older, and there is no Asiatic money, not of Greek cities, that can be reasonably assigned to an earlier period. Croesus and Cyrus probably originated this branch of the coinage, or else Darius Hystaspis followed the example of the Lydian king. Coined money may therefore have been known in Palestine as early as the fall of Samaria, but only through commerce with the Greeks, and we cannot suppose that it was then current there.

3. *Notices of Uncoined Money in the O. T.*—There is no distinct mention of coined money in the books of the O. T. written before the return from Babylon. The contrary was formerly supposed to be the case, partly because the word shekel has a vague sense in later times, being used for a coin as well as a weight. Since however there is some seeming ground for the older opinion, we may here examine the principal passages relating to money, and the principal terms employed, in the books of the Bible written before the date above mentioned.

In the history of Abraham we read that Abimelech gave the patriarch "a thousand [pieces] of silver," apparently to purchase veils for Sarah and her attendants; but the passage is extremely difficult (Gen. xx. 16). The LXX. understood shekels to be intended (χίλια δίδραχμα, *l. c.* also ver. 14), and there can be no doubt that they were right, though the rendering is accidentally an unfortunate one, their equivalent being the name of a coin. The narrative of the purchase of the burial place from Ephron gives us further insight into the use of money at that time. It is related that Abraham offered "full silver" for it, and that Ephron valued it at "four hundred shekels of silver," which accordingly the patriarch paid. We read, "And Abraham hearkened unto Ephron; and Abraham weighed (וַיִּשְׁקֹל) to Ephron the silver, which he had named in the audience of the sons of Heth, four hundred shekels of silver, current with the merchant" (עֹבֵר לַסֹּחֵר, xxiii. 3 *ad fin.* esp. 9, 16). Here a currency is clearly indicated like that which the monuments of Egypt show to have been there used in a very remote age; for the weighing proves that this currency, like the Egyptian, did not bear the stamp of authority, and was therefore weighed when employed in commerce. A similar purchase is recorded of Jacob, who bought a parcel of a field at Shalem for a hundred kesitahs (xxxiii. 18, 19). The occurrence of a name different from shekel and unlike it not distinctly applied in any other passage to a weight favours the idea of coined money. But what is the *kesitah* (קְשִׂיטָה)? The old interpreters supposed it to mean a lamb, and it has been imagined to have been a coin bearing the figure of a lamb. There is no known etymological ground for this meaning, the lost root, if we compare the Arabic قسّ, "he or it divided equally, being perhaps connected with the idea of division. Yet

the sanction of the LXX., and the use of weights having the forms of lions, bulls, and geese, by the Egyptians, Assyrians, and probably Persians, must

From Lepsius, *Denkmäler*, Abth. iii. Bl. 30, No. 3. See also Wilkinson's *Anc. Eg.* ii. 10, for weights in the form of a crouching antelope: and comp. Layard's *Nin. and Bab.* pp. 600-603.

make us hesitate before we abandon a rendering so singularly confirmed by the relation of the Latin *pecunia* and *pecus*. Throughout the history of Joseph we find evidence of the constant use of money in preference to barter. This is clearly shown in the case of the famine, when it is related that all the money of Egypt and Canaan was paid for corn, and that then the Egyptians had recourse to barter (xlvii. 13-26). It would thence appear that money was not very plentiful. In the narrative of the visits of Joseph's brethren to Egypt, we find that they purchased corn with money, which was, as in Abraham's time, weighed silver, for it is spoken of by them as having been restored to their sacks in "its [full] weight" (xliii. 21). At the time of the exodus money seems to have been still weighed, for the ransom ordered in the Law is stated to be half a shekel for each man—"half a shekel after the shekel of the sanctuary [of] twenty gerahs the shekel" (Ex. xxx. 13). Here the shekel is evidently a weight, and of a special system of which the standard examples were probably kept by the priests. Throughout the Law money is spoken of as in ordinary use; but only silver money, gold being mentioned as valuable, but not clearly as used in the same manner. This distinction appears at the time of the conquest of Canaan, when covetous Achan found in Jericho "a goodly Babylonish garment, and two hundred shekels of silver, and a tongue of gold of fifty shekels weight" (Josh. vii. 21). Throughout the period before the return from Babylon this distinction seems to obtain: whenever anything of the character of money is mentioned the usual metal is silver, and gold generally occurs as the material of ornaments and costly works. A passage in Isaiah has indeed been supposed to show the use of gold coins in that prophet's time: speaking of the makers of idols, he says, "They lavish gold out of the bag, and weigh silver in the balance" (xlvi. 6). The mention of a bag is, however, a very insufficient reason for the supposition that the gold was coined money. Rings of gold may have been used for money in Palestine as early as this time, since they had been long previously so used in Egypt; but the passage probably refers to the people of Babylon, who may have had uncoined money in both metals like the Egyptians. A still more remarkable passage would be that in Ezekiel, which Gesenius supposes (*Lex. s. v.* נְחֹשֶׁת) to mention brass as money, were there any sound reason for following the Vulg. in the literal rendering of יַעַן הִשָּׁפֵךְ נְחֻשָׁתֵךְ, *quia effusum est aes tuum*, instead of reading "because thy filthiness was poured out" with the A. V. (xvi. 36). The context does indeed admit the idea of money, but the sense of the passage does not seem to do so, whereas the other translation is quite in accordance with it, as well as philologically admissible (see Gesen. *Lex. l. c.*). The use of brass money at this period seems unlikely, as it was of later introduction in Greece than money of other metals, at least silver and electrum: it has, however, been supposed that there was an independent copper coinage in further Asia before the introduction of silver money by the Seleucidae and the Greek kings of Bactriana.

We may thus sum up our results respecting the money mentioned in the books of Scripture written before the return from Babylon. From the time of Abraham silver money appears to have been in general use in Egypt and Canaan. This money was weighed when its value had to be determined, and we may therefore conclude that it was not of a settled system of weights. Since the money of Egypt and that of Canaan are spoken of together in the account of Joseph's administration during the famine, we may reasonably suppose they were of the same kind; a supposition which is confirmed by our finding, from the monuments, that the Egyptians used uncoined money of gold and of silver. It is even probable that the form in both cases was similar or the same, since the ring-money of Egypt resembles the ordinary ring-money of the Celts, among whom it was probably first introduced by the Phoenician traders, so that it is likely that this form generally prevailed before the introduction of coinage. We find no evidence in the Bible of the use of coined money by the Jews before the time of Ezra, when other evidence equally shews that it was current in Palestine, its general use being probably a very recent change. This first notice of coinage, exactly when we should expect it, is not to be overlooked as a confirmation of the usual opinion as to the dates of the several books of Scripture founded on their internal evidence and the testimony of ancient writers; and it lends no support to those theorists who attempt to shew that there have been great changes in the text. Minor confirmations of this nature will be found in the later part of this article.

II. COINED MONEY. 1. *The Principal Monetary Systems of Antiquity.*—Some notice of the principal monetary systems of antiquity, as determined by the joint evidence of the coins and of ancient writers, is necessary to render the next section comprehensible. We must here distinctly lay down what we mean by the different systems with which we shall compare the Hebrew coinage, as current works are generally very vague and discordant on this subject. The common opinions respecting the standards of antiquity have been formed from a study of the statements of writers of different age and authority, and without a due discrimination between weights and coins. The coins, instead of being taken as the basis of all hypotheses, have been cited to confirm or refute previous theories, and thus no legitimate induction has been formed from their study. If the contrary method is adopted, it has firstly the advantage of

resting upon the indisputable authority of monuments which have not been tampered with; and, in the second place, it is of an essentially inductive character. The result simplifies the examination of the statements of ancient writers, by shewing that they speak of the same thing by different names on account of a change which the coins at once explain, and by indicating that probably at least one talent was only a weight, not used for coined money unless weighed in a mass.

The earliest Greek coins, by which we here intend those struck in the age before the Persian War, are of three talents or standards; the Attic, the Aeginetan, and the Macedonian or earlier Phoenician. The oldest coins of Athens, of Aegina, and of Macedon and Thrace, we should select as typical respectively of these standards; obtaining as the weight of the Attic drachm about 67·5 grains troy; of the Aeginetan, about 96; and of the Macedonian, about 58—or 116, if its drachm be what is now generally held to be the didrachm. The electrum coinage of Asia Minor probably affords examples of the use by the Greeks of a fourth talent, which may be called the later Phoenician, if we hold the staters to have been tetradrachms, for their full weight is about 248 grs.; but it is possible that the pure gold which they contain, about 186 grs., should alone be taken into account, in which case they would be didrachms on the Aeginetan standard. Their division into sixths (hectae) may be urged on either side. It may be supposed that the division into oboli was retained; but then the half hecta has its proper name, and is not called an obolus. However this may be, the gold and silver coins found at Sardis, which we may reasonably assign to Croesus, are of this weight, and may be taken as its earliest examples, without of course proving it was a Greek system. They give a tetradrachm, or equivalent, of about 246 grains, and a drachm of 61·5; but neither of these coins is found of this early period. Among these systems the Attic and the Aeginetan are easily recognized in the classical writers; and the Macedonian is probably their Alexandrian talent of gold and silver, to be distinguished from the Alexandrian talent of copper. Respecting the two Phoenician talents there is some difficulty. The Euboïc talent of the writers we recognize nowhere in the coinage. It is useless to search for isolated instances of Euboïc weight in Euboea and elsewhere, when the coinage of the island and ancient coins generally afford no class on the stated Euboïc weight. It is still more unsound to force an agreement between the Macedonian talent of the coins and the Euboïc of the writers. It may be supposed that the Euboïc talent was never used for money; and the statement of Herodotus, that the king of Persia received his gold tribute by this weight, may mean no more than that it was weighed in Euboïc talents. Or perhaps the nearness of the Euboïc talent to the Attic caused the coins struck on the two standards to approximate in their weights; as the Cretan coins on the Aeginetan standard were evidently lowered in weight by the influence of the Asiatic ones on the later Phoenician standard.

We must now briefly trace the history of these talents.

(*a.*) The Attic talent was from a very early period the standard of Athens. If Solon really reduced the weight, we have no money of the city of the older currency. Corinth followed the same system; and its use was diffused by the great influence of these two leading cities. In Sicily and Italy, after, in the case of the former, a limited use of the Aeginetan talent, the Attic weight became universal. In Greece Proper the Aeginetan talent, to the north the Macedonian, and in Asia Minor and Africa the later Phoenician, were long its rivals, until Alexander made the Attic standard universal throughout his empire, and Carthage alone maintained an independent system. After Alexander's time the other talents were partly restored, but the Attic always remained the chief. From the earliest period of which we have specimens of money on this standard to the time of the Roman dominion it suffered a great depreciation, the drachm falling from 67·5 grs. to about 65·5 under Alexander, and about 55 under the early Caesars. Its later depreciation was rather by adulteration than by lessening of weight.

(*b.*) The Aeginetan talent was mainly used in Greece Proper and the islands, and seems to have been annihilated by Alexander, unless indeed afterwards restored in one or two remote towns, as Leucas in Acarnania, or by the general issue of a coin equally assignable to it or the Attic standard as a hemidrachm or a *tetrobolon*.

(*c.*) The Macedonian talent, besides being used in Macedon and in some Thracian cities before Alexander, was the standard of the great Phoenician cities under Persian rule, and was afterwards restored in most of them. It was adopted in Egypt by the first Ptolemy, and also mainly used by the later Sicilian tyrants, whose money we believe imitates that of the Egyptian sovereigns. It might have been imagined that Ptolemy did not borrow the talent of Macedon, but struck money on the standard of Egypt, which the commerce of that country might have spread in the Mediterranean in a remote age, had not a recent discovery shown that the Egyptian standard of weight was much heavier, and even in excess of the Aeginetan drachm, the unit being above 140 grs., the half of which, again, is greater than any of the drachms of the other three standards. It cannot therefore be compared with any of them.

(*d.*) The later Phoenician talent was always used for the official coinage of the Persian kings and commanders,[a] and after the earliest period was very general in the Persian empire. After Alexander it was scarcely used excepting in coast-towns of Asia Minor, at Carthage, and in the Phoenician town of Aradus.

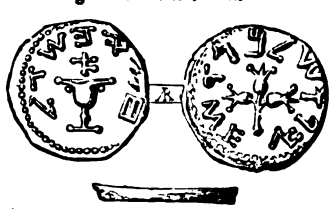
Respecting the Roman coinage it is only necessary here to state that the origin of the weights of its gold and silver money is undoubtedly Greek, and that the denarius, the chief coin of the latter metal, was under the early emperors equivalent to the Attic drachm, then greatly depreciated.

2. *Coined money mentioned in the Bible.*—The earliest distinct mention of coins in the Bible is held to refer to the Persian money. In Ezra (ii. 69, viii. 27) and Nehemiah (vii. 70, 71, 72) current gold coins are spoken of under the name דַּרְכְּמוֹן, אַדַּרְכֹנִים, which only occurs in the plural, and appears to correspond to the Greek στατὴρ Δαρει-

[a] Mr. Waddington has shewn (*Mélanges de Numismatique*) that the so-called coins of the satraps were never issued excepting when these governors were in command of expeditions, and were therefore invested with special powers. This discovery explains the putting to death of Aryandes, satrap of Egypt, for striking a coinage of his own.

κός or Δαρεικός, the Daric of numismatists. The renderings of the LXX. and Vulg., χρυσοῦς, *solidus*, *drachma*, especially the first and second, lend weight to the idea that this was the standard gold coin at the time of Ezra and Nehemiah, and this would explain the use of the same name in the First Book of Chronicles (xxix. 7), in the account of the offerings of David's great men for the Temple, where it would be employed instead of shekel, as a Greek would use the term stater. [See Art. DARIC.]

Daric. Obv.: King of Persia to the right, kneeling, bearing bow and javelin. Rev.: Irregular incuse square. British Museum.



The Apocrypha contains the earliest distinct allusion to the coining of Jewish money, where it is narrated, in the First Book of Maccabees, that Antiochus VII. granted to Simon the Maccabee permission to coin money with his own stamp, as well as other privileges (Καὶ ἐπέτρεψά σοι ποιῆσαι κόμμα ἴδιον νόμισμα τῇ χώρᾳ σου. xv. 6). This was in the fourth year of Simon's pontificate, B.C. 140. It must be noted that Demetrius II. had in the first year of Simon, B.C. 143, made a most important decree granting freedom to the Jewish people, which gave occasion to the dating of their contracts and covenants,—"In the first year of Simon the great high-priest, the leader, and chief of the Jews" (xiii. 34–42), a form which Josephus gives differently, "In the first year of Simon, benefactor of the Jews, and ethnarch" (*Ant.* xiii. 6).

The earliest Jewish coins were until lately considered to have been struck by Simon on receiving the permission of Antiochus VII. They may be thus described, following M. de Saulcy's arrangement:—

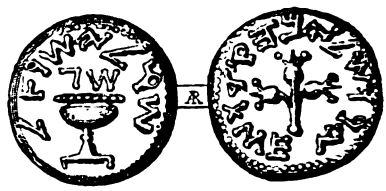
SILVER.

1. שקל ישראל, "Shekel of Israel." Vase, above which א [Year] 1.

℟ ירושלם קדשה, "Jerusalem the holy." Branch bearing three flowers. *Æ*.

2. חצי השקל, "Half-shekel." Same type and date.

℟ ירושלם קדשה. Same type. *Æ*. (Cut) B.M.



3. שקל ישראל, "Shekel of Israel." Same type, above which שב (שנת ב), "Year 2."

℟ ירושלים הקדושה. Same type. *Æ*.

4. חצי השקל. "Half-shekel." Same type and date.

℟ ירושלים הקדושה. Same type. *Æ*.

[a] Coins are not always exact in relative weight: in some modern coinages the smaller coins are intentionally heavier than they would be if exact divisions of the larger.

5. שקל ישראל, "Shekel of Israel." Same type above which שג (שנת ג), "Year 3."

℟ ירושלים הקדושה. Same type. *Æ*. (Cut, B.M.

COPPER.

1. שנת ארבע חצי, "Year four: Half." A fruit between two *sheaves*?

℟ לגאלת ציון, "Of the redemption of Zion." Palm-tree between two *baskets*? *Æ*.

2. שנת ארבע רביע, "Year four: Quarter. Two *sheaves*?

℟ לגאלת ציון, "Of the redemption of Zion." A fruit. *Æ*. (Cut) Mr. Wigan's collection.

3. שנת ארבע, "Year four." A *sheaf* between two fruits?

℟ לגאלת ציון, "Of the redemption of Zion." Vase. *Æ*. (Cut) Wigan.

The average weight of the silver coins is about 220 grains troy for the shekel, and 110 for the half-shekel.[a] The name, from שָׁקַל, shews that the shekel was the Jewish stater. The determination of the standard weight of the shekel, which, be it remembered, was a weight as well as a coin, and of its relation to the other weights used by the Hebrews, belongs to another article [WEIGHTS AND MEASURES]: here we have only to consider its relation to the different talents of antiquity. The shekel corresponds almost exactly to the tetradrachm or didrachm of the earlier Phoenician talent in use in the cities of Phoenicia under Persian rule, and after Alexander's time at Tyre, Sidon, and Berytus, as well as in Egypt. It is represented in the LXX. by didrachm, a rendering which has occasioned great difficulty to numismatists. Col. Leake suggested, but did not adopt, what we have no doubt is the true explanation. After speaking of the shekel as

probably the Phoenician and Hebrew unit of weight, he adds: "This weight appears to have been the same as the Egyptian unit of weight, for we learn from Horapollo that the Μονὰς, or unit, which they held to be the basis of all numeration, was equal to two drachmae; and δίδραχμον is employed synonymously with σίκλος for the Hebrew word shekel by the Greek Septuagint, consequently, the shekel and the didrachmon were of the same weight. I am aware that some learned commentators are of opinion that the translators here meant a didrachmon of the Graeco-Egyptian scale, which weighed about 110 grains; but it is hardly credible that δίδραχμον should have been thus employed without any distinguishing epithet, at a time when the Ptolemaic scale was yet of recent origin [in Egypt], the word didrachmon on the other hand, having for ages been applied to a silver money, of about 130 grains, in the currency of all cities which follow the Attic or Corinthian standard, as well as in the silver money of Alexander the Great and [most of] his successors. In all these currencies, as well as in those of Lydia and Persia, the stater was an Attic didrachmon, or, at least, with no greater difference of standard than occurs among modern nations using a denomination of weight or measure common to all; and hence the word δίδραχμον was at length employed as a measure of weight, without any reference to its origin in the Attic drachma. Thus we find the drachma of gold described as equivalent to ten didrachma, and the half-shekel of the Pentateuch, translated by the Septuagint τὸ ἥμισυ τοῦ διδράχμου. There can be no doubt, therefore, that the Attic, and not the Graeco-Egyptian didrachmon, was intended by them." He goes on to conjecture that Moses adopted the Egyptian unit, and to state the importance of distinguishing between the Mosaic weight and the extant Jewish shekel. "It appears," he continues, "that the half-shekel of ransom had, in the time of our Saviour, been converted into the payment of a didrachmon to the Temple; and two of these didrachma formed a stater of the Jewish currency. This stater was evidently the extant 'Shekel Israel,' which was a tetradrachmon of the Ptolemaic scale, though generally below the standard weight, like most of the extant specimens of the Ptolemies; the didrachmon paid to the Temple was, therefore, of the same monetary scale. Thus the duty to the Temple was converted from the half of an Attic to the whole of a Ptolemaic didrachmon, and the tax was nominally raised in the proportion of about 105 to 65; but probably the value of silver had fallen as much in the two preceding centuries. It was natural that the Jews, when they began to strike money, should have revived the old name shekel, and applied it to their stater, or principal coin; and equally so, that they should have adopted the scale of the neighbouring opulent and powerful kingdom, the money of which they must have long been in the habit of employing. The inscription on the coin appears to have been expressly intended to distinguish the monetary shekel or stater from the Shekel ha-Kodesh, or Shekel of the Sanctuary." Appendix to *Numismata Hellenica*, pp. 2, 3.

The great point here gained is that the Egyptian unit was a didrachm, a conclusion confirmed by the discovery of an Egyptian weight not greatly exceeding the Attic didrachm. The conjecture, however, that the LXX. intend the Attic weight is forced, and leads to this double dilemma, the supposition that the didrachm of the LXX. is a shekel and that of the N. T. half a stater, which is the same as half a shekel, and that the tribute was greatly raised, whereas there is no evidence that in the N. T. the term didrachm is not used in exactly the same sense as in the LXX. The natural explanation seems to us to be that the Alexandrian Jews adopted for the shekel the term didrachm as the common name of the coin corresponding in weight to it, and that it thus became in Hebraistic Greek the equivalent of shekel. There is no ground for supposing a difference in use in the LXX. and N. T., more especially as there happen to have been few, if any, didrachms current in Palestine in the time of Our Lord, a fact which gives great significance to the finding of the stater in the fish by St. Peter, showing the minute accuracy of the Evangelist. The Ptolemaic weight, not being Egyptian but Phoenician, chanced to agree with the Hebrew, which was probably derived from the same source, the primitive system of Palestine, and perhaps of Babylon also.—Respecting the weights of the copper coins we cannot as yet speak with any confidence.

The fabric of the silver coins above described is so different from that of any other ancient money, that it is extremely hard to base any argument on it alone, and the cases of other special classes, as the ancient money of Cyprus, show the danger of such reasoning. Some have been disposed to consider that it proves that these coins cannot be later than the time of Nehemiah, others will not admit it to be later than Alexander's time, while some still hold that it is not too archaic for the Maccabean period. Against its being assigned to the earlier dates we may remark that the forms are too exact, and that apart from style, which we do not exclude in considering fabric, the mere mechanical work is like that of the coins of Phoenician towns struck under the Seleucidae. The decisive evidence, however, is to be found by a comparison of the copper coins which cannot be doubted to complete the series. These, though in some cases of a similar style to the silver coins, are generally far more like the undoubted pieces of the Maccabees.

The inscriptions of these coins, and all the other Hebrew inscriptions of Jewish coins, are in a character of which there are few other examples. As Gesenius has observed (*Gram.* § 5) it bears a strong resemblance to the Samaritan and Phoenician, and we may add to the Aramean of coins which must be carefully distinguished from the Aramean of the papyri found in Egypt.[c] The use of this character does not afford any positive evidence as to age; but it is important to notice that, although it is found upon the Maccabean coins, there is no palaeographic reason why the pieces of doubtful time bearing it should not be as early as the Persian period.

The meaning of the inscriptions does not offer matter for controversy. Their nature would indicate a period of Jewish freedom from Greek influence as well as independence, and the use of an era dating from its commencement. The form used on the copper coins clearly shows the second and third points. It cannot be supposed that the dating is by the sabbatical or jubilee year, since the redemption of Zion is particularised. There are separated from the known Maccabean and later coins by the absence of Hellenism, and connected with them by the want of perfect uniformity in their inscriptions, a point indicative of a time of national decay like that which followed the dominion of the earlier Maccabees. Here it may be remarked that the

[c] See Mr. Waddington's paper on the so-called satrap coins (*Mélange de Numismatique*).

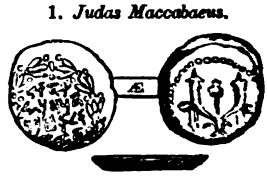
idea of Cavedoni, that the form ירושלים, succeeding in the second year to ירושלם, is to be taken as a dual, because in that year (according to his view of the age of the coins) the fortress of Sion was taken from the Syrians (*Num. Bibl.* p. 23), notwithstanding its ingenuity must, as De Saulcy has already said, be considered untenable.

The old explanation of the meaning of the types of the shekels and half-shekels, that they represent the pot of manna and Aaron's rod that budded, seems to us remarkably consistent with the inscriptions and with what we should expect. Cavedoni has suggested, however, that the one type is simply a vase of the Temple, and the other a lily, arguing against the old explanation of the former that the pot of manna had a cover, which this vase has not. But it may be replied, that perhaps this vase had a flat cover, that on later coins a vase is represented both with and without a cover, and that the different forms given to the vase which is so constant on the Jewish coins seem to indicate that it is a representation of something like the pot of manna lost when Nebuchadnezzar took Jerusalem, and of which there was therefore only a traditional recollection.

Respecting the exact meaning of the types of the copper, save the vase, it is difficult to form a probable conjecture. They may reasonably be supposed to have a reference to the great festivals of the Jewish year, which were connected with thanksgiving for the fruits of the earth. But it may, on the other hand, be suggested that they merely indicate the products of the Holy Land, the fertility of which is so prominently brought forward in the Scriptures. With this idea the representation of the vine-leaf and bunch of grapes upon the later coins would seem to tally; but it must be recollected that the lower portion of a series generally shows a departure or divergence from the higher in the intention of its types, so as to be an unsafe guide in interpretation.

Upon the copper coins we have especially to observe, as already hinted, that they form an important guide in judging of the age of the silver. That they really belong to the same time is not to be doubted. Everything but the style proves this. Their issue in the 4th year, after the silver cease in the 3rd year, their types and inscriptions, leave no room for doubt. The style is remarkably different, and we have selected two specimens for engraving, which afford examples of their diversity. We venture to think that the difference between the silver coins engraved, and the small copper coin, which most nearly resembles them in the form of the letters, is almost as great as that between the large copper one and the copper pieces of John Hyrcanus. The small copper coin, be it remembered, more nearly resembles the silver money than does the large one.

From this inquiry we may lay down the following particulars as a basis for the attribution of this class. 1. The shekels, half-shekels, and corresponding copper coins, may be on the evidence of fabric and inscriptions of any age from Alexander's time until the earlier period of the Maccabees. 2. They must belong to a time of independence, and one at which Greek influence was excluded. 3. They date from an era of Jewish independence.



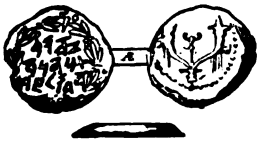
M. de Saulcy, struck by the ancient appearance of the silver coins, and disregarding the difference in style of the copper, has conjectured that the whole class was struck at some early period of prosperity. He fixes upon the pontificate of Jaddua, and supposes them to have been first issued when Alexander granted great privileges to the Jews. If it be admitted that this was an occasion from which an era might be reckoned, there is a serious difficulty in the style of the copper coins, and those who have practically studied the subject of the fabric of coins will admit that though archaic style may be long preserved, there can be no mistake as to late style, the earlier limits of which are far more rigorously fixed than the later limits of archaic style. But there is another difficulty of even a graver nature. Alexander, who was essentially a practical genius, suppressed all the varying weights of money in his empire excepting the Attic, which he made the lawful standard. Philip had struck his gold on the Attic weight, his silver on the Macedonian. Alexander even changed his native currency in carrying out this great commercial reform, of which the importance has never been recognized. Is it likely that he would have allowed a new currency to have been issued by Jaddua on a system different from the Attic? If it be urged that this was a sacred coinage for the tribute, and that therefore an exception may have been made, it must be recollected that an excess of weight would have not been so serious a matter as a deficiency, and besides that it is by no means clear that the shekels follow a Jewish weight. On these grounds, therefore, we feel bound to reject M. de Saulcy's theory.

The basis we have laid down is in entire accordance with the old theory, that this class of coins was issued by Simon the Maccabee. M. de Saulcy would, however, urge against our conclusion the circumstance that he has attributed small copper coins all of one and the same class to Judas the Maccabee, Jonathan, and John Hyrcanus, and that the very dissimilar coins hitherto attributed to Simon, must therefore be of another period. If these attributions be correct, his deduction is perfectly sound, but the circumstance that Simon alone is unrepresented in the series, whereas we have most reason to look for coins of him, is extremely suspicious. We shall, however, show in discussing this class, that we have discovered evidence which seems to us sufficient to induce us to abandon M. de Saulcy's classification of copper coins to Judas and Jonathan, and to commence the series with those of John Hyrcanus. For the present therefore we adhere to the old attribution of the shekels, half-shekels, and similar copper coins, to Simon the Maccabee.

We now give a list of all the principal copper coins of a later date than those of the class described above and anterior to Herod, according to M. de Saulcy's arrangement.

COPPER COINS.

1. *Judas Maccabaeus.*



יהוד
הכהנגל
ולוחבר
חיהודים

"Judah, the illustrious priest, and friend of the Jews."

Within a wreath of *olive?*

℞. Two cornua copiae united, within which a pomegranate. Æ. W.

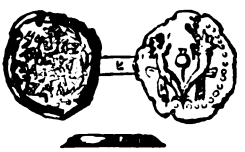
2. *Jonathan.*

יהונ
תנהכה
נרולחב
. . .

"Jonathan the high-priest, friend of the Jews."

Within a wreath of *olive?*

℞. the same. Æ. W.



יתן
הכהנ
חברי
. . .

℞. The same. Æ. W.

3. *Simon.*

(Wanting.)

4. *John Hyrcanus.*

A יהוחנן הכהן הג לחברתי הורים

A "John the high-priest, and friend of the Jews."

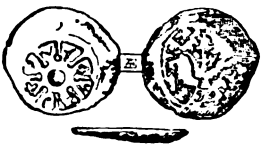
Within a wreath of *olive?*

℞. Two cornua copiæ, within which a pomegranate. Æ. W.

יהוח
נהכהנ
חגרלח
ברהיה
רים

℞. The same. Æ. W.

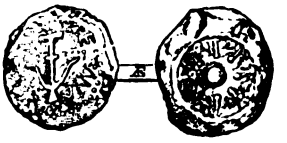
5. *Judas-Aristobulus and Antigonus.*



IOYΔA . .
BAΣIΛ?
A?

Within a crown.

℞. Two cornua copiæ, within which a pomegranate.



Similar coins.

7. *Alexander Jannæus.*

(A). BAΣIΛEΩ OY (BAΣIΛEΩΣ AΛEΞANΔPOY). Anchor.

℞. יונתן המלך, "Jonathan the king;" within the spokes of a wheel. Æ. W.

(B). AΣ AEΞANΔPO. Anchor.

℞. נתן חמלך . . .'; within the spokes of a wheel. Æ. W.

(C). BAΣIΛEΩΣ AΛEΞANΔPOY. Anchor.

יהונתן חמלך, "Jonathan the king." Flower.

The types of this last coin resemble those of one of Antiochus VII.

(D). BAΣIΛEΩΣ AΛEΞANΔ . . . Anchor.

℞. Star.

Alexandra.

BAΣIΛIΣ AΛEΞANΔ Anchor.

℞. Star: within the rays nearly-effaced Hebrew inscription.

Hyrcanus (no coins).
Aristobulus (no coins).
Hyrcanus restored (no coins).
Oligarchy (no coins).
Aristobulus and *Alexander* (no coins).
Hyrcanus again restored (no coins).

Antigonus.

. ΠΟNOY (BAΣIΛEΩΣ ANTIΓONOY) around a crown.

℞. מתתיה חכהן הגדל מתתי
"Mattathiah the high-priest"? Æ. W.

This arrangement is certainly the most satisfactory that has been yet proposed, but it presents serious difficulties. The most obvious of these is the absence of coins of Simon, for whose money we have more reason to look than for that of any other Jewish ruler. M. de Saulcy's suggestion that we may some day find his coins is a scarcely satisfactory answer, for this would imply that he struck very few coins, whereas all the other princes in the list, Judas only excepted, struck many, judging from those found. That Judas should have struck but few coins is extremely pro-

bable from the unsettled state of the country during his rule; but the prosperous government of Simon seems to require a large issue of money. A second difficulty is that the series of small copper coins, having the same, or essentially the same, reverse-type, commences with Judas, and should rather commence with Simon. A third difficulty is that Judas bears the title of priest, and probably of high-priest, for the word גלול is extremely doubtful, and the extraordinary variations and blunders in the inscriptions of these copper coins make it more probable that גדול is the term, whereas it is extremely doubtful that he took the office of high-priest. It is, however, just possible that he may have taken an inferior title, while acting as high-priest during the lifetime of Alcimus. These objections are, however, all trifling in comparison with one that seems never to have struck any inquirer. These small copper coins have for the main part of their reverse-type a Greek symbol, the united cornua copiae, and they therefore distinctly belong to a period of Greek influence. Is it possible that Judas the Maccabee, the restorer of the Jewish worship, and the sworn enemy of all heathen customs, could have struck money with a type derived from the heathen, and used by at least one of the hated family that then oppressed Israel, a type connected with idolatry, and to a Jew as forbidden as any other of the representations on the coins of the Gentiles? It seems to us that this is an impossibility, and that the use of such a type points to the time when prosperity had corrupted the ruling family and Greek usages once more were powerful in their influence. This period may be considered to commence in the rule of John Hyrcanus, whose adoption of foreign customs is evident in the naming of his sons far more than in the policy he followed. If we examine the whole series, the coins bearing the name of "John the high-priest" are the best in execution, and therefore have some claim to be considered the earliest.

It is important to endeavour to trace the origin of the type which we are discussing. The two cornua copiae first occur on the Egyptian coins, and indicate two sovereigns. In the money of the Seleucidae the type probably originated at a marriage with an Egyptian princess. The cornua copiae, as represented on the Jewish coins, are first found, as far as we are aware, on a coin of Alexander II., Zebina (B.C. 128-122), who, be it recollected, was set up by Ptolemy Physcon. The type occurs, however, in a different form on the unique tetradrachm of Cleopatra, ruling alone, in the British Museum, but it may have been adopted on her marriage with Alexander I., Balas (B.C. 150). Yet even this earlier date is after the rule of Judas (B.C. 167-161), and in the midst of that of Jonathan; and Alexander Zebina was contemporary with John Hyrcanus. We have seen that Alexander Jannaeus (B.C. 105-78) seems to have followed a type of Antiochus VII., Sidetes, of which there are coins dated B.C. 132-131.

Thus far there is high probability that M. de Saulcy's attributions before John Hyrcanus are extremely doubtful. This probability has been almost changed to certainty by a discovery the writer has recently had the good fortune to make. The acute Barthelemy mentions a coin of "Jonathan the high-priest," on which he perceived traces of the words ΒΑΣΙΛΕΩΣ ΑΛΕΞΑΝΔΡΟΥ, and he accordingly conjectures that these coins are of the same class as the bilingual ones of Alexander Jannaeus, holding them both to be of Jonathan, and the latter to mark the close alliance between that ruler and Alexander I. Balas. An examination of the money of Jonathan the high-priest has led us to the discovery that many of his coins are restruck, that some of these restruck coins exhibit traces of Greek inscriptions, showing the original pieces to be probably of the class attributed to Alexander Jannaeus by M. de Saulcy, and that one of the latter distinctly bears the letters ΑΝΔΙ. Υ [ΑΛΕΞΑΝΔΡΟΥ]. The two impressions of restruck coins are in general of closely consecutive dates, the object of restriking having usually been to destroy an obnoxious coinage. That this was the motive in the present instance appears from the large number of restruck coins among those with the name of Jonathan the high-priest, whereas we know of no other restruck Jewish coins, and from the change in the style from Jonathan the king to Jonathan the high-priest.

Under these circumstances but two attributions of the bilingual coins, upon which everything depends, can be entertained, either that they are of Jonathan the Maccabee in alliance with Alexander I. Balas, or that they are of Alexander Jannaeus, the Jewish prince having, in either case, changed his coinage. We learn from the case of Antigonus that double names were not unknown in the family of the Maccabees. To the former attribution there are the following objections. 1. On the bilingual coins the title Jonathan the king corresponds to Alexander the king, implying that the same prince is intended, or two princes of equal rank. 2. Although Alexander I. Balas sent presents of a royal character to Jonathan, it is extremely unlikely that the Jewish prince would have taken the regal title, or that the king of Syria would have actually granted it. 3. The Greek coins of Jewish fabric with the inscription Alexander the king, would have to be assigned to the Syrian Alexander I., instead of the Jewish king of the same name. 4. It would be most strange if Jonathan should have first struck coins with Alexander I., and then cancelled that coinage and issued a fresh Hebrew coinage of his own and Greek of the Syrian king, the whole series moreover, excepting those with only the Hebrew inscription having been issued within the years B.C. 153-146, eight out of the nineteen of Jonathan's rule. 5. The reign of Alexander Jannaeus would be unrepresented in the coinage. To the second attribution there is this objection, that it is unlikely that Alexander Jannaeus would have changed the title of king for that of high-priest; but to this it may be replied, that his quarrel with the Pharisees with reference to his performing the duties of the latter office, the turning-point of his reign, might have made him abandon the recent kingly title and recur to the sacerdotal, already used on his father's coins, for the Hebrew currency, while probably still issuing a Greek coinage with the regal title. On these grounds, therefore, we maintain Bayer's opinion that the Jewish coinage begins with Simon, we transfer the coins of Jonathan the high-priest to Alexander Jannaeus, and propose the following arrangement of the known money of the princes of the period we have been just considering

John Hyrcanus, B.C. 135-106.

Copper coins, with Hebrew inscription, "John the high-priest;" on some A, marking alliance with Antiochus VII., Sidetes.

Aristobulus and Antigonus, B.C. 106-105.

(Probable Attribution.)

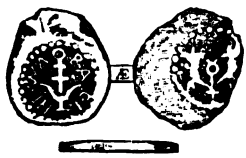
Copper coins, with Hebrew inscription, "Judah the *high* (?) priest;" copper coins with Greek inscription, "Judah the king," and A. for Antigonus? M. de Saulcy supposes that Aristobulus bore the Hebrew name Judah, and there is certainly some probability in the conjecture, though the classification of these coins cannot be regarded as more than tentative.

Alexander Jannaeus, B.C. 105-78.

First coinage: copper coins with bilingual inscriptions—Greek, "Alexander the king;" Hebrew, "Jonathan the king."

Second coinage: copper coins with Hebrew inscription, "Jonathan the high-priest;" and copper coins with Greek inscription, "Alexander the king." (The assigning of these latter two to the same ruler is confirmed by the occurrence of Hebrew coins of "Judah the high-priest," and Greek ones of "Judas the king," which there is good reason to attribute to one and the same person.)

Alexandra, B.C. 78-69.



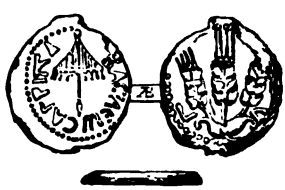
The coin assigned to Alexandra by M. de Saulcy may be of this sovereign, but those of Alexander are so frequently blundered that we are not certain that it was not struck by him.

Hyrcanus, B.C. 69-66 (no coins).
Aristobulus, B.C. 66-63 (no coins).
Hyrcanus restored, B.C. 63-57 (no coins).
Oligarchy, B.C. 57-47 (no coins).
Aristobulus and *Alexander*, B.C. 49 (no coins).
Hyrcanus again, B.C. 47-40 (no coins).
Antigonus, B.C. 40-37. Copper coins, with bilingual inscriptions.

It must be observed that the whole period unrepresented in our classification is no more than twenty-nine years, only two years in excess of the length of the reign of Alexander Jannaeus, that it was a very troublous time, and that Hyrcanus, whose rule occupied more than half the period, was so weak a man that it is extremely likely that he would have neglected to issue a coinage. It is possible that some of the doubtful small pieces are of this unrepresented time, but at present we cannot even conjecturally attribute any.

It is not necessary to describe in detail the money of the time commencing with the reign of Herod and closing under Hadrian. We must, however, speak of the coinage generally, of the references to it in the N. T., and of two important classes—the money attributed to the revolt preceding the fall of Jerusalem, and that of the famous Barkokab.

The money of Herod is abundant, but of inferior interest to the earlier coinage, from its generally having a thoroughly Greek character. It is of copper only, and seems to be of three denominations, the smallest being apparently a piece of brass (χαλκοῦς), the next larger its double (δίχαλκος), and the largest its triple (τρίχαλκος), as M. de Saulcy has ingeniously suggested. The smallest is the commonest, and appears to be the farthing of the N. T. The coin engraved below is of the smallest denomination of these: it may be thus described:—



HPWΔ BACI. Anchor.

℞ Two cornua copiae, within which a caduceus (degraded from pomegranate). Æ. W.

We have chosen this specimen from its remarkable relation to the coinage of Alexander Jannaeus, which makes it probable that the latter was still current money in Herod's time, having been abundantly issued, and so tends to explain the seeming neglect to coin in the period from Alexander or Alexandra to Antigonus.

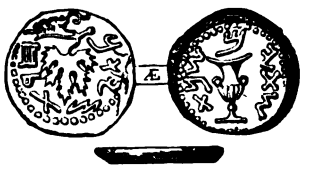
The money of Herod Archelaus, and the similar coinage of the Greek Imperial class, of Roman rulers with Greek inscriptions, issued by the procurators of Judaea under the emperors from Augustus to Nero, present no remarkable peculiarities, nor do the coins attributed by M. de Saulcy to Agrippa I., but possibly of Agrippa II. We engrave a specimen of the money last mentioned to illustrate this class.

BAΣIΛEWC AΓPIΠA. State umbrella.

℞ Corn-stalk bearing three ears of bearded wheat. L S Year 6. Æ.

There are several passages in the Gospels which throw light upon the coinage of the time. When the twelve were sent forth Our Lord thus commanded them, "Provide neither gold, nor silver, nor brass in your purses" (lit. "girdles"), Matt. x. 9. In the parallel passages in St. Mark (vi. 8), copper alone is mentioned for money, the Palestinian currency being mainly of this metal, although silver was coined by some cities of Phoenicia and Syria, and gold and silver Roman money was also in use. St. Luke, however, uses the term "money," ἀργύριον (ix. 3), which may be accounted for by his less Hebraistic style.

The coins mentioned by the Evangelists, and first those of silver, are the following:—the *stater* is spoken of in the account of the miracle of the tribute money. The receivers of *didrachms* demanded the tribute, but St. Peter found in the fish a *stater*, which he paid for our Lord and himself (Matt. xvii. 24-27). This stater was therefore a tetradrachm, and it is very noteworthy that at this period almost the only Greek Imperial silver coin in the East was a tetradrachm, the didrachm being probably unknown, or very little coined.



The *didrachm* is mentioned as a money of account in the passage above cited, as the equivalent of the Hebrew shekel. [SHEKEL.]

The *denarius*, or Roman penny, as well as the Greek *drachm*, then of about the same weight, are spoken of as current coins. There can be little doubt that the latter is merely employed as another name for the former. In the famous passages respecting the tribute to Caesar, the Roman denari is of

the time is correctly described (Matt. xxii. 15-21; Luke xx. 19-25). It bears the head of Tiberius, who has the title Caesar in the accompanying inscription, most later emperors having, after their accession, the title Augustus: here again therefore we have an evidence of the date of the Gospels. [DENARIUS; DRACHM.]

Of copper coins the farthing and its half, the mite, are spoken of, and these probably formed the chief native currency. [FARTHING; MITE.]

To the revolt of the Jews, which ended in the capture and destruction of Jerusalem, M. de Saulcy assigns some remarkable coins, one of which is represented in the cut beneath.

חרתציון, "The liberty of Zion." Vine-stalk, with leaf and tendril.

℟ שנת שתים. "Year two." Vase. Æ.

There are other pieces of the year following, which slightly vary in their reverse-type, if indeed we be right in considering the side with the date to be the reverse.

Same obverse.

℟ שנת שלש. "Year three." Vase with cover.

M. de Saulcy remarks on these pieces:—"De ces deux monnaies, celle de l'an III. est incomparablement plus rare que celle de l'an II. Cela tient probablement à ce que la liberté des Juifs était à son apogée dans la deuxième année de la guerre judaïque, et déjà à son déclin dans l'année troisième. Les pièces analogues des années I. et IV. manquent, et cela doit être. Dans la première année de la guerre judaïque, l'autonomie ne fut pas retablie à Jerusalem; et dans la quatrième année l'anarchie et les divisions intestines avaient déjà préparé et facilité à Titus la conquête qu'il avait entreprise" (p. 154).

The subjugation of Judaea was not alone signalised by the issue of the famous Roman coins with the inscription IVDAEA CAPTA, but by that of similar Greek Imperial coins in Judaea of Titus, one of which may be thus described:—

ΑΥΤΟΚΡ ΤΙΤΟΣ ΚΑΙΣΑΡ. Head of Titus, laureate, to the right.

℟ ΙΟΥΔΑΙΑΣ ΕΑΛΩΚΥΙΑΣ. Victory, to the right, writing upon a shield: before her a palm-tree. Æ.

The proper Jewish series closes with the money of the famous Barkokab, who headed the revolt in the time of Hadrian. His most important coins are shekels, of which we here engrave one.

לחרות ירושלם. "Of the deliverance of Jerusalem." Bunch of fruits?

℟ שמעון. "Simeon." Tetrastyle temple: above which star. *Æ*. B. M. (Shekel.)

The half-shekel is not known, but the quarter, which is simply a restruck denarius is common. The specimen represented below shows traces of the old types of a denarius of Trajan on both sides.

שמעון. "Simeon." Bunch of grapes.

℟ לחרותירושלם. "Of the deliverance of Jerusalem." Two trumpets. *Æ*. B. M.

The denarius of this time was so nearly a quarter of a shekel, that it could be used for it without occasioning any difficulty in the coinage. The copper coins of Barkokab are numerous, and like his silver pieces, have a clear reference to the money of Simon the Maccabee. It is indeed possible that the name Simon is not that of Barkokab, whom we know only by his surnames, but that of the earlier ruler, employed here to recall the foundation of Jewish autonomy. What high importance was attached to the issue of money by the Jews, is evident from the whole history of their coinage.

The money of Jerusalem, as the Roman Colonia Ælia Capitolina, has no interest here, and we conclude this article with the last coinage of an independent Jewish chief.

The chief works on Jewish coins are Barclay's treatise *De Numis Hebræo-Samaritanis*; De Saulcy's *Numismatique Judaïque*; Cavedoni's *Numismatica Biblica*, of which there is a translation under the title *Biblische Numismatik*, by A. von Werlhof, with large additions. Since writing this article we find that the translator had previously come to the conclusion that the coins attributed by M. de Saulcy to Judas Maccabæus are of Aristobulus, and that Jonathan the high-priest is Alexander Jannæus. We have to express our sincere obligations to Mr. Wigan for permission to examine his valuable collection, and have specimens drawn for this article. [R. S. P.]

MONEY-CHANGERS (κολλυβισταί, Matt. xxi. 12; Mark xi. 15; John ii. 15). According to Ex. xxx. 13-15, every Israelite, whether rich or poor, who had reached or passed the age of twenty, must pay into the sacred treasury, whenever the nation was numbered, a half-shekel as an offering to Jehovah. Maimonides (*Shekal.* cap. 1) says that this was to be paid annually, and that even paupers were not exempt. The Talmud exempts priests and women. The tribute must in every case be paid in coin of the exact Hebrew half-shekel, about 1s. 6d. sterling of English money. The premium for obtaining by exchange of other money the half-shekel of Hebrew coin, according to the Talmud, was a κόλλυβος (*collybus*), and hence the money-broker who made the exchange was called κολλυβιστής. The *collybus*, according to the same authority, was equal in value to a silver *obolus*, which has a weight of 12 grains, and its money value is about 1½*d.* sterling. The money-changers (κολλυβισταί) whom Christ for their impiety, avarice, and fraudulent dealing, ex

pelled from the Temple, were the dealers who supplied half-shekels, for such a premium as they might be able to exact, to the Jews from all parts of the world, who assembled at Jerusalem during the great festivals, and were required to pay their tribute or ransom money in the Hebrew coin; and also for other purposes of exchange, such as would be necessary in so great a resort of foreign residents to the ecclesiastical metropolis. The word τραπεζίτης (*trapezites*), which we find in Matt. xxv. 29, is a general term for banker or broker. Of this branch of business we find traces very early both in the Oriental and classical literature (comp. Matt. xvii. 24-27: see Lightfoot, *Hor. Heb.* on Matt. xxi. 12; Buxtorf, *Lex. Talm.* 2032). [C. E. S.]

MONTH (חֹדֶשׁ; יֶרַח). The terms for "month" and "moon" have the same close connexion in the Hebrew language, as in our own and in the Indo-European languages generally; we need only instance the familiar cases of the Greek μήν and μήνη, and the Latin *mensis*; the German *mond* and *monat*; and the Sanscrit *mâsa*, which answers to both month and moon. The Hebrew *chodesh*, is perhaps more distinctive than the corresponding terms in other languages; for it expresses not simply the idea of a *lunation*, but the recurrence of a period commencing definitely with the *new moon*; it is derived from the word *châdâsh*, "new," which was transferred in the first instance to the "new moon," and in the second instance to the "month," or as it is sometimes more fully expressed, חֹדֶשׁ יָמִים, "a month of days" (Gen. xxix. 14; Num. xi. 20, 21; comp. Deut. xxi. 13; 2 K. xv. 13). The term *yareach* is derived from *yâreach*, "the moon;" it occurs occasionally in the historical (Ex. ii. 2; 1 K. v. 37, 38, viii. 2; 2 K. xv. 13), but more frequently in the poetical portions of the Bible.

The most important point in connexion with the month of the Hebrews is its length, and the mode by which it was calculated. The difficulties attending this enquiry are considerable in consequence of the scantiness of the *data*. Though it may fairly be presumed from the terms used that the month originally corresponded to a lunation, no reliance can be placed on the mere verbal argument to prove the exact length of the month in historical times. The word appears even in the earliest times to have passed into its secondary sense, as describing a period approaching to a lunation; for, in Gen. vii. 11, viii. 4, where we first meet with it, equal periods of 30 days are described, the interval between the 17th days of the second and the seventh months being equal to 150 days (Gen. vii. 11, viii. 3, 4). We have therefore in this instance an approximation to the solar month, and as, in addition to this, an allusion of a double calculation by a solar and a lunar year has been detected in a subsequent date (far from viii. 14 compared with vii. 11, we find that the total duration of the flood exceeded the year by eleven days, in other words by the precise difference between the lunar year of 354 days and the solar one of 365 days), the passage has attracted considerable attention on the part of certain critics, who have endeavoured to deduce from it arguments prejudicial to the originality of the Biblical narrative. It has been urged that the Hebrews themselves knew nothing of a solar month, that they must have derived their knowledge of it from a more easterly nations (Ewald, *Jahrbüch.* 1854, p. 9), and consequently that the materials for the narrative, and the date of its composition must be referred to the period when close intercourse existed between the Hebrews and the Babylonians (Von Bohlen's *Introd. to Gen.* ii. 155 ff.) It is unnecessary for us to discuss in detail the arguments on which these conclusions are founded; we submit in answer to them that the *data* are insufficient to form any decided opinion at all on the matter, and that a more obvious explanation of the matter is to be found in the Egyptian system of months. To prove the first of these points, it will be only necessary to state the various calculations founded on this passage: it has been deduced from it (1) that there were 12 months of 30 days each [CHRONOLOGY]: (2) that there were 12 months of 30 days with 5 intercalated days at the end to make up the solar year (Ewald, *l. c.*); (3) that there were 7 months of 30 days, and 5 of 31 days (Von Bohlen); (4) that there were 5 months of 30 days, and 7 of 29 days (Knobel, *in Gen.* viii. 1-3): or, lastly, it is possible to cut away the foundation of any calculation whatever by assuming that a period might have elapsed between the termination of the 150 days and the 17th day of the 7th month (Ideler, *Chronol.* i. 70). But, assuming that the narrative implies equal months of 30 days, and that the date given in viii. 14, does involve the fact of a double calculation by a solar and a lunar year, it is unnecessary to refer to the Babylonians for a solution of the difficulty. The month of 30 days was in use among the Egyptians at a period long anterior to the period of the exodus, and formed the basis of their computation either by an unintercalated year of 360 days or an intercalated one of 365 (Rawlinson's *Herodotus*, ii. 283-286). Indeed, the Bible itself furnishes us with an indication of a double year, solar and lunar, in that it assigns the regulation of its length indifferently to both sun and moon (Gen. i. 14). [YEAR.]

From the time of the institution of the Mosaic law downwards the month appears to have been a lunar one. The cycle of religious feasts, commencing with the Passover, depended not simply on the month, but on the moon (Joseph. *Ant.* iii. 10, §5); the 14th of Abib was coincident with the full moon (Philo, *Vit. Mos.* iii. p. 686); and the new moons themselves were the occasions of regular festivals (Num. x. 10, xxviii. 11-14). The statements of the Talmudists (Mishna, *Rosh hash.* 1-3) are decisive as to the practice in their time, and the lunar month is observed by the modern Jews. The commencement of the month was generally decided by observation of the new moon, which may be detected about forty hours after the period of its conjunction with the sun: in the later times of Jewish history this was effected according to strict rule, the appearance of the new moon being reported by competent witnesses to the local authorities, who then officially announced the commencement of the new month by the twice repeated word, "Mekûdash," i. e. *consecrated*.

According to the Rabbinical rule, however, there must at all times have been a little uncertainty beforehand as to the exact day on which the month would begin; for it depended not only on the appearance, but on the announcement: if the important word *Mekûdash* were not pronounced until after dark, the following day was the first of the month; if before dark, then that day (*Rosh hash.* 3, §1). But we can hardly suppose that such a strict rule of observation prevailed in early times, nor was it in any way necessary; the recurrence of the new moon can be predicted with considerable accuracy

by a calculation of the interval that would elapse either from the last new moon, from the full moon (which can be detected by a practised eye), or from the disappearance of the waning moon. Hence, David announces definitely "To-morrow is the new moon," that being the first of the month (1 Sam. xx. 5, 24, 27) though the new moon could not have been as yet observed, and still less announced.[a] The length of the month by observation would be alternately 29 and 30 days, nor was it allowed by the Talmudists that a month should fall short of the former or exceed the latter number, whatever might be the state of the weather. The months containing only 29 days were termed in Talmudical language *chásar*, or "deficient," and those with 30 *málé*, or "full."

The usual number of months in a year was twelve, as implied in 1 K. iv. 7; 1 Chr. xxvii. 1-15, but inasmuch as the Hebrew months coincided, as we shall presently show, with the seasons, it follows as a matter of course that an additional month must have been inserted about every third year, which would bring the number up to thirteen. No notice, however, is taken of this month in the Bible. We have no reason to think that the intercalary month was inserted according to any exact rule; it was sufficient for practical purposes to add it whenever it was discovered that the barley harvest did not coincide with the ordinary return of the month of Abib. In the modern Jewish calendar the intercalary month is introduced seven times in every 19 years, according to the Metonic cycle, which was adopted by the Jews about A.D. 360 (Prideaux's *Connection*, i. 209 note). At the same time the length of the synodical month was fixed by R. Hillel at 29 days, 12 hours, 44 min., 3⅓ sec., which accords very nearly with the truth.

The usual method of designating the months was by their numerical order, *e. g.* "the second month" (Gen. vii. 11), "the fourth month" (2 K. xxv. 3); and this was generally retained even when the names were given, *e. g.* "in the month Zif, which is the second month" (1 K. vi. 1), "in the third month, that is, the month Sivan" (Esth. viii. 9). An exception occurs, however, in regard to Abib[b] in the early portion of the Bible (Ex. xiii. 4, xxiii. 15; Deut. xvi. 1), which is always mentioned by name alone, inasmuch as it was necessarily coincident with a certain season, while the numerical order might have changed from year to year. The practice of the writers of the post-Babylonian period in this respect varied: Ezra, Esther, and Zechariah specify both the names and the numerical order; Nehemiah only the former; Daniel and Haggai only the latter. The names of the months belong to two distinct periods; in the first place we have those peculiar to the period of Jewish independence, of which four only, even including Abib, which we hardly regard as a proper name, are mentioned, viz.: Abib, in which the Passover fell (Ex. xiii. 4, xxiii. 15, xxxiv. 18; Deut. xvi. 1), and which was established as the first month in commemoration of the exodus (Ex. xii. 2); Zif, the second month (1 K. vi. 1, 37); Bul, the eighth (1 K. vi. 38; and Ethanim, the seventh (1 K. viii. 2)—the three latter being noticed only in connection with the building and dedication of the Temple, so that we might almost infer that their use was restricted to the official documents of the day, and that they never attained the popular use which the later names had. Hence it is not difficult to account for their having been superseded. In the second place we have the names which prevailed subsequently to the Babylonish captivity; of these the following seven appear in the Bible:—Nisan, the first, in which the passover was held (Neh. ii. 1; Esth. iii. 7); Sivan, the third (Esth. viii. 9; Bar. i. 8); Elul, the sixth (Neh. vi. 15; 1 Macc. xiv. 27); Chisleu, the ninth (Neh. i. 1; Zech. vii. 1; 1 Macc. i. 54); Tebeth, the tenth (Esth. ii. 16); Sebat, the eleventh (Zech. i. 7; 1 Macc. xvi. 14); and Adar, the twelfth (Esth. iii. 7, viii. 12; 2 Macc. xv. 36). The names of the remaining five occur in the Talmud and other works; they were Iyar, the second (Targum, 2 Chr. xxx. 2); Tammuz, the fourth (Mishn. *Taan.* 4, §5); Ab, the fifth, and Tisri, the seventh (*Rosh hash.* 1, §3); and Marcheshvan, the eighth (*Taan.* 1, §3; Joseph. *Ant.* i. 3, §3). The name of the intercalary month was Veadar,[c] *i. e.* the *additional* Adar.

The first of these series of names is of Hebrew origin, and has reference to the characteristics of the seasons—a circumstance which clearly shows that the months returned at the same period of the year, in other words, that the Jewish year was a solar one. Thus Abib[d] was the month of "ears of corn," Zif[e] the month of "blossom," and Bul[f] the month of "rain." With regard to Ethanim[g] there may be some doubt, as the usual explanation, "the month of violent or, rather, incessant rain" is decidedly inappropriate to the seventh month. With regard to the second series, both the origin and the meaning of the name is controverted. It was the opinion of the Talmudists that the names were introduced by the Jews who returned from the Babylonish captivity (Jerusalem Talmud,

[a] Jahn (*Ant.* iii. 3, §352) regards the discrepancy of the dates in 2 K. xxv. 27, and Jer. lii. 31, as originating in the different modes of computing, by astronomical calculation and by observation. It is more probable that it arises from a mistake of a copyist, substituting ך for ן, as a similar discrepancy exists in 2 K. xxv. 19 and Jer. lii. 25, without admitting of a similar explanation.

[b] We doubt indeed whether Abib was really a proper name. In the first place it is always accompanied by the article, "*the* Abib;" in the second place, it appears almost impossible that it could have been superseded by Nisan, if it had been regarded as a proper name, considering the important associations connected with it.

[c] The name of the intercalary month originated in its position in the calendar after Adar and before Nisan. The opinion of Ideler (*Chronol.* i. 539), that the first Adar was regarded as the intercalary month, because the feast of Purim was held in Veadar in the intercalary year, has little foundation.

[d] אָבִיב [See CHRONOLOGY.]

[e] זִיו or זִיו, or, more fully, as in the Targum, זִיו צִנְיָנָא, "the bloom of flowers." Another explanation is given in Rawlinson's *Herodotus*, i. 622; viz. that Ziv is the same as the Assyrian *Giv*, "bull," and answers to the zodiacal sign of Taurus.

[f] בּוּל. The name occurs in a recently discovered Phoenician inscription (Ewald, *Jahrb.* 1856, p. 136). A cognate term, מַבּוּל, is used for the "deluge" (Gen. vi. 17, &c.); but there is no ground for the inference drawn by Von Bohlen (*Introd. to Gen.* ii. 156), that there is any allusion to the month Bul.

[g] Thenius on 1 K. viii. 2, suggests that the true name was אֶתְנִים, as in the LXX. Ἀθανείμ, and that its meaning was the "month of gifts," *i. e.*, of fruit, from תֵּת "to give." There is the same peculiarity in this as in Abib, viz., the addition of the definite article.

Mish Aasè. 1, §1), and they are certainly used exclusively by writers of the post-Babylonian period. It was, therefore, perhaps natural to seek for their origin in the Persian language, and this was done some years since by Benfey (*Monatsnamen*) in a manner more ingenious than satisfactory. The view, though accepted to a certain extent by Gesenius in his *Thesaurus*, has been since abandoned, both on philological grounds and because it meets with no confirmation from the monumental documents of ancient Persia.[h] The names are probably borrowed from the Syrians,[i] in whose regular calendar we find names answering to Tisri, Sebat, Adar, Nisan, Iyar, Tammuz, Ab, and Elul (Ideler, *Chronol.* i. 430), while Chisleu and Tebeth[k] appear on the Palmyrene inscriptions (Gesen. *Thesaur.* pp. 702, 543). Sivan may be borrowed from the Assyrians, who appear to have had a month so named, sacred to Sin or the moon (Rawlinson, i. 615). Marcheshvan, coinciding as it did with the rainy season in Palestine, was probably a purely Hebrew[m] term. With regard to the meaning of the Syrian names we can only conjecture from the case of Tammuz, which undoubtedly refers to the festival of the deity of that name mentioned in Ez. viii. 14, that some of them may have been derived from the names of deities.[n] Hebrew roots are suggested by Gesenius for others, but without much confidence.[o]

Subsequently to the establishment of the Syro-Macedonian empire, the use of the Macedonian calendar was gradually adopted for purposes of literature or intercommunication with other countries. Josephus, for instance, constantly uses the Macedonian months, even where he gives the Hebrew names (*e. g.* in *Ant.* i, 3, §3, he identifies Marcheshvan with Dius, and Nisan with Xanthicus, and in xii. 7, §6, Chisleu with Appellaeus). The only instance in which the Macedonian names appear in the Bible is in 2 Macc. xi. 30, 33, 38, where we have notice of Xanthicus in combination with another named Dioscorinthius (ver. 21), which does not appear in the Macedonian calendar. Various explanations have been offered in respect to the latter. Any attempt to connect it with the Macedonian Dius fails on account of the interval being too long to suit the narrative, Dius being the first and Xanthicus the sixth month. The opinion of Scaliger (*Emend. Temp.* ii. 94), that it was the Macedonian intercalary month, rests on no foundation whatever, and Ideler's assumption that that intercalary month preceded Xanthicus must be rejected along with it (*Chronol.* i. 399). It is most probable that the author of 2 Macc. or a copyist was familiar with the Cretan calendar, which contained a month named Dioscurus, holding the same place in the calendar as the Macedonian Dystrus (Ideler, i. 426), *i. e.* immediately before Xanthicus, and that he substituted one for the other. This view derives some confirmation from the Vulgate rendering, *Dioscorus*. We have further to notice the reference to the Egyptian calendar in 3 Macc. vi. 38, Pachon and Epiphi in that passage answering to Pachons and Epep, the ninth and eleventh months (Wilkinson, *Anc. Egyp.* i. 14, 2nd ser.).

The identification of the Jewish months with our own cannot be effected with precision on account of the variations that must inevitably exist between the lunar and the solar month, each of the former ranging over portions of two of the latter. It must, therefore, be understood that the following remarks apply to the general identity on an average of years. As the Jews still retain the names Nisan, &c., it may appear at first sight needless to do more than refer the reader to a modern almanack, and this would have been the case if it were not evident that the modern Nisan does not correspond to the ancient one. At present Nisan answers to March, but in early times it coincided with April; for the barley harvest—the first fruits of which were to be presented on the 15th of that month (Lev. xxiii. 10)—does not take place even in the warm district about Jericho until the middle of April, and in the upland districts not before the end of that month (Robinson's *Researches*, i. 551, iii. 102, 145). To the same effect Josephus (*Ant.* ii. 14, §6) synchronizes Nisan with the Egyptian Pharmuth, which commenced on the 27th of March (Wilkinson, *l. c.*), and with the Macedonian Xanthicus, which answers generally to the early part of April, though considerable variation occurs in the local calendars as to its place (comp. Ideler, i. 435, 442). He further informs us (iii. 10, §5) that the Passover took place when the sun was in Aries, which it does not enter until near the end of March. Assuming from these data that Abib or Nisan answers to April, then Zif or Iyar would correspond with May, Sivan with June, Tammuz with July, Ab with August, Elul with September. Ethanim or Tisri with October, Bul or Marcheshvan with November, Chisleu with December, Tebeth with January, Sebat with February, and Adar with March. [W. L. B.]

MOON (יָרֵחַ; לְבָנָה). It is worthy of observation that neither of the terms by which the Hebrews designated the moon, contains any reference to its office or essential character; they simply describe it by the accidental quality of colour, *yârêach*, signifying "pale," or "yellow," *lebânâh*,[p]

[h] The names of the months, as read on the Behistun inscriptions, *Garmapada*, *Bagayadish*, *Atriyata*, &c., bear no resemblance to the Hebrew names (Rawlinson's *Herodotus*, ii. 593-6).

[i] The names of the months appear to have been in many instances of *local* use: for instance, the calendar of Hierapolis contains the names of Ag and Gelon (Ideler, i. 440) which do not appear in the regular Syrian calendar, while that of Palmyra, again, contains names unknown to either.

[k] The resemblance in sound between Tebeth and the Egyptian Tobi, as well as its correspondence in the order of the months, was noticed by Jerome, *ad Ez.* xxxix. 1.

[m] Von Bohlen connects it with the root *râchash* (רָחַשׁ) "to boil over" (*Introd. to Gen.* ii. 156). The modern Jews consider it a compound word, *mar*, "drop," and *Cheshvan*, the former betokening that it was wet, and the latter being the proper name of the month (De Sola's *Mishna*, p. 168 note).

[n] We draw notice to the similarity between Elul and the Arabic name of Venus Uranie, *Alil-at* (Herod. iii. 8); and again between Adar, the Egyptian Athor, and the Syrian Atar-gatis.

[o] The Hebrew forms of the names are:—אָבִיב, נִיסָן, זִו, אִיָּר, סִיוָן, תַּמּוּז, אָב, אֱלוּל, מַרְחֶשְׁוָן, כִּסְלֵו, טֵבֵת, שְׁבָט, אֲדָר, and וְאֲדָר.

[p] The term *lebânâh* occurs only three times in the Bible (Cant. vi. 10; Is. xxiv. 23, xxx. 26). Another explanation of the term is proposed in Rawlinson's *Herodotus* i. 615, to the effect that it has reference to *lebênâh*, "a brick," and embodies the Babylonian notion of *Sin*, the

"white." The Indo-European languages recognized the moon as the measurer of time, and have expressed its office in this respect, all the terms applied to it, *μην*, *moon*, &c., finding a common element with *μετρεῖν*, to measure, in the Sanscrit root *ma* (Pott's *Etym. Forsch.* i. 194). The nations with whom the Hebrews were brought into more immediate contact worshipped the moon under various designations expressive of its influence in the kingdom of nature. The exception which the Hebrew language thus presents would appear to be based on the repugnance to nature-worship, which runs through their whole system, and which induced the precautionary measure of giving it in reality no name at all, substituting the circuitous expressions "lesser light" (Gen. i. 16), the "pale," or the "white." The same tendency to avoid the notion of personality may perhaps be observed in the indifference to gender, *yârêach* being masculine, and *lebânâh* feminine.

The moon held an important place in the kingdom of nature, as known to the Hebrews. In the history of the creation (Gen. i. 14-16), it appears simultaneously with the sun, and is described in terms which imply its independence of that body as far as its light is concerned. Conjointly with the sun, it was appointed "for signs and for seasons, and for days and years;" though in this respect it exercised a more important influence, if by the "seasons" we understand the great religious festivals of the Jews, as is particularly stated in Ps. civ. 19 ("He appointed the moon for seasons"), and more at length in Ecclus. xliii. 6, 7. Besides this, it had its special office in the distribution of light; it was appointed "to rule over the night," as the sun over the day, and thus the appearance of the two founts of light served "to divide between the day and between the night." In order to enter fully into this idea, we must remember both the greater brilliancy[b] of the moonlight in eastern countries, and the larger amount of work, particularly travelling, that is carried on by its aid. The appeals to sun and moon conjointly are hence more frequent in the literature of the Hebrews than they might otherwise have been (Josh. x. 12; Ps. lxxii. 5, 7, 17; Eccl. xii. 2; Is. xxiv. 23, &c.); in some instances, indeed, the moon receives a larger amount of attention than the sun (*e.g.* Ps. viii. 3, lxxxix. 37[c]). The inferiority of its light is occasionally noticed, as in Gen. i. 16; in Cant. vi. 10, where the epithets "fair," and "clear" (or rather *spotless*, and hence extremely brilliant) are applied respectively to moon and sun; and in Is. xxx. 26, where the equalizing of its light to that of the sun conveys an image of the highest glory. Its influence on vegetable or animal life receives but little notice; the expression in Deut. xxxiii. 14, which the A. V. refers to the moon, signifies rather *months* as the period of ripening fruits. The coldness of the night-dews is prejudicial to the health, and particularly to the eyes of those who are exposed to it, and the idea expressed in Ps. cxxi. 6 ("The moon shall not smite thee by night") may have reference to the general or the particular evil effect: blindness is still attributed to the influence of the moon's rays on those who sleep under the open heaven, both by the Arab (Carne's *Letters*, i. 88), and by Europeans. The connexion between the moon's phases and certain forms of disease, whether madness or epilepsy, is expressed in the Greek *σεληνιάζεσθαι* (Matt. iv. 24, xvii. 15), in the Latin derivative "lunatic," and in our "moon-struck."

The worship of the moon was extensively practised by the nations of the East, and under a variety of aspects. In Egypt it was honoured under the form of Isis, and was one of the only two deities which commanded the reverence of all the Egyptians (*Herod.* ii. 42, 47). In Syria it was represented by that one of the Ashtaroth (*i. e.* of the varieties which the goddess Astarte, or Ashtoreth, underwent), surnamed "Karnaim," from the horns of the crescent moon by which she was distinguished. [ASHTORETH.] In Babylonia, it formed one of a triad in conjunction with Aether, and the sun, and, under the name of Sin, received the honoured title of "Lord of the month," "King of the Gods," &c. (Rawlinson's *Herodotus*, i. 614.) There are indications of a very early introduction into the countries adjacent to Palestine of a species of worship distinct from any that we have hitherto noticed, viz. of the direct homage of the heavenly bodies, sun, moon, and stars, which is the characteristic of Sabianism. The first notice we have of this is in Job (xxxi. 26, 27), and it is observable that the warning of Moses (Deut. iv. 19) is directed against this nature-worship, rather than against the form of moon-worship, which the Israelites must have witnessed in Egypt. At a later period,[d] however, the worship of the moon in its grosser form of idol-worship was introduced from Syria: we have no evidence indeed that the Ashtoreth of the Zidonians, whom Solomon introduced (1 K. xi. 5), was identified in the minds of the Jews with the moon, but there can be no doubt that the moon was worshipped under the form of an image in Manasseh's reign, although Movers (*Phoenix.* i. 66, 164) has taken up the opposite view; for we are distinctly told that the king "made an *asherah* (A. V. "grove"), *i.e.* an *image* of Ashtoreth, and worshipped all the host of heaven" (2 K. xxi. 3), which *asherah* was destroyed by Josiah, and the priests that burned incense to the moon were put down (xxiii. 4, 5). At a somewhat later period the worship of the "queen of heaven" was practised in Palestine (Jer. vii. 18, xliv. 17); the title has been generally supposed to belong to the moon, but we think it more probable that the Oriental Venus is intended, for the following reasons: (1) the title of "Urania" or "heaven" was peculiarly appropriated to Venus, whose worship was borrowed by the Persians from the Arabians and Assyrians (*Herod.* i. 131, 199); (2) the votaries of this goddess, whose chief function

moon, as being the god of architecture. The strictly parallel use of *yârêach* in Joel ii. 31 and Ez. xxxii. 7, as well as the analogy in the sense of the two words, seems a strong argument against the view.

[b] The Greek *σελήνη*, from *σέλας*, expresses this idea of brilliancy more vividly than the Hebrew terms.

[c] In the former of these passages the sun may be included in the general expression "heavens" in the preceding verse. In the latter, "the faithful witness in heaven" is undoubtedly the moon, and not the rainbow as some explain it. The regularity of the moon's changes impressed the mind with a sense of durability and certainty; and hence the moon was specially qualified to be a witness to God's promise.

[d] The ambiguous expression of Hosea (v. 7), "Now shall a month devour them with their portions," is understood by Bunsen (*Bibelwerk*, in loc.) as referring to an idolatrous worship of the new moon. It is more generally understood of "a month" as a short space of time. Hitzig (*Comment.* in loc.) explains it in a novel manner of the crescent moon, as a symbol of destruction, from its resemblance to a scimitar.

is was to preside over births, were women, and we find that in Palestine the married women are specially noticed as taking a prominent part: (3) the peculiarity of the title, which occurs only in the passages quoted, looks as if the worship was a novel one; and this is corroborated by the term *cavvân*[a] applied to the "cakes," which is again so peculiar that the LXX. has retained it (*χαυών*), deeming it to be, as it not improbably was, a foreign word. Whether the Jews derived their knowledge of the "queen of heaven" from the Philistines, who possessed a very ancient temple of Venus Urania at Askalon (*Herod.* i. 105), or from the Egyptians, whose god Athor was of the same character, is uncertain.

In the figurative language of Scripture the moon is frequently noticed as presaging events of the greatest importance through the temporary or permanent withdrawal of its light (Is. xiii. 10; Joel ii. 31; Matt. xxiv. 29; Mark xiii. 24); in these and similar passages we have an evident allusion to the mysterious awe with which eclipses were viewed by the Hebrews in common with other nations of antiquity. With regard to the symbolic meaning of the moon in Rev. xii. 1, we have only to observe that the ordinary explanations, viz. the sublunary world, or the changeableness of its affairs, seem to derive no authority from the language of the O. T., or from the ideas of the Hebrews. [W. L. B.]

MOON, NEW. [NEW MOON.]

MOOSI'AS (*Μοοσίας*: *Moosias*). Apparently the same as MAASEIAH 4 (1 Esdr. ix. 31; comp. Ezr. x. 30).

MORASTHITE, THE (הַמּוֹרַשְׁתִּי; in Micah, הַמֹּרַשְׁתִּי: *ὁ μωραθείτης, ὁ τοῦ Μωραθεί*; Alex. in Micah, *Μωραθει*: *de Morasthi, Morasthites*), that is, the native of a place named MORESHETH, such being the regular formation in Hebrew.

It occurs twice (Jer. xxvi. 18; Mic. i. 1), each time as the description of the prophet MICAH.

The Targum, on each occasion, renders the word "of Mareshah;" but the derivation from Mareshah would be Mareshathite, and not Morasthite, or more accurately Morashtite. [G.]

MOR'DECAI (מָרְדֳּכַי: *Μαρδοχαῖος*: *Mardochæus*), the deliverer, under Divine Providence, of the Jews from the destruction plotted against them by Haman [ESTHER], the chief minister of Xerxes; the institutor of the feast of Purim [PURIM], and probably the author as well as the hero of the book of Esther, which is sometimes called the book of Mordecai.[b] The Scripture narrative tells us concerning him that he was a Benjamite, and one of the captivity, residing in Shushan, whether or not in the king's service before Esther was queen, does not appear certainly. From the time, however, of Esther being queen he was one of those "who sat in the king's gate." In this situation he saved the king's life by discovering the conspiracy of two of the eunuchs to kill him. When the decree for the massacre of all the Jews in the empire was known, it was at his earnest advice and exhortation that Esther undertook the perilous task of interceding with the king on their behalf. He might feel the more impelled to exert himself to save them, as he was himself the cause of the meditated destruction of his countrymen. Whether, as some think, his refusal to bow before Haman, arose from religious scruples, as if such salutation as was practised in Persia (*προσκύνησις*) were akin to idolatry, or whether, as seems far more probable, he refused from a stern unwillingness as a Jew to bow before an Amalekite, in either case the affront put by him upon Haman was the immediate cause of the fatal decree. Any how, he and Esther were the instruments in the hand of God of averting the threatened ruin. The concurrence of Esther's favourable reception by the king with the Providential circumstance of the passage in the Medo-Persian chronicles, which detailed Mordecai's fidelity in disclosing the conspiracy, being read to the king that very night, before Haman came to ask leave to hang him; the striking incident of Haman being made the instrument of the exaltation and honour of his most hated adversary, which he rightly interpreted as the presage of his own downfall, and finally the hanging of Haman and his sons upon the very gallows which he had reared for Mordecai, while Mordecai occupied Haman's post as vizier of the Persian monarchy; are incidents too well known to need to be further dwelt upon. It will be more useful, probably, to add such remarks as may tend to point out Mordecai's place in sacred, profane, and rabbinical history respectively. The first thing is to fix his date. This is pointed out with great particularity by the writer himself, not only by the years of the king's reign, but by his own genealogy in ch. ii. 5, 6. Some, however, have understood this passage as stating that Mordecai himself was taken captive with Jeconiah. But that any one who had been taken captive by Nebuchadnezzar in the 8th year of his reign should be vizier after the 12th year of any Persian king among the successors of Cyrus, is obviously impossible. Besides too, the absurdity of supposing the ordinary laws of human life to be suspended in the case of any person mentioned in Scripture, when the sacred history gives no such intimation, there is a peculiar defiance of probability in the supposition that the cousin germain of the youthful Esther, her father's brother's son, should be of an age ranging from 90 to 170 years, at the time that she was chosen to be queen on account of her youth and beauty. But not only is this interpretation of Esth. ii. 5, 6, excluded by chronology, but the rules of grammatical propriety equally point out, not Mordecai, but Kish, as being the person who was taken captive by Nebuchadnezzar at the time when Jeconiah was carried away. Because, if it had been intended to speak of Mordecai as led captive, the ambiguity would easily have been avoided by either placing the clause אֲשֶׁר הָגְלָה &c., immediately after בְּשׁוּשַׁן הַבִּירָה, and then adding his name and genealogy, וְשִׁמְעִי מ״, or else by writing וְהוּא instead of אֲשֶׁר, at the beginning of verse 6. Again, as the sentence stands, the distribution of the copulative וְ distinctly connects the sentence וַיְהִי אֹמֵן

[a] נְקִי.

[b] De Wette thinks that "the opinion that Mordecai wrote the book does not deserve to be confuted," although the author "designed that the book should be considered as written by Mordecai." His translator adds, that "the greatest part of the Jewish and Christian scholars" refer it to him. But he adds, "more modern writers, with better judgment, affirm only their ignorance of the authorship" (*Introd.* ii. 345-347). But the objections to Mordecai's authorship are only such as, if valid, would impugn the truth and authenticity of the book itself.

in ver. 7, with הָיָה in ver. 5, showing that three things are predicated of Mordecai: (1) that he lived in Shushan; (2) that his name was Mordecai, son of Jair, son of Shimei, son of Kish the Benjamite who was taken captive with Jehoiachin; (3) that he brought up Esther. This genealogy does then fix with great certainty the age of Mordecai. He was great grandson of a contemporary of Jehoiachin. Now four generations cover 120 years—and 120 years from B.C. 599 bring us to B.C. 479, *i. e.* to the 6th year of the reign of Xerxes; thus confirming with singular force the arguments which led to the conclusion that Ahasuerus is Xerxes. [AHASUERUS.][b] The carrying back the genealogy of a captive to the time of the captivity has an obvious propriety, as connecting the captives with the family record preserved in the public genealogies, before the captivity, just as an American would be likely to carry up his pedigree to the ancestor who emigrated from England. And now it would seem both possible and probable (though it cannot be certainly proved) that the Mordecai mentioned in the duplicate passage, Ezr. ii. 2; Neh. vii. 7, as one of the leaders of the captives who returned from time to time from Babylon to Judaea [EZRA], was the same as Mordecai of the book of Esther. It is very probable that on the death of Xerxes, or possibly during his lifetime, he may have obtained leave to lead back such Jews as were willing to accompany him, and that he did so. His age need not have exceeded 50 or 60 years, and his character points him out as likely to lead his countrymen back from exile, if he had the opportunity. The name Mordecai not occurring elsewhere, makes this supposition the more probable.

As regards his place in *profane* history, the domestic annals of the reign of Xerxes are so scanty, that it would not surprise us to find no mention of Mordecai. But there is a person named by Ctesias, who probably saw the very chronicles of the kings of Media and Persia referred to in Esth. x. 2, whose name and character present some points of resemblance with Mordecai, viz. Matacas, or Natacas (as the name is variously written), whom he describes as Xerxes's chief favourite, and the most powerful of them all. His brief notice of him in these words, ἡμιαρρένων δὲ μέγιστον ἠδύνατο Ναταϰᾶς, is in exact agreement with the description of Mordecai, Esth. ix. 4, x. 2, 3. He further relates of him, that when Xerxes after his return from Greece had commissioned Megabyzus to go and plunder the temple of Apollo at Delphi,[c] upon his refusal, he sent Matacas the eunuch, to insult the god, and to plunder his property, which Matacas did, and returned to Xerxes. It is obvious how grateful to the feelings of a Jew, such as Mordecai was, would be a commission to desecrate and spoil a heathen temple. There is also much probability in the selection of a Jew to be his prime minister by a monarch of such decided iconoclastic propensities as Xerxes is known to have had (Prideaux, *Connect.* i. 231-233). Xerxes would doubtless see much analogy between the Magian tenets of which he was such a zealous patron, and those of the Jews' religion; just as Pliny actually reckons Moses (whom he couples with Jannes) among the leaders of the Magian sect, in the very same passage in which he relates that Osthanes the Magian author and heresiarch accompanied Xerxes in his Greek expedition, and widely diffused the Magian doctrines (lib. xxx. cap. i. §2: and in §4 seems to identify Christianity also with Magic. From the context it seems highly probable that this notice of Moses and of Jannes may be derived from the work of Osthanes, and if so, the probable intercourse of Osthanes with Mordecai would readily account for his mention of them. The point, however, here insisted upon is, that the known hatred of Xerxes to idol-worship makes his selection of a Jew for his prime minister very probable, and that there are strong points of resemblance in what is thus related of Matacas, and what we know from Scripture of Mordecai. Again, that Mordecai was what Matacas is related to have been, a eunuch, seems not improbable from his having neither wife nor child, from his bringing up his cousin Esther in his own house,[d] from his situation in the king's gate, from his access to the court of the women, and from his being raised to the highest post of power by the king, which we know from Persian history was so often the case with the king's eunuchs. With these points of agreement between them, there is sufficient resemblance in their names to add additional probability to the supposition of their identity. The most plausible etymology usually given for the name *Mordecai* is that favoured by Gesenius, who connects it with Merodach the Babylonian idol (called Mardok in the cuneiform inscriptions) and which appears in the names Merodach-Mordacus, Sisi-Mordachus, in nearly the same form as in the Greek, Μαρδοχαῖος. But it is highly improbable that the name of a Babylonian idol should have been given to him under the Persian dynasty,[e] and it is equally improbable that Mordecai should have been taken into the king's service before the commencement of the Persian dynasty. If then we suppose the original form of the name to have been Matacai, it would easily in the Chaldee orthography become Mordecai, just as בִּרְתָא is for בִּתָּא, שְׁרֵבִיט for שַׁבָּט, דַּרְמָשְׁק for דַּמֶּשֶׂק, &c. In the Targum of Esther he is said to be called Mordecai, because he was like לְמִירָא דַּכְיָא, "to pure myrrh."

As regards his place in *Rabbinical* estimation, Mordecai, as is natural, stands very high. The interpolations in the Greek book of Esther are one indication of his popularity with his countrymen. The Targum (of late date) shows that this increased rather than diminished with the lapse of centuries. There Shimei in Mordecai's genealogy is identified with Shimei the son of Gera, who cursed David, and it is said that the reason why David would not permit him to be put to death then was, that it was revealed to him that Mordecai and Esther should descend from him; but that in his old age, when this reason no longer applied, he was slain. It is also said of Mordecai that he knew *the secret*,

[b] Justin has the singular statement, "Primum Xerxes, rex Persarum, Judaeos domuit" (lib. xxxvi cap. iii.), May not this arise from a confused knowledge of the events recorded in Esther?

[c] It seems probable that some other temple, not that at Delphi, was at this time ordered by Xerxes to be spoiled, as no other writer mentions it. It might be that of Apollo Didymaeus, near Miletus, which was destroyed by Xerxes after his return (Strab. xiv. cap. i. §5).

[d] To account for this, the Targum adds that he was 75 years old.

[e] Mr. Rawlinson (*Herod.* i. 270) points out Mr. Layard's conclusion (*Nin.* ii. 441), that the Persians adopted generally the Assyrian religion, as "quite a mistake."

languages, *i. e.* the languages of all the nations mentioned in Gen. x., which the Jews count as seventy nations, and that his age exceeded 400 years (*Juchasin* ap. Wolf, and Stehelin, *Rabb. Liter.* i. 179). He is continually designated by the appellation צַדִּיק, "the Just," and the amplifications of Esth. viii. 15 abound in the most glowing descriptions of the splendid robes, and Persian buskins, and Median scimitars, and golden crowns, and the profusion of precious stones and Macedonian gold, on which was engraved a view of Jerusalem, and of the phylactery over the crown, and the streets strewed with myrtle, and the attendants, and the heralds with trumpets, all proclaiming the glory of Mordecai and the exaltation of the Jewish people. Benjamin of Tudela mentions the ruins of Shushan and the remains of the palace of Ahasuerus as still existing in his day, but places the tomb of Mordecai and Esther at Hamadan, or Ecbatana (p. 128). Others, however, place the tomb of Mordecai in Susa, and that of Esther in or near Baram in Galilee (note to Asher's *Benj. of Tud.* p. 166). With reference to the above-named palace of Ahasuerus at Shushan, it may be added that considerable remains of it were discovered by Mr. Loftus's excavations in 1852, and that he thinks the plan of the great colonnade, of which he found the bases remaining, corresponds remarkably to the description of the palace of Ahasuerus in Esth. i. (Loftus, *Chaldæa*, ch. xxviii.). It was built or begun by Darius Hystaspis. [A. C. H.]

MO'REH. A local name of central Palestine, one of the very oldest that has come down to us. It occurs in two connexions.

1. THE PLAIN, or PLAINS (or, as it should rather be rendered, the OAK or OAKS), OF MOREH אֵלוֹן מוֹרֶה and אֵלוֹנֵי מֹרֶה; Samar. in both cases, אולן מורא: ἡ δρῦς ἡ ὑψηλή: *convallis illustris*, *vallis tendens*), the first of that long succession of sacred and venerable trees which dignified the chief places of Palestine, and formed not the least interesting link in the chain which so indissolubly united the land to the history of the nation.

The Oak of Moreh was the first recorded halting-place of Abram after his entrance into the land of Canaan (Gen. xii. 6). Here Jehovah "appeared" to him, and here he built the first of the series of altars[a] which marked the various spots of his residence in the Promised Land, and dedicated it "to Jehovah, who appeared[b] unto him" (ver. 7). It was at the "place of Shechem" (xii. 6), close to (אֵצֶל) the mountains of Ebal and Gerizim (Deut. xi. 30), where the Samar. Cod. adds "over against Shechem."

There is reason for believing that this place, the scene of so important an occurrence in Abram's early residence in Canaan, may have been also that of one even more important, the crisis of his later life, the offering of Isaac, on a mountain in "the land of Moriah." [MORIAH.]

A trace of this ancient name, curiously reappearing after many centuries, is probably to be found in Morthia, which is given on some ancient coins as one of the titles of Neapolis, *i. e.* Shechem, and by Pliny and Josephus as Mamortha[d] or Mabortha (Reland, *Diss.* III. §8). The latter states (*B. J.* iv. 8, §1), that "it was the name by which the place was called by the country-people" (ἀντιχώριοι), who thus kept alive the ancient appellation just as the peasants of Hebron did that of Kirjath-arba down to the date of Sir John Maundeville's visit. [See p. 41 *a*.]

Whether the oaks of Moreh had any connexion with

2. THE HILL OF MOREH (גִּבְעַת הַמּוֹרֶה: Γαβαθαμώρα; Alex. ἀπο του βαμου του αβαρ: *collis excelsus*), at the foot of which the Midianites and Amalekites were encamped before Gideon's attack upon them (Judg. vii. 1), seems, to say the least, most uncertain. Copious as are the details furnished of that great event of Jewish history, those which enable us to judge of its precise situation are very scanty. But a comparison of Judg. vi. 33 with vii. 1 makes it evident that it lay in the valley of Jezreel, rather on the north side of the valley, and north also of the eminence on which Gideon's little band of heroes was clustered. At the foot of this latter eminence was the spring of Ain-Charod (A. V. "the well of Harod"), and a sufficient sweep of the plain intervened between it and the hill Moreh to allow of the encampment of the Amalekites. No doubt—although the fact is not mentioned—they kept near the foot of Mount Moreh, for the sake of some spring or springs which issued from its base, as the Ain-Charod did from that on which Gideon was planted. These conditions are most accurately fulfilled if we assume *Jebel ed-Duhy*, the "Little Hermon" of the modern travellers, to be Moreh, the *Ain-Jalood* to be the spring of Harod, and Gideon's position to have been on the north-east slope of *Jebel Fukûa* (Mount Gilboa), between the village of *Nuris* and the last-mentioned spring. Between *Ain Jalood* and the foot of the "Little Hermon," a space of between 2 and 3 miles intervenes, ample in extent for the encampment even of the enormous horde of the Amalekites. In its general form this identification is due to Professor Stanley. The desire to find Moreh nearer to Shechem, where the "oak of Moreh" was, seems to have induced Mr. Van de Velde to place the scene of Gideon's battle many miles to the south of the valley of Jezreel, "possibly on the plain of *Tûbas* or of *Ydsir*;" in which case the encampment of the Israelites may have been on the ridge between *Wadi Ferra'* and *Wadi Ibbus*, near *Burj el-Ferra'* (*Syr. & Pal.* ii. 341-2). But this involves the supposition of a movement in the position of the Amalekites, for which there is no warrant either in the narrative or in the circumstances of the case; and at any rate, in the present state of our knowledge, we may rest tolerably certain that *Jebel ed-Duhy* is the HILL OF MOREH. [G.]

MORESH'ETH-GATH (מֹרֶשֶׁת גַּת: κλη-ρονομία Γέθ: *haereditas Geth*), a place named by the prophet Micah only (Mic. i. 14), in company with Lachish, Achzib, Mareshah, and other towns of the lowland district of Judah. His words, "therefore shalt thou give presents to Moresheth-

[a] It may be roughly said that Abraham built altars, Isaac dug wells; Jacob erected stones.

[b] הַנִּרְאָה. This is a play upon the same word which, as we shall see afterwards, performs an important part in the name of MORIAH.

[c] Eccles. l. 26 perhaps contains a play on the name Moreh—"that foolish people (ὁ λαὸς ὁ μωρος) who dwell in Sichem." If the pun existed in the Hebrew text it may have been between Sichem and sicker (drunken).

[d] This form is possibly due to a confusion between Moreh and Mamre. (See Reland as above.)

gath" are explained by Ewald (*Propheten*, 330, 1) as referring to Jerusalem, and as containing an allusion to the signification of the name Moresheth, which, though not so literal as the play on those of Achzib and Mareshah, is yet tolerably obvious:—"Therefore shalt thou, O Jerusalem, give compensation to Moresheth-gath, itself only the possession of another city."

Micah was himself the native of a place called Moresheth, since he is designated, in the only two cases in which his name is mentioned, "Micah the Morashtite," which latter word is a regular derivation from Moresheth; but whether Moresheth-gath was that place cannot be ascertained from any information given us in the Bible.

Eusebius and Jerome, in the *Onomasticon*, and Jerome in his Commentary on Micah (*Prologus*), give Morasthi as the name, not of the person, but of the place; and describe it as "a moderate-sized village (*haud grandis viculus*) near Eleutheropolis, the city of Philistia (Palaestinae), and to the east thereof."

Supposing *Beit-jibrin* to be Eleutheropolis, no traces of the name of Moresheth-gath have been yet discovered in this direction. The ruins of Maresha lie a mile or two due south of *Beit-jibrin*; but it is evident, from Mic. i. 14, 15, that the two were distinct.

The affix "gath" may denote a connexion with the famous Philistine city of that name—the site of which cannot, however, be taken as yet ascertained—or it may point to the existence of vineyards and wine-presses, "gath" in Hebrew signifying a wine-press or vat. [G.]

MORI'AH. A name which occurs twice in the Bible (Gen. xxii. 2; 2 Chr. iii. 1).

1. THE LAND OF MORIAH (אֶרֶץ הַמֹּרִיָּה; Samar. א' המוראה: ἡ γῆ ἡ ὑψηλή: *terra visionis*). On "one of the mountains" in this district took place the sacrifice of Isaac (Gen. xxii. 2). What the name of the mountain was we are not told; but it was a conspicuous one visible from "afar off" (ver. 4). Nor does the narrative afford any data for ascertaining its position; for although it was more than two days' journey from the "land of the Philistines"—meaning no doubt the district of Gerar where Beersheba lay, the last place mentioned before and the first after the occurrence in question—yet it is not said how much more than two days it was. The mountain—the "place"—came into view in the course of the third day; but the time occupied in performing the remainder of the distance is not stated. After the deliverance of Isaac, Abraham, with a play on the name of Moriah impossible to convey in English, called the spot Jehovah-jireh, "Jehovah sees" (*i. e.* provides), and thus originated a proverb referring to the providential and opportune interference of God. "In the mount of Jehovah, He will be seen."

It is most natural to take the "land of Moriah" as the same district with that in which the "Oak (A. V. "plain") of Moreh" was situated, and not as that which contains Jerusalem, as the modern tradition, which would identify the Moriah of Gen. xxii. and that of 2 Chr. iii. 1 affirms. The former was well-known to Abraham. It was the first spot on which he had pitched his tent in the Promised Land, and it was hallowed and endeared to him by the first manifestation of Jehovah with which he had been favoured, and by the erection of his first altar. With Jerusalem on the other hand, except as possibly the residence of Melchizedek, he had not any connexion whatever; it lay as entirely out of his path as it did out of that of Isaac and Jacob. The LXX. appear to have thus read or interpreted the original, since they render both Moreh and Moriah in Gen. by ὑψηλή, while in 2 Chr. iii. they have Ἀμορία. The one name is but the feminine of the other[c] (Simonis, *Onom.* 414), and there is hardly more difference between them than between Maresha and Mareshah, and not so much as between Jerushalem and Jerushalaim. The Jewish tradition, which first appears in Josephus—unless 2 Chr. iii. 1 be a still earlier hint of its existence—is fairly balanced by the rival tradition of the Samaritans, which affirms that Mount Gerizim was the scene of the sacrifice of Isaac, and which is at least as old as the 3rd century after Christ. [GERIZIM.]

2. MOUNT MORIAH (הַר הַמֹּרִיָּה: ὄρος τοῦ Ἀμορία; Alex. Αμορια: *Mons Moria*). The name ascribed, in 2 Chr. iii. 1 only, to the eminence on which Solomon built the Temple. "And Solomon began to build the house of Jehovah in Jerusalem on the Mount Moriah, where He appeared to David his father, in a place which David prepared in the threshing-floor of Araunah the Jebusite." From the mention of Araunah, the inference is natural that the "appearance" alluded to occurred at the time of the purchase of the threshing-floor by David, and his erection thereon of the altar (2 Sam. xxiv.; 1 Chr. xxi.) But it will be observed that nothing is said in the narratives of that event of any "appearance" of Jehovah. The earlier and simpler record of Samuel is absolutely silent on the point. And in the later and more elaborate account of 1 Chr. xxi. the only occurrence which can be construed into such a meaning is that "Jehovah answered David by fire on the altar of burnt-offering."

A tradition which first appears in a definite shape in Josephus (*Ant.* i. 13, §1, 2, vii. 13, §4), and is now almost universally accepted, asserts that the "Mount Moriah" of the Chronicles is identical with the "mountain" in "the land of Moriah" of Genesis, and that the spot on which Jehovah appeared to David, and on which the Temple was built, was the very spot of the sacrifice of Isaac. In the early Targum of Onkelos on Gen. xxii., this belief is exhibited in a very mild form. The land of Moriah is called the "land of worship,"[d] and ver. 14 is given as follows: "And Abraham worshipped and prayed in that place; and he said before Jehovah, In this place shall generations worship before Me because it shall be said in that day, In this mountain did Abraham worship before Jehovah." But the

[a] Michaelis (*Suppl.* No. 1458) suggests that the name may be more accurately Hammoriah, since it is not the practice in the early names of districts to add the article. Thus the land of Canaan is אֶרֶץ כְּנַעַן, not הַכְּנַעַן. See LABANON.]

[b] Following Aquila, τὴν γῆν τὴν καταφαιῆ; and Symmachus, τὴν γῆν τῆς ὀπτασίας. The same rendering is adopted by the Samaritan version.

[c] Others take Moriah as Moreh-jah (*i. e.* Jehovah), but this would be to anticipate the existence of the name of Jehovah, and, as Michaelis has pointed out (Supp. No. 1458), the name would more probably be Moreh-El being the name by which God was known to Abraham.

[d] אַרְעָה פּוּלְחָנָא.

the Jerusalem Targum the latter passage is thus given. "Because in generations to come it shall be said, In the mount of the house of the sanctuary of Jehovah did Abraham offer up Isaac his son, and in this mountain which is the house of the sanctuary was the glory of Jehovah much manifest." And those who wish to see the tradition in its complete and detailed form, may consult the Targum of R. Joseph on 1 Chr. xxi. 15, and 2 Chr. iii. 1, and the passages collected by Beer (*Leben Abrahams nach jüdische Sage*, 57-71).[e] But the single occurrence of the name in this one passage of Chronicles is surely not enough to establish a coincidence, which if we consider it is little short of miraculous.[f] Had the fact been as the modern belief asserts, and had the belief existed in the minds of the people of the Old or New Testament, there could not fail to be frequent references to it, in the narrative—so detailed—of the original dedication of the spot by David; in the account of Solomon's building in the book of Kings; of Nehemiah's rebuilding (compare especially the reference to Abraham in ix. 7); or of the restorations and purifications of the Maccabees. It was a fact which must have found its way into the paronomastic addresses of the prophets, into the sermon of St. Stephen, so full of allusion to the Founders of the nation, or into the argument of the author of the Epistle to the Hebrews. But not so; on the contrary, except in the case of Salem, and that is by no means ascertained—the name of Abraham does not, as far as the writer is aware, appear once in connexion with Jerusalem or the later royal or ecclesiastical glories of Israel. Jerusalem lies out of the path of the patriarchs, and has no part in the history of Israel till the establishment of the monarchy. The "high places of Isaac," as far as we can understand the allusion of Amos (vii. 9, 16) were in the northern kingdom. To connect Jerusalem in so vital a manner with the life of Abraham, is to antedate the whole of the later history of the nation and to commit a serious anachronism, warranted neither by the direct nor by indirect statements of the sacred records.

But in addition to this, Jerusalem is incompatible with the circumstances of the narrative of Gen. xxii. To name only two instances—(1.) The Temple mount cannot be spoken of as a conspicuous eminence. "The towers of Jerusalem," says Professor Stanley (*S. & P.* 251), "are indeed seen from the ridge of Mar Elias at the distance of three miles to the south, but there is no elevation · nothing corresponding to the 'place afar off' to which Abraham 'lifted up his eyes.' And the special locality which Jewish tradition has assigned for the place, and whose name is the chief guarantee for the tradition—Mount Moriah, the hill of the Temple—is not visible till the traveller is close upon it at the southern edge of the valley of Hinnom, from whence he looks down upon it as on a lower eminence."

(2.) If Salem was Jerusalem, then the trial of Abraham's faith, instead of taking place in the lonely and desolate spot implied by the narrative, where not even fire was to be obtained, and where no help but that of the Almighty was nigh, actually took place under the very walls of the city of Melchizedek.

But, while there is no trace except in the single passage quoted of Moriah being attached to any part of Jerusalem—on the other hand in the slightly different form of MOREH it did exist attached to the town and the neighbourhood of Shechem, the spot of Abram's first residence in Palestine. The arguments in favour of the identity of Mount Gerizim with the mountain in the land of Moriah of Gen. xxii., are stated under GERIZIM (vol. i. p. 679, 680). As far as they establish that identity, they of course destroy the claim of Jerusalem. [G.]

MORTAR. The simplest and probably most ancient method of preparing corn for food was by pounding it between two stones (Virg. *Aen.* i. 179). Convenience suggested that the lower of the two stones should be hollowed, that the corn might not escape, and that the upper should be shaped so as to be convenient for holding. The pestle and mortar must have existed from a very early period. The Israelites in the desert appear to have possessed mortars and handmills among their necessary domestic utensils. When the manna fell they gathered it, and either ground it in the mill or pounded it in the mortar (מְדֹכָה, *mědôcâh*) till it was fit for use (Num. xi. 8). So in the present day stone mortars are used by the Arabs to pound wheat for their national dish *kibby* (Thomson, *The Land and the Book*, ch. viii. p. 94). Niebuhr describes one of a very simple kind which was used on board the vessel in which he went from Jidda to Loheia. Every afternoon one of the sailors had to take the *durra*, or millet, necessary for the day's consumption and pound it "upon a stone, of which the surface was a little curved, with another stone which was long and rounded" (*Descr. de l'Arab.* p. 45). Among the inhabitants of Ezzehhoue, a Druse village, Burckhardt saw coffee-mortars made out of the trunks of oak-trees (*Syria*, p. 87, 8). The spices for the incense are said to have been prepared by the house of Abtines, a family set apart for the purpose, and the mortar which they used was, with other spoils of the Temple, after the destruction of Jerusalem by Titus, carried to Rome, where it remained till the time of Hadrian (Reggio in Martinet's *Hebr. Chrest.* p. 35). Buxtorf mentions a kind of mortar (גֻּתִּישׁ, *cûttûsh*) in which olives were slightly bruised before they were taken to the olive-presses (*Lex. Talm.* s. v. כתש). From the same root as this last is derived *mactêsh* (מַכְתֵּשׁ, Prov. xxvii. 22), which probably denotes a mortar of a larger kind in which corn was pounded. "Though thou bray the fool in the *mortar* among the bruised

[e] The modern form of the belief is well expressed by the latest Jewish commentator (Kalisch, *Genesis*, 444, 5): "The place of the future temple, where it was promised the glory of God should dwell, and whence atonement and peace were to bless the hearts of the Hebrews, was hallowed by the most brilliant act of piety, and the deed of their ancestor was thus more prominently presented to the imitation of his descendants." The spot of the sacrifice of Isaac is actually shewn in Jerusalem (Barclay, *City*, 109).

[f] There is in the East a natural tendency when a place is established as a sanctuary to make it the scene of all the notable events, possible or impossible, which can by any play of words or other pretext be connected with it. Of this kind were the early Christian legends that Golgotha was the place of the burial of the first Adam as well as of the death of the Second (see Mislin, *Saints Lieux*, ii. 304, 5). Of this kind also are the Mohammedan legends which cluster round all the shrines and holy places, both of Palestine and Arabia. In the Targum of Chronicles (2 Chr. iii. 1) alluded to above, the Temple mount is made to be also the scene of the vision of Jacob.

[g] See JERUSALEM, vol. i. 985 *b*, and the plate in Bartlett's *Walks* there referred to

corn with the pestle, yet will not his folly depart from him." Corn may be separated from its husk and all its good properties preserved by such an operation, but the fool's folly is so essential a part of himself that no analogous process can remove it from him. Such seems the natural interpretation of this remarkable proverb. The language is intentionally exaggerated, and there is no necessity for supposing an allusion to a mode of punishment by which criminals were put to death, by being pounded in a mortar. A custom of this kind existed among the Turks, but there is no distinct trace of it among the Hebrews. The Ulemats, or body of lawyers, in Turkey had the distinguished privilege, according to De Tott (*Mem.* i. p. 28. Eng. tr.), of being put to death only by the pestle and the mortar. Such, however, is supposed to be the reference in the proverb by Mr. Roberts, who illustrates it from his Indian experience. "Large mortars are used in the East for the purpose of separating the rice from the husk. When a considerable quantity has to be prepared, the mortar is placed outside the door, and two women, each with a pestle of five feet long, begin the work. They strike in rotation, as blacksmiths do on the anvil. Cruel as it is, this is a punishment of the state: the poor victim is thrust into the mortar, and beaten with the pestle. The late king of Kandy compelled one of the wives of his rebellious chiefs thus to beat her own infant to death. Hence the saying, 'Though you beat that loose woman in a mortar, she will not leave her ways:' which means, Though you chastise her ever so much, she will never improve" (*Orient. Illustr.* p. 368). [W. A. W.]

MORTER[a] (Gen. xi. 3; Ex. i. 14; Lev. xiv. 42, 45; Is. xli. 25; Ez. xiii. 10, 11, 14, 15, xxii. 28; Nah. iii. 14). Omitting iron cramps, lead, [HANDICRAFT], and the instances in which large stones are found in close apposition without cement, the various compacting substances used in Oriental buildings appear to be—1. bitumen, as in the Babylonian structures; 2. common mud or moistened clay; 3. a very firm cement compounded of sand, ashes, and lime, in the proportions respectively of 1, 2, 3, well pounded, sometimes mixed and sometimes coated with oil, so as to form a surface almost impenetrable to wet or the weather. [PLASTER.] In Assyrian, and also Egyptian brick buildings stubble or straw, as hair or wool among ourselves, was added to increase the tenacity (Shaw, *Trav.* p. 206; Volney, *Trav.* ii. p. 436; Chardin, *Voy.* iv. 116). If the materials were bad in themselves, as mere mud would necessarily be, or insufficiently mixed, or, as the Vulgate seems to understand (Ez. xiii. 10), if straw were omitted, the mortar or cob-wall would be liable to crumble under the influence of wet weather. (See Shaw, *Trav.* 136, and Ges. p. 1515, *s. v.* טִיחַ: a word connected with the Arabic *Tafal*,[b] a substance resembling pipe-clay, believed by Burckhardt to be the detritus of the felspar of granite, and used for taking stains out of cloth; Burckhardt, *Syria*, p. 488; Mishn. *Parach.* x. 3). Wheels for grinding chalk or lime for mortar closely resembling our own machines for the same purpose, are in use in Egypt (Niebuhr, *Voy.* i. 122, pl. 17; Burckhardt, *Nubia*, p. 82, 97, 102, 140; Hasselquist, *Trav.* p. 90). [HOUSE; CLAY.] [H. W. P.]

MO'SERAH (מוֹסֵרָה: Μασορόθ: *Mosera*, Deut. x. 6, apparently the same as Moseroth, Num. xxxiii. 30, its plural form), the name of a place near Mount Hor. Hengstenberg (*Authent. der Pentat.*) thinks it lay in the Arabah, where that mountain overhangs it. Burckhardt suggests that possibly *Wady Mousa*, near Petra and Mount Hor, may contain a corruption of Mosera. This does not seem likely. Used as a common noun, the word means "bonds, fetters." In Deut. it is said that "there Aaron died." Probably the people encamped in this spot adjacent to the mount, which Aaron ascended, and where he died. [H. H.]

MO'SES (Heb. *Mōsheh*, מֹשֶׁה = "drawn": LXX., Josephus, Philo, the most ancient MSS. of N. T., Μωυσῆς, declined Μωυσέως, Μωυσεῖ or Μωυσῇ, Μωυσέα or Μωυσῆν: Vulg. *Moyses*, declined *Moysi*, gen. and dat., *Moysen*, acc.: Rec. Text of N. T. and Protestant versions, *Mose*: Arabic, *Mūsa*: Numenius ap. Eus. *Praep. Ev.* ix. 8, 27, Μουσαῖος: Artapanus ap. Eus. *Ibid.* 27, Μώυσος: Manetho ap. Joseph. *c. Ap.* i. 26, 28, 31, *Osarsiph*: Chaeremon, ap. *ib.* 32, *Tisithen*: "the man of God," Ps. xc., title, 1 Chr. xxiii. 14; "the slave of Jehovah," Num. xii. 7, Deut. xxxiv. 5, Josh. i. 1, Ps. cv. 26; "the chosen," Ps. cvi. 23). The legislator of the Jewish people,[a] and in a certain sense the founder of the Jewish religion. No one else presented so imposing a figure to the external Gentile world; and although in the Jewish nation his fame is eclipsed by the larger details of the life of David, yet he was probably always regarded as their greatest hero.

The materials for his life are—

I. The details preserved in the four last books of the Pentateuch.

II. The allusions in the Prophets and Psalms, which in a few instances seem independent of the Pentateuch.

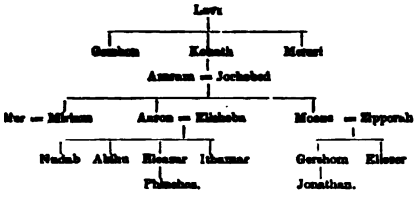
III. The Jewish traditions preserved in the N.T. (Acts vii. 20-38; 2 Tim. iii. 8, 9; Heb. xi. 23-28: Jude 9); and in Josephus (*Ant.* ii., iii., iv., Philo (*Vita Moysis*), and Clemens. Alex. (*Strom.*).

IV. The heathen traditions of Manetho, Lysimachus, and Chaeremon, preserved in Josephus (*c. Ap.* i. 26-32), of Artapanus and others in Eusebius (*Praep. Ev.* ix. 8, 26, 27), and of Hecataeus in Diod. Sic. xl., Strabo xvi. 2.

V. The Mussulman traditions in the Koran (ii. vii. x. xviii. xx. xxviii. xl.), and the Arabian legends, as given in Weil's *Biblical Legends*; D'Herbelot ("Mousa"), and Lane's *Selections*, p. 182.

VI. Apocryphal Books of Moses (Fabricius, *Cod. Pseud. V. T.* i. p. 825):—(1) Prayers of Moses (2) Apocalypse of Moses. (3) Ascension of Moses. (These are only known by fragments.)

VII. In modern times his career and legislation has been treated by Warburton, Michaelis, Ewald, and Bunsen.



[a] 1. חֹמֶר; πηλός, *caementum* a word from the same root (חָמַר, "boil") as חֵמָר, "slime" or "bitumen," used in the same passage, Gen. xi. 3. Ghomēr is also rendered "clay," evidently plastic clay, Is. xxix. 16, and elsewhere. 2. עָפָר. κονῖς, *lutum*, also *limus*, *pulvis*, A. V. "dust," "powder," as in 2 K. xxiii. 6, and Gen. ii. 7.

[b] طفل.

[a] πρῶτος ἀνάντων ὁ θαυμαστὸς θεσπεσιῳ τε καὶ τοῦ θείου, Eus. *Praep. Ev.* vii. 8. Comp. Philo, *V. Mos.* i. 33.

His life, in the later period of the Jewish history, was divided into three equal portions of forty years each (Acts vii. 23, 30, 36). This agrees with the natural arrangement of his history into the three parts of his Egyptian education, his exile in Arabia, and his government of the Israelite nation in the Wilderness and on the confines of Palestine.

1. His birth and education. The immediate pedigree of Moses is as follows:—

In the Koran, by a strange confusion, the family of Moses is confounded with the Holy Family of Nazareth, chiefly through the identification of Mary and Miriam, and the 3rd chapter, which describes the evangelical history, bears the name of the "Family of Amram." Although little is known of the family except through its connexion with this its most illustrious member, yet it was not without influence on his after-life.

The fact that he was of the tribe of Levi no doubt contributed to the selection of that tribe as the sacred caste. The tie that bound them to Moses was one of kinship, and they thus naturally rallied round the religion which he had been the means of establishing (Ex. xxxii. 28) with an ardour which could not have been found elsewhere. His own eager devotion is also a quality, for good or evil, characteristic of the whole tribe.

The Levitical parentage and the Egyptian origin both appear in the family names. *Gershom*, *Eleazar*, are both repeated in the younger generations. *Moses* (*vide infra*) and *Phinehas* (see Brugsch, *Hist. de l'Egypte*, i. 173) are Egyptian. The name of his mother, Jochebed, implies the knowledge of the name of JEHOVAH in the bosom of the family. It is its first distinct appearance in the sacred history.

Miriam, who must have been considerably older than himself, and Aaron, who was three years older (Ex. vii. 7), afterwards occupy that independence of position which their superior age would naturally give them.

Moses was born according to Manetho (Jos. *c. Ap.* i. 26, ii. 2) at Heliopolis, at the time of the deepest depression of his nation in the Egyptian servitude. Hence the Jewish proverb, "When the tale of bricks is doubled then comes Moses." His birth (according to Josephus, *Ant.* ii. 9, §2, 3, 4) had been foretold to Pharaoh by the Egyptian magicians, and to his father Amram by a dream—as respectively the future destroyer and deliverer. The pangs of his mother's labour were alleviated so as to enable her to evade the Egyptian midwives. The story of his birth is thoroughly Egyptian in its scene. The beauty of the new-born babe—in the later versions of the story amplified into a beauty and size (Jos. *Ibid.* §1, 5) almost divine (ἄστειος τῷ θεῷ, Acts vii. 20; the word ἀστεῖος is taken from the LXX. version of Ex. ii. 2, and is used again in Heb. xi. 23, and is applied to none but Moses in the N.T.)—induced the mother to make extraordinary efforts for its preservation from the general destruction of the male children of Israel. For three months the child was concealed in the house. Then his mother placed him in a small boat or basket of papyrus—perhaps from a current Egyptian belief that the plant is a protection from crocodiles (Plut. *Is. & Os.* 358)—closed against the water by bitumen. This was placed among the aquatic vegetation by the side of one of the canals of the Nile. [NILE.] The mother departed as if unable to bear the sight. The sister lingered to watch her brother's fate. The basket (Jos. *Ibid.* §4) floated down the stream.

The Egyptian princess (to whom the Jewish traditions gave the name of *Thermuthis*, Jos. *Ant.* ii. 9, §5; Artapanus, *Praep. Ev.* ix. 27, the name of *Merrhis*, and the Arabic traditions that of *Astat*, Jalaladdin, 387) came down, after the Homeric simplicity of the age, to bathe in the sacred river,[b] or (Jos. *Ant.* ii. 9, §5) to play by its side. Her attendant slaves followed her. She saw the basket in the flags, or (Jos. *Ibid.*) borne down the stream, and dispatched divers after it. The divers, or one of the female slaves, brought it. It was opened, and the cry of the child moved the princess to compassion. She determined to rear it as her own. The child (Jos. *Ibid.*) refused the milk of Egyptian nurses. The sister was then at hand to recommend a Hebrew nurse. The child was brought up as the princess's son, and the memory of the incident was long cherished in the name given to the foundling of the water's side—whether according to its Hebrew or Egyptian form. Its Hebrew form is מֹשֶׁה, *Mosheh*, from מָשָׁה, *Mâshâh*, "to draw out"—"because I have *drawn* him out of the water." But this (as in many other instances, *Babel*, &c.) is probably the Hebrew form given to a foreign word. In Coptic, *mo* = water, and *ushe* = saved. This is the explanation[c] given by Josephus (*Ant.* ii. 9, §6; *c. Apion*, i. 31[d]), and confirmed by the Greek form of the word adopted in the LXX., and thence in the Vulgate, Μωυσῆς, *Moyses*, and by Artapanus Μόυσος (Eus. *Praep. Ev.* ix. 27). His former Hebrew name is said to have been Joachim (Clem. Alex. *Strom.* i. p. 343). The child was adopted by the princess. Tradition describes its beauty as so great that passers-by stood fixed to look at it, and labourers left their work to steal a glance (Jos. *Ant.* ii. 9, §6).

From this time for many years Moses must be considered as an Egyptian. In the Pentateuch this period is a blank, but in the N. T. he is represented as "educated (ἐπαιδεύθη) in all the wisdom of the Egyptians," and as "mighty in words and deeds" (Acts vii. 22). The following is a brief summary of the Jewish and Egyptian traditions which fill up the silence of the sacred writer. He was educated at Heliopolis (comp. Strabo, xvii. 1), and grew up there

[b] She was (according to Artapanus, Eus. *Praep. Ev.* ix. 27) the daughter of Palmanothes, who was reigning at Hermopolis, and the wife of Chenephres, who was reigning at Memphis. In this tradition, and that of Philo (*V. M.* i. 4), she has no child, and hence her delight at finding one.

Brugsch, however (*L'Histoire d'Egypte*, pp. 157, 173), provides the name *Mes* or *Messon* = child, borne by one of the princes of Ethiopia under Rameses II. In the Arabic traditions the name is derived from his discovery in the water and among the trees; "for in the Egyptian language *mo* is the name of water, and *se* is that of a tree" (Jalaladdin, 387).

[c] Philo (*V. M.* i. 4), *môü* = water; Clem. Alex. (*Strom* i. p. 343), *mŏu* = water. Clement (*ib.*) derives *Moses* from "drawing breath." In an ancient Egyptian treatise on agriculture cited by Chwolson (*Ueberreste*, &c., 13 note) his name is given as *Monios*.

as a priest, under his Egyptian name of Osarsiph (Manetho, apud Jos. *c. Ap.* i. 26, 28. 31) or Tisithen (Chaeremon, apud *ib.* 32). "Osarsiph" is derived by Manetho from Osiris, *i. e.* (Osiri-tsf?) "saved by Osiris" (Osburn, *Monumental Egypt*). He was taught the whole range of Greek, Chaldee, and Assyrian literature. From the Egyptians especially he learned mathematics, to train his mind for the unprejudiced reception of truth (Philo, *V. M.* i. 5). "He invented boats and engines for building—instruments of war and of hydraulics—hieroglyphics—division of lands" (Artapanus, ap. Eus. *Praep. Ev.* ix. 27). He taught Orpheus, and was hence called by the Greeks Musaeus (*ib.*), and by the Egyptians Hermes (ib.). He taught grammar to the Jews, whence it spread to Phoenicia and Greece (Eupolemus, ap. Clem. Alex. *Strom.* i. p. 343). He was sent on an expedition against the Ethiopians. He got rid of the serpents of the country to be traversed by turning baskets full of ibises upon them (Jos. *Ant.* ii. 10, §2), and founded the city of Hermopolis to commemorate his victory (Artapanus, ap. Eus. ix. 27). He advanced to Saba, the capital of Ethiopia, and gave it the name of Meroe, from his adopted mother Merrhis, whom he buried there (ib.). Tharbis, the daughter of the king of Ethiopia, fell in love with him, and he returned in triumph to Egypt with her as his wife (Jos. *Ibid.*).

II. The nurture of his mother is probably spoken of as the link which bound him to his own people, and the time had at last arrived when he was resolved to reclaim his nationality. Here again the N. T. preserves the tradition in a distincter form than the account in the Pentateuch. "Moses, when he was come to years, refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God than to enjoy the pleasures of sin for a season; esteeming the reproach of Christ greater riches than the treasures"—the ancient accumulated treasure of Rhampsinitus and the old kings—"of Egypt" (Heb. xi. 24-26). In his earliest infancy he was reported to have refused the milk of Egyptian nurses (Jos. *Ant.* ii. 9, §5), and when three years old to have trampled under his feet the crown which Pharaoh had playfully placed on his head (ib. 7). According to the Alexandrian representation of Philo (*V. M.* i. 6), he led an ascetic life, in order to pursue his high philosophic speculations. According to the Egyptian tradition, although a priest of Heliopolis, he always performed his prayers, according to the custom of his fathers, outside the walls of the city, in the open air, turning towards the sun-rising (Jos. *c. Apion.* ii. 2). The king was excited to hatred by the priests of Egypt, who foresaw their destroyer (ib.), or by his own envy (Artapanus, ap. Eus. *Pr. Ev.* ix. 27). Various plots of assassination were contrived against him, which failed. The last was after he had already escaped across the Nile from Memphis, warned by his brother Aaron, and when pursued by the assassin he killed him (ib.). The same general account of conspiracies against his life appears in Josephus (*Ant.* ii. 10). All that remains of these traditions in the sacred narrative is the simple and natural incident, that seeing an Israelite suffering the bastinado from an Egyptian, and thinking that they were alone, he slew the Egyptian (the later tradition, preserved by Clement of Alexandria, said, "with a word of his mouth"), and buried the corpse in the sand (the sand of the desert then, as now, running close up to the cultivated tract). The fire of patriotism which thus turned him into a deliverer from the oppressors, turns him in the same story into the peace-maker of the oppressed. It is characteristic of the faithfulness of the Jewish records that his flight is there occasioned rather by the malignity of his countrymen than by the enmity of the Egyptians. And in St. Stephen's speech this part of the story which is drawn out at greater length than in the original, evidently with the view of showing the identity of the narrow spirit which had thus displayed itself equally against their first and their last Deliverer (Acts vii. 25-35).

He fled into Midian. Beyond the fact that it was in or near the peninsula of Sinai, its precise situation is unknown. Arabian tradition points to the country east of the Gulf of Akaba (see *Laborde*). Josephus (*Ant.* ii. 11, §1) makes it "by the Red Sea." There was a famous well ("the well," Ex. ii. 15) surrounded by tanks for the watering of the flocks of the Bedouin herdsmen. By this well the fugitive seated himself "at noon" (Jos. *Ibid.*), and watched the gathering of the sheep. There were the Arabian shepherds, and there were also seven maidens, whom the shepherds rudely drove away from the water. The chivalrous spirit (if we may so apply a modern phrase) which had already broken forth in behalf of his oppressed countrymen, broke forth again in behalf of the distressed maidens. They returned unusually soon to their father, and told him of their adventure. Their father was a person of whom we know little, but of whom that little shows how great an influence he exercised over the future career of Moses. It was JETHRO, or REUEL, or HOBAB, chief or priest ("Sheikh" exactly expresses the union of the religious and political influence) of the Midianite tribes.

Moses, who up to this time had been "an Egyptian" (Ex. ii. 19), now became for an unknown period, extended by the later tradition over forty years (Acts vii. 30), an Arabian. He married Zipporah, daughter of his host, to whom he also became the slave and shepherd (Ex. ii. 21, iii. 1).

The blank which during the stay in Egypt is filled up by Egyptian traditions, can here only be supplied from indirect allusions in other parts of the O. T. The alliance between Israel and the Kenite branch of the Midianites, now first formed, was never broken. [KENITES.] Jethro became their guide through the desert. If from Egypt, as we have seen, was derived the secular and religious learning of Moses, and with this much of their outward ceremonial, so from Jethro was derived the organization of their judicial and social arrangements during their nomad state (Ex. xviii. 21-23). Nor is the conjecture of Ewald (*Gesch.* ii. 59, 60) improbable, that in this pastoral and simple relation there is an indication of a wider concert than is directly stated between the rising of the Israelites in Egypt and the Arab tribes, who, under the name of "the Shepherd-kings," had been recently expelled. According to Artapanus (Eus. *Pr. Ev.* ix. 27) Reuel actually urged Moses to make war upon Egypt. Something of a joint action is implied in the visit of Aaron to the desert (Ex. iv. 27; comp. Artapanus, *ut supra*); something also in the sacredness of Sinai, already recognised alike by Israel and by the Arabs (Ex. viii. 27; Jos. *Ant.* ii. 12, §1).

But the chief effect of this stay in Arabia was on Moses himself. It was in the seclusion and simplicity of his shepherd-life that he received his call as a prophet. The traditional scene of this great event is in the valley of Shoayb, or Hobab, on the N. side of Jebel Mûsa. Its exact spot is uncer-

by the convent of S. Catherine, of which the altar is said to stand on the site of the Burning Bush. The original indications are too slight to enable us to fix the spot with any certainty. It was at "the back" of "the wilderness" at Horeb (Ex. iii. 1): to which the Hebrew adds, whilst the LXX. omits, "the mountain of God." Josephus further particularises that it was the loftiest of all the mountains in that region, and best for pasturage, from its good grass; and that, owing to a belief that it was inhabited by the Divinity, the shepherds feared to approach it (*Ant.* ii. 12, §1). Philo (*V. M.* i. 12) adds "a grove" or "glade."

Upon the mountain was a well-known acacia [SHITTIM] (the definite article may indicate either "the particular celebrated tree," sacred perhaps already, or "the tree" or "vegetation peculiar to the spot"), the thorn-tree of the desert, spreading out its tangled branches, thick set with white thorns, over the rocky ground. It was this tree which became the symbol of the Divine Presence: a flame of fire in the midst of it, in which the dry branches would naturally have crackled and burnt in a moment, but which played round it without consuming it. In Philo (*V. M.* i. 12) "the angel" is described as a strange, but beautiful creature. Artapanus (Eus. *Præp. Ev.* ix. 27) represents it as a fire suddenly bursting from the bare ground, and feeding itself without fuel. But this is far less expressive than the Biblical image. Like all the visions of the Divine Presence recorded in the O. T., as manifested at the outset of a prophetical career, this was exactly suited to the circumstances of the tribe. It was the true likeness of the condition of Israel, in the furnace of affliction, yet not destroyed (comp. Philo, *V. M.* i. 12). The place too, in the desert solitude, was equally appropriate, as a sign that the Divine protection was not confined either to the sanctuaries of Egypt, or to the Holy Land, but was to be found with any faithful worshipper, fugitive and solitary though he might be. The rocky ground at once became "holy," and the shepherd's sandal was to be taken off no less than on the threshold of a palace or a temple. It is this feature of the incident on which St. Stephen dwells, as a proof of the universality of the true religion (Acts vii. 29–33).

The call or revelation was twofold—

1. The declaration of the Sacred Name expresses the eternal self-existence of the One God. The name itself, as already mentioned, must have been known in the family of Aaron. But its grand significance was now first drawn out. [JEHOVAH.]

2. The mission was given to Moses to deliver his people. The two signs are characteristic—the one of his past Egyptian life—the other of his active shepherd life. In the rush of leprosy into his bosom* is the link between him and the people whom the Egyptians called a nation of lepers. In the transformation of his shepherd's staff is the glorification of the simple pastoral life, of which that staff was the symbol, into the great career which lay before it. The humble yet wonder-working cross is, in the history of Moses, as Ewald truly observes, what the despised Cross is in the whole history of Christianity.

In this call of Moses, as of the apostles afterwards, the man is swallowed up in the cause. Yet this is the passage in his history which, more than any other, brings out his outward and domestic relations.

He returns to Egypt from his exile. His Arabian wife and her two infant sons are with him. She is seated with them on the ass—(the ass was known as the animal peculiar to the Jewish people from Jacob down to David). He apparently walks by their side with his shepherd's staff. (The LXX. substitute the general term τὰ ὑποζύγια.)

On the journey back to Egypt a mysterious incident occurred in the family, which can only be explained with difficulty. The most probable explanation seems to be, that at the caravanserai either Moses or Gershom (the context of the preceding verses, iv. 22, 23, rather points to the latter) was struck with what seemed to be a mortal illness. In some way, not apparent to us, this illness was connected by Zipporah with the fact that her son had not been circumcised—whether in the general neglect of that rite amongst the Israelites in Egypt, or in consequence of his birth in Midian. She instantly performed the rite, and threw the sharp instrument, stained with the fresh blood, at the feet of her husband, exclaiming in the agony of a mother's anxiety for the life of her child—"A bloody husband thou art, to cause the death of my son." Then, when the recovery from the illness took place (whether of Moses or Gershom), she exclaims again, "A bloody husband still thou art, but not so as to cause the child's death, but only to bring about his circumcision."†

It would seem to have been in consequence of this event, whatever it was, that the wife and her children were sent back to Jethro, and remained with him till Moses joined them at Rephidim (Ex. xviii. 2-6), which is the last time that she is distinctly mentioned. In Num. xii. 1 we hear of a Cushite wife who gave umbrage to Miriam and Aaron. This may be—(1) an Ethiopian (Cushite) wife, taken after Zipporah's death (Ewald, *Gesch.* ii. 229). (2) The Ethiopian princess of Josephus (*Ant.* ii. 10, §2): (but that whole story is probably only an inference from Num. xii. 1). (3) Zipporah herself, which is rendered probable by the juxtaposition of Cushan with Midian in Hab. iii. 7.

The two sons also sink into obscurity. Their names, though of Levitical origin, relate to their foreign birth-place. Gershom, "stranger," and Eliezer, "God is my help," commemorated their father's exile and escape (Ex. xviii. 3, 4). Gershom was the father of the wandering Levite Jonathan (Judg. xviii. 30), and the ancestor of Shebuel, David's chief treasurer (1 Chr. xxiii. 16, xxiv. 20). Eliezer had an only son, Rehabiah (1 Chr. xxiii. 17), who was the ancestor of a numerous but obscure progeny, whose representative in David's time—the last descendant of Moses known to us—was Shelomith, guard of the consecrated treasures in the Temple (1 Chr. xxvi. 25–28).

After this parting he advanced into the desert, and at the same spot where he had had his vision encountered Aaron (Ex. iv. 27). From that meeting and cooperation we have the first distinct in-

* The Mussulman legends speak of his white shining hand as the instrument of his miracles (D'Herbelot). Here "the white hand" is proverbial for the healing art.

† Jarchi (*Comm. in loc.*, vol. ii. pt. 2, p. 105), taking the same view, believes Zipporah to have visited Moses. Rosenmüller makes Gershom the victim, and makes Zipporah address Jehovah, the Arabic word for "marriage" being a synonym for "circumcision." It is possible that on this story is founded the tradition of Artapanus (Eus. *Pr. Ev.* ix. 27) that the Ethiopians derived circumcision from Moses.

dication of his personal appearance and character. The traditional representations of him in some aspects well agree with that which we derive from Michael Angelo's famous statue in the church of *S. Pietro in Vinculi* at Rome. Long shaggy hair and beard is described as his characteristic equally by Josephus, Diodorus (i. p. 424), and Artapanus (κομήτης, apud Eus. *Pr. Ev.* ix. 27). To this Artapanus adds the curious touch that it was of a reddish hue, tinged with gray (πυρράκης, πολιός). The traditions of his beauty and size as a child have been already mentioned. They are continued to his manhood in the Gentile descriptions. "Tall and dignified," says Artapanus (μάκρος, ἀξιωματικός)—"Wise and beautiful as his father Joseph" (with a curious confusion of genealogies), says Justin (xxxvi. 2).

But beyond the slight glance at his infantine beauty, no hint of this grand personality is given in the Bible. What is described is rather the reverse. The only point there brought out is a singular and unlooked for infirmity. "O my Lord, I am not eloquent, neither heretofore nor since Thou hast spoken to Thy servant; but I am slow of speech and of a slow tongue.... How shall Pharaoh hear me, which am of uncircumcised lips?" (*i. e.* slow, without words, stammering, hesitating: *ἰσχνόφωνος καὶ βαρύγλωσσος*, LXX.), his "speech contemptible," like St. Paul's—like the English Cromwell (comp. Carlyle's *Cromwell*, ii. 219)—like the first efforts of the Greek Demosthenes. In the solution of this difficulty which Moses offers, we read both the disinterestedness, which is the most distinct trait of his personal character, and the future relation of the two brothers. "Send, I pray Thee, by the hand of him whom Thou wilt send" (*i. e.* "make any one Thy apostle rather than me"). In outward appearance this prayer was granted. Aaron spoke and acted for Moses, and was the permanent inheritor of the sacred staff of power. But Moses was the inspiring soul behind; and so as time rolls on, Aaron, the prince and priest, has almost disappeared from view, and Moses, the dumb, backward, disinterested prophet, is in appearance, what he was in truth, the foremost leader of the chosen people.

III. The history of Moses henceforth is the history of Israel for forty years. But as the incidents of this history are related in other articles, under the heads of EGYPT, EXODUS, PLAGUES, SINAI, LAW, PASSOVER, WANDERINGS, WILDERNESS, it will be best to confine ourselves here to such indications of his personal character as transpire through the general framework of the narrative.

It is important to trace his relation to his immediate circle of followers. In the Exodus, he takes the decisive lead on the night of the flight. Up to that point he and Aaron appear almost on an equality. But after that, Moses is usually mentioned alone. Aaron still held the second place, but the character of interpreter to Moses which he had borne in speaking to Pharaoh withdraws, and it would seem as if Moses henceforth became altogether what hitherto he had only been in part, the prophet of the people. Another who occupies a place nearly equal to Aaron, though we know but little of him, is HUR, of the tribe of Judah, husband of Miriam, and grandfather of the artist Bezaleel (Joseph. *Ant.* iii. 2, §4). He and Aaron are the chief supporters of Moses in moments of weariness or excitement. His adviser in regard to the route through the wilderness as well as in the judicial arrangements, was, as we have seen, JETHRO. His servant, occupying the same relation to him as Elisha to Elijah, or Gehazi to Elisha, was the youthful Hoshea (afterwards JOSHUA). MIRIAM always held the independent position to which her age entitled her. Her part was to supply the voice and song to her brother's prophetic power.

But Moses is incontestably the chief personage of the history, in a sense in which no one else is described before or since. In the narrative, the phrase is constantly recurring, "The Lord spake unto Moses," "Moses spake unto the children of Israel." In the traditions of the desert, whether late or early, his name predominates over that of every one else, "The Wells of Moses"—on the shores of the Red Sea. "The Mountain of Moses" (Jebel Mûsa)—near the convent of St. Catherine. The Ravine of Moses (Shuk Mûsa)—at Mount St. Catherine. The Valley of Moses (Wady Mûsa)—at Petra. "The Books of Moses" are so called as afterwards the Books of Samuel), in all probability from his being the chief subject of them. The very word "Mosaic" has been in later times applied as the proper name of no other saint of the O. T. to the whole religion. Even as applied to tesselated pavement ("Mosaic," Musivum, *μουσεῖον*, *μουσαϊκόν*), there is some probability that the expression is derived from the variegated pavement of the later Temple, which had then become the representative of the religion of Moses (see an Essay of Redslob, *Zeitschrift der Deutsch. Morgenl. Gesells.* xiv. 663).

It has sometimes been attempted to reduce this great character into a mere passive instrument of the Divine Will, as though he had himself borne no conscious part in the actions in which he figures, or the messages which he delivers. This, however, is as incompatible with the general tenor of the Scriptural account, as it is with the common language in which he has been described by the Church in all ages. The frequent addresses of the Divinity to him no more contravene his personal activity and intelligence, than in the case of Elijah, Isaiah, or St. Paul. In the N. T. the Mosaic legislation is expressly ascribed to him:—"*Moses* gave you circumcision" (John vii. 22). "*Moses*, because of the hardness of your hearts, suffered you" (Matt. xix. 8). "Did not *Moses* give you the law?" (John vii. 19). "*Moses* accuseth you" (John v. 45). St. Paul goes so far as to speak of him as the founder of the Jewish religion: "They were all baptized unto *Moses*" (1 Cor. x. 2). He is constantly called "a Prophet." In the poetical language of the O. T. (Num. xxi. 18; Deut. xxxiii. 21), and in the popular language both of Jews and Christians, he is known as "the Lawgiver." The terms in which his legislation is described by Philo (*V. M.* ii. 1-4) is decisive as to the ancient Jewish view. He must be considered, like all the saints and heroes of the Bible, as a man, of marvellous gifts, raised up by Divine Providence, for a special purpose; but as led, both by his own disposition and by the peculiarity of the Revelation which he received, into a closer communion with the invisible world than was vouchsafed to any other in the Old Testament.

There are two main characters in which he appears, as a Leader and as a Prophet. The two are more frequently combined in the East than in the West. Several remarkable instances occur in the history of Mahometanism:—Mahomet himself, Abd-el-Kader in Algeria, Schamyl in Circassia.

(*a.*) As a Leader, his life divides itself into the two

epoch—of the march to Sinai; the march from Sinai to Kadesh; and the conquest of the Transjordanic kingdoms. Of his natural gifts for this capacity, we have but few means of judging. The two main difficulties which he encountered were the reluctance of the people to submit to his guidance, and the impracticable nature of the country which they had to traverse. The patience with which he bore their murmurs is often described—at the Red Sea, at the apostacy of the golden calf, at the rebellion of Korah, at the complaints of Aaron and Miriam. The incidents with which his name was specially connected both in the sacred narrative, and in the Jewish, Arabian, and heathen traditions, were those of supplying water, when most wanted. This is the only point in his life noted by Tacitus, who describes him as guided to a spring of water by a herd of wild asses (*Hist.* v. 3). In the Pentateuch these supplies of water take place at Marah, at Horeb, at Kadesh, and in the land of Moab. That at Marah is produced by the sweetening of waters through a tree in the desert, those at Horeb and at Kadesh by the opening of a rift in the "rock" and in the "cliff;" that in Moab, by the united efforts, under his direction, of the chiefs and of the people (Num. xxi. 18).[a] (See Philo, *V. M.* i. 40.) Of the three first of these incidents, traditional sites, bearing his name, are shown in the desert at the present day, though most of them are rejected by modern travellers. One is *Ayun Músa*, "the wells of Moses," immediately south of Suez, which the tradition (probably from a confusion with Marah) ascribes to the rod of Moses. Of the water at Horeb, two memorials are shown. One is the *Shuk Músa*, or "cleft of Moses," in the side of Mount St. Catherine, and the other is the remarkable stone, first mentioned expressly in the Koran (ii. 57), which exhibits the 12 marks or mouths out of which the water is supposed to have issued for the 12 tribes.[b] The fourth is the celebrated "Sik," or ravine, by which Petra is approached from the East, and which, from the story of its being torn open by the rod of Moses, has given his name (the *Wady Músa*) to the whole valley. The quails and the manna are less directly ascribed to the intercession of Moses. The brazen serpent that was lifted up as a sign of the Divine protection against the snakes of the desert (Num. xxi. 8, 9), was directly connected with his name, down to the latest times of the nation (2 K. xviii. 4; John iii. 14). Of all the relics of his time, with the exception of the Ark, it was the one longest preserved. [NEHUSHTAN.]

The route through the wilderness is described as having been made under his guidance. The particular spot of the encampment is fixed by the cloudy pillar. But the direction of the people first to the Red Sea, and then to Mount Sinai (where he had been before), is communicated through Moses, or given by him. According to the tradition of Memphis, the passage of the Red Sea was effected through Moses's knowledge of the movement of the tide (Eus. *Praep. Ev.* ix. 27). And in all the wanderings from Mount Sinai he is said to have had the assistance of Jethro. In the Mussulman legends, as if to avoid this appearance of human aid, the place of Jethro is taken by El Khudr, the mysterious benefactor of mankind (D'Herbelot, *Moussa*). On approaching Palestine the office of the leader becomes blended with that of the general or the conqueror. By Moses the spies were sent to explore the country. Against his advice took place the first disastrous battle at Hormah. To his guidance is ascribed the circuitous route by which the nation approached Palestine from the East, and to his generalship the two successful campaigns in which SIHON and OG were defeated. The narrative is told so shortly, that we are in danger of forgetting that at this last stage of his life Moses must have been as much a conqueror and victorious soldier as Joshua.

(*b.*) His character as a Prophet is, from the nature of the case, more distinctly brought out. He is the first as he is the greatest example of a Prophet in the O. T. The name is indeed applied to Abraham before (Gen. xx. 7), but so casually as not to enforce our attention. But, in the case of Moses, it is given with peculiar emphasis. In a certain sense, he appears as the centre of a prophetic circle, now for the first time named. His brother and sister were both endowed with prophetic gifts. Aaron's fluent speech enabled him to act the part of Prophet for Moses in the first instance, and Miriam is expressly called "the Prophetess." The seventy elders, and Eldad and Medad also, all "prophesied" (Num. xi. 25-27).

But Moses (at least after the Exodus) rose high above all these. The others are spoken of as more or less inferior. Their communications were made to them in dreams and figures (Deut. xiii. 1-4; Num. xii. 6). But "Moses was not so." With him the Divine revelations were made, "mouth to mouth, even apparently, and not in dark speeches, and the similitude of JEHOVAH shall he behold" (Num. xii. 8). In the Mussulman legends his surname is "Kelim Allah," "the spoken to by God." Of the especial modes of this more direct communication, four great examples are given, corresponding to four critical epochs in his historical career, which help us in some degree to understand what is meant by these expressions in the sacred text. (1.) The appearance of the Divine presence in the flaming acacia-tree has been already noticed. The usual pictorial representations of that scene—of a winged human form in the midst of the bush, belongs to Philo (*V. M.* i. 12), not to the Bible. No form is described. "The Angel," or "Messenger," is spoken of as being "in the flame." On this it was that Moses was afraid to look, and hid his face, in order to hear the Divine voice (Ex. iii. 2-6). (2.) In the giving of the Law from Mount Sinai, the outward form of the revelation was a thick darkness as of a thunder-cloud, out of which proceeded a voice (Ex. xix. 19, xx. 21). The revelation on this occasion was especially of the Name of JEHOVAH. Outside this cloud Moses himself remained on the mountain (Ex. xxiv. 1, 2, 15), and received the voice, as from the cloud, which revealed the Ten Commandments, and a short code of laws in addition (Ex. xx.-xxiii). On two occasions he is described as having penetrated within the darkness, and remained there, successively, for two periods of forty days, of which the second was spent in absolute seclusion and fasting (Ex. xxiv. 18, xxxiv. 28). On the first occasion he received instructions respecting the tabernacle, from "a pattern showed to him" (xxv. 9, 40; xxvi., xxvii.), and respecting the priesthood (xxviii.-xxxi.). Of the second occasion hardly anything is told us. But each of these periods was concluded by the production of the two slabs or tables of granite, containing the successive editions

[a] An illustration of these passages is to be found in one of the representations of Rameses II. (contemporary with Moses), in like manner calling out water from the desert-rocks (see Brugsch, *Hist. de l'Eg.* i. p. 153).

[b] See *S. & P.*, 46-7, also Wolff's *Travels*, 2nd Ed. 128.

of the Ten Commandments (Ex. xxxii. 15, 16). On the first of the two occasions the ten moral commandments are those commonly so called (comp. Ex. xx. 1-17, xxxii. 15; Deut. v. 6-22). On the second occasion (if we take the literal sense of Ex. xxxiv. 27, 28), they are the ten (chiefly) ceremonial commandments of Ex. xxxiv. 14-26. The first are said to have been the writing of God (Ex. xxxi. 18, xxxii. ..; Deut. v. 22); the second, the writing of Moses (Ex. xxxiv. 28). (3) It was nearly at the close of those communications in the mountains of Sinai that an especial revelation was made to him personally, answering in some degree to that which first called him to his mission. In the despondency produced by the apostacy of the molten calf, he besought JEHOVAH to show him "His glory." The wish was thoroughly Egyptian. The same is recorded of Amenoph, the Pharaoh preceding the Exodus. But the Divine answer is thoroughly Biblical. It announced that an actual vision of God was impossible. "Thou canst not see my face; for there shall no man see my face and live." He was commanded to hew two blocks of stone, like those which he had destroyed. He was to come absolutely alone. Even the flocks and herds which fed in the neighbouring valleys were to be removed out of the sight of the mountain (Ex. xxxiii. 18, 20; xxxiv. 1, 3). He took his place on a well-known or prominent rock ("the rock") (xxxiii. 21). The cloud passed by (xxxiv. 5, xxxiii. 22). A voice proclaimed the two immutable attributes of God, Justice and Love—in words which became part of the religious creed of Israel and of the world (xxxiv. 6, 7). The importance of this incident in the life of Moses is attested not merely by the place which it holds in the sacred record, but by the deep hold that it has taken of the Mussulman traditions, and the local legends of Mount Sinai. It is told, with some characteristic variations, in the Koran (vii. 139), and is commemorated in the Mussulman chapel erected on the summit of the mountain which from this incident (rather than from any other) has taken the name of the Mountain of Moses (*Jebel Mûsa*). A cavity is shown in the rock, as produced by the pressure of the back of Moses, when he shrank from the Divine glory[1] (*S. & P.* 30).

(4). The fourth mode of Divine manifestation was that which is described as commencing at this juncture, and which continued with more or less continuity through the rest of his career. Immediately after the catastrophe of the worship of the calf, and apparently in consequence of it, Moses removed the chief tent[2] outside the camp, and invested it with a sacred character under the name of "the Tent or Tabernacle of the Congregation" (xxxiii. 7). This tent became henceforth the chief scene of his communications with God. He left the camp, and it is described how, as in the expectation of some great event, all the people rose up and stood every man at his tent door, and looked—gazing after Moses until he disappeared within the tent. As he disappeared the entrance was closed behind him by the cloudy pillar, at the sight of which[3] the people prostrated themselves (xxxiii. 10). The communications within the tent were described as being still more intimate than those on the mountain. "JEHOVAH spake unto Moses face to face, as a man speaketh unto his friend" (xxxiii. 11). He was apparently accompanied on these mysterious visits by his attendant Hoshea (or Joshua), who remained in the tent after his master had left it (xxxiii. 11). All the revelations contained in the books of Leviticus and Numbers seem to have been made in this manner (Lev. i. 1; Num. i. 1).

It was during these communications that a peculiarity is mentioned which apparently had not been seen before. It was on his final descent from Mount Sinai, after his second long seclusion, that a splendour shone on his face, as if from the glory of the Divine Presence. It is from the Vulgate translation of "ray" (קָרַן), "*cornutam habens faciem*," that the conventional representation of the *horns* of Moses has arisen. The rest of the story is told so differently in the different versions that both must be given. (1.) In the A. V. and most Protestant versions, Moses is said to wear a veil in order to hide the splendour. In order to produce this sense, the A. V. of Ex. xxxiv. 33 reads, "and [till] Moses had done speaking with them"—and other versions, "he *had* put on the veil." (2.) In the LXX. and the Vulgate, on the other hand, he is said to put on the veil, not during, but after, the conversation with the people—in order to hide, not the splendour, but the vanishing away of the splendour; and to have worn it till the moment[4] of his return to his Divine Presence in order to rekindle the light there. With this reading agrees the obvious meaning of the Hebrew words, and it is this rendering of the sense, which is followed by St. Paul in 2 Cor. iii. 13, 14, where he contrasts the fearlessness of the Apostolic teaching with the concealment of that of the O. T. "We have no fear, as Moses had, that our glory will pass away."

There is another form of the prophetic gift, in which Moses more nearly resembles the later prophets. We need not here determine (what is best considered under the several books which bear his name, PENTATEUCH, &c.) the extent of his authorship, or the period at which these books were put together in their present form. Eupolemus (Eus. *Praep. Ev.* ix. 26) makes him the author of letters. But of this the Hebrew narrative gives no indication. There are two portions of the Pentateuch, and two only, of which the actual *writing* is ascribed to Moses: (1.) The second Edition of the Ten Commandments (Ex. xxxiv. 28), (2.) The register of the Stations in the Wilderness (Num. xxxiii. 1). But it is clear that the prophetical office, as represented in the history of Moses, included the poetical form of composition which characterizes the Jewish prophecy generally. These poetical utterances, whether connected with Moses by ascription or by actual authorship, enter so largely into the full Biblical conception of his character, that they must be here mentioned.

1. "The song which Moses and the children of Israel sung" (after the passage of the Red Sea, Ex. xv. 1-19). It is, unquestionably, the earliest written account of that event; and, although it may have been in part, according to the conjectures of Ewald and Bunsen, adapted to the sanctuary of Gerizim or Shiloh, yet its framework and ideas are essentially Mosaic. It is probably this song to which allusion is made in Rev. xv. 2, 3: "They stand

[1] It is this moment which is seized in the recent sculpture by Mr. Woolner in Llandaff Cathedral.

[2] According to the LXX. it was his own tent.

[3] Ewald, *Alterthümer*, p. 139

[4] In Ex. xxxiv. 34, 35, the Vulgate, apparently by following a different reading, בּוֹ, "with them" for עִמּוֹ "with him," differs both from the LXX and A. V.

as the sea of glass mingled with fire . . . and sing the song of Moses the servant of God."

2. A fragment of a war-song against Amalek—

"As the hand is on the throne of Jehovah,
So will Jehovah war with Amalek
From generation to generation."

(Ex. xvii. 16).

3. A fragment of a lyrical burst of indignation—

"Not the voice of them that shout for mastery,
Nor the voice of them that cry for being overcome,
But the noise of them that sing do I hear."

(Ex. xxxii. 18).

4. Probably, either from him or his immediate poetic followers, the fragments of war-songs in Num. xxi. 14, 15, 27-30, preserved in the "book of the wars of Jehovah," Num. xxi. 14; and the song to the well, xxi. 16, 17, 18.

5. The song of Moses (Deut. xxxii. 1-43), setting forth the greatness and the failings of Israel. It is remarkable as bringing out with much force the idea of God as the Rock (xxxii. 4, 15, 18, 30, 31, 37). The special allusions to the pastoral riches of Israel point to the trans-Jordanic territory as the scene of its composition (xxxii. 13, 14).

6. The blessing of Moses on the tribes (Deut. xxxiii. 1-29). If there are some allusions in this poem to circumstances only belonging to a later time—such as the migration of Dan, xxxiii. 22), yet there is no one, in whose mouth it could be so appropriately placed, as in that of the great leader on the eve of the final conquest of Palestine. This poem combined with the similar blessing of Jacob (Gen. xlix.), embraces a complete collective view of the characteristics of the tribes.

7. The 90th Psalm, "A prayer of Moses, the man of God." The title, like all the titles of the Psalms is of doubtful authority—and the Psalm has often been referred to a later author. But Ewald (*Psalmen*, p. 91) thinks that, even though this be the case, it still breathes the spirit of the venerable lawgiver. There is something extremely characteristic of Moses, in the view taken, as from the summit or base of Sinai, of the eternity of God, greater even than the eternity of mountains, in contrast with the fleeting generations of man. One expression in the Psalm, as to the limit of human life (70, or at most 80 years) in verse 10, would, if it be Mosaic, fix its date to the stay at Sinai. Jerome (*Adv. Ruffin.* i. §13), on the authority of Origen, ascribes the next eleven Psalms to Moses. Cosmas (*Cosmogr.* v. 223) supposes that it is by a younger Moses of the time of David.

How far the gradual development of these revelations or prophetic utterances had any connexion with his own character and history, the materials are not such as to justify any decisive judgment. The Egyptian education must, on the one hand, have familiarized him with much of the ritual of the Israelite worship. The coincidences between the arrangements of the priesthood, the dress, the sacrifices, the ark, in the two countries, are decisive. On the other hand, the proclamation of the Unity of God not merely as a doctrine confined to the priestly caste, but communicated to the whole nation, implies a distinct antagonism, almost a conscious recoil against the Egyptian system. And the absence of the doctrine of a future state (without adopting to the full extent the paradox of Warburton) proves at least a remarkable independence of the Egyptian theology, in which that great doctrine held so prominent a place. Some modern critics have supposed that the Levitical ritual was an after-growth of the Mosaic system, necessitated or suggested by the incapacity of the Israelites to retain the higher and simpler doctrine of the Divine Unity,—as proved by their return to the worship of the Heliopolitan calf under the sanction of the brother of Moses himself. There is no direct statement of this connexion in the sacred narrative. But there are indirect indications of it, sufficient to give some colour to such an explanation. The event itself is described as a crisis in the life of Moses, almost equal to that in which he received his first call. In an agony of rage and disappointment he destroyed the monument of his first revelation (Ex. xxxii. 19). He threw up his sacred mission (*ib.* 32). He craved and he received a new and special revelation of the attributes of God to console him (*ib.* xxxiii. 18). A fresh start was made in his career (*ib.* xxxiv. 29). His relation with his countrymen henceforth became more awful and mysterious (*ib.* 32-35). In point of fact, the greater part of the details of the Levitical system were subsequent to this catastrophe. The institution of the Levitical tribe grew directly out of it (xxxii. 26). And the inferiority of this part of the system to the rest is expressly stated in the Prophets, and expressly connected with the idolatrous tendencies of the nation. "Wherefore I gave them statutes that were not good, and judgments whereby they should not live" (Ez. xx. 25). "I spake not unto your fathers, nor commanded them in the day that I brought them out of the land of Egypt, concerning burnt-offerings or sacrifices" (Jer. vii. 22).

Other portions of the Law, such as the regulations of slavery, of blood-feud, of clean and unclean food, were probably taken, with the necessary modifications, from the customs of the desert-tribes.

But the distinguishing features of the law of Israel, which have remained to a considerable extent in Christendom, are peculiarly Mosaic:—the Ten Commandments; and the general spirit of justice, humanity, and liberty, that pervades even the more detailed and local observances.

The prophetic office of Moses, however, can only be fully considered in connexion with his whole character and appearance. "By a prophet Jehovah brought Israel out of Egypt, and by a prophet was he preserved" (Hos. xii. 13). He was in a sense peculiar to himself the founder and representative of his people. And, in accordance with this complete identification of himself with his nation, is the only strong personal trait which we are able to gather from his history. "The man Moses was very meek, above all the men that were upon the face of the earth" (Num. xii. 3). The word "meek" is hardly an adequate reading of the Hebrew term עָנָו, which should be rather "much enduring;" and, in fact, his onslaught on the Egyptian, and his sudden dashing the tables on the ground, indicate rather the reverse of what we should call "meekness." It represents what we should now designate by the word "disinterested." All that is told of him indicates a withdrawal of himself, a preference of the cause of his nation to his own interests, which makes him the most complete example of Jewish patriotism. He joins his countrymen in their degrading servitude (Ex. ii. 11, v. 4). He forgets himself to avenge their wrongs (ii. 14). He desires that his brother may take the lead instead of himself (Ex. iv. 13). He wishes that not he only, but all the nation were gifted alike:—"Envyest thou for my sake?" (Num. xi 29). When the offer is

made that the people should be destroyed, and that he should be made "a great nation" (Ex. xxxii. 10), he prays that they may be forgiven—"if not, blot me, I pray Thee, out of Thy book which Thou hast written" (xxxii. 32). His sons were not raised to honour. The leadership of the people passed, after his death, to another tribe. In the books which bear his name, Abraham, and not himself, appears as the real father of the nation. In spite of his great pre-eminence, they are never "the children of Moses."

In exact conformity with his life is the account of his end. The Book of Deuteronomy describes, and is, the long last farewell of the prophet to his people. It takes place on the first day of the eleventh month of the fortieth year of the wanderings, in the plains of Moab (Deut. i. 3, 5), in the palm-groves of Abila (Joseph. *Ant.* iv. 8, §1). [ABEL-SHITTIM.] He is described as 120 years of age, but with his sight and his freshness of strength unabated (Deut. xxxiv. 7). The address from ch. i. to ch. xxx. contains the recapitulation of the Law. Joshua is then appointed his successor. The Law is written out, and ordered to be deposited in the Ark (ch. xxxi.). The song and the blessing of the tribes conclude the farewell (ch. xxxii. xxxiii.).

And then comes the mysterious close. As if to carry out to the last the idea that the prophet was to live not for himself, but for his people, he is told that he is to see the good land beyond the Jordan, but not to possess it himself. The sin for which this penalty was imposed on the prophet is difficult to ascertain clearly. It was because he and Aaron rebelled against Jehovah, and "believed Him not to sanctify Him," in the murmurings at Kadesh (Num. xx. 12, xxvii. 14; Deut. xxxii. 51), or, as it is expressed in the Psalms (cvi. 33), because he spoke unadvisedly with his lips. It seems to have been a feeling of distrust. "*Can* we (not, as often rendered, can *we*) bring water out of the cliff?" (Num. xx. 10; LXX. μὴ ἐξάξομεν, "surely we cannot.") The Talmudic tradition, characteristically, makes the sin to be that he called the chosen people by the opprobrious name of "rebels." He ascends a mountain in the range which rises above the Jordan valley. Its name is specified so particularly that it must have been well known in ancient times, though, owing to the difficulty of exploring the eastern side of the Jordan, it is unknown at present. The mountain tract was known by the general name of THE PISGAH. Its summits apparently were dedicated to different divinities (Num. xxiii. 14). On one of these, consecrated to Nebo, Moses took his stand, and surveyed the four great masses of Palestine west of the Jordan—so far as it could be discerned from that height. The view has passed into a proverb for all nations. In two remarkable respects it illustrates the office and character of Moses. First, it was a view, in its full extent, to be imagined rather than actually seen. The foreground alone could be clearly discernible: its distance had to be supplied by what was beyond, though suggested by what was within, the actual prospect of the seer.

Secondly, it is the likeness of the great discoverer pointing out what he himself will never reach. To English readers this has been made familiar by the application of this passage to Lord Bacon, originally in the noble poem of Cowley, and then drawn out at length by Lord Macaulay.

"So Moses the servant of Jehovah died there in the land of Moab, according to the word of Jehovah, and He buried him in a 'ravine' in the land of Moab, 'before' Beth-peor—but no man knoweth of his sepulchre unto this day . . . And the children of Israel wept for Moses in the plains of Moab thirty days" (Deut. xxxiv. 5-8). This is all that is said in the sacred record. Jewish, Arabian, and Christian traditions have laboured to fill up the detail. "Amidst the tears of the people—the women beating their breasts, and the children giving way to uncontrolled wailing—he withdrew. At a certain point in his ascent he made a sign to the weeping multitude to advance no farther, taking with him only the elders, the high-priest Eliezer, and the general Joshua. At the top of the mountain he dismissed the elders—and then, as he was embracing Eliezar and Joshua, and still speaking to them, a cloud suddenly stood over him, and he vanished in a deep valley. He wrote the account of his own death[p] in the sacred books, fearing lest he should be deified" (Joseph. *Ant.* iv. 8, 48). "He died in the last month of the Jewish year."[q] After his death he is called "Melki" (Clem. Al. *Strom.* i. 343).

His grave, though studiously concealed in the sacred narrative, in a manner which seems to point a warning against the excessive veneration of all sacred tombs, and though never acknowledged by the Jews, is shown by the Mussulmans on the east (and therefore the wrong) side of the Jordan, between the Dead Sea and St. Saba (*S. & P.* p. 302).

The Mussulman traditions are chiefly exaggerations of the O. T. accounts. But there are some stories independent of the Bible. One is the striking story (Koran, xviii. 65-80) on which is founded Parnell's *Hermit*. Another is the proof given by Moses of the existence of God to the atheist king (Chardin, x. 836, and in Fabricius, 836).

In the O. T. the name of Moses does not occur as frequently after the close of the Pentateuch, as might be expected. In the Judges it occurs only once—in speaking of the wandering Levite Jonathan his grandson. In the Hebrew copies, followed by the A. V., it has been superseded by "Manasseh," in order to avoid throwing discredit on the family of so great a man. [MANASSEH, p. 225 *b*.] In the Psalms and the Prophets, however, he is frequently named as the chief of the prophets.

In the N. T. he is referred to partly as the representative of the Law—as in the numerous passages cited above—and in the vision of the Transfiguration, where he appears side by side with Elijah. It is possible that the peculiar word rendered "decease" (ἔξοδος)—used only in Luke ix. 31 and 2 Pet. i. 15, where it may have been drawn from the context of the Transfiguration—was suggested by the Exodus of Moses.

As the author of the Law he is contrasted with Christ, the Author of the Gospel: "The law was given by Moses" (John i. 17). The ambiguity and transitory nature of his glory is set against the permanence and clearness of Christianity (2 Cor. iii. 13-18), and his mediatorial character ("the law in the hand of a mediator") against the unbroken communication of God in Christ (Gal. iii. 19). His "service" of God is contrasted with Christ's sonship (Heb. iii. 5, 6). But he is also spoken of as a likeness of Christ; and, as this is a point of view

[p] According to the view also of Philo (*V. M.* iii. 39), Moses wrote the account of his death.

[q] In the Arabic traditions the 7th of Adar (Jahn's *Bib.* 388).

which has been almost lost in the Church, compared with the more familiar comparisons of Christ to Adam, David, Joshua, and yet has as firm a basis in fact as any of them, it may be well to draw it out in detail.

1. Moses is, as it would seem, the only character of the O. T. to whom Christ expressly likens Himself, —"Moses wrote of me" (John v. 46). It is uncertain to what passage our Lord alludes, but the general opinion seems to be the true one—that it is the remarkable prediction in Deut. xviii. 15, 18, 19,—"The Lord thy God will raise up unto thee a prophet from *the midst of thee*, from thy brethren, like unto me; unto him ye shall hearken I will raise them up a prophet from among their brethren, like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him. And it shall come to pass, that whosoever will not hearken unto my words which he shall speak in my name, I will require it of him." This passage is also expressly quoted by Stephen (Acts vii. 37), and it is probably in allusion to it, that at the Transfiguration, in the presence of Moses and Elijah, the words were uttered, "Hear ye Him."

It suggests three main points of likeness:—

(*a.*) Christ was, like Moses, the great Prophet of the people—the last, as Moses was the first. In greatness of position, none came between them. Only Samuel and Elijah could by any possibility be thought to fill the place of Moses, and they only in a very secondary degree. Christ alone appears, like Moses, as the Revealer of a new name of God—of a new religious society on earth. The Israelites "were baptized unto Moses" (1 Cor. x. 2). The Christians were baptized unto Christ. There is no other name in the Bible that could be used in like manner.

(*b.*) Christ, like Moses, is a Lawgiver: "Him shall ye hear." His whole appearance as a Teacher, differing in much beside, has this in common with Moses, unlike the other prophets, that He lays down a code, a law, for His followers. The Sermon on the Mount almost inevitably suggests the parallel of Moses on Mount Sinai.

(*c.*) Christ, like Moses, was a Prophet out of the midst of the nation—"from their brethren." As Moses was the entire representative of his people, feeling for them more than for himself, absorbed in their interests, hopes, and fears, so, with reverence be it said, was Christ. The last and greatest of the Jewish prophets, He was not only a Jew by descent, but that Jewish descent is insisted upon as an integral part of His appearance. Two of the Gospels open with His genealogy. "Of the Israelites came Christ after the flesh" (Rom. ix. 5). He wept and lamented over His country. He confined himself during His life to their needs. He was not sent "but unto the lost sheep of the house of Israel" (Matt. xv. 24). It is true that His absorption into the Jewish nationality was but the symbol of His absorption into the far wider and deeper interests of all humanity. But it is only by understanding the one that we are able to understand the other; and the life of Moses is the best means of enabling us to understand them both.

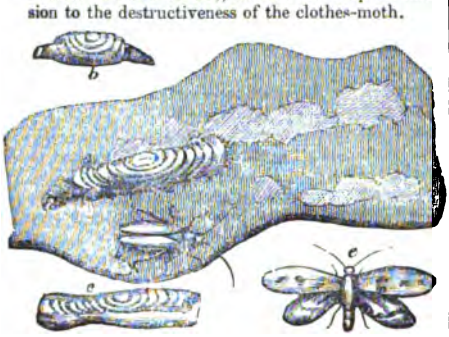
2. In Heb. iii. 1-19, xii. 24-29, Acts vii. 37 Christ is described, though more obscurely, as the Moses of the new dispensation—as the Apostle, or Messenger, or Mediator, of God to the people—as the Controller and Leader of the flock or household of God. No other person in the O. T. could have furnished this parallel. In both, the revelation was communicated partly through the life, partly through the teaching; but in both the Prophet was incessantly united with the Guide, the Ruler, the Shepherd.

3. The details of their lives are sometimes, though not often, compared. Stephen (Acts vii. 24-28, 35) dwells, evidently with this view, on the likeness of Moses in striving to act as a peacemaker, and misunderstood and rejected on that very account. The death of Moses, especially as related by Josephus (*ut supra*), immediately suggests the Ascension of Christ; and the retardation of the rise of the Christian Church, till after its Founder was withdrawn, gives a moral as well as a material resemblance. But this, though dwelt upon in the services of the Church, has not been expressly laid down in the Bible.

In Jude 9 is an allusion to an altercation between Michael and Satan over the body of Moses. It has been endeavoured (by reading Ἰησοῦ for Μωυσέως) to refer this to Zech. iii. 2. But it probably refers to a lost apocryphal book, mentioned by Origen, called the 'Ascension, or Assumption, of Moses.' All that is known of this book is given in Fabricius, *Cod. Pseudepigr. V. T.* i. 839-844. The "dispute of Michael and Satan" probably had reference to the concealment of the body to prevent idolatry. Gal. v. 6 is by several later writers said to be a quotation from the 'Revelation of Moses' (Fabricius, *Ibid.* i. 838)." [A. P. S.]

MOSOL'LAM (Μοσόλλαμος: *Bosoramus*) = MESHULLAM 11 (1 Esdr. ix. 14; comp. Ezr. x. 15).

MOSOL'LAMON (Μοσόλλαμος: *Mosolamus*) = MESHULLAM 10 (1 Esdr. viii. 44; comp. Ezr. viii. 16).



MOTH (עָשׁ,[a] *ash*: σής, ἀράχνη, ταρσχή, χρόνος; Sym. εὐρώς; Aq. βρῶσις: *tinea, aranea*). By the Hebrew word we are certainly to understand some species of clothes-moth (*tinea*); for the Greek σής, and the Latin *tinea*, are used by ancient authors to denote either the larva or the imago of this destructive insect, and the context of the several passages where the word occurs is sufficiently indicative of the animal. Reference to the destructive habits of the clothes-moth is made in Job iv. 19, xiii. 28; Ps. xxxix. 11; Is. l. 9, li. 8; Hos. v. 12; Matt. vi. 19, 20; Luke xii. 33, and in Ecclus. xix. 3, xlii. 13; indeed, in every instance but one where mention of this insect is made, it is in reference to its habit of destroying garments; in Job xxvii. 18, "He buildeth his house as a moth," it is clear that allusion is made either to the well-known case of the *Tinea pellio-*

* In later history, the name of Moses has not been forgotten. In the early Christian Church he appears in the Roman catacombs in the likeness of St. Peter, partly, doubtless, from his being the leader of the Jewish, as Peter of the Christian Church, partly from his connexion with the Rock. It is as striking the Rock that he appears under Peter's name.

In the Jewish, as in the Arabian nation, his name has in later years been more common than in former ages, though never occurring again (perhaps, as in the case of David, and of Peter in the Papacy, from motives of reverence) in the earlier annals, as recorded in the Bible. Moses Maimonides, Moses Mendelssohn, Mûsa the conqueror of Spain, are obvious instances. Of the first of these three a Jewish proverb testifies that "From Moses to Moses there was none like Moses."

[a] From the root עָשַׁשׁ, "to fall away."

nella (see woodcut), or some allied species, or else to the leaf-building larvae of some other member of the *Lepidoptera*. "I will be to Ephraim as a moth," in Hos. v. 12, clearly means "I will consume him as a moth consumes garments." The expression of the A. V. in Job iv. 19, "are crushed before the moth," is certainly awkward and ambiguous; for the different interpretations of this passage see Rosenmüller's *Schol.* ad loc., where it is argued that the words rendered "before the moth" signify, "*as* a moth (destroys garments)." So the Vulg. "consumentur veluti a tinea" (for this use of the Hebrew phrase, see 1 Sam. i. 16. Similar is the Latin *ad faciem*, in Plaut. *Cistell.* i. 1, 73). Others take the passage thus—"who are crushed even as the frail moth is crushed." Either sense will suit the passage; but see the different explanation of Lee (*Comment. on Job*, ad. loc.). Some writers understand the word *βρῶσις* of Matt. vi. 19, 20, to denote some species of moth (*tinea granella*?); others think that *σὴς καὶ βρῶσις* by hendiadys = *σὴς βιβρώσκουσα* (see Scultet. *Ex. Evang.* ii. c. 35). [RUST.] The Orientals were fond of forming repositories of rich apparel (Hammond, *Annot.* on Matt. vi. 19), whence the frequent allusion to the destructiveness of the clothes-moth.

The Clothes-Moth. (*Tinea pellionella.*)
a. Larva in a case constructed out of the substance on which it is feeding.
b. Case cut at the ends.
c. Case cut open by the larva for enlarging it.
d, *e*. The perfect insect.

The British tineae which are injurious to clothes, fur, &c., are the following: *tinea tapetzella*, a common species often found in carriages, the larva feeding under a gallery constructed from the lining; *t. pellionella*, the larva of which constructs a portable case out of the substance in which it feeds, and is very partial to feathers. This species, writes Mr. H. T. Stainton to the author of this article, "certainly occurs in Asia Minor, and I think you may safely conclude, that it and *biselliata* (an abundant species often found in horse-hair linings of chairs) will be found in any old furniture warehouse at Jerusalem." For an interesting account of the habits and economy of the clothes-moths, see Rennie's *Insect Architecture*, p. 190, and for a systematic enumeration of the British species of the genus *Tinea*, see *Insecta Britannica*, vol. iii. The clothes-moths belong to the group *Tineina*, order *Lepidoptera*. For the Hebrew עָשׁ (*Sás*) see WORM. [W. H.]

MOTHER (אֵם: *μήτηρ*: *mater*). The superiority of the Hebrew over all contemporaneous systems of legislation and of morals is strongly shown in the higher estimation of the mother in the Jewish family, as contrasted with most Oriental, as well as ancient Oriental and classical usage. The king's mother, as appears in the case of Bathsheba, was treated with especial honour (1 K. ii. 19; Ex. xx. 12; Lev. xix. 3; Deut. v. 16, xxi. 18, 21; Prov. x. 1, xv. 20, xvii. 25, xix. 15, xxxi. 1, 30). [CHILDREN; FATHER; KINDRED; KING, vol. ii. 19*b*; WOMEN.] [H. W. P.]

MOUNT, MOUNTAIN. In the O. T. our translators have employed this word to represent the following terms only of the original: (1) the Hebrew הַר, *har*, with its derivative or kindred הָרָר, *harar*, or הֹרֶר, *herer*; and (2) the Chaldee טוּר, *túr*: this last occurs only in Dan. ii. 35, 45. In the New Testament it is confined almost exclusively to representing *ὄρος*. In the Apocrypha the same usage prevails as in the N. T., the only exception being in 1 Macc. xii. 36, where "mount" is put for *ὕψος*, probably a mound, as we should now say, or embankment, by which Simon cut off the communication between the citadel on the Temple mount and the town of Jerusalem. For this Josephus (*Ant.* xiii. 5, §11) has *τεῖχος*, a wall.

But while they have employed "mount" and "mountain" for the above Hebrew and Greek terms only, the translators of the A. V. have also occasionally rendered the same terms by the English word "hill," thereby sometimes causing a confusion and disconnexion between the different parts of the narrative which it would be desirable to avoid. Examples of this are given under HILLS (vol. i. p. 816 *a*). Others will be found in 1 Macc. xii. 52, compared with xvi. 20; Jud. vi. 12, 13, compared with x. 10, xiii. 10.

The Hebrew word *har*, like the English "mountain," is employed both for single eminences more or less isolated, such as Sinai, Gerizim, Ebal, Zion, and Olivet, and for ranges, such as Lebanon. It is also applied to a mountainous country or district, as in Josh. xi. 16, where "the mountain of Israel" is the highland of Palestine, as opposed to the "valley and the plain;" and in Josh. xi. 21, xx. 7, where "the mountain of Judah" (A. V. in the former case "mountains") is the same as "the hill-country" in xxi. 11. Similarly Mount Ephraim (Har Ephraim) is the mountainous district occupied by that tribe, which is evident from the fact that the Mount Gaash, Mount Zemaraim, the hill of Phinehas, and the towns of Shechem, Shamir, Timnath-Serach, besides other cities (2 Chr. xv. 8), were all situated upon it.[a] So also the "mountain of the Amorites" is apparently the elevated country east of the Dead Sea and Jordan (Deut. i. 7, 19, 20), and "Mount Naphtali" the very elevated and hilly tract allotted to that tribe.

The various eminences or mountain-districts to which the word *har* is applied in the O. T. are as follow:—

ABARIM; AMANA; OF THE AMALEKITES; OF THE AMORITES; ARARAT; BAALAH; BAAL-HERMON; BASHAN; BETHEL; BETHER; CARMEL; EBAL; EPHRAIM; EPHRON; ESAU; GAASH; GERIZIM; GILBOA; GILEAD; HALAK; HERES; HERMON; HOR[b] (2); HOREB; OF ISRAEL;

[a] In the same manner "The Peak," originally the name of the highest mountain of Derbyshire, has now been extended to the whole district.

[b] Mount Hor is probably the "great mountain"—the "mountain of mountains," according to the Oriental custom of emphasizing an expression by doubling the word

ARIM; JUDAH; OLIVET, or OF OLIVES; MIZAR; MORIAH; NAPHTALI; NEBO; PARAN; PERAZIM; SAMARIA; SEIR; SEPHAR; SINAI; SION, SIRION, or SHENIR (all names for Hermon); SHAPHER; TABOR; ZALMON; ZEMARAIM; ZION.

The MOUNT OF THE VALLEY (הַר הָעֵמֶק: ὁ ὄρος Ἐμέκ; Alex. ὁ Ἔμακ: *mons convallis*) was a district on the East of Jordan, within the territory allotted to Reuben (Josh. xiii. 19), containing a number of towns. Its name recalls a similar juxtaposition of "mount" and "valley" in the name of "Langdale Pikes," a well-known mountain in our own country.

The word *har* became, at least in one instance, incorporated with the name which accompanied it, so as to form one word. Har Gerizzim, Mount Gerizim, appears in the writers of the first centuries of the Christian era as πόλις Ἀργαριζίν (Eupolemus), ὄρος Ἀργαρίζος (Marinus), *mons Agazaren* (*Itin. Hierosolym.* p. 587). This is also, as has already been noticed (see vol. i. p. 108 *a*), the origin of the name of Armageddon; and it may possibly be that of Atabyrion or Itabyrion, the form under which the name of Mount Tabor is given by the LXX., Stephanus of Byzantium, and others, and which may have been a corruption, for the sake of euphony, from Ἀραβύριον:—Ἀταβύριον, Ἰταβύριον.

The frequent occurrence throughout the Scriptures of personification of the natural features of the country is very remarkable. The following are, it is believed, all the words[a] used with this object in relation to mountains or hills:—

1. HEAD, רֹאשׁ, *Rôsh*, Gen. viii. 5; Ex. xix. 20; Deut. xxxiv. 1; 1 K. xviii. 42; (A. V. "top").

2. EARS, אָזְנוֹת, *Aznôth*. Aznoth-Tabor, Josh. xix. 34: possibly in allusion to some projection on the top of the mountain. The same word is perhaps found in UZZEN-SHERAH.

3. SHOULDER, כָּתֵף, *Câthêph*. Deut. xxxiii. 12; Josh. xv. 8, and xviii. 16 ("side"); all referring to the hills on or among which Jerusalem is placed. Josh. xv. 10, "the *side* of Mount Jearim."

4. SIDE, צַד, *Tsad*. (See the word for the "side" of a man in 2 Sam. ii. 16, Ex. iv. 4, &c.) Used in reference to a mountain in 1 Sam. xxiii. 26, 2 Sam. xiii. 34.

5. LOINS or FLANKS, כֶּסֶל, *Cisl̂th*. Chisloth-Tabor, Josh. xix. 12. It occurs also in the name of a village, probably situated on this part of the mountain, Ha-Cesulloth, הַכְּסֻלוֹת, *i. e.* the "loins" (Josh. xix. 18). [CHESULLOTH.]

6. RIB, צֶלַע, *Tsêlâ*. Only used once, in speaking of the Mount of Olives, 2 Sam. xvi. 13, and there translated "side," ἐκ πλευρᾶς τοῦ ὄρους.

7. BACK, שְׁכֶם, *Shecem*. Possibly the root of the name of the town *Shechem*, which may be derived from its situation, as it were on the back of Gerizim

8. THIGH, יֶרֶךְ, *Jarcâh*. (See the word for the "thigh" of a man in Judg. iii. 16, 21.) Applied to Mount Ephraim, Judg. xix. 1, 18; and to Lebanon, 2 K. xix. 23; Is. xxxvii. 24. Used also for the "sides" of a cave, 1 Sam. xxiv. 3.

9. The word translated "covert" in 1 Sam. xxv. 20 is סֵתֶר, *Sêther*, from סָתַר, "to hide," and probably refers to the shrubbery or thicket through which Abigail's path lay. In this passage "hill" should be "mountain."

The Chaldee מוֹר, *tûr*, is the name still given to the Mount of Olives, the *Jebel et-Tûr*.

The above is principally taken from the Appendix to Professor Stanley's *Sinai and Palestine*, §25. See also 249, and 338 *note*, of that work. [G.]

MOUNT (Is. xxix. 3; Jer. vi. 6, &c.). [SIEGE.]

MOUNTAIN OF THE AMORITES (הַר הָאֱמֹרִי: ὄρος τοῦ Ἀμορραίου: *Mons Amorrhaei*), specifically mentioned Deut. i. 19, 20 (comp. 44), in reference to the wandering of the Israelites in the desert. It seems to be the range which rises abruptly from the plateau of *et-Tîh*, running from a little S. of W. to the N. of E., and of which the extremities are the *Jebel Araif en-Nakah* west-ward, and *Jebel el-Mukrah* eastward, and from which line the country continues mountainous all the way to Hebron. [WILDERNESS OF WANDERING.] [H. H.]

MOURNING.[a] The numerous list of words employed in Scripture to express the various actions which are characteristic of mourning, show in a great degree the nature of the Jewish customs in this respect. They appear to have consisted chiefly in the following particulars:—

1. Beating the breast or others parts of the body.
2. Weeping and screaming in an excessive degree.
3. Wearing sad-coloured garments.
4. Songs of lamentation.
5. Funeral feasts.
6. Employment of persons, especially women, to lament.

[a] 2 K. xvi. 24, "the hill Samaria;" accurately, "the mountain Shomeron."

[a] The same reading is found in the LXX. of Jer. xlvii. 5, xlix. 4.

[a] With perhaps four exceptions, all the above terms are used in our own language. In addition, we speak of the "crown," the "instep," the "foot," the "toe," and the "breast" or "bosom" of a mountain or hill. "Top" is perhaps only a corruption of *knop*, "head." Similarly we speak of the "mouth," and the "gorge" (*i. e.* the "throat") of a ravine; and a "tongue" of land. Compare the word col, "neck," in French.

[a] 1. To mourn. אָבַל, πενθέω, *lugeo*.

2 (*a*) אָנַן, γογγύζω, and (*b*) אָנָה, πενθέω, *moereo*. From (*b*) תַּאֲנִיָּה and אֲנִיָּה, στεναγμός, *gemitus*. In Lam. ii. 5, πεπληθυσμένος, *humiliatus*; A. V. "mourning." = lamentation"

3. בְּכוֹת, πένθος, *fletus*; A. V. *Backuth*. Also בְּכִית. בָּכָא. Buxt. בָּכָה. κλαίω, *fleo*.

4. נְהִי. θρῆνος, *cantus*. In Ez. ii. 10, יְהִי. θρῆνος, *lamentatio*. In Ex. xxvii. 32, נְיָ. θρῆνος, *carmen lugubre*, from נָהָה. θρηνέω, *canto*.

5. נָגַד. θρηνέω, *lugeo*.

6. מִסְפֵּד. κοπετός, *planctus*, from סָפַד. κόπτω, *plango*. See Eccl. xii. 5.

7. קָדַר. σκοτίομαι, *contristor*, *i. e.* to wear dark-coloured clothes. Jer. viii. 21.

8. אָוֶן. *dolor*. [BEN-ONI.]

9. הֶגֶה. μέλος, *carmen*. Ez. ii. 10.

10. מְרוּחַ. θίασος, *convivium*; A. V. marg. "mourning feast." Jer. xvi. 5.

11. קִין, or יְקִין. "to beat." Hence part. מְקוֹנְנוֹת. Jer. ix. 16; θρηνοῦσαι, *lamentatrices*, "mourning women."

In N. T. θρηνέω ἀλαλάζω, ὀλολύζω, θορυβέομαι, πενθέω, κλαίω, κόπτομαι, κοπετός, πένθος, κλαυθμός, ὀδυρμός, *lugeo, fleo, ploro, plango, moereo ejulo, luctus, fletus, moeror, planctus, ululatus*

And we may remark that the same words, and in many points the same customs prevailed, not only in the case of death, but in cases of affliction or calamity in general.

(1.) Although in some respects a similarity exists between Eastern and Western usage, a similarity which in remote times and in particular nations was stronger than is now the case, the difference between each is on the whole very striking. One marked feature of Oriental mourning is what may be called its studied publicity, and the careful observance of the prescribed ceremonies. Thus Abraham, after the death of Sarah, came, as it were in state, to mourn and weep for her, Gen xxiii. 2. Job, after his misfortunes, "arose and rent his mantle (*meil*, DRESS, p. 454*b*) and shaved his head, and fell down upon the ground, on the ashes," Job. i. 20, ii. 8, and in like manner his friends, "rent every one his mantle, and sprinkled dust upon their heads, and sat down with him on the ground seven days and seven nights" without speaking, ii. 12, 13. We read also of high places, streets, and house-tops, as places especially chosen for mourning, not only by Jews but by other nations, Is. xv. 3; Jer. iii. 21, xlviii. 38; 1 Sam. xi. 4, xxx. 4; 2 Sam. xv. 30.

(2.) Among the particular forms observed the following may be mentioned:

a. Rending the clothes, Gen. xxxvii. 29, 34, xliv. 13; 2 Chr. xxxiv. 27; Is. xxxvi. 22; Jer. xxxvi. 24 (where the absence of the form is to be noted), xli. 5; 2 Sam. iii. 31, xv. 32; Josh. vii. 6; Joel ii. 13; Ezr. ix. 5; 2 K. .. 7, xi. 14; Matt. xxvi. 65, *ἱμάτιον*; Mark xiv. 63, *χιτών*.

b. Dressing in sackcloth [SACKCLOTH], Gen. xxxvii. 34; 2 Sam. iii. 31, xxi. 10; Ps. xxxv. 13; Is. xxxvii. 1; Joel i. 8, 13; Am. viii. 10; Jon. iii. 8, man and beast; Job xvi. 15; Esth. iv. 3, 4; Jer. vi. 26; Lam. ii. 10; 1 K. xxi. 27.

c. Ashes, dust, or earth sprinkled on the person, 2 Sam. xiii. 19, xv. 32; Josh. vii. 6; Esth. iv. 1, 3; Jer. vi. 26; Job ii. 12, xvi. 15, xlii. 6; Is. lxi. 3; Rev. xviii. 19.

d. Black or sad-coloured garments, 2 Sam. xiv. 2; Jer. viii. 21; Ps. xxxviii. 6, xlii. 9, xliii. 2; Mal. iii. 14, marg.; Ges. p. 1195.

e. Removal of ornaments or neglect of person, Deut. xxi. 12, 13; Ex. xxxiii. 4; 2 Sam. xiv. 2, xix. 24; Ez. xxvi. 16; Dan. x. 3; Matt. vi. 16, 17. [NAIL.]

f. Shaving the head, plucking out the hair of the head or beard, Lev. x. 6; 2 Sam. xix. 24; Ezr. ix. 3; Job i. 20; Jer. vii. 29, xvi. 6.

g. Laying bare some part of the body. Isaiah himself naked and barefoot, Is. xx. 2. The Egyptian and Ethiopian captives, ib. ver. 4; Is. xlvii. 2, l. 6; Jer. xiii. 22, 26; Nah. iii. 5; Mic. i. 11; Am. viii. 10.

h. Fasting or abstinence in meat and drink, 2 Sam. i. 12, iii. 35, xii. 16, 22; 1 Sam. xxxi. 13; Ezr. x. 6; Neh. i. 4; Dan. x. 3, vi. 18; Joel i. 14, ii. 12; Ez. xxiv. 17; Zech. vii. 5, a periodical fast during captivity; 1 K. xxi. 9, 12; Is. lviii. 3, 4, 5, xxiv. 7, 9, 11; Mal. iii. 14; Jer. xxxvi. 9; Jon. iii. 5, 7 (of Nineveh); Judg. xx. 26; 2 Chr. xx. 3; Ezr. viii. 21; Matt. ix. 14, 15.

i. In the same direction may be mentioned diminution in offerings to God, and prohibition to partake in sacrificial food, Lev. vii. 20; Deut. xxvi. 14; Hos. ix. 4; Joel i. 9, 13, 16.

k. Covering the "upper lip," *i. e.* the lower part of the face, and sometimes the head, in token of silence; specially in the case of the leper, Lev. xiii 45; 2 Sam. xv. 30, xix. 4; Jer. xiv. 4; Ez. xxiv 17; Mic. iii. 7.

l. Cutting the flesh, Jer. xvi. 6, 7; xli 5 [CUTTINGS in the FLESH.] Beating the body, Is. xxi. 12; Jer. xxxi. 19.

m. Employment of persons hired for the purpose of mourning, women "skilful in lamentation," Eccl. xii. 5; Jer. ix. 17; Am. v. 16; Matt. ix. 23. Also flute-players, Matt. ix. 23 [MINSTREL]; 2 Chr xxxv. 25.

n. Akin to this usage the custom for friends or passers-by to join in the lamentations of bereaved or afflicted persons, Gen. l. 3; Judg. xi. 40; Job ii. 11, xxx. 25, xxvii. 15; Ps. lxxviii. 64; Jer. ix. 1, xxii. 18; 1 K. xiv. 13, 18; 1 Chr. vii. 22; 2 Chr. xxxv. 24, 25; Zech. xii. 11; Luke vii. 12; John xi. 31; Acts viii. 2, ix. 39; Rom. xii. 15. So also in times of general sorrow we find large numbers of persons joining in passionate expressions of grief, Judg. ii. 4, xx. 26; 1 Sam. xxviii. 3, xxx. 4; 2 Sam. i. 12; Ezr. iii. 13; Ez. vii. 16, and the like is mentioned of the priests, Joel ii. 17; Mal. ii. 13; as below.

o. The sitting or lying posture in silence indicative of grief, Gen. xxiii. 3; Judg. xx. 26; 2 Sam. xii. 16, xiii. 31; Job i. 20, ii. 13; Ezr. ix. 3; Lam. ii. 10; Is. iii. 26.

p. Mourning feast and cup of consolation, Jer. xvi. 7, 8.

The period of mourning varied. In the case of Jacob it was seventy days, Gen. l. 3; of Aaron, Num. xx. 29, and Moses, Deut. xxxiv. 8, thirty. A further period of seven days in Jacob's case, Gen. l. 10. Seven days for Saul, which may have been an abridged period in time of national danger, 1 Sam. xxxi 13.

Excessive grief in the case of an individual may be noticed in 2 Sam. iii. 16; Jer. xxxi. 15, and the same hypocritically, Jer. xli. 6.

(3.) Similar practices are noticed in the Apocryphal books.

a. Weeping, fasting, rending clothes, sackcloth, ashes, or earth on head, 1 Macc. ii. 14, iii. 47, iv. 39, v. 14, xi. 71, xiii. 45; 2 Macc. iii. 19, x. 25, xiv. 15; Jud. iv. 10, 11; viii. 6, ix. 1, xiv. 19 (Assyrians), x. 2, 3, viii. 5; 3 Macc. iv. 6; 2 Esdr. x. 4; Esth. xiv. 2.

b. Funeral feast with wailing, Bar. vi. 32: also Tob. iv. 17; see in reproof of the practice, Aug. *Civ. D.* viii. 27.

c. Period of mourning, Jud. viii. 6; Ecclus. xxii. 12, seven days, so also perhaps 2 Esdr. v. 20. Bel and Dragon ver. 40.

d. Priests ministering in sackcloth and ashes the altar dressed in sackcloth, Jud. iv. 11, 14, 15.

e. Idol priests with clothes rent, head and beard shorn, and head bare, Bar. vi. 31.

(4.) In Jewish writings not Scriptural these notices are in the main confirmed, and in some cases enlarged.

a. Tearing hair and beating breast, Joseph. *Ant.* xvi. 7, §5, xv. 3, §9.

b. Sackcloth and ashes, Joseph. *Ant.* xx. 6, §1. xx. 8, §2, *Bell. Jud.* ii. 12, §5; clothes rent, ii. 15, §4.

c. Seven days mourning for a father, Joseph. *Ant.* xvii. 8, §4, *Bell. Jud.* ii. 1, §1; for thirty days, *B. J.* iii. 9, §5.

d. Those who met a funeral required to join it, Joseph. *c. Ap.* ii. 26; see Luke vii. 12, and Rom. xii. 15.

e. Flute-players at a funeral, *Bell. Jud.* iii. 9, §5.

The Mishna prescribes seven days mourning for a father, a mother, son, daughter, brother, sister, or wife (Bartenora, on *Moed Katon* iii. 7).

Rending garments is regularly graduated according to the degree of relationship. For a father or mother the garment was to be rent, but not with an instrument, so as to show the breast; to be sewn up roughly after thirty days, but never closed. The same for one's own teacher in the Law, but for other relatives a palm breadth of the upper garment to suffice, to be sewn up roughly after seven days and fully closed after thirty days, *Moed Kat.* iii. 7; *Shabb.* xiii. 3; Carpzov, *App. Bib.* p. 650. Friendly mourners were to sit on the ground, not on the bed. On certain days the lamentation was to be only partial. *Moed Kat.* l. c. For a wife there was to be at least one hired mourner and two pipers, *Cetuboth.* iv. 4.

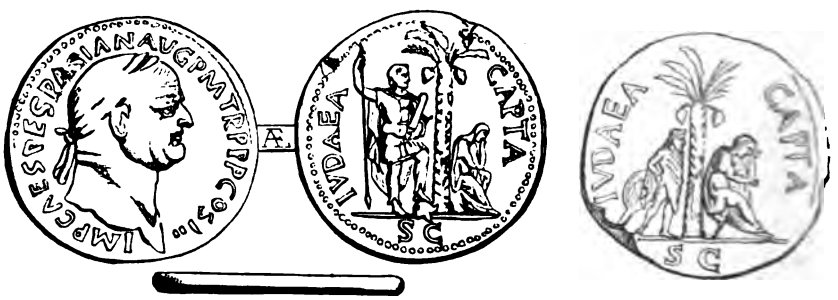
(5.) In the last place we may mention *a.* the idolatrous "mourning for Tammuz," Ez. viii. 14, as indicating identity of practice in certain cases among Jews and heathens; and the custom in later days of offerings of food at graves, Ecclus. xxx. 18. *b.* The prohibition both to the high-priest and to Nazarites against going into mourning even for a father or mother, Lev. xxi. 10, 11; Num. vi. 7; see *Nezir*, vii. 1. The inferior priests were limited to the cases of their near relatives, Lev. xxi. 1, 2, 4. *c.* The food eaten during the time of mourning was regarded as impure, Deut. xxvi. 14; Jer. xvi. 5, 7; Ez. xxiv. 17; Hos. ix. 4.

(6.) When we turn to heathen writers we find similar usages prevailing among various nations of antiquity. Herodotus, speaking of the Egyptians, says, "When a man of any account dies, all the womankind among his relatives proceed to smear their heads and faces with mud. They then leave the corpse in the house, and parade the city with their breasts exposed, beating themselves as they go, and in this they are joined by all the women belonging to the family. In like manner the men also meet them from opposite quarters, naked to the waist and beating themselves" (Her. ii. 85). He also mentions seventy days as the period of embalming (ii. 86). This doubtless includes the whole mourning period. Diodorus, speaking of a king's death, mentions rending of garments, suspension of sacrifices, heads smeared with clay, and breasts bared, and says men and women go about in companies of 200 or 300, making a wailing twice-a-day, *ἐγρόμενοι μετ' ὠδῆς*. They abstain from flesh, wheat-bread, wine, the bath, dainties, and in general all pleasure; do not lie on beds, but lament as for an only child during seventy-two days. On the last day a sort of trial was held of the merits of the deceased, and according to the verdict pronounced by the acclamations of the crowd, he was treated with funeral honours, or the contrary (Diod. Sic. i. 72). Similar usages prevailed in the case of private persons, ib. 91, 92.

The Egyptian paintings confirm these accounts as to the exposure of the person, the beating, and the throwing clay or mud upon the head; and women are represented who appear to be hired mourners (Long, *Eg. Ant.* ii. 154-159; Wilkinson, *Eg. Ant.* ii. p. 358, 387). Herodotus also mentions the Persian custom of rending the garments with wailing, and also cutting off the hair on occasions of death or calamity. The last, he says, was also usual among the Scythians (Her. ii. 66, viii. 99, ix. 24, iv. 71).

Lucian, in his discourse concerning Greek mourning, speaks of tearing the hair and flesh, and wailing, and beating the breast to the sound of a flute, burial of slaves, horses, and ornaments as likely to be useful to the deceased, and the practice for relatives to endeavour to persuade the parents of the deceased to partake of the funeral-feast (*περίδειπνον*) by way of recruiting themselves after their three days' fast (*De Luctu*, vol. ii. p. 303, 305, 307, ed. Amsterdam). Plutarch mentions that the Greeks regarded all mourners as unclean, and that women in mourning cut their hair, but the men let it grow. Of the Romans, in carrying corpses of parents to the grave, the sons, he says, cover their heads, but the daughters uncover them, contrary to their custom in each case (*Quaest. Rom.* vol. vii. p. 74, 82, ed. Reiske.)

Greeks and Romans both made use of hired mourners, *praeficae*, who accompanied the funeral procession with chants or songs. Flowers and perfumes were also thrown on the graves (Ov. *Fast* vi. 660; *Trist.* v. 1, 47; Plato, *legg.* vii. 9, *Dict. of Antiq.* art. *Funus*). The *praeficae* seem to be the predecessors of the "mutes" of modern funerals.



(7.) With the practices above mentioned, Oriental and other customs, ancient and modern, in great measure agree. D'Arvieux says, Arab men are silent in grief, but the women scream, tear their hair, hands, and face, and throw earth or sand on their heads. The older women wear a blue veil and an old abba by way of mourning garments. They also sing the praises of the deceased (*Trav.* p. 269, 270). Niebuhr says both Mahometans and Christians in Egypt hire wailing women, and wail at stated times (*Voy.* i. 150). Burckhardt says the women of Atbara in Nubia shave their heads on the death of their nearest relatives, a custom prevalent also among several of the peasant tribes of Upper Egypt. In Berber on a death they usually kill a sheep, a cow, or a camel. He also mentions wailing women, and a man in distress besmearing his face with dirt and dust in token of grief (*Nubia*, pp. 176, 226, 374). And, speaking of the ancient Arab tribes of Upper Egypt, "I have seen the female relations of a deceased man dance before his house with sticks and lances in their hands and behaving like furious soldiers" (*Notes on Bed.* i. 280). Shaw says of the Arabs of Barbary, after a funeral the female relations during the space of two or three months go once a week to weep over the grave and offer eatables (see Ecclus. xxx. 18). He also mentions mourning women (*Trav.* pp. 220, 242). "In Oman," Wellsted says, "there are no hired mourning women, but the females from the neighbourhood assemble after a funeral and continue for eight days, from sunrise to sunset, to utter loud lamentations" (*Trav.* i. 216). In the Arabian Nights are frequent allusions to similar practices, as rending clothes, throwing dust on the head, cutting off the hair, loud exclamation, visits to the tomb, plucking the hair and beard (i. 65, 263, 297, 358, 518, ii. 354, 237, 409). They also mention ten days and forty days as periods of mourning (i. 427, ii. 409). Sir J. Chardin, speaking of Persia, says, the tombs are visited periodically by women (*Voy.* vi. 489). He speaks also of the tumult at a death (ib. 482). Mourning lasts forty days: for eight days a fast is observed, and visits are paid by friends to the bereaved relatives, on the ninth day the men go to the bath, shave the head and beard, and return the visits, but the

lamentation continues two or three times a week till the fortieth day. The mourning garments are dark-coloured, but never black (ib. p. 481). Russell, speaking of the Turks at Aleppo, says, "the instant the death takes place, the women who are in the chamber give the alarm by shrieking as if distracted, and are joined by all the other females in the harem. This conclamation is termed the wulwaly:[b] it is so shrill as to be heard, especially in the night, at a prodigious distance. The men disapprove of and take no share in it; they drop a few tears, assume a resigned silence, and retire in private. Some of the near female relations, when apprised of what has happened, repair to the house, and the wulwaly, which had paused for some time, is renewed upon the entrance of each visitant into the harem" (*Aleppo*, i. 306). He also mentions professional mourners, visits to the grave on the third, seventh, and fortieth days, prayers at the tomb, flowers strewn, and food distributed to the poor. At these visits the shriek of wailing is renewed: the chief mourner appeals to the deceased and reproaches him fondly for his departure. The men make no change in their dress; the women lay aside their jewels, dress in their plainest garments, and wear on the head a handkerchief of a dusky colour. They usually mourn twelve months for a husband and six for a father (ib. 311, 312). Of the Jews he says, the conclamation is practised by the women, but hired mourners are seldom called in to assist at the wulwaly. Both sexes make some alteration in dress by way of mourning. The women lay aside their jewels, the men make a small rent in their outer vestment (ii. 86, 87).

Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called welweleh or wilwál, uttering the most piercing shrieks, and calling upon the name of the deceased, 'O, my master! O, my resource! O, my misfortune! O, my glory' (see Jer. xxii. 18). The females of the neighbourhood come to join with them in this conclamation: generally, also, the family send for two or more *neddábehs*, or public wailing women. Each brings a tambourine, and beating them they exclaim, 'Alas for him.' The female relatives, domestics, and friends, with their hair dishevelled, and sometimes with rent clothes, beating their faces, cry in like manner, 'Alas, for him!' These make no alteration in dress, but women, in some cases, dye their shirts, head-veils, and handkerchiefs of a dark-blue colour. They visit the tombs at stated periods" (*Mod. Eg.* iii. 152, 171, 195). Wealthy families in Cairo have in the burial-grounds regularly furnished houses of mourning, to which the females repair at stated periods to bewail their dead. The art of mourning is only to be acquired by long practice, and regular professors of it are usually hired on the occasion of a death by the wealthier classes (Mrs. Poole, *English. in Egypt*, ii. 100). Dr. Wolff mentions the wailing over the dead in Abyssinia, *Autobiog.* ii. 273. Pietro della Valle mentions a practice among the Jews of burning perfumes at the site of Abraham's tomb at Hebron, for which see 2 Chr. xvi. 14, xxi. 19; Jer. xxxiv. 5; P. della Valle, *Viaggi*, i. 306. The customs of the N. American Indians also resemble those which have been described in many particulars, as the howling and wailing, and speeches to the dead: among some tribes the practice of piercing the flesh with arrows or sharp stones, visits to the place of the dead (Carver, *Travels*, p. 401; Bancroft, *Hist. of U. States*, ii. 912; Catlin, *N. A. Indians*, i. 90).

The former and present customs of the Welsh, Irish, and Highlanders at funerals may also be cited as similar in several respects, *e. g.* wailing and howling, watching with the corpse, funeral entertainments ("funeral baked meats"), flowers on the grave, days of visiting the grave (Brand, *Pop. Antiq.* ii. 128, &c.; Harmer, *Obs.* iii. 40).

One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews at Jerusalem at a spot as near to the Temple as could be obtained. This custom, noticed by St. Jerome, is alluded to by Benjamin of Tudela and exists to the present day. Jerome, *ad Sophon.* i. 15; *ad Paulam* Ep. xxxix.; *Early Trav. in Pal.* p. 83; Rauмer, *Palästina*, p 293; Martineau, *Eastern Life*, p. 471; Robinson, i. 237. [H. W. P.]

Copper Coins of Vespasian, representing the mourning of Judaea for her captivity.

MOUSE (עַכְבָּר, *'akbár*: μῦς: *mus*) occurs in Lev. xi. 29 as one of the unclean creeping things which were forbidden to be used as food. In 1 Sam. vi. 4, 5, five golden mice, "images of the mice that mar the land," are mentioned as part of the trespass offering which the Philistines were to send to the

[b] Arab. ولولو, Heb. יָלַל, Gk. ὀλολύζω, ἀλαλάζω, Lat. *ejulo*, *ululo*, an onomatopoetic word common to many languages. See Ges. p. 596; Schoebel, *Anal. Constit.* p. 54; and Russell, vol. i. note 83, chiefly from Schultens.

Israelites when they returned the ark. In Is. lxvi. 17, it is said, "They that sanctify themselves eating swine's flesh, and the abomination, and the mouse, shall be consumed together." The Hebrew word is in all probability generic, and is not intended to denote any particular species of mouse; although Bochart (*Hieroz.* a. 427), following the Arabic version of Is. lxvi. 17, restricts its meaning to the jerboa (*Dipus jaculus*). The original word denotes a field-ravager,[a] and may therefore comprehend any destructive rodent. It is probable, however, that in 1 Sam. vi. 5, "the mice that mar the land" may include and more particularly refer to the short-tailed field-mice (*Arvicola agrestis*, Flem.), which Dr. Kitto says cause great destruction to the corn-lands of Syria. "Of all the smaller rodentia which are injurious, both in the fields and in the woods, there is not," says Prof. Bell (*Hist. Brit. Quad.* p. 335), "one which produces such extensive destruction as this little animal, when its increase, as is sometimes the case, becomes multitudinous." The ancient writers frequently speak of the great ravages committed by mice. Herodotus (ii. 141) ascribes the loss of Sennacherib's army to mice, which in the night time gnawed through the bow-strings and shield-straps.

Col. Hamilton Smith (Kitto's *Cycl.* art. "Mouse") says that the hamster and the dormouse are still eaten in common with the jerboa by the Bedoueens; and Gesenius (*Thes.* s. v.) believes some esculent species of dormouse is referred to in Is. lxvi. 17.

[W. H.]

MOWING (חָלִיל; *tonsio*, Am. vii. 1—LXX. reads ὁ Βασιλεύς, either from a various reading or confusion of the letters ך and ל—a word signifying also a shorn fleece, and rendered in Ps. lxxii. 6 "mown grass"). As the great heat of the climate in Palestine and other similarly situated countries soon dries up the herbage itself, hay-making in our sense of the term is not in use. The term "hay," therefore, in P. B. version of Ps. cvi. 20, for עֵשֶׂב, is incorrect. A. V. "grass." So also Prov. xxvii. 25, and Is. xv. 6. The corn destined for forage is cut with a sickle. The term קֹצֵר, A. V. "mower," Ps. cxix. 7, is most commonly in A. V. "reaper;" and once, Jer. ix. 22, "harvest-man."

The "king's mowings," Am. vii. 1, *i. e.* mown grass, Ps. lxxii. 6, may perhaps refer to some royal right of early pasturage for the use of the cavalry. See 1 K. xviii. 5. (Shaw, *Trav.* 138; Wilkinson, *Anc. Eg.* abridgm. ii. 43, 50; *Early Trav.* 66. Pietro della Valle, *Viaggi*, ii. 237; Chardin, *Voy.* iii. 370; Layard, *Nin. & Bab.* 330; Niebuhr, *Descr. de l'Ar.* 139; Harmer, *Obs.* iv. 389; Burckhardt, *Notes on Bed.* i. 210.)

[H. W. P.]

MO'ZA (מוֹצָא: Μωσά; Alex. Ἰωσά: *Mosa*).

1. Son of Caleb the son of Hezron by his concubine Ephah (1 Chr. ii. 46).

2. Μωσά, 1 Chr. viii. 36, 37; Μασσά, Alex. Μασά, 1 Chr. ix. 42, 43). Son of Zimri, and descendant of Saul through Micah the son of Mephibosheth.

MO'ZAH (הַמּוֹצָה, with the definite article, Kiriath-Motsah: Ἀμώκη; Alex. Αμωσα: *Ammosa*), one of the cities in the allotment of Benjamin (Josh. xviii. 26 only), named between hac-Cephirah and Rekem. The former of these has probably been identified with *Kefir*, 2 miles east of *Yalo*, but no trace of any name resembling Motsah has hitherto been discovered. Interpreting the name according to its Hebrew derivation, it may signify "the spring-head"—the place at which the water of a spring gushes out (Stanley, *S. & P.* App. §52). A place of this name is mentioned in the Mishna (*Succah*, iv. §5) as follows:—"There was a place below Jerusalem named Motsa; thither they descended and gathered willow-branches," *i.e.* for the "Feast of Tabernacles" so called. To this the Gemara adds, "the place was a Colonia[a] (קולניא), that is, exempt from the king's tribute" (Buxtorf, *Lex. Talm.* 2043), which other Talmudists reconcile with the original name by observing that Motsah signifies an outlet or liberation, *e. g.* from tribute. Bartenora, who lived at Jerusalem, and now lies in the "valley of Jehoshaphat" there, says (in Surenhusius' *Mishna*, ii. 274) that Motsah was but a short distance from the city, and in his time retained the name of Colonia. On these grounds Schwarz (127) would identify Mozah with the present *Kulonieh*, a village about 4 miles west of Jerusalem on the Jaffa road, at the entrance of the great Wady *Beit Haninah*. The interpretations of the Rabbis, just quoted, are not inconsistent with the name being really derived from its having been the seat of a Roman *colonia*, as suggested by Robinson (*B. R.* iii. 158). The only difficulty in the way of the identification is that *Kulonieh* can hardly be spoken of as "below Jerusalem"—an expression which is most naturally interpreted of the ravine beneath the city, where the *Bir-Eyub* is, and the royal gardens formerly were. Still there are vestiges of much vegetation about *Kulonieh*, and when the country was more generally cultivated and wooded, and the climate less arid than at present, the dry river-bed which the traveller now crosses may have flowed with water, and have formed a not unfavourable spot for the growth of willows.

[G.]

MULBERRY-TREES (בְּכָאִים, *becâim*: κλαυθμών, ἄτιοι: *pyri*) occurs only in 2 Sam. v. 23 and 24, and in the parallel passage of 1 Chr. xiv. 14. The Philistines having spread themselves in the valley of Rephaim, David was ordered to fetch a compass behind them and come upon them over against the mulberry-trees; and to attack them when he heard the "sound of a going in the tops of the mulberry-trees."

We are quite unable to determine what kind of tree is denoted by the Hebrew בָּכָא; many attempts at identification have been made, but they are mere conjectures. The Jewish Rabbis, with several modern versions, understand the mulberry-tree; others retain the Hebrew word. Celsius (*Hierob.* i. 335) believes the Hebrew *bâcâ* is identical with a tree of similar name mentioned in a MS. work of the Arabic botanical writer Abu'l Fadli, namely, some species of *Amyris* or *Balsamodendron*. Most lexicographers are satisfied with this explanation. Some modern English authors have adopted the opinion of Dr. Royle, who (Kitto's *Cyc.* art. *Baca*) refers

[a] Bochart derives it from עָכַל, "to devour" and בָּכָה, "corn."

[a] Can this title be in any way connected with the Koulon (κοῦλον), which is one of the eleven names inserted by the LXX. in the catalogue of the cities of Judah, between verses 59 and 60 of Josh. xv.?

the Hebrew *bâcâ* to the Arabic *Shajrat-al-bak*,[a] "the gnat-tree," which he identifies with some species of poplar, several kinds of which are found in Palestine. Rosenmüller follows the LXX. of 1 Chr. xiv. 14, and believes "pear-trees" are signified. As to the claim of the mulberry-tree to represent the *becâîm* of Scripture, it is difficult to see any foundation for such an interpretation—for, as Rosenmüller has observed (*Bib. Bot.* p. 256), it is neither "countenanced by the ancient versions nor by the occurrence of any similar term in the cognate languages"—unless we adopt the opinion of Ursinus, who (*Arbor. Bib.* iii. 75), having in view the root of the word *bacah*,[b] "to weep," identifies the name of the tree in question with the mulberry, "from the blood-like tears which the pressed berries pour forth." Equally unsatisfactory is the claim of the "pear-tree" to represent the *bâcâ*; for the uncertainty of the LXX., in the absence of further evidence, is enough to show that little reliance is to be placed upon this rendering.

As to the tree of which Abu'l Fadli speaks, and which Sprengel (*Hist. Rei herb.* p. 12) identifies with *Amyris gileadensis*, Lin., it is impossible that it can denote the *bâcâ* of the Hebrew Bible, although there is an exact similarity in form between the Hebrew and Arabic terms: for the *Amyrilaceae* are tropical shrubs, and never could have grown in the valley of Rephaim, the Scriptural locality for the *becâîm*.

The explanation given by Royle, that some poplar is signified, although in some respects it is well suited to the context of the Scriptural passages, is untenable; for the Hebrew *bâcâ* and the Arabic *baka* are clearly distinct both in form and signification, as is evident from the difference of the second radical letter in each word.[c]

As to the בָּכָא of Ps. lxxxiv. 6, which the A. V. retains as a proper name, we entirely agree with Hengstenberg (*Com. on Ps.* ad loc.) that the word denotes "weeping," and that the whole reference to Baca trees must be given up, but see BACA.

Though there is no evidence to show that the mulberry-tree occurs in the Hebrew Bible, yet the fruit of this tree is mentioned in 1 Macc. vi. 34, as having been, together with grape-juice, shown to the elephants of Antiochus Eupator in order to irritate these animals and make them more formidable opponents to the army of the Jews. It is well known that many animals are enraged when they see blood or anything of the colour of blood. For further remarks on the mulberry-trees of Palestine see SYCAMINE. [W. H.]

MULE, the representative in the A. V. of the following Hebrew words,—*Perêd or Pirdâh*, *Rechesh*, and *Yémîm*.

1. *Perêd*, *Pirdâh* (פֶּרֶד, פִּרְדָּה;[d] ὁ ἡμίονος, ἡ ἡμίονος: *mulus*, *mula*), the common and feminine Hebrew nouns to express the "mule;" the first of which occurs in numerous passages of the Bible, the latter only in 1 K. i. 33, 38, 44. It is an interesting fact that we do not read of mules till the time of David (as to the *yémîm*, A. V. "mules," of Gen. xxxvi. 24, see below), just at the time when the Israelites were becoming well acquainted with horses. After this time horses and mules are in Scripture often mentioned together. After the first half of David's reign, as Michaelis (*Comment. on Laws of Moses*, ii. 477) observes, they became all at once very common. In Ezr. ii 66, Neh. vii. 68, we read of two hundred and forty-five mules; in 2 Sam. xiii. 29, "all the king's sons arose, and every man gat him up upon his mule." Absalom rode on a mule in the battle of the wood of Ephraim at the time when the animal went away from under him and so caused his death. Mules were amongst the presents which were brought year by year to Solomon (1 K. x. 25). The Levitical law forbade the coupling together of animals of different species (Lev. xix. 19), consequently we must suppose that the mules were imported, unless the Jews became subsequently less strict in their observance of the ceremonial injunctions, and bred their mules. We learn from Ezekiel (xxvii. 14) that the Tyrians, after the time of Solomon, were supplied with both horses and mules from Armenia (Togarmah), which country was celebrated for its good horses (see Strabo, xi. 13, §7, ed. Kramer; comp. also Xenoph. *Anab.* iv. 5, 36; Herod. vii. 40). Michaelis conjectures that the Israelites first became acquainted with mules in the war which David carried on with the king of Nisibis (Zobah), (2 Sam. viii. 3, 4). In Solomon's time it is possible that mules from Egypt occasionally accompanied the horses which we know the king of Israel obtained from that country; for though the mule is not of frequent occurrence in the monuments of Egypt (Wilkinson's *Anc. Egypt.* i. 396, Lond. 1854), yet it is not easy to believe that the Egyptians were not well acquainted with this animal. That a friendship existed between Solomon and Pharaoh is clear from 1 K. ix. 16, as well as from the fact of Solomon having married the daughter of the king of Egypt; but after Shishak came to the throne a very different spirit prevailed between the two kingdoms: perhaps, therefore, from this date mules were obtained from Armenia. It would appear that kings and great men only rode on mules. We do not read of mules at all in the N. T., perhaps therefore they had ceased to be imported.

2. *Rechesh* (רֶכֶשׁ). See DROMEDARY, in Appendix A.

3. *Yémîm* (יְמִם:[e] τὸν Ἰαμείν, Vat. and Alex. τὸν ἰαμίν, Compl.; τοὺς ἰαμείν, Aq. and Sym.: *aquae calidae*) is found only in Gen. xxxvi. 24, where the A. V. has "mules" as the rendering of the word. The passage where the Hebrew name occurs is one concerning which various explanations have been attempted. Whatever may be the proper translation of the passage, it is quite certain that the A. V. is incorrect in its rendering:—"This was that Anah that found the mules in the wilderness as he fed the asses of Zibeon his father." Michaelis has shown that at this time horses were unknown in Canaan; consequently mules could not have

[a] شَجَرَةُ البَقّ of which, however, Freytag says, "Arbor cultcum, ulmus, quia ex succo in folliculis exsiccato culices gignuntur."

[b] בָּכָה "to flow by drops," "to weep."

[c] כ in the Hebrew, ك in the Arabic; בכא. بقى.

[d] A word of doubtful etymology. Gesenius refers it to פָּרַד the Syriac ܦܪܕ, "*avolavit*." Comp. German *Pferd*, Lat. *burdo*, and see Michaelis' remarks.

[e] From unused root יוּם, "quae calores potentiarum habuisse videtur" (Gesen. *Thes.*).

been bred there. The Talmudical writers believe that Anah was the first to find out the manner of breeding mules: but, besides the objection urged above, it may be stated that neither the Hebrew nor its cognates have any such a word to signify "mules." Bochart (*Hieroz.* i. 209, 10), following the reading of the Samaritan Version and Onkelos, renders *yémim* by "emims" or "giants" (Gen. xiv. 5); but this explanation has been generally abandoned by modern critics (see Rosenmüller, *Schol. in Gen.*; Geddes, *Crit. Rem.* xiv. 5). The most probable explanation is that which interprets *yémim* to mean "warm springs," as the Vulg. has it; and this is the interpretation adopted by Gesenius and modern scholars generally: the passage will then read, "this was that Anah who while he was feeding his father's asses in the desert discovered some hot springs." This would be considered an important discovery, and as such worthy of record by the historian; but if, with some writers, we are to understand merely that Anah discovered water, there is nothing very remarkable in the fact, for his father's asses could not have survived without it.[1] [W. H.]

MUPPIM (מֻפִּים: Μαφφιμ-ελμ: *Mophim*), a Benjamite, and one of the fourteen descendants of Rachel who belonged to the original colony of the sons of Jacob in Egypt (Gen. xlvi. 21). In Num. xxvi. 39 the name is written Shupham, and the family sprung from him are called Shuphamites. In 1 Chr. vii. 12, 15, it is Shuppim (the same as xxvi. 16), and viii. 5 Shephuphan. Hence it is probable that Muppim is a corruption of the text, and that Shupham is the true form. [BECHER.] According to 1 Chr. vii. 12, he and his brother Huppim were the sons of Ir, or Iri (ver. 7), the son of Bela, the son of Benjamin, and their sister Maachah appears to have married into the tribe of Manasseh (ib. 15, 16). But ver. 15 seems to be in a most corrupt state. 1 Chr. viii. 3, 5, assigns in like manner Shephuphan to the family of Bela, as do the LXX. in Gen. xlvi. 21. As it seems to be impossible that Benjamin could have had a great-grandson at the time of Jacob's going down into Egypt (comp. Gen. l. 23), and as Machir the husband of Maachah was Manasseh's son, perhaps the explanation of the matter may be that Shupham was Benjamin's son, as he is represented Num. xxvi. 39, but that his family were afterwards reckoned with that of which Ir the son of Beha was chief (comp. 1 Chr. xxv. 9-31, xxvi. 8, 9, 11). [A. C. H.]

MURDER.[a] The principle on which the act of taking the life of a human being was regarded by the Almighty as a capital offence is stated on its highest ground, as an outrage, Philo calls it sacrilege, on the likeness of God in man, to be punished even when caused by an animal (Gen. ix. 5, 6, with Bertheau's note; see also John viii. 44; 1 John iii. 12, 15; Philo, *De Spec. Leg.* iii. 15, vol. ii. 313). Its secondary or social ground appears to be implied in the direction to replenish the earth which immediately follows (Gen. ix. 7). The exemption of Cain from capital punishment may thus be regarded by anticipation as founded on the social ground either of expediency or of example (Gen. iv. 12, 15). The postdiluvian command, enlarged and infringed by the practice of blood-revenge, which it seems to some extent to sanction, was limited by the Law of Moses, which, while it protected the accidental homicide, defined with additional strictness the crime of murder. It prohibited compensation or reprieve of the murderer, or his protection if he took refuge in the refuge-city, or even at the altar of Jehovah, a principle which finds an eminent illustration in the case of Joab (Ex. xxi. 12, 14; Lev. xxiv. 17, 21; Num. xxxv. 16, 18, 21, 31; Deut. xix. 11, 13; 2 Sam. xvii. 25, xx. 10; 1 K. ii. 5, 6, 31; Philo, *l. c.*; Michaelis, *On Laws of Moses*, §132). Bloodshed even in warfare was held to involve pollution (Num. xxxv. 33, 34; Deut. xxi. 1, 9; 1 Chr. xxviii. 3). Philo says that the attempt to murder deserves punishment equally with actual perpetration; and the Mishna, that a mortal blow intended for another is punishable with death; but no express legislation on this subject is found in the Law (Philo, *l. c.*; Mishn. *Sanh.* ix. 2).

No special mention is made in the Law (*a*) of child-murder, (*b*) of parricide, nor (*c*) of taking life by poison, but its animus is sufficiently obvious in all these cases (Ex. xxi. 15, 17; 1 Tim. i. 9; Matt. xv. 4), and the 3rd may perhaps be specially intended under the prohibition of witchcraft (Ex. xxii. 18; Joseph. *Ant.* iv. 8, §34; Philo, *De Spec. Leg.* iii. 17, vol. ii. p. 315).

It is not certain whether a master who killed his slave was punished with death (Ex. xxi. 20; Knobel, *ad loc.*). In Egypt the murder of a slave was punishable with death as an example *à fortiori* in the case of a freeman; and parricide was punished with burning; but child-murder, though treated as an odious crime, was not punished with death (Diod. Sic. i. 77). The Greeks also, or at least the Athenians, protected the life of the slave (*Dict. of Antiq.* art. *Servus*, p. 1036; Müller, *Dorians*, iii. 3, §4; Wilkinson, *Anc. Eg.* ii. 208, 209).

No punishment is mentioned for suicide attempted, nor does any special restriction appear to have attached to the property of the suicide (2 Sam. xvii. 23).

Striking a pregnant woman so as to cause her death was punishable with death (Ex. xxi. 23; Joseph. *Ant.* iv. 8, §33).

If an animal known to be vicious caused the death of any one, not only was the animal destroyed, but the owner also, if he had taken no steps to restrain it, was held guilty of murder (Ex. xxi. 29, 31; Michaelis, §274, vol. iv. 234, 5).

The duty of executing punishment on the murderer is in the Law expressly laid on the "revenger of blood;" but the question of guilt was to be previously decided by the Levitical tribunal. A strong bar against the licence of private revenge was placed by the provision which required the concurrence of at least two witnesses in any capital question (Num. xxxv. 19-30; Deut. xvii. 6-12, xix. 12, 17). In regal times the duty of execution of justice on a murderer seems to have been assumed to some extent by the sovereign, as well as the privilege of pardon (2 Sam. xiii. 39, xiv. 7, 11;

[1] The plural form of a noun (אֲחוֹשְׁתָּרָנִים), which is apparently of Persian origin, rendered "camel" by the A. V., occurs in Esth. viii. 10, 14, and seems to denote some fine breed of mules. See Bochart (*Hieroz.* i. 219).

[a] (Verb.) 1. רָצַח, "to crush," "to kill," whence part. רֹצֵחַ; ὁ φονευτής; *interfector, reus homicidii*, Gen. 1302. 2. הָרַג, "kill;" ἀποκτείνω, φονεύω; *interficio, occido*; whence הֶרֶג (*subs.*), "murder" σφαγή; *occisio*, Gen. 382. 3. קָטַל, from קָטַל, "kill," Ges. 1212.

1 K. ii. 34). During this period also the practice of assassination became frequent, especially in the kingdom of Israel. Among modes of effecting this object may be mentioned the murder of Benhadad of Damascus by Hazael by means of a wet cloth (1 K. xv. 27, xvi. 9; 2 K. viii. 15; Thenius, *ad loc.*; Jahn, *Hist.* i. 137; 2 K. x. 7, xi. 1, 16, xii. 20, xiv. 5, xv. 14, 25, 30).

It was lawful to kill a burglar taken at night in the act, but unlawful to do so after sunrise (Ex. xxii. 2, 3).

The Koran forbids child-murder, and allows blood-revenge, but permits money-compensation for blood-shed (ii. 21, iv. 72, xvii. 230, ed. Sale). [BLOOD, REVENGER OF; MANSLAYER.] [H. W. P.]

MU'SHI (מוּשִׁי: Ὀμουσί, Ex. vi. 19; ὁ Μουσί, 1 Chr. vi. 19, xxiii. 21, xxiv. 26, 30; Μουσί, Num. iii. 20; 1 Chr. vi. 47, xxiii. 23; Alex. Ὀμουσεί, Ex. vi. 19; Ὀμουσί, Num. iii. 20; 1 Chr. vi. 47; ὁ Μουσί, 1 Chr. vi. 19, xxiv. 30; Μυσί, 1 Chr. xxiii. 21, xxiv. 26: *Musi*). The son of Merari the son of Kohath.

MUSIC. Of music as a science among the Hebrews we have no certain knowledge, and the traces of it are so slight as to afford no ground for reasonable conjecture. But with regard to its practice there is less uncertainty. The inventor of musical instruments, like the first poet and the first forger of metals, was a Cainite. According to the narrative of Gen. iv., Jubal the son of Lamech was "the father of all such as handle the harp and organ," that is of all players upon stringed and wind instruments.[a] It has been conjectured that Jubal's discovery may have been perpetuated by the pillars of the Sethites mentioned by Josephus (*Ant.* i. 2), and that in this way it was preserved till after the Flood; but such conjectures are worse than an honest confession of ignorance. The first mention of music in the times after the Deluge is in the narrative of Laban's interview with Jacob, when he reproached his son-in-law with having stolen away unawares, without allowing him to cheer his departure "with songs, with tabret, and with harp" (Gen. xxxi. 27). So that, in whatever way it was preserved, the practice of music existed in the upland country of Syria, and of the three possible kinds of musical instruments, two were known and employed to accompany the song. The three kinds are alluded to in Job xxi. 12. On the banks of the Red Sea sang Moses and the children of Israel their triumphal song of deliverance from the hosts of Egypt; and Miriam, in celebration of the same event, exercised one of her functions as a prophetess by leading a procession of the women of the camp, chanting in chorus the burden to the song of Moses, "Sing ye to Jehovah, for He hath triumphed gloriously; the horse and his rider hath He thrown into the sea." Their song was accompanied by timbrels and dances, or, as some take the latter word, by a musical instrument of which the shape is unknown but which is supposed to have resembled the modern tambourine (DANCE, vol. i. p. 389), and, like it, to have been used as an accompaniment to dancing. The expression in the A. V. of Ex. xv. 21, "and Miriam *answered* them," seems to indicate that the song was alternate, Miriam leading off with the solo while the women responded in full chorus. But it is probable that the Hebrew word, like the corresponding Arabic, has merely the sense of singing, which is retained in the A. V. of Ex. xxxii. 18; Num. xxi. 17; 1 Sam. xxix. 5; Ps. cxlvii. 7; Hos. ii. 15. The same word is used for the shouting of soldiers in battle (Jer. li. 14), and the cry of wild beasts (Is. xiii. 22), and in neither of these cases can the notion of response be appropriate. All that can be inferred is that Miriam led off the song, and this is confirmed by the rendering of the Vulg. *praecinebat*. The triumphal hymn of Moses had unquestionably a religious character about it, but the employment of music in religious service, though idolatrous, is more distinctly marked in the festivities which attended the erection of the golden calf.[b] The wild cries and shouts which reached the ears of Moses and Joshua as they came down from the mount, sounded to the latter as the din of battle, the voices of victor and vanquished blending in one harsh chorus. But the quicker sense of Moses discerned the rough music with which the people worshipped the visible representation of the God that brought them out of Egypt. Nothing could show more clearly than Joshua's mistake the rude character of the Hebrew music at this period (Ex. xxxii. 17, 18), as untrained and wild as the notes of their Syrian forefathers.[c] The silver trumpets made by the metal workers of the tabernacle, which were used to direct the movements of the camp, point to music of a very simple kind (Num. x. 1-10), and the long blast of the jubilee horns, with which the priests brought down the walls of Jericho, had probably nothing very musical about it (Josh. vi.), any more than the rough concert with which the ears of the sleeping Midianites were saluted by Gideon's three hundred warriors (Judg. vii.). The song of Deborah and Barak is cast in a distinctly metrical form, and was probably intended to be sung with a musical accompaniment as one of the people's songs, like that with which Jephthah's daughter and her companions met her father on his victorious return (Judg. xi.).

The simpler impromptu with which the women from the cities of Israel greeted David after the slaughter of the Philistine, was apparently struck off on the spur of the moment, under the influence of the wild joy with which they welcomed their national champion, "the darling of the songs of Israel." The accompaniment of timbrels and instruments of music must have been equally simple, and such that all could take part in it (1 Sam. xviii. 6, 7). Up to this time we meet with nothing like a systematic cultivation of music among the Hebrews, but the establishment of the schools of the prophets appears to have supplied this want. Whatever the students of these schools may have been taught, music was an essential part of their practice. At Bethel (1 Sam. x. 5) was a school of this kind, as well as at Naioth in Ramah

[a] From the occurrence of the name Mahalaleel, third in descent from Seth, which signifies "giving praise to God," Schneider concludes that vocal music in religious services must have been still earlier in use among the Sethites (*Bibl.-gesch. Darstellung der Hebr. Musik*, p. xi.).

[b] With this may be compared the musical service which accompanied the dedication of the golden image in the plains of Dura (Dan. iii.), the commencement of which was to be the signal for the multitude to prostrate themselves in worship.

[c] Compare Lam. ii. 7, where the war-cry of the enemy in the Temple is likened to the noise of the multitude on a solemn feast-day: "They have made a noise in the house of Jehovah as in the day of a solemn feast."

(1 Sam. xix. 19, 20), at Jericho (2 K. ii. 5, 7, 15), Gilgal (2 K. iv. 38), and perhaps at Jerusalem (2 K. xxii. 14). Professional musicians soon became attached to the court, and though Saul, a hardy warrior, had only at intervals recourse to the soothing influence of David's harp, yet David seems to have gathered round him "singing men and singing women," who could celebrate his victories and lend a charm to his hours of peace (2 Sam. xix. 35). Solomon did the same (Eccl. ii. 8), adding to the luxury of his court by his patronage of art, and obtaining a reputation himself as no mean composer (1 K. iv. 32).

But the Temple was the great school of music, and it was consecrated to its highest service in the worship of Jehovah. Before, however, the elaborate arrangements had been made by David for the temple choir, there must have been a considerable body of musicians throughout the country (2 Sam. vi. 5), and in the procession which accompanied the ark from the house of Obededom, the Levites, with Chenaniah at their head, who had acquired skill from previous training, played on psalteries, harps, and cymbals, to the words of the psalm of thanksgiving which David had composed for the occasion (1 Chr. xv. xvi.). It is not improbable that the Levites all along had practised music and that some musical service was part of the worship of the tabernacle; for unless this supposition be made, it is inconceivable that a body of trained singers and musicians should be found ready for an occasion like that on which they make their first appearance. The position which the tribe of Levi occupied among the other tribes naturally favoured the cultivation of an art which is essentially characteristic of a leisurely and peaceful life. They were free from the hardships attending the struggle for conquest and afterwards for existence, which the Hebrews maintained with the nations of Canaan and the surrounding countries, and their subsistence was provided for by a national tax. Consequently they had ample leisure for the various ecclesiastical duties devolving upon them, and among others for the service of song, for which some of their families appear to have possessed a remarkable genius. The three great divisions of the tribe had each a representative family in the choir: Heman and his sons represented the Kohathites, Asaph the Gershonites, and Ethan (or Jeduthun) the Merarites (1 Chr. xv. 17, xxiii. 6, xxv. 1-6). Of the 38,000 who composed the tribe in the reign of David, 4000 are said to have been appointed to praise Jehovah with the instruments which David made (1 Chr. xxiii. 5 and for which he taught them a special chant. This chant for ages afterwards was known by his name, and was sung by the Levites before the army of Jehoshaphat, and on laying the foundation of the second temple (comp. 1 Chr. xvi. 34, 41; 2 Chr. vii. 6, xx. 21; Ezr. iii. 10, 11); and again by the Maccabæan army after their great victory over Gorgias (1 Macc. iv. 24). Over this great body of musicians presided the sons of Asaph, Heman, and Jeduthun, twenty-four in number, as heads of the twenty-four courses of twelve into which the skilled minstrels were divided. These skilled or "cunning" (מֵבִין, 1 Chr. xxv. 6, 7) men were 288 in number, and under them appear to have been the scholars (תַּלְמִיד, 1 Chr. xxv. 8) whom, perhaps, they trained, and who made up the full number of 4000. Supposing 4000 to be merely a round number, each course would consist of a full band of 166 musicians presided over by a body of twelve skilled players, with one of the sons of Asaph, Heman, or Jeduthun as conductor. Asaph himself appears to have played on the cymbals (1 Chr. xvi. 5), and this was the case with the other leaders (1 Chr. xv. 19), perhaps to mark the time more distinctly, while the rest of the band played on psalteries and harps. The singers were distinct from both, as is evident in Ps. lxviii. 25, "the singers went before, the players on instruments followed after, in the midst of the damsels playing with timbrels;" unless the *singers* in this case were the cymbal players, like Heman, Asaph, and Ethan, who, in 1 Chr. xv. 19, are called "singers," and perhaps while giving the time with their cymbals led the choir with their voices. The "players on instruments" (נְגִנִים, *nógĕnîm*), as the word denotes, were the performers upon stringed instruments, like the psaltery and harp, who have been alluded to. The "players on instruments" (חֲלִלִים, *chălîlîm*), in Ps. lxxxvii. 7, were different from these last, and were properly pipers or performers on perforated wind-instruments (see 1 K. i. 40). "The damsels playing with timbrels" (comp. 1 Chr. xiii. 8) seem to indicate that women took part in the temple choir, and among the family of Heman are specially mentioned three daughters, who, with his fourteen sons, were all "under the hands of their father for song in the house of Jehovah" (1 Chr. xxv. 5, 6). Besides, with those of the captivity who returned with Zerubbabel were "200 singing men and *singing women*" (Ezr. ii. 65). Bartenora adds that children also were included.

The trumpets, which are mentioned among the instruments played before the ark (1 Chr. xiii. 8), appear to have been reserved for the priests alone (1 Chr. xv. 24, xvi. 6). As they were also used in royal proclamations (2 K. xi. 14), they were probably intended to set forth by way of symbol the royalty of Jehovah, the theocratic king of His people, as well as to sound the alarm against His enemies (2 Chr. xiii. 12). A hundred and twenty priests blew the trumpets in harmony with the choir of Levites at the dedication of Solomon's temple (2 Chr. v. 12, 13, vii. 6), as in the restoration of the worship under Hezekiah, in the description of which we find an indication of one of the uses of the temple music. "And Hezekiah commanded to offer the burnt-offering upon the altar. And when the burnt-offering began, the song of Jehovah began also, with the trumpets and with the instruments of David king of Israel. And all the congregation worshipped, and the singers sang, and the trumpeters sounded; all until the burnt-offering was finished" (2 Chr. xxix. 27, 28). The altar was the table of Jehovah (Mal. i. 7), and the sacrifices were His feasts (Ex. xxiii. 18), so the solemn music of the Levites corresponded to the melody by which the banquets of earthly monarchs were accompanied. The Temple was His palace, and as the Levite sentries watched the gates by night they chanted the songs of Zion; one of these it has been conjectured with probability is Ps. cxxxiv.

The relative numbers of the instruments in the temple band have been determined in the traditions of Jewish writers. Of psalteries there were to be not less than two nor more than six; of flutes not less than two nor more than twelve; of trumpets not less than two but as many as were

wished; or harps or citherns not less than nine but as many as were wished; while of cymbals there was only one pair (Forkel, *Allg. Gesch. der Musik*, c. iii §28). The enormous number of instruments and dresses for the Levites provided during the magnificent reign of Solomon would seem, if Josephus be correct (*Ant.* viii. 3, §8) to have been intended for all time. A thousand dresses for the high-priest, linen garments and girdles of purple for the priests 10,000; trumpets 200,000; psalteries and harps of electrum 40,000; all these were stored up in the temple treasury. The costume of the Levite singers at the dedication of the Temple was of fine linen (2 Chr. v. 12).

In the private as well as in the religious life of the Hebrews music held a prominent place. The kings had their court musicians (Eccl. ii. 8) who bewailed their death (2 Chr. xxxv. 25), and in the luxurious times of the later monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were wont at their banquets to accompany the song with the tinkling of the psaltery or guitar (Am. vi. 4-6), and amused themselves with devising musical instruments while their nation was perishing, as Nero fiddled when Rome was in flames. Isaiah denounces a woe against those who sat till the morning twilight over their wine, to the sound of "the harp and the viol, the tabret and pipe" (Is. v. 11, 12). But while music was thus made to minister to debauchery and excess, it was the legitimate expression of mirth and gladness, and the indication of peace and prosperity. It was only when a curse was upon the land that the prophet could say, "the mirth of tabrets ceaseth, the noise of them that rejoice endeth, the joy of the harp ceaseth, they shall not drink wine with a song" (Is. xxiv. 8, 9). In the sadness of captivity the harps hung upon the willows of Babylon and the voices of the singers refused to sing the songs of Jehovah at their foreign captors' bidding (Ps. cxxxvii.). The bridal processions as they passed through the streets were accompanied with music and song (Jer. vii. 34), and these ceased only when the land was desolate (Ex. xxvi. 13). The high value attached to music at banquets is indicated in the description given in Ecclus. xxxii. of the duties of the master of a feast. "Pour not out words where there is a musician, and show not forth wisdom out of time. A concert of music in a banquet of wine is as a signet of carbuncle set in gold. As a signet of an emerald set in a work of gold, so is the melody of music with pleasant wine." And again, the memory of the good king Josiah was "as music at a banquet of wine" (Ecclus. xlix. 1). The music of the banquets was accompanied with songs and dancing (Luke xv. 25).[d] The triumphal processions which celebrated a victory were enlivened by minstrels and singers (Ex. xv. 1, 20; Judg. v. 1, xi. 34; 1 Sam. xviii. 6, xxi. 11; 2 Chr. xx. 28; Jud. xv. 12, 13), and on extraordinary occasions they even accompanied armies to battle. Thus the Levites sang the chant of David before the army of Jehoshaphat as he went forth against the hosts of Ammon, and Moab, and Mt. Seir (2 Chr. xx. 19, 21); and the victory of Abijah over Jeroboam is attributed to the encouragement given to Judah by the priests sounding their trumpets before the ark (2 Chr. xiii. 12, 14). It is clear from the narrative of Elisha and the minstrel who by his playing calmed the prophet's spirit till the hand of Jehovah was upon him, that among the camp followers of Jehoshaphat's army on that occasion there were to be reckoned musicians who were probably Levites (2 K. iii. 15). Besides songs of triumph there were also religious songs (Is. xxx. 29; Am. v. 23; Jam. v. 13), "songs of the temple" (Am. viii. 3), and songs which were sung in idolatrous worship (Ex. xxxii. 18).[e] Love songs are alluded to in Ps. xlv. title, and Is. v. 1. There were also the doleful songs of the funeral procession, and the wailing chant of the mourners who went about the streets, the professional "keening" of those who were skilful in lamentation (2 Chr. xxxv. 25; Eccl. xii. 5; Jer. ix. 17-20; Am. v. 16). Lightfoot (*Hor. Heb.* on Matt. ix. 23) quotes from the Talmudists (*Chetubh.* cap. 4, hal. 6) to the effect that every Israelite on the death of his wife, "will afford her not less than two pipers and one woman to make lamentation." The grape gatherers sang as they gathered in the vintage, and the wine-presses were trodden with the shout of a song (Is. xvi. 10; Jer. xlviii. 33); the women sang as they toiled at the mill, and on every occasion the land of the Hebrews during their national prosperity was a land of music and melody. There is one class of musicians to which allusion is casually made (Ecclus. ix. 4), and who were probably foreigners, the harlots who frequented the streets of great cities and attracted notice by singing and playing the guitar (Is. xxiii. 15, 16).

There are two aspects in which music appears, and about which little satisfactory can be said: the mysterious influence which it had in driving out the evil spirit from Saul, and its intimate connexion with prophecy and prophetical inspiration. Miriam "the prophetess" exercised her prophetical functions as the leader of the chorus of women who sang the song of triumph over the Egyptians (Ex. xv. 20). The company of prophets whom Saul met coming down from the hill of God had a psaltery, a tabret, a pipe, and a harp before them, and smitten with the same enthusiasm he "*prophesied* among them" (1 Sam. x. 5, 10). The priests of Baal, challenged by Elijah at Carmel, cried aloud, and cut themselves with knives, and *prophesied* till sunset (1 K. xviii. 29). The sons of Asaph, Heman, and Jeduthun, set apart by David for the temple choir, were to "*prophesy* with harps, with psalteries, and with cymbals" (1 Chr. xxv. 1); Jeduthun "*prophesied* with the harp" (1 Chr. xxv. 3), and in 2 Chr. xxxv. 15 is called "the king's *seer*," a term which is applied to Heman (1 Chr. xxv. 5) and Asaph (2 Chr.

[d] At the royal banquets of Babylon were sung hymns of praise in honour of the gods (Dan. v. 4, 23), and perhaps on some such occasion as the feast of Belshazzar the Hebrew captives might have been brought in to sing the songs of their native land (Ps. cxxxvii.).

[e] The use of music in the religious services of the Therapeutae is described by Philo (*De Vita contempl.* p. 901, ed. Frankof.). At a certain period in the service one of the worshippers rose and sang a song of praise to God, either of his own composition, or one from the older poets. He was followed by others in a regular order, the congregation remaining quiet till the concluding prayer, in which all joined. After a simple meal, the whole congregation arose and formed two choirs, one of men and one of women, with the most skilful singer of each for leader; and in this way sang hymns to God, sometimes with the full chorus, and sometimes with each choir alternately. In conclusion, both men and women joined in a single choir, in imitation of that on the shores of the Red Sea, which was led by Moses and Miriam.

xxix. 30) as musicians, as well as to Gad the prophet (2 Sam. xxiv. 11; 1 Chr. xxix. 29). The spirit of Jehovah came upon Jahaziel, a Levite of the sons of Asaph, in the reign of Jehoshaphat, and he foretold the success of the royal army (2 Chr. xx. 14). From all these instances it is evident that the same Hebrew root (נבא) is used to denote the inspiration under which the prophets spoke and the minstrels sang: Gesenius assigns the latter as a secondary meaning. In the case of Elisha, the minstrel and the prophet are distinct personages, but it is not till the minstrel has played that the hand of Jehovah comes upon the prophet (2 K. iii. 15). This influence of music has been explained as follows by a learned divine of the Platonist school: "These divine enthusiasts were commonly wont to compose their songs and hymns at the sounding of some one musical instrument or other, as we find it often suggested in the Psalms. So Plutarch describes the dictate of the oracle antiently 'how that it was uttered in verse, in pomp of words, similitudes, and metaphors, at the sound of a pipe.' Thus we have Asaph, Heman, and Jeduthun set forth in this prophetical preparation, 1 Chr. xxv. 1 Thus R. Sal. expounds the place 'when they played upon their musical instruments they prophesied after the manner of Elisha' And this sense of this place, I think, is much more genuine than that which a late author of our own would fasten upon it, viz., that this prophesying was nothing but the singing of psalms. For it is manifest that these prophets were not mere singers but composers, and such as were truly called prophets or enthusiasts" (Smith, *Select Discourses*, vi c. 7, pp. 238, 239, ed. 1660). All that can be safely concluded is that in their external manifestations the effect of music in exciting the emotions of the sensitive Hebrews, the frenzy of Saul's madness (1 Sam. xviii. 10), and the religious enthusiasm of the prophets, whether of Baal or Jehovah, were so nearly alike as to be described by the same word. The case of Saul is more difficult still. We cannot be admitted to the secret of his dark malady. Two turning points in his history are the two interviews with Samuel, the first and the last, if we except that dread encounter which the despairing monarch challenged before the fatal day of Gilboa. On the first of these, Samuel foretold his meeting with the company of prophets with their minstrelsy, the external means by which the Spirit of Jehovah should come upon him, and he should be changed into another man (1 Sam. x. 5). The last occasion of their meeting was the disobedience of Saul in sparing the Amalekites, for which he was rejected from being king (1 Sam. xv. 26). Immediately after this we are told the Spirit of Jehovah departed from Saul, and an "evil spirit from Jehovah troubled him" (1 Sam. xvi. 14); and his attendants, who had perhaps witnessed the strange transformation wrought upon him by the music of the prophets, suggested that the same means should be employed for his restoration. "Let our lord now command thy servants before thee, to seek out a man, a cunning player on an harp: and it shall come to pass, when the evil spirit from God is upon thee, that he shall play with his hand, and thou shalt be well. And it came to pass when the spirit from God was upon Saul, that David took an harp and played with his hand. So Saul was refreshed, and was well, and the evil spirit departed from him" (1 Sam. xvi. 16, 23). But on two occasions, when anger and jealousy supervened, the remedy which had soothed the frenzy of insanity had lost its charm (1 Sam. xviii. 10, 11, xix. 9, 10). It seems therefore that the passage of Seneca, which has often been quoted in explanation of this phenomenon, "Pythagoras perturbationes lyra componebat" (*De Ira*, iii. 9) is scarcely applicable, and we must be content to leave the narrative as it stands. [W. A. W.]

MUSICAL INSTRUMENTS. In addition to the instruments of music which have been represented in our version by some modern word, and are treated under their respective titles, there are other terms which are vaguely or generally rendered. These are—

1. דַּרְחֵן, *dachĕvân*, Chald., rendered "instruments of musick" in Dan. vi. 18. The margin gives "or *tabls*, perhaps lit. *concubines*." The last-mentioned rendering is that approved by Gesenius, and seems most probable. The translation, "instruments of musick," seems to have originated with the Jewish commentators, R. Nathan, R. Levi, and Aben Ezra, among others, who represent the word by the Hebrew *neginoth*, that is, stringed instruments which were played by being struck with the hand or the plectrum.

2. מְנִּים, *minnim*, rendered with great probability "stringed-instruments" in Ps. cl. 4. It appears to be a general term, but beyond this nothing is known of it; and the word is chiefly interesting from its occurrence in a difficult passage in Ps. xlv. 8, which stands in the A. V. "out of the ivory palaces *whereby* (מִנִּי, *minni*) they have made thee glad," a rendering which is neither intelligible nor supported by the Hebrew idiom. Gesenius and most of the moderns follow Sebastian Schmid in translating, "out of the ivory palaces the stringed-instruments make thee glad."

3. עָשׂוֹר, *'âsôr*, "an instrument of ten strings," Ps. xcii. 3. The full phrase is נֵבֶל עָשׂוֹר, *nebel 'âsôr*, "a ten-stringed psaltery," as in Ps. xxxiii. 2, cxliv. 9; and the true rendering of the first-mentioned passage would be "upon an instrument of ten strings, even upon the psaltery." [PSALTERY.]

4. שִׁדָּה, *shiddâh*, is found only in one very obscure passage, Eccl. ii. 8, "I gat me men-singers and women-singers, and the delights of the sons of men, *musical instruments, and that of all sorts*" (שִׁדָּה וְשִׁדּוֹת, *shiddâh veshiddôth*). The words thus rendered have received a great variety of meanings. They are translated "drinking-vessels" by Aquila and the Vulgate; "cup-bearers" by the LXX., Peshito-Syriac, Jerome, and the Arabic version; "baths" by the Chaldee; and "musical instruments" by Dav. Kimchi, followed by Luther and the A. V., as well as by many commentators. By others they are supposed to refer to the women of the royal harem. But the most probable interpretation to be put upon them is that suggested by the usage of the Talmud, where שִׁדְרָה, *shidrâh*, denotes a "palanquin" or "litter" for women. The whole question is discussed in Gesenius' *Thesaurus*, p. 1365.

5. שָׁלִשִׁים, *shâlishîm*, rendered "instruments of musick" in the A. V. of 1 Sam. xviii. 6, and in the margin "three-stringed instruments," from the root *shâlash*, "three." Roediger (Gesen. *Thes.* p. 1429) translates "triangles," which are said to have been invented in Syria, from the same root. We have no means of deciding which is the more correct. The LXX. and Syriac give "cymbals" and the

Vulgate "sistra;" while others render it "noble songs" (comp. Prov. xxii. 20). [W. A. W.]

MUSTARD (σίναπι: *sinapis*) occurs in Matt. xiii. 31; Mark iv. 31; Luke xiii. 19, in which passages the kingdom of heaven is compared to a grain of mustard-seed which a man took and sowed in his garden; and in Matt. xvii. 20, Luke xvii. 6, where our Lord says to His apostles, "if ye had faith as a grain of mustard-seed, ye might say to this mountain, remove hence to yonder place."

The subject of the mustard-tree of Scripture has of late years been a matter of considerable controversy, the common mustard-plant being supposed unable to fulfil the demands of the Biblical allusion. In a paper by the late Dr. Royle, read before the Royal Asiatic Society, and published in No. xv. of their Journal (1844), entitled, "On the Identification of the Mustard-tree of Scripture," the author concludes that the *Salvadora persica* is the tree in question. He supposes the *Salvadora persica* to be the same as the tree called *Khardal* (the Arabic for mustard), seeds of which are employed throughout Syria as a substitute for mustard, of which they have the taste and properties. This tree, according to the statement of Mr. Ameuny, a Syrian, quoted by Dr. Royle, is found all along the banks of the Jordan, near the lake of Tiberias, and near Damascus, and is said to be generally recognised in Syria as the mustard-tree of Scripture. It appears that Captains Irby and Mangles, who had observed this tree near the Dead Sea, were struck with the idea that it was the mustard-tree of the parable. As these travellers were advancing toward Kerek from the southern extremity of the Dead Sea, after leaving its borders they entered a wooded country with high rushes and marshes. "Occasionally," they say, "we met with specimens of trees, &c., such as none of our party had seen before . . . Amongst the trees which we knew, were various species of Acacia, and in some instances we met with the dwarf Mimosa . . . There was one curious tree which we observed in great numbers, and which bore a fruit in bunches, resembling in appearance the currant, with the colour of the plum; it has a pleasant, though strong aromatic taste, resembling mustard, and if taken in any quantity, produces a similar irritability in the nose and eyes. The leaves of this tree have the same pungent flavour as the fruit, though not so strong. We think it probable that this is the tree our Saviour alluded to in the parable of the mustard-seed, and not the mustard-plant which is to be found in the north" (*Trav.* May 8). Dr. Royle thus sums up his arguments in favour of the *Salvadora persica* representing the mustard-tree of Scripture:—"The *S. persica* appears better calculated than any other tree that has yet been adduced to answer to every thing that is required, especially if we take into account its name and the opinions held respecting it in Syria. We have in it a small seed, which sown in cultivated ground grows up and abounds in foliage. This being pungent, may like the seeds have been used as a condiment, as mustard-and-cress is with us. The nature of the plant is to become arboreous, and thus it will form a large shrub or a tree, twenty-five feet high, under which a horseman may stand when the soil and climate are favourable; it produces numerous branches and leaves, under which birds may and do take shelter, as well as build their nests; it has a name in Syria which may be considered as traditional from the earliest times, of which the Greek is a correct translation, its seeds are used for the same purposes as mustard and in a country where trees are not plentiful that is, the shores of the lake of Tiberias, this tree is said to abound, that is in the very locality where the parable was spoken" (*Treatise on the Mustard-tree*, &c., p. 24).

Salvadora Persica.

Notwithstanding all that has been adduced by Dr. Royle in support of his argument, we confess ourselves unable to believe that the subject of the mustard-tree of Scripture is thus finally settled. But, before the claims of the *Salvadora persica* are discussed, it will be well to consider whether some mustard-plant (*Sinapis*), may not after all be the mustard-tree of the parable: at any rate this opinion has been held by many writers, who appear never to have entertained any doubt upon the subject. Hiller, Celsius, Rosenmüller, who all studied the botany of the Bible, and older writers, such as Erasmus, Zeserus, Grotius, are content to believe that some common mustard-plant is the plant of the parable; and more recently Mr. Lambert in his "Note on the Mustard-plant of Scripture" (see *Linnean Trans.* vol. xvii. p. 449), has argued in behalf of the *Sinapis nigra*.

The objection commonly made against any *Sinapis* being the plant of the parable is, that the seed grew into "a tree" (δένδρον), or as St. Luke has it, "a great tree" (δένδρον μέγα), in the branches of which the fowls of the air are said to come and lodge. Now in answer to the above objection it is urged with great truth, that the expression is figurative and Oriental, and that in a proverbial simile no literal accuracy is to be expected; it is an error, for which the language of Scripture is not accountable, to assert, as Dr. Royle and some others have done, that the passage implies that birds "built their nests" in the tree, the Greek word κατασκηνόω has no such meaning, the word merely means "to settle or rest upon" anything for a longer or shorter time; the birds came "*insidendi et versandi causa*" as Hiller (*Hierophyt.* ii. 63) explains the phrase: nor is there any

occasion to suppose that the expression "fowls of the air" denotes any other than the smaller *insessorial* kinds, linnets, finches, &c., and not the "aquatic fo by the lake side, or partridges and pigeons hovering over the rich plain of Gennesareth," which Prof. Stanley (*S. & P.* 427) recognises as "the birds that came and devoured the seed by the way side"—for the larger birds are wild and avoid the way side—or as those "which took refuge in the spreading branches of the mustard-tree." Hiller's explanation is probably the correct one; that the birds came and settled on the mustard-plant for the sake of the seed, of which they are very fond. Again, whatever the σίναπι may be, it is expressly said to be a herb, or more properly "a garden herb" (λάχανον, *olus*). As to the plant being called a "tree" or a "great tree," the expression is not only an Oriental one, but it is clearly spoken with reference to some other thing; the σίναπι with respect to the other *herbs* of the garden may, considering the size to which it grows, justly be called "*a great tree*," though of course, with respect to trees properly so named, it could not be called one at all. This, or a somewhat similar explanation is given by Celsius and Hiller,

Sinapis Nigra.

and old commentators generally, and we confess we see no reason why we should not be satisfied with it. Irby and Mangles mention the large size which the mustard-plant attains in Palestine. In their journey from Bysan to Adjeloun, in the Jordan valley, they crossed a small plain very thickly covered with herbage, particularly the mustard-plant, which reached as high as their horses' heads. (*Trav.* March 12.) Dr. Kitto says this plant was probably the *Sinapis orientalis* (*nigra*), which attains under a favouring climate a stature which it will not reach in our country. Dr. Thomson also (*The Land and the Book*, p. 414), says he has seen the Wild Mustard on the *rich plain* of Akkar as tall as the horse and the rider. Now, it is clear from Scripture that the σίναπι was cultivated in our Lord's time, the seed a "man took and sowed in his field;" St. Luke says, "cast into his garden:" if then, the wild plant on the *rich plain* of Akkar grows as high as a man on horseback, it might attain to the same or a greater height when in a cultivated garden; and if, as Lady Callcott has observed, we take into account the very low plants and shrubs upon which birds often roost, it will readily be seen that some common mustard-plant is able to fulfil all the Scriptural demands. As to the story of the Rabbi Simeon Ben Calaphtha having in his garden a mustard-plant, into which he was accustomed to climb as men climb into a fig-tree, it can only be taken for what Talmudical statements generally are worth, and must be quite insufficient to afford grounds for any argument. But it may be asked, Why not accept the explanation that the *Salvadora persica* is the tree denoted?—a tree which will literally meet all the demands of the parable. Because, we answer, where the commonly received opinion can be shown to be in full accordance with the Scriptural allusions, there is no occasion to be dissatisfied with it; and again, because at present we know nothing certain of the occurrence of the *Salvadora persica* in Palestine, except that it occurs in the small tropical low valley of Engedi, near the Dead Sea, from whence Dr. Hooker saw specimens, but it is evidently of rare occurrence. Mr. Ameuny says he had seen it all along the banks of the Jordan, near the lake of Tiberias and Damascus; but this statement is certainly erroneous. We know from Pliny, Dioscorides, and other Greek and Roman writers, that mustard-seeds were much valued, and were used as a condiment; and it is more probable that the Jews of our Lord's time were in the habit of making a similar use of the seeds of some common mustard (*Sinapis*), than that they used to plant in their gardens the seed of a tree which certainly cannot fulfil the Scriptural demand of being called "a pot-herb."

The expression "which is indeed the least of all seeds," is in all probability hyperbolical, to denote a very small seed indeed, as there are many seeds which are smaller than mustard. "The Lord in his popular teaching," says Trench (*Notes on Parables*. 108), "adhered to the popular language;" and the mustard-seed was used proverbially to denote anything very minute (see the quotations from the Talmud in Buxtorf, *Lex. Talm* p. 322: also the Koran, *Sur.* 31).

The parable of the mustard-plant may be thus paraphrased:—"The Gospel dispensation is like a grain of mustard-seed which a man sowed in his garden, which indeed is one of the least of all seeds; but which, when it springs up, becomes a tall branched plant, on the branches of which the birds come and settle seeking their food."[a] [W. H.]

[a] Dr. Hooker has read the proof-sheet of this article, and returned it with the following remarks: "I quite agree with all you say about *Mustard*. My best informants laughed at the idea of the *Salvadora persica* either being the mustard, or as being sufficiently well known to be made use of in a parable at all. I am satisfied that it is a very rare plant in Syria, and is probably confined to the hot low sub-tropical Engedi valley, where various other Indian and Arabian types appear at the *Ultima Thule* of their northern wanderings. Of the mustard-plants which I saw on the banks of the Jordan, one was 10 feet high, drawn up amongst bushes, &c., and not thicker than whipcord. I was told it was a well-known condiment, and cultivated by the Arabs: it is the common wild *Sinapis nigra*."

MUTH-LAB'BEN. "To the chief musician upon Muth-labben" (עַל מוּת לַבֵּן: ὑπὲρ τῶν κρυφίων τοῦ υἱοῦ: *pro occultis filii*), is the title of Ps. ix., which has given rise to infinite conjecture. Two difficulties in connexion with it have to be resolved: first, to determine the true reading of the Hebrew, and then to ascertain its meaning. Neither of these points has been satisfactorily explained. It is evident that the LXX. and Vulgate must have read עַל עֲלֻמוֹת, "concerning the mysteries," and so the Arabic and Ethiopic versions. The Targum, Symmachus,[a] and Jerome,[b] in his translation of the Hebrew, adhered to the received text, while Aquila,[c] retaining the consonants as they at present stand, read *al-muth* as one word, עַלְמוּת, "youth," which would be the regular form of the abstract noun, though it does not occur in Biblical Hebrew. In support of the reading עלמות as one word, we have the authority of 28 of Kennicott's MSS., and the assertion of Jarchi that he had seen it so written, as in Ps. xlviii. 14, in the Great Masorah. If the reading of the Vulgate and LXX. be correct with regard to the consonants, the words might be pointed thus, עַל עֲלָמוֹת, *'al 'ălāmōth*, "upon Alamoth," as in the title of Ps. xlvi., and לבן is possibly a fragment of לִבְנֵי קֹרַח, *libnê Korach*, "for the sons of Korah," which, appears in the same title. At any rate such a reading would have the merit of being intelligible, which is more than can be said of most explanations which have been given. But if the Masoretic reading be the true one, it is hard to attach any meaning to it. The Targum renders the title of the psalm,—"on the death of the man who came forth from between (בֵּין) the camps," alluding to Goliath, the Philistine champion (אִישׁ הַבֵּינַיִם, 1 Sam. xvii. 4). That David composed the psalm as a triumphal song upon the slaughter of his gigantic adversary, was a tradition which is mentioned by Kimchi merely as an *on dit*. Others render it "on the death of the son," and apply it to Absalom; but, as Jarchi remarks, there is nothing in the character of the psalm to warrant such an application. He mentions another interpretation, which appears to have commended itself to Grotius and Hengstenberg, by which *labben* is an anagram of *nabal*, and the psalm is referred to the death of Nabal, but the Rabbinical commentator had the good sense to reject it as untenable, though there is as little to be said in favour of his own view. His words are—"but I say that this song is of the future to come, when the childhood and youth of Israel shall be made white (יתלבן), and their righteousness be revealed and their salvation draw nigh, when Esau and his seed shall be blotted out." He takes עַלְמוּת as one word, signifying "youth," and לְלַבֵּן=לַבֵּן, "to whiten." Menahem, a commentator quoted by Jarchi, interprets the title as addressed "to the musician upon the stringed instruments called Alamoth, to instruct," taking לַבֵּן as if it were לְחַבִּין or לְבוֹנֵן. Donesh supposes that *labben* was the name of a man who warred with David in those days, and to whom reference is made as "the wicked" in verse 5. Arama (quoted by Dr. Gill in his *Exposition*) identifies him with Saul. As a last resource Kimchi suggests that the title was intended to convey instructions to the Levite minstrel Ben, whose name occurs in 1 Chr. xv. 18 among the temple choir, and whose brethren played "with psalteries on Alamoth." There is reason, however, to suspect that the reading in this verse is corrupt, as the name is not repeated with the others in verse 20. There still remain to be noticed the conjectures of Delitzsch, that Muth-labben denotes the tone or melody with the words of the song associated with it, of others that it was a musical instrument, and of Hupfeld that it was the commencement of an old song, either signifying "die for the son," or "death to the son." Hitzig and others regard it as an abbreviation containing a reference to Ps. xlviii. 14. The difficulty of the question is sufficiently indicated by the explanation which Gesenius himself (*Thes.* p. 741 *a*) was driven to adopt, that the title of the psalm signified that it was "to be chanted by boys with virgins' voices."

The renderings of the LXX. and Vulgate induced the early Christian commentators to refer the psalm to the Messiah. Augustine understands "the son" as "the only begotten son of God." The Syriac version is quoted in support of this interpretation, but the titles of the Psalms in that version are generally constructed without any reference to the Hebrew, and therefore it cannot be appealed to as an authority.

On all accounts it seems extremely probable that the title in its present form is only a fragment of the original, which may have been in full what has been suggested above. But, in the words of the Assembly's Annotations, "when all hath been said that can be said the conclusion must be the same as before; that these titles are very uncertain things, if not altogether unknown in these days." [W. A. W.]

MYN'DUS (Μύνδος), a town on the coast of CARIA, between MILETUS and HALICARNASSUS. The convenience of its position in regard to trade was probably the reason why we find in 1 Macc. xv. 23 that it was the residence of a Jewish population. Its ships were well known in very early times (Herod. v. 33), and its harbour is specially mentioned by Strabo (xiv. 658). The name still lingers in the modern *Mentesche*, though the remains of the city are probably at *Gumishlu*, where Admiral Beaufort found an ancient pier and other ruins. [J. S. H.]

MY'RA (τὰ Μύρα), an important town in LYCIA, and interesting to us as the place where St. Paul, on his voyage to Rome (Acts xxvii. 5), was removed from the Adramyttian ship which had brought him from Caesarea, and entered the Alexandrian ship in which he was wrecked on the coast of Malta. [ADRAMYTTIUM.] The travellers had availed themselves of the first of these vessels because their course to Italy necessarily took them past the coasts of the province of ASIA (ver. 2), expecting in some harbour on these coasts to find another vessel bound to the westward. This expectation was fulfilled (ver. 6).

It might be asked how it happened that an Alexandrian ship bound for Italy was so far out of her course as to be at Myra. This question is easily answered by those who have some acquaintance with the navigation of the Levant. Myra is nearly due north of Alexandria, the harbours in the neighbourhood are numerous and good, the mountains high and easily seen

[a] περὶ θανάτου τοῦ υἱοῦ. [b] *Super mortis filii.*
[c] νεανιότητος τοῦ υἱοῦ.

and the current sets along the coast to the westward (Smith's *Voyage and Shipwreck of St. Paul*). Moreover, to say nothing of the possibility of landing or taking in passengers or goods, the wind was blowing about this time continuously and violently from the N.W., and the same weather which impeded the Adramyttian ship (ver. 4) would be a hindrance to the Alexandrian (see ver. 7; *Life and Epistles of St. Paul*, ch. xxiii.).

Some unimportant MSS. having Ἀύστρα in this passage, Grotius conjectured that the true reading might be Ἀμυρα (Bentleii *Critica Sacra*, ed. A. A. Ellis). This supposition, though ingenious, is quite unnecessary. Both Limyra and Myra were well known among the maritime cities of Lycia. The harbour of the latter was strictly Andriace, distant from it between two and three miles, but the river was navigable to the city (Appian, *B. C.* iv. 82).

Myra (called *Dembra* by the Greeks) is remarkable still for its remains of various periods of history. The tombs, enriched with ornament, and many of them having inscriptions in the ancient Lycian character, show that it must have been wealthy in early times. Its enormous theatre attests its considerable population in what may be called its Greek age. In the deep gorge which leads into the mountains is a large Byzantine church, a relic of the Christianity which may have begun with St. Paul's visit. It is reasonable to conjecture that this may have been a metropolitan church, inasmuch as we find that when Lycia was a province, in the later Roman empire, Myra was its capital (*Hierocl.* p. 684). In later times it was curiously called the port of the Adriatic, and visited by Anglo-Saxon travellers (*Early Travels in Palestine*, pp. 33, 138). Legend says that St. Nicholas, the patron saint of the modern Greek sailors, was born at PATARA, and buried at Myra, and his supposed relics were taken to St. Petersburgh by a Russian frigate during the Greek revolution.

The remains of Myra have had the advantage of very full description by the following travellers: Leake, Beaufort, Fellows, Texier, and Spratt and Forbes. [J. S. H.]

MYRRH, the representative in the A. V. of the Hebrew words *Mór* and *Lôt*.

1. *Mór* (לֹט: σμύρνα, στακτή, μύρινος, κρόκος: *myrrha, myrrhinus, myrrha*) is mentioned in Ex. xxx. 23, as one of the ingredients of the "oil of holy ointment;" in Esth. ii. 12, as one of the substances used in the purification of women; in Ps. xlv. 8, Prov. vii. 17, and in several passages in Canticles, as a perfume. The Greek σμύρνα occurs in Matt. ii. 11 amongst the gifts brought by the wise men to the infant Jesus, and in Mark xv. 23, it is said that "wine mingled with myrrh" (οἶνος ἐσμυρνισμένος) was offered to, but refused by, our Lord on the cross. Myrrh was also used for embalming (see John xix. 39, and Herod. ii. 86). Various conjectures have been made as to the real nature of the substance denoted by the Hebrew *mór* (see Celsius, *Hierob.* i. 522); and much doubt has existed as to the countries in which it is produced. According to the testimony of Herodotus (ii. 107), Dioscorides (i. 77), Theophrastus (ix. 4, §1), Diodorus Siculus (ii. 49), Strabo, Pliny, &c., the tree which produces myrrh grows in Arabia. Pliny (xii 16) says, in different parts of Arabia, and asserts that there are several kinds of myrrh both wild and cultivated: it is probable that under the name of *myrrha* he is describing different resinous productions. Theophrastus, who is generally pretty accurate in his observations, remarks (ix. 4. §1), that myrrh is produced in the middle of Arabia, around Saba and Adramytta. Some ancient writers, as Propertius (i. 2, 3) and Oppian (*Halieut.* iii. 403), speak of myrrh as found in Syria (see also Belon, *Observ.* ii. ch. 80); others conjecture India and Aethiopia; Plutarch (*Is. et Osir.* p. 383) asserts that it is produced in Egypt, and is there called *Bal*. "The fact," observes Dr. Royle (s. v. *Mór*, Kitto's *Cycl.*), "of myrrh being called *bal* among the Egyptians is extremely curious, for *bol* is the Sanscrit *bola*, the name for myrrh throughout India."[b]

It would appear that the ancients generally are correct in what they state of the localities where myrrh is produced, for Ehrenberg and Hemprich have proved that myrrh is found in Arabia Felix, thus confirming the statements of Theophrastus and Pliny; and Mr. Johnson (*Travels in Abyssinia*, i. 249) found myrrh exuding from cracks in the back of a tree in Koran-hedulah in Adal, and Forskål mentions two myrrh-producing trees, *Amyris Kataf* and *Amyris Kafal*, as occurring near Haes in Arabia Felix. The myrrh-tree which Ehrenberg and Hemprich found in the borders of Arabia Felix, and that which Mr. Johnson saw in Abyssinia are believed to be identical; the tree is the *Balsamodendron myrrha*, "a low thorny ragged-looking tree, with bright trifoliate leaves:" it is probably the *Murr* of Abu 'l Fadli, of which he says "murr is the Arabic name of a thorny tree like an acacia, from which flows a white liquid, which thickens and becomes a gum."

Balsamodendron Myrrha.

That myrrh has been long exported from Africa we learn from Arrian, who mentions σμύρνα as one of the articles of export from the ancient district of Barbaria: the Egyptians perhaps cb-

[a] From the root מָרַר, "to drop."

[b] Pruner, however, was probably in error, and has confounded the Copt. *sal*, "myrrh," with *bal*, "an eye." See Jablonski, *Opusc.* i. 49, ed. te Water.

tained their myrrh from the country of the Troglodytes (Nubia), as the best wild myrrh-trees are said by Pliny (xii. 15) to come from that district. Pliny states also that "the Sabaei even cross the sea to procure it in the country of the Troglodytae." From what Athenaeus (xv. 689) says, it would appear that myrrh was imported into Egypt, and that the Greeks received it from thence. Dioscorides describes many kinds of myrrh under various names, for which see Sprengel's *Annotations*, i. 73, &c.

The *Balsamodendron myrrha*, which produces the myrrh of commerce, has a wood and bark which emit a strong odour; the gum which exudes from the bark is at first oily, but becomes hard by exposure to the air: it belongs to the natural order *Terebinthaceae*. There can be little doubt that this tree is identical with the *Murr* of Abu'l Fadli, the σμύρνα of the Greek writers, the "stillata cortice myrrha" of Ovid and the Latin writers, and the *môr* of the Hebrew Scriptures.

The "wine mingled with myrrh," which the Roman soldiers presented to our Lord on the cross, was given, according to the opinion of some commentators, in order to render him less sensitive to pain; but there are differences of opinion on this subject, for which see GALL, Appendix A.

Cistus Creticus.

2. *Lôt* (לֹט[c]: στακτή: *stacte*), erroneously translated "myrrh" in the A. V. in Gen. xxxvii. 25, xliii. 11, the only two passages where the word is found, is generally considered to denote the odorous resin which exudes from the branches of the *Cistus creticus*, known by the name of *ladanum* or *labdanum*. It is clear that *lôt* cannot signify "myrrh," which is not produced in Palestine, yet the Scriptural passages in Genesis speak of this substance as being exported from Gilead into Egypt. *Ladanum* was known to the early Greeks, for Herodotus (iii. 107, 112) mentions λήδανον, or λάδανον, as a product of Arabia, and says it is found "sticking like gum to the beards of he-goats, which collect it from the wood;" similar is the testimony of Dioscorides (i. 128), who says that the best kind is "odorous, in colour inclining to green, easy to soften, fat, free from particles of sand and dirt; such is that kind which is produced in Cyprus, but that of Arabia and Libya is inferior in quality." There are several species of *Cistus*, all of which are believed to yield the gum ladanum; but the species mentioned by Dioscorides is in all probability identical with the one which is found in Palestine, viz., the *Cistus creticus* (Strand, *Flor. Palaest.* No. 289). The *C. ladaniferus*, a native of Spain and Portugal, produces the greatest quantity of the ladanum; it has a white flower, while that of the *C. creticus* is rose-coloured. Tournefort (*Voyage*, i. 79) has given an interesting account of the mode in which the gum ladanum is gathered and has figured the instrument commonly employed by the people of Candia for the purpose of collecting it. There can be no doubt that the Hebrew *lôt*, the Arabic *ladan*, the Greek λήδανον, the Latin and English *lādanum*, are identical (see Rosenmüller, *Bib. Bot.* p. 158; Celsius, *Hierob.* i. 288). Ladanum was formerly much used as a stimulant in medicine, and is now of repute amongst the Turks as a perfume.

The Cistus belongs to the Natural order *Cistaceae*, the Rock-rose family. [W. H.]

MYRTLE (הֲדַס,[a] *hadas*: μυρσίνη, ἴσον;[b] *myrtus, myrtetum*). There is no doubt that the A. V. is correct in its translation of the Hebrew word, for all the old versions are agreed upon the point, and the identical noun occurs in Arabic—in the dialect of Yemen, S. Arabia—as the name of the "myrtle."[c]

Mention of the myrtle is made in Neh. viii. 15; Is. xli. 19, lv. 13; Zech. i. 8, 10, 11. When the Feast of Tabernacles was celebrated by the Jews on the return from Babylon, the people of Jerusalem were ordered to "go forth unto the mount and fetch olive-branches, and pine-branches, and myrtle-branches, and to make booths." The prophet Isaiah foretells the coming golden age of Israel, when the Lord shall plant in the wilderness "the shittah-tree and the myrtle-tree and the oil-tree." The modern Jews still adorn with myrtle the booths and sheds at the Feast of Tabernacles. Myrtles (*Myrtus communis*) will grow either on hills or in valleys, but it is in the latter locality where they attain to their greatest perfection. Formerly, as we learn from Nehemiah (viii. 15), myrtles grew on the hills about Jerusalem. "On Olivet," says Prof. Stanley, "nothing is now to be seen but the olive and the fig tree:" on some of the hills, how-

[a] From root לוּט, "to cover;" the gum covering the plant.

[a] The derivation of this word is uncertain; but see the Hebrew Lexicons.

[b] The LXX. reading הוֹרִים, instead of הֲדַסִּים.

[c] هَدَس (Heb. חָדָס). Myrtus *idiomate Arabum Felicis*). Kamus (Freytag, *Ar. Lex.* s. v.).

sues, near Jerusalem, Hasselquist (*Trav.* 127, Lond. 1766) observed the myrtle. Dr. Hooker says it is not uncommon in Samaria and Galilee. Irby and Mangles (p. 222) describe the rivers from Tripoli towards Galilee as having their banks covered with myrtles (see also Kitto, *Phys. Hist. of Palest.* p. 268).

Myrtus communis.

The myrtle (*hadas*) gave her name to Hadassah or Esther (Esth. ii. 7): the Greek names Myrtilus, Myrtoëssa, &c., have a similar origin. There are several species of the genus *Myrtus*, but the *Myrtus communis* is the only kind denoted by the Hebrew *Hadas*: it belongs to the natural order *Myrtaceae*, and is too well known to need description. [W. H.]

MY'SIA (Μυσία). If we were required to fix the exact limits of this north-western district of Asia Minor, a long discussion might be necessary. But it is mentioned only once in the N. T. (Acts xvi. 7, 8), and that cursorily and in reference to a passing journey. St. Paul and his companions, on the second missionary circuit, were divinely prevented from staying to preach the Gospel either in ASIA or BITHYNIA. They had then come κατὰ τὴν Μυσίαν, and they were directed to Troas, παρελθόντες τὴν Μυσίαν; which means either that they skirted its border, or that they passed through the district without staying there. In fact the best description that can be given of Mysia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia. The term is evidently used in an ethnological, not a political sense. Winer compares it, in this point of view, to such German terms as Suabia, Breisgau, &c. Illustrations nearer home might be found in such districts as Craven in Yorkshire or Appin in Argyllshire. ASSOS and ADRAMYTTIUM were both in Mysia. Immediately opposite was the island of Lesbos. [MITYLENE.] TROAS, though within the same range of country, had a small district of its own which was viewed as politically separate.

[J. S. H.]

N

NA'AM (נַעַם: Νοάμ: *Naham*). One of the sons of Caleb the son of Jephunneh (1 Chr. iv. 15).

NA'AMAH (נַעֲמָה). 1. (Νοεμά: *Noema.*) One of the four women whose names are preserved in the records of the world before the Flood; all except Eve being Cainites. She was daughter of Lamech by his wife Zillah, and sister, as is expressly mentioned, to Tubalcain (Gen. iv. 22 only). No reason is given us why these women should be singled out for mention in the genealogies; and in the absence of this most of the commentators have sought a clue in the significance of the names interpreted as Hebrew terms; endeavouring, in the characteristic words of one of the latest Jewish critics, by "due energy to strike the living water of thought ever out of the rocky soil of dry names" (Kalisch, *Genesis*, 149). Thus Naamah, from *Na'am*, "sweet, pleasant," signifies, according to the same interpreter, "the lovely beautiful woman," and this and other names in the same genealogy of the Cainites are interpreted as tokens that the human race at this period was advancing in civilization and arts. But not only are such deductions at all times hazardous and unsatisfactory, but in this particular instance it is surely begging the question to assume that these early names are Hebrew; at any rate the *onus probandi* rests on those who make important deductions from such slight premises. In the Targum Pseudojonathan, Naamah is commemorated as the "mistress of lamenters and singers;" and in the Samaritan Version her name is given as Zalkipha.

2. (Μααχάμ, Ναανᾶ, Νοομμᾶ; Alex. Ναμα, Νοομμα; Joseph. Νοομᾶς: *Naama.*) Mother of king Rehoboam (1 K. xiv. 21, 31[a]; 2 Chr. xii. 13). On each occasion she is distinguished by the title "the (not 'an,' as in A.V.) Ammonite." She was therefore one of the foreign women whom Solomon took into his establishment (1 K. xi. 1). In the LXX. (1 K. xii. 24, answering to xiv. 31 of the Hebrew text) she is stated to have been the "daughter of Ana (*i. e.* Hanun) the son of Nahash." If this is a translation of a statement which once formed part of the Hebrew text, and may be taken as authentic history, it follows that the Ammonite war into which Hanun's insults had provoked David was terminated by a re-alliance; and, since Solomon reigned forty years, and Rehoboam was forty-one years old when he came to the throne, we can fix with tolerable certainty the date of the event. It took place before David's death, during that period of profound quiet which settled down on the nation, after the failure of Absalom's rebellion and of the subsequent attempt of Sheba the son of Bichri had strengthened more than ever the affection of the nation for the throne of David; and which was not destined to be again disturbed till put an end to by the shortsighted rashness of the son of Naamah. G.]

NA'AMAH (נַעֲמָה: Νομάν; Alex. Νομα *Neema*), one of the towns of Judah in the district of the lowland or Shefelah, belonging to the same group with Lachish, Eglon, and Makkedah (Josh. xv. 41). Nothing more is known of it, nor has

[a] The LXX. transpose this to ch. xii. after ver. 24.

any name corresponding with it been yet discovered in the proper direction. But it seems probable that Naamah should be connected with the Naamathites, who again were perhaps identical with the Mehunim or Minaeans, traces of whom are found on the south-western outskirts of Judah; one such at Minois or *el-Minyay*, a few miles below Gaza. [G.]

NA'AMAN (נַעֲמָן: Ναιμάν; N. T. Rec. Text, Νεεμάν, but Lachm. with A B D, Ναιμάν; Joseph. Ἄμανος: *Naaman*)—or to give him the title conferred on him by our Lord, "Naaman the Syrian." An Aramite warrior, a remarkable incident in whose life is preserved to us through his connexion with the prophet Elisha. The narrative is given in 2 K. v.

The name is a Hebrew one, and that of ancient date (see the next article), but it is not improbable that in the present case it may have been slightly altered in its insertion in the Israelite records. Of Naaman the Syrian there is no mention in the Bible except in this connexion. But a Jewish tradition, at least as old as the time of Josephus (*Ant.* viii. 15, §5), and which may very well be a genuine one, identifies him with the archer whose arrow, whether at random or not,[a] struck Ahab with his mortal wound, and thus "gave deliverance to Syria." The expression is remarkable—"because that by him Jehovah had given deliverance to Syria." To suppose the intention to be that Jehovah was the universal ruler, and that therefore all deliverance, whether afforded to His servants or to those who, like the Syrians, acknowledged Him not, was wrought by Him, would be thrusting a too modern idea into the expression of the writer. Taking the tradition above-mentioned into account, the most natural explanation perhaps is that Naaman, in delivering his country, had killed one who was the enemy of Jehovah not less than he was of Syria. Whatever the particular exploit referred to was, it had given Naaman a great position at the court of Benhadad. In the first rank for personal prowess and achievements, he was commander-in-chief of the army, while in civil matters he was nearest to the person of the king, whom he accompanied officially, and supported, when the king went to worship in the temple of Rimmon (ver. 18). He was afflicted with a leprosy of the white kind (ver. 27), which had hitherto defied cure. In Israel, according to the enactments of the Mosaic Law, this would have cut off even[b] Naaman from intercourse with every one; he would there have been compelled to dwell in a "several house." But not so in Syria; he maintained his access[c] to the king, and his contact with the members of his own household. The circumstances of his visit to Elisha have been drawn out under the latter head [vol. i. 538 *b*], and need not be repeated here. Naaman's appearance throughout the occurrence is most characteristic and consistent. He is every inch a soldier, ready at once to resent what he considers as a slight cast either on himself or the natural glories of his country, and blazing out in a moment into sudden "rage," but calmed as speedily by a few goodhumoured and sensible words from his dependants, and, after the cure has been effected, evincing a thankful and simple heart, whose gratitude knows no bounds and will listen to no refusal.

His request to be allowed to take away two mules' burthen of earth is not easy to understand. The natural explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of Aceldama for the Campo Santo at Pisa, and in obedience to which the pilgrims to Mecca are said to bring back stones from that sacred territory, the grateful convert to Jehovah wished to take away some of the earth of His country, to form an altar for the burnt-offering and sacrifice which henceforth he intended to dedicate to Jehovah only, and which would be inappropriate if offered on the profane earth of the country of Rimmon or Hadad. But it should be remembered that in the narrative there is no mention of an altar;[d] and although Jehovah had on one occasion ordered that the altars put up for offerings to Him should be of earth (Ex. xx. 24), yet Naaman could hardly have been aware of this enactment, unless indeed it was a custom of older date and wider existence than the Mosaic law, and adopted into that law as a significant and wise precept for some reason now lost to us.

How long Naaman lived to continue a worshipper of Jehovah while assisting officially at that of Rimmon, we are not told. When next we hear of Syria, another, Hazael, apparently holds the position which Naaman formerly filled. But, as has been elsewhere noticed, the reception which Elisha met with on this later occasion in Damascus probably implies that the fame of "the man of God," and of the mighty Jehovah in whose name he wrought, had not been forgotten in the city of Naaman.

It is singular that the narrative of Naaman's cure is not found in the present text of Josephus. Its absence makes the reference to him as the slayer of Ahab, already mentioned, still more remarkable.

It is quoted by our Lord (Luke iv. 27) as an instance of mercy exercised to one who was not of Israel, and it should not escape notice that the reference to this act of healing is recorded by one of the Evangelists but St. Luke the physician. [G.]

NA'AMAN (נַעֲמָן: Νοεμάν). One of the family of Benjamin who came down to Egypt with Jacob, as we read in Gen. xlvi. 21. According to the LXX. version of that passage he was the son of Bela, which is the parentage assigned to him in Num. xxvi. 40, where, in the enumeration of the sons of Benjamin, he is said to be the son of Bela, and head of the family of the Naamites. He is also reckoned among the sons of Bela in 1 Chr. viii. 3, 4. Nothing is known of his personal history, or of that of the Naamites. For the account of the migrations, apparently compulsory, of some of the sons of Benjamin from Geba to Manahath, in 1 Chr. viii. 6, 7, is so confused, probably from the corruption of the text, that it is impossible to say whether the family of Naaman was or was not included in it. The repetition in ver. 7 of the three names Naaman, Ahiah, Gera, in a context to which they do not seem to belong, looks like the mere error of a copyist, inadvertently copying over again the same names which he had written in the same order in ver. 4, 5,—Naaman, Ahoah, Gera. If, however, the names are in their place in ver. 7, it would seem to indicate that the family of Naaman did not

[a] LXX. εὐστοχως, i. e. "with good aim," possibly a transcriber's variation from εὐτυχώς.

[b] It did bring a king into strict seclusion (2 Chr. xxvi. 21).

[c] The A. V. of ver. 4 conveys a wrong impression. It is accurately not "one went in," but "he (i. e. Naaman) went in and told his master" (i. e. the king). The word rendered "lord" is the same as is rendered "master" in ver. 1.

[d] The LXX. (Vat. MSS) omits even the words "of earth," ver. 17

grate with the sons of Ehud (called *Abihud* in ver. 3) from Geba to Manahath. [A. C. H.]

NAAM'ATHITE (הַנַּעֲמָתִי: *Μιναίων βασιλεύς*, ὁ *Μιναῖος*: *Naamathites*), the gentilic name of one of Job's friends, Zophar the Naamathite (Job ii. 11, xi. 1, xx. 1, xlii. 9). There is no other trace of this name in the Bible, and the town, נַעֲמָה, whence it is derived, is unknown. If we may judge from modern usage, several places so called probably existed on the Arabian borders of Syria. Thus in the Geographical Dictionary, *Marásia-el Ittdlia*, are Noam, a castle in the Yemen, and a place on the Euphrates; Niameh a place belonging to the Arabs; and Noamee, a valley in Tihameh. The name Naamán (of unlikely derivation however) is very common. Bochart (*Phaleg*, cap. xxii.), as might be expected, seizes the LXX. reading, and in the "king of the Minaei" sees a confirmation to his theory respecting a Syrian, or northern Arabian settlement of that well-known people of classical antiquity. It will be seen, in art. DIKLA, that the present writer identifies the Minaei with the people of Ma'een, in the Yemen; and there is nothing improbable in a northern colony of the tribe, besides the presence of a place so named in the Syro-Arabian desert. But we regard this point as apart from the subject of this article, thinking the LXX. reading, unsupported as it is, to be too hypothetical for acceptance. [E. S. P.]

NA'AMITES, THE (הַנַּעֲמִי: Samar. הנעמני: *Ἀημὰν ὁ Νοεμανεί*; Alex. omits: *familia Naamitarum*, and *Noemanitarum*), the family descended from NAAMAN, the grandson of Benjamin (Num. xxvi. 40 only). [NAAMAN, p. 452*b*.] The name is a contraction, of a kind which does not often occur in Hebrew. Accordingly the Samaritan Codex, as will be seen above, presents it at length—"the Naamanites." [G.]

NA'ARAH (נַעֲרָה: *Θοαδᾶ*; Alex. *Νοορα*: *Naara*) the second wife of Ashur, a descendant of Judah (1 Chr. iv. 5, 6). Nothing is known of the persons (or places) recorded as the children of Naarah. In the Vat. LXX. the children of the two wives are interchanged.

NAARA'I (נַעֲרַי: *Ναιραΐ*: *Naarai*). One of the valiant men of David's armies (1 Chr. xi. 37). In 1 Chr. he is called the son of Ezbai, but in 2 Sam. xxiii. 35 he appears as "Paarai the Arbite." Kennicott (*Diss.* pp. 209-211) decides that the former is correct.

NA'ARAN (נַעֲרָן: *Νααρὰν*; Alex. *Νααραν*: *Noran*), a city of Ephraim, which in a very ancient record (1 Chr. vii. 28) is mentioned as the eastern limit of the tribe. It is very probably identical with NAARATH, or more accurately Naarah, which seems to have been situated in one of the great valleys or torrent-beds which lead down from the highlands of Bethel to the depths of the Jordan valley.

In 1 Sam. vi. 21 the Peshito-Syriac and Arabic versions have respectively Naarin and Naaran for the Kirjath-jearim of the Hebrew and A. V. If this is anything more than an error, the Naaran to which it refers can hardly be that above spoken of, but must have been situated much nearer to Beth-shemesh and the Philistine lowland. [G.]

* Perhaps treating נַעֲרָה, "a damsel," as equivalent to בַּת, "a daughter," the term commonly used to express the hamlets dependent on a city.

NA'ARATH (the Heb. is נַעֲרָתָה = to Naarah, נַעֲרָה, which is therefore the real form of the name: *αἱ* [a] *κῶμαι αὐτῶν*; Alex. *Νααραθα καὶ αἱ κωμαι αὐτων*: *Naratha*), a place named (Josh. xvi. 7, only) as one of the landmarks on the (southern) boundary of Ephraim. It appears to have lain between Ataroth and Jericho. If Ataroth be the present *Atara*, a mile and a half south of *el-Bireh* and close to the great natural boundary of the *Wady Suweinit*, then Naarah was probably somewhere lower down the wady. Eusebius and Jerome (*Onomast.*) speak of it as if well known to them—"Naorath,[b] a small village of the Jews five miles from Jericho." Schwarz (147) fixes it at "Neama," also "five miles from Jericho," meaning perhaps *Na'imeh*, the name of the lower part of the great *Wady Mutyah* or *el-Asas*, which runs from the foot of the hill of *Rimmon* into the Jordan valley above Jericho, and in a direction generally parallel to the *Wady Suweinit* (Rob. *B. R.* iii. 290). A position in this direction is in agreement with 1 Chr. vii. 28, where NAARAN is probably the same name as that we are now considering. [G.]

NAASH'ON. [NAHSHON.]

NAASS'ON (*Ναασσών*: *Naasson*). The Greek form of the name NAHSHON (Matt. i. 4; Luke iii. 32 only).

NA'ATHUS (*Νάαθος*: *Naathus*). One of the family of Addi, according to the list of 1 Esdr. ix. 31. There is no name corresponding in Ezr. x. 30.

NA'BAL (נָבָל = "fool": *Ναβάλ*), one of the characters introduced to us in David's wanderings, apparently to give one detailed glimpse of his whole state of life at that time (1 Sam. xxv.). Nabal himself is remarkable as one of the few examples given to us of the private life of a Jewish citizen. He ranks in this respect with BOAZ, BARZILLAI, NABOTH. He was a sheepmaster on the confines of Judaea and the desert, in that part of the country which bore from its great conqueror the name of CALEB (1 Sam. xxx. 14, xxv. 3; so Vulgate, A. V., and Ewald). He was himself, according to Josephus (*Ant.* vi. 13, §6) a Ziphite, and his residence Emmaus, a place of that name not otherwise known, on the southern Carmel, in the pasture lands of Maon. (In the LXX. of xxv. 4 he is called "the Carmelite," and the LXX. read "Maon" for "Paran" in xxv. 1). With a usage of the word, which reminds us of the like adaptation of similar words in modern times, he, like Barzillai, is styled "very great," evidently from his wealth. His wealth, as might be expected from his abode, consisted chiefly of sheep and goats, which, as in Palestine at the time of the Christian era (Matt. xxv.), and at the present day (Stanley, *S. & P.*), fed together. The tradition preserved in this case the exact number of each—3000 of the former, 1000 of the latter. It was the custom of the shepherds to drive them into the wild downs on the slopes of Carmel; and it was whilst they were on one of these pastoral excursions, that they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night, and never themselves committing any depredations (xxv. 7, 15, 16). Once a year there was a grand banquet,

[b] The Ὠράθ in the present text of Eusebius should obviously have prefixed to it the ν from the ἐστιν which precedes it. Compare NABOTH.

on Carmel, when they brought back their sheep from the wilderness for shearing—with eating and drinking "like the feast of a king" (xxv. 2, 4, 36).

It was on one of these occasions that Nabal came across the path of the man to whom he owes his place in history. Ten youths were seen approaching the hill; in them the shepherds recognized the slaves or attendants of the chief of the freebooters who had defended them in the wilderness. To Nabal they were unknown. They approached him with a triple salutation—enumerated the services of their master. and ended by claiming, with a mixture of courtesy and defiance, characteristic of the East, "whatsoever cometh into thy hand for thy servants (LXX. omit this—and have only the next words), and for *thy son* David." The great sheepmaster was not disposed to recognise this unexpected parental relation. He was a man notorious for his obstinacy (such seems the meaning of the word translated "churlish") and for his general low conduct (xxv. 3, "evil in his doings;" xxv. 17, "a man of Belial"). Josephus and the LXX. taking the word *Caleb* not as a proper name, but as a quality (to which the context certainly lends itself)—add "of a disposition like a dog"—cynical—*κυνικὸς*. On hearing the demand of the ten petitioners, he sprang up (LXX. *ἀνεπήδησε*), and broke out into fury, "Who is David? and who is the son of Jesse?"—"What runaway slaves are these to interfere with my own domestic arrangements?" (xxv. 10, 11). The moment that the messengers were gone, the shepherds that stood by perceived the danger that their master and themselves would incur. To Nabal himself, they durst not speak (xxv. 17). But the sacred writer, with a tinge of the sentiment which such a contrast always suggests, proceeds to describe that this brutal ruffian was married to a wife as beautiful and as wise, as he was the reverse (xxv. 3). [ABIGAIL.] To her, as to the good angel of the household, one of the shepherds told the state of affairs. She, with the offerings usual on such occasions (xxv. 18, comp. xxx. 11, 2 Sam. xvi. 1, 1 Chr. xii. 40), loaded the asses of Nabal's large establishment—herself mounted one of them, and, with her attendants running before her, rode down the hill towards David's encampment. David had already made the fatal vow of extermination, couched in the usual terms of destroying the household of Nabal, so as not even to leave a dog behind (xxv. 22). At this moment, as it would seem, Abigail appeared, threw herself on her face before him, and poured forth her petition in language which both in form and expression almost assumes the tone of poetry:—"Let thine handmaid, I pray thee, speak in thine audience, and hear the words of thine handmaid." Her main argument rests on the description of her husband's character, which she draws with that mixture of playfulness and seriousness which above all things turns away wrath. His name here came in to his rescue. "As his name is, so is he: Nabal [*fool*] is his name, and folly is with him" (xxv. 25; see also ver. 26). She returns with the news of David's recantation of his vow. Nabal is then in at the height of his orgies. Like the revellers of Palestine in the later times of the monarchy, he had drunk to excess, and his wife dared not communicate to him either his danger or his escape (xxv. 36). At break of day she told him both. The stupid reveller was suddenly roused to a sense of that which impended over him. "His heart died within him, and *he* became as a stone." It was as if a stroke of apoplexy or paralysis had fallen upon him. Ten days he lingered, "and the Lord smote Nabal, and he died" (xxv. 37, 38). The suspicions entertained by theologians of the last century, that there was a conspiracy between David and Abigail to make away with Nabal for their own alliance (see Winer "Nabal"), have entirely given place to the better spirit of modern criticism, and it is one of the many proofs of the reverential, as well as truthful appreciation of the Sacred Narrative now inaugurated in Germany, that Ewald enters fully into the feeling of the narrator, and closes his summary of Nabal's death, with the reflection that "it was not without justice regarded as a Divine judgment." According to the (not improbable) LXX. version of 2 Sam. iii. 33, the recollection of Nabal's death lived afterwards in David's memory to point the contrast of the death of Abner: "Died Abner as Nabal died?" [A. P. S.]

NABARI'AS (*Ναβαρίας*: *Nabarias*). Apparently a corruption of Zechariah (1 Esdr. x. 44; comp. Neh. viii. 4).

NA'BATHITES, THE (*οἱ Ναβαταῖοι*, and *Ναβαταῖοι*; Alex. *Ναβαιτοι*: *Nabathæi*), 1 Macc. v. 25; ix. 35. [NEBAIOTH.]

NA'BOTH (נָבוֹת: *Ναβουθαί*), victim of Ahab and Jezebel. He was a Jezreelite, and the owner of a small portion of ground (2 K. ix. 25, 26) that lay on the eastern slope of the hill of Jezreel. He had also a vineyard, of which the situation is not quite certain. According to the Hebrew text (1 K. xxi. 1) it was in Jezreel, but the LXX. render the whole clause differently, omitting the words "which was in Jezreel," and reading instead of "the palace," "the *threshing-floor* of Ahab king of Samaria." This points to the view, certainly most consistent with the subsequent narrative, that Naboth's vineyard was on the hill of Samaria, close to the "threshing-floor" (the word translated in A. V. "void place") which undoubtedly existed there, hard by the gate of the city (1 K. xxiv.). The royal palace of Ahab was close upon the city wall at Jezreel. According to both texts it immediately adjoined the vineyard (1 K. xxi. 1, 2, Heb.; 1 K. xxi. 2, LXX.; 2 K. ix. 30, 36), and it thus became an object of desire to the king, who offered an equivalent in money, or another vineyard in exchange for this. Naboth, in the independent spirit of a Jewish landholder,[a] refused. Perhaps the turn of his expression implies that his objection was mingled with a religious scruple at forwarding the acquisitions of a basis heathen king: "Jehovah forbid it to me that I should give the inheritance of my fathers unto thee." Ahab was cowed by this reply, but the proud spirit of Jezebel was roused. She and her husband were apparently in the city of Samaria (1 K. xxi. 18). She took the matter into her own hands, and sent a warrant in Ahab's name and sealed with Ahab's seal, to the elders and nobles of Jezreel, suggesting the mode of destroying the man who had insulted the royal power. A solemn fast was proclaimed as on the announcement of some great calamity. Naboth was "set on high"[b] in the public place of Samaria: two

[a] Compare the cases of David and Araunah (2 Sam. xxi.), Omri and Shemer (1 K. xvi.).

[b] The Hebrew word which is rendered, here only, "on high," is more accurately "at the head of" or

men of worthless character accused him of having "cursed" God and the king." He and his children (2 K. ix. 26), who else might have succeeded to his father's inheritance, were dragged out of the city and despatched the same night.[d] The place of execution there, as at Hebron (2 Sam. iii.), was by the large tank or reservoir, which still remains on the slope of the hill of Samaria, immediately outside the walls. The usual punishment for blasphemy was enforced. Naboth and his sons were stoned; their mangled remains were devoured by the dogs (and swine, LXX.) that prowled under the walls; and the blood from their wounds ran down into the waters of the tank below, which was the common bathing-place of the prostitutes of the city (comp. 1 K. xxi. 19, xxii. 38, LXX). Josephus (*Ant.* 15, 6) makes the execution to have been at Jezreel, where he also places the washing of Ahab's chariot.

For the signal retribution taken on this judicial murder—a remarkable proof of the high regard paid in the old dispensation to the claims of justice and independence—see AHAB, JEHU, JEZEBEL, JEZREEL. [A. P. S.]

NABUCHODONO'SOR (Ναβουχοδονόσορ; *Nabuchodonosor*). Nebuchadnezzar king of Babylon (1 Esdr. i. 40, 41, 45, 48; Tob. xiv. 15; Jud. i. 1, 5, 7, 11, 12, ii. 1, 4, 19, iii. 2, 8, iv. 1, vi. 2, 4, xi. 7, 23, xii. 13, xiii. 18).

NA'CHON'S THRESHING-FLOOR (נָכוֹן: ἅλως Ἀδάδ; Alex. αλωνος Ναχων: *Area Nachon*), the place at which the ark had arrived in its progress from Kirjath-jearim to Jerusalem, when Uzzah lost his life in his too hasty zeal for its safety (2 Sam. vi. 6). In the parallel narrative of Chronicles the name is given as CHIDON, which is also found in Josephus. After the catastrophe it received the name of Peres-uzzah. There is nothing in the Bible narrative to guide us to a conclusion as to the situation of this threshing-floor,—whether nearer to Jerusalem or to Kirjath-jearim. The words of Josephus (*Ant.* vii. 4, §2), however, imply that it was close to the former.[a] Neither is it certain whether the name is that of the place or of a person to whom the place belonged. The careful Aquila translates the words ἅλως ἕλλινος ἑτοίμης—"to the prepared[b] threshing-floor," which is also the rendering of the Targum Jonathan. [G.]

NA'CHOR. The form (slightly the more accurate) in which on two occasions the name elsewhere given as NAHOR is presented in the A. V.

1. (נָחוֹר: Ναχώρ: *Nachor*). The brother of Abraham (Josh. xxiv. 2). [NAHOR 1.]

Ch is commonly used in the A. V. of the Old Testament to represent the Hebrew כ, and only very rarely for ח, as in Nachor. Charashim, Rachel, Marcheshvan, are further examples of the latter usage.

2. (Ναχώρ). The grandfather of Abraham (Luke iii. 34). [NAHOR 2.] [G.]

NA'DAB (נָדָב). 1. The eldest son of Aaron and Elisheba, Ex. vi. 23; Num. iii. 2. He, his father and brother, and seventy old men of Israel were led out from the midst of the assembled people (Ex. xxiv. 1), and were commanded to stay and worship God "afar off," below the lofty summit of Sinai, where Moses alone was to come near to the Lord. Subsequently (Lev. x. 1) Nadab and his brother [ABIHU] were struck dead before the sanctuary by fire from the Lord. Their offence was kindling the incense in their censers with "strange" fire, *i. e.*, not taken from that which burned perpetually (Lev. vi. 13) on the altar. From the injunction given, Lev. x. 9, 10, immediately after their death, it has been inferred (Rosenmüller, *in loco*) that the brothers were in a state of intoxication when they committed the offence. The spiritual meaning of the injunction is drawn out at great length by Origen, *Hom.* vii. *in Levitic.* On this occasion, as if to mark more decidedly the divine displeasure with the offenders, Aaron and his surviving son were forbidden to go through the ordinary outward ceremonial of mourning for the dead.

2. King Jeroboam's son, who succeeded to the throne of Israel B.C. 954, and reigned two years, 1 K. xv. 25-31. Gibbethon in the territory of Dan (Josh. xix. 44), a Levitical town (Josh. xxi. 23), was at that time occupied by the Philistines, perhaps having been deserted by its lawful possessors in the general self-exile of the Levites from the polluted territory of Jeroboam. Nadab and all Israel went up and laid siege to this frontier-town. A conspiracy broke out in the midst of the army, and the king was slain by Baasha, a man of Issachar. Ahijah's prophecy (1 K. xiv. 10) was literally fulfilled by the murderer, who proceeded to destroy the whole house of Jeroboam. So perished the first Israelitish dynasty.

We are not told what events led to the siege of Gibbethon, or how it ended, or any other incident in Nadab's short reign. It does not appear what ground Ewald and Newman have for describing the war with the Philistines as unsuccessful. It is remarkable that when a similar destruction fell upon the family of the murderer Baasha twenty-four years afterwards, the Israelitish army was again engaged in a siege of Gibbethon, 1 K. xvi. 15.

3. A son of Shammai, 1 Chr. ii. 28, of the tribe of Judah.

4. A son of Gibeon, 1 Chr. viii. 30, ix. 36, of the tribe of Benjamin. [W. T. B.]

"in the chiefest place among" (1 Sam. ix. 22). The passage is obscured by our ignorance of the nature of the ceremonial in which Naboth was made to take part; but, in default of this knowledge, we may accept the explanation of Josephus, that an assembly (ἐκκλησία) was convened, at the head of which Naboth, in virtue of his position, was placed, in order that the charge of blasphemy and the subsequent catastrophe might be more telling.

[c] By the LXX. this is given εὐλόγησον, "blessed;" possibly merely for the sake of euphemism.

[d] מִתְּמוֹל. The word rendered "yesterday" in 2 K. ix. 26 has really the meaning of *yesternight*, and thus bears testimony to the precipitate haste both of the execution and of Ahab's entrance on his new acquisition. [See ELIJAH, vol. i. 529a.]

[a] His words are, "Having brought the ark *into Jerusalem*" (εἰς Ἱεροσολυμα). In some of the Greek versions or variations of the LXX., of which fragments are preserved by Barhdt, the name is given ἡ ἅλως Ἐφρὰ (Ornan) τοῦ Ἰεβουσαίου, identifying it with the floor of Araunah.

[b] As if from נָכַן, to make ready. A similar rendering, אֲתַר מְתַקַּן, is employed in the Targum Joseph of 1 Chr. xiii. 9 for the floor of Chidon

NADAB'ATHA (Ναβάθ; Alex. Ναβαβάθ: Syriac, ܢܒܘ, Nobot: *Madaba*), a place from which the bride was being conducted by the children of Jambri, when Jonathan and Simon attacked them (1 Macc. ix. 37). Josephus (*Ant.* xiii. 1, §4) gives the name Γαβαθά. Jerome's conjecture (in the Vulgate) can hardly be admitted, because Medeba was the city of the Jambrites (see ver. 36) to which the bride was being brought, not that from which she came. That Nadabatha was on the east of Jordan is most probable; for though, even to the time of the Gospel narrative, by "Chanaanites"—to which the bride in this case belonged—is signified Phoenicians, yet we have the authority (such as it is) of the Book of Judith (v. 3) for attaching that name especially to the people of Moab and Ammon; and it is not probable that when the whole country was in such disorder a wedding *cortége* would travel for so great a distance as from Phoenicia to Medeba.

On the east of Jordan the only two names that occur as possible are Nebo—by Eusebius and Jerome written Nabo and Nabau—and Nabathaea. Compare the lists of places round *es-Salt*, in Robinson, 1st ed. iii. 167-70. [G.]

NAG'GE (Ναγγαί, or, as some MSS. read, Ναγγαΐ), one of the ancestors of Christ (Luke iii. 25). It represents the Heb. נֹגַהּ, *Nogah* (Ναγαί, LXX.), which was the name of one of David's sons, as we read in 1 Chr. iii. 7. Nagge must have lived about the time of Onias I. and the commencement of the Macedonian dynasty. It is interesting to notice the evidence afforded by this name both as a name in the family of David, and from its meaning, that, amidst the revolutions and conquests which overthrew the kingdoms of the nations, the house of David still cherished the hope, founded upon promise, of the revival of the splendour (*nogah*) of their kingdom. [A. C. H.]

NAH'ALAL (נַהֲלָל: Ναελάλ; Alex. Ναελώλ: *Nalal*), one of the cities of Zebulun, given with its "suburbs" to the Merarite Levites (Josh. xxi. 35). It is the same which in the list of the allotment of Zebulun (Josh. xix. 15) is inaccurately given in the A. V. as NAHALLAL, the Hebrew being in both cases identical. Elsewhere it is called NAHALOL. It occurs in the list between Kattath and Shimron, but unfortunately neither of these places has yet been recognised. The Jerusalem Talmud, however (*Megillah*, ch. i.; *Maaser Sheni*, ch. v.), as quoted by Schwarz (172), and Reland (*Pal.* 717) asserts that Nahalal (or Mahalal, as it is in some copies) was in post-biblical times called Mahlul; and this Schwarz identifies with the modern *Malul*, a village in the plain of Esdraelon under the mountains which enclose the plain on the north, 4 miles west of Nazareth, and 2 of Japhia; an identification concurred in by Van de Velde (*Memoir*). One Hebrew MS. (30 K.) lends countenance to it by reading מוהלל, *i.e.* Mahalal, in Josh. xxi. 35. If the town was in the great plain we can understand why the Israelites were unable to drive out the Canaanites from it, since their chariots must have been extremely formidable as long as they remained on level or smooth ground.

NAH'ALLAL (נַהֲלַל: Ναβαλά; Alex. Ναελώλ: *Nealal*), an inaccurate mode of spelling, in Josh. xix. 15, the name which in Josh. xxi. 35, is accurately given as NAHALAL. The original is precisely the same in both. [G.]

NAHA'LIEL (נַחֲלִיאֵל = "torrent of God;" Samar. נחלאל: Μαναήλ; Alex. Ναελιήλ: *Nahaliel*), one of the halting-places of Israel in the latter part of their progress to Canaan (Num. xxi. 19). It say "beyond," that is, north of the Arnon (ver. 13), and between Mattanah and Bamoth, the next after Bamoth being Pisgah. It does not occur in the catalogue of Num. xxxiii., nor anywhere besides the passage quoted above. By Eusebius and Jerome (*Onomast.* "Naaliel") it is mentioned as close to the Arnon. Its name seems to imply that it was a stream or wady, and it is not impossibly preserved in that of the *Wady Encheyle*, which runs into the *Mojeb*, the ancient Arnon, a short distance to the east of the place at which the road between Rabba and Aroer crosses the ravine of the latter river. The name *Encheyle*, when written in Hebrew letters (אנחיילה), is little more than נחליאל transposed. Burckhardt was perhaps the first to report this name, but he suggests the *Wady Wale* as the Nahaliel (*Syria*, July 14). This, however, seems unnecessarily far to the north, and, in addition, it retains no likeness to the original name. [G.]

NAH'ALOL (נַהֲלֹל: Δεμωνά; Alex. Ενεμμαν: *Naalol*), a variation in the mode of giving the name (both in Hebrew and A.V.) of the place elsewhere called Nahalal. It occurs only in Judg. i. 30. The variation of the LXX. is remarkable. [G.]

NA'HAM (נַחַם: Ναχαάμ: *Naham*). The brother of Hodiah, or Jehudijah, wife of Ezra, and father of Keilah and Eshtemoa (1 Chr. iv. 19).

NAHAMA'NI (נְחֲמָנִי: Ναεμανί; FA. Νααμανεί: *Nahamani*). A chief man among those who returned from Babylon with Zerubbabel and Jeshua (Neh. vii. 7). His name is omitted in Ezr. ii. 2, and in the parallel list of 1 Esdr. v. 8, is written ENENIUS.

NAHARA'I (נַחְרַי: Ναχάρ; Alex. Νααραί: *Naarai*). The armourbearer of Joab, called in the A. V. of 2 Sam. xxiii. 37, NAHARI. He was a native of Beeroth (1 Chr. xi. 39).

NA'HARI (נַחֲרַי: Γελαρέ; Alex. Γελαρεί: *Naharai*). The same as NAHARAI, Joab's armour-bearer (2 Sam. xxiii. 37). In the A. V. of 1611 the name is printed "NAHARAI the Berothite."

NA'HASH (נָחָשׁ, "serpent"). 1. (Νάας, but in Chr. Ἄναας; Alex. in both Νααs: *Naas*) "Nahash the Ammonite," king of the Bene-Ammon at the foundation of the monarchy in Israel, who dictated to the inhabitants of Jabesh-Gilead that cruel alternative of the loss of their right eyes or slavery, which roused the swift wrath of Saul, and caused the destruction of the whole of the Ammonite force (1 Sam. xi. 1, 2-11). According to Josephus (*Ant.* vi. 5, §1) the siege of Jabesh was but the climax of a long career of similar[a] ferocity with

[a] The statement in 1 Sam. xii. 12 appears to be at variance with that of vv. 4, 5; but it bears a remarkable testimony to the dread entertained of this savage chief, in ascribing the adoption of monarchy by Israel to the panic caused by his approach.

which Nahash had oppressed the whole of the Hebrews on the east of Jordan, and his success in which had rendered him so self-confident that he despised the chance of relief which the men of Jabesh eagerly caught at. If, as Josephus (*Ib.* §3) also states, Nahash himself was killed in the rout of his army, then the Nahash who was the father of the foolish young king Hanun (2 Sam. x. 2; 1 Chr. xix. 1, 2) must have been his son. In this case, like Pharaoh in Egypt, and also perhaps like Benhadad, Achish, and Agag, in the kingdoms of Syria, Philistia, and Amalek, "Nahash" would seem to have been the title of the king of the Ammonites than the name of an individual.

However this was, Nahash the father of Hanun had rendered David some special and valuable service, which David was anxious for an opportunity of requiting (2 Sam. x. 2). No doubt this had been during his wanderings, and when, as the victim of Saul, the Ammonite king would naturally sympathise with and assist him. The particulars of the service are not related in the Bible, but the Jewish traditions affirm that it consisted in his having afforded protection to one of David's brothers, who escaped alone when his family were massacred by the treacherous king of Moab, to whose care they had been entrusted by David (1 Sam. xxii. 3, 4), and who found an asylum with Nahash. (See the *Midrash* of R. Tanchum, as quoted by S. Jarchi on 2 Sam. x. 2.)

The retribution exacted by David for the annoying insults of Hanun is related elsewhere. [DAVID, vol. i. 410*b*; JOAB, vol. i. 1082*b*; URIAH.] One casual notice remains which seems to imply that the ancient kindness which had existed between David and the family of Nahash had not been extinguished even by the horrors of the Ammonite war. When David was driven to Mahanaim, into the very neighbourhood of Jabesh-Gilead, we find "Shobi the son of Nahash of Rabbah of the Bene-Ammon" (2 Sam. xvii. 27) among the great chiefs who were so forward to pour at the feet of the fallen monarch the abundance of their pastoral wealth, and that not with the grudging spirit of tributaries, but rather with the sympathy of friends, "for they said, the people is hungry and weary and thirsty in the wilderness" (ver. 29).

2. (**Ναάς**). A person mentioned once only (2 Sam. xvii. 25) in stating the parentage of Amasa, the commander-in-chief of Absalom's army. Amasa is there said to have been the son[b] of a certain Ithra, by Abigail, "daughter of Nahash, and sister[c] to Zeruiah." By the genealogy of 1 Chr. ii. 16 it appears that Zeruiah and Abigail were sisters of David and the other children of Jesse. The question then arises, How could Abigail have been at the same time daughter of Nahash and sister to the children of Jesse? To this three answers may be given:—

1. The universal tradition of the Rabbis that Nahash and Jesse were identical.[a] "Nahash," says Shemaiah Jarchi (in his commentary on 2 Sam. xvii. 25), "was Jesse the father of David, because he died without sin, by the counsel of the serpent" (נחש); *i. e.* by the infirmity of his fallen human nature only. It must be owned that it is easier to allow the identity of the two than to accept the reason thus assigned for it.

2. The explanation first put forth by Professor Stanley in this work (vol. i. 401*b*), that Nahash was the king of the Ammonites, and that the same woman had first been his wife or concubine—in which capacity she had given birth to Abigail and Zeruiah—and afterwards wife to Jesse, and the mother of his children. In this manner Abigail and Zeruiah would be sisters to David, without being at the same time daughters of Jesse. This has in its favour the guarded statement of 1 Chr. ii. 16, that the two women were not themselves Jesse's children, but sisters of his children; and the improbability (otherwise extreme) of so close a connexion between an Israelite and an Ammonite king is alleviated by Jesse's known descent from a Moabitess, and by the connexion which has been shown above to have existed between David and Nahash of Ammon.

3. A third possible explanation is that Nahash was the name not of Jesse, nor of a former husband of his wife, but of his wife herself. There is nothing in the name to prevent its being borne equally by either sex, and other instances may be quoted of women who are given in the genealogies as the daughters, not of their fathers, but of their mothers: *e. g.* Mehetabel, daughter of Matred, daughter of Mezahab. Still it seems very improbable that Jesse's wife would be suddenly intruded into the narrative, as she is if this hypothesis be adopted. [G.]

NA'HATH (נַחַת: **Ναχάθ**; Alex. **Ναχάμ**, Gen. xxxvi. 13; **Ναχώθ**; Alex. **Ναχόθ**, Gen. xxxvi. 17; **Ναχές**, 1 Chr. i. 37; *Nahath*). 1. One of the "dukes" or phylarchs in the land of Edom, eldest son of Reuel the son of Esau.

2. (**Καναάθ**; Alex. **Κνάθ**). A Kohathite Levite, son of Zophai and ancestor of Samuel the prophet (1 Chr. vi. 26).

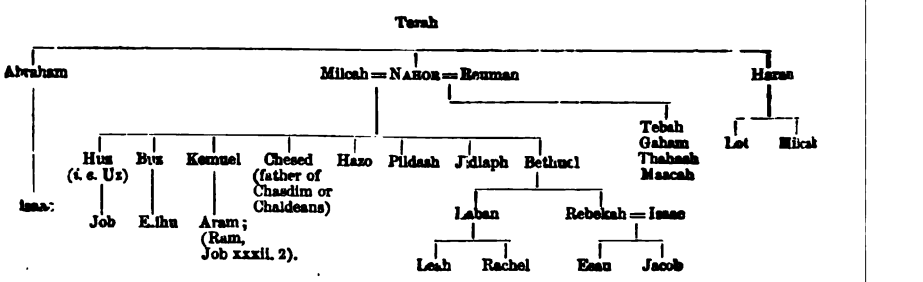
3. (**Ναάθ**). A Levite in the reign of Hezekiah, who with others was overseer of the tithes and dedicated things under Cononiah and Shimei (2 Chr. xxxi. 13).

NAH'BI (נַחְבִי: **Ναβί**; Alex. **Ναβά**: *Nahabi*). The son of Vophsi, a Naphtalite, and one of the twelve spies (Num. xiii. 14).

NA'HOR (נָחוֹר: **Ναχώρ**; Joseph. **Ναχώρης**: *Nuhor*, and *Nachor*), the name of two persons in the family of Abraham.

1. His grandfather: the son of Serug and father of Terah (Gen. xi. 22-25). He is mentioned in the genealogy of our Lord, Luke iii. 34, though there the name is given in the A. V. in the Greek form of NACHOR.

2. Grandson of the preceding, son of Terah and brother of Abraham and Haran (Gen. xi. 26, 27). The members of the family are brought together in the following genealogy. (See the next page.)



It has been already remarked, under LOT (p. 143 *note*), that the order of the ages of the family of

[a] The whole expression seems to denote that he was an illegitimate son.

[b] The Alex. LXX. regards Nahash as *brother* of Zeruiah — ἀγνοήσας Ναασ ἀδελφὸν Σαρουιας.

[c] See the extract from the Targum on Ruth iv 22, given in the note to Jasar, vol. i. p. 1038*a*. Also the citations from the Talmud in Meyer, *Seder Olam*, 569; also Jerome, *Quaest. hebr.* ad loc.

[a] This is the form given in the Benedictine Edition of Jerome's *Bibliotheca Divina*. The other is found in the ordinary copies of the Vulgate.

Terah is not improbably inverted in the narrative; in which case Nahor, instead of being younger than Abraham, was really older. He married Milcah, the daughter of his brother Haran; and when Abraham and Lot migrated to Canaan, Nahor remained behind in the land of his birth, on the eastern side of the Euphrates—the boundary between the Old and the New World of that early age—and gathered his family around him at the sepulchre of his father.[b] (Comp. 2 Sam. xix. 37).

Like Jacob, and also like Ishmael, Nahor was the father of twelve sons, and further, as in the case of Jacob, eight of them were the children of his wife, and four of a concubine (Gen. xxii. 21-24). Special care is taken in speaking of the legitimate branch to specify its descent from Milcah—"the son of Milcah, which she bare unto Nahor." It was to this pure and unsullied race that Abraham and Rebekah in turn had recourse for wives for their sons. But with Jacob's flight from Haran the intercourse ceased. The heap of stones which he and "Laban the Syrian" erected on Mount Gilead (Gen. xxxi. 46) may be said to have formed at once the tomb of their past connexion and the barrier against its continuance. Even at that time a wide variation had taken place in their language (ver. 47), and not only in their language, but, as it would seem, in the Object of their worship. The "God of Nahor" appears as a distinct divinity from the "God of Abraham and the Fear of Isaac" (ver. 53). Doubtless this was one of the "other gods" which before the Call of Abraham were worshipped by the family of Terah; whose images were in Rachel's possession during the conference on Gilead; and which had to be discarded before Jacob could go into the Presence of the "God of Bethel" (Gen. xxxv. 2; comp. xxxi. 13). Henceforward the line of distinction between the two families is most sharply drawn (as in the allusion of Josh. xxiv. 2), and the descendants of Nahor confine their communications to their own immediate kindred, or to the members of other non-Israelite tribes, as in the case of Job the man of Uz, and his friends, Elihu the Buzite of the kindred of Ram, Eliphaz the Temanite, and Bildad the Shuhite. Many centuries later David appears to have come into collision—sometimes friendly, sometimes the reverse—with one or two of the more remote Nahorite tribes. Tibhath, probably identical with Tebah and Maacah, are mentioned in the relation of his wars on the eastern frontier of Israel (1 Chr. xviii. 8, xix. 6); and the mother of Absalom either belonged to or was connected with the latter of the the above nations.

No certain traces of the name of Nahor have been recognised in Mesopotamia. Ewald (*Geschichte*, i. 359) proposes *Haditha*, a town on the Euphrates just above *Hit*, and bearing the additional name of *el-Naura*; also another place, likewise called *el-Na'ura*, mentioned by some Arabian geographers as lying further north; and *Nachrein*, which, however, seems to lie out of Mesopotamia to the east. Others have mentioned Naarda, or Neharden, a town or district in the neighbourhood of the above, celebrated as the site of a college of the Jews (*Dict. of Geogr.* "Naarda").

May not Aram-Naharaim have originally derived its name from Nahor? The fact that in its present form it has another signification in Hebrew is no argument against such a derivation.

In Josh. xxiv. 2 the name is given in the A. V. in the form (more nearly approaching the Hebrew than the other) of NACHOR. [G.]

NAH'SHON, or NAASH'ON (נַחְשׁוֹן: Νασσών, LXX. and N. T.: *Nahasson*, O. T.; *Naasson*, N. T.), son of Amminadab, and prince of the children of Judah (as he is styled in the genealogy of Judah, 1 Chr. ii. 10) at the time of the first numbering in the wilderness (Exod. vi. 23; Num. i. 7, &c.). His sister, Elisheba, was wife to Aaron, and his son, Salmon, was husband to Rahab after the taking of Jericho. From Elisheba being described as "sister of Naashon" we may infer that he was a person of considerable note and dignity, which his being appointed as one of the twelve princes who assisted Moses and Aaron in taking the census, and who were all "renowned of the congregation heads of thousands in Israel," shows him to have been. No less conspicuous for high rank and position does he appear in Num. ii. 3, vii. 12, x. 14, where, in the encampment, in the offerings of the princes, and in the order of march, the first place is assigned to Nahshon the son of Amminadab as captain of the host of Judah. Indeed, on these three last-named occasions he appears as the first man in the state next to Moses and Aaron, whereas at the census he comes after the chiefs of the tribes of Reuben and Simeon.[a] Nahshon died in the wilderness according to Num. xxvi. 64, 65, but no further particulars of his life are given. In the

[b] The statements of Gen. xi. 27-32 appear to imply that Nahor did not advance from Ur to Haran at the same time with Terah, Abraham, and Lot, but remained there till a later date. Coupling this with the statement of Judith v. 8, and the universal tradition of the East, that Terah's departure from Ur was a relinquishment of false worship, an additional force is given to the mention of "the god of Nahor" (Gen. xxxi. 53) as distinct from the God of Abraham's descendants. Two generations hence Nahor's family were certainly living at Haran (Gen xxviii. 10, xxix. 4).

[a] It is curious to notice that, in the second numbering (Num. xxvi.), Reuben still comes first, and Judah fourth. So also 1 Chr. ii. 1.

N.T. he occurs twice, viz. in Matt. i. 4 and Luke iii. 32, in the genealogy of Christ, where his lineage in the preceding and following descents are exactly the same as in Ruth iv. 18-20; 1 Chr. ii. 10-12, which makes it quite certain that he was the sixth in descent from Judah, inclusive, and that David was the fifth generation after him. [AMMINADAB.] [A. C. H.]

NA'HUM (נַחוּם: Ναούμ: *Nahum*). "The book of the vision of Nahum the Elkoshite" stands seventh in order among the writings of the minor prophets in the present arrangement of the canon. Of the author himself we have no more knowledge than is afforded us by the scanty title of his book, which gives no indication whatever of his date, and leaves his origin obscure. The site of Elkosh, his native place, is disputed, some placing it in Galilee, with Jerome, who was shewn the ruins by his guide; others in Assyria, where the tomb of the prophet is still visited as a sacred spot by Jews from all parts. Benjamin of Tudela (p. 53, Heb. text, ed. Asher) thus briefly alludes to it:—"And in the city of Asshur (Mosul) is the synagogue of Obadiah, and the synagogue of Jonah the son of Amittai, and the synagogue of Nahum the Elkoshite." [ELKOSH.] Those who maintain the latter view assume that the prophet's parents were carried into captivity by Tiglath-pileser, and planted, with other exile colonists, in the province of Assyria, the modern Kurdistan, and that the prophet was born at the village of Alkush, on the east bank of the Tigris, two miles north of Mosul. Ewald is of opinion that the prophecy was written there at a time when Nineveh was threatened from without. Against this it may be urged that it does not appear that the exiles were carried into the province of Assyria Proper, but into the newly-conquered districts, such as Mesopotamia, Babylonia, or Media. The arguments in favour of an Assyrian locality for the prophet are supported by the occurrence of what are presumed to be Assyrian words: הֲצַב, ii. 8; מַסְפְּרִיךְ מִנְזָרֶיךָ, iii. 17, and the strange form מְלֵאָבֶה in ii. 14, which is supposed to indicate a foreign influence. In addition to this is the internal evidence supplied by the vivid description of Nineveh, of whose splendours it is contended Nahum must have been an eye-witness; but Hitzig justly observes that these descriptions display merely a lively imagination, and such knowledge of a renowned city as might be possessed by any one in Anterior Asia. The Assyrian warriors were no strangers in Palestine, and that there was sufficient intercourse between the two countries is rendered probable by the history of the prophet Jonah. There is nothing in the prophecy of Nahum to indicate that it was written in the immediate neighbourhood of Nineveh, and in full view of the scenes which are depicted, nor is the language that of an exile in an enemy's country. No allusion is made to the captivity; while, on the other hand, the imagery is such as would be natural to an inhabitant of Palestine (i. 4), to whom the rich pastures of Bashan, the vineyards of Carmel, and the blossom of Lebanon, were emblems of all that was luxuriant and fertile. The language employed in i. 15, ii. 2, is appropriate to one who wrote for his countrymen in their native land.[a] In fact, the sole origin of the theory that Nahum flourished in Assyria is the name of the village Alkush, which contains his supposed tomb, and from its similarity to Elkosh was apparently selected by mediaeval tradition as a shrine for pilgrims, with as little probability to recommend it as exists in the case of Obadiah and Jephthah, whose burial-places are still shown in the same neighbourhood. This supposition is more reasonable than another which has been adopted in order to account for the existence of Nahum's tomb at a place, the name of which so closely resembles that of his native town. Alkush, it is suggested, was founded by the Israelitish exiles, and so named by them in memory of Elkosh in their own country. Tradition, as usual, has usurped the province of history. According to Pseudo-Epiphanius (*De Vitis Proph.* Opp. ii. p. 247), Nahum was of the tribe of Simeon, "from Elcesei beyond the Jordan at Begabar (Βηγαβάρ; Chron. Pasch. 150 B. Βηταβαρή)," or Bethabara, where he died in peace and was buried. In the Roman Martyrology the 1st of December is consecrated to his memory.

The date of Nahum's prophecy can be determined with as little precision as his birthplace. In the Seder Olam Rabba (p. 55, ed. Meyer) he is made contemporary with Joel and Habakkuk in the reign of Manasseh. Syncellus (*Chron.* p. 201 d) places him with Hosea, Amos and Jonah in the reign of Joash king of Israel, more than a century earlier while, according to Eutychius (*Ann.* p. 252), he was contemporary with Haggai, Zechariah, and Malachi, and prophesied in the fifth year after the destruction of Jerusalem. Josephus (*Ant.* ix. 11, §3) mentions him as living in the latter part of the reign of Jotham; "about this time was a certain prophet, Nahum by name; who, prophesying concerning the downfall of Assyrians and of Nineveh, said thus," &c.; to which he adds, "and all that was foretold concerning Nineveh came to pass after 115 years." From this Carpzov concluded that Nahum prophesied in the beginning of the reign of Ahaz, about B.C. 742. Modern writers are divided in their suffrages. Bertholdt thinks it probable that the prophet escaped into Judah when the ten tribes were carried captive, and wrote in the reign of Hezekiah. Keil (*Lehrb. d. Einl. in d. A. T.*) places him in the latter half of Hezekiah's reign, after the invasion of Sennacherib. Vitringa (*Typ. Doctr. proph.* p. 37) was of the like opinion, and the same view is taken by De Wette (*Einl.* p. 328), who suggests that the rebellion of the Medes against the Assyrians (B.C. 710), and the election of their own king in the person of Deïoces, may have been present to the prophet's mind. But the history of Deïoces and his very existence are now generally believed to be mythical. This period also is adopted by Knobel (*Prophet.* ii. 207, &c.) as the date of the prophecy. He was guided to his conclusion by the same supposed facts, and the destruction of No Ammon, or Thebes of Upper Egypt, which he believed was effected by the Assyrian monarch Sargon (B.C. 717-715), and is referred to by Nahum (iii. 8) as a recent event. In this case the prophet would be a younger contemporary of Isaiah (comp. Is. xx. 1). Ewald, again, conceives that the siege of Nineveh by the Median king Phraortes (B.C. 630-625), may have suggested

[a] Capernaum, literally "village of Nahum," is supposed to have derived its name from the prophet. Schwarz (*Descr. of Pal.* p. 188) mentions a *Kefar Tanchum* or *Tanchuma*, close on Chinnereth, and 2½ English miles N. of Tiberias. "They point out there the graves of Nahum the prophet, of Rabbis Tanchum and Tanchuma, who all repose there, and through these the ancient position of the village is easily known."

Nahum's prophecy of its destruction. The existence of Phraortes, at the period to which he is assigned, is now believed to be an anachronism. [MEDES.] Junius and Tremellius select the last years of Josiah as the period at which Nahum prophesied, but at this time not Nineveh but Babylon was the object of alarm to the Hebrews. The arguments by which Strauss (*Nahumi de Nino Vaticinium*, prol. c. 1, §3) endeavours to prove that the prophecy belongs to the time at which Manasseh was in captivity at Babylon, that is between the years 680 and 667 B.C., are not convincing. Assuming that the position which Nahum occupies in the canon between Micah and Habakkuk supplies, as the limits of his prophetical career, the reigns of Hezekiah and Josiah, he endeavours to show from certain apparent resemblances to the writings of the older prophets, Joel, Jonah, and Isaiah, that Nahum must have been familiar with their writings, and consequently later in point of time than any of them. But a careful examination of the passages by which this argument is maintained, will show that the phrases and turns of expression upon which the resemblance is supposed to rest, are in no way remarkable or characteristic, and might have been freely used by any one familiar with Oriental metaphor and imagery, without incurring the charge of plagiarism. Two exceptions are Nah. ii. 10, where a striking expression is used which only occurs besides in Joel ii. 6, and Nah. i. 15 (Heb. ii. 1), the first clause of which is nearly word for word the same as that of Is. lii. 7. But these passages, by themselves, would equally prove that Nahum was anterior both to Joel and Isaiah, and that his diction was copied by them. Other references which are supposed to indicate imitations of older writers, or, at least, familiarity with their writings, are Nah. i. 3 compared with Jon. iv. 2; Nah. i. 13 with Is. x. 27; Nah. iii. 10 with Is. xiii. 16; Nah. ii. 2 [1] with Is. xxiv. 1; Nah. iii. 5 with Is. xlvii. 2, 3; and Nah. iii. 7 with Is. li. 19. For the purpose of showing that Nahum preceded Jeremiah, Strauss quotes other passages in which the later prophet is believed to have had in his mind expressions of his predecessor with which he was familiar. The most striking of these are Jer. x. 19 compared with Nah. iii. 19; Jer. xiii. 26 with Nah. iii. 5; Jer. l. 37, li. 30 with Nah. iii. 13. Words, which are assumed by the same commentator to be peculiar to the times of Isaiah, are appealed to by him as evidences of the date of the prophecy. But the only examples which he quotes prove nothing: שֶׁטֶף, *sheteph* (Nah. i. 8, A. V. "flood"), occurs in Job, the Psalms, and in Proverbs, but not once in Isaiah; and מְצוּרָה, *mĕtsûrâh* (Nah. ii. 1 [2], A. V. "munition") is found only once in Isaiah, though it occurs frequently in the Chronicles, and is not a word likely to be uncommon or peculiar, so that nothing can be inferred from it. Besides, all this would be as appropriate to the times of Hezekiah as to those of Manasseh. That the prophecy was written before the final downfall of Nineveh, and its capture by the Medes and Chaldeans (cir. B.C. 625), will be admitted. The allusions to the Assyrian power imply that it was still unbroken (i. 12, ii. 13, 14, iii. 15-17). The glory of the kingdom was at its brightest in the reign of Esarhaddon (B.C. 680-660), who for 13 years made Babylon the seat of the empire, and this fact would incline us to fix the date of Nahum rather in the reign of his father Sennacherib, for Nineveh alone is contemplated in the destruction threatened to the Assyrian power, and no hint is given that its importance in the kingdom was diminished, as it necessarily would be, by the establishment of another capital. That Palestine was suffering from the effects of Assyrian invasion at the time of Nahum's writing seems probable from the allusions in i. 11, 12, 13, ii. 2; and the vivid description of the Assyrian armament in ii. 3, 4. At such a time the prophecy would be appropriate, and if i. 14 refers to the death of Sennacherib in the house of Nisroch, it must have been written before that event. The capture of No Ammon, or Thebes, has not been identified with anything like certainty. It is referred to as of recent occurrence, and it has been conjectured with probability that it was effected by Sargon in the invasion of Egypt alluded to in Is. xx. 1. These circumstances seem to determine the 14th year of Hezekiah (B.C. 712) as the period before which the prophecy of Nahum could not have been written. The condition of Assyria in the reign of Sennacherib would correspond with the state of things implied in the prophecy, and it is on all accounts most probable that Nahum flourished in the latter half of the reign of Hezekiah, and wrote his prophecy soon after the date above mentioned, either in Jerusalem or its neighbourhood, where the echo still lingered of "the rattling of the wheels, and of the prancing horses, and of the jumping chariots" of the Assyrian host, and "the flame of the sword and lightning of the spear," still flashed in the memory of the beleaguered citizens.

The subject of the prophecy is, in accordance with the superscription, "the burden of Nineveh." The three chapters into which it is divided form a consecutive whole. The first chapter is introductory. It commences with a declaration of the character of Jehovah, "a God jealous and avenging," as exhibited in His dealings with His enemies, and the swift and terrible vengeance with which He pursues them (i. 2-6), while to those that trust in Him He is "good, a stronghold in the day of trouble" (i. 7), in contrast with the overwhelming flood which shall sweep away His foes (i. 8). The language of the prophet now becomes more special, and points to the destruction which awaited the hosts of Assyria who had just gone up out of Judah (i. 9-11). In the verses that follow the intention of Jehovah is still more fully declared, and addressed first to Judah (i. 12, 13), and then to the monarch of Assyria (i. 14). And now the vision grows more distinct. The messenger of glad tidings, the news of Nineveh's downfall, trod the mountains that were round about Jerusalem (i. 15), and proclaimed to Judah the accomplishment of her vows. But round the doomed city gathered the destroying armies; "the breaker in pieces" had gone up, and Jehovah mustered His hosts to the battle to avenge His people (ii. i. 2). The prophet's mind in vision sees the burnished bronze shields of the scarlet-clad warriors of the besieging army, the flashing steel scythes of their war-chariots as they are drawn up in battle array, and the quivering cypress-shafts of their spears (ii. 3). The Assyrians hasten to the defence: their chariots rush madly through the streets, and run to and fro like the lightning in the broad ways, which glare with their bright armour like torches. But a panic has seized their mighty ones; their ranks are broken as they march, and they hurry to the wall only to see the covered battering-rams of the besiegers ready for the attack (ii. 4, 5). The crisis hastens on with terrific

rapidity. The river-gates are broken in, and the royal palace is in the hands of the victors (ii. 6). And then comes the end; the city is taken and carried captive, and her maidens "moan as with the voice of doves," beating their breasts with sorrow (ii. 7). The flight becomes general, and the leaders in vain endeavour to stem the torrent of fugitives (ii. 8). The wealth of the city and its accumulated treasures become the spoil of the captors, and the conquered suffer all the horrors that follow the assault and storm (ii. 9, 10). Over the charred and blackened ruins the prophet, as the mouthpiece of Jehovah, exclaims in triumph, "Where is the lair of the lions, the feeding place of the young lions, where walked lion, lioness, lion's whelp, and none made (them) afraid?" (ii. 11, 12). But for all this the downfall of Nineveh was certain, for "behold! I am against thee, saith Jehovah of Hosts" (ii. 13). The vision ends, and the prophet recalled from the scenes of the future to the realities of the present, collects himself as it were, for one final outburst of withering denunciation against the Assyrian city, not now threatened by her Median and Chaldean conquerors, but in the full tide of prosperity, the oppressor and corrupter of nations. Mingled with this woe there is no touch of sadness or compassion for her fate; she will fall unpitied and unlamented, and with terrible calmness the prophet pronounces her final doom: "all that hear the bruit of thee shall clap the hands over thee: for upon whom has not thy wickedness passed continually?" (iii. 19).

As a poet, Nahum occupies a high place in the first rank of Hebrew literature. In proof of this it is only necessary to refer to the opening verses of his prophecy (i. 2-6), and to the magnificent description of the siege and destruction of Nineveh in ch. ii. His style is clear and uninvolved, though pregnant and forcible; his diction sonorous and rhythmical, the words re-echoing to the sense (comp. ii. 4, iii. 3). Some words and forms of words are almost peculiar to himself; as, for example, שַׂעֲרֶת for סַעֲרָה, in i. 3, occurs only besides in Job ix. 17; קָנְאָ for קָנָא, in i. 2, is found only in Josh. xxiv. 19; תַּכְנִגָה, ii. 9 [10], is found in Job xxiii. 3, and there not in the same sense; דָּהַר, in iii. 2, is only found in Judg. v. 22; פַּלְדוֹת and רֶכֶל, ii. 3 [4], נָהָג, ii. 7 [8], בּוּקָה and מְבוּקָה, ii. 10 [11], מְנוֹזָרִים, iii. 17, and בָּהָה, iii. 19, do not occur elsewhere. The unusual form of the pronominal suffix in מְלֵאָכְכָה, ii. 13 [14], נַפְשׁוֹ for נַפְצוֹ, iii. 18, are peculiar to Nahum; מַעַר, iii. 5, is only found in 1 K. vii. 36; נוֹבִי, iii. 17, occurs besides only in Am. vii. 1; and the foreign word כַּמְכַּמִּים, iii. 17, in the slightly different form כִּמְכַּמִּים, is found only in Jer. li. 27.

For illustrations of Nahum's prophecy, see the article NINEVEH. [W. A. W.]

NAIDUS (*Naïdos*; Alex. *Naeidos*: *Raanas*) = BENAIAH of the sons of Pahath Moab (1 Esdr. ix. 31; comp. Ezr. x. 30).

NAIL. I. (of finger).[a]—1. A nail or claw of man or animal. 2. A point or style, *e. g.* for writing: see Jer. xvii. 1. *Tsippóren* occurs in Deut. xxi. 12, in connexion with the verb עָשָׂה, *asâh*, "to make," here rendered *περιονυχίζω*, *circumcido*, A. V. "pare," but in marg. "dress," "suffer to grow." Gesenius explains "make neat."

Much controversy has arisen on the meaning of this passage; one set of interpreters, including Josephus and Philo, regarding the action as indicative of mourning, while others refer it to the deposition of mourning. Some, who would thus belong to the latter class, refer it to the practice of staining the nails with henneh.

The word *asah*, "make," is used both of "dressing," *i. e.* making clean the feet, and also of "trimming," *i. e.* combing and making neat the beard, in the case of Mephibosheth, 2 Sam. xix. 24. It seems, therefore, on the whole to mean "make suitable" to the particular purpose intended, whatever that may be: unless, as Gesenius thinks, the passage refers to the completion of the female captive's month of seclusion, that purpose is evidently one of mourning—a month's mourning interposed for the purpose of preventing on the one hand too hasty an approach on the part of the captor, and on the other too sudden a shock to natural feeling in the captive. Following this line of interpretation, the command will stand thus: The captive is to lay aside the "raiment of her captivity," viz. her ordinary dress in which she had been taken captive, and she is to remain in mourning retirement for a month with hair shortened and nails made suitable to the same purpose, thus presenting an appearance of woe to which the nails untrimmed and shortened hair would seem each in their way most suitable (see Job i. 20).

If, on the other hand, we suppose that the shaving the head, &c., indicate the time of retirement completed, we must suppose also a sort of Nazaritic initiation into her new condition, a supposition for which there is elsewhere no warrant in the Law, besides the fact that the "making," whether paring the nails or letting them grow, is nowhere mentioned as a Nazaritic ceremony, and also that the shaving the head at the end of the month would seem an altogether unsuitable introduction to the condition of a bride.

We conclude, therefore, that the captive's head was shaved at the commencement of the month, and that during that period her nails were to be allowed to grow in token of natural sorrow and consequent personal neglect. Joseph. *Ant.* iv. 8-23; Philo, *περὶ φιλανθρ.* c. 14, vol. ii. p. 394, ed. Mangey; Clem. Alex. *Strom.* ii. c. 18, iii. c. 11. vol. ii. pp. 475, 543, ed. Potter; Calmet, Patrick, *Crit. Sacr.* on Deut. xxi. 12; Schleusner, *Lex. V. T.* *περιονυχίζω*; Selden, *de Jur. Nat.* v. xiii. p. 644; Harmer, *Obs.* iv. 104; Wilkinson, *Anc. Eg.* ii. 345; Lane, *M. E.* i. 64; Gesenius, p. 1075; Michaelis, *Laws of Moses*, art. 88, vol. i. p. 464, ed. Smith; Numb. vi. 2, 18.

II.—1.[b] A nail (Is. xli. 7), a stake (Is. xxxiii. 20), also a tent-peg. Tent-pegs are usually of wood and of large size, but sometimes, as was the case with those used to fasten the curtains of the Tabernacle, of metal (Ex. xxvii. 19, xxxviii. 20; see Lightfoot, *Spicil.* in Ex. §42; Joseph. *Ant.* v. 5, 4). [JAEL, TENT.]

[a] יָעֵר, *tsippar*, a Chaldee form of the Heb. צִפֹּרֶן, from the root צָפַר, connected with סָפַר, "to scrape," as "pare;" ὄνυξ; *unguis*.

[b] יָתֵד, *yathêd*; πάσσαλος; *paxillus*, *clavus*; akin to Arab. وَتَدَ, *watada*, "to fix a peg."

2.[c] A nail, primarily a point.[d] We are told that David prepared iron for the nails to be used in the Temple; and as the holy of holies was plated with gold, the nails also for fastening the plates were probably of gold. Their weight is said to have been 50 shekels, = 25 ounces, a weight obviously so much too small, unless mere gilding be supposed, for the total weight required, that LXX. and Vulg. render it as expressing that of each nail, which is equally excessive. To remedy this difficulty Thenius suggests reading 500 for 50 shekels (1 Chr. xxii. 3; 2 Chr. iii. 9; Bertheau, *on Chronicles*, in *Kurzgef. Handb.*).

"Nail," Vulg. palus, is the rendering of πάσσαλος in Ecclus. xxvii. 2. In N. T. we have ἧλος and προσηλόω in speaking of the nails of the Cross (John xx. 25; Col. ii. 14). [H. W. P.]

NAIN (Ναΐν). There are no materials for a long history or a detailed description of this village of Galilee, the gate of which is made illustrious by the raising of the widow's son (Luke vii. 12). But two points connected with it are of extreme interest to the Biblical student. The site of the village is certainly known; and there can be no doubt as to the approach by which our Saviour was coming when He met the funeral. The modern *Nein* is situated on the north-western edge of the "Little Hermon," or *Jebel ed-Dûhy*, where the ground falls into the plain of Esdraelon. Nor has the name ever been forgotten. The crusaders knew it, and Eusebius and Jerome mention it, in its right connexion with the neighbourhood of Endor. Again, the entrance to the place must probably always have been up the steep ascent from the plain; and here, on the west side of the village, the rock is full of sepulchral caves. It appears also that there are similar caves on the east side. (Robinson, *Bib. Res.* ii. 361; Van de Velde, *Syria and Palestine*, ii. 382; Stanley, *Sinai and Palestine*, p. 357; Thomson, *The Land and the Book*, p. 445; Porter, *Handbook to Syria*, p. 358.) [J. S. H.]

NA'IOTH (נָיוֹת, according to the *Keri* or corrected text of the Masorets, which is followed by the A. V., but in the *Cethîb* or original text נָוֹת,[a] *i. e.* Nevaioth: Ἀδάθ; Alex. Ναϊώθ: *Najoth*), or more fully,[b] "Naioth in Ramah;" a place in which Samuel and David took refuge together, after the latter had made his escape from the jealous fury of Saul (1 Sam. xix. 18, 19, 22, 23, xx. 1). It is evident from ver. 18, that Naioth was not actually in Ramah, Samuel's habitual residence, though from the affix it must have been near it (Ewald, iii. 66). In its corrected form (*Keri*) the name signifies "habitations," and from an early date has been interpreted to mean the huts or dwellings of a school or college of prophets over which Samuel presided, as Elisha did over those at Gilgal and Jericho.

This interpretation was unknown to Josephus, who gives the name Γαλβδαθ, to the translators of the LXX. and the Peshito-Syriac (*Jonath*), and to Jerome.[c] It appears first in the Targum-Jonathan, where for Naioth we find throughout בֵּית אוּלְפָנָא "the house of instruction," the term[d] which appears in later times to have been regularly applied to the schools of the Rabbis (Buxtorf, *Lex. Talm.* 1063—and where ver. 20 is rendered, "and they saw the company of scribes singing praises, and Samuel teaching, standing over them," thus introducing the idea of Samuel as a teacher. This interpretation of Naioth is now generally accepted by the lexicographers and commentators. [G.]

NANE'A (Ναναία: *Nanea*). The last act of Antiochus Epiphanes (vol. i. p. 75*b*) was his attempt to plunder the temple of Nanea at Elymais, which had been enriched by the gifts and trophies of Alexander the Great (1 Macc. vi. 1-4; 2 Macc. i. 13-16). The Persian goddess Nanea, called also Ἀναΐτις by Strabo (xv. p. 733), is apparently the Moon goddess, of whom the Greek Artemis was the nearest representative in Polybius (quoted by Joseph. *Ant.* xii. 9, §1). Beyer calls her the "Elymaean Venus" (*ad Joh. Seldeni, &c., addit.* p. 345), and Winer (*Realw.*) apparently identifies Nanea with Meni, and both with the planet Venus, the star of luck, called by the Syrians ܢܘܨܝ, *Nŭsi*, and in Zend *Nahid* or *Anahid*.

Elphinstone in 1811 found coins of the Sassanians with the inscription NANAIA, and on the reverse a figure with nimbus and lotus-flower (Movers, *Phoen.* i. 626). It is probable that Nanea is identical with the deity named by Strabo (xi. p. 532) as the *numen patrium* of the Persians, who was also honoured by the Medes, Armenians, and in many districts of Asia Minor. Other forms of the name are Ἄναια, given by Strabo, Ἀΐσης by Polybius, Ἀναΐτις by Plutarch, and Ταναΐς by Clemens Alexandrinus, with which last the variations of some MSS. of Strabo correspond. In consequence of a confusion between the Greek and Eastern mythologies, Nanea has been identified with Artemis and Aphrodite, the probability being that she corresponds with the Tauric or Ephesian Artemis, who was invested with the attributes of Aphrodite, and represented the productive power of nature. In this case some weight may be allowed to the conjecture, that "the desire of women" mentioned in Dan. xi. 37 is the same as the goddess Nanea.

In 2 Macc. ix. 1, 2, appears to be a different account of the same sacrilegious attempt of Antiochus; but the scene of the event is there placed at Persepolis, "the city of the Persians," where there might well have been a temple to the national deity. But Grimm considers it far more probable that it was an Elymaean temple which excited the cupidity of the king. See Gesenius, *Jesaia*, iii. 337, and Grimm's *Commentar* in the *Kurzgef. Handb.* [W. A. W.]

NA'OMI (נָעֳמִי: Νωεμείν; Alex. Νοεμμαν,

[c] מִסְמֵר, *masmêr*,[1] only used in plur.; ἧλος; *clavus*.

[d] From סָמַר, "stand on end," as hair (Ges. p. 961).

[a] The plural of נָוָה. The original form (*Cethîb*) would be the plural of נָוֵה (Simonis, *Onom.* 30), a word which does not appear to have existed.

[1] ס ־ מ
Closely allied to Arab. مسمار, *mismâr*, "a nail."

[b] "Naioth" occurs both in Heb. and A. V. in Sam. xix. 18, only. The LXX. supply ἐν Ῥαμα in that verse. The Vulgate adheres to the Hebrew.

[c] In his notice of this name in the *Onomasticon* ("Namoth"), Jerome refers to his observations thereon in the "libri Hebraicarum quaestionum." As, however, we at present possess those books, they contain no reference to Naioth.

[d] It occurs again in the Targum for the residence of Huldah the prophetess (2 K. xxii. 14).

Νοεμμειν, Νοομει, &c.: *Noemi*), the wife of Elimelech, and mother-in-law of Ruth (Ruth i. 2, &c., ii. 1, &c., iii. 1, iv. 3, &c.). The name is derived from a root signifying sweetness, or pleasantness, and this significance contributes to the point of the paronomasia in i. 20, 21. though the passage contains also a play on the mere sound of the name:—"Call me not Naomi (pleasant), call me Mara (bitter) why call ye me Naomi when Jehovah hath testified (*anah*, עָנָה) against me?" [G.]

NAPHISH (נָפִישׁ), "according to the Syriac usage, 'refreshment,'" Ges.: Ναφές, Ναφισαιοι: *Naphis*), the last but one of the sons of Ishmael (Gen. xxv. 15; 1 Chr. i. 31). The tribe descended from Nodab was subdued by the Reubenites, the Gadites, and the half of the tribe of Manasseh, when "they made war with the Hagarites, with Jetur, and *Nephish* (Ναφισαιων, LXX.), and Nodab" (1 Chr. v. 19). The tribe is not again found in the sacred records, nor is it mentioned by later writers. It has not been identified with any Arabian tribe; but identifications with Ishmaelite tribes are often difficult. The difficulty in question arises from intermarriages with Keturahites and Joktanites, from the influence of Mohammadan history, and from our ignorance respecting many of the tribes, and the towns and districts, of Arabia. The influence of Mohammadan history is here mentioned as the strongest instance of a class of influences very common among the Arabs, by which prominence has been given to certain tribes remarkable in the rise of the religion, or in the history of the country, its language, &c. But intermarriages exercise even a stronger influence on the names of tribes, causing in countless instances the adoption of an older name to the exclusion of the more recent, without altering the *pedigree*. Thus Mohammad claimed descent from the tribe of Mudád, although he gloried in being an Ishmaelite: Mudád took its name from the father of Ishmael's wife, and the name of Ishmael himself is merged in that of the older race. [ISHMAEL.]

If the Hagarenes went southwards, into the province of Hejer, after their defeat, Naphish may have gone with them, and traces of his name should in this case be looked for in that obscure province of Arabia. He is described in Chronicles, with the confederate tribes, as pastoral, and numerous in men and cattle. [NODAB.] [E. S. P.]

NAPHTSI (Ναφεισει; Alex. Ναφισι: *Naissim*), 1 Esdr. v. 31. [NEPHUSIM.]

NAPHTALI (נַפְתָּלִי): Νεφθαλείμ, and so also Josephus: *Nephthalis*). The fifth son of Jacob; the second child borne to him by Bilhah, Rachel's slave. His birth and the bestowal of his name are recorded in Gen. xxx. 8:—"and Rachel said 'wrestlings (or contortions—*naphtûle*) of God[a] have I wrestled (*niphtalti*) with my sister and have prevailed.' And she called his name [b]Naphtali."

By his birth Naphtali was thus allied to Dan (Gen. xxxv. 25); and he also belonged to the same portion of the family as Ephraim and Benjamin, the sons of Rachel; but, as we shall see, these connexions appear to have been only imperfectly maintained by the tribe descended from him.

At the migration to Egypt four sons are attributed to Naphtali (Gen. xlvi. 24; Ex. i. 4; 1 Chr. vii. 13). Of the individual patriarch not a single trait is given in the Bible; but in the Jewish traditions he is celebrated for his powers as a swift runner, and he is named as one of the five who were chosen by Joseph to represent the family before Pharaoh (*Targ. Pseudojon.* on Gen. l. 13 and xlvii. 2).[c]

When the census was taken at Mount Sinai the tribe numbered no less than 53,400 fighting men (Num. i. 43, ii. 30). It thus held exactly the middle position in the nation, having five above it in numbers, and six below. But when the borders of the Promised Land were reached, its numbers were reduced to 45,400, with four only below it in the scale, one of the four being Ephraim (Num. xxvi. 48-50; comp. 37). The leader of the tribe at Sinai was Ahira ben-Enan (Num. ii. 29); and at Shiloh, Pedahel ben-Ammihud (xxxiv. 28). Amongst the spies its representative was Nahbi ben-Vophsi (xiii. 14).

During the march through the wilderness Naphtali occupied a position on the north of the Sacred Tent with Dan, and also with another tribe, which though not originally so intimately connected became afterwards his immediate neighbour—Asher (Num. ii. 25-31). The three formed the "Camp of Dan," and their common standard, according to the Jewish traditions, was a serpent or basiliak, with the motto, "Return, O Jehovah, unto the many thousands of Israel!" (*Targ. Pseudojon.* on Num. ii. 25).

In the apportionment of the land, the lot of Naphtali was not drawn till the last but one. The two portions then remaining unappropriated were the noble but remote district which lay between the strip of coast-land already allotted to Asher and the upper part of the Jordan, and the little canton or corner, more central, but in every other respect far inferior, which projected from the territory of Judah into the country of the Philistines, and formed the "marches" between those two never-tiring combatants. Naphtali chose the former of these, leaving the latter to the Danites, a large number of whom shortly followed their relatives to their home in the more remote but more undisturbed north, and thus testified to the wisdom of Naphtali's selection.

The territory thus appropriated was enclosed on three sides by those of other tribes. On the west, as already remarked, lay Asher; on the south Zebulun, and on the east the trans-jordanic Manasseh.

[a] That is, according to the Hebrew idiom, "immense wrestlings." ἀμηχάνητος οἷον, "as if irresistible," is the explanation of the name given by Josephus (*Ant.* i. 19, §8).

[b] An attempt has been made by Redslob, in his singular treatise *Die Alttest. Namen*, &c. (Hamb. 1846, pp. 88, 9), to show that "Naphtali" is nothing but a synonyme for "Galilee," and that again for "Cabul," all three being opprobrious appellations. But if there were no other difficulties in the way, this has the disadvantage of being in direct contradiction to the high estimation in which the tribe was held at the date of the composition of the Songs of Deborah and Jacob.

[c] In the 'Testaments of the Twelve Patriarchs, Naphtali dies in his 132nd year, in the 7th month, on the 4th day of the month. He explains his name as given "because Rachel had dealt deceitfully" (ἐν πανουργίᾳ ἐνοίησεν). He also gives the genealogy of his mother:—Balla (Bilhah), the daughter of Routhaios, the brother of Deborah, Rebekah's nurse, was born the same day with Rachel. Routhaios was a Chaldæan of the kindred of Abraham, who, being taken captive, was bought as a slave by Laban. Laban gave him his maid Aina or Eva to wife, by whom he had Zelipha (Zilpah)—so called from the place in which he had been captive—and Balla (Fabricius, *Cod. Pseudepigr. V. T.* 650, &c.).

The north terminated with the ravine of the *Litany* or Leontes, and opened into the splendid valley which separates the two ranges of Lebanon. According to Josephus (*Ant.* v. 1, §22) the eastern side of the tribe reached as far as Damascus; but of this—though not impossible in the early times of the nation and before the rise of the Syrian monarchy—there is no indication in the Bible. The south boundary was probably very much the same as that which at a later time separated Upper from Lower Galilee, and which ran from or about the town of *Akka* to the upper part of the Sea of Gennesaret. Thus Naphtali was cut off from the great plain of Esdraelon—the favourite resort of the hordes of plunderers from beyond the Jordan, and the great battlefield of the country—by the mass of the mountains of Nazareth; while on the east it had a communication with the Sea of Galilee, the rich district of the *Ard el-Hulah* and the *Merj Ayûn*, and all the splendidly watered country about *Banias* and *Hasbeya*, the springs of Jordan. "O Naphtali," thus accurately does the Song attributed to the dying lawgiver express itself with regard to this part of the territory of the tribe—"O Naphthali, satisfied with favour and full of Jehovah's blessing, the sea[d] and the south possess thou!" (Deut. xxxiii. 23). But the capabilities of these plains and of the access to the Lake, which at a later period raised GALILEE and GENNESARETH to so high a pitch of crowded and busy prosperity, were not destined to be developed while they were in the keeping of the tribe of Naphtali. It was the mountainous country ("Mount Naphtali," Josh. xx. 7) which formed the chief part of their inheritance, that impressed or brought out the qualities for which Naphtali was remarkable at the one remarkable period of its history. This district, the modern *Belad-Besharah*, or "land of good tidings," comprises some of the most beautiful scenery, and some of the most fertile soil in Palestine (Porter, 363), forests surpassing those of the renowned Carmel itself (Van de Velde, i. 293); as rich in noble and ever-varying prospects as any country in the world (ii. 407). As it is thus described by one of the few travellers who have crossed its mountains and descended into its ravines, so it was at the time of the Christian era:—"The soil," says Josephus (*B. J.* iii. 3, §2), "universally rich and productive; full of plantations of trees of all sorts; so fertile as to invite the most slothful to cultivate it." But, except in the permanence of these natural advantages, the contrast between the present and that earlier time is complete; for whereas, in the time of Josephus, Galilee was one of the most populous and busy districts of Syria, now the population is in an inverse proportion to the luxuriance of the natural vegetation (Van de Velde, i. 170).

Three of the towns of Naphtali were allotted to the Gershonite Levites—Kedesh (already called Kedesh-in-Galilee), Hammoth-dor, and Kartan. Of these, the first was a city of refuge (Josh. xx. 7, xxi. 32). Naphtali was one of Solomon's commissariat districts, under the charge of his son-in-law Ahimaaz; who with his wife Basmath resided in his presidency, and doubtless enlivened that remote and rural locality by a miniature of the court of his august father-in-law, held at Safed or Kedesh, or wherever his residence may have been (1 K. iv. 15). Here he doubtless watched the progress of the unpromising new district presented to Solomon by Hiram—the twenty cities of Cabul, which seem to have been within the territory of Naphtali, perhaps the nucleus of the Galilee of later date. The rule of the tribe (נְגִיד)—a different dignity altogether from that of Ahimaaz—was, in the reign of David, Jerimoth ben-Azriel (1 Chr. xxvii. 19).

Naphtali had its share in those incursions and molestations by the surrounding heathen, which were the common lot of all the tribes (Judah perhaps alone excepted) during the first centuries after the conquest. One of these, apparently the severest struggle of all, fell with special violence on the north of the country, and the leader by whom the invasion was repelled—BARAK of Kedesh-Naphtali—was the one great hero whom Naphtali is recorded to have produced. How gigantic were the efforts by which these heroic mountaineers saved their darling highlands from the swarms of Canaanites who followed Jabin and Sisera, and how grand the position which they achieved in the eyes of the whole nation, may be gathered from the narrative of the war in Judg. iv., and still more from the expressions of the triumphal song in which Deborah, the prophetess of Ephraim, immortalised the victors, and branded their reluctant countrymen with everlasting infamy. Gilead and Reuben lingered beyond the Jordan amongst their flocks: Dan and Asher preferred the luxurious calm of their hot lowlands to the free air and fierce strife of the mountains; Issachar with characteristic sluggishness seems to have moved slowly if he moved at all; but Zebulun and Naphtali on the summits of their native highlands devoted themselves to death, even to an extravagant pitch of heroism and self-devotion (Judg. v. 18):—

> "Zebulun are a people that threw away their lives even unto death—
> And Naphtali, on the high places of the field."

The mention of Naphtali contained in the Song attributed to Jacob—whether it is predictive, or as some writers believe, retrospective—must have reference to this event: unless indeed, which is hardly to be believed, some other heroic occasion is referred to, which has passed unrecorded in the history. The translation of this difficult passage given by Ewald (*Geschichte*, ii. 380), has the merit of being more intelligible than the ordinary version, and also more in harmony with the expressions of Deborah's Song:

> "Naphtali is a towering Terebinth;
> He hath a goodly crest."

The allusion, at once to the situation of the tribe at the very apex of the country, to the heroes who towered at the head of the tribe, and to the lofty mountains on whose summits their castles, then as now, were perched—is very happy, and entirely in the vein of these ancient poems.

After this burst of heroism, the Naphtalites appear to have resigned themselves to the intercourse with the heathen, which was the bane of the northern tribes in general, and of which there are already indications in Judg. i. 33. The location by Jeroboam within their territory of the great sanctuary for the northern part of his kingdom must have given an impulse to their nationality, and for a time have revived the connexion with their brethren nearer the centre. But there was one circumstance

[d] *Yam*, rendered "west" in the A. V., but obviously the "Sea" of Galilee.

[e] So Ewald *wagwerfend* (*Dichter*, i. 30).

[f] This is implied in the name of Galilee, which at an early date, is styled גְּלִיל הַגּוֹיִם, *gelil hag-goyim*, Galilee of the Gentiles.

fatal to the prosperity of the tribe, namely, that it lay in the very path of the northern invaders. Syrian and Assyrian, Benhadad and Tiglath-pileser, each had their first taste of the plunder of the Israelites from the goodly land of Naphtali. At length in the reign of Pekah king of Israel (cir. B.C. 730), Tiglath-pileser overran the whole of the north of Israel, swept off the population, and bore them away to Assyria.

But though the history of the tribe of Naphtali ends here, and the name is not again mentioned except in the well-known citation of St. Matthew (iv. 15), and the mystical references of Ezekiel (xlviii. 3, 4, 34) and of the writer of the Apocalypse (Rev. vii. 6), yet under the title of GALILEE —apparently an ancient name, though not brought prominently forward till the Christian era—the district which they had formerly occupied was destined to become in every way far more important than it had ever before been. For it was the cradle of the Christian faith, the native place of most of the Apostles, and the "home" of our Lord. [GALILEE, vol. i. p. 645*b*; CAPERNAUM, 273*a*.]

It also became populous and prosperous to a degree far beyond anything of which we have any indications in the Old Testament; but this, as well as the account of its sufferings and heroic resistance during the campaign of Titus and Vespasian prior to the destruction of Jerusalem, must be given elsewhere. [GALILEE; PALESTINE.] [G.]

NAPH'TALI, MOUNT (הַר נַפְתָּלִי: ὄν τῷ ὄρει τῷ Νεφθαλεί: *Mons Nephtali*). The mountainous district which formed the main part of the inheritance of Naphtali (Josh. xx. 7), answering to "Mount Ephraim" in the centre and "Mount Judah" in the south of Palestine.

NAPH'THAR (νέφθαρ: *Nephthar*). The name given by Nehemiah to the substance[a] which after the Return from Babylon was discovered in the dry pit in which at the destruction of the Temple the sacred Fire of the altar had been hidden (2 Macc. i. 36, comp. 19). The legend is a curious one; and it is plain, from the description of the substance—"thick water,"[b] which, being poured over the sacrifice and the wood, was kindled by the great heat of the sun, and then burnt with an exceedingly bright and clear flame (ver. 32)—that it was either the same as or closely allied to the naphtha of modern commerce (*Petroleum*). The narrative is not at all extravagant in its terms, and is very probably grounded on some actual[c] occurrence. The only difficulty it presents is the explanation given of the name: "Naphthar, which is, being interpreted, cleansing" (καθαρισμός), and which has hitherto puzzled all the interpreters. It is perhaps due to some mistake in copying. A list of conjectures will be found in Grimm (*Kurzgef. Handb.* ad loc.), and another in Reland's *Diss. de vet. Ling. Pers.* lxviii.

The place from which this combustible water was taken was enclosed by the "king of Persia" (Artaxerxes Longimanus), and converted into a sanctuary (such seems the force of ἱερὸν ποιεῖν, ver. 34.). In modern times it has been identified with the large well called by the Arabs *Bir-eyûb*, situated beneath Jerusalem, at the confluence of the valleys of Kidron and Hinnom with the *Wady en-Nar* (or "valley of the fire"), and from which the main water supply of the city is obtained.

This well, the Arab name of which may be the well of Joab or of Job, and which is usually identified with En-rogel, is also known to the Frank Christians as the "Well of Nehemiah." According to Dr. Robinson (*Bib. Res.* i. 331, 2 *note*), the first trace of this name is in Quaresmius (*Elucidatio*, &c., ii. 270–4), who wrote in the early part of the 17th cent. (1616-25). He calls it "the well of Nehemiah and of fire," in words which seem to imply that such was at that time its recognized name: "Celebris ille et nominatus puteus, Nehemiae et ignis appellatus." The valley which runs from it to the Dead Sea is called *Wady en-Nar*, "Valley of the Fire;" but no stress can be laid on this, as the name may have originated the tradition. A description of the *Bir-eyûb* is given by Williams (*Holy City*, ii. 489-95), Barclay (*City*, &c., 513-16), and by the careful Tobler (*Umgebungen*, &c., 50). At present it would be an equally unsuitable spot either to store fire or to seek for naphtha. One thing is plain, that it cannot have been En-rogel (which was a living spring of water from the days of Joshua downwards), and a naphtha well also. [G.]

NAPH TUHIM (נַפְתֻּחִים: Νεφθαλείμ: *Nephtuim, Nephthuim*), a Mizraite nation or tribe, mentioned only in the account of the descendants of Noah (Gen. x. 13; 1 Chr. i. 11). If we may judge from their position in the list of the Mizraites, according to the Masoretic text (in the LXX. in Gen. x. they follow the Ludim and precede the Anamim, Ἐνεμεσελμ), immediately after the Lehabim, who doubtless dwelt to the west of Egypt, and before the Pathrusim, who inhabited that country, the Naphtuhim were probably settled at first, or at the time when Gen. x. was written, either in Egypt or immediately to the west of it. In Coptic the city Marea and the neighbouring territory, which probably corresponded to the older Mareotic nome, is called Ⲡⲓⲫⲁⲓⲁⲧ or Ⲡⲓⲫⲁⲓⲁⲁ, a name composed of the word ⲫⲁⲓⲁⲧ or ⲫⲁⲓⲁⲁ, of unknown meaning, with the plural definite article Ⲡⲓ prefixed. In hieroglyphics mention is made of a nation or confederacy of tribes conquered by the Egyptians called "the Nine Bows,"[b] a name which Champollion read Naphit, or, as we should write it, NA-PETU, "the bows," though he called them "the Nine Bows."[b] It seems, however, more reasonable to suppose that we should read (ix) PETU "the Nine Bows" literally. It is also doubtful whether the Coptic name of Marea contains the word "bow," which is only found in the forms Ⲡⲓⲧⲉ (S. masc.) and ⲫⲓϯ (M. fem. "a rainbow"); but it is possible that the second part of the former may have been originally the same as the latter. It is noteworthy that there should be two geographical names connected with the bow in hieroglyphics, the one of a country, MERU-PET, "the island of the bow," probably MEROË, and the other of a nation or confederacy, "the Nine Bows,"

[a] Not to the *place*, as in the Vulgate,—*Aunc locum*.

[b] The word "water" is here used merely for "liquid," as it is again later. Native naphtha is sometimes obtained quite free from colour, and in appearance not unlike water.

[c] Grimm (p. 50) notices a passage in the "Adambook" of the Ethiopian Christians, in which Ezra is said to have discovered in the vaults of the Temple a censer full of the Sacred Fire which had formerly burnt in the Sanctuary.

[a] Dr. Brugsch reads this name "the Nine Peoples" (*Geographische Inschriften*, ii. p. 20).

[b] A bow in hieroglyphics is PET, PEST or PETEK.

and there in the list of the Hamites there should be two similar names, Phut and Naphtuhim, besides Cush, probably of like sense. No important historical notice of the Nine Bows has been found in the Egyptian inscriptions: they are only spoken of in a general manner when the kings are said, in laudatory inscriptions, to have subdued great nations, such as the Negroes, or extensive countries, such as KEESH, or Cush. Perhaps therefore this name is that of a confederacy or of a widely-spread nation, of which the members or tribes are spoken of separately in records of a more particular character, treating of special conquests of the Pharaohs or enumerating their tributaries. [R. S. P.]

NARCIS'SUS (Νάρκισσος). A dweller at Rome (Rom. xvi. 11), some members of whose household were known as Christians to St. Paul. Some persons have assumed the identity of this Narcissus with the secretary of the emperor Claudius (Suetonius, *Claudius*, §28). But that wealthy and powerful freedman satisfied the revenge of Agrippina by a miserable death in prison (Tac. *Ann.* xiii. 1), in the first year of Nero's reign (A.D. 54-55), about three years before this Epistle was written. Dio Cassius, lxiv. 3, mentions another Narcissus, who probably was living in Rome at that time; he attained to some notoriety as an associate of Nero, and was put to an ignominious death with Helius, Patrobius, Locusta, and others, on the accession of Galba, A.D. 68. His name, however (see Reimar's note, *in loco*), was at that time too common in Rome to give any probability to the guess that he was the Narcissus mentioned by St. Paul. A late and improbable tradition (Pseudo-Hippolytus) makes Narcissus one of the seventy disciples, and bishop of Athens. [W. T. B.]

NARD. [SPIKENARD.]

NAS'BAS (Νασβάς: *Nabath*). The nephew of Tobit who came with Achiacharus to the wedding of Tobias (Tob. xi. 18). Grotius considers him the same with Achiacharus the son of Anael, but according to the Vulgate they were brothers. The margin of the A. V. gives "Junius" as the equivalent of Nasbas.

NA'SITH (Ναασί; Alex. Ναασίθ: *Nasit*) = NEZIAH (1 Esdr. v. 32; comp. Ezr. ii. 54).

NA'SOR, THE PLAIN OF (τὸ πεδίον Ναασώρ: *campus Asor*), the scene of an action between Jonathan the Maccabee and the forces of Demetrius (1 Macc. xi. 67, comp. 63). It was near Cades (Kadesh-Naphtali) on the one side, and the water of Gennesar (Lake of Gennesareth) on the other, and therefore may be safely identified with the Hazor which became so renowned in the history of the conquest for the victories of Joshua and Barak (vol. i. 765 *a*). In fact the name is the same, except that through the error of a transcriber the N from the preceding Greek word has become attached to it. Josephus (*Ant.* xiii. 5, §7) gives it correctly, Ἀσώρ. [Comp. NAARATH, p. 453 *note*.] [G.]

NA'THAN (נָתָן: Νάθαν: *Nathan*), an eminent Hebrew prophet in the reigns of David and Solomon. If the expression "first and last," in 2 Chr. IX. 29, is to be taken literally, he must have lived late into the life of Solomon, in which case he must have been considerably younger than David. At any rate he seems to have been the younger of the two prophets who accompanied him, and may be considered as the latest direct representative of the schools of Samuel.

A Jewish tradition mentioned by Jerome (*Qu. Heb.* on 1 Sam. xvii. 12) identifies him with the eighth son of Jesse. [DAVID, vol. i. p. 402*a*.] But of this there is no proof.

He first appears in the consultation with David about the building of the Temple. He begins by advising it, and then, after a vision, withdraws his advice, on the ground that the time was not yet come (2 Sam. vii. 2, 3, 17). He next comes forward as the reprover of David for the sin with Bathsheba; and his famous apologue on the rich man and the ewe lamb, which is the only direct example of his prophetic power, shows it to have been of a very high order (2 Sam. xii. 1-12).

There is an indistinct trace of his appearing also at the time of the plague which fell on Jerusalem in accordance with the warning of God. "An angel," says Eupolemus (Euseb. *Praep. Ev.* ix. 30), "pointed him to the place where the Temple was to be, but forbade him to build it, as being stained with blood, and having fought many wars. His name was Dianathan." This was probably occasioned by some confusion of the Greek version, διὰ Νάθαν, with the parallel passage of 1 Chr. xxii. 8, where the bloodstained life of David is given as a reason against the building, but where Nathan is not named.

On the birth of Solomon he was either specially charged with giving him his name, JEDIDIAH, or else with his education, according as the words of 2 Sam. xii. 25, "He sent (or 'sent him') by (or 'into') the hand of Nathan," are understood. At any rate, in the last years of David, it is Nathan who, by taking the side of Solomon, turned the scale in his favour. He advised Bathsheba; he himself ventured to enter the royal presence with a remonstrance against the king's apathy; and at David's request he assisted in the inauguration of Solomon (1 K. i. 8, 10, 11, 22, 23, 24, 32, 34, 38, 45).

This is the last time that we hear directly of his intervention in the history. His son Zabud occupied the post of "King's Friend," perhaps succeeding Nathan (2 Sam. xv. 37; 1 Chr. xxvii. 33). His influence may be traced in the perpetuation of his manner of prophecy in the writings ascribed to Solomon (compare Eccl. ix. 14-16 with 2 Sam. xii. 1-4).

He left two works behind him—a Life of David (1 Chr. xxix. 29), and a Life of Solomon (2 Chr. ix. 29). The last of these may have been incomplete, as we cannot be sure that he outlived Solomon. But the biography of David by Nathan is, of all the losses which antiquity, sacred or profane, has sustained, the most deplorable.

The consideration in which he was held at the time is indicated by the solemn announcement of his approach—"Behold Nathan the prophet" (1 K. i. 23). The peculiar affix of "the prophet," as distinguished from "the seer," given to Samuel and Gad (1 Chr. xxix. 29), shows his identification with the later view of the prophetic office indicated in 1 Sam. ix. 9. His grave is shown at *Halhul* near Hebron (see Robinson, *B. R.* i. 216 *note*). [A. P. S.]

2. A son of David; one of the four who were borne to him by Bathsheba (1 Chr. iii. 5; comp. xiv. 4, and 2 Sam. v. 14). He was thus own brother to Solomon—if the order of the lists is to be accepted, elder brother; though this is at variance with the natural inference from the narrative of 2 Sam. xii. 24, which implies that Solomon was Bathsheba's second son. The name was not unknown in David's family; Nathan-eel was one of his brothers, and Jo-nathan, his nephew.

Nathan appears to have taken no part in the events of his father's or his brother's reigns. He is interesting to us from his appearing as one of the forefathers of Joseph in the genealogy of St. Luke (iii. 31)—"the private genealogy of Joseph, exhibiting his line as David's descendant, and thus showing how he was heir to Solomon's crown" (vol. i. 666*a*). The hypothesis of Lord Arthur Hervey is that on the failure of Solomon's line in Jehoiachin or Jeconiah, who died without issue, Salathiel of Nathan's house became heir to David's throne, and then was entered in the genealogical tables as "son of Jeconiah" (i. 666*b*). That the family of Nathan was, as this hypothesis requires, well known at the time of Jehoiachin's death, is implied by its mention in Zech. xii. 12, a prophecy the date of which is placed by Ewald (*Propheten*, i. 391) as fifteen years after Habbakuk, and shortly before the destruction of Jerusalem by Nebuchadnezzar—that is, a few years only after Jehoiachin's death.

3. Son, or brother, of one of the members of David's guard (2 Sam. xxiii. 36; 1 Chr. xi. 38). In the former of these two parallel passages he is stated to be "of Zobah," *i. e.* Aram-Zobah, which Kennicott in his investigation (*Dissert.* 215, 216) decides to have been the original reading, though he also decides for "brother" against "son."

4. One of the head men who returned from Babylon with Ezra on his second expedition, and whom he despatched from his encampment at the river Ahava to the colony of Jews at Casiphia, to obtain thence some Levites and Nethinim for the Temple service (Ezr. viii. 16; 1 Esdr. viii. 44). That Nathan and those mentioned with him were laymen, appears evident from the concluding words of the preceding verse, and therefore it is not impossible that he may be the same with the "son of Bani" who was obliged to relinquish his foreign wife (Ezr. x. 39), though on the other hand these marriages seem rather to have been contracted by those who had been longer in Jerusalem than he, who had so lately arrived from Babylon, could be. [G.]

NATH'ANAEL (Ναθαναήλ, "gift of God"), a disciple of Jesus Christ concerning whom, under that name at least, we learn from Scripture little more than his birth-place, Cana of Galilee (John xxi. 2), and his simple truthful character (John i. 47). We have no particulars of his life. Indeed the name does not occur in the first three Gospels.

We learn, however, from St. John that Jesus on the third or fourth day after His return from the scene of His temptation to that of His baptism, having been proclaimed by the Baptist as the Lamb of God, was minded to go into Galilee. He first then called Philip to follow Him, but Philip could not set forth on his journey without communicating to Nathanael the wonderful intelligence which he had received from his master the Baptist, namely, that the Messiah so long foretold by Moses and the Prophets had at last appeared. Nathanael, who seems to have heard the announcement at first with some distrust, as doubting whether anything good could come out of so small and inconsiderable a place as Nazareth—a place nowhere mentioned in the Old Testament—yet readily accepted Philip's invitation to go and satisfy himself by his own personal observation (John i. 46). What follows is a testimony to the humility, simplicity, and sincerity of his own character from One who could read his heart, such as is recorded of hardly any other person in the Bible. Nathanael, on his approach to Jesus, is saluted by Him as "an Israelite indeed, in whom is no guile"—a true child of Abraham, and not simply according to the flesh. So little, however, did he expect any such distinctive praise, that he could not refrain from asking how it was that he had become known to Jesus. The answer "before that Philip called thee, when thou wast under the fig-tree I saw thee," appears to have satisfied him that the speaker was more than man—that he must have read his secret thoughts, and heard his unuttered prayer at a time when he was studiously screening himself from public observation. The conclusion was inevitable. Nathanael at once confessed "Rabbi, thou art the Son of God; thou art the King of Israel" (John i. 49). The name of Nathanael occurs but once again in the Gospel narrative, and then simply as one of the small company of disciples to whom Jesus showed Himself at the sea of Tiberias after His resurrection. On that occasion we may fairly suppose that he joined his brethren in their night's venture on the lake—that, having been a sharer of their fruitless toil, he was a witness with them of the miraculous draught of fishes the next morning—and that he afterwards partook of the meal, to which, without daring to ask, the disciples felt assured in their hearts, that He who had called them was the Lord (John xxi. 12). Once therefore at the beginning of our Saviour's ministry, and once after His resurrection, does the name of Nathanael occur in the Sacred Record.

This scanty notice of one who was intimately associated with the very chiefest apostles, and was himself the object of our Lord's most emphatic commendation, has not unnaturally provoked the enquiry whether he may not be identified with another of the well-known disciples of Jesus. It is indeed very commonly believed that Nathanael and Bartholomew are the same person. The evidence for that belief is as follows: St. John, who twice mentions Nathanael, never introduces the name of Bartholomew at all. St. Matt. x. 3; St. Mark iii. 18; and St. Luke vi. 14, all speak of Bartholomew, but never of Nathanael. It may be, however, that Nathanael was the proper name, and Bartholomew (son of Tholmai) the surname of the same disciple, just as Simon was called Bar-Jona, and Joses, Barnabas.

It was Philip who first brought Nathanael to Jesus, just as Andrew had brought his brother Simon, and Bartholomew is named by each of the first three Evangelists immediately after Philip; while by St. Luke he is coupled with Philip precisely in the same way as Simon with his brother Andrew, and James with his brother John. It should be observed, too, that as all the other disciples mentioned in the first chapter of St. John became Apostles of Christ, it is difficult to suppose that one who had been so singularly commended by Jesus, and who in his turn had so promptly and so fully confessed Him to be the Son of God, should be excluded from the number. Again, that Nathanael was one of the original twelve, is inferred with much probability from his not being proposed as one of the candidates to fill the place of Judas. Still we must be careful to distinguish conjecture, however well founded, from proof.

To the argument based upon the fact, that in St. John's enumeration of the disciples to whom our Lord showed Himself at the Sea of Tiberias Nathanael stands before the sons of Zebedee, it is replied that this was to be expected, as the writer was himself a son of Zebedee: and further that Nathanael

is placed after Thomas in this list, while Bartholomew comes before Thomas in St. Matthew, St. Mark, and St. Luke. But as in the Acts St. Luke reverses the order of the two names, putting Thomas first, and Bartholomew second, we cannot attach much weight to this argument.

St. Augustine not only denies the claim of Nathanael to be one of the Twelve, but assigns as a reason for his opinion, that whereas Nathanael was most likely a learned man in the law of Moses, it was, as St. Paul tells us, 1 Cor. i. 26, the wisdom of Christ to make choice of rude and unlettered men to confound the wise (*in Johan. Ev.* c. i. §17). St. Gregory adopts the same view (*on John* i. 33, c. 16. B). In a dissertation on John i. 46, to be found in *Thes. Theo. philolog.* ii. 370, the author, J. Kindler, maintains that Bartholomew and Nathanael are different persons.

There is a tradition that Nathanael was the bridegroom at the marriage of Cana (Calmet), and Epiphanius, *Adv. Haer.* i. §223, implies his belief that of the two disciples whom Jesus overtook on the road to Emmaus Nathanael was one.

2. 1 Esdr. i. 9. [NETHANEEL.]

3. (*Ναθανήλος.*) 1Esdr. ix. 22. [NETHANEEL.]

4. (*Nathanias.*) Son of Samael; one of the ancestors of Judith (Jud. viii. 1), and therefore a Simeonite (ix. 2). [E. H. . . . s.]

NATHANI'AS (*Ναθανίας*: om. in Vulg.) = NATHAN of the sons of Bani (1 Esdr. ix. 34; comp. Ezr. x. 39).

NA'THAN-MEL'ECH (נְתַן־מֶלֶךְ: *Ναθὰν Βασιλεύς*: *Nathan-melech*). A eunuch (A. V. "chamberlain") in the court of Josiah, by whose chamber at the entrance to the Temple were the horses which the kings of Judah had dedicated to the sun (2 K. xxiii. 11). The LXX. translate the latter part of the name as an appellative, "Nathan the king."

NA'UM (*Ναούμ*), son of Esli, and father of Amos, in the genealogy of Christ (Luke iii. 25), about contemporary with the high-priesthood of Jason and the reign of Antiochus Epiphanes. The only point to be remarked is the circumstance of the two consecutive names, Naum and Amos, being the same as those of the prophets N. and A. But whether this is accidental or has any peculiar significance is difficult to say. Naum is also a Phoenician proper name (Gesen. *s. v.* and *Mon. Phoen.* p. 134). *Nehemiah* is formed from the same root, נָחַם, "to comfort." [A. C. H.]

NAVE. The heb. גֵּב, *gav*, conveys the notion of convexity or protuberance. It is rendered in A. V. boss of a shield, Job xv. 26; the eyebrow, Lev. xiv. 9; an eminent place, Ez. xvi. 31; once only in plur. naves, *νῶτοι*, radii, 1 K. vii. 33; but in Ez. i. 18 twice, *νῶτοι*, "rings," and marg. "strakes," an old word apparently used both for the nave of a wheel from which the spokes proceed, and also more probably the felloe or the tire, as making the streak or stroke upon the ground. Halliwell, Phillips, Bailey, Ash, *Eng. Dictionaries*, "strake." Gesenius, p. 256, renders curvatura rotarum. [CHARIOT; LAVER; GABBATHA.] [H. W. P.]

NA'VE (*Ναυή*: *Nave*). Joshua the son of Nun is always called in the LXX. "the son of Nave," and this form is retained in Ecclus. xlvi. 1.

NAZARENE (*Ναζωραῖος*, *Ναζαρηνός*), an inhabitant of Nazareth. This appellative is found in the N. T. applied to Jesus by the demons in the synagogue at Capernaum (Mark i. 24; Luke iv. 34); by the people, who so describe him to Bartimeus (Mark x. 47; Luke xviii. 37); by the soldiers who arrested Jesus (John xviii. 5, 7); by the servants at His trial (Matt. xxvi. 71; Mark xiv. 67); by Pilate in the inscription on the cross (John xix. 19); by the disciples on the way to Emmaus (Luke xxiv. 19); by Peter (Acts ii. 22, iii. 6, iv. 10); by Stephen, as reported by the false witness (Acts vi. 14); by the ascended Jesus (Acts xxii. 8); and by Paul (Acts xxvi. 9). This name, made striking in so many ways, and which, if first given in scorn, was adopted and gloried in by the disciples, we are told, in Matt. ii. 23, possesses a prophetic significance. Its application to Jesus, in consequence of the providential arrangements by which His parents were led to take up their abode in Nazareth, was the filling out of the predictions in which the promised Messiah is described as a *Nêtser* (נֵצֶר, i. e. a *shoot, sprout*, of Jesse, a humble and despised descendant of the decayed royal family. Whenever men spoke of Jesus as the Nazarene, they either consciously or unconsciously pronounced one of the names of the predicted Messiah, a name indicative both of his royal descent and his humble condition. This explanation, which Jerome mentions as that given by learned (Christian) Jews in his day, has been adopted by Surenhusius, Fritzsche, Gieseler, Krabbe (*Leben Jesu*), Drechsler (on Is. xi. 1), Schirlitz (*N. T. Wörterb.*), Robinson (*N. T. Lex.*), Hengstenberg (*Christol.*), De Wette, and Meyer. It is confirmed by the following considerations:—(1) *Nêtser*, as Hengstenberg, after de Dieu and others, has proved, was the proper Hebrew name of Nazareth. (2) The reference to the etymological signification of the word is entirely in keeping with Matt. ii. 21-23. (3) The Messiah is expressly called a *Nêtser* in Is. xi. 1. (4) The same thought, and under the same image, although expressed by a different word, is found in Jer. xxiii. 5, xxxiii. 15; Zech. iii. 8, vi. 12, which accounts for the statement of Matthew that this prediction was uttered "by the *prophets*" in the plural.

It is unnecessary therefore to resort to the hypothesis that the passage in Matt. ii. 23 is a quotation from some prophetical book now lost (Chrysost., Theophyl., Clericus), or from some apocryphal book (Ewald), or was a traditional prophecy (Calovius; Alexander, *Connexion and Harmony of the Old and N. T.*), all which suppositions are refuted by the fact that the phrase "by the prophets," in the N. T., refers exclusively to the *canonical* books of the O. T. The explanation of others (Tert., Erasm., Calv., Bez., Grot., Wetstein), according to whom the declaration is that Jesus should be a *Nazarite* (נָזִיר), i. e. one specially *consecrated* or *devoted* to God (Judg. xiii. 5), is inconsistent, to say nothing of other objections, with the Sept. mode of spelling the word, which is generally *Ναζιραῖος*, and never *Ναζωραῖος*. Within the last century the interpretation which finds the key of the passage in the *contempt* in which Nazareth may be supposed to have been held has been widely received. So Paulus, Rosenm., Kuin., Van der Palm., Gersdorf, A. Barnes, Olsh., Davidson, Ebrard, Lange. According to this view the reference is to the *despised condition* of the Messiah, as predicted in Ps. xxii., Is. liii. That idea, however, is more surely an

pressed in the first explanation given, which has also the advantage of recognising the apparent importance attached to the signification of the *name* ("He shall be *called*"). Recently a suggestion which Witsius borrowed from Socinus has been revived by Zuschlag and Riggenbach, that the true word is נְצָרִי or נְצָרִי, *my Saviour*, with reference to Jesus as the Saviour of the world, but without much success. Once (Acts xxiv. 5) the term *Nazarenes* is applied to the followers of Jesus by way of contempt. The name still exists in Arabic as the ordinary designation of Christians, and the recent revolt in India was connected with a pretended ancient prophecy that the *Nazarenes*, after holding power for one hundred years, would be expelled. (Spanheim, *Dubia Evangelica*, ii. 583-648; Wolf, *Curae Philologicae*, i. 46-48; Hengstenberg, *Christology of the O. T.* ii. 106-112; Zuschlag in the *Zeitschrift für die Lutherische Theologie*, 1854, 417-446; Riggenbach in the *Studien und Kritiken*, 1855, 588-612.) [G. E. D.]

NAZ'ARETH (written Ναζαρέτ and Ναζαρέθ) is not mentioned in the Old Testament or in Josephus, but occurs first in Matt. ii. 23, though a town could hardly fail to have existed on so eligible a spot from much earlier times. It derives its celebrity almost entirely from its connexion with the history of Christ, and in that respect has a hold on the imagination and feelings of men which it shares only with Jerusalem and Bethlehem. It is situated among the hills which constitute the south ridges of Lebanon, just before they sink down into the Plain of Esdraelon. Among those hills is a valley which runs in a waving line nearly east and west, about a mile long and, on the average, a quarter of a mile broad, but which at a certain point enlarges itself considerably so as to form a sort of basin. In this basin or enclosure, along the lower edge of the hill-side, lies the quiet secluded village in which the Saviour of men spent the greater part of His earthly existence. The surrounding heights vary in altitude, some of them rise to 400 or 500 feet. They have rounded tops, are composed of the glittering limestone which is so common in that country, and, though on the whole sterile and unattractive in appearance, present not an unpleasing aspect diversified as they are with the foliage of fig-trees and wild shrubs and with the verdure of occasional fields of grain. Our familiar hollyhock is one of the gay flowers which grow wild there. The enclosed valley is peculiarly rich and well cultivated: it is filled with corn-fields, with gardens, hedges of cactus, and clusters of fruit-bearing trees. Being so sheltered by hills, Nazareth enjoys a mild atmosphere and climate. Hence all the fruits of the country,—as pomegranates, oranges, figs, olives,—ripen early and attain a rare perfection.

Of the identification of the ancient site there can be no doubt. The name of the present village is *en-Nâsirah*, the same, therefore, as of old; it is formed on a hill or mountain (Luke iv. 29); it is within the limits of the province of Galilee (Mark i. 9); it is near Cana (whether we assume *Kana* on the east or *Kana* on the north-east as the scene of the first miracle), according to the implication in John ii. 1, 2, 11; a precipice exists in the neighbourhood (Luke iv. 29); and, finally, a series of testimonies (Reland, *Pal.*, 905) reach back to Eusebius, the father of Church history, which represent the place as having occupied an invariable position.

The modern Nazareth belongs to the better class of eastern villages. It has a population of 3000 or 4000, a few are Mohammedans, the rest Latin and Greek Christians. There is one mosque, a Franciscan convent of huge dimensions but displaying no great architectural beauty, a small Maronite church, a Greek church, and perhaps a church or chapel of some of the other confessions. Protestant missions have been attempted, but with no very marked success. Most of the houses are well built of stone, and have a neat and comfortable appearance. As streams in the rainy season are liable to pour down with violence from the hills, every "wise man," instead of building upon the loose soil on the surface, digs deep and lays his foundation upon the rock (ἐπὶ τὴν πέτραν) which is found so generally in that country at a certain depth in the earth. The streets or lanes are narrow and crooked, and after rain are so full of mud and mire as to be almost impassable.

A description of Nazareth would be incomplete without mention of the remarkable view from the tomb of Neby Ismaîl on one of the hills behind the town. It must suffice to indicate merely the objects within sight. In the north are seen the ridges of Lebanon and, high above all, the white top of Hermon; in the west, Carmel, glimpses of the Mediterranean, the bay and the town of Akka; east and south-east are Gilead, Tabor, Gilboa; and south, the Plain of Esdraelon and the mountains of Samaria, with villages on every side, among which are Kana, Nein, Endor, Zerîn (Jezreel), and Tâannuk (Taanach). It is unquestionably one of the most beautiful and sublime spectacles (for it combines the two features) which earth has to show. Dr. Robinson's elaborate description of the scene (*Bib. Res.*, ii. 336, 7) conveys no exaggerated idea of its magnificence or historical interest. It is easy to believe that the Saviour, during the days of His seclusion in the adjacent valley, came often to this very spot and looked forth thence upon those glorious works of the Creator which so lift the soul upward to Him.

The passages of Scripture which refer expressly to Nazareth though not numerous are suggestive and deserve to be recalled here. It was the home of Joseph and Mary (Luke ii. 39). The angel announced to the Virgin there the birth of the Messiah (Luke i. 26-28). The holy family returned thither after the flight into Egypt (Matt. ii. 23). Nazareth is called the native country (ἡ πατρὶς αὐτοῦ) of Jesus: He grew up there from infancy to manhood (Luke iv. 16), and was known through life as "The Nazarene." He taught in the synagogue there (Matt. xiii. 54; Luke iv. 16), and was dragged by His fellow-townsmen to the precipice in order to be cast down thence and be killed (εἰς τὸ κατακρημνίσαι αὐτόν). "Jesus of Nazareth, king of the Jews" was written over His Cross (John xix. 19), and after His ascension He revealed Himself under that appellation to the persecuting Saul (Acts xxii. 8). The place has given name to His followers in all ages and all lands, a name which will never cease to be one of honour and reproach.

The origin of the disrepute in which Nazareth stood (John i. 47) is not certainly known. All the inhabitants of Galilee were looked upon with contempt by the people of Judaea because they spoke a ruder dialect, were less cultivated, and were more exposed by their position to contact with the heathen. But Nazareth laboured under a special opprobrium, for it was a Galilean and not a south

ern Jew who asked the reproachful question, whether "any good thing" could come from that source. The term "good" (ἀγαθόν), having more commonly an ethical sense, it has been suggested that the inhabitants of Nazareth may have had a bad name among their neighbours for irreligion or some laxity of morals. The supposition receives support from the disposition which they manifested towards the person and ministry of our Lord. They attempted to kill Him; they expelled Him twice (for Luke iv. 16-29, and Matt. xiii. 54-58, relate probably to different occurrences) from their borders; they were so wilful and unbelieving that He performed not many miracles among them (Matt. xiii. 58); and, finally, they compelled Him to turn his back upon them and reside at Capernaum (Matt. iv. 13).

It is impossible to speak of distances with much exactness. Nazareth is a moderate journey of three days from Jerusalem, seven hours, or about twenty miles, from Akka or Ptolemais (Acts xxi. 7), five or six hours, or eighteen miles, from the sea of Galilee, six miles west from Mount Tabor, two hours from Cana, and two or three from Endor and Nain. The origin of the name is uncertain. For the conjectures on the subject, see NAZARENE.

We pass over, as foreign to the proper object of this notice, any particular account of the "holy places" which the legends have sought to connect with events in the life of Christ. They are described in nearly all the books of modern tourists; but, having no sure connexion with biblical geography or exegesis, do not require attention here. Two localities, however, form an exception to this statement, inasmuch as they possess, though in different ways, a certain interest which no one will fail to recognise. One of these is the "Fountain of the Virgin," situated at the north-eastern extremity of the town, where, according to one tradition, the mother of Jesus received the angel's salutation (Luke i. 28). Though we may attach no importance to this latter belief, we must, on other accounts, regard the spring with a feeling akin to that of religious veneration. It derives its name from the fact that Mary, during her life at Nazareth, no doubt accompanied often by "the child Jesus," must have been accustomed to repair to this fountain for water, as is the practice of the women of that village at the present day. Certainly, as Dr. Clarke observes (*Travels*, ii. 427), "if there be a spot throughout the holy land that was undoubtedly honoured by her presence, we may consider this to have been the place; because the situation of a copious spring is not liable to change, and because the custom of repairing thither to draw water has been continued among the female inhabitants of Nazareth from the earliest period of its history." The well-worn path which leads thither from the town has been trodden by the feet of almost countless generations. It presents at all hours a busy scene, from the number of those, hurrying to and fro, engaged in the labour of water-carrying. See the engraving, i. 632 of this *Dictionary*.

The other place is that of the attempted Precipitation. We are directed to the true scene of this occurrence, not so much by any tradition as by internal indications in the Gospel history itself. A prevalent opinion of the country has transferred the event to a hill about two miles south-east of the town. But there is no evidence that Nazareth ever occupied a different site from the present one; and that a mob whose determination was to put to death the object of their rage, should repair to a distant a place for that purpose, is entirely incredible. The present village, as already stated, lies along the hill-side, but much nearer the base than the summit. Above the bulk of the town are several rocky ledges over which a person could not be thrown without almost certain destruction. But there is one very remarkable precipice, almost perpendicular and forty or fifty feet high, near the Maronite church, which may well be supposed to be the identical one over which His infuriated townsmen attempted to hurl Jesus.

The singular precision with which the narrative relates the transaction deserves a remark or two. Casual readers would understand from the account that Nazareth was situated on the summit, and that the people brought Jesus down thence to the brow of the hill as if it was between the town and the valley. If these inferences were correct, the narrative and the locality would then be at variance with each other. The writer is free to say that he himself had these erroneous impressions, and was led to correct them by what he observed on the spot. Even Reland (*Pal.* 905) says: "Ναζαρὲθ—urbs aedificata *super ripam*, unde Christum precipitare conati sunt." But the language of the Evangelist, when more closely examined, is found neither to require the inferences in question on the one hand, nor to exclude them on the other. What he asserts is, that the incensed crowd "rose up and cast Jesus out of the city, and brought him to the brow of the hill on which the city was built, that they might cast him down headlong." It will be remarked here, in the first place, that it is not said that the people either went up or descended in order to reach the precipice, but simply that they brought the Saviour to it, wherever it was; and in the second place, that it is not said that the city was built "on the brow of the hill," but equally as well that the precipice was "on the brow," without deciding whether the cliff overlooked the town (as is the fact) or was below it. It will be seen, therefore, how very nearly the terms of the history approach a mistake and yet avoid it. As Paley remarks in another case, none but a true account could advance thus to the very brink of contradiction without falling into it.

The fortunes of Nazareth have been various. Epiphanius states that no Christians dwelt there until the time of Constantine. Helena, the mother of that emperor, is related to have built the first Church of the Annunciation here. In the time of the Crusaders, the Episcopal See of Bethsean was transferred there. The birthplace of Christianity was lost to the Christians by their defeat at Hattin in 1183, and was laid utterly in ruins by Sultan Bibars in 1263. Ages passed away before it rose again from this prostration. In 1620 the Franciscans rebuilt the Church of the Annunciation and connected a cloister with it. In 1799 the Turks assaulted the French general Junot at Nazareth, and shortly after, 2100 French, under Kleber and Napoleon, defeated a Turkish army of 25,000 at the foot of Mount Tabor. Napoleon himself, after that battle, spent a few hours at Nazareth, and reached there the northern limit of his Eastern expedition. The earthquake which destroyed Safed, in 1837, injured also Nazareth. No Jews reside there at present, which may be ascribed perhaps as much to the hostility of the Christian sects as to their own hatred of the prophet who was sent "to redeem Israel." [H. B. H.]

NAZ'ARITE, more properly **NAZ'IRITE** נָזִיר and נְזִיר אֱלֹהִים: ἡγιασμένος and εὐξάμενος, Num. vi.; ναζιραῖος, Judg. xiii. 7, Lam. iv. 7: *Nazaraeus*), one of either sex who was bound by a vow of a peculiar kind to be set apart from others for the service of God. The obligation was either for life or for a defined time. The Mishna names the two classes resulting from this distinction, נזירי עולם, "perpetual Nazarites" (*Nazardei mutivi*), and נזירי ימים, "Nazarites of days" (*Nazaraei votivi*).

I. There is no notice in the Pentateuch of Nazarites for life; but the regulations for the vow of a Nazarite of days are given Num. vi. 1-21.

The Nazarite, during the term of his consecration, was bound to abstain from wine, grapes, with every production of the vine, even to the stones and skin of the grape, and from every kind of intoxicating drink. He was forbidden to cut the hair of his head, or to approach any dead body, even that of his nearest relation. When the period of his vow was fulfilled, he was brought to the door of the tabernacle and was required to offer a he lamb for a burnt-offering, a ewe lamb for a sin-offering, and a ram for a peace-offering, with the usual accompaniments of peace-offerings (Lev. vii. 12, 13) and of the offering made at the consecration of priests (Ex. xxix. 2) "a basket of unleavened bread, cakes of fine flour mingled with oil, and wafers of unleavened bread anointed with oil" (Num. vi. 15). He brought also a meat-offering and a drink-offering, which appear to have been presented by themselves as a distinct act of service (ver. 17). He was to cut off the hair of "the head of his separation" (that is, the hair which had grown during the period of his consecration) at the door of the Tabernacle, and to put it into the fire under the sacrifice on the altar. The priest then placed upon his hands the sodden left shoulder of the ram, with one of the unleavened cakes and one of the wafers, and then took them again and waved them for a wave-offering. These, as well as the breast and the heave, or right shoulder (to which he was entitled in the case of ordinary peace-offerings, Lev. vii. 32-34), were the perquisite of the priest. The Nazarite also gave him a present proportioned to his circumstances (ver. 21).[a]

If a Nazarite incurred defilement by accidentally touching a dead body, he had to undergo certain rites of purification and to recommence the full period of his consecration. On the seventh day of his uncleanness he was to cut off his hair, and on the following day he had to bring two turtle-doves or two young pigeons to the priest, who offered one for a sin-offering and the other for a burnt-offering. He then hallowed his head, offered a lamb of the first year as a trespass-offering, and renewed his vow under the same conditions as it had been at first made.

It has been conjectured that the Nazarite vow was at first taken with some formality, and that it was accompanied by an offering similar to that prescribed at its renewal in the case of pollution. But if any inference may be drawn from the early sections of the Mishnical treatise *Nazir*, it seems probable that the act of self-consecration was a private matter, not accompanied by any prescribed rite.

There is nothing whatever said in the Old Testament of the duration of the period of the vow of the Nazarite of days. According to *Nazir* (cap. i. §3, p. 148) the usual time was thirty days, but double vows for sixty days, and treble vows for a hundred days, were sometimes made (cap. iii. 1-4). One instance is related of Helena, queen of Adiabene (of whom some particulars are given by Josephus *Ant.* xx. 2), who, with the zeal of a new convert, took a vow for seven years in order to obtain the divine favour on a military expedition which her son was about to undertake. When her period of consecration had expired she visited Jerusalem, and was there informed by the doctors of the school of Hillel that a vow taken in another country must be repeated whenever the Nazarite might visit the Holy Land. She accordingly continued a Nazarite for a second seven years, and happening to touch a dead body just as the time was about to expire, she was obliged to renew her vow according to the law in Num. vi. 9, &c. She thus continued a Nazarite for twenty-one years.[b]

There are some other particulars given in the Mishna, which are curious as showing how the institution was regarded in later times. The vow was often undertaken by childless parents in the hope of obtaining children: this may, of course, have been easily suggested by the cases of Manoah's wife and Hannah.—A female Nazarite whose vow was broken might be punished with forty stripes.—The Nazarite was permitted to smooth his hair with a brush, but not to comb it, lest a single hair might be torn out.

II. Of the Nazarites for life three are mentioned in the Scriptures: Samson, Samuel, and St. John the Baptist. The only one of these actually called a Nazarite is Samson. The Rabbis raised the question whether Samuel was in reality a Nazarite.[c] In Hannah's vow, it is expressly stated that no razor should come upon her son's head (1 Sam. i. 11); but no mention is made of abstinence from wine. It is, however, worthy of notice that Philo makes a particular point of this, and seems to refer the words of Hannah, 1 Sam. i. 15, to Samuel himself.[d] In reference to St. John the Baptist, the Angel makes mention of abstinence from wine and strong drink, but not of letting the hair grow (Luke i. 15).

We are but imperfectly informed of the differences between the observances of the Nazarite for life and those of the Nazarite for days. The later Rabbis slightly notice this point.[e] We do not know whether the vow for life was ever voluntarily taken by the individual. In all the cases mentioned in the sacred history, it was made by the parents before the birth of the Nazarite himself. According to the general law of vows (Num. xxx. 8), the mother could not take the vow without the father, and this is expressly applied to the Nazarite vow in the Mishna.[f] Hannah must therefore either have presumed on her husband's concurrence, or secured it beforehand.

[a] It is said that at the south-east corner of the court of the women, in Herod's temple, there was an apartment appropriated to the Nazarites, in which they used to boil their peace-offerings and cut off their hair. Lightfoot. *Prospect of the Temple*, c. xvii; Reland, *A. S.* p. . c. 8, §11

[b] *Nazir*, cap 3, §6, p. 15

[c] *Nazir*, cap. 9, §5, with Bartenora's note, p. 178.

[d] Διὰ τοῦτο ὁ καὶ βασιλέων καὶ προφητῶν μέγιστος Σαμουὴλ οἶνον καὶ μέθυσμα, ὡς ὁ ἱερὸς λόγος φησὶν ἄχρι τελευτῆς οὐ πίεται.—Phil. *de Ebrietate*. vol. i. p 379, edit. Mangey.

[e] See *Pesikta*, quoted by Drusius on Num. vi.

[f] *Nazir*, cap. 4, §6, p. 156.

The Mishna[g] makes a distinction between the ordinary Nazarite for life and the Samson-Nazarite (נְזִיר שִׁמְשׁוֹן). The former made a strong point of his purity, and, if he was polluted, offered corban. But as regards his hair, when it became inconveniently long, he was allowed to trim it, if he was willing to offer the appointed victims (Num. vi. 14). The Samson-Nazarite, on the other hand, gave no corban if he touched a dead body, but he was not suffered to trim his hair under any conditions. This distinction, it is pretty evident, was suggested by the freedom with which Samson must have come in the way of the dead (Judg. xv. 16, &c.), and the terrible penalty which he paid for allowing his hair to be cut.

III. The consecration of the Nazarite bore a striking resemblance to that of the high-priest (Lev. xxi. 10-12). In one particular, this is brought out more plainly in the Hebrew text than it is in our version, in the LXX., or in the Vulgate. One word (נֵזֶר),[h] derived from the same root as Nazarite, is used for the long hair of the Nazarite, Num. vi. 19, where the A. V. has "hair of his separation," and for the anointed head of the high-priest, Lev. xxi. 12, where it is rendered "crown." The Mishna points out the identity of the law for both the high-priest and the Nazarite in respect to pollution, in that neither was permitted to approach the corpse of even the nearest relation, while for an ordinary priest the law allowed more freedom (Lev. xxi. 2). And Maimonides (*More Nevochim*, iii. 48) speaks of the dignity of the Nazarite, in regard to his sanctity, as being equal to that of the high-priest. The abstinence from wine enjoined upon the high-priest on behalf of all the priests when they were about to enter upon their ministrations, is an obvious, but perhaps not such an important point in the comparison. There is a passage in the account given by Hegesippus of St. James the Just (Eusebius, *Hist. Ecc.* ii. 23), which, if we may assume it to represent a genuine tradition, is worth a notice, and seems to show that Nazarites were permitted even to enter into the Holy of Holies. He says that St. James was consecrated from his birth neither to eat meat, to drink wine, to cut his hair, nor to indulge in the use of the bath, and that to him alone it was permitted (*τούτῳ μόνῳ ἐξῆν*) to enter the sanctuary. Perhaps it would not be unreasonable to suppose that the half sacerdotal character of Samuel might have been connected with his prerogative as a Nazarite. Many of the Fathers designate him as a priest, although St. Jerome, on the obvious ground of his descent, denies that he had any sacerdotal rank.[i]

IV. Of the two vows recorded of St. Paul, that in Acts xviii. 18,[k] certainly cannot be regarded as a regular Nazarite vow. All that we are told of it is that, on his way from Corinth to Jerusalem, he "shaved his head in Cenchreæ, for he had a vow." It would seem that the cutting off the hair was at the commencement of the period over which the vow extended; at all events, the hair was not cut off at the door of the Temple when the sacrifices were offered, as was required by the law of the Nazarite. It is most likely that it was a sort of vow, modified from the proper Nazarite vow, which had come into use at this time amongst the religious Jews who had been visited by sickness, or any other calamity. In reference to a vow of this kind which was taken by Bernice, Josephus says that "they were accustomed to vow that they would refrain from wine, and that they would cut off their hair thirty days before the presentation of their offering."[l] No hint is given us of the purpose of St. Paul in this act of devotion. Spencer conjectures that it might have been performed with a view to obtain a good voyage;[m] Neander, with greater probability, that it was an expression of thanksgiving and humiliation on account of some recent illness or affliction of some kind.

The other reference to a vow taken by St. Paul is in Acts xxi. 24, where we find the brethren at Jerusalem exhorting him to take part with four Christians who had a vow on them, to sanctify (not *purify*, as in A. V.) himself with them, and to be at charges with them, that they might shave their heads. The reason alleged for this advice is that he might prove to those who misunderstood him, that he walked orderly and kept the law. Now it cannot be doubted that this was a strictly legal Nazarite vow. He joined the four men for the last seven days of their consecration, until the offering was made for each one of them, and their hair was cut off in the usual form (ver. 26. 27). It appears to have been no uncommon thing for those charitable persons who could afford it to assist in paying for the offerings of poor Nazarites. Josephus relates that Herod Agrippa I., when he desired to show his zeal for the religion of his fathers, gave direction that many Nazarites should have their heads shorn:[n] and the Gemara (quoted by Reland, *Ant. Sac.*), that Alexander Jannæus contributed towards supplying nine hundred victims for three hundred Nazarites.

V. That the institution of Nazaritism existed and had become a matter of course amongst the Hebrews before the time of Moses is beyond a doubt. The legislator appears to have done no more than ordain such regulations for the vow of the Nazarite of days as brought it under the cognizance of the priest and into harmony with the general system of religious observance. It has been assumed, not unreasonably, that the consecration of the Nazarite for life was of at least

[g] *Nasir*, cap. 1, §2, p. 147.

[h] The primary meaning of this word is that of separation with a holy purpose. Hence it is used to express the consecration of the Nazarite (Num. vi. 4, 5, 9). But it appears to have been especially applied to a badge of consecration and distinction worn on the head, such as the crown of a king (2 Sam. i. 10; 2 K. xi. 12), the diadem (צִיץ) of the high-priest (Ex. xxix. 6, xxxix. 30), as well as his anointed hair, the long hair of the Nazarite, and, dropping the idea of consecration altogether, to long hair in a general sense (Jer. vii. 29). This may throw light on Gen. xlix. 26 and Deut. xxxiii. 16. See section VI. of this article.

J. C. Ortlob, in an essay in the *Thesaurus Novus Theologico-Philologicus*, vol. i. p. 587, entitled "Samuel Judex et Propheta, non Pontifex aut sacerdos sacrificans," has brought forward a mass of testimony on this subject.

[i] Grotius, Meyer, Howson, and a few others, refer this vow to Aquila, not to St. Paul. The best arguments in favour of this view are given by Mr. Howson (*Life of St. Paul*, vol. i. p. 453). Dean Alford, in his note on Acts xviii. 18, has satisfactorily replied to them.

[l] See Neander's *Planting and Training the Church*, i. 208 (Ryland's translation). In the passage translated from Joseph. *B. J.* ii. 15. §1, an emendation of Neander's is adopted. See also Kuinoel on Acts xviii. 18.

[m] *De Leg. Hebr.* lib. iii. c. vi. §1.

[n] *Antiq.* xix. 6, §1.

equal antiquity.[a] It may not have needed any notice or modification in the law, and hence, probably, the silence respecting it in the Pentateuch. But it is doubted in regard to Nazaritism in general, whether it was of native or foreign origin. Cyril of Alexandria considered that the letting the hair grow, the most characteristic feature in the vow, was taken from the Egyptians. This notion has been substantially adopted by Fagius,[b] Spencer,[c] Michaelis,[d] Hengstenberg,[e] and some other critics. Hengstenberg affirms that the Egyptians and the Hebrews were distinguished amongst ancient nations by cutting their hair as a matter of social propriety; and thus the marked significance of long hair must have been common to them both. The arguments of Bähr, however, to show that the wearing long hair in Egypt and all other heathen nations had a meaning opposed to the idea of the Nazarite vow, seem to be conclusive;[f] and Winer justly observes that the points of resemblance between the Nazarite vow and heathen customs are too fragmentary and indefinite to furnish a safe foundation for an argument in favour of a foreign origin for the former.

Ewald supposes that Nazarites for life were numerous in very early times, and that they multiplied in periods of great political and religious excitement. The only ones, however, expressly named in the Old Testament are Samson and Samuel. The rabbinical notion that Absalom was a Nazarite seems hardly worthy of notice, though Spencer and Lightfoot have adopted it.[g] When Amos wrote, the Nazarites, as well as the prophets, suffered from the persecution and contempt of the ungodly. The divine word respecting them was, "I raised up of your sons for prophets and of your young men for Nazarites. But ye gave the Nazarites wine to drink, and commanded the prophets, saying, Prophesy not" (Am. ii. 11, 12). In the time of Judas Maccabaeus we find the devout Jews, when they were bringing their gifts to the priests, stirring up the Nazarites of days who had completed the time of their consecration, to make the accustomed offerings (1 Macc. iii. 49). From this incident, in connexion with what has been related of the liberality of Alexander Jannaeus and Herod Agrippa, we may infer that the number of Nazarites must have been very considerable during the two centuries and a half which preceded the destruction of Jerusalem. The instance of St. John the Baptist and that of St. James the Just (if we accept the traditional account) show that the Nazarite for life retained his original character till later times; and the act of St. Paul in joining himself with the four Nazarites at Jerusalem seems to prove that the vow of the Nazarite of days was as little altered in its important features.

VI. The word נָזִיר occurs in three passages of the Old Testament, in which it appears to mean one separated from others as a prince. Two of the passages refer to Joseph: one is in Jacob's benediction of his sons (Gen. xlix. 26), the other in Moses' benediction of the tribes (Deut. xxxiii. 16). As these texts stand in our version, the blessing is spoken of as falling "on the crown of the head of him who was separated from his brethren." The LXX. render the words in one place, ἐπὶ κορυφῆς ὃν ἡγήσατο ἀδελφῶν, and in the other ἐπὶ κορυφὴν δοξασθέντος ἐν ἀδελφοῖς. The Vulgate translates them in each place "in vertice Nazaraei inter fratres." The expression is strikingly like that used of the high-priest (Lev. xxi. 10-12), and seems to derive illustration from the use of the word נֵזֶר.[h]

The third passage is that in which the prophet is mourning over the departed prosperity and beauty of Sion (Lam. iv. 7, 8). In the A. V. the words are "Her Nazarites were purer than snow, they were whiter than milk, they were more ruddy in body than rubies, their polishing was of sapphire, their visage is blacker than a coal, they are not known in the streets, their skin cleaveth to their bones, it is withered, it is become like a stick." In favour of the application of this passage to the Nazarites are the renderings of the LXX., the Vulg., and nearly all the versions. But Gesenius, de Wette, and other modern critics think that it refers to the young princes of Israel, and that the word נָזִיר is used in the same sense as it is in regard to Joseph, Gen. xlix. 26 and Deut. xxxiii. 16.

VII. The vow of the Nazarite of days must have been a self-imposed discipline, undertaken with a specific purpose. The Jewish writers mostly regarded it as a kind of penance, and hence accounted for the place which the law regulating it holds in Leviticus immediately after the law relating to adultery.[i] As the quantity of hair which grew within the ordinary period of a vow could not have been very considerable, and as a temporary abstinence from wine was probably not a more noticeable thing amongst the Hebrews than it is in modern society, the Nazarite of days might have fulfilled his vow without attracting much notice until the day came for him to make his offering in the Temple.

But the Nazarite for life, on the other hand, must have been, with his flowing hair and persistent refusal of strong drink, a marked man. Whether in any other particular his daily life was peculiar is uncertain.[k] He may have had some privileges (as we have seen) which gave him something of a priestly character, and (as it has been conjectured) he may have given up much of his time to sacred studies.[l] Though not necessarily cut off from social life, when the turn of his mind was devotional, consciousness of his peculiar dedication must have influenced his habits and manner, and in some cases probably led him to retire from the world.

But without our resting on anything that may be called in question, he must have been a public

[a] Ewald seems to think that it was the more ancient of the two (*Alterthümer*, p. 96).

[g] Spencer, *De Leg. Hebr.* lib. iii. c. vi. §1. Lightfoot, *Exercit.* on 1 Cor. xi. 14. Some have imagined that Jephthah's daughter was consigned to a Nazarite vow by her father. See Carpzov, p. 156.

[h] See note [b] p. 472.

[i] Maimonides, *Mor. Nev.* ii. 48.

[k] Nicolas Fuller has discussed the subject of the dress of the Nazarites (as well as of the prophets) in his *Miscellanea Sacra*. See *Critici Sacri*, vol. ix. p. 1023. Those who have imagined that the Nazarites wore a peculiar dress, doubt whether it was of royal purple, of goat's hair-cloth (like St. John's), or of some white material

[l] Vatablus on Num. vi. (*Critici Sacri*).

witness for the idea of legal strictness and of whatever else Nazaritism was intended to express: and as the vow of the Nazarite for life was taken by his parents before he was conscious of it, his observance of it was a sign of filial obedience, like the peculiarities of the Rechabites.

The meaning of the Nazarite vow has been regarded in different lights. Some consider it as a symbolical expression of the Divine nature working in man, and deny that it involved anything of a strictly ascetic character; others see in it the principle of stoicism, and imagine that it was intended to cultivate, and bear witness for, the sovereignty of the will over the lower tendencies of human nature: while some regard it wholly in the light of a sacrifice of the person to God.

(*a.*) Several of the Jewish writers have taken the first view more or less completely. Abarbanel imagined that the hair represents the intellectual power, the power belonging to the head, which the wise man was not to suffer to be diminished or to be interfered with, by drinking wine or by any other indulgence; and that the Nazarite was not to approach the dead because he was appointed to bear witness to the eternity of the divine nature.[b] Of modern critics, Bähr appears to have most completely trodden in the same track.[c] While he denies that the life of the Nazarite was, in the proper sense, ascetic, he contends that his abstinence from wine,[d] and his not being allowed to approach the dead, figured the separation from other men which characterises the consecrated servant of the Lord; and that his long hair signified his holiness. The hair, according to his theory, as being the bloom of manhood, is the symbol of growth in the vegetable as well as the animal kingdom, and therefore of the operation of the Divine power.[e]

(*b.*) But the philosophical Jewish doctors, for the most part, seem to have preferred the second view. Thus Bechai speaks of the Nazarite as a conqueror who subdued his temptations, and who wore his long hair as a crown, "quod ipse rex sit cupiditatibus imperans praeter morem reliquorum hominum, qui cupiditatum sunt servi."[f] He supposed that the hair was worn rough, as a protest against foppery.[g] But others, still taking it as a regal emblem, have imagined that it was kept elaborately dressed, and fancy that they see a proof of the existence of the custom in the seven locks of Samson (Judg. xvi. 13-19).[h]

(*c.*) Philo has taken the deeper view of the subject. In his work, *On Animals fit for sacrifice*,[i] he gives an account of the Nazarite vow, and calls it ἡ εὐχὴ μεγάλη. According to him the Nazarite did not sacrifice merely his possessions but his person, and the act of sacrifice was to be performed in the completest manner. The outward observances enjoined upon him were to be the genuine expressions of his spiritual devotion. To represent spotless purity within, he was to shun defilement from the dead, at the expense even of the obligation of the closest family ties. As no spiritual state or act can be signified by any single symbol, he was to identify himself with each one of the three victims which he had to offer as often as he broke his vow by accidental pollution, or when the period of his vow came to an end. He was to realise in himself the ideas of the whole burnt-offering, the sin-offering, and the peace-offering. That no mistake might be made in regard to the three sacrifices being shadows of one and the same substance, it was ordained that the victims should be individuals of one and the same species of animal. The shorn hair was put on the fire of the altar in order that, although the divine law did not permit the offering of human blood, something might be offered up actually a portion of his own person. Ewald, following in the same line of thought, has treated the vow of the Nazarite as an act of self-sacrifice; but he looks on the preservation of the hair as signifying that the Nazarite is so set apart for God, that no change or diminution should be made in any part of his person, and as serving to himself and the world for a visible token of his peculiar consecration to Jehovah.[k]

That the Nazarite vow was essentially a sacrifice of the person to the Lord is obviously in accordance with the terms of the Law (Num. vi. 2). In the old dispensation it may have answered to that "living sacrifice, holy, acceptable unto God," which the believer is now called upon to make. As the Nazarite was a witness for the straitness of the law, as distinguished from the freedom of the Gospel, his sacrifice of himself was a submission to the letter of a rule. Its outward manifestations were restraints and eccentricities. The man was separated from his brethren that he might be peculiarly devoted to the Lord. This was consistent with the purpose of divine wisdom for the time for which it was ordained. Wisdom, we are told, was justified of her child in the life of the great Nazarite who preached the baptism of repentance when the Law was about to give way to the Gospel. Amongst those born of women, no greater than he had arisen, "but he that is least in the kingdom of Heaven is greater than he." The sacrifice which the believer now makes of himself is not to cut him off from his brethren, but to unite him more closely with them; not to subject him to an outward bond, but to confirm him in the liberty with which Christ has made him free. It is not without significance that wine under the Law was strictly forbidden to the priest who was engaged in the service of the sanctuary, and to the few whom the Nazarite vow bound to the special service of the Lord; while in the Church of Christ it is consecrated for the use of every believer to whom the command has come, "drink ye all of this."[m]

[b] Quoted by De Muis on Num. vi. (*Critici Sacri*).

[c] *Symbolik*, vol. ii. p. 416-430.

[d] He will not allow that this abstinence at all resembled in its meaning that of the priests, when engaged in their ministrations, which was intended only to secure strict propriety in the discharge of their duties.

[e] Bähr defends this notion by several philological arguments, which do not seem to be much to the point. The nearest to the purpose is that derived from Lev. xxv. 5, where the unpruned vines of the sabbatical year are called Nazarites. But this, of course, can be well explained as a metaphor from unshorn hair.

[f] Carpzov, *App. Crit.* p. 152. Abenezra uses very similar language (*Drusius*, on Num. vi. 7)

[g] This was also the opinion of Lightfoot, *Hor.* on 1 Cor. xi. 14, and *Sermon* on Judg. xi. 39.

[h] Spencer, *De Leg. Hebr.* iii. vi. §1.

[i] *Opera*, vol. ii. p. 249 (ed. Mangey.)

[k] Lightfoot is inclined to favour certain Jewish writers who identify the vine with the tree of knowledge of good and evil, and to connect the Nazarite law with the condition of Adam before he fell (*Harmon. in Luc.* i. 15). This strange notion is made still more fanciful by Magee (*Atonement and Sacrifice*, Illustration xxxviii.).

[m] This consideration might surely have furnished St. Jerome with a better answer to the Tatianists, who alleged Amos ii. 12 in defence of their abstinence from wine, than his bitter taunt that they were bringing "Je

Carpzov, *Apparatus Criticus*, p. 148; Reland, *Ant. Sacras*, p. II. c. 10; Meinuard, *Pauli Nazirasatus* (*Thesaurus Theologico-philologicus*, ii. 473). The notes of De Muis and Drusius on Num. vi. (*Critici Sacri*); the notes of Grotius on Luke i. 15, and Kuinoel on Acts xviii. 18; Spencer, *De Legibus Hebraeorum*, lib. iii. cap. vi. §1; Michaelis, *Commentaries on the Laws of Moses*, Book iii. §145; the Mishnical treatise *Nazir*, with the notes in Surenhusius' *Mishna*, iii. 146, &c.; Bähr, *Symbolik*, ii. 416–430; Ewald, *Alterthümer*, p. 96; also *Geschichte*, ii. 43. Carpzov mentions with praise *Nazirasus, seu Commentarius literalis et mysticus in Legem Nazirasorum*, by Cremer. The essay of Meinhard contains a large amount of information on the subject, besides what bears immediately on St. Paul's vows. Spencer gives a full account of heathen customs in dedicating the hair. The Notes of De Muis contain a valuable collection of Jewish testimonies on the meaning of the Nazarite vow in general. Those of Grotius relate especially to the Nazarites' abstinence from wine. Hengstenberg (*Egypt and the Books of Moses*, p. 190, English translation) confutes Bähr's theory. [S. C.]

NE'AH (נְעִיאָה, with the def. article: Vat. omits; Alex. Αννοα:[a] *Anea*), a place which was one of the landmarks on the boundary of Zebulun (Josh. xix. 13 only). By Eusebius and Jerome (*Onomast.* "Anua") it is mentioned merely with a caution that there is a place of the same name, 10 miles S. of Neapolis. It has not yet been identified even by Schwarz. If *el Mezhhad*, about 2½ miles E. of *Seffurieh*, be GATH-HEPHER, and *Rummaneh* about 4 miles N.E. of the same place, RIMMON, then Neah must probably be sought somewhere to the north of the last named town. [G.]

NEAP'OLIS (Νεάπολις) is the place in northern Greece where Paul and his associates first landed in Europe (Acts xvi. 11); where, no doubt, he landed also on his second visit to Macedonia (Acts xx. 1), and whence certainly he embarked on his last journey through that province to Troas and Jerusalem (Acts xx. 6). Philippi being an inland town, Neapolis was evidently the port; and hence it is accounted for, that Luke leaves the verb which describes the voyage from Troas to Neapolis (εὐθυδρομήσαμεν), to describe the continuance of the journey from Neapolis to Philippi. It has been made a question whether this harbour occupied the site of the present Kavalla, a Turkish town on the coast of Roumelia, or should be sought at some other place. Cousinéry (*Voyage dans la Macédoine*) and Tafel (*De Via Militari Romanorum Egnatia*, &c.) maintain, against the common opinion, that Luke's Neapolis was not at Kavalla, the inhabited town of that name, but at a deserted harbour ten or twelve miles further west, known as Eski or Old Kavalla. Most of those who contend for the other identification assume the point without much discussion, and the subject demands still the attention of the biblical geographer. It may be well, therefore, to mention with some fulness the reasons which support the claim of Kavalla to be regarded as the ancient Neapolis, in opposition to those which are urged in favour of the other harbour.

First, the Roman and Greek ruins at Kavalla prove that a port existed there in ancient times. Neapolis, wherever it was, formed the point of contact between Northern Greece and Asia Minor, at a period of great commercial activity, and would be expected to have left vestiges of its former importance. The antiquities found still at Kavalla fulfil entirely that presumption. One of these is a massive aqueduct, which brings water into the town from a distance of ten or twelve miles north of Kavalla, along the slopes of Symbolum. It is built on two tiers of arches, a hundred feet long and eighty feet high, and is carried over the narrow valley between the promontory and the mainland. The upper part of the work is modern, but the substructions are evidently Roman, as is seen from the composite character of the material, the cement, and the style of the masonry. Just out of the western gate are two marble sarcophagi, used as watering-troughs, with Latin inscriptions, of the age of the emperor Claudius. Columns with chaplets of elegant Ionic workmanship, blocks of marble, fragments of hewn stone, evidently antique, are numerous both in the town and the suburbs. On some of these are inscriptions, mostly in Latin, but one at least in Greek. In digging for the foundation of new houses the walls of ancient ones are often brought to light, and sometimes tablets with sculptured figures, which would be deemed curious at Athens or Corinth. For fuller details, see *Bibliotheca Sacra*, October, 1860. On the contrary, no ruins, have been found at Eski Kavalla, or Paleopoli, as it is also called, which can be pronounced unmistakeably ancient. No remains of walls, no inscriptions, and no indications of any thoroughfare leading thence to Philippi, are reported to exist there. Cousinéry, it is true, speaks of certain ruins at the place which he deems worthy of notice; but according to the testimony of others these ruins are altogether inconsiderable, and, which is still more decisive, are modern in their character.[b] Cousinéry himself, in fact, corroborates this, when he says that on the isthmus which binds the peninsula to the main land, "*on trouve les ruines de l'ancienne Néapolis ou celles d'un château reconstruit dans le moyen âge.*"[c] It appears that a mediaeval or Venetian fortress existed there; but as far as is yet ascertained, nothing else has been discovered, which points to an earlier period.

Secondly, the advantages of the position render Kavalla the probable site of Neapolis. It is the first convenient harbour south of the Hellespont, on coming from the east. Thasos serves as a natural landmark. Tafel says, indeed, that Kavalla has no port, or one next to none; but that is incorrect. The fact that the place is now the seat of an active commerce proves the contrary. It lies open some-

daicas fabulas" into the church, and that they were wound, on their own ground, neither to cut their hair, to eat grapes or raisins, or to approach the corpse of a dead parent (in *Amos* ii. 12).

[a] This is the reading of the text of the Vulgate given in the Benedictine Edition of Jerome. The ordinary copies have Ana.

[b] Colonel Leake did not visit either this Kavalla or the other, and his assertion that there are "the ruins of a Greek city" there (which he supposes, however, to have been Galepsus, and not Neapolis) appears to rest on Cousinéry's statement. But as involving this claim of Eski Kavalla in still greater doubt, it may be added that the situation of Galepsus itself is quite uncertain. Dr. Arnold (note on Thucyd. iv. 107) places it near the mouth of the Strymon, and hence much further west than Leake supposes. According to Cousinéry, Galepsus is to be sought at Kavalla.

[c] On p. 119 he says again: "Les ruines de l'ancienne ville de Néapolis se composent principalement des restes d'un château du moyen âge entièrement abandonné et peu accessible."

what to the south and south-west, but is otherwise well sheltered. There is no danger in going into the harbour. Even a rock which lies off the point of the town has twelve fathoms alongside of it. The bottom affords good anchorage; and although the bay may not be so large as that of Eski Kavalla, it is ample for the accommodation of any number of vessels which the course of trade or travel between Asia Minor and Northern Greece would be likely to bring together there at any one time.

Thirdly, the facility of intercourse between this port and Philippi shows that Kavalla and Neapolis must be the same. The distance is ten miles, and hence not greater than Corinth was from Cenchreae, and Ostia from Rome. Both places are in sight at once from the top of Symbolum. The distance between Philippi and Eski Kavalla must be nearly twice as great. Nature itself has opened a passage from the one place to the other. The mountains which guard the plain of Philippi on the coast-side fall apart just behind Kavalla, and render the construction of a road there entirely easy. No other such defile exists at any other point in this line of formidable hills. It is impossible to view the configuration of the country from the sea, and not feel at once that the only natural place for crossing into the interior is this break-down in the vicinity of Kavalla.

Fourthly, the notices of the ancient writers lead us to adopt the same view. Thus Dio Cassius says (*Hist. Rom.* xlvii. 35) that Neapolis was opposite Thasos (*κατ' ἀντιπέρας Θάσου*), and that is the situation of Kavalla. It would be much less correct, if correct at all, to say that the other Kavalla was so situated, since no part of the island extends so far to the west. Appian says (*Bell. Civ.* iv. 106) that the camp of the Republicans near the Gangas, the river (*παραμὸς*) at Philippi, was nine Roman miles from their triremes at Neapolis (it was considerably further to the other place), and that Thasos was twelve Roman miles from their naval station (so we should understand the text); the latter distance appropriate again to Kavalla, but not to the harbour further west.

Finally, the ancient Itineraries support entirely the identification in question. Both the Antonine and the Jerusalem Itineraries show that the Egnatian Way passed through Philippi. They mention Philippi and Neapolis as next to each other in the order of succession; and since the line of travel which these Itineraries sketch was the one which led from the west to Byzantium, or Constantinople, it is reasonable to suppose that the road, after leaving Philippi, would pursue the most convenient and direct course to the east which the nature of the country allows. If the road, therefore, was constructed on this obvious principle, it would follow the track of the present Turkish road, and the next station, consequently, would be Neapolis, or Kavalla, on the coast, at the termination of the only natural defile across the intervening mountains. The distance, as has been said, is about ten miles. The Jerusalem Itinerary gives the distance between Philippi and Neapolis as ten Roman miles, and the Antonine Itinerary as twelve miles. The difference in the latter case is unimportant, and not greater than in some other instances where the places in the two Itineraries are unquestionably the same. It must be several miles further than this from Philippi to Old Kavalla, and hence the Neapolis of the Itineraries could not be at that point. The theory of Tafel is, that Akontisma or Herkontrouia (the same place, without doubt), which the Itineraries mention next to Neapolis, was at the present Kavalla, and Neapolis at Leuter or Eski Kavalla. This theory, it is true, arranges the places in the order of the Itineraries; but, as Leake objects, there would be a needless detour of nearly twenty miles, and that through a region much more difficult than the direct way. The more accredited view is that Akontisma was beyond Kavalla, further east.

Neapolis, therefore, like the present Kavalla, was on a high rocky promontory which juts out into the Aegean. The harbour, a mile and a half wide at the entrance, and half a mile broad, lies on the west side. The indifferent roadstead on the east should not be called a harbour. Symbolum, 1670 feet high, with a defile which leads into the plain of Philippi, comes down near to the coast a little to the west of the town. In winter the sun sinks behind Mount Athos in the south-west as early as 4 o'clock P.M. The land along the eastern shore is low, and otherwise unmarked by any peculiarity. The island of Thasos bears a little to the S.E., twelve or fifteen miles distant. Plane-trees just beyond the walls, not less than four or five hundred years old, cast their shadow over the road which Paul followed on his way to Philippi. Kavalla has a population of five or six thousand, nine-tenths of whom are Mussulmans, and the rest Greeks. For fuller or supplementary information, see *Bibloth. Sacra*, as above, and also *Dict. of Geog.* ii. p. 411.

For Neapolis as the Greek name of Shechem, now *Nabulus*, see SHECHEM. [H. B. H.]

NEARI'AH (נְעַרְיָה: *Νεαρία*: *Noarias*). 1. One of the six sons of Shemaiah in the line of the royal family of Judah after the captivity (1 Chr. iii. 22, 23).

2. A son of Ishi, and one of the captains of the 500 Simeonites who, in the days of Hezekiah, drove out the Amalekites from Mount Seir (1 Chr. iv. 42).

NEBA'I (נֹבַי; Keri, נִיבַי: *Ναβαΐ*: *Nebai*). A family of the heads of the people who signed the covenant with Nehemiah (Neh. x. 19). The LXX. followed the written text, while the Vulgate adopted the reading of the margin.

NEBAI'OTH, NEBAJ'OTH (נְבָיוֹת: *Ναβαίθ*: *Nabajoth*), the "first-born of Ishmael" (Gen. xxv. 13; 1 Chr. i. 29), and father of a pastoral tribe named after him, the "rams of Nebaioth" being mentioned by the prophet Isaiah (lx. 7) with the flocks of Kedar. From the days of Jerome (*Comment. in Gen.* xx. 13), this people had been identified with the Nabathaeans, until M. Quatremère first investigated the origin of the latter, their language, religion, and history; and by the light he threw on a very obscure subject enabled us to form a clearer judgment respecting this ancient identification than was, in the previous state of knowledge, possible. It will be convenient to recapitulate, briefly, the results of M. Quatremère's labours, with those of the later works of M. Chwolson and others on the same subject, before we consider the grounds for identifying the Nabathaeans with Nebaioth.

From the works of Arab authors, M. Quatremère (*Mémoire sur les Nabatéens*, Paris, 1835, reprinted from the *Nouveau Journ. Asiat.* Jan.–Mar., 1835) proved the existence of a nation called Nabat (نبط), or Nabeet (نبيط), pl. Anbat (انباط).

(*Sidi* and *Kámoos*), reputed to be of ancient origin, of whom scattered remnants existed in Arab times, after the era of the Flight. The Nabat, in the days of their early prosperity, inhabited the country chiefly between the Euphrates and the Tigris, Beyn en Nahreyn and El-Irák (the Mesopotamia and Chaldæa of the classics). That this was their chief seat and that they were Aramaeans, or more accurately Syro-Chaldaeans, seems, in the present state of the inquiry (for it will presently be seen that, by the publication of Oriental texts, our knowledge may be very greatly enlarged) to be a safe conclusion. The Arabs loosely apply the name Nabat to the Syrians, or especially the eastern Syrians, to the Syro-Chaldaeans, &c. Thus El-Mes'oodee (*ap.* Quatremère, *l. c.*) says, "The Syrians are the same as the Nabathaeans (Nabat). . . . The Nimrods were the kings of the Syrians whom the Arabs call Nabathaeans. . . . The Chaldaeans are the same as the Syrians, otherwise called Nabat (*Kitáb et-Tenbeeh*). The Nabathaeans . . . founded the city of Babylon. . . . The inhabitants of Nineveh were part of those whom we call Nabeet or Syrians, who form one nation and speak one language; that of the Nabeet differs only in a small number of letters; but the foundation of the language is identical" (*Kitáb Murooj-edh-Dhahab*). These, and many other fragmentary passages, prove sufficiently the existence of a great Aramaean people called Nabat, celebrated among the Arabs for their knowledge of agriculture, and of magic, astronomy, medicine, and science (so called) generally. But we have stronger evidence to this effect. Quatremère introduced to the notice of the learned world the most important relic of that people's literature, a treatise on Nabat agriculture. A study of an imperfect copy of that work, which unfortunately was all he could gain access to, induced him to date it about the time of Nebuchadnezzar, or *cir.* B.C. 600. M. Chwolson, professor of Oriental languages at St. Petersburg, who had shown himself fitted for the inquiry by his treatise on the Sabians and their religion (*Die Ssabier und der Ssabismus*), has since made that book a subject of special study; and in his *Remains of Ancient Babylonian Literature in Arabic Translations* (*Ueber die Ueberreste der Alt-Babylonischen Literatur in Arabischen Uebersetzungen*, St. Petersburg, 1859), he has published the results of his inquiry. Those results, while they establish all M. Quatremère had advanced respecting the existence of the Nabat, go far beyond him both in the antiquity and the importance M. Chwolson claims for that people. Ewald, however, in 1857, stated some grave causes for doubting this antiquity, and again in 1859 (both papers appeared in the *Goettingische gelehrte Anzeigen*) repeated moderately but decidedly his misgivings. M. Renan followed on the same side (*Journ. de l'Institut*, Ap.–May, 1860); and more recently, M. de Gutschmid (*Zeitschrift d. Deutsch. Morgenländ. Gesellschaft*, XV. 1-100) has attacked the whole theory in a lengthy essay. The limits of this Dictionary forbid us to do more than recapitulate, as shortly as possible, the bearings of this remarkable inquiry, as far as they relate to the subject of the article.

The remains of the literature of the Nabat consist of four works, one of them a fragment:—the 'Book of Nabat Agriculture' (already mentioned); the Book of Poisons;' the 'Book of Tenkelooshà the Babylonian;' and the 'Book of the Secrets of the Sun and Moon' (Chwolson, *Ueberreste*, p. 10, 11). They purport to have been translated, in the year 904, by Aboo-Bekr Ahmad Ibn-'Alee the Chaldæan of Kisseen,[a] better known as *Ibn-Wahsheeyeh*. The 'Book of Nabat Agriculture' was, according to the Arab translator, commenced by Daghreeth, continued by Yánbushádh, and completed by Kuthámee. Chwolson, disregarding the dates assigned to these authors by the translator, thinks that the earliest lived some 2500 years B.C., the second some 300 or 400 years later, and Kuthámee, to whom he ascribes the chief authorship (Ibn-Wahsheeyeh says he was little more than editor), at the earliest under the 6th king of a Canaanite dynasty mentioned in the book, which dynasty Chwolson—with Bunsen—makes the same as the 5th (or Arabian) dynasty of Berosus (Chwolson, *Ueberreste*, 68, &c.; Bunsen, *Egypt*, iii. 432, &c., Cory's *Ancient Fragments*, 2nd ed. p. 60), or of the 13th century B.C. It will thus be seen that he rejects most of M. Quatremère's reasons for placing the work in the time of Nebuchadnezzar It is remarkable that that great king is not mentioned, and the author or authors were, it is argued by Chwolson, ignorant not only of the existence of Christianity, but of the kingdom and faith of Israel. While these and other reasons, if granted, strengthen M. Chwolson's case for the antiquity of the work, on the other hand it is urged that even neglecting the difficulties attending an Arab's translating so ancient a writing (and we reject altogether the supposition that it was modernised as being without a parallel, at least in *Arabic* literature), and conceding that he was of Chaldæan or Nabat race—we encounter formidable intrinsic difficulties. The book contains mentions of personages bearing names closely resembling those of Adam, Seth, Enoch, Noah, Shem, Nimrod, and Abraham; and M. Chwolson himself is forced to confess that the particulars related of them are in some respects similar to those recorded of the Biblical patriarchs. If this difficulty proves insurmountable, it shows that the author borrowed from the Bible, or from late Jews, and destroys the claim of an extreme antiquity. Other apparent evidences of the same kind are not wanting. Such are the mentions of Ermeesh (Hermes), Agáthádeemoon (Agathodaemon), Tammuz (Adonis), and Yoonán (Ionians). It is even a question whether the work should not be dated several centuries after the commencement of our era. Anachronisms, it is asserted, abound; geographical, linguistic (the use of late words and phrases), historical, and religious (such as the traces of Hellenism, as shown in the mention of Hermes, &c., and influences to be ascribed to Neoplatonism). The whole style is said to be modern, wanting the rugged vigour of antiquity (this, however, is a delicate issue, to be tried only by the ripest scholarship). And while Chwolson dates the oldest part of the Book of Agriculture B.C. 2500, and the Book of Tenkelooshà in the 1st century, A.D. at the latest (p. 136), Renan asserts that the two are so similar as to preclude the notion of their being separated by any great interval of time (*Journal de l'Institut*).

Although Quatremère recovered the broad outlines of the religion and language of the Nabat, a more extended knowledge of these points hangs mainly on the genuineness or spuriousness of the work of Kuthámee. If M. Chwolson's theory be

[a] Or Keysee. See Chwolson, *Ueberreste*, p. 8, footnote De Lacy's Abd-El-Lateef, p. 484.

correct, that people present to us one of the most ancient forms of idolatry; and by their writings we can trace the origin and rise of successive phases of pantheism, and the roots of the complicated forms of idolatry, heresy, and philosophical infidelity, which abound in the old seats of the Aramaean race. At present, we may conclude

ṣ

that they were Sabians (صابِيوف),[b] at least in late times, as Sabeism succeeded the older religions; and their doctrines seem to have approached (how nearly a further knowledge of these obscure subjects will show) those of the Mendá'ees, Mendaites, or Gnostics. Their language presents similar difficulties; according to M. Chwolson, it is the ancient language of Babylonia. A cautious criticism would (till we know more) assign it a place as a comparatively modern dialect of Syro-Chaldee (comp. Quatremère, *Mem.* 100-3).

Thus, if M. Chwolson's results are accepted, the Book of Nabat Agriculture exhibits to us an ancient civilization, before that of the Greeks, and at least as old as that of the Egyptians, of a great and powerful nation of remote antiquity; making us acquainted with sages hitherto unknown, and with the religions and sciences they either founded or advanced; and throwing a flood of light on what has till now been one of the darkest pages of the world's history. But until the original text of Kuthámee's treatise is published, we must withhold our acceptance of facts so startling, and regard the antiquity ascribed to it even by Quatremère as extremely doubtful. It is sufficient for the present to know that the most important facts advanced by the latter—the most important when regarded by sober criticism—are supported by the results of the later inquiries of M. Chwolson and others. It remains for us to state the grounds for connecting the Nabat with the Nabathaeans.

As the Arabs speak of the Nabat as Syrians, so conversely the Greeks and Romans knew the Nabathaeans (*οἱ Ναβαταῖοι* and *Ναβαταῖοι*, LXX.; Alex. *Ναβαιεοι*; Nabuthaei, Vulg.; *Ἀναταῖοι*, or *Ναταταῖοι*, Pt. vi. 7, §21; *Ναβδαται*, Suid. *s. v.*; Nabathae) as Arabs. While the inhabitants of the peninsula were comparative strangers to the classical writers, and very little was known of the further-removed peoples of Chaldaea and Mesopotamia, the Nabathaeans bordered the well-known Egyptian and Syrian provinces. The nation was famous for its wealth and commerce. Even when, by the decline of its trade (diverted through Egypt), its prosperity waned, Petra is still mentioned as a centre of the trade both of the Sabaeans of Southern Arabia [SHEBA] and the Gerrhaeans on the Persian gulf. It is this extension across the desert that most clearly connects the Nabathaean colony with the birthplace of the nation in Chaldaea. The notorious trade of Petra across the well-trodden desert-road to the Persian gulf is sufficient to account for the presence of this colony; just as traces of Abrahamic peoples [DEDAN, &c.] are found, demonstrably, on the shores of that sea on the east, and on the borders of Palestine on the west, while along the northern limits of the Arabian peninsula remains of the caravan stations still exist. Nothing is more certain than the existence of this great stream of commerce, from remote times, until the opening of the Egyptian route gradually destroyed it. Josephus (*Ant.* i. 12, §4) speaks of Nabataea (*Ναβαταία*, Strab.; *Ναβαγραί*, Joseph.) as embracing the country from the Euphrates to the Red Sea—*i. e.* Petraea and all the desert east of it. The Nabat of the Arabs, however, are described as famed for agriculture and science; in these respects offering a contrast to the Nabathaeans of Petra, who were found by the expedition sent by Antigonus (B.C. 312) to be dwellers in tents, pastoral, and conducting the trade of the desert; but in the Red Sea again they were piratical, and by sea-faring qualities showed a non-Semitic character.

We agree with M. Quatremère (*Mem.* p. 81) while rejecting other of his reasons, that the civilization of the Nabathaeans of Petra, far advanced on that of the surrounding Arabs, is not easily explained except by supposing them to be a distinct people from those Arabs. A remarkable confirmation of this supposition is found in the character of the buildings of Petra, which are unlike anything constructed by a purely Semitic race. Architecture is a characteristic of Arian or mixed races. In Southern Arabia, Nigritians and Semites (Joktanites) together built huge edifices; so in Babylonia and Assyria, and so too in Egypt, mixed races left this unmistakeable mark. [ARABIA.] Petra, while it is wanting in the colossal features of those more ancient remains, is yet unmistakeably foreign to an unmixed Semitic race. Further, the subjects of the literature of the Nabat, which are scientific and industrial, are not such as are found in the writings of pure Semites or Arians, as Renan (*Hist. des Langues Sémitiques*, 227) has well observed; and he points, as we have above, to a foreign ("Couschite," or partly Nigritian) settlement in Babylonia. It is noteworthy that 'Abd-el-Latef (at the end of the fourth section of his first book, or treatise, see De Lacy's ed.) likens the Copts in Egypt (a mixed race) to the Nabat in El-'Irák.

From most of these, and other considerations,[c] we think there is no reasonable doubt that the Nabathaeans of Arabia Petraea were the same people as the Nabat of Chaldaea; though at what ancient epoch the western settlement was formed remains unknown.[d] That it was not of any importance early after the captivity appears from the notices of the inhabitants of Edom in the canonical books, and their absolute silence respecting the Nabathaeans—except (if Nebaioth be identified with them) the passage in Isaiah (lx. 7).

The Nabathaeans were allies of the Jews after the Captivity, and Judas the Maccabee, with Jonathan, while at war with the Edomites, came on them three days south of Jordan (1 Macc. v. 3, 24, &c.; Joseph. *Ant.* xii. 8, §3), and afterwards "Jonathan had sent his brother John, a captain of the

[b] Sábi-oon is commonly held by the Arabs to signify originally "Apostates."

[c] We have not entered into the subject of the language of the Nabathaeans. The little that is known of it tends to strengthen the theory of the Chaldaean origin of that people. The Duc de Luynes, in a paper on the coins of the latter in the *Revue Numismatique* (nouv. série, iii. 1858), adduces facts to show that they called themselves Nabat נבטו.

[d] It is remarkable that while remnants of the Nabat are mentioned by trustworthy Arab writers as existing in their own day, no Arab record connecting that people with Petra has been found. Caussin believes that they arisen from the Chaldaean speech of the Nabat and their corruption of Arabic (*Essai sur l'Hist. des Arabes avant l'Islamisme*, i. 28).

people, to pray his friends the Nabathites that they might leave with them their carriage, which was much" (ix. 35, 36). Diod. Sic. gives much information regarding them, and so too Strabo, from the expedition under Aelius Gallus, the object of which was defeated by the treachery of the Nabathaeans (see the *Dict. of Geography*, to which the history of Nabataea in classical times properly belongs).

Lastly, did the Nabathaeans, or Nabat, derive their name, and were they in part descended, from Nebaioth, son of Ishmael? Josephus says that Nabataea was inhabited by the twelve sons of Ishmael; and Jerome, "Nebaioth omnis regio ab Euphrate usque ad Mare Rubrum Nabathena usque hodie dicitur, quae pars Arabiae est" (*Comment. in* Gen. xxv. 13). Quatremère rejects the identification for an etymological reason—the change of ת to ط; but this change is not unusual; in words Arabicized from the Greek, the like change of τ generally occurs. Renan, on the other hand, accepts it; regarding Nebaioth, after his manner, merely as an ancient name unconnected with the Biblical history. The Arabs call Nebaioth Nâbit (نابت), and do not connect him with the Nabat, to whom they give a different descent; but all their Abrahamic genealogies come from late Jews, and are utterly untrustworthy. When we remember the darkness that enshrouds the early history of the "sons of the concubines" after they were sent into the east country, we hesitate to deny a relationship between peoples whose names are strikingly similar, dwelling in the same tract. It is possible that Nebaioth went to the far east, to the country of his grandfather Abraham, intermarried with the Chaldaeans, and gave birth to a mixed race, the Nabat. Instances of ancient tribes adopting the name of more modern ones, with which they have become fused, are frequent in the history of the Arabs (see MIDIAN, foot-note); but we think it is also admissible to hold that Nebaioth was so named by the sacred historian because he intermarried with the Nabat. It is, however, safest to leave unsettled the identification of Nebaioth and Nabat until another link be added to the chain that at present seems to connect them. [E. S. P.]

NEBAL'LAT (נְבַלָּט: Vat. omits, Alex. Ναβαλλατ: *Neballat*), a town of Benjamin, one of those which the Benjamites reoccupied after the captivity (Neh. xi. 34), but not mentioned in the original catalogue of allotment (comp. Josh. xviii. 11-28). It is here named with ZEBOIM, LOD, and ONO. Lod is Lydda, the modern *Lŭdd*, and Ono most impossibly *Kefr Auna*, four miles to the north of it. East of these, and forming nearly an equilateral triangle with them,[a] is *Beit Nebâla* (Rob. ii. 232), which is possibly the *locum tenens* of the ancient village. Another place of very nearly the same name, *Bir Nebâla*, lies to the east of *el Jib* (Gibeon), and within half a mile of it. This would also be within the territory of Benjamin, and although further removed from Lod and Ono, yet if ZEBOIM should on investigation prove (as is most impossible) to be in one of the wadys which penetrate the eastern side of this district and lead down to the Jordan valley (comp. 1 Sam. xiii. 18), then, in that case, this situation might not be unsuitable for Neballat. [G.]

NE'BAT (נְבָט: Ναβάτ: *Nabat*, but *Nabath* in 1 K. xi.) The father of Jeroboam, whose name is only preserved in connexion with that of his distinguished son (1 K. xi. 26, xii. 2, 15, xv. 1, xvi. 3, 26, 31, xxi. 22, xxii. 52; 2 K. iii. 3, ix. 9, x. 29, xiii. 2, 11, xiv. 24, xv. 9, 18, 24, 28, xvii. 21, xxiii. 15; 2 Chr. ix. 29, x. 2, 15, xiii. 6). He is described as an Ephrathite, or Ephraimite, of Zereda in the Jordan valley, and appears to have died while his son was young. The Jewish tradition preserved in Jerome (*Quaest. Hebr. in lib. Reg.*) identifies him with Shimei of Gera, who was a Benjamite. [JEROBOAM.]

NE'BO, MOUNT (הַר־נְבוֹ: Τὸ ὄρος Ναβαῦ: *mons Nebo*). The mountain from which Moses took his first and last view of the Promised Land (Deut. xxxii. 49, xxxiv. 1). It is so minutely described, that it would seem impossible not to recognise it:—in the land of Moab; facing Jericho; the head or summit of a mountain called the Pisgah, which again seems to have formed a portion of the general range of the "mountains of Abarim." Its position is further denoted by the mention of the valley (or perhaps more correctly the ravine) in which Moses was buried, and which was apparently one of the clefts of the mount itself (xxxii. 50)—"the ravine in the land of Moab facing Beth-Peor" (xxxiv. 6). And yet, notwithstanding the minuteness of this description, no one has yet succeeded in pointing out any spot which answers to Nebo. Viewed from the western side of Jordan (the nearest point at which most travellers are able to view them) the mountain of Moab present the appearance of a wall or cliff, the upper line of which is almost straight and horizontal. "There is no peak or point perceptibly higher than the rest; but all is one apparently level line of summit without peaks or gaps" (Rob. *B. R.* i. 570). "On ne distingue pas un sommet, pas la moindre cime; seulement ou aperçoit, çà et là, de legères inflexions, *comme si la main du peintre qui a tracé cette ligne horizontale sur le ciel eût tremblé dans quelques endroits*" (Chateaubriand, *Itinéraire*, part 3). "Possibly," continues Robinson, "on travelling among these mountains, some isolated point or summit might be found answering to the position and character of Nebo." Two such points have been named. (1.) Seetzen (March 17, 1806; *Reise*, vol. i. 408) seems to have been the first to suggest the *Dschibbal Attarûs* (between the *Wady Zerka-main* and the Arnon, 3 miles below the former, and 10 or 12 south of Heshbon) as the Nebo of Moses. In this he is followed (though probably without any communication) by Burckhardt (July 14, 1812), who mentions it as the highest point in that locality, and therefore probably "Mount *Nebo* of the Scripture." This is adopted by Irby and Mangles, though with hesitation (*Travels*, June 8, 1818).

(2.) The other elevation above the general summit level of these highlands is the *Jebel 'Osha*, or *Ausha'*, or *Jebel el-Jil'âd*, "the highest point in all the eastern mountains," "overtopping the whole of the *Belka*, and rising about 3000 feet above the *Ghôr*" (Burckhardt, July 2, 1812; Robinson, i. 527 *note*, 570).

But these eminences are alike wanting in one main essential of the Nebo of the Scripture, which

[a] Schwarz (p. 134), with less than usual accuracy, places "Beth-Nabalha" as "five miles south of Ramleh." It is really about that distance N.E. of it.

is stated to have been "facing Jericho," words which in the widest interpretation must imply that it was "some elevation immediately over the last stage of the Jordan," while *'Osha* and *Attarûs* are equally remote in opposite directions, the one 15 miles north, the other 15 miles south of a line drawn eastward from Jericho. Another requisite for the identification is, that a view should be obtainable from the summit, corresponding to that prospect over the whole land which Moses is said to have had from Mount Nebo: even though, as Professor Stanley has remarked (*S. & P.* 301), that was a view which in its full extent must have been imagined rather than actually seen.[a] The view from *Jebel Jil'ad* has been briefly described by Mr. Porter (*Handbk.* 309), though without reference to the possibility of its being Nebo. Of that from *Jebel Attarûs*, no description is extant, for, almost incredible as it seems, none of the travellers above named, although they believed it to be Nebo, appear to have made any attempt to deviate so far from their route as to ascend an eminence, which if their conjectures be correct must be the most interesting spot in the world. [G.]

NEBO (נְבוֹ). 1. (**Ναβαῦ**: *Nebo* and *Nabo*). A town on the eastern side of Jordan, situated in the pastoral country (Num. xxxii. 3), one of those which were taken possession of and rebuilt by the tribe of Reuben (ver. 38).[b] In these lists it is associated with Kirjathaim and Baal-meon or Beon; and in another record (1 Chr. v. 8) with Aroer, as marking one extremity, possibly the west, of a principal part of the tribe. In the remarkable prophecy adopted[c] by Isaiah (xv. 2) and Jeremiah (xlviii. 1, 22) concerning Moab, Nebo is mentioned in the same connexion as before, though no longer an Israelite town, but in the hands of Moab. It does not occur in the catalogue of the towns of Reuben in Joshua (xiii. 15-23); but whether this is an accidental omission, or whether it appears under another name, —according to the statement of Num. xxxii. 38, that the Israelites changed the names of the heathen cities they retained in this district—is uncertain. In the case of Nebo, which was doubtless called after the deity[d] of that name, there would be a double reason for such a change (see Josh. xxiii. 7).

Neither is there anything to shew whether there was a connexion between Nebo the town and Mount Nebo. The notices of Eusebius and Jerome (*Onomasticon*) are confused, but they at least denote that the two were distinct, and distant from each other.[e] The town (**Ναβαώρ** and "Nabo") they identify with Noban or Kenath, and locate it 8 miles south[f] of Heshbon, where the ruins of *el-Habis* appear to stand at present; while the mountain (**Ναβαῦ** and "Naban") is stated to be 6 miles east (Jer.) or west (Eus.) from the same spot.

In the list of places south of *es-Salt* given by Dr. Robinson (*Bib. Res.* 1st ed. vol. iii. App. 150) one occurs named *Neba*, which may possibly be identical with Nebo, but nothing is known of its situation or of the character of the spot.

2. (**Ναβού**, *Alex.* **Ναβαι**; in Neh. **Ναβαι**. *Nebo*). The children of Nebo (*Bene-Nebo*) to the number of fifty-two, are mentioned in the catalogue of the men of Judah and Benjamin, who returned from Babylon with Zerubbabel (Ezr. ii. 29; Neh. vii. 33[g]). Seven of them had foreign wives, whom they were compelled to discard (Ezr. x. 43). The name occurs between Bethel and Ai, and Lydda, which, if we may trust the arrangement of the list, implies that it was situated in the territory of Benjamin to the N.W. of Jerusalem. This is possibly the modern *Beit-Nûbah*, about 12 miles N.W. by W. of Jerusalem, 8 from Lydda, and close to *Yalo*, which seems to be the place mentioned by Jerome (*Onom.* "Anab," and "Anob;" and *Epp. Paulae*, §8) as Nob the city of the priests (though that identification is hardly admissible), and both in his and later times known as Bethannaba or Bettenuble.[h]

It is possible that this Nebo was an offshoot of that on the east of Jordan; in which case we have another town added to those already noticed in the territory of Benjamin which retain the names of foreign and heathen settlers. [BENJAMIN, i. 188 *note;* MICHMASH; OPHNI.].

A town named Nomba, is mentioned by the LXX. (not in Heb.) amongst the places in the south of Judah frequented by David (1 Sam. xxx. 30), but its situation forbids any attempt to identify this with Nebo. [G.]

NEBO (נְבוֹ: **Ναβώ**: *Nabo*), which occurs both in Isaiah (xlvi. 1) and Jeremiah (xlviii. 1), as the name of a Chaldaean god, is a well-known deity of the Babylonians and Assyrians. The original native name was, in Hamitic Babylonian, *Nabiu*, in Semitic Babylonian and Assyrian, *Nabu*. It is reasonably conjectured to be connected with the Hebrew נָבָא, "to prophesy," whence the common word נָבִיא, "prophet" (Arab. *Nebi*). Nebo was the god who presided over learning and letters. He is called "the far-hearing," "he who possesses intelligence," "he who teaches or instructs." The wedge or arrow-head—the essential element of cuneiform writing—appears to have been his emblem; and hence he bore the name of *Tir*, which signifies "a shaft or arrow." His general character corresponds to that of the Egyptian Thoth, the Greek Hermes, and the Latin Mercury. Astronomically he is identified with the planet nearest the sun, called Nebo also by the Mandaeans, and *Tir* by the ancient Persians.

[a] This view was probably identical with that seen by Balaam (Num. xxiii. 14). It is beautifully drawn out in detail by Prof. Stanley (*S. & P.* 299).

[b] The name is omitted in this passage in the Vatican LXX. The Alex. MSS. has τὴν βαμα.

[c] See MOAB, p. 395*b*.

[d] Selden (*De Dis Syr.* Synt. ii. cap. 12) assumes on the authority of Hesychius' interpretation of Is. xv. 1, that Dibon contained a temple or sanctuary of Nebo. But it would appear that Nebo the place, and not Nebo the divinity, is referred to in that passage.

[e] In another passage (*ad Ezekiam* xv. 2), Jerome states that the "consecrated idol of Chemosh—that is, Belphegor"—Baal Peor, resided in Nebo

[f] *Kenawat*, the representative of Kenath, is 100 Roman miles N.E. of Heshbon.

[g] In Neh. the name is given as the "other Nebo," נְבוֹ אַחֵר, (comp. ELAM), as if two places of that name were mentioned, but this is not the case.

[h] The words of William of Tyre (xiv. 8) are well worth quoting. They are evidently those of an eye-witness. "Nobe qui hodie vulgari appellatione dicitur Betannaba, *in desuetu montium, in primis suspicilis (aspicilis?) compestribus*, via quâ itur Liddam Hi enim in desertis montium inter angustias inevitabiles Accidentia subitas irruptiones illic facere consuetis." Just as the Philistines did in the time of Saul.—Can this be Gob or Nob, where they were so frequently encountered?

Nebo was of Babylonian rather than of Assyrian origin. In the early Assyrian Pantheon he occupies a very inferior position, being either omitted from the lists altogether, or occurring as the last of the minor gods. The king supposed to be Pul first brings him prominently forward in Assyria, and then apparently in consequence of some peculiar connexion which he himself had with Babylon. A statue of Nebo was set up by this monarch at Calah (*Nimrud*), which is now in the British Museum. It has a long inscription, written across the body, and consisting chiefly of the god's various epithets. In Babylonia Nebo held a prominent place from an early time. The ancient town of Borsippa was especially under his protection, and the great temple there (the modern *Birs-Nimrud*) was dedicated to him from a very remote age. [BABEL, TOWER OF.] He was the tutelar god of the most important Babylonian kings, in whose names the word *Nabu*, or Nebo, appears as an element: *e.g.* Nabo-nassar, Nabo-polassar, Nebuchadnezzar, and Nabo-nadius or Labynetus; and appears to have been honoured next to Bel-merodach by the later kings. Nebuchadnezzar completely rebuilt his temple at Borsippa, and called after him his famous seaport upon the Persian Gulf, which became known to the Greeks as Teredon or Diridotis —"given to Tir," *i. e.* to Nebo. The worship of Nebo appears to have continued at Borsippa to the 3rd or 4th century after Christ, and the Sabaeans of Harran may have preserved it even to a later date. (See the Essay *On the Religion of the Babylonians and Assyrians*, by Sir H. Rawlinson, in the 1st vol. of Rawlinson's *Herodotus*, pp. 637-640; and compare Norberg's *Onomasticon*, s. v. Nebo, pp. 98, 9.) [G. R.]

NEBUCHADNEZ'ZAR, or NEBUCHADREZ'ZAR (נְבוּכַדְנֶאצַּר, or נְבוּכַדְרֶאצַּר: *Nαβουχοδονόσορ*: *Nabuchodonosor*), was the greatest and most powerful of the Babylonian kings. His name, according to the native orthography, is read as *Nabu-kuduri-utsur*, and is explained to mean "Nebo is the protector against misfortune," *kuduri* being connected with the Hebrew כִּידוֹד, "trouble" or "attack," and *utsur* being a participle from the root נָצַר, "to protect." The rarer Hebrew form, used by Jeremiah and Ezekiel,—Nebuchadrezzar, is thus very close indeed to the original. The Persian form, *Nabukudrachara* (*Beh. Insor.* col. i. par. 16), is less correct; while the Greek equivalents are sometimes very wide of the mark. *Nαβουκοδρόσορος*, which was used by Abydenus and Megasthenes, is the best of them; *Nαβοκολάσαρος*, which appears in the Canon of Ptolemy, the worst. Strabo's *Nαβοκοδρόσορος* (xv. 1, §6) and Berosus's *Nαβουχοδονόσορος* lie between these extremes.

Nebuchadnezzar was the son and successor of Nabopolassar, the founder of the Babylonian Empire. He appears to have been of marriageable age at the time of his father's rebellion against Assyria, B.C. 625; for, according to Abydenus (ap. Euseb. *Chron. Can.* i. 9), the alliance between this prince and the Median king was cemented by the betrothal of Amuhia, the daughter of the latter, to Nebuchadnezzar, Nabopolassar's son. Little further is known of him during his father's lifetime. It is suspected, rather than proved, that he was the leader of a Babylonian contingent which accompanied Cyaxares in his Lydian war [MEDES], by whose interposition, on the occasion of an eclipse that war was brought to a close,[a] B.C. 610 At any rate, a few years later, he was placed at the head of a Babylonian army, and sent by his father who was now old and infirm, to chastise the insolence of Pharaoh-Necho, king of Egypt. This prince had recently invaded Syria, defeated Josiah, king of Judah, at Megiddo, and reduced the whole tract, from Egypt to Carchemish on the upper Euphrates [CARCHEMISH], which in the partition of the Assyrian territories on the destruction of Nineveh had been assigned to Babylon (2 K. xxiii. 29, 30; Beros. ap. Joseph. *c. Ap.* i. 19). Necho had held possession of these countries for about three years, when (B.C. 605) Nebuchadnezzar led an army against him, defeated him at Carchemish in a great battle (Jer. xlvi. 2-12), recovered Coelesyria, Phoenicia, and Palestine, took Jerusalem (Dan. i. 1, 2), pressed forward to Egypt, and was engaged in that country or upon its borders when intelligence arrived which recalled him hastily to Babylon. Nabopolassar, after reigning 21 years, had died, and the throne was vacant; for there is no reason to think that Nebuchadnezzar, though he appeared to be the "king of Babylon" to the Jews, had really been associated by his father. In some alarm about the succession he hurried back to the capital, accompanied only by his light troops; and crossing the desert, probably by way of Tadmor or Palmyra, reached Babylon before any disturbance had arisen, and entered peaceably on his kingdom (B.C. 604). The bulk of the army, with the captives—Phoenicians, Syrians, Egyptians, and Jews—returned by the ordinary route, which skirted instead of crossing the desert. It was at this time that Daniel and his companions were brought to Babylon, where they presently grew into favour with Nebuchadnezzar, and became persons of very considerable influence (Dan. i. 3-20).

Within three years of Nebuchadnezzar's first expedition into Syria and Palestine, disaffection again showed itself in those countries. Jehoiakim—who, although threatened at first with captivity (2 Chr. xxxvi. 6) had been finally maintained on the throne as a Babylonian vassal—after three years of service "turned and rebelled" against his suzerain, probably trusting to be supported by Egypt (2 K. xxiv. 1). Not long afterwards Phoenicia seems to have broken into revolt; and the Chaldaean monarch, who had previously endeavoured to subdue the disaffected by his generals (ib. ver. 2), once more took the field in person, and marched first of all against Tyre. Having invested that city in the seventh year of his reign (Joseph. *c. Ap.* i. 21), and left a portion of his army there to continue the siege, he proceeded against Jerusalem, which submitted without a struggle. According to Josephus, who is here our chief authority, Nebuchadnezzar punished Jehoiakim with death (*Ant.* x. 6, §3; comp. Jer. xxii. 18, 19, and xxxvi. 30), but placed his son Jehoiachin upon the throne. Jehoiachin reigned only three months; for, on his showing symptoms of disaffection, Nebuchadnezzar came up against Jerusalem for the third time, deposed the young prince (whom he carried to Babylon, together with

[a] Herodotus terms this leader Labynetus (i. 74); a word which does not rightly render the Babylonian *Nabu-kuduri-usur* but does under another Babylonian name, *Nabu-nahit*. Nabopolassar may have had a son of this name; or the Labynetus of Herod. i. 74 may be Nabopolassar himself.

a large portion of the population of the city, and the chief of the Temple treasures), and made his uncle, Zedekiah, king in his room. Tyre still held out; and it was not till the thirteenth year from the time of its first investment that the city of merchants fell (B.C. 585). Ere this happened, Jerusalem had been totally destroyed. This consummation was owing to the folly of Zedekiah, who, despite the warnings of Jeremiah, made a treaty with Apries (Hophra), king of Egypt (Ez. xvii. 15), and on the strength of this alliance renounced his allegiance to the king of Babylon. Nebuchadnezzar commenced the final siege of Jerusalem in the ninth year of Zedekiah, — his own seventeenth year (B.C. 588), and took it two years later (B.C. 586). One effort to carry out the treaty seems to have been made by Apries. An Egyptian army crossed the frontier, and began its march towards Jerusalem; upon which Nebuchadnezzar raised the siege, and set off to meet the new foe. According to Josephus (*Ant.* x. 7, §3) a battle was fought, in which Apries was completely defeated; but the Scriptural account seems rather to imply that the Egyptians retired on the advance of Nebuchadnezzar, and recrossed the frontier without risking an engagement (Jer. xxxvii. 5-8). At any rate the attempt failed, and was not repeated; the "broken reed, Egypt," proved a treacherous support, and after an eighteen months' siege Jerusalem fell. Zedekiah escaped from the city, but was captured near Jericho (ib. xxxix. 5) and brought to Nebuchadnezzar at Riblah in the territory of Hamath, where his eyes were put out by the king's order, while his sons and his chief nobles were slain. Nebuchadnezzar then returned to Babylon with Zedekiah, whom he imprisoned for the remainder of his life; leaving Nebuzar-adan, the captain of his guard, to complete the destruction of the city and the pacification of Judaea. Gedaliah, a Jew, was appointed governor, but he was shortly murdered, and the rest of the Jews either fled to Egypt, or were carried by Nebuzar-adan to Babylon.

The military successes of Nebuchadnezzar cannot be traced minutely beyond this point. His own annals have not come down to us; and the historical allusions which we find in his extant inscriptions are of the most vague and general character. It may be gathered from the prophetical Scriptures and from Josephus, that the conquest of Jerusalem was rapidly followed by the fall of Tyre and the complete submission of Phoenicia (Ez. xxvi.–xxviii.; Joseph. *c. Ap.* i. 21); after which the Babylonians carried their arms into Egypt, and inflicted severe injuries on that fertile country (Jer. xlvi. 13-26; Ez. xxix. 2-20; Joseph. *Ant.* x. 9, §7). But we have no account, on which we can depend, of these campaigns. Our remaining notices of Nebuchadnezzar present him to us as a magnificent prince and beneficent ruler, rather than a warrior; and the great fame which has always attached to his name among the Eastern nations depends rather on his buildings and other grand constructions than on any victories or conquests ascribed to him.

We are told by Berosus that the first care of Nebuchadnezzar, on obtaining quiet possession of his kingdom after the first Syrian expedition, was to rebuild the temple of Bel (*Bel-Merodach*) at Babylon out of the spoils of the Syrian war (ap. Joseph. *Ant.* x. 11, §1). He next proceeded to strengthen and beautify the city, which he renovated throughout, and surrounded with several lines of fortification, himself adding one entirely new quarter. Having finished the walls and adorned the gates magnificently, he constructed a new palace, adjoining the old residence of his father — a superb edifice, which he completed in fifteen days! In the grounds of this palace he formed the celebrated "hanging garden," which was a pleasaunce, built up with huge stones to imitate the varied surface of mountains, and planted with trees and shrubs of every kind. Diodorus, probably following Ctesias, describes this marvel as a square, four *plethra* (400 feet) each way, and 50 cubits (75 feet) high, approached by sloping paths, and supported on a series of arched galleries increasing in height from the base to the summit. In these galleries were various pleasant chambers; and one of them contained the engines by which water was raised from the river to the surface of the mound. This curious construction, which the Greek writers reckoned among the seven wonders of the world, was said to have been built by Nebuchadnezzar for the gratification of his wife, Amuhia, who, having been brought up among the Median mountains, desired something to remind her of them. Possibly, however, one object was to obtain a pleasure-ground at a height above that to which the musquitoes are accustomed to rise.

This complete renovation of Babylon by Nebuchadnezzar, which Berosus asserts, is confirmed to us in every possible way. The Standard Inscription of the king relates at length the construction of the whole series of works, and appears to have been the authority from which Berosus drew. The ruins confirm this in the most positive way, for nine-tenths of the bricks *in situ* are stamped with Nebuchadnezzar's name. Scripture, also, adds an indirect but important testimony, in the exclamation of Nebuchadnezzar recorded by Daniel, "Is not this great Babylon *which I have built?*" (Dan. iv. 30).

But Nebuchadnezzar did not confine his efforts to the ornamentation and improvement of his capital. Throughout the empire, at Borsippa, Sippara, Cutha, Chilmad, Duraba, Teredon, and a multitude of other places, he built or rebuilt cities, repaired temples, constructed quays, reservoirs, canals, and aqueducts, on a scale of grandeur and magnificence surpassing everything of the kind recorded in history, unless it be the constructions of one or two of the greatest Egyptian monarchs. "I have examined," says Sir H. Rawlinson, "the bricks *in situ*, belonging perhaps to a hundred different towns and cities in the neighbourhood of Baghdad, and I never found any other legend than that of Nebuchadnezzar, son of Nabopolassar, king of Babylon" (*Comm. on the Inscr. of Assyria and Babylonia*, 76, 77). "Nebuchadnezzar," says Abydenus, "on succeeding to the throne, fortified Babylon with three lines of walls. He dug the *Nahr Malcha*, or Royal River, which was a branch stream derived from the Euphrates, and also the Acracanus. He likewise made the great reservoir above the city of Sippara, which was thirty *parasangs* (90 miles) in circumference, and twenty fathoms (120 feet) deep. Here he placed sluices or flood-gates, which enabled him to irrigate the low country. He also built a quay along the shore of the Red Sea (Persian Gulf), and founded the city of Teredon on the borders of Arabia." It is reasonably concluded from these statements, that an extensive system of irrigation was devised by this monarch, to whom the Babylonians were probably indebted for the greater portion of that vast network of canals which covered the whole alluvial tract be-

tween the two rivers, and extended on the right bank of the Euphrates to the extreme verge of the stony desert. On that side the principal work was a canal of the largest dimensions, still to be traced, which left the Euphrates at *Hit*, and skirting the desert ran south-east a distance of above 400 miles to the Persian Gulf, where it emptied itself into the Bay of *Grane*.

The wealth, greatness, and general prosperity of Nebuchadnezzar are strikingly placed before us in the book of Daniel. "The God of Heaven" gave him, not a kingdom only, but "power, strength, and glory" (Dan. ii. 37). His wealth is evidenced by the image of gold, 60 cubits in height, which he set up in the plain of Dura (ib. iii. 1). The grandeur and careful organization of his kingdom appears from the long list of his officers, "princes, governors, captains, judges, treasurers, councillors, sheriffs, and rulers of provinces," of whom we have repeated mention (ib. verses 2, 3 and 27). We see the existence of a species of hierarchy in the "magicians, astrologers, sorcerers," over whom Daniel was set (ib. ii. 48). The "tree, whose height was great, which grew and was strong, and the height thereof reached unto the heavens, and the sight thereof to the end of all the earth; the leaves whereof were fair, and the fruit much, and in which was food for all; under which the beasts of the field had shadow, and the fowls of heaven dwelt in the branches thereof, and all flesh was fed of it" (*ib.* iv. 10-12), is the fitting type of a kingdom at once so flourishing and so extensive.

It has been thought by some (De Wette, Th. Parker, &c.), that the book of Daniel represents the satrapial system of government (*Satrapen-Einrichtung*) as established throughout the whole empire; but this conclusion is not justified by a close examination of that document. Nebuchadnezzar, like his Assyrian predecessors (Is. x. 8), is represented as a "king of kings" (Dan. ii. 37); and the officers enumerated in ch. ii. are probably the authorities of Babylonia proper, rather than the governors of remoter regions, who could not be all spared at once from their employments. The instance of Gedaliah (Jer. xl. 5; 2 K. xxv. 22) is not that of a satrap. He was a Jew; and it may be doubted whether he stood really in any different relation to the Babylonians from Zedekiah or Jehoiachin; although as he was not of the seed of David, the Jews considered him to be "governor" rather than king.

Towards the close of his reign the glory of Nebuchadnezzar suffered a temporary eclipse. As a punishment for his pride and vanity, that strange form of madness was sent upon him which the Greeks called Lycanthropy (λυκανθρωπία); wherein the sufferer imagines himself a beast, and quitting the haunts of men, insists on leading the life of a beast (Dan. iv. 33). Berosus, with the pardonable tenderness of a native, anxious for the good fame of his country's greatest king, suppressed this fact; and it may be doubted whether Herodotus in his Babylonian travels, which fell only about a century after the time, obtained any knowledge of it. Nebuchadnezzar himself, however, in his great inscription appears to allude to it, although in a studied ambiguity of phrase which renders the passage very difficult of translation. After describing the construction of the most important of his great works, he appears to say—"For four years (?) . . . the seat of my kingdom . . . did not rejoice my heart. In all my dominions I did not build a high place of power, the precious treasures of my kingdom I did not lay up. In Babylon, buildings for myself and for the honour of my kingdom I did not lay out In the worship of Merodach, my lord, the joy of my heart, in Babylon the city of his sovereignty, and the seat of my empire, I did not sing his praises, I did not furnish his altars with victims, nor did I clear out the canals" (Rawlinson's *Herod.* ii. 586). Other negative clauses follow. It is plain that we have here narrated a suspension—apparently for four years—of all those works and occupations on which the king especially prided himself—his temples, palaces, worship, offerings, and works of irrigation; and though the cause of the suspension is not stated, we can scarcely imagine anything that would account for it but some such extraordinary malady as that recorded in Daniel.

It has often been remarked that Herodotus ascribes to a queen, Nitocris, several of the important works, which other writers (Berosus, Abydenus) assign to Nebuchadnezzar. The conjecture naturally arises that Nitocris was Nebuchadnezzar's queen, and that, as she carried on his constructions during his incapacity, they were by some considered to be hers. It is no disproof of this to urge that Nebuchadnezzar's wife was a Median princess, not an Egyptian (as Nitocris must have been from her name), and that she was called, not Nitocris, but Amyitis or Amyhia; for Nebuchadnezzar, who married Amyitis in B.C. 625, and who lived after this marriage more than sixty years, may easily have married again after the decease of his first wife, and his second queen may have been an Egyptian. His later relations with Egypt appear to have been friendly; and it is remarkable that the name Nitocris, which belonged to very primitive Egyptian history, had in fact been resuscitated about this time, and is found in the Egyptian monuments to have been borne by a princess belonging to the family of the Psammetiks.

After an interval of four, or perhaps[b] seven years (Dan. iv. 16), Nebuchadnezzar's malady left him. As we are told in Scripture that "his reason returned, and for the glory of his kingdom his honour and brightness returned;" and he "was established in his kingdom, and excellent majesty was added to him" (Dan. iv. 36), so we find in the Standard Inscription that he resumed his great works after a period of suspension, and added fresh "wonders" in his old age to the marvellous constructions of his manhood. He died in the year B.C. 561, at an advanced age (83 or 84), having reigned 43 years. A son, EVIL-MERODACH, succeeded him.

The character of Nebuchadnezzar must be gathered principally from Scripture. There is a conventional formality in the cuneiform inscriptions, which deprives them of almost all value for the illustration of individual mind and temper. Ostentation and vainglory are characteristics of the entire series, each king seeking to magnify above all others his own exploits. We can only observe as peculiar to Nebuchadnezzar a disposition to rest his fame on his great works rather than on his military achievements, and a strong religious spirit, manifesting itself especially in a devotion, which is almost exclusive, to one particular god. Though his own tutelary deity and that of his father was Nebo (Mercury), yet his worship, his ascriptions of praise,

[b] Daniel's expression is "seven times." We cannot be sure that by a "time" is meant a year.

his thanksgivings, have in almost every case for their object the god Merodach. Under his protection he placed his son, Evil-Merodach. Merodach is "his lord," "his great lord," "the joy of his heart," "the great lord who has appointed him to the empire of the world, and has confided to his care the far-spread people of the earth," "the great lord who has established him in strength," &c. One of the first of his own titles is, "he who pays homage to Merodach." Even when restoring the temples of other deities, he ascribes the work to the suggestions of Merodach, and places it under his protection. We may hence explain the appearance of a sort of monotheism (Dan. i. 2; iv. 21, 32, 34, 37), mixed with polytheism (ib. ii. 47; iii. 12, 18, 29; v. 9), in the Scriptural notices of him. While admitting a qualified divinity in Nebo, Nana, and other deities of his country, Nebuchadnezzar maintained the real *monarchy* of Bel-Merodach. He was to him "the supreme chief of the gods," "the most ancient," "the king of the heavens and the earth."[a] It was *his* image, or symbol, undoubtedly, which was "set up" to be worshipped in the "plain of Dura" (ib. iii. 1), and *his* "house" in which the sacred vessels from the Temple were treasured (ib. i. 2). Nebuchadnezzar seems at some times to have identified this, his supreme god, with the God of the Jews (ib. ch. iv.); at others, to have regarded the Jewish God as one of the local and inferior deities (ch. iii.) over whom Merodach ruled.

The genius and grandeur which characterised Nebuchadnezzar, and which have handed down his name among the few ancient personages known generally throughout the East, are very apparent in Scripture, and indeed in all the accounts of his reign and actions. Without perhaps any strong military turn, he must have possessed a fair amount of such talent to have held his own in the east against the ambitious Medes, and in the west against the Egyptians. Necho and Apries were both princes of good warlike capacity, whom it is some credit to have defeated. The prolonged siege of Tyre is a proof of the determination with which he prosecuted his military enterprises. But his greatness lay especially in the arts of peace. He saw in the natural fertility of Babylonia, and its ample wealth of waters, the foundation of national prosperity, and so of power. Hence his vast canals and elaborate system of irrigation, which made the whole country a garden; and must have been a main cause of the full treasury, from which alone his palaces and temples can have received their magnificence. The forced labour of captives may have raised the fabrics; but the statues, the enamelled bricks, the fine woodwork, the gold and silver plating, the hangings and curtains, had to be bought; and the enormous expenditure of this monarch, which does not appear to have exhausted the country, and which cannot have been very largely supported by tribute, must have been really supplied in the main from that agricultural wealth which he took so much pains to develop. We may gather from the productiveness of Babylonia under the Persians (Herod. i. 192, 193, iii. 92), after a conquest and two (three?) revolts, some idea of its flourishing condition in the period of independence, for which (according to the consentient testimony of the monuments and the best authors) it was indebted to this king.

The moral character of Nebuchadnezzar is not such as entitles him to our approval. Besides the overweening pride which brought upon him so terrible a chastisement, we note a violence and fury (Dan. ii. 12, iii. 19) common enough among Oriental monarchs of the weaker kind, but from which the greatest of them have usually been free; while at the same time we observe a cold and relentless cruelty which is particularly revolting. The blinding of Zedekiah may perhaps be justified as an ordinary eastern practice, though it is the earliest case of the kind on record; but the refinement of cruelty by which he was made to witness his sons' execution before his eyes were put out (2 K. xxv. 7) is worthier of a Dionysius or a Domitian than of a really great king. Again, the detention of Jehoiachin in prison for 36 years for an offence committed at the age of eighteen (2 K. xxiv. 8), is a severity surpassing Oriental harshness. Against these grave faults we have nothing to set, unless it be a feeble trait of magnanimity in the pardon accorded to Shadrach, Meshach, and Abed-nego, when he found that he was without power to punish them (Dan. iii. 26).

It has been thought remarkable that to a man of this character, God should have vouchsafed a revelation of the future by means of visions (Dan. ii. 28, iv. 2). But the circumstance, however it may disturb our preconceived notions, is not really at variance with the general laws of God's providence as revealed to us in Scripture. As with His natural, so with His supernatural gifts, they are not confined to the worthy. Even under Christianity, miraculous powers were sometimes possessed by those who made an ill use of them (1 Cor. xiv. 2-33). And God, it is plain, did not leave the old heathen world without some supernatural aid, but made His presence felt from time to time in visions, through prophets, or even by a voice from Heaven. It is only necessary to refer to the histories of Pharaoh (Gen. xli. 1-7, and 28), Abimelech (ib. xx. 3), Job (Job iv. 13, xxxviii. 1, xl. 6; comp. Dan. iv. 31), and Balaam (Num. xxii.-xxiv.), in order to establish the parity of Nebuchadnezzar's visions with other facts recorded in the Bible. He was warned, and the nations over which he ruled were warned through him, God leaving not Himself "without witness" even in those dark times. In conclusion, we may notice that a heathen writer (Abydenus), who generally draws his inspirations from Berosus, ascribes to Nebuchadnezzar a miraculous speech just before his death, announcing to the Babylonians the speedy coming of "a Persian mule," who with the help of the Medes would enslave Babylon (Abyd. ap. Euseb. *Praep. Ev.* ix. 41). [G. E]

NEBUSHASBAN (נְבוּשַׁזְבָּן, *i. e.* Nebushazban: LXX. omits: *Nabuszeban*), one of the officers of Nebuchadnezzar at the time of the capture of Jerusalem. He was Rab-saris, *i. e.* chief of the eunuchs (Jer. xxxix. 13), as Nebuzaradan was Rab-tabbachim (chief of the body-guard, and Nergal-sharezer, Rab-Mag (chief of the magicians), the three being the most important officers then present, probably the highest dignitaries of the Babylonian court.[b] Nebu-shasban's office and title were the same as those of Ashpenaz (Dan. i. 3), whom he probably succeeded. In the list given (ver. 3 of

[a] These expressions are all applied to Merodach by Nebuchadnezzar in his Inscriptions.

[b] In the usual copies of the Hebrew Bible this final n is written small, and noted in the Masora accordingly. In several of Kennicott's MSS. a (ר) is found instead of n (נ), making the name Nebushashar, with perhaps an intentional play of sound, *šar* meaning prey or spoil.

[b] So at the Assyrian invasion in the time of Hezekiah

those who took possession of the city in the dead of the night of the 11th Tammuz, Nebu-shasban is not mentioned by name, but merely by his title Rab-saris. His name, like that of Nebu-chadnezzar and Nebu-saradan, is a compound of Nebo, the Babylonian deity, with some word which though not quite ascertained, probably signified adherence or attachment (see Gesen. *Thes.* 840*b*; Fürst, *Handwb.* ii. 7*b*). [G.]

NEBUZAR'ADAN (נְבוּזַרְאֲדָן: Ναβουζαρδάν; in Jer. Ναβουζαρδᾶν; Joseph. Ναβουζαρδάνης: *Nebuzardan*), the Rab-tabbachim, *i. e.* chief of the slaughterers (A. V. "captain of the guard"), a high officer in the court of Nebuchadnezzar, apparently (like the Tartan in the Assyrian army) the next to the person of the monarch. He appears not to have been present during the siege of Jerusalem; probably he was occupied at the more important operations at Tyre, but as soon as the city was actually in the hands of the Babylonians he arrived, and from that moment everything was completely directed by him. It was he who decided, even to the minutest details of fire-pans and bowls (2 K. xxv. 15), what should be carried off and what burnt, which persons should be taken away to Babylon, and which left behind in the country. One act only is referred directly to Nebuchadnezzar, the appointment of the governor and superintendent of the conquered district. All this Nebuzaradan seems to have carried out with wisdom and moderation. His conduct to Jeremiah, to whom his attention had been directed by his master (Jer. xxxix. 11), is marked by even higher qualities than these, and the prophet has preserved (xl. 2-5) a speech of Nebuzaradan's to him on liberating him from his chains at Ramah, which contains expressions truly remarkable in a heathen. He seems to have left Judea for this time when he took down the chief people of Jerusalem to his master at Riblah (2 K. xxv. 18-20). In four years he again appeared (Jer. lii. 30). Nebuchadnezzar in his twenty-third year made a descent on the regions east of Jordan, including the Ammonites and Moabites (Joseph. *Ant.* x. 9, §7), who escaped when Jerusalem was destroyed. [MOAB, p. 397, 8]. Thence he proceeded to Egypt (Joseph. *ibid.*), and, either on the way thither or on the return, Nebuzaradan again passed through the country and carried off seven hundred and forty-five more captives (Jer. lii. 30).

The name, like Nebu-chadnezzar and Nebu-shasban, contains that of Nebo the Babylonian deity. The other portion of the word is less certain. Gesenius (*Thes.* 839*b*) translates it by "Mercurii dux dominus," taking the זַר as = שַׂר, "prince," and אַדָן as = אָדוֹן, "lord." Fürst, on the other hand (*Handwb.* ii. 6), treats it as equivalent in meaning to the Hebrew *rab-tabbachim*, which usually follows it, and sometimes occurs by itself (2 K. xxv. 18; Jer. xl. 2, 5). To obtain this meaning he compares the last member of the name to the Sanscr. *dánu*, from *dá*, "to cut off." Gesenius also takes zandan as identical with the first element in the name of Sardan-apalus. But this latter name is now explained by Sir H. Rawlinson as Assur-dan-i-pal (Rawlinson's *Herod.* i. 460). [G.]

Tartac, Rab-saris, and Rab-shakeh, as the three highest officers of Sennacherib, addressed the Jews from the head of their army (2 K. xviii. 17). Possibly these three officers in the Assyrian court answered to the three named above in the Babylonian.

NE'CHO (נְכֹה: Νεχαώ), 2 Chr. xxxv. 20, 22; xxxvi. 4. [PHARAOH-NECHO.]

NEC'ODAN (Νεκωδάν: *Nechodāeus*) = NEKODA (1 Esdr. v. 37; comp. Ezr. ii. 60).

NEDABI'AH (נְדַבְיָה: Ναβαβίας: *Nadabia*). Apparently one of the sons of Jeconiah, or Jehoiachin, king of Judah (1 Chr. iii. 18). Lord A. Hervey, however, contends that this list contains the order of succession and not of lineal descent, and that Nedabiah and his brothers were sons of Neri.

NEEMI'AS (Νεεμίας: *Nehemias*) = NEHEMIAH the son of Hachaliah (Ecclus. xlix. 13; 2 Macc. i. 18, 20, 21, 23, 31, 36, ii. 13).

NEG'INAH (נְגִינַת), properly *Neginath*, as the text now stands, occurs in the title of Ps. lxi., "to the chief musician upon Neginath." If the present reading be correct, the form of the word may be compared with that of Mahalath (Ps. liii.). But the LXX. (ἐν ὕμνοις), and Vulg. (*in hymnis*), evidently read "Neginoth" in the plural, which occurs in the titles of five Psalms, and is perhaps the true reading. Whether the word be singular or plural, it is the general term by which all stringed instruments are described. In the singular it has the derived sense of "a song sung to the accompaniment of a stringed instrument," and generally of a taunting character (Job xxx. 9; Ps. lxix. 12; Lam. iii. 14). [NEGINOTH.] [W. A. W.]

NEG'INOTH (נְגִינוֹת). This word is found in the titles of Ps. iv. vi. liv. lv. lxvii. lxxvi., and the margin of Hab. iii. 19, and there seems but little doubt that it is the general term denoting all stringed instruments whatsoever, whether played with the hand, like the harp and guitar, or with a plectrum.[a] It thus includes all those instruments which in the A. V. are denoted by the special terms "harp," "psaltery" or "viol," "sackbut," as well as by the general descriptions "stringed instruments" (Ps. cl. 4), "instruments of music" (1 Sam. xviii. 6), or, as the margin gives it, "three-stringed instruments," and the "instrument of ten strings" (Ps. xxxiii. 2, xcii. 3, cxliv. 9). "The chief musician on *Neginoth*" was therefore the conductor of that portion of the Temple-choir who played upon the stringed instruments, and who are mentioned in Ps. lxviii. 25 (נַגָּנִים, *nágēnim*). The root (נָגַן = κρούειν) from which the word is derived occurs in 1 Sam. xvi. 16, 17, 18, 23, xviii. 10, xix. 9, Is. xxxviii. 20, and a comparison of these passages confirms what has been said with regard to its meaning. The author of the *Shilte Haggibborim* quoted by Kircher (*Musurgia*, i. 4, p. 48), describes the Neginoth as instruments of wood, long and round, pierced with several apertures, and having three strings of gut stretched across them, which were played with a bow of horsehair. It is extremely doubtful, however, whether the Hebrews were acquainted with anything so closely resembling the modern violin. [W. A. W.]

NEHELAMITE, THE (הַנֶּחֱלָמִי: ὁ Ἀλαμήλης: *Nehelamites*). The designation of a man named Shemaiah, a false prophet, who went with

[a] Hence Symmachus renders διὰ ψαλτηρίου.

the captivity to Babylon (Jer. xxix. 24, 31, 32). The name is no doubt formed from that either of Shemaiah's native place, or the progenitor of his family; which of the two is uncertain. No place called Nehelam is mentioned in the Bible, or known to have existed in Palestine,[a] nor does it occur in any of the genealogical lists of families. It resembles the name which the LXX. have attached to Ahijah the Prophet, namely the Enlamite — ὁ Ενλαμεί; but by what authority they substitute that name for "the Shilonite" of the Hebrew text is doubtful. The word "Nehelamite" also probably contains a play on the "dreams" (*halam*) and "dreamers," whom Jeremiah is never wearied of denouncing (see chaps. xxiii. xxvii. xxix.). This is hinted in the margin of the A. V.—from what source the writer has not been able to discover. [G.]

NEHEMI'AH (נְחֶמְיָה: Νεεμίας). 1. Son of Hachaliah, and apparently of the tribe of Judah, since his fathers were buried at Jerusalem, and Hanani his kinsman seems to have been of that tribe (i. 2, ii. 3, vii. 2). He is called indeed "Nehemiah the Priest" (Neh. sacerdos) in the Vulgate of 2 Macc. i. 21; but the Greek has it, that "Nehemiah ordered *the priests* (ἱερεῖς) to pour the water," &c. Nor does the expression in ver. 18, that Nehemiah "offered sacrifice," imply any more than that he provided the sacrifices. Others again have inferred that he was a priest from Neh. x. 1-8; but the words "these were the priests," naturally apply to the names which follow Nehemiah's, who signed first as the head of the whole nation. The opinion that he was connected with the house of David is more feasible, though it cannot be proved. The name of Hanani his kinsman, as well as his own name, are found slightly varied in the house of David, in the case of Hananiah the son of Zerubbabel (1 Chr. iii. 19), and Naum (Luke iii. 25).[b] If he were of the house of David, there would be peculiar point in his allusion to his "fathers' sepulchres" at Jerusalem. Malalas of Antioch (*Chronogr.* vi. p. 160), as cited by Grimm, on 2 Macc. i. 21, singularly combines the two views, and calls him "Nehemiah the priest, of the seed of David."

All that we know certainly concerning this eminent man is contained in the book which bears his name. His autobiography first finds him at Shushan, the winter[c] residence of the kings of Persia, in high office as the cupbearer of king Artaxerxes Longimanus. In the 20th year of the king's reign, *i. e.* B.C. 445, certain Jews, one of whom was a near kinsman of Nehemiah's, arrived from Judea, and gave Nehemiah a deplorable account of the state of Jerusalem, and of the residents in Judea. He immediately conceived the idea of going to Jerusalem to endeavour to better their state. After three or four months (from Chisleu to Nisan), in which he earnestly sought God's blessing upon his undertaking by frequent prayer and fasting, an opportunity presented itself of obtaining the king's consent to his mission. Having received his appointment as governor[d] of Judea, a troop of cavalry, and letters from the king to the different satraps through whose provinces he was to pass, as well as to Asaph the keeper of the king's forest, to supply him with timber, he started upon his journey: being under promise to return to Persia within a given time. Josephus says that he went in the first instance to Babylon, and gathered round him a band of exiled Jews, who returned with him. This is important as possibly indicating that the book which Josephus followed understood the Nehemiah mentioned in Ezr. ii. 2; Neh. vii. 7, to be the son of Hachaliah.

Nehemiah's great work was rebuilding, for the first time since their destruction by Nebuzaradan, the walls of Jerusalem, and restoring that city to its former state and dignity, as a fortified town. It is impossible to over estimate the importance to the future political and ecclesiastical prosperity of the Jewish nation of this great achievement of their patriotic governor. How low the community of the Palestine Jews had fallen, is apparent from the fact that from the 6th of Darius to the 7th of Artaxerxes, there is no history of them whatever; and that even after Ezra's commission, and the ample grants made by Artaxerxes in his 7th year, and the considerable reinforcements, both in wealth and numbers, which Ezra's government brought to them, they were in a state of abject "affliction and reproach" in the 20th of Artaxerxes; their country pillaged, their citizens kidnapped and made slaves of by their heathen neighbours, robbery and murder rife in their very capital, Jerusalem almost deserted, and the Temple falling again into decay. The one step which could resuscitate the nation, preserve the Mosaic institutions, and lay the foundation of future independence, was the restoration of the city walls. Jerusalem being once again secure from the attacks of the marauding heathen, civil government would become possible, the spirit of the people, and their attachment to the ancient capital of the monarchy would revive, the priests and Levites would be encouraged to come into residence, the tithes and first-fruits and other stores would be safe, and Judah, if not actually independent, would preserve the essentials of national and religious life. To this great object therefore Nehemiah directed his whole energies without an hour's unnecessary delay.[e] By word and example he induced the whole population, with the single exception of the Tekoite nobles, to commence building with the utmost vigour, even the lukewarm high-priest Eliashib performing his part. In a wonderfully short time the walls seemed to emerge from the heaps of burnt rubbish, and to encircle the city as in the days of old. The gateways also were rebuilt, and ready for the doors to be hung upon them. But it soon became apparent how wisely Nehemiah had acted in hastening on the work. On his very first arrival, as governor, Sanballat and Tobiah had

[a] The Targum gives the name as *Helam*, חֵילָם. A place of this name lay somewhere between the Jordan and the Euphrates. See vol. i. 780 a.

[b] See *Genealog. of our Lord J. C.*, p. 145. [NEHEMIAH, SON OF AZBUK.]

[c] Ecbatana was the summer, Babylon the spring, and Persepolis the autumn residence of the kings of Persia (Pilkington). Susa was the principal palace (Strab. lib. xv. cap. iii. §3).

[d] פַּחַת. the term applied to himself and other satraps by Nehemiah. The meaning and etymology of Tirshatha, which is applied only to Nehemiah, are doubtful. It is by most modern scholars thought to mean governor (Gesen. *s. v.*); but the sense cupbearer, given by older commentators, seems more probable.

[e] The three days, mentioned Neh. ii. 11, and Ezr. viii. 32, seems to point to some customary interval, perhaps to purification after a journey. See in Cruden's Concordance "Third Day" and "Three Days."

given unequivocal proof of their mortification at his appointment; and, before the work was even commenced, had scurrilously asked whether he intended to rebel against the king of Persia. But when the restoration was seen to be rapidly progressing, their indignation knew no bounds. They not only poured out a torrent of abuse and contempt upon all engaged in the work, but actually made a great conspiracy to fall upon the builders with an armed force and put a stop to the undertaking. The project was defeated by the vigilance and prudence of Nehemiah, who armed all the people after their families, and showed such a strong front that their enemies dared not attack them. This armed attitude was continued from that day forward. Various stratagems were then resorted to to get Nehemiah away from Jerusalem, and if possible to take his life. But that which most nearly succeeded was the attempt to bring him into suspicion with the king of Persia, as if he intended to set himself up for an independent king, as soon as the walls were completed. It was thought that the accusation of rebellion would also frighten the Jews themselves, and make them cease from building. Accordingly a double line of action was taken. On the one hand Sanballat wrote a letter to Nehemiah, in an apparently friendly tone, telling him, on the authority of Geshem, that it was reported among the heathen (*i. e.* the heathen nations settled in Samaria, and Galilee of the nations), that he was about to head a rebellion of the Jews, and that he had appointed prophets to aid in the design by prophesying of him, "thou art the king of Judah;" and that he was building the walls for this purpose. This was sure, he added, to come to the ears of the king of Persia, and he invited Nehemiah to confer with him as to what should be done. At the same time he had also bribed Noadiah the prophetess, and other prophets, to induce Nehemiah by representations of his being in danger, to take refuge in the fortress of the Temple, with a view to cause delay, and also to give an appearance of conscious guilt. While this portion of the plot was conducted by Sanballat and Tobiah, a yet more important line of action was pursued in concert with them by the chief officers of the king of Persia in Samaria. In a letter addressed to Artaxerxes they represented that the Jews had rebuilt the walls of Jerusalem, with the intent of rebelling against the king's authority and recovering their dominion on "this side the river." Referring to former instances of the seditious spirit of the Jewish people, they urged that if the king wished to maintain his power in the province he must immediately put a stop to the fortification. This artful letter so far wrought upon Artaxerxes, that he issued a decree stopping the work till further orders.[f] It is probable that at the same time he recalled Nehemiah, or perhaps Nehemiah's leave of absence had previously expired; in either case had the Tirshatha been less upright and less wise, and had he fallen into the trap laid for him, his life might have been in great danger. The sequel, however, shows that his perfect integrity was apparent to the king. For after a delay, perhaps of several years, he was permitted to return to Jerusalem, and to crown his work by repairing the Temple, and dedicating the walls. What, however, we have here to notice is, that owing to Nehemiah's wise haste, and his refusal to pause for a day in his work, in spite of threats, plots, and insinuations, the designs of his enemies were frustrated. The wall was actually finished and ready to receive the gates, before the king's decree for suspending the work arrived. A little delay therefore was all they were able to effect. Nehemiah does not indeed mention this adverse decree, which may have arrived during his absence, nor give us any clue to the time of his return; nor should we have suspected his absence at all from Jerusalem, but for the incidental allusion in ch. ii. 6, xiii. 6, coupled with the long interval of years between the earlier and later chapters of the book. But the interval between the close of ch. vi. and the beginning of ch. vii. is the only place where we can suppose a considerable gap in time, either from the appearance of the text, or the nature of the events narrated. It seems to suit both well to suppose that Nehemiah returned to Persia, and the work stopped immediately after the events narrated in vi. 16-19, and that chapter vii. goes on to relate the measures adopted by him upon his return with fresh powers. These were, the setting up the doors in the various gates of the city, giving a special charge to Hanani and Hananiah, as to the time of opening and shutting the gates, and above all providing for the due peopling of the city, the numbers of which were miserably small, and the rebuilding of the numerous decayed houses within the walls. Then followed a census of the returned captives, a large collection of funds for the repair of the Temple, the public reading of the law to the people by Ezra (who now appears again on the scene, perhaps having returned from Persia with Nehemiah), a celebration of the Feast of Tabernacles, such as had not been held since the days of Joshua; a no less solemn keeping of the Day of Atonement, when the opportunity was taken to enter into solemn covenant with God, to walk in the law of Moses and to keep God's commandments.

It may have been after another considerable interval of time, and not improbably after another absence of the Tirshatha from his government, that the next event of interest in Nehemiah's life occurred, viz., the dedication of the walls of Jerusalem, including, if we may believe the author of 2 Macc. supported by several indications in the Book of Nehemiah, that of the Temple after its repair by means of the funds collected from the whole population. This dedication was conducted with great solemnity, and appears to have been the model of the dedication by Judas Maccabeus, when the Temple was purified and the worship restored at the death of Antiochus Epiphanes, as related 1 Macc. iv. The author of 2 Macc. says that on this occasion Nehemiah obtained the sacred fire which had been hid in a pit by certain priests at the time of the captivity, and was recovered by their descendants, who knew were it was concealed When, however, these priests went to the place, they found only muddy water. By Nehemiah's command they drew this water, and sprinkled it upon the wood of the altar and upon the victims, and when the sun, which had been overclouded, presently shone out, a great fire was immediately kindled, which consumed the sacrifices, to the great wonder

[f] The reader must remember that this application of Ezra iv. 7-23 to this time is novel, and must exercise his own judgment as to its admissibility.

[g] Such as the collection of money and priests' garments mentioned in Neh. vii., 70, Ezr. ii. 68; the allusion to the pollution of the Temple, xiii. 7-9; and the nature of the ceremonies described in ch. xii. 27-43.

of all present. The author also inserts the prayer, a simple and beautiful one, said to have been uttered by the priests, and responded to by Nehemiah, during the sacrifice; and adds, that the king of Persia enclosed the place where the fire was found, and that Nehemiah gave it the name of Naphthar, or cleansing. [NAPHTHAR.] He tells us further that an account of this dedication was contained in the "writings and commentaries of Nehemiah" (2 Macc. ii. 13), and that Nehemiah founded "a library, and gathered together the acts of the kings, and the prophets, and of David, and the epistles of the kings (of Persia) concerning the holy gifts." How much of this has any historical foundation is difficult to determine. It should be added, however, that the son of Sirach, in celebrating Nehemiah's good deeds, mentions only that he "raised up for us the walls that were fallen, and set up the gates and the bars, and raised up our ruins again," Ecclus. xlix. 13. Returning to the sure ground of the sacred narrative, the other principal achievements of this great and good governor may be thus signalised. He firmly repressed the exactions of the nobles, and the usury of the rich, and rescued the poor Jews from spoliation and slavery. He refused to receive his lawful allowance as governor from the people, in consideration of their poverty, during the whole twelve years that he was in office, but kept at his own charge a table for 150 Jews, at which any who returned from captivity were welcome. He made most careful provision for the maintenance of the ministering priests and Levites, and for the due and constant celebration of Divine worship. He insisted upon the sanctity of the precincts of the Temple being preserved inviolable, and peremptorily ejected the powerful Tobias from one of the chambers which Eliashib had assigned to him. He then replaced the stores and vessels which had been removed to make room for him, and appointed proper Levitical officers to superintend and distribute them. With no less firmness and impartiality he expelled from all sacred functions those of the high-priest's family who had contracted heathen marriages, and rebuked and punished those of the common people, who had likewise intermarried with foreigners; and lastly, he provided for keeping holy the Sabbath day, which was shamefully profaned by many, both Jews and foreign merchants, and by his resolute conduct succeeded in repressing the lawless traffic on the day of rest.

Beyond the 32nd year of Artaxerxes, to which Nehemiah's own narrative leads us, we have no account of him whatever. Neither had Josephus. For when he tells us that "when Nehemiah had done many other excellent things . . . he came to a great age and then died," he sufficiently indicates that he knew nothing more about him. The most probable inference from the close of his own memoir, and the absence of any further tradition concerning him is, that he returned to Persia and died there. On reviewing the character of Nehemiah, we seem unable to find a single fault to counterbalance his many and great virtues. For pure and disinterested patriotism he stands unrivalled. The man whom the account of the misery and ruin of his native country, and the perils with which his countrymen were beset, prompted to leave his splendid banishment, and a post of wealth, power, and influence, in the first court in the world, that he might share and alleviate the sorrows of his native land, must have been pre-eminently a patriot. Every act of his during his government bespeaks one who had no selfishness in his nature. All he did was noble, generous, high-minded, courageous, and to the highest degree upright. But to stern integrity he united great humility and kindness, and a princely hospitality. As a statesman he combined forethought, prudence, and sagacity in counsel, with vigour, promptitude, and decision in action. In dealing with the enemies of his country he was wary, penetrating and bold. In directing the internal economy of the state, he took a comprehensive view of the real welfare of the people, and adopted the measures best calculated to promote it. In dealing whether with friend or foe, he was utterly free from favour or fear, conspicuous for the simplicity with which he aimed only at doing what was right, without respect of persons. But in nothing was he more remarkable than for his piety, and the singleness of eye with which he walked before God. He seems to have undertaken everything in dependence upon God, with prayer for His blessing and guidance, and to have sought his reward only from God.

The principal authorities for the events of Nehemiah's life, after Josephus, are Carpzov's *Introduct. ad N. T.*; Eichhorn, *Einleitung*; Hävernick's *Einleit.*; Rambach *in Lib. Nehem.*; Leclerc *in Lib. histor. N. T.*, besides those referred to in the following article. Those who wish to see the questions discussed of the 20th Artaxerxes, as the terminus a quo Daniel's seventy weeks commence, and also the general chronology of the times, may refer to *Genealogy of our Lord Jesus Christ*, ch. xi.; and for a different view to Prideaux, *Connect.* i. 251, &c. The view of Scaliger, Hottinger, &c., adopted by Dr. Mill, Vindic. *of our Lord's Genealogy*, p. 165 *note*; that Artaxerxes Mnemon was Nehemiah's patron, is almost universally abandoned. The proof from the parallel genealogies of the kings of Persia and the high-priests, that he was Longimanus, is stated in a paper printed for the Chronolog. Institute by the writer of this article.

2. One of the leaders of the first expedition from Babylon to Jerusalem under Zerubbabel (Ezr. ii. 2; Neh. vii. 7).

3. Son of Azbuk, and ruler of the half part of Beth-zur, who helped to repair the wall of Jerusalem (Neh. iii. 16). Beth-zur was a city of Judah (Josh. xv. 58; 1 Chr. ii. 45), belonging to a branch of Caleb's descendants, whence it follows that this Nehemiah was also of the tribe of Judah.

[A. C. H.]

NEHEMIAH, BOOK OF. The latest of all the historical books of Scripture, both as to the time of its composition and the scope of its narrative in general, and as to the supplementary matter of ch. xii. in particular, which reaches down to the time of Alexander the Great. This book, like the preceding one of Ezra [EZRA, BOOK OF], is clearly and certainly not all by the same hand. By far the principal portion, indeed, is the work of Nehemiah, who gives, in the first person, a simple narrative of the events in which he himself was concerned; but other portions are either extracts from various chronicles and registers, or supplementary narratives and reflections, some apparently by Ezra, others, perhaps, the work of the same person who inserted the latest genealogical extracts from the public chronicles.

1. The main history contained in the book of Nehemiah covers about 12 years, viz., from the

20th to the 32nd year of Artaxerxes Longimanus, i.e. from B.C. 445 to 433. For so we seem to learn distinctly from v. 14 compared with xiii. 6; nor does there seem to be *any historical ground whatever* for asserting with Prideaux and many others that the government of Nehemiah, after his return in the 32nd of Artaxerxes, extended to the 15th year of Darius Nothus, and that the events of ch. xiii. belong to this later period (Prid. *Connect.* B.C. 409). The argument attempted to be derived from Neh. xiii. 28, that Eliashib was then dead and Joiada his son high-priest, is utterly without weight. There is a precisely parallel phrase in 2 Chr. xxxv. 3, where we read "the house which Solomon the son of David king of Israel did build." But the doubt whether the title "king of Israel" applies to David or Solomon is removed by the following verse, where we read, "according to the writing of David king of Israel, and according to the writing of Solomon his son." The LXX. also in that passage have βασιλέως agreeing with David. There is, therefore, not the slightest pretence for asserting that Nehemiah was governor after the 32nd of Artaxerxes (see below).

The whole narrative gives us a graphic and interesting account of the state of Jerusalem and the returned captives in the writer's times, and, incidentally, of the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuation of the genealogical registers and the succession of the high-priesthood to the close of the Persian empire on the other. The view given of the rise of two factions among the Jews—the one the strict religious party, adhering with uncompromising faithfulness to the Mosaic institutions, headed by Nehemiah; the other, the gentilizing party, ever imitating heathen customs, and making heathen connexions, headed, or at least encouraged by the high-priest Eliashib and his family—sets before us the germ of much that we meet with in a more developed state in later Jewish history from the commencement of the Macedonian dynasty till the final destruction of Jerusalem.

Again, in this history as well as in the book of Ezra, we see the bitter enmity between the Jews and Samaritans acquiring strength and definitive form on both religious and political grounds. It would seem from iv. 1, 2, 8 (A. V.), and vi. 2, 5, &c., that the depression of Jerusalem was a fixed part of the policy of Sanballat, and that he had the design of raising Samaria as the head of Palestine, upon the ruin of Jerusalem, a design which seems to have been entertained by the Samaritans in later times.

The book also throws much light upon the domestic institutions of the Jews. We learn incidentally the prevalence of usury and of slavery as its consequence, the frequent and burdensome oppressions of the governors (v. 15), the judicial use of corporal punishment (xiii. 25), the continuance of false prophets as an engine of policy, as in the days of the kings of Judah (vi. 7, 12, 14), the restitution of the Mosaic provision for the maintenance of the Priests and Levites and the due performance of the Temple service (xiii. 10-3), the much freer promulgation of the Holy Scriptures by the public reading of them (viii. 1, ix. 3, xiii. 1), and the more general acquaintance[a] with them arising from their collection into one volume and the multiplication of copies of them by the care of Ezra the scribe and Nehemiah himself (2 Macc. ii. 13), as well as from the stimulus given to the art of reading among the Jewish people during their residence in Babylon [HILKIAH]; the mixed form of political government still surviving the ruin of their independence (v. 7, 13, x.), the reviving trade with Tyre (xiii. 16), the agricultural pursuits and wealth of the Jews (v. 11, xiii. 15), the tendency to take heathen wives, indicating, possibly, a disproportion in the number of Jewish males and females among the returned captives (x. 30, xiii. 3, 23), the danger the Jewish language was in of being corrupted[b] (xiii. 24), with other details which only the narrative of an eye-witness would have preserved to us.

Some of these details give us incidentally information of great historical importance.

(*a.*) The account of the building and dedication of the wall, iii., xii., contains the most valuable materials for settling the topography of Jerusalem to be found in Scripture. [JERUSALEM, vol. i. pp. 1026-27.] (Thrupp's *Ancient Jerusalem.*)

(*b.*) The list of returned captives who came under different leaders from the time of Zerubbabel to that of Nehemiah (amounting in all to only 42,360 adult males, and 7337 servants), which is given in ch. vii., conveys a faithful picture of the political weakness of the Jewish nation as compared with the times when Judah alone numbered 470,000 fighting men (1 Chr. xxi. 5). It justifies the description of the Palestine Jews as "the remnant that are left of the captivity" (Neh. i. 3), and as "these feeble Jews" (iv. 2), and explains the great difficulty felt by Nehemiah in peopling Jerusalem itself with a sufficient number of inhabitants to preserve it from assault (vii. 3, 4, xi. 1, 2). It is an important aid, too, in understanding the subsequent history, and in appreciating the patriotism and valour by which they attained their independence under the Maccabees.

(*c.*) The lists of leaders, priests, Levites, and of those who signed the covenant, reveal incidentally much of the national spirit as well as of the social habits of the captives, derived from older times. Thus the fact that *twelve* leaders are named in Neh. vii. 7, indicates the feeling of the captives that they represented the *twelve* tribes, a feeling further evidenced in the expression "the men of the people of Israel." The enumeration of 21 and 22, or, if Zidkijah stands for the head of the house of Zadok, 23 chief priests in x. 1-8, xii. 1-7, of whom 9 bear the names of those who were heads of courses in David's name (1 Chr. xxiv.) [JEHOIARIB], shows how, even in their wasted and reduced numbers, they struggled to preserve these ancient institutions, and also supplies the reason of the mention of these particular 22 or 23 names. But it does more than this. Taken in conjunction with the list of those who sealed (x. 1-27), it proves the existence of a social custom, the knowledge of which is of absolute necessity to keep us from gross chronological error, that, viz., of calling

[a] This lately acquired acquaintance with the Scriptures appears incidentally in the large quotations in the prayers of Nehemiah and the Levites, chaps. i., ix., xiii. 26, &c.

[b] The evidence of Hebrew having ceased to be the vernacular language of the Jews, which some find in Neh. viii. 8, is very doubtful, and dependent on the meaning of מְפֹרָשׁ.

chiefs by the name of the clan or house of which they were chiefs. One of the causes of the absurd confusion which has prevailed, as to the times of Zerubbabel and Nehemiah respectively, has been the mention, *e. g.* of Jeshua and Kadmiel (Ezr. iii. 9) as taking part with Zerubbabel in building the Temple, while the very same Levites take an active part in the reformation of Nehemiah (Neh. ix. 4, 5, x. 9, 10); and the statement that some 21 or 22 priests came up with Zerubbabel (xii. 1-7), coupled with the fact that these very same names were the names of those who sealed the covenant under Nehemiah (x. 1-8). But immediately we perceive that these were the names of the courses, and of great Levitical houses (as a comparison of 1 Chr. xxiv.; Ezr. ii. 40; Neh. vii. 43; and of Neh. x. 14-27 with vii. 8-38, proves that they were), the difficulty vanishes, and we have a useful piece of knowledge to apply to many other passages of Scripture. It would be very desirable, if possible, to ascertain accurately the rules, if any, under which this use of proper names was confined.

(*d.*) Other miscellaneous information contained in this book, embraces the hereditary crafts practised by certain priestly families, *e. g.* the apothecaries, or makers of the sacred ointments and incense (iii. 8), and the goldsmiths, whose business it probably was to repair the sacred vessels (iii. 8), and who may have been the ancestors, so to speak, of the money-changers in the Temple (John ii. 14, 15); the situation of the garden of the kings of Judah by which Zedekiah escaped (2 K. xxv. 4), as seen iii. 15; and statistics, reminding one of Domesday-Book, concerning not only the cities and families of the returned captives, but the number of their horses, mules, camels, and asses (ch. vii.): to which more might be added.

The chief, indeed the only real historical difficulty in the narrative, is to determine the time of the dedication of the wall, whether in the 32nd year of Artaxerxes or before. The expression in Neh. xiii. 1, "On that day," seems to fix the reading of the law to the same day as the dedication (see xii. 43). But if so the dedication must have been after Nehemiah's return from Babylon (mentioned xiii. 7); for Eliashib's misconduct, which occurred "before" the reading of the law, happened in Nehemiah's absence. But then, if the wall only took 52 days to complete (Neh. vi. 15), and was begun immediately Nehemiah entered upon his government, how came the dedication to be deferred till 12 years afterwards? The answer to this probably is that, in the first place, the 52 days are not to be reckoned from the commencement of the building, seeing that it is incredible that it should be completed in so short a time by so feeble a community and with such frequent hindrances and interruptions; seeing, too, that the narrative itself indicates a much longer time. Such passages as Nehemiah iv. 7, 8, 12, v., and v. 16 in particular, vi. 4, 5, coupled with the indications of temporary cessation from the work which appear at iv. 6, 10, 15, seem quite irreconcileable with the notion of less than two months for the whole. The 52 days, therefore, if the text is sound, may be reckoned from the resumption of the work after iv. 15, and a time exceeding two years may have elapsed from the commencement of the building. But even then it would not be ready for dedication. There were the gates to be hung, perhaps much rubbish to be removed, and the ruined houses in the immediate vicinity of the walls to be repaired. Then, too, as we shall see below, there were repairs to be done to the Temple, and it is likely that the dedication of the walls would not take place till those repairs were completed. Still, even these causes would not be adequate to account for a delay of 12 years. Josephus, who is seldom in harmony with the text of Nehemiah, though he justifies our suspicion that a longer time must have elapsed, by assuming two years and four months to the rebuilding, and placing the completion in the 28th year of the king's reign whom he calls Xerxes (thus interposing an interval of 8 years between Nehemiah's arrival at Jerusalem as governor and the completion), yet gives us no real help. He does not attempt to account for the length of time, he makes no allusion to the dedication, except as far as his statement that the wall was completed in the ninth month, Chisleu (instead of Elul, the sixth, as Neh. vi. 15), may seem to point to the dedication (1 Macc. iv. 59), and takes not the slightest notice of Nehemiah's return to the king of Persia. We are left, therefore, to inquire for ourselves whether the book itself suggests any further causes of delay. One cause immediately presents itself, viz., that Nehemiah's leave of absence from the Persian court, mentioned ii. 6, may have drawn to a close shortly after the completion of the wall, and before the other above-named works were complete. And this is rendered yet more probable by the circumstance, incidentally brought to light, that, in the 32nd year of Artaxerxes, we know he was with the king (xiii. 6).

Other circumstances, too, may have concurred to make it imperative for him to return to Persia without delay. The last words of ch. vi. point to some new effort of Tobiah to interrupt his work, and the expression used seems to indicate that it was the threat of being considered as a rebel by the king. If he could make it appear that Artaxerxes was suspicious of his fidelity, then Nehemiah might feel it matter of necessity to go to the Persian court to clear himself of the charge. And this view both receives a remarkable confirmation from, and throws quite a new light upon, the obscure passage in Ezr. iv. 7-23. We have there a detailed account of the opposition made by the Samaritan nations to the building of the WALLS of Jerusalem, in the reign of ARTAXERXES, and a copy of the letter they wrote to the king, accusing the Jews of an intention to rebel as soon as the wall should be finished; by which means they obtained a decree stopping the building till the king's further orders should be received. Now, if we compare Neh. vi. 6, 7, where mention is made of the report "among the heathen" as to the intended rebellion of Nehemiah, with the letter of the heathen nations mentioned in Ezr. iv., and also recollect that the only time when, as far as we know, the WALLS of Jerusalem were attempted to be rebuilt, was when Nehemiah was governor, it is difficult to resist the conclusion that Ezra iv. 7-23 relates to the time of Nehemiah's government, and explains the otherwise unaccountable circumstance that 12 years elapsed before the dedication of the walls was completed. Nehemiah may have started on his journey on receiving the letters from Persia (if such they were) sent him by Tobiah, leaving his lieutenants to carry on the works, and after his departure Rehum and Shimshai and their companions may have come up to Jerusalem with

the king's decree and obliged them to desist. It should seem, however, that at Nehemiah's arrival in Persia, he was able to satisfy the king of his perfect integrity, and that he was permitted to return to his government in Judaea. His leave of absence may again have been of limited duration, and the business of the census, of repeopling Jerusalem, setting up the city gates, rebuilding the ruined houses, and repairing the Temple, may have occupied his whole time till his second return to the king. During this second absence another evil arose — the gentilizing party recovered strength, and the intrigues with Tobiah (vi. 17), which had already begun before his first departure, were more actively carried on, and led so far that Eliashib the high-priest actually assigned one of the store-chambers in the Temple to Tobiah's use. This we are not told of till xiii. 4-7, when Nehemiah relates the steps he took on his return. But this very circumstance suggests that Nehemiah does not relate the events which happened in his absence, and would account for his silence in regard to Rehum and Shimshai. We may thus, then, account for 10 or 11 years having elapsed before the dedication of the walls took place. In fact it did not take place till the last year of his government; and this leads to the right interpretation of ch. xiii. 6 and brings it into perfect harmony with v. 14, a passage which obviously imports that Nehemiah's government of Judaea lasted only 12 years, viz., from the 20th to the 32nd of Artaxerxes. For the literal and grammatical rendering of xiii. 6 is, "And in all this *time* was not I at Jerusalem: BUT in the two-and-thirtieth year of Artaxerxes king of Babylon, came I unto the king, and after certain days obtained I leave of the king, and I came to Jerusalem" — the force of וְ after a negative being *but* rather than *for* (Gesen. *Thes.* p. 680); the meaning of the passage being, therefore, not that he left Jerusalem to go to Persia in the 32nd of Artaxerxes, but, on the contrary, that in that year he returned from Persia to Jerusalem. The dedication of the walls and the other reforms named in ch. xiii. were the closing acts of his administration.

It has been already mentioned that Josephus does not follow the authority of the Book of Nehemiah. He detaches Nehem. viii. from its context, and appends the narratives contained in it to the times of Ezra. He makes Ezra die before Nehemiah came to Jerusalem as Governor, and consequently ignores any part taken by him in conjunction with Nehemiah. He makes no mention either whatever of Sanballat in the events of Nehemiah's government, but places him in the time of Jaddua and Alexander the Great. He also makes the daughter of Sanballat marry a son, not of Joiada, as Neh. xiii. 28, but of Jonathan, viz. Manasseh the brother of the High Priest Jaddua, thus entirely shifting the age of Sanballat from the reign of Artaxerxes Longimanus, to that of Darius Codomanus, and Alexander the Great. It is scarcely necessary to observe, that as Artaxerxes Longimanus died B.C. 424, and Alexander the Great was not master of Syria and Palestine till B.C. 332, all attempts to reconcile Josephus with Nehemiah must be lost labour. It is equally clear that on every ground the authority of Josephus must yield to that of Nehemiah. The only question therefore is what was the cause of Josephus's variations. Now, as regards the appending the history in Neh. viii. to the times of Ezra, we know that he was guided by the authority of the Apocryphal 1 Esdr. as he had been in the whole story of Zerubbabel and Darius. From the florid additions to his narrative of Nehemiah's first application to Artaxerxes, as well as from the passage below referred to in 2 Macc. i. 23, we may be sure that there were apocryphal versions of the story of Nehemiah.[e] The account of Jaddua's interview with Alexander the Great savours strongly of the same origin. There can be little doubt, therefore, that in all the points in which Josephus differs from Nehemiah, he followed apocryphal Jewish writings, some of which have since perished. The causes which led to this were various. One doubtless was the mere desire for matter with which to fill up his pages where the narrative of the canonical Scriptures is meagre. In making Nehemiah succeed to the government after Ezra's death, he was probably influenced partly by the wish to give an orderly, dignified appearance to the succession of Jewish governors, approximating as nearly as possible to the old monarchy, and partly by the desire to spin out his matter into a *continuous* history. Then the difficulties of the books of Ezra and Nehemiah, which the compiler of 1 Esdr. had tried to get over by his arrangement of the order of events, coupled with Josephus's gross ignorance of the real order of the Persian Kings, and his utter misconception as to what monarchs are spoken of in the books of Ezra, Nehemiah, and Esther, had also a large influence. The writer, however, who makes Darius Codomanus succeed Artaxerxes Longimanus, and confounds this last-named king with Artaxerxes Mnemon; who also thinks that Xerxes reigned above 32 years, and who falsifies his best authority, altering the names, as in the case of the substitution of Xerxes for Artaxerxes throughout the book of Nehemiah, and suppressing the facts, as in the case of the omission of all mention of Ezra, Tobias, and Sanballat during the government of Nehemiah, is not entitled to much deference on our parts. What has been said shows clearly how little Josephus's unsupported authority is worth; and how entirely the authenticity and credibility of Nehemiah remains unshaken by his blunders and confusions, and that there is no occasion to resort to the improbable hypothesis of two Sanballats, or to attribute to Nehemiah a patriarchal longevity, in order to bring his narrative into harmony with that of the Jewish historian.

2. As regards the authorship of the book, it is admitted by all critics that it is, as to its main parts, the genuine work of Nehemiah. But it is no less certain that interpolations and additions have been made in it since his time;[d] and there is considerable diversity of opinion as to what are the portions which have been so added. From i. 1 to vii. 6, no doubt or difficulty occurs. The writer speaks throughout in the first person singular, and in his character of governor, הַתִּרְשָׁתָא. Again, from xii. 31, to the end of the book (except xii. 44-47), the narrative is continuous, and the use of the first person singular constant (xii. 30, 38, 40, xiii. 6, 7, &c.). It is therefore only in the intermediate chapters, vii. 6 to xii. 26, and xii. 44-47), that we

[e] It is worth remarking, that the apocryphal book quoted in 2 Macc. i. 23 seems to have made Nehemiah contemporary with Jonathan, or Johanan, the high-priest.

[d] K. F. Keil, in his *Einleitung*, endeavours indeed to vindicate Nehemiah's authorship for the whole book, but without success.

have to enquire into the question of authorship; and this we will do by sections:—

(*a.*) The first section begins at Neh. vii. 6, and ends in the first half of viii. 1, at the words "one man." It has already been asserted [EZRA, BOOK OF, vol. i. p. 607*a*] that this section is identical with the paragraph beginning Ezr. ii. 1, and ending iii. 1; and it was there also asserted that the paragraph originally belonged to the book of Nehemiah, and was afterwards inserted in the place it occupies in Ezra.[e] Both these assertions must now be made good: and first as to the identity of the two passages. They *are* actually identical word for word, and letter for letter, except in two points. One that the numbers repeatedly vary. The other that there is a difference in the account of the offerings made by the governor, the nobles, and the people. But it can be proved that these are merely variations (whether accidental or designed) of the same text. In the first place the two passages are one and the same. The heading, the contents, the narrative about the sons of Barzillai, the fact of the offerings, the dwelling in their cities, the coming of the seventh month, the gathering of all the people to Jerusalem as one man, are in words and in sense the very self-same passage. The idea that the very same words, extending to 70 verses, describe different events, is simply absurd and irrational. The numbers therefore must originally have been the same in both books. But next, when we examine the varying numbers, we see the following particular proofs that the variations are corruptions of the original text. Though the items vary, the sum total, 42,360, is the same (Ezr. ii. 64; Neh. vii. 66.) In like manner the totals of the servants, the singing men and women, the horses, mules, and asses are all the same, except that Ezra has two hundred, instead of two hundred and forty-five, singing men and women. The numbers of the Priests and of the Levites are the same in both, except that the singers, the sons of Asaph, are 128 in Ezra against 148 in Nehemiah, and the porters 139 against 138. Then in each particular case when the numbers differ, we see plainly how the difference might arise. In the statement of the number of the sons of Arah (the first case in which the lists differ), Ezr. ii. 5, we read, שִׁבְעַ מֵאוֹת חֲמִשָּׁה וְשִׁבְעִים, "seven hundred five and seventy," whereas in Neh. vii. 10, we read, שֵׁשׁ מֵאוֹת חֲמִשִּׁים וּשְׁנָיִם. But the order of the numerals in Ezr. ii. 5, where the units precede the tens, is the only case in which this order is found. Obviously, therefore, we ought to read חֲמִשִּׁים, instead of חֲמִשָּׁה, *fifty* instead of *five*. No less obviously שִׁבְעִים may be a corruption of the almost identical שְׁנִים, and probably caused the preceding change of חֲמִשָּׁה into חֲמִשִּׁים.[f] But the tens and units being identical, it is evident that the variation in the hundreds is an error, arising from both *six* and *seven* beginning with the same letter שׁ. The very same interchange of six and seven takes place in the number of Adonikam, and Bigvai, only in the units (Neh. vii. 18, 19; Ezr. ii. 13, 14). In Pahath-Moab, the variation from 2812, Ezr. ii. 6, to 2818 Neh. vii. 11; in Zattu, from 945 Ezr. ii. 8, to 845 Neh. vii. 13; in Binnui, from 642 to 648 in Bebai, from 623 to 628; in Hashum, from 223 to 328; in Senaah, from 3630 to 3930; the same cause has operated, viz. that in the numbers two and eight, three and eight, nine and six, the same initial שׁ is found; and the resemblance in the numbers may probably have been greatly increased by abbreviations. In Azgad (1222 and 2322) as in Senaah, the mere circumstance of the tens and units being the same in both passages, while the thousands differ by the mere addition or omission of a final ם, is sufficient proof that the variation is a clerical one only. In Adin, Neh. vii. 20, six for *four*, in the hundreds, is probably caused by the *six hundred* of the just preceding Adonikam. In the four remaining cases the variations are equally easy of explanation, and the result is to leave not the slightest doubt that the enumeration was identical in the first instance in both passages. It may, however, be added as completing the proof that these variations do not arise from Ezra giving the census in Zerubbabel's time, and Nehemiah that in his own time (as Ceillier, Prideaux, and other learned men have thought), that in the cases of Parosh, Pahath-Moab, Elam, Shephatiah, Bebai, Azgad, and Adonikam, of which we are told in Ezr. viii. 3-14, that considerable numbers came up to Judæa in the reign of Artaxerxes—long subsequent therefore to the time of Zerubbabel—the numbers are either *exactly the same* in Ezr. ii. and Neh. vii., or exhibit such variations as have no relation whatever to the numbers of those families respectively who were added to the Jewish residents in Palestine under Artaxerxes.

To turn next to the offerings. The Book of Ezra (ii. 68, 69) merely gives the sum total, as follows: 61,000 drachms of gold, 5,000 pounds of silver, and 100 priests' garments. The Book of Nehemiah gives no sum total, but gives the following items (vii. 70):

The Tirshatha gave 1000 drachms of gold, 50 basons, 530 priests' garments.

The chief of the fathers gave 20,000 drachms of gold, and 2,200 pounds of silver.

The rest of the people gave 20,000 drachms of gold, 2000 pounds of silver, and 67 priests' garments.

Here then we learn that these offerings were made in three shares, by three distinct parties: the governor, the chief fathers, the people. The sum total of drachms of gold we learn from Ezra, was 61,000. The shares, we learn from Nehemiah, were 20,000 in two out of the three cases, but 1000 in the case of the third and chief donor! Is it not quite evident that in the case of Nehemiah the 20 has slipped out of the text (as in 1 Esdr. v. 45, 60,000 has), and that his real contribution was 21,000? his generosity prompting him to give in excess of his fair third. Next, as regards the pounds of silver. The sum total was, according to Ezra, 5000. The shares were, according to Nehemiah, 2200 pounds from the chiefs, and 2000 from the people. But the LXX. give 2300 for the chiefs, and 2200 for the people, making 4500 in all, and so leaving a deficiency of 500 pounds as

[e] So also Grotius (notes on Ezr. ii. Neh. vii.), with his usual clear sense and sound judgment. See especially his note on Ezr. ii. 1, where he says that many Greek copies of Ezra omit ch. i.

[f] Or if שִׁבְעַ is the right reading in Ezr. ii. 5 (instead of שְׁבָעִים), then the שְׁנַיִם of Neh. vii. 10 is easily accounted for by the fact that the two preceding numbers of Parosh and Shephatiah both end with the same number two.

[g] Observe the odd thousand in both cases

compared with Ezra's total of 5000, and ascribing no silver offering to the Tirshatha. As regards the priests' garments. The sum total as given in both the Hebrew and Greek text of Ezra, and in 1 Esdr. is 100. The items as given in Neh. vii. 70, are 530 + 67 = 597. But the LXX. give 30 + 67 = 97, and that this is nearly correct is apparent from the numbers themselves. For the total being 100, 33 is the nearest whole number to $\frac{100}{3}$, and 67 is the nearest whole number to $\frac{2}{3} \times 100$. So that we cannot doubt that the Tirshatha gave 33 priests' garments, and the rest of the people gave 67, probably in two gifts of 34 and 33, making in all 100. But how came the 500 to be added on to the Tirshatha's tale of garments? Clearly it is a fragment of the missing 500 pounds of silver, which, with the 50 bowls, made up the Tirshatha's donation of silver. So that Neh. vii. 70 ought to be read thus, "The Tirshatha gave to the treasure 21,000 drachms of gold, 50 basons, 500 pounds of silver, and 33 priests' garments." The offerings then, as well as the numbers in the lists, were once identical in both books, and we learn from Ezr. ii. 68, what the book of Nehemiah does not expressly tell us (though the *priests' garments* strongly indicate it), what was the purpose of this liberal contribution, viz. "to set up the House of God in his place" (לְהַעֲמִידוֹ עַל מְכוֹנוֹ). From this phrase occurring in Ezr. ii. just before the account of the building of the Temple by Zerubbabel, it has usually been understood as referring to the rebuilding. But it really means no such thing. The phrase properly implies restoration and preservation, as may be seen in the exactly similar case of the restoration of the Temple by Jehoiada, 2 Chr. xxiv. 13, after the injuries and neglect under Athaliah, where we read, וַיְעַמִּידוּ אֶת־בֵּית הָאֱלֹהִים עַל מַתְכֻנְתּוֹ, "they set the House of God in its state" (comp. also 1. K. xv. 4). The fact then was that, when all the rulers and nobles and people were gathered together at Jerusalem to be registered in the seventh month, advantage was taken of the opportunity to collect their contributions to restore the Temple also (2 Macc. i. 18), which had naturally partaken of the general misery and affliction of Jerusalem, but which it would not have been wise to restore till the rebuilding of the wall placed the city in a state of safety. At the same time, and in the same spirit, they formed the resolutions recorded in Neh. x. 32–39, to keep up the Temple ritual.

It already follows, from what has been said, that the section under consideration is in its right place in the book of Nehemiah, and was inserted subsequently in the book of Ezra out of its chronological order. But one or two additional proofs of this must be mentioned. . . The most convincing and palpable of these is perhaps the mention of the Tirshatha in Ezr. ii. 63, Neh. vii. 65. That the Tirshatha, here and at Neh. vii. 70, means Nehemiah, we are expressly told Neh. viii. 9, x. 1,[b] and therefore it is perfectly certain that what is related Ezr. ii. 62, Neh. vii. 64, happened in Nehemiah's time, and not in Zerubbabel's. Consequently the taking of the census, which gave rise to that incident, belongs to the same time. In other words, the section we are considering is in its original and right place in the book of Nehemiah, and was transferred from thence to the book of Ezra, where it stands out of its chronological order. And this is still further evident from the circumstance that the closing portion of this section is an abbreviation of the same portion as it stands in Nehemiah, proving that the passage existed in Nehemiah before it was inserted in Ezra. Another proof is the mention of Ezra as taking part in that assembly of the people at Jerusalem which is described in Ezr. iii. 1, Neh. viii. 1; for Ezra did not come to Jerusalem till the reign of Artaxerxes (Ezr. vii.). Another is the mention of Nehemiah as one of the leaders under whom the captives enumerated in the census came up, Ezr. ii. 2, Neh. vii. 7: in both which passages the juxtaposition of Nehemiah with Seraiah, when compared with Neh. x. 1, 2, greatly strengthens the conclusion that Nehemiah the Tirshatha is meant. Then again, that Nehemiah should summon all the families of Israel to Jerusalem to take their census, and that, having done so at great cost of time and trouble, he, or whoever was employed by him, should merely transcribe an old census taken nearly 100 years before, instead of recording the result of his own labours, is so improbable that nothing but the plainest necessity could make one believe it. The only difficulty in the way is that the words in Neh. vii. 5, 6, seem to describe the register which follows as "the register of the genealogy of them which came up at the first," and that the expression "and found written therein" requires that the words which follow should be a quotation from that register (comp. vi. 6). To this difficulty (and it is a difficulty at first sight) it is a sufficient answer to say that the words quoted are only those (in Neh. vii. 6) which contain the title of the register found by Nehemiah. His own new register begins with the words at ver. 7: הַבָּאִים, &c., "The men who came with Zerubbabel," &c., which form the descriptive title of the following catalogue.[a] Nehemiah, or those employed by him to take the new census, doubtless made use of the old register (sanctioned as it had been by Haggai and Zechariah) as an authority by which to decide the genealogies of the present generation. And hence it was that when the sons of Barzillai claimed to be entered into the register of priestly families, but could not produce the entry of their house in that old register, Nehemiah refused to admit them to the priestly office (39-42), but made a note of their claim, that it might be decided whenever a competent authority should arise. From all which it is abundantly clear that the section under consideration belongs properly to the book of Nehemiah. It does not follow, however, that it was written in its present form by Nehemiah himself. Indeed the sudden change to the third person, in speaking of the Tirshatha, in ver. 65, 70 (a change which continues regularly till the section beginning xii. 31), is a strong indication of a change in the writer, as is also the use of the term Tirshatha instead of Pechah, which last is the official designation by which Nehemiah speaks of himself and other governors (v. 14, 18, ii. 7, 9, iii. 7). It seems probable, therefore, that ch. vii., from ver. 7, contains the *substance* of what was found in this part of Nehemiah's narrative, but abridged, and in the form of an abstract, which may account for the difficulty of separating Nehemiah's register from

[b] It is worth noticing that Nehemiah's name is mentioned as the Tirshatha in 1 Esdr. v. 40.

[a] Were it not for the mention of Nehemiah and Mordecai in ver. 7, one might have thought Nehemiah's register began with the words, "The number of the men," in ver. 7.

Zerubbabel's, and also for the very abrupt mention of the gifts of the Tirshatha and the people at the end of the chapter. This abstract formed a transition from Nehemiah's narrative in the preceding chapters to the entirely new matter inserted in the following sections.

(*b.*) The next section commences Neh. viii., latter part of ver. 1, and ends Neh. xi. 3. Now throughout this section several things are observable. (1.) Nehemiah does not once speak in the first person (viii. 9, x. 1). (2.) Nehemiah is no longer the principal actor in what is done, but almost disappears from the scene, instead of being, as in the first six chapters, the centre of the whole action. (3.) Ezra for the first time is introduced, and throughout the whole section the most prominent place is assigned either to him personally, or to strictly ecclesiastical affairs. (4.) The prayer in ch. ix. is very different in its construction from Nehemiah's prayer in ch. i., and in its frequent references to the various books of the O. T. singularly suited to the character and acquirements of Ezra, "the ready scribe in the law of Moses." (5.) The section was written by an eye-witness and actor in the events described. This appears by the minute details, *e. g.* viii. 4, 5, 6, &c., and the use of the first person plural (x. 30-39). (6.) There is a strong resemblance to the style and manner of Ezra's narrative, and also an identity in the use of particular phrases (comp. Ezr. iv. 18, Neh. viii. 8; Ezr. vi. 22, Neh. viii. 17). This resemblance is admitted by critics of the most opposite opinions (see Keil's *Einleitung*, p. 461). Hence, as Ezra's manner is to speak of himself in the third as well as in the first person, there is great probability in the opinion advocated by Hävernick and Kleinert,[1] that this section is the work of Ezra. The fact too that 1 Esdr. ix. 38 sqq. annexes Neh. viii. 1-13 to Ezr. x., in which it is followed by Josephus (*Ant.* xi. 5, §5), is perhaps an indication that it was known to be the work of Ezra. It is not necessary to suppose that Ezra himself inserted this or any other part of the present book of Nehemiah in the midst of the Tirshatha's history. But if there was extant an account of these transactions by Ezra, it may have been thus incorporated with Nehemiah's history by the last editor of Scripture. Nor is it impossible that the union of Ezra and Nehemiah as one book in the ancient Hebrew arrangement (as Jerome testifies), under the title of the Book of Ezra, may have had its origin in this circumstance.

(*c.*) The third section consists of ch. xi. 3-36. It contains a list of the families of Judah, Benjamin, and Levi (priests and Levites), who took up their abode at Jerusalem, in accordance with the resolution of the volunteers, and the decision of the lot, mentioned in xi. 1, 2. This list forms a kind of supplement to that in vii. 8-60, as appears by the allusion in xi. 3 to that previous document. For ver. 3 distinguishes the following list of the "dwellers at Jerusalem" from the foregoing one of "Israel, priests, Levites, Nethinim, and children of Solomon's servants," who dwelt in the cities of Israel, as set forth in ch. vii. This list is an extract from the official roll preserved in the national archives, only somewhat abbreviated, as appears by a comparison with 1 Chr. ix., where an abstract of the same roll is also preserved in a fuller form, and in the latter part especially with considerable variations and additions: it seems also to be quite out of its place in Chronicles, and its insertion there probably caused the repetition of 1 Chr. viii. 29-40 which is found in duplicate ix. 35-44: in the latter place wholly unconnected with ix. 1-34, but connected with what follows (ch. x. sqq.), as well as with what precedes ch. ix. Whence it appears clearly that 1 Chr. ix. 2-34 is a later insertion made after Nehemiah's census,[m] but proving by its very incoherence that the book of Chronicles existed previous to its insertion. But this by the way. The nature of the information in this section, and the parallel passage in 1 Chr., would rather indicate a Levitical hand. It might or might not have been the same which inserted the preceding section. If written later, it is perhaps the work of the same person who inserted xii. 1-30, 44-47. In conjunction with 1 Chr. ix. it gives us minute and interesting information concerning the families residing at Jerusalem,[n] and their genealogies, and especially concerning the provision for the Temple-service. The grant made by Artaxerxes (ver. 23) for the maintenance of the singers is exactly parallel to that made by Darius as set forth in Ezr. vi. 8, 9, 10. The statement in ver. 24 concerning Pethahiah the Zarhite, as "at the king's hand in all matters concerning the people," is somewhat obscure, unless perchance it alludes to the time of Nehemiah's absence in Babylon, when Pethahiah may have been a kind of deputy-governor *ad interim*.

(*d.*) From xii. 1 to 26 is clearly and certainly an abstract from the official lists made and inserted here long after Nehemiah's time, and after the destruction of the Persian dynasty by Alexander the Great, as is plainly indicated by the expression Darius the Persian, as well as by the mention of Jaddua. The allusion to Jeshua, and to Nehemiah and Ezra, in ver. 26, is also such as would be made long posterior to their lifetime, and contains a remarkable reference to the two censuses taken and written down, the one in Jeshua and Zerubbabel's time, the other in the time of Nehemiah; for it is evidently from these two censuses, the existence of which is borne witness to in Neh. vii. 5, that the writer of xii. 26 drew his information concerning the priestly families at those two epochs (compare also xii. 47).

The juxtaposition of the list of priests in Zerubbabel's time, with that of those who sealed the covenant in Nehemiah's time, as given below, both illustrates the use of proper names above referred to, and also the clerical fluctuations to which proper names are subject.

(5.) xii. 44-47 is an explanatory interpolation, made in later times, probably by the last reviser of the book, whoever he was. That it is so is evident not only from the sudden change from the first person to the third, and the dropping of the personal narrative (though the matter is one in which Nehemiah necessarily took the lead), but from the fact that it describes the identical transaction described in xiii. 10-13 by Nehemiah himself, where he speaks as we should expect him to speak: "And I made treasurers over the treasuries," &c. The language too of ver. 47 is manifestly that of one looking back upon the times of Zerubbabel and those of Nehemiah as alike past. In like manner xii. 27-30 is the account by the same annotator of what Nehemiah himself relates, xiii. 10-12.

Though, however, it is not difficult thus to point out those passages of the book which were not part of Nehemiah's own work, it is not easy, by cutting them out, to restore that work to its integrity. For Neh. xii. 31 does not fit on well to any part of ch. vii., or, in other words, the latter portion of Nehemiah's work does not join on to the former. Had the former part been merely a kind of diary entered day by day, one might have supposed that it was abruptly interrupted and as abruptly resumed. But as Neh. v. 14 distinctly shows that the whole history was either written or revised by the author after he had been governor twelve years, such a supposition cannot stand. It should seem, therefore, that we have only the first and last parts of Nehemiah's work, and that for some reason the intermediate portion has been displaced to make room for the narrative and documents from Neh. vii. 7 to xii. 27.

And we are greatly confirmed in this supposition by observing that in the very chapter where we first notice this abrupt change of person, we have another evidence that we have not the whole of what Nehemiah wrote. For at the close of chap. vii. we have an account of the offerings made by the governor, the chiefs, and the people; but we are not even told for what purpose these offerings were made. Only we are led to guess that it must have been for the Temple, as the parallel passage in Ezr. ii. tells us it was, by the mention of the priests' garments which formed a part of the offerings. Obviously, therefore, the original work must have contained an account of some transactions connected with repairing or beautifying the Temple, which led to these contributions being made. Now, it so happens that there is a passage in 2 Macc. ii. 13, in which "the writings and commentaries of Nehemiah" are referred to in a way which shows that they contained matter relative to the sacred fire having consumed the sacrifices offered by Nehemiah on some solemn occasion when he repaired and dedicated the Temple, which is not found in the present book of Nehemiah; and if any dependance can be placed upon the account there given, and in i. 18-36, we seem to have exactly the two facts that we want to justify our hypothesis. The one, that Nehemiah's narrative at this part contained some things which were not suited to form part of the Bible;[o] the other, that it formerly contained some account which would be the natural occasion for mentioning the offerings which come in so abruptly at present. If this were so, and the exceptional matter was consequently omitted, and an abridged notice of the offerings retained, we should have exactly the appearance which we actually have in chap. vii.

Nor is such an explanation less suited to connect the latter portion of Nehemiah's narrative with the former. Chap. xii. 31, goes on to describe the dedication of the wall and its ceremonial. How naturally this would be the sequel of that dedication of the restored Temple spoken of by the author of 2 Macc. it is needless to observe. So that if we suppose the missing portions of Nehemiah's history which described the dedication service of the Temple to have followed his description of the census in ch. vii[1], and to have been followed by the account of the offerings, and then to have been succeeded by the dedication of the wall, we have a perfectly natural and consistent narrative. In erasing what was irrelevant, and inserting the intervening matter, of course no pains were taken, because no desire existed, to disguise the operation, or to make the joints smooth; the object being simply to preserve an authentic record without reference to authorship or literary perfection.

Another circumstance which lends much probability to the statement in 2 Macc., is that the writer closely connects what Nehemiah did with what Solomon had done before him, in this, one may guess, following Nehemiah's narrative. But in the extant portion of our book, Neh. i. 6, we have a distinct allusion to Solomon's prayer (1 K. viii. 28, 29), as also in Neh. xiii. 26, we have to another part of Solomon's life. So that on the whole the passage in 2 Macc. lends considerable support to the theory that the middle portion of Nehemiah's work was cut out, and that there was substituted for it partly an abridged abstract, and partly Ezra's narrative and other appended documents.[p]

We may then affirm with tolerable certainty that all the middle part of the Book of Nehemiah has been supplied by other hands, and that the first six chapters and part of the seventh, and the last chapter and half, were alone written by him, the intermediate portion being inserted by those who had authority to do so, in order to complete the history of the transactions of those times. The difference of authorship being marked especially by this, that, in the first and last portions, Nehemiah *invariably* speaks in the first person singular (except in the inserted verses xii. 44-47), but in the middle portion *never*. It is in this middle portion alone that

[o] It is not necessary to believe that Nehemiah wrote all that is attributed to him in 2 Macc. It is very probable that there was an apocryphal version of his book, with additions and embellishments. Still even the original work may have contained matter either not strictly authentic, or for some other reason not suited to have a place in the canon.

[p] Ceillier also supposes that part of Nehemiah's work may be now lost.

matter unsuited to Nehemiah's times (as *e.g.* Neh. xii. 11, 22), is found, that obscurity of connection exists, and that the variety of style (as almost all critics admit) suggests a different authorship. But when it is remembered that the book of Nehemiah is in fact a continuation of the Chronicles,[q] being reckoned by the Hebrews, as Jerome testifies, as one with Ezra, which was confessedly so, and that, as we have seen under EZRA, CHRONICLES, and KINGS, the customary method of composing the national Chronicles was to make use of contemporary writings, and work them up according to the requirements of the case, it will cease to surprise us in the least that Nehemiah's diary should have been so used: nor will the admixture of other contemporary documents with it, or the addition of any reflections by the latest editor of it, in any way detract from its authenticity or authority.

As regards the time when the Book of Nehemiah was put into its present form, we have only the following data to guide us. The latest high-priest mentioned, Jaddua, was doubtless still alive when his name was added. The descriptive addition to the name of Darius (xii. 22) "the Persian," indicates that the Persian rule had ceased, and the Greek rule had begun. Jaddua's name, therefore, and the clause at the end of ver. 22, were inserted early in the reign of Alexander the Great. But it appears that the registers of the Levites, entered into the Chronicles, did not come down lower than the time of Johanan (ver. 23); and it even seems from the distribution of the conjunction "and" in ver. 21, that the name of Jaddua was not included when the sentence was first written, but stopped at *Johanan*, and that Jaddua and the clause about the priests were added later. So that the close of the Persian dominion, and the beginning of the Greek, is the time clearly indicated when the latest additions were made, But whether this addition was anything more than the insertion of the documents contained from ch. xi. 3 to xii. 26, or even much less; or whether at the same time, or at an earlier one, the great alteration was made of substituting the abridgment in ch. vii. in the contemporary narratives in ch. viii. ix. x., for what Nehemiah had written, there seems to be no means of deciding.[r] Nor is the decision of much consequence, except that it would be interesting to know exactly when the volume of Holy Scripture definitively assumed its present shape, and who were the persons who put the finishing hand to it.

3. In respect to language and style, this book is very similar to the Chronicles and Ezra. Nehemiah has, it is true, quite his own manner, and, as De Wette has observed, certain phrases and modes of expression peculiar to himself. He has also some few words and forms not found elsewhere in Scripture; but the general Hebrew style is exactly that of the books purporting to be of the same age. Some words, as מְצִלְתַּיִם, "cymbals," occur in Chron., Ezr., and Neh., but nowhere else. הִתְנַדֵּב occurs frequently in the same three books, but only twice (in Judg. v.) besides. אִגֶּרֶת or אִגֶּרֶתָא, "a letter," is common only to Neh., Esth., Ezr., and Chron. בִּירָה, and its Chaldee equivalent, בִּירְתָא, whether spoken of the palace at Susa, or of the Temple at Jerusalem, as common only to Neh., Ezr., Esth., Dan., and Chron. שְׁנַל to Neh., and Dan., and Ps. xlv. The phrase אֱלֹהֵי הַשָּׁמַיִם, and its Chaldee equivalent, "the God of Heavens," are common to Ezr., Neh., and Dan. מְפֹרָשׁ, "distinctly," is common to Ezr. and Neh. Such words as פַּרְדֵּס, מְדִינָה, סָגָן, and such Aramaisms as the use of חָבַל, i. 7, יְמַלֵּךְ, v. 7, מְדָה, v. 4, &c., are also evidences of the age when Nehemiah wrote. As examples of peculiar words or meanings, used in this book alone, the following may be mentioned:—שָׁבַר בָּ, "to inspect," ii. 13, 15; מָאֵה, in the sense of "interest," v. 11. נוּף (in Hiph.), "to shut," vii. 3; מוֹעֲל, "a lifting up," viii. 6; הֹדָיוֹת, "praises," or "choirs," xii. 8; תַּהֲלוּכָה, "a procession," xii. 32; מִקְרָא in sense of "reading," viii. 8; אֲצֶרֶת, for אֲצִירָה, xiii. 3, where both form and sense are alike unusual.

The Aramean form, יְהוֹדָה, Hiph. of יָדָה for יוֹדָה, is very rare, only five[s] other analogous examples occurring in the Heb. Scriptures, though it is very common in Biblical Chaldee.

The phrase אִישׁ שִׁלְחוֹ הַמַּיִם, iv. 17 (which is omitted by the LXX.) is incapable of explanation. One would have expected, instead of הַמַּיִם, בְּיָדוֹ, as in 2 Chr. xxiii. 10.

הַתִּרְשָׁתָא, "the Tirshatha," which only occurs in Ezr. ii. 63, Neh. vii. 65, 70, viii. 9, x. 1, is of uncertain etymology and meaning. It is a term applied only to Nehemiah, and seems to be more likely to mean "cupbearer" than "governor," though the latter interpretation is adopted by Gesenius (*Thes.* s. v.).

The text of Nehemiah is generally pure and free from corruption, except in the proper names, in which there is considerable fluctuation in the orthography, both as compared with other parts of the same book and with the same names in other parts of Scripture; and also in numerals. Of the latter we have seen several examples in the parallel passages Ezr. ii. and Neh. vii.; and the same lists will give variations in names of men. So will xii. 1-7, compared with xii. 12, and with x. 1-8.

A comparison of Neh. xi. 3, &c., with 1 Chr. ix. 2, &c., exhibits the following fluctuations:—Neh. xi. 4, *Athaiah* of the children of Perez = 1 Chr. ix. 4, *Uthai* of the children of Perez. v. 5, *Maaseiah* the son of Shiloni = v. 5, of the Shilonites, *Asaiah*; v. 9, *Judah* the son of Senuah (Heb. Hasenuah) = v. 7, *Hodaviah* the son of Hasenuah; v. 10, Jedaiah the son of Joiarib, Jachin = v. 10, Jedaiah, Jehoiarib, Jachin; v. 13. *Amashai* son of Azareel = v. 12, *Maasai* son of Jahzerah; v. 17, Micah the son of *Zabdi* = v. 15, Micah the son of *Zichri* (comp. Neh. xii. 35). To which many others might be added.

Many various readings are also indicated by the LXX. version. For example, at ii. 13, for גֵּיא

[q] So Ewald also.

[r] If we knew the real history of the title Tirshatha, it might assist us in determining the date of the passage where it appears.

[s] Ps. xlv. 18, cxvi. 6; 1 Sam. xvii. 47; Is. lii. 8; Ps. xlvi. 22 (*Journ. of Sac. Lit.* Jan. 1862, p. 389).

"dragon," they read תַּאֲנִים, "figs," and render it τῶν συκῶν. At ii. 20, for נָקוּם, "we will arise," they read נְקִיִּים, "pure," and render it καθαροί. At iii. 2, for בָּנוּ, "they built," they read twice בָּנָה, νίων; and so at ver. 14. At iii. 15, for בְּרֵכַת הַשֶּׂלַח לְגַן הַמֶּלֶךְ, "the pool of Siloah by the king's garden," they read ב״ה״ לְגַן ה״, "the king's fleece," and render it κολυμβήθρας τῶν κωδίων τῷ κουρᾷ τοῦ βασιλέως· κουρὰ being the word by which גַּז is rendered in Deut. xviii. 4. הַשֶּׂלַח is rendered by κωδίων, "sheep-skins," in the Chaldee sense of שֶׂלַח or שִׂלְחָא, a fleece recently stripped from the animal (Castell. *Lex.*). At iii. 16, for נֶגֶד, "over against," they read גַּן, "the garden;" comp. ver. 26: in iii. 34, 35 (iv. 2, 3), they seem to have had a corrupt and unintelligible text. At v. 5, for אֲחֵרִים, "others," they read הַחֹרִים, "the nobles:" v. 11, for מֵאַת, "the hundredth," they read מְעַט, "some of," rendering ἀπό: vi. 1, for בָּהּ פֶּרֶץ, there was left no "breach in it," viz., the wall, they read בָּם רוּחַ, "spirit in them," viz., Sanballat, &c., rendering ἐν αὐτοῖς πνοή· vi. 3, for אֶרֶפָּה, "I leave it," they read אֶרְפָּאֶה, "I complete it," τελειώσω· which gives a better sense. At vii. 68, sqq., the number of asses is 2700 instead of 6720; of priests' garments, 30 instead of 530; of pounds of silver, 2300 and 2200, instead of 2200 and 2000, as has been noticed above; and ver. 70, τῷ Νεεμίᾳ, for "the Tirshatha." At xi. 11, for נָגִיד, "ruler," they read נֶגֶד, "over against," ἀντέναντι. At xii. 8, for הַיְדוּת, "thanksgiving," הַיְרוּת, ἐπὶ τῶν χειρῶν: xii. 25, for אֲסָפֵי, "the treasuries," אֹסְפִי, "my gathering together," ἐν τῇ συναγωγῇ μου: and at xii. 44, for שָׂדֶי, "the fields," they read שָׂרֵי, "the princes," ἄρχουσι τῶν πόλεων: with other minor variations. The principal additions are at viii. 8, 15, and ix. 6, where the name of Ezra is introduced, and in the first passage also the words ἐν ἐπιστήμῃ κυρίου. The omissions of words and whole verses are numerous: as at iii. 37, 38; iv. 17 (23, A. V. and LXX.); vi. 4, 5, 6, 10, 11; vii. 68, 69; viii. 4, 7, 9, 10; x. 3, 5, 23; xi. 13, 16-21, 23-26, 28-35; xii. 3-7, 9, 25, 28, 29, the whole of 38, 40, 41, and half 42; xiii. 13, 14, 16, 20, 24, 25.

The following discrepancies seem to have their origin in the Greek text itself:—viii. 16, πλατείας τῆς πόλεως, instead of πυλῆς, Heb. שַׁעַר הַמַּיִם: x. 2, ΠΙΟΣ ΑΡΑΙΑ for ΚΑΙ ΣΑΡΑΙΑ: xi. 4, Σαμαρία for Αμαρία, the final Σ of the preceding υἱὸς having stuck to the beginning of the name: xii. 31, ἀνήγαγον, instead of —κα· "I brought up:" xii. 39, ἰχθυρᾶν, instead of ἰχθυηρᾶν, as in iii. 3. It is also worthy of remark that a number of Hebrew words are left untranslated in the Greek version of the LXX., which probably indicates a want of learning in the translator. The following are the chief instances:—Chaps. i. 1, and vii. 2 ἀβιρά, and τῆς βιρά, for הַבִּירָה; ii. 13, τοῦ γωλὰμ for חִזְיוֹא לַיְלָה; ib. 14, τοῦ δίν for הַעַיִן; iii. 5, οἱ Θεκωΐμ for הַתְּקוֹעִים; ib. δδωρίμ for אֲדוֹנֵיהֶם; ib. 6, ἰασανὰ for יְשָׁנָה; ib. 8, ῥακεῖμ for הָרַקָּחִים; ib. 11, τῶν θανουρίμ for הַתַּנּוּרִים; iii. 16, βηθαγγαρίμ for בֵּית הַגִּבֹּרִים; ib. 20, 21, βηθελιασούβ for בֵּית אֶלְיָשִׁיב, cf. 24; ib. 22 Ἐκχεχάρ for הַכִּכָּר; ib. 31, τοῦ σαρεφί for בֵּית הַנְּתִינִים, and βηθὰν Ναθινίμ for הַצֹּרְפִי; vii. 34, Ἡλαμαάρ for עֵילָם אַחֵר; ib. 65, ἀθερσασθά, and x. 1, ἀρτασασθά, for הַתִּרְשָׁתָא; vii. 70, 72, χαθωνάθ for כְּתֹנוֹת; xii. 27, θωδαθά for תּוֹדוֹת; xiii. 5, 9, τὴν μανὰδ for הַמְּנָחָה.

4. The Book of Nehemiah has always had an undisputed place in the Canon, being included by the Hebrews under the general head of the Book of Ezra, and as Jerome tells us in the *Prolog. Gal.* by the Greeks and Latins under the name of the second Book of Ezra. [ESDRAS, FIRST BOOK OF.] There is no quotation from it in the N. T., and it has been comparatively neglected by both the Greek and Latin fathers, perhaps on account of its simple character, and the absence of anything supernatural, prophetical, or mystical in its contents. St. Jerome (*ad Paulinam*) does indeed suggest that the account of the building of the walls, and the return of the people, the description of the Priests, Levites, Israelites, and proselytes, and the division of the labour among the different families, have a hidden meaning: and also hints that Nehemiah's name, which he interprets *consolator a Domino*, points to a mystical sense. But the book does not easily lend itself to such applications, which are so manifestly forced and strained, that even Augustine says of the whole Book of Ezra that it is simply historical rather than prophetical (*De Civit. Dei*, xviii. 36). Those however who wish to see St. Jerome's hint elaborately carried out, may refer to the Ven. Bede's *Allegorica Expositio in Librum Nehemiæ, qui et Ezræ Secundus*, as well as to the preface to his exposition of Ezra; and, in another sense, to Bp. Pilkington's Exposition upon Nehemiah, and John Fox's Preface (*Park. Soc.*). It may be added that Bede describes both Ezra and Nehemiah as *prophets*, which is the head under which Josephus includes them in his description of the sacred books (*C. Ap.* i. 8).

NEHEMI'AS (Νεεμίας: *Nehemias*). 1. Nehemiah, the contemporary of Zerubbabel and Jeshua (1 Esdr. v. 8).

2. Nehemiah the Tirshatha, son of Hachaliah (1 Esdr. v. 40).

NE'HILOTH. The title of Ps. v. in the A. V. is rendered "to the chief musician upon Nehiloth" (אֶל־הַנְּחִילוֹת); LXX., Aquila, Symmachus, and Theodotion translate the last two words ὑπὲρ τῆς κληρονομούσης, and the Vulgate, "pro ea quae haereditatem consequitur," by which Augustine understands the Church. The origin of their error was a mistaken etymology, by which Nehiloth is derived from נָחַל, *nâchal*, to inherit. Other etymologies have been proposed which are equally unsound. In

Jhaldee נְחִיל, *nĕchîl*, signifies "a swarm of bees," and hence Jarchi attributes to Nehiloth the notion of multitude, the Psalm being sung by the whole people of Israel. R. Hai, quoted by Kimchi, adopting the same origin for the word, explains it as an instrument, the sound of which was like the hum of bees, a wind instrument, according to Sonntag (*de tit. Psal.* p. 430), which had a rough tone. Michaelis (*Suppl. ad Lex. Heb.* p. 1629) suggests, with not unreasonable timidity, that the root is to be found in the Arab. نخل, *nachala*, to winnow, and hence to separate and select the better part, indicating that the Psalm, in the title of which Nehiloth occurs, was "an ode to be chanted by the purified and better portion of the people." It is most likely, as Gesenius and others explain, that it is derived from the root חָלַל, *châlal*, to bore, perforate, whence חָלִיל, *châlîl*, a flute or pipe (1 Sam. x. 5; 1 K. i. 40), so that Nehiloth is the general term for perforated wind-instruments of all kinds, as Neginoth denotes all manner of stringed instruments. The title of Ps. v. is therefore addressed to the conductor of that portion of the Temple-choir who played upon flutes and the like, and are directly alluded to in Ps. lxxxvii. 7, where (חֹלְלִים, *chôlĕlîm*) "the players upon instruments" who are associated with the singers, are properly "pipers" or "flute-players." [W. A. W.]

NE'HUM (נְחוּם: Ἰναούμ: *Nahum*). One of those who returned from Babylon with Zerubbabel (Neh. vii. 7). In Ezr. ii. 2 he is called REHUM, and in 1 Esdr. v. 8 ROIMUS.

NEHUSH'TA (נְחֻשְׁתָּא: Νέσθα; Alex. Νδισθα: *Nohesta*). The daughter of Elnathan of Jerusalem, wife of Jehoiakim, and mother of Jehoiachin, kings of Judah (2 K. xxiv. 8).

NEHUSH'TAN (נְחֻשְׁתָן: Νεσθάν, but Mai's ed. Νεσθαλεί; Alex. Νεσθάν: *Nohestan*). One of the first acts of Hezekiah, upon coming to the throne of Judah, was to destroy all traces of the idolatrous rites which had gained such a fast hold upon the people during the reign of his father Ahaz. Among other objects of superstitious reverence and worship was the brazen serpent, made by Moses in the wilderness (Num. xxi. 9), which was preserved throughout the wanderings of the Israelites, probably as a memorial of their deliverance, and according to a late tradition was placed in the Temple. The lapse of nearly a thousand years had invested this ancient relic with a mysterious sanctity which easily degenerated into idolatrous reverence, and at the time of Hezekiah's accession it had evidently been long an object of worship, "for unto those days the children of Israel did burn incense to it," or as the Hebrew more fully implies, "had been in the habit of burning incense to it." The expression points to a settled practice. The name by which the brazen serpent was known at this time, and by which it had been worshipped, was Nehushtan (2 K. xviii. 4). It is evident that our translators by their rendering, "and he called it Nehushtan," understood with many commentators that the subject of the sentence is Hezekiah, and that when he destroyed the brazen serpent he gave it the name Nehushtan, "a brazen thing," in token of his utter contempt, and to impress upon the people the idea of its worthlessness. This rendering has the support of the LXX. and Vulgate, Junius and Tremellius, Kimchi, Clarius, and others; but it is better to understand the Hebrew as referring to the name by which the serpent was generally known, the subject of the verb being indefinite—"and one called it 'Nehushtan.'" Such a construction is common, and instances of it may be found in Gen. xxv. 26, xxxviii. 29, 30, where our translators correctly render "his name was called," and in Gen. xlviii. 1, 2. This was the view taken in the Targ. Jon. and in the Peshito-Syriac, "and they called it Nehushtan," which Buxtorf approves (*Hist. Serp. Aen.* cap. vi.). It has the support of Luther, Pfeiffer (*Dub. Vex.* cent. 3, loc. 5), J. D. Michaelis (*Bibel für Ungel.*), and Bunsen (*Bibelwerk*), as well as of Ewald (*Gesch.* iii. 622), Keil, Thenius, and most modern commentators. [SERPENT.] [W. A. W.]

NE'IEL (נְעִיאֵל: Ἰναήλ; Alex. Ασιηλ: *Nehiel*), a place which formed one of the landmarks of the boundary of the tribe of Asher (Josh. xix. 27 only). It occurs between JIPHTHAH-EL and CABUL. If the former of these be identified with *Jefât*, and the latter with *Kabûl*, 8 or 9 miles E.S.E. of *Akka*, then Neiel may possibly be represented by *Mi'ar*, a village conspicuously placed on a lofty mountain brow, just half-way between the two (Rob. iii. 87, 103; also Van de Velde's *Map*, 1858). The change of N into M, and L into R, is frequent, and Miar retains the *Ain* of Neiel. [G.]

NEK'EB (הַנֶּקֶב, with the def. article: καὶ Νεβώκ; Alex. Ναχεβ: *quae est Neceb*), one of the towns on the boundary of Naphtali (Josh. xix. 33 only). It lay between ADAMI and JABNEEL.

A great number of commentators, from Jonathan the Targumist and Jerome (*Vulgate* as above) to Keil (*Josua*, ad loc.), have taken this name as being connected with the preceding—Adami-han-Nekeb (Junius and Tremellius, "Adamaei fossa"); and indeed this is the force of the accentuation of the present Hebrew text. But on the other hand the LXX. give the two as distinct, and in the Talmud the post-biblical names of each are given, that of han-Nekeb being *Tsiadathah* (*Gemara Hieros.* Cod. Megilla, in Reland, *Pal.* 545, 717, 817; also Schwarz, 181).

Of this more modern name Schwarz suggests that a trace is to be found in "*Haxedhi*," 3 English miles N. from *al Chatti*. [G.]

NEK'ODA (נְקוֹדָא: Νεκωδά; Alex. in Ezr. ii. 48, Νεκωδάν: *Necoda*). 1. The descendants of Nekoda returned among the Nethinim after the captivity (Ezr. ii. 48; Neh. vii. 50).

2. The sons of Nekoda were among those who went up after the captivity from Tel-melah, Tel-harsa and other places, but were unable to prove their descent from Israel (Ezr. ii. 60; Neh. vii. 62).

NEM'UEL (נְמוּאֵל: Ναμουήλ: *Namuel*). 1. A Reubenite, son of Eliab, and eldest brother of Dathan and Abiram (Num. xxvi. 9).

2. The eldest son of Simeon (Num. xxvi. 12; 1 Chr. iv. 24), from whom were descended the family of the Nemuelites. In Gen. xlvi. 10 he is called JEMUEL.

NEMU'ELITES, THE (הַנְּמוּאֵלִי: ὁ Ναμουηλί; Alex. Ναμουηλεί, and so Mai: *Namuelitae*). The descendants of Nemuel the first-born of Simeon (Num. xxvi. 12).

NE'PHEG (נֶפֶג: Ναφέκ: *Nepheg*). 1. One

of the sons of Izhar the son of Kohath, and therefore brother of Korah (Ex. vi. 21).

2. (*Nαφέθ* in 1 Chr. xiv. 6; Alex. *Ναφέγ* in 1 Chr. iii. 7). One of David's sons born to him in Jerusalem after he was come from Hebron (2 Sam. v. 15; 1 Chr. iii. 7, xiv. 6).

NE'PHI (*Νεφθαεί*; Alex. *Νεφθαρ*: *Nephi*). The name by which the NAPHTHAR of Nehemiah was usually (*παρὰ τοῖς πολλοῖς*) called (2 Macc. i. 36). The A. V. has here followed the Vulgate.

NE'PHIS (*Νιφίς*: *Liptis*). In the corrupt list of 1 Esdr. v. 21, "the sons of Nephis," apparently correspond with "the children of Nebo" in Ezr. ii. 29, or else the name is a corruption of MAGBISH.

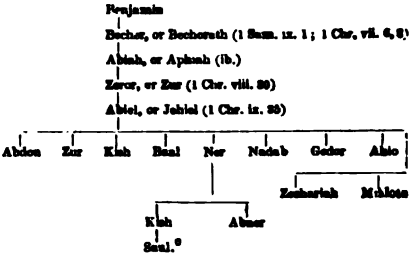
NE'PHISH (נְפִישׁ: *Ναφισαδαεί*; Alex. *Ναφισαεί*: *Naphis*). An inaccurate variation (found in 1 Chr. v. 19 only) of the name elsewhere correctly given in the A.V. NAPHISH, the form always preserved in the original.

NEPHISH'ESIM (נְפִישְׁסִים; Keri, נְפִישְׁשִׂים: *Νεφωσαεί*; Alex. *Νεφωσαείμ*: *Nephussim*). The children of Nephishesim were among the Nethinim who returned with Zerubbabel (Neh. vii. 52). The name elsewhere appears as NEPHUSIM and NAPHISI. Gesenius decides that it is a corruption of the former (*Thes.* p. 899).

NEPH'THALI (*Νεφθαλείμ*; Alex. *Νεφθαλι*: *Nephthali*). The Vulgate form of the name NAPHTALI (Tob. i. 1, 2, 4, 5).

NEPH'THALIM (*Νεφθαλεί*; Alex. *Νεφθαλείμ*, and so N. T.: *Nephthali*, *Nephthalim*). Another form of the same name as the preceding (Tob. vii. 3; Matt. iv. 13, 15; Rev. vii. 6).

NEPHTO'AH, THE WATER OF (מֵי נֶפְתּוֹחַ: *ὕδωρ Μαφθώ*, and *Ναφθώ*: *aqua*, and *aquae*, *Nephthoa*). The spring or source (עַיִן, A. V. "fountain" and "well") of the water or (inaccurately) waters of Nephtoah, was one of the landmarks in the boundary-line which separated Judah from Benjamin (Josh. xv. 9, xviii. 15). It was situated between the "head," or the "end," of the mountain which faced the valley of Hinnom on the west, and the cities of Ephron, the next point beyond which was Kirjath-jearim. It lay therefore N.W. of Jerusalem, in which direction it seems to have been satisfactorily identified in *Ain Lifta*, a spring situated a little distance above the village of the same name, in a short valley which runs into the east side of the great *Wady Beit Hanina*, about 2½ miles from Jerusalem and 6 from *Kuriet el Enab* (K.-jearim). The spring—of which a view is given by Dr. Barclay (*City*, &c., 544)—is very abundant, and the water escapes in a considerable stream into the valley below.



Nephtoah was formerly identified with various springs—the spring of St. Philip (*Ain Hanigeh*) in the *Wady el Werd*; the *Ain Yalo* in the same valley, but nearer Jerusalem; the *Ain Karim*, or Fountain of the Virgin of mediaeval times (Doubdan, *Voyage*, 187; see also the citations of Tobler, *Topographie*, 351; and Sandys, lib. iii. p. 184); and even the so-called Well of Job at the western end of the *Wady Aly*[a] (*Mislin*, ii. 155); but these, especially the last, are unsuitable in their situation as respects Jerusalem and Kirjath-jearim, and have the additional drawback that the features of the country there are not such as to permit a boundary-line to be traced along it, while the line through *Ain Lifta* would, in Barclay's words, "pursue a course indicated by nature."

The name of *Lifta* is not less suitable to this identification than its situation, since N and L frequently take the place of each other, and the rest of the word is almost entirely unchanged. The earliest notice of it appears to be by Stewart[b] (*Tent and Khan*, 349), who speaks of it as at that time (Feb. 1854) "recognised." [G.]

NEPHU'SIM (נְפוּסִים; Keri, נְפוּסִים: *Νεφουσείμ*; Alex. *Νεφουσελμ*: *Nephusim*). The same as NEPHISHESIM, of which name according to Gesenius it is the proper form (Ezr. ii. 50).

NER (נֵר: *Νήρ*: *Ner*), son of Jehiel, according to 1 Chr. viii. 33, father of Kish and Abner, and grandfather of king Saul. Abner was, therefore, uncle to Saul, as is expressly stated 1 Sam. xiv. 50. But some confusion has arisen from the statement in 1 Chr. ix. 36, that Kish and Ner were both sons of Jehiel, whence it has been concluded that they were brothers, and consequently that Abner and Saul were first cousins. But, unless there was an elder Kish, uncle of Saul's father, which is not at all probable, it is obvious to explain the insertion of Kish's name (as that of the numerous names by the side of it) in 1 Chr. ix. 36, by the common practice in the Chronicles of calling all the heads of houses of fathers, *sons* of the phylarch or demarch from whom they sprung, or under whom they were reckoned in the genealogies, whether they were sons or grandsons, or later descendants, or even descendants of collateral branches. [BECHER.]

The name Ner, combined with that of his son Abner, may be compared with Nadab in ver. 38, and Abinadab ver. 39; with Jesse, 1 Chr. ii. 13, and Abishai, ver. 16; and with Juda, Luke iii. 26, and Abiud, Matt. i. 13. The subjoined table shows Ner's family relations.

The family seat of Ner was Gibeon, where his father Jehiel was probably the first to settle (1 Chr. ix. 35). From the pointed mention of his mother, Maachah, as the wife of Jehiel, she was perhaps the heiress of the estate in Gibeon. This inference receives some confirmation from the fact that "Maachah, Caleb's concubine," is said, in 1 Chr. ii 49, to have borne "Sheva the father of

[a] This must arise from a confusion between *Yalo* (Aijalon), near which the "well of Job" is situated, and the *Ain Yalo*.

[b] Stewart, while accusing Dr. Robinson of inaccuracy (p. 349) has himself fallen into a curious confusion between Nephtoah and Netophah. Dr. Robinson is in this instance perfectly right.

[c] There are doubtless some links missing in this genealogy, as at all events the head of the family of Matri.

Machbenah and the father of Gibea," where, though the text is in ruins, yet a connexion of some sort between Maachah (whoever she was) and Gibeah, often called Gibeah of Saul, and the same as Gibeon 1 Chr. xiv. 16, is apparent. It is a curious circumstance that, while the name (Jehiel) of the "father of Gibeon" is not given in the text of 1 Chr. viii. 29, the same is the case with "the father of Gibea" in 1 Chr. ii. 49, naturally suggesting, therefore, that in the latter passage the same name *Jehiel* ought to be supplied which is supplied for the former by the duplicate passage 1 Chr. ix. 35. If this inference is correct it would place the time of the settlement of Jehiel at Gibeon —where one would naturally expect to find it— near the time of the settlement of the tribes in their respective inheritances under Joshua. Maachah, his wife, would seem to be a daughter or descendant of Caleb by Ephah his concubine. That she was not "Caleb's concubine" seems pretty certain, both because Ephah is so described in ii. 46 and because the recurrence of the name Ephah in ver. 47, separated from the words כָּלֵב פִּילֶגֶשׁ only by the name Shaaph,[a] creates a strong presumption that Ephah, and not Maachah, is the name to which this description belongs in ver. 47 as in ver. 46. Moreover, *Maachah* cannot be the nom. case to the masculine verb יָלַד. Supposing, then, Maachah, the ancestress of Saul, to have been thus a daughter or granddaughter of Caleb, we have a curious coincidence in the occurrence of the name SAUL, as one of the Edomitish kings, 1 Chr. i. 48, and as the name of a descendant of the Edomitish Caleb. [CALEB.] The element *Baal* (1 Chr. ix. 36, &c.) in the names *Esh-baal*, *Meribbaal*, the descendants of Saul the son of Kish, may also, then, be compared with *Baal-hanan*, the successor of Saul of Rehoboth (1 Chr. i. 49), as also the name *Matred*, (ib. 50) with *Matri* (1 Sam. x. 21). [A. C. H.]

NE'REUS (Νηρεύς: *Nereus*). A Christian at Rome, saluted by St. Paul, Rom. xvi. 15. Origen conjectures that he belonged to the household of Philologus and Julia. Estius suggests that he may be identified with a Nereus, who is said to have been baptized at Rome by St. Peter. A legendary account of him is given in Bolland, *Acta Sanctorum*, 12th May; from which, in the opinion of Tillemont, *H. E.* ii. 139, may be gathered the fact that he was beheaded at Terracina, probably in the reign of Nerva. His ashes are said to be deposited in the ancient church of SS. Nereo ed Archilleo at Rome.

There is a reference to his legendary history in Bp. Jeremy Taylor's Sermon, *The Marriage-ring*, Part. i. [W. T. B.]

NER'GAL (נֵרְגַל: Ἐργέλ: *Nergel*), one of the chief Assyrian and Babylonian deities, seems to have corresponded closely to the classical Mars. He was of Babylonian origin, and his name signifies, in the early Cushite dialect of that country, "the great man," or "the great hero." His monumental titles are—"the storm-ruler," "the king of battle," "the champion of the gods," "the male principle" (or "the strong begetter"), "the tutelar god of Babylonia," and "the god of the chace." Of this last he is the god pre-eminently; another deity, *Nin*, disputing with him the presidency over war and battles. It is conjectured that he may represent the deified Nimrod—"the mighty hunter before the Lord"—from whom the kings both of Babylon and Nineveh were likely to claim descent. The city peculiarly dedicated to his worship is found in the inscriptions to be Cutha or Tiggaba, which is in Arabian tradition the special city of Nimrod. The only express mention of Nergal contained in sacred Scripture is in 2 K. xvii. 30, where "the men of Cutha," placed in the cities of Samaria by a king of Assyria (Esar-haddon?), are said to have "made Nergal their god" when transplanted to their new country—a fact in close accordance with the frequent notices in the inscriptions, which mark him as the tutelar god of that city. Nergal's name occurs as the initial element in *Nergal-shar-ezer* (Jer. xxxix. 3 and 13); and is also found, under a contracted form, in the name of a comparatively late king—the Abennerigus of Josephus (*Ant.* xx. 2, §1).

Nergal appears to have been worshipped under the symbol of the "Man-Lion." The Semitic name for the god of Cutha was *Aria*, a word which signifies "lion" both in Hebrew and Syriac. *Ne*, the first element of the god's name, is capable of the same signification. Perhaps the habits of the lion as a hunter of beasts were known, and he was thus regarded as the most fitting symbol of the god who presided over the chace.

It is in connexion with their hunting excursions that the Assyrian kings make most frequent mention of this deity. As early as B.C. 1150, Tiglath-pileser I. speaks of him as furnishing the arrows with which he slaughtered the wild animals. *Assur-dani-pal* (Sardanapalus), the son and successor of Esar-haddon, never fails to invoke his aid, and ascribes all his hunting achievements to his influence. Pul sacrificed to him in Cutha, and Sennacherib built him a temple in the city of Tarbisa near Nineveh; but in general he was not much worshipped either by the earlier or the later kings (see the *Essay* of Sir H. Rawlinson in Rawlinson's *Herodotus*, i. 631-634). [G. R.]

NER'GAL-SHARE'ZER (נֵרְגַל-שַׂר-אֶצֶר: Νηργὲλ-Σαρασάρ: *Nergel-Sereser*) occurs only in Jeremiah xxxix. 3 and 13. There appear to have been two persons of the name among the "princes of the king of Babylon," who accompanied Nebuchadnezzar on his last expedition against Jerusalem. One of these is not marked by any additional title; but the other has the honourable distinction of Rab-mag (רַב־מָג), and it is to him alone that any particular interest attaches. In sacred Scripture he appears among the persons, who, by command of Nebuchadnezzar, released Jeremiah from prison; profane history gives us reason to believe that he was a personage of great importance, who not long afterwards mounted the Babylonian throne. This identification depends in part upon the exact resemblance of name, which is found on Babylonian bricks in the form of *Nergal-shar-usur*; but *mainly* it rests upon the title of *Rubu-emga*, or Rab-Mag, which this king bears in his inscriptions, and on the improbability of there having been, towards the close of the Babylonian period—when the monumental monarch must have lived—two persons of exactly the same name holding this office. [RAB-MAG.]

Assuming on these grounds the identity of the Scriptural "Nergal-sharezer, Rab-Mag," with the monumental "*Nergal-shar-usur, Rubu-emga*," we may learn something of the history of the prince in question from profane authors. There cannot be a doubt that he was the monarch called Neriglissoor or Neriglissoor by Berosus (Joseph. *c. Ap.* i. 20,

[a] Shaaph has nearly the same letters as Ephah.

who murdered Evil-Merodach, the son of Nebuchadnezzar, and succeeded him upon the throne. This prince was married to a daughter of Nebuchadnezzar, and was thus the brother-in-law of his predecessor, whom he put to death. His reign lasted between three and four years. He appears to have died a natural death, and certainly left his crown to a young son, Laborosoarchod, who was murdered after a reign of nine months. In the canon of Ptolemy he appears, under the designation of Nerigassolassar, as reigning four years between Illoarudamus (Evil-Merodach) and Nabonadius, his son's reign not obtaining any mention, because it fell short of a year.

A palace, built by Neriglissar, has been discovered at Babylon. It is the only building of any extent on the right bank of the Euphrates. (See plan of BABYLON.) The bricks bear the name of Nergal-shar-uzur, the title of Rab-mag, and also a statement—which is somewhat surprising—that Nergal-shar-uzur was the son of a certain "Bel-zikkariskun, *king of Babylon*." The only explanation which has been offered of this statement, is a conjecture (Rawlinson's *Herodotus*, vol. i. p. 518), that Bel-zikkar-iskun may possibly have been the "chief Chaldaean," who (according to Berosus) kept the royal authority for Nebuchadnezzar during the interval between his father's death and his own arrival at Babylon. [NEBUCHADNEZZAR.] Neriglissar could scarcely have given his father the title of king without some ground; and this is at any rate a possible ground, and one compatible with the non-appearance of the name in any extant list of the later Babylonian monarchs. Neriglissar's office of Rab-Mag will be further considered under that word. It is evident that he was a personage of importance before he mounted the throne. Some (as Larcher) have sought to identify him with Darius the Mede. But this view is quite untenable. There is abundant reason to believe from his name and his office that he was a native Babylonian—a grandee of high rank under Nebuchadnezzar, who regarded him as a fitting match for one of his daughters. He did not, like Darius Medus, gain Babylon by conquest, but acquired his dominion by an internal revolution. His reign preceded that of the Median Darius by 17 years. It lasted from B.C. 559 to B.C. 556, whereas Darius the Mede cannot have ascended the throne till B.C. 538, on the conquest of Babylon by Cyrus. [G. R.]

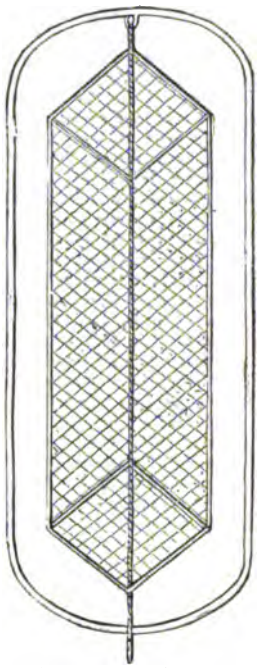
NE'RI (Νηρί, representing the Heb. נֵרִי, which would be a short form for נֵרִיָּה, Neriah, "Jehovah is my lamp:" *Neri*),[a] son of Melchi, and father of Salathiel, in the genealogy of Christ, Luke iii. 27. Nothing is known of him, but his name is very important as indicating the principle on which the genealogies of our Lord are framed. He was of the line of Nathan; but his son Salathiel became Solomon's heir on the failure of Solomon's line in king Jeconiah, and was therefore reckoned in the royal genealogy among the sons of Jeconiah; to whose status and prerogatives he succeeded, 1 Chr. iii. 17; Matt. i. 12. The supposition that the son and heir of David and Solomon would be called the son of Neri, an obscure individual, because he had married Neri's daughter, as many pretend, is too absurd to need refutation. The information given us by St. Luke—that Neri, of the line of Nathan, was Salathiel's father—does, in point of fact, clear up and settle the whole question of the genealogies. [GENEALOGY OF JESUS CHRIST.] [A. C. H.]

[a] See *Geneal. of Our Lord*, C. p. 159.

NERI'AH (נְרִיָּה): Νηρίας, but Νηρείας in Jer. li. 59: *Nerias*, but *Neri* in xxxii. 12. The son of Maaseiah, and father of Baruch (Jer. xxxii. 12, xxxvi. 4, xliii. 3), and Seraiah (Jer. li. 59).

NERI'AS (Νηρίας: *Nerias*). The father of Baruch and Seraiah (Bar. i. 1).

NET. The various terms applied by the Hebrews to nets had reference either to the construction of the article, or to its use and objects. To the first of these we may assign the following terms:—*Macmôr*,[a] and its cognates, *micmâr*[b] and *micmôreth*,[c] all of which are derived from a root signifying "to weave;" and, again, *sêbâcâh*[d] and *sêbâc*,[e] derived from another root of similar signification. To the second head we may assign *chêrem*,[f] from a root signifying "to enclose;" *mâtzôd*,[g] with its cognates, *mâtzôdâh*[h] and *mêtzûdâh*,[i] from a root signifying "to lie in wait;" and *resheth*,[k] from a root signifying "to catch." Great uncertainty prevails in the equivalent terms in the A. V.: *mâtzôd* is rendered "snare" in Eccl. vii. 26, and "net" in Job xix. 6 and Prov. xii. 12, in the latter of which passages the true sense is "prey;" *sêbâcâh* is rendered "snare" in Job xviii. 8; *metzûdâh* "snare" in Ez. xii. 13, xvii. 20, and "net" in Ps. lxvi. 11; *micmôreth*, "drag" or "flue-net" in Hab. i. 15, 16. What distinction there may have been between the various nets described by the Hebrew terms we are unable to decide. The etymology tells us nothing, and the equivalents in the LXX. vary. In the New Testament we meet with three terms,—σαγήνη (from σάττω, "to load"), whence our word *seine*, a large hauling or draw-net; it is the term used in the parable of the draw-net (Matt. xiii. 47): ἀμφίβληστρον (from ἀμφιβάλλω, "to cast around"), a casting-net (Matt. iv. 18; Mark i. 16): and δίκτυον (from δίκω, "to throw"), of the same description as the one just mentioned (Matt. iv. 20; John xxi. 6, *al.*). The net was used for the purposes of fishing and hunting: the mode in which it was used has been already described in the articles on those subjects. [FISHING; HUNTING.] The Egyptians constructed their nets of flax-string: the netting-needle was made of wood, and in shape closely resembled our own (Wilkinson, ii. 95).



Egyptian landing-net. (Wilkinson.)

The nets varied in form according to their use; the landing-net has been already represented; we here give a sketch of the draw-net from the same source.

[a] מִכְמֹר. [b] מִכְמָר. [c] מִכְמֶרֶת. [d] שְׂבֻכָה. [e] שְׂבָךְ. [f] חֵרֶם. [g] מָצוֹד. [h] מְצוֹדָה. [i] מְצוּדָה. [k] רֶשֶׁת.

As the nets of Egypt were well known to the early Jews (Is. xix. 8), it is not improbable that the material and form was the same in each country. The nets used for birds in Egypt were of two kinds, clap-nets and traps. The latter consisted of network strained over a frame of wood, which was so constructed that the sides would collapse by pulling a string and catch any birds that may have alighted on them while open. The former was made on the same principle, consisting of a double frame with the network strained over it, which might be caused to collapse by pulling a string.[a]

Egyptian draw-net (Wilkinson).

The metaphorical references to the net are very numerous: it was selected as an appropriate image of the subtle devices of the enemies of God on the one hand (*e. g.* Ps. ix. 15, xxv. 15, xxxi. 4), and of the unavertable vengeance of God on the other hand (Lam. i. 13; Ez. xii. 13; Hos. vii. 12).

We must still notice the use of the term *sōbāc*, in an architectural sense, applied to the open ornamental work about the capital of a pillar (1 K. vii. 17), and described in similar terms by Josephus, *δίκτυον ἐλάτῃ χαλκείᾳ περιπεπλεγμένον* (*Ant.* viii. 3, §4). [W. L. B.]

NETH'ANEEL (נְתַנְאֵל: Ναθαναήλ: *Nathanael*). 1. The son of Zuar, and prince of the tribe of Issachar at the time of the Exodus. With his 54,400 men his post in the camp was on the east, next to the camp of Judah, which they followed in the march. The same order was observed in the offerings at the dedication of the tabernacle, when Nethaneel followed Nahshon the prince of the tribe of Judah (Num. i. 8, ii. 5, vii. 18, 23, x. 15).

2. The fourth son of Jesse and brother of David (1 Chr. ii. 14).

3. A priest in the reign of David who blew the trumpet before the ark, when it was brought from the house of Obed-edom (1 Chr. xv. 24).

4. A Levite, father of Shemaiah the scribe in the reign of David (1 Chr. xxiv. 6).

5. The fifth son of Obed-edom the doorkeeper of the ark (1 Chr. xxvi. 4).

6. One of the princes of Judah, whom Jehoshaphat in the third year of his reign sent to teach in the cities of his kingdom (2 Chr. xvii. 7).

7. A chief of the Levites in the reign of Josiah, who took part in the solemn passover kept by that king (2 Chr. xxxv. 9).

8. A priest of the family of Pashur in the time of Ezra who had married a foreign wife (Ezr. x. 22). He is called NATHANAEL in 1 Esdr. ix. 22.

9. The representative of the priestly family of Jedaiah in the time of Joiakim the son of Jeshua (Neh. xii. 21).

10. A Levite, of the sons of Asaph, who with his brethren played upon the musical instruments of David, in the solemn procession which accompanied the dedication of the wall of Jerusalem under Ezra and Nehemiah (Neh. xii. 36). [W. A. W.]

NETHANI'AH (נְתַנְיָה, and in the lengthened form נְתַנְיָהוּ, Jer. xl. 8, xli. 9: Ναθανίας, etc. 2 K. xxv. 23, where the Alex. MS. has Ματθανίας: *Nathania*). 1. The son of Elishama, and father of Ishmael who murdered Gedaliah (2 K. xxv. 23, 25; Jer. xl. 8, 14, 15, xli. 1, 2, 6, 7, 9, 10, 11, 12, 15, 16, 18). He was of the royal family of Judah.

2. (נְתַנְיָהוּ, in 1 Chr. xxv. 12). One of the four sons of Asaph the minstrel, and chief of the 5th of the 24 courses into which the Temple choir was divided (1 Chr. xxv. 2, 12).

3. (נְתַנְיָהוּ). A Levite in the reign of Jehoshaphat, who with eight others of his tribe and two priests accompanied the princes of Judah who were sent by the king through the country to teach the law of Jehovah (2 Chr. xvii. 8).

4. The father of Jehudi (Jer. xxxvi. 14).

NETH'INIM (נְתִינִים: Ναθινεῖοι, Neh. xi. 21 Ναθινίμ, Ezr. ii. 43; *οἱ δεδομένοι*, 1 Chr. ix. 2. *Nathinaei*). As applied specifically to a distinct body of men connected with the services of the Temple, this name first meets us in the later books of the O. T.; in 1 Chron., Ezra, and Nehemiah. The word, and the ideas embodied in it may, however, be traced to a much earlier period. As derived from the verb נָתַן, *nāthan* (=give, set apart, dedicate), it was applied to those who were specially appointed to the liturgical offices of the Tabernacle.[b] Like many other official titles it appears to have had at first a much higher value than that afterwards

[a] Prov. i. 17, is accurately as follows:—"Surely in the eyes of any bird the net is spread for nothing." As it stands in the A. V. it is simply contrary to fact. This is one of the admirable emendations of the late Mr. Bernard. See Mason and Bernard's *Hebrew Grammar*.)

[b] This is the received interpretation. Bochart (*Phaleg*, ii. 1) gives a more active meaning to the words. "Those who have devoted themselves." So Theodoret (Qu. in 1 *Paralip.*), who explains the name as=δόντες Ἰσραὴλ, τουτέστι, τοῦ ὄντος Θεοῦ, and looks on them as Israelites of other tribes voluntarily giving themselves to the service of the Sanctuary. This is, however, without adequate grounds, and at variance with facts. Comp. Pfeiffer *De Nathinaeis*, in Ugolini's Thesaurus, vol. xiii.

assigned to it. We must not forget that the Levites were *given* to Aaron and his sons, *i.e.* to the priests as an order, and were accordingly the first Nethinim (הַנְּתִינִם, Num. iii. 9, viii. 19). At first they were the only attendants, and their work must have been laborious enough. The first conquests, however, brought them their share of the captive slaves of the Midianites, and 320 were *given* to them as having charge of the Tabernacle (Num. xxxi. 47), while 32 only were assigned specially to the priests. This disposition to devolve the more laborious offices of their ritual upon slaves of another race showed itself again in the treatment of the Gibeonites. They, too, were "given" (A. V. "made") to be "hewers of wood and drawers of water" for the house of God (Josh. ix. 27), and the addition of so large a number (the population of five cities) must have relieved the Levites from much that had before been burdensome. We know little or nothing as to their treatment. It was a matter of necessity that they should be circumcised (Exod. xii. 48), and conform to the religion of their conquerors, and this might at first seem hard enough. On the other hand it must be remembered that they presented themselves as recognizing the supremacy of Jehovah (Josh. ix. 9), and that for many generations the remembrance of the solemn covenant entered into with them made men look with horror on the shedding of Gibeonite blood (2 Sam. xxi. 9), and protected them from much outrage. No addition to the number thus employed appears to have been made during the period of the Judges, and they continued to be known by their old name as the Gibeonites. The want of a further supply was however felt when the reorganization of worship commenced under David. Either the massacre at Nob had involved the Gibeonites as well as the priests (1 Sam. xxii. 19), or else they had fallen victims to some other outburst of Saul's fury, and, though there were survivors (2 Sam. xxi. 2), the number was likely to be quite inadequate for the greater stateliness of the new worship at Jerusalem. It is to this period accordingly that the origin of the class bearing this name may be traced. The Nethinim were those "whom David and the princes appointed (Heb. *gave*) for the service of the Levites" (Ezr. viii. 20). Analogy would lead us to conclude that, in this as in the former instances, these were either prisoners taken in war, or else some of the remnant of the Canaanites;[b] but the new name in which the old seems to have been merged leaves it uncertain. The foreign character of the names in Ezr. ii. 43-54 is unmistakeable, but was equally natural on either hypothesis.

From this time the Nethinim probably lived within the precincts of the Temple, doing its rougher work, and so enabling the Levites to take a higher position as the religious representatives and instructors of the people. [LEVITES.] They answered in some degree to the male *ἱερόδουλοι*, who were attached to Greek and Asiatic temples (Josephus, *Ant.* xi. 5, §1, uses this word of them in his paraphrase of the decree of Darius), to the grave-diggers, gate-keepers, bell-ringers of the Christian Church. Ewald (*Alterthüm.* p. 299) refers to the custom of the more wealthy Arabs dedicating slaves to the special service of the Kaaba at Mecca, or the Sepulchre of the Prophet at Medina.

The example set by David was followed by his successor. In close union with the Nethinim in the statistics of the return from the captivity attached like them to the Priests and Levites, we find a body of men described as "Solomon's servants" (Ezr. ii. 55; Nehem. vii. 60, xi. 3), and these we may identify, without much risk of error, with some of the "people that were left" of the earlier inhabitants whom he made "to pay tribute of bond-service" (1 K. ix. 20; 2 Chron. viii. 7). The order in which they are placed might even seem to indicate that they stood to the Nethinim in the same relation that the Nethinim did to the Levites. Assuming, as is probable, that the later Rabbinic teaching represents the traditions of an earlier period, the Nethinim appear never to have lost the stigma of their Canaanite origin. They had no *jus connubii* (Gemar. Babyl. *Jebam.* ii. 4; *Kiddusch.* iv. 1, in Carpzov, *App. Crit. de Neth.*), and illicit intercourse with a woman of Israel was punished with scourging (Carpzov, l. c.); but their quasi-sacred position raised them in some measure above the level of their race, and in the Jewish order of precedence, while they stood below the Mamzerim (bastards, or children of mixed marriages), they were one step above the Proselytes fresh come from heathenism and emancipated slaves (Gemar. Hieros. *Horajoth*, fol. 48²; in Lightfoot, *Hor. Heb. ad Matt.* xxiii. 14). They were thus all along a servile and subject caste. The only period at which they rise into anything like prominence is that of the return from the captivity. In that return the priests were conspicuous and numerous, but the Levites, for some reason unknown to us, hung back. [LEVITES.] Under Zerubbabel there were but 341 to 4289 priests (Ezr. ii. 36-42). Under Ezra none came up at all till after a special and solemn call (Ezr. viii. 15). The services of the Nethinim were consequently of more importance (Ezr. viii. 17), but in their case also, the small number of those that joined (392 under Zerubbabel, 220 under Ezra, including "Solomon's servants") indicates that many preferred remaining in the land of their exile to returning to their old service. Those that did come were consequently thought worthy of special mention. The names of their families were registered with as much care as those of the priests (Ezr. ii. 43-58). They were admitted, in strict conformity to the letter of the rule of Deut. xxix. 11, to join in the great covenant with which the restored people inaugurated its new life (Neh. x. 28). They, like the Priests and Levites, were exempted from taxation by the Persian Satraps (Ezr. vii. 24). They were under the control of a chief of their own body (Ezr. ii. 43; Nehem. vii. 46). They took an active part in the work of rebuilding the city (Nehem. iii. 26), and the tower of Ophel, convenient from its proximity to the Temple, was assigned to some of them as a residence (Neh. xi. 21), while others dwelt with the Levites in their cities (Ezr. ii. 70). They took their place in the chronicles of the time as next in order to the Levites (1 Chr. ix. 2).

Neither in the Apocrypha, nor in the N. T., nor yet in the works of the Jewish historian, do we find any additional information about the Nethinim. The latter, however, mentions incidentally a festival, that of the Xylophoria, or wood carrying, of which we may perhaps recognize the beginning in Neh. x. 34, and in which it was the custom for all the people to bring large supplies of firewood for the sacrifices of the year. This may have been designed to relieve them. They were at any rate likely to

[b] The identity of the Gibeonites and Nethinim, excluding the idea of any addition, is, however, maintained by Prideaux.

bear a conspicuous part in it (Joseph. *B. J.* ii. 17, § 6).

Two hypotheses connected with the Nethinim are mentioned by Pfeffinger in the exhaustive monograph already cited: (1), that of Förster (*Dict. Hebr.*, Basil, 1564), that the first so called were sons of David, *i. e.*, younger branches of the royal house to whom was *given* the defence of the city and the sanctuary; (2), that of Boulduc (referred to also by Selden, *De Jure Nat. et Gent.*), connected apparently with (1), that Joseph the husband of the Virgin was one of this class.[a] [E. H. P.]

NET'OPHAH (נְטֹפָה: Νετωφά, Ἀ-ωφά; Alex. Νεφατα: *Netupha*), a town the name of which occurs only in the catalogue of those who returned with Zerubbabel from the Captivity (Ezr. ii. 22; Neh. vii. 26; 1 Esdr. v. 18). But, though not directly mentioned till so late a period, Netophah was really a much older place. Two of David's guard, MAHARAI and HELEB or HELDAI, leaders also of two of the monthly courses (1 Chr. xxvii. 13, 15), were Netophathites, and it was the native place of at least one[a] of the captains who remained under arms near Jerusalem after its destruction by Nebuchadnezzar. The "villages of the Netophathites" were the residence of the Levites (1 Chr. ix. 16), a fact which shows that they did not confine themselves to the places named in the catalogues of Josh. xxi. and 1 Chr. vi. From another notice we learn that the particular Levites who inhabited these villages were singers (Neh. xii. 28).

That Netophah belonged to Judah appears from the fact that the two heroes above mentioned belonged, the one to the Zarhites—that is, the great family of Zerah, one of the chief houses of the tribe—and the other to Othniel, the son-in-law of Caleb. To judge from Neh. vii. 26 it was in the neighbourhood of, or closely connected with, Bethlehem, which is also implied by 1 Chr. ii. 54, though the precise force of the latter statement cannot now be made out. The number of Netophathites who returned from Captivity is not exactly ascertainable, but it seems not to have been more than sixty—so that it was probably only a small village, which indeed may account for its having escaped mention in the lists of Joshua.

A remarkable tradition, of which there is no trace in the Bible, but which nevertheless is not improbably authentic, is preserved by the Jewish authors, to the effect that the Netophathites slew the guards which had been placed by Jeroboam on the roads leading to Jerusalem to stop the passage of the firstfruits from the country villages to the Temple (Targum on 1 Chr. ii. 54; on Ruth iv. 20, and Eccl. iii. 11). Jeroboam's obstruction, which is said to have remained in force till the reign of Hoshea (see the notes of Beck to Targum on 1 Chr. ii. 54), was commemorated by a fast on the 23rd Sivan, which is still retained in the Jewish calendar (see the calendar given by Basnage, *Hist. des Juifs*, vi. ch. 29).

It is not mentioned by Eusebius and Jerome, and although in the Mishna reference is made to the "oil of Netophah" (*Peah* 7, §1, 2), and to the "valley of Beth Netophah," in which artichoke flourished, whose growth determined the date of some ceremonial observance (*Sheviith* 9, § 7), nothing is said as to the situation of the place. The latter may well be the present village of *Beit Nettif*, which stands on the edge of the great valley of the *Wady es Sumt* (Rob. *Bib. Res.* ii. 16, 17; Porter, *Handbk.* 248); but can hardly be the Netophah of the Bible, since it is not near Bethlehem, but in quite another direction. The only name in the neighbourhood of Bethlehem suggestive of Netophah is that which appears in Van de Velde's map (1858) as *Antôbeh*, and in Tobler (*3tte Wand.* 80) as *Om Tûba* (ام طوبا), attached to a village about 2 miles N.E. of Bethlehem and a wady which falls therefrom into the *Wady en-Nar*, or Kidron. [G.]

NETO'PHATHI (נְטֹפָתִי: Vat. omits; Alex. Νετωφαθι: *Nethuphati*), Neh. xii. 28. The same word which in other passages is accurately rendered "the Netophathite," except that here it is not accompanied by the article.

NETO'PHATHITE, THE (הַנְּטֹפָתִי, in Chron. הַנְּטֹפָתִי: ὁ Ερτωφατείτης, Νεφφαθείτης Νεθωφατεί, ὁ ἐκ Νετουφάτ: *Netophathites*), 2 Sam. xxiii. 28, 29; 2 K. xxv. 23; 1 Chr. xi. 30, xxvii. 13, 15; Jer. xl. 8. The plural form, THE NETOPHATHITES (the Hebrew word being the same as the above) occurs in 1 Chr. ii. 54, ix. 16. [G.]

NETTLE. The representative in the A. V. of the Hebrew words *chârûl* and *kimmôsh* or *kimôsh*.

1. *Chârûl* (חָרוּל: φρύγανα ἄγρια:[b] *acutis, urtica, spina*) occurs in Job xxx. 7—the patriarch complains of the contempt in which he was held by the lowest of the people, who, from poverty, were obliged to live on the wild shrubs of the desert: "Among the bushes they brayed, under the *chârûl* they were gathered together," and in Prov. xxiv. 31, where of "the field of the slothful," it is said, "it was all grown over with thorns (*kimmôsh*), and *charullîm* had covered the face thereof;" see also Zeph. ii. 9: the curse of Moab and Ammon is that they shall be "the breeding of *chârûl* and salt-pit."

There is very great uncertainty as to the meaning of the word *chârûl*, and numerous are the plants which commentators have sought to identify with it: brambles, sea-orache, butchers' broom, thistles, have all been proposed (see Celsius, *Hierob.* ii. 155). The generality of critics and some modern versions are in favour of the *nettle*. Some have objected to the nettle as not being of a sufficient size to suit the passage in Job (*l. c.*); but in our own country nettles grow to the height of six or even seven feet when drawn up under trees or hedges; and it is worthy of remark that, in the passage of Job quoted above, bushes and *chârûl* are associated. Not much better founded is Dr. Royle's objection (Kitto's *Cyc.* art. *Charul*) that both thorny plants and nettles must be excluded, "as no one would voluntarily resort to such a situation;" for the people of whom Job is speaking might readily be supposed to resort to such a shade, as in a sandy desert the thorn-bushes and tall nettles growing by their side would afford; or we may suppose that those who "for want and famine" were driven into the wilderness were

[a] The only trace of any tradition corresponding to this theory is the description in the Arabian History of Joseph (c. 2) according to which he is of the city of David and the tribe of Judah, and yet, on account of his wisdom and piety, "sacerdos factus est in Templo Domini" (Tischenderf, *Evang. Apoc.*, p. 116).

[a] Comp. 2 K. xxv. 23, with Jer. xl. 8.

[b] φρύγανα (from φρύγω, "to burn," "to roast," with reference to the derivation of the Hebrew word) properly signifies "dry sticks," "fagots."

gathered together under the nettles for the purpose of gathering them for food, together with the sea-orache and juniper-roots (ver. 4). Celsius believes the *chârûl* is identical with the Christ-thorn (*Zizyphus Paliurus*)—the *Paliurus aculeatus* of modern botanists—but his opinion is by no means well founded. The passage in Proverbs (*l. c.*) appears to forbid us identifying the *chârûl* with the *Paliurus aculeatus*; for the context, "I went by, and lo it was all grown over with *kimshôn* and *charûlîm*," seems to point to some weed of quicker growth than the plant proposed by Celsius. Dr. Royle has argued in favour of some species of wild mustard, and refers the Hebrew word to one of somewhat similar form in Arabic, viz. *Khardul*, to which he traces the English *charlock* or *kedlock*, the well-known troublesome weed. The Scriptural passages would suit this interpretation, and it is quite possible that wild mustard may be intended by *chârûl*. The etymology[c] too, we may add, is as much in favour of the wild mustard as of the nettle, one or other of which plants appears to be denoted by the Hebrew word. We are inclined to adopt Dr. Royle's opinion, as the following word probably denotes the *nettle*.

2. *Kimmôsh* or *kimôsh* (קִמּוֹשׁ, קִימוֹשׁ: ἀκάνθινα ξύλα, ἄκανθα, βλέθορος: *urticae*). "Very many interpreters," says Celsius (*Hierob.* ii. 207), "understand the *nettle* by this word. Of the older Jewish doctors, R. Ben Melech, on Prov. xxiv. 31, asserts that *kimmôsh* is a kind of thorn (*spina*) commonly called a nettle." The Vulgate, Arias Montanus, Luther, Deodatius,[d] the Spanish and English versions, are all in favour of the nettle.

The word occurs in Is. xxxiv. 13: of Edom it is said that "there shall come up nettles and brambles in the fortresses thereof:" and in Hos. ix. 6. Another form of the same word, *kimmûshônîm*[e] ("thorns," *A. V.*), occurs in Prov. xxiv. 31: the "field of the slothful was all grown over with *kimmûshônîm*." Modern commentators are generally agreed upon the signification of this term, which, as it is admirably suited to all the Scriptural passages, may well be understood to denote some species of nettle (*Urtica*). [W. H.]

NEW MOON (חֹדֶשׁ, רֹאשׁ חֹדֶשׁ: νεομηνία, νουμηνία: *calendae, neomenia*). The first day of the lunar month was observed as a holy day. In addition to the daily sacrifice there were offered two young bullocks, a ram and seven lambs of the first year as a burnt-offering, with the proper meat-offerings and drink-offerings, and a kid as a sin-offering (Num. xxviii. 11-15).[a] It was not a day of holy convocation [FESTIVALS], and was not therefore of the same dignity as the Sabbath. But, as on the Sabbath, trade and handicraft-work were stopped (Am. viii. 5), the Temple was opened for public worship (Ez. xlvi. 3; Is. lxvi. 23), and, in the kingdom of Israel at least, the people seem to have resorted to the prophets for religious instruction.[b] The trumpets were blown at the offering of the special sacrifices for the day, as on the solemn festivals (Num. x. 10; Ps. lxxxi. 3). That it was an occasion for state-banquets may be inferred from David's regarding himself as especially bound to sit at the king's table at the new moon (1 Sam. xx. 5-24). In later, if not in earlier times, fasting was intermitted at the new moons, as it was on the Sabbaths and the great feasts and their eves (Jud. viii. 6). [FASTS.]

The new moons are generally mentioned so as to show that they were regarded as a peculiar class of holy days, to be distinguished from the solemn feasts and the Sabbaths (Ez. xlv. 17; 1 Chr. xxiii. 31; 2 Chr. ii. 4, viii. 13, xxxi. 3; Ezr. iii. 5; Neh. x. 33).

The seventh new moon of the religious year, being that of Tisri, commenced the civil year, and had a significance and rites of its own. It was a day of holy convocation. [TRUMPETS, FEAST OF.]

By what method the commencement of the month was ascertained in the time of Moses is uncertain. The Mishna[c] describes the manner in which it was determined seven times in the year by observing the first appearance of the moon, which, according to Maimonides, derived its origin, by tradition, from Moses, and continued in use as long as the Sanhedrim existed. On the 30th day of the month watchmen were placed on commanding heights round Jerusalem to watch the sky. As soon as each of them detected the moon he hastened to a house in the city, which was kept for the purpose, and was there examined by the president of the Sanhedrim. When the evidence of the appearance was deemed satisfactory, the president rose up and formally announced it, uttering the words, "It is consecrated" (מְקוּדָּשׁ). The information was immediately sent throughout the land from the Mount of Olives, by beacon-fires on the tops of the hills. At one period the Samaritans are said to have deceived the Jews by false fires, and swift messengers were afterwards employed. When the moon was not visible on account of clouds, and in the five months when the watchmen were not sent out, the month was considered to commence on the morning of the day which followed the 30th. According to Maimonides the Rabbinists altered their method when the Sanhedrim ceased to exist, and have ever since determined the month by astronomical calculation, while the Caraites have retained the old custom of depending on the appearance of the moon.

The religious observance of the day of the new moon may plainly be regarded as the consecration of a natural division of time. Such a usage would so readily suggest itself to the human mind that it is not wonderful that we find traces of it amongst other nations. There seems to be but little ground for founding on these traces the notion that the Hebrews derived it from the Gentiles, as Spencer and Michaelis have done;[d] and still less for attaching

[c] חָרַל, from חָרַר ("to burn"), "additâ terminatione hypochoristica ûl." See Fürst, *Heb. Conc.*; cf. ἀκάνθας ab uro

[d] *i. e.* the Italian version of Diodati. We have often retained the Latin forms of writers, as being familiar to the readers of Celsius and Bochart.

[e] קְמוֹשׁוֹנִים, plur. from קִמּוֹשׁ.

[a] The day of the new moon is not mentioned in Exodus, Leviticus, or Deuteronomy.

[b] 2 K. iv. 23. When the Shunammite is going to the prophet, her husband asks her, "Wherefore wilt thou go to him to-day? It is neither new moon nor sabbath." See the notes of Vatablus, Grotius, and Keil.

[c] *Rosh Hashanah*, Surenhusius, ii. 338, sq.

[d] The three passages from ancient writers which are most to the point of those which are quoted are in Macrobius, Horace, and Tacitus. The first says, "Priscis temporibus pontifici minori haec provincia delegata fuit, ut novae lunae primum observaret aspectum visamque regi sacrificulo nuntiaret" (*Sat.* i. 15). In the second the day is referred to as a social festival (*Od.* iii. 23, 9); and in Tacitus we are informed that the ancient Germans assembled on the days of new and full moon, considering

to it any of those symbolical meanings which have been imagined by some other writers (see Carpzov, *App. Crit.* p. 425). Ewald thinks that it was at first a simple household festival, and that on this account the law does not take much notice of it. He also considers that there is some reason to suppose that the day of the full moon was similarly observed by the Hebrews in very remote times. (Carpzov, *Apparat. Hist. Crit.* p. 423; Spencer, *De Leg. Heb.* lib. iii. dissert. iv.; Selden, *De Jure Civ. Heb.* iv. xi.; Mishna, *Rosh Hashanah*, vol. ii. p. 338, ed. Surenhus.; Buxtorf, *Synagoga Judaica*, cap. xxii.; Ewald, *Alterthümer*, p. 394; Cudworth *on the Lord's Supper*, c. iii.; Lightfoot, *Temple Service*, cap. xi.) [S. C.]

NEW TESTAMENT. The origin, history, and characteristics of the constituent books and of the great versions of the N. T., the mutual relations of the Gospels, and the formation of the Canon, are discussed in other articles. It is proposed now to consider the Text of the N. T. The subject naturally divides itself into the following heads, which will be examined in succession:—

I. THE HISTORY OF THE WRITTEN TEXT.
- §§1–11. The earliest history of the text. Autographs. Corruptions. The text of Clement and Origen.
- §§12–15. Theories of recensions of the text.
- §§16–25. External characteristics of MSS.
- §§26–29. Enumeration of MSS. §28. Uncial. §29. Cursive.
- §§30–40. Classification of various readings.

II. THE HISTORY OF THE PRINTED TEXT.
- §1. The great periods.
- §§2–5. §2. The Complutensian Polyglott. §3. The editions of Erasmus. §4. The editions of Stephens. §5. Beza and Elzevir (English version).
- §§6–10. §6. Walton; Curcellaeus; Mill. §7. Bentley. §8. G. v. Maestricht; Wetstein. §9. Griesbach; Matthaei. §10. Scholz.
- §§11–13. §11. Lachmann. §12. Tischendorf. §13. Tregelles; Alford.

III. PRINCIPLES OF TEXTUAL CRITICISM.
- §§1–9. External evidence.
- §§10–13. Internal evidence.

IV. THE LANGUAGE OF THE NEW TESTAMENT.

I. THE HISTORY OF THE WRITTEN TEXT.

1. The early history of the Apostolic writings offers no points of distinguishing literary interest. Externally, as far as it can be traced, it is the same as that of other contemporary books. St. Paul, like Cicero or Pliny, often employed the services of an amanuensis, to whom he dictated his letters, affixing the salutation "with his own hand" (1 Cor. xvi. 21; 2 Thess. iii. 17; Col. iv. 18). In one case the scribe has added a clause in his own name (Rom. xvi. 22). Once, in writing to the Galatians, the Apostle appears to apologise for the rudeness of the autograph which he addressed to them, as if from defective sight (Gal. vi. 11). If we pass onwards one step, it does not appear that any special care was taken in the first age to preserve the books of the N. T. from the various injuries of time, or to insure perfect accuracy of transcription. They were given as a heritage to man, and it was some time before men felt the true value of the gift. The original copies seem to have soon perished; and we may perhaps see in this a providential provision against that spirit of superstition which in earlier times converted the symbols of God's redemption into objects of idolatry (2 K. xviii. 4). It is certainly remarkable that in the controversies at the close of the second century, which often turned upon disputed readings of Scripture, no appeal was made to the Apostolic originals. The few passages in which it has been supposed that they are referred to will not bear examination. Ignatius, so far from appealing to Christian archives, distinctly turns, as the whole context shows, to the examples of the Jewish Church (τὰ ἀρχαῖα—*ad Philad.* 8). Tertullian again, when he speaks of "the *authentic* epistles" of the Apostles (*De Praescr. Haer.* xxxvi., "apud quas ipsae *authenticae* literae eorum recitantur"), uses the term of the pure Greek text as contrasted with the current Latin version (comp. *De Monog.* xi., "sciamus plane non sic esse in Graeco *authentico*"[a]). The silence of the early Apostolic age is made more striking by the legends which were circulated after. It was said that when the grave of Barnabas in Cyprus was opened, in the fifth century, in obedience to a vision, the saint was found holding a (Greek) copy of St. Matthew written with his own hand. The copy was taken to Constantinople, and used as the standard of the sacred text (Credner, *Einl.* §39; Assem. *Bibl. Or.* ii. 81). The autograph copy of St. John's Gospel (αὐτὸ τὸ ἰδιόχειρον τοῦ εὐαγγελιστοῦ) was said to be preserved at Ephesus "by the grace of God, and worshipped (προσκυνεῖται) by the faithful there," in the fourth century (?), ([Petr. Alex.] p. 518, ed. Migne, quoted from *Chron. Pasch.* p. 5; though according to another account it was found in the ruins of the Temple when Julian attempted to rebuild it (Philostorg. vii. 14). A similar belief was current even in the last century. It was said that parts of the (Latin) autograph of St. Mark were preserved at Venice and Prague; but on examination these were shown to be fragments of a MS. of the Vulgate of the sixth century (Dobrowsky, *Fragmentum Pragense Ev. S. Marci*, 1778).

2. In the natural course of things the Apostolic autographs would be likely to perish soon. The material which was commonly used for letters, the papyrus-paper to which St. John incidentally alludes (2 John 12, διὰ χάρτου καὶ μέλανος; comp. 3 John 13, διὰ μέλανος καὶ καλάμου), was singularly fragile, and even the stouter kinds, likely to be used for the historical books, were not fitted to bear constant use. The papyrus fragments which have come down to the present time have been preserved under peculiar circumstances, as at Herculaneum or in Egyptian tombs; and Jerome notices that the library of Pamphilus at Caesarea was already in part destroyed (ex parte corruptam) when, in less than a century after its formation, two presbyters of the Church endeavoured to restore the papyrus MSS. (as the context implies) on parchment ("membranis," Hieron. *Ep.* xxxiv. (141), quoted by Tischdf. in Herzog's *Encycl. Bibeltext des N. T.* p. 159). Parchment (2 Tim. iv. 13, μεμβράνας, which was more durable, was proportionately rare and more costly. And yet more than this. In the

them to be suspicious for new undertakings (*Germ.* c. xl.).

[a] Griesbach (*Opuscula*, ii. 69–76) endeavours to show that the word simply means *pure, unCorrupted*.

first age the written word of the Apostles occupied no authoritative position above their spoken word, and the vivid memory of their personal teaching. And when the true value of the Apostolic writings was afterwards revealed by the progress of the Church, then collections of "the divine oracles" would be chiefly sought for among Christians. On all accounts it seems reasonable to conclude that the autographs perished during that solemn pause which followed the Apostolic age, in which the idea of a Christian Canon, parallel and supplementary to the Jewish Canon, was first distinctly realized.

3. In the time of the Diocletian persecution (A.D. 303) copies of the Christian Scriptures were sufficiently numerous to furnish a special object for persecutors, and a characteristic name to renegades who saved themselves by surrendering the sacred books (*traditores*, August. *Ep.* lxxvi. 2). Partly, perhaps, owing to the destruction thus caused, but still more from the natural effects of time, no MS. of the N. T. of the first three centuries remains.[b] Some of the oldest extant were certainly copied from others which dated from within this period, but as yet no one can be placed further back than the time of Constantine. It is recorded of this monarch that one of his first acts after the foundation of Constantinople was to order the preparation of fifty MSS. of the Holy Scriptures, required for the use of the Church, "on fair skins (*ἐν διφθέραις εὐκατασκεύοις*) by skilful caligraphists" (Euseb. *Vit. Const.* iv. 36); and to the general use of this better material we probably owe our most venerable copies, which are written on vellum of singular excellence and fineness. But though no fragment of the N. T. of the first century still remains, the Italian and Egyptian papyri, which are of that date, give a clear notion of the caligraphy of the period. In these the text is written in columns, rudely divided, in somewhat awkward capital letters (*uncials*), without any punctuation or division of words. The *iota*, which was afterwards *subscribed*, is commonly, but not always, *adscribed*; and there is no trace of accents or breathings. The earliest MSS. of the N. T. bear a general resemblance to this primitive type, and we may reasonably believe that the Apostolic originals were thus written. (Plate i. fig. 1.)

4. In addition to the later MSS., the earliest versions and patristic quotations give very important testimony to the character and history of the ante-Nicene text. Express statements of readings which are found in some of the most ancient Christian writers are, indeed, the first direct evidence which we have, and are consequently of the highest importance. But till the last quarter of the second century this source of information fails us. Not only are the remains of Christian literature up to that time extremely scanty, but the practice of verbal quotation from the N. T. was not yet prevalent. The evangelic citations in the Apostolic Fathers and in Justin Martyr show that the oral tradition was still as widely current as the written Gospels (Comp. Westcott's *Canon of the N. T.* pp. 125–195), and there is not in those writers one express verbal citation from the other Apostolic books.[c] This latter phenomenon is in a great measure to be explained by the nature of their writings. As soon as definite controversies arose among Christians, the text of the N. T. assumed its true importance. The earliest monuments of these remain in the works of Irenaeus, Hippolytus (Pseudo-Origen), and Tertullian, who quote many of the arguments of the leading adversaries of the Church. Charges of corrupting the sacred text are urged on both sides with great acrimony. Dionysius of Corinth († cir. A.D. 176, ap. Euseb. *H. E.* iv. 23), Irenaeus (cir. A.D. 177; iv. 6, 1), Tertullian (cir. A.D. 210; *De Carne Christi*, 19, p. 385; *Adv. Marc.* iv. v. *passim*), Clement of Alexandria (cir. A.D. 200; *Strom.* iv. 6, §41), and at a later time Ambrose (cir. A.D. 375; *De Spir. S.* iii. 10), accuse their opponents of this offence; but with one great exception the instances which are brought forward in support of the accusation generally resolve themselves into various readings, in which the decision cannot always be given in favour of the catholic disputant; and even where the unorthodox reading is certainly wrong it can be shown that it was widely spread among writers of different opinions (*e. g.* Matt. xi. 27, "nec Filium nisi Pater et cui voluerit Filius revelare:" John i. 13, *ὃς —ἐγεννήθη*). Wilful interpolations or changes are extremely rare, if they exist at all (comp. Valent. ap. Iren. i. 4, 5, *add. θεότητες*, Col. i. 16), except in the case of Marcion. His mode of dealing with the writings of the N. T., in which he was followed by his school, was, as Tertullian says, to use the knife rather than subtlety of interpretation. There can be no reasonable doubt that he dealt in the most arbitrary manner with whole books, and that he removed from the Gospel of St. Luke many passages which were opposed to his peculiar views. But when these fundamental changes were once made he seems to have adhered scrupulously to the text which he found. In the isolated readings which he is said to have altered, it happens not unfrequently that he has retained the right reading, and that his opponents are in error (Luke v. 14 om. *τὸ δῶρον*; Gal. ii. 5, *οἷς οὐδέ*; 2 Cor. iv. 5?). In very many cases the alleged corruption is a various reading, more or less supported by other authorities (Luke xii. 38, *ἐσπερινῇ*; 1 Cor. x. 9, *Χριστόν*; 1 Thess. ii. 15, add. *ἰδίους*). And where the changes seem most arbitrary there is evidence to show that the interpolations were not wholly due to his school: Luke xviii. 19, *ὁ πατήρ*; xxiii. 2; 1 Cor. x. 19 (28), add. *ἱερόθυτον*. (Comp. Hahn, *Evangelium Marcionis*; Thilo, *Cod. Apocr.* i. 403-486; Ritschl, *Das Evang. Marc.* 1846; Volckmar, *Das Evang Marc.*, Leipsic, 1852: but no examination of Marcion's text is completely satisfactory).

5. Several very important conclusions follow from this earliest appearance of textual criticism. It is in the first place evident that various readings existed in the books of the N. T. at a time prior to all extant authorities. History affords no trace of the pure Apostolic originals. Again, from the preservation of the first variations noticed, which are often extremely minute, in one or more of the primary documents still left, we may be certain that no important changes have been made in the sacred text which we cannot now detect. The materials for ascertaining the true reading are found to be

[b] Papyrus fragments of part of St. Matthew, dating from the first century (?!), are announced (1861) for publication by Dr. Simonides.

[c] In the epistle of Polycarp some interesting various readings occur, which are found also in later copies. Acts ii. 24, *τοῦ ᾅδου* for *τοῦ θανάτου*; 1 Tim. vi. 7, *ἀλλ' οὐδέ* for *δῆλον ὅτι οὐδέ*; 1 John iv. 3, *ὃ παρεῖ ἀληλυθότα*. Comp. 1 Pet. i. 8 (Polyc. *ad Phil.* i. 4).

complete when tested by the earliest witnesses. And yet further: from the minuteness of some of the variations which are urged in controversy, it is obvious that the words of the N. T. were watched with the most jealous care, and that the least differences of phrase were guarded with scrupulous and faithful piety, to be used in after-time by that wide-reaching criticism which was foreign to the spirit of the first ages.[d]

6. Passing from these isolated quotations we find the first great witnesses to the apostolic text in the early Syriac and Latin versions, and in the rich quotations of Clement of Alexandria († cir. A.D. 220) and Origen (A.D. 184-254). The versions will be treated of elsewhere, and with them the Latin quotations of the translator of Irenaeus and of Tertullian. The Greek quotations in the remains of the original text of Irenaeus and in Hippolytus are of great value, but yield in extent and importance to those of the two Alexandrine fathers. From the extant works of Origen alone no inconsiderable portion of the whole N. T., with the exception of St. James, 2 Peter, 2 and 3 John, and the Apocalypse, might be transcribed, and the recurrence of small variations in long passages proves that the quotations were accurately made and not simply from memory.

7. The evangelic text of Clement is far from pure. Two chief causes contributed especially to corrupt the text of the Gospels, the attempts to harmonize parallel narratives, and the influence of tradition. The former assumed a special importance from the *Diatessaron* of Tatian (cir. A.D. 170. Comp. *Hist. of N.T. Canon*, 358-362; Tischdf. on Matt. xxvii. 49)[e] and the latter, which was, as has been remarked, very great in the time of Justin M., still lingered.[f] The quotations of Clement suffer from both these disturbing forces (Matt. viii. 22, x. 30, xi. 27, xix. 24, xxiii. 27, xxv. 41, x. 26, omitted by Tischdf. Luke iii. 22), and he seems to have derived from his copies of the Gospels two sayings of the Lord which form no part of the canonical text. (Comp. Tischdf. on Matt. vi. 33; Luke xvi. 11). Elsewhere his quotations are free, or a confused mixture of two narratives (Matt. v. 45, vi. 26, 32 f., xxii. 37; Mark xii. 43), but in innumerable places he has preserved the true reading (Matt. v. 4, 5, 42, 48, viii. 22, xi. 17, xiii. 25, xxiii. 26; Acts ii. 41, xvii. 26). His quotations from the Epistles are of the very highest value. In these tradition had no prevailing power, though Tatian is said to have altered in parts the language of the Epistles (Euseb. *H. E.* iv. 29); and the text was left comparatively free from corruptions. Against the few false readings which he supports (*e. g.* 1 Pet. ii. 3, Χριστός; Rom. iii. 26, Ἰησοῦν; viii. 11, διὰ τοῦ ἐνοικ. πν.) may be brought forward a long list of passages in which he combines with a few of the best authorities in upholding the true text (*e. g.* 1 Pet. ii. 2; Rom. ii. 17, x. 3, xv. 29; 1 Cor. ii. 13, vii. 3, 5, 35, 39, viii. 2, x. 24).

8. But Origen stands as far first of all the ante-Nicene fathers in critical authority as he is in command genius, and his writings are an almost inexhaustible storehouse for the history of the text. In many places it seems that the printed text of his works has been modernized; and till a new and thorough collation of the MSS. has been made, a doubt must remain whether his quotations have not suffered by the hands of scribes, as the MSS. of the N. T. have suffered, though in a less degree. The testimony which Origen bears as to the corruption of the text of the Gospels in his time differs from the general statements which have been already noticed as being the deliberate judgment of a scholar and not the plea of a controversialist. "As the case stands," he says, "it is obvious that the difference between the copies is considerable, partly from the carelessness of individual scribes, partly from the wicked daring of some in correcting what is written, partly also from [the changes made by] those who add or remove what seems good to them in the process of correction"[g] (Orig. *In Matt.* t. xv. §14). In the case of the LXX., he adds, he removed or at least indicated those corruptions by a comparison of "editions" (ἐκδόσεις), and we may believe that he took equal care to ascertain, at least for his own use, the true text of the N. T., though he did not venture to arouse the prejudice of his contemporaries by openly revising it, as the old translation adds (*In Matt.* xv. *vet. int.* "in exemplaribus autem Novi Testamenti hoc ipsum me posse facere sine periculo non putavi"). Even in the form in which they have come down to us, the writings of Origen, as a whole, contain the noblest early memorial of the apostolic text. And, though there is no evidence that he published any recension of the text, yet it is not unlikely that he wrote out copies of the N. T. with his own hand (Redepenning, *Origenes*, ii. 184), which were spread widely in after time. Thus Jerome appeals to "the copies of Adamantius," *i. e.* Origen (*In Mat.* xxv. 36; *Gal.* iii. 1), and the copy of Pamphilus can hardly have been other than a copy of Origen's text (Cod. H_2 Subscription, Inf. §26). From Pamphilus the text passed to Eusebius and Euthalius, and it is scarcely rash to believe that it can be traced, though imperfectly, in existing MSS. as C L. (Comp. Griesbach, *Symb. Crit.* i. lxxvi. ff.; cxxx. ff.)

9. In thirteen cases (Norton, *Genuineness of the Gospels*, i. 234-236) Origen has expressly noticed varieties of reading in the Gospels (Matt. viii. 28, xvi. 20, xviii. 1, xxi. 5, xxi. 9, 15, xxvii. 17; Mark iii. 18; Luke i. 46, ix. 48, xiv. 19, xx. 45; John i. 3, 4; 28).[h] In three of these passages the variations which he notices are no longer found in our Greek copies (Matt. xxi. 9 or 15 οἷος καὶ υἱῷ; Tregelles, *ad loc.*; Mark iii. 18 (in. 14 Λεβὶν τὸν τοῦ Ἀλφ. (?); Luke i. 46, Ἐλισάβετ for Μαριάμ; so in some Latin copies); in seven our copies are still divided; in two (Matt. viii. 28, Γαδαρηνῶν; John i. 28, Βηθαβαρᾷ) the reading which was only found in a few MSS. is now widely spread: in the remaining place (Matt.

[d] Irenaeus notices two various readings of importance, in which he maintains the true text, Matt. i. 18, τοῦ δὲ χριστοῦ (iii. 16, 2), Apoc. xiii. 18 (v. 30, 1).

The letter of Ptolemaeus (cir. A.D. 150) to Flora (Epiph. i. 216) contains some important early variations in the evangelic text.

[e] Jerome notices the result of this in his time in strong terms, *Praef. in Evang.*

[f] To what extent tradition might modify the current text is still clearly seen from the *Codex Bezae* and some Latin copies, which probably give a text dating in essence from the close of the 2nd century.

[g] These words seem to refer to the professional corrector (διορθωτής).

[h] To these Mr. Hort (to whom the writer owes many suggestions and corrections in this article) adds Matt. v. 22, from Cramer, *Cat.* in Eph. iv. 31, where Origen blames the insertion of εἰκῇ.

xxvii. 17, Ἰησοῦν Βαραββᾶν) a few copies of no great age retain the interpolation which was found in his time "in very ancient copies." It is more remarkable that Origen asserts, in answer to Celsus, that our Lord is nowhere called "the carpenter" in the Gospels circulated in the churches, though this is undoubtedly the true reading in Mark vi. 3 (Orig. *c. Cels.* vi. 36).

10. The evangelic quotations of Origen are not wholly free from the admixture of traditional glosses which have been noticed in Clement, and often present a confusion of parallel passages (Matt. v. 44, vi. (33), vii. 21 ff., xiii. 11, xxvi. 27 f.; 1 Tim. iv. 1); but there is little difficulty in separating his genuine text from these natural corruptions, and a few references are sufficient to indicate its extreme importance (Matt. iv. 10, vi. 13, xv. 8, 35; Mark i. 2, x. 29; Luke xxi. 19; John vii. 39; Acts x. 10; Rom. viii. 28).

11. In the Epistles Origen once notices a striking variation in Heb. ii. 9, χωρὶς θεοῦ for χάριτι θεοῦ, which is still attested; but, apart from the specific reference to variations, it is evident that he himself used MSS. at different times which varied in many details (Mill, *Prolegg.* §687). Griesbach, who has investigated this fact with the greatest care (*Meletema* i. appended to *Comm. Crit.* ii. ix.-xl.), seems to have exaggerated the extent of these differences while he establishes their existence satisfactorily. There can be no doubt that in Origen's time the variations in the N. T. MSS., which we have seen to have existed from the earliest attainable date, and which Origen describes as considerable and widespread, were beginning to lead to the formation of specific groups of copies.

Though the materials for the history of the text during the first three centuries are abundant, nothing has been written in detail on the subject since the time of Mill (*Prolegg.* 240 ff.) and R. Simon (*Histoire Critique* 1685-93). What is wanted is nothing less than a complete collection at full length, from MS. authority, of all the ante-Nicene *Greek* quotations. These would form a centre round which the variations of the versions and Latin quotations might be grouped. A first step towards this has been made by Anger in his *Synopsis Evv. Matt. Marc., Luc.* 1851. The *Latin* quotations are well given by Sabatier, *Bibliorum Sacrorum Latinae versiones antiquae*, 1751.

12. The most ancient MSS. and versions now extant exhibit the characteristic differences which have been found to exist in different parts of the works of Origen. These cannot have had their source later than the beginning of the third century, and probably were much earlier. In classical texts, where the MSS. are sufficiently numerous, it is generally possible to determine a very few primary sources, standing in definite relations to one another, from which the other copies can be shown to flow; and from these the scholar is able to discover one source of all. In the case of the N. T. the authorities for the text are infinitely more varied and extensive than elsewhere, and the question has been raised whether it may not be possible to distribute them in like manner and divine from later documents the earliest history of the text. Various answers have been made which are quite valueless as far as they profess to rest on historical evidence; and yet are all more or less interesting as explaining the true conditions of the problem. The chief facts, it must be noticed, are derived from later documents, but the question itself belongs to the last half of the second century.

Bengel was the first (1734) who pointed out the affinity of certain groups of MSS., which, as he remarks, must have arisen before the first versions were made (*Apparatus Criticus*, ed. Burk, p. 425). Originally he distinguished three families, of which the *Cod. Alex.* (A) the Graeco-Latin MSS., and the mass of the more recent MSS. were respectively the types. At a later time (1737) he adopted the simpler division of "two nations," the Asiatic and the African. In the latter he included *Cod. Alex.*, the Graeco-Latin MSS., the Aethiopic, Coptic [Memphitic], and Latin versions: the mass of the remaining authorities formed the Asiatic class. So far no attempt was made to trace the history of the groups, but the general agreement of the most ancient witnesses against the more recent, a fact which Bentley announced, was distinctly asserted, though Bengel was not prepared to accept the ancient reading as necessarily true. Semler contributed nothing of value to Bengel's theory, but made it more widely known (*Spicilegium Observationum, &c.*, added to his edition of Wetstein's *Libelli ad Crisin atque Int. N. T.* 1766; *Apparatus, &c.* 1767). The honour of carefully determining the relations of critical authorities for the N. T. text belongs to Griesbach. This great scholar gave a summary of his theory in his *Historia Text. Gr. Epist. Paul.* (1777, *Opusc.* ii. 1-135) and in the preface to his first edition of the Greek Test. His earlier essay, *Dissert. Crit. de Codd. quat. Evang. Origenianis* (1771, *Opusc.* i.), is incomplete. According to Griesbach (*Nov. Test.* Praef. pp. lxx. ff.) two distinct recensions of the Gospels existed at the beginning of the third century: the *Alexandrine*, represented by B C L, 1, 13, 33, 69, 106, the Coptic, Aethiop., Arm., and later Syrian versions, and the quotations of Clem. Alex., Origen, Eusebius, Cyril. Alex., Isid. Pelus.; and the *Western*, represented by D, and in part by 1, 13, 69, the ancient Latin version and Fathers, and sometimes by the Syriac and Arabic versions. *Cod. Alex.* was to be regarded as giving a more recent (Constantinopolitan) text in the Gospels. As to the origin of the variations in the text, Griesbach supposed that copies were at first derived from the separate autographs or imperfect collections of the apostolic books. These were gradually interpolated, especially as they were intended for private use, by glosses of various kinds, till at length authoritative editions of the collection of the Gospels and the letters (εὐαγγέλιον, ὁ ἀπόστολος, τὸ ἀποστολικόν) were made. These gave in the main a pure text, and thus two classes of MSS. were afterwards current, those derived from the interpolated copies (*Western*), and those derived from the εὐαγγέλιον and ἀποστολικόν (Alexandrine, *Eastern*; *Opusc.* ii. 77-99; *Meletemata*, xliv.). At a later time Griesbach rejected these historical conjectures (*Nov. Test.* ed. 2, 1796; yet comp. *Meletem.* l. c.), and repeated with greater care and fulness, from his enlarged knowledge of the authorities, the threefold division which he had originally made (*N. T.* i. *Praef.* lxx.-lxxvii. ed. Schulz). At the same time he recognized the existence of mixed and transitional texts; and when he characterized by a happy epigram (*grammaticum egit Alexandrinus censor, interpretem occidentalis*) the difference of the two ancient families, he frankly admitted that no exist-

ing document exhibited either "recension" in a pure form. His great merit was independent of the details of his system: he established the existence of a group of ancient MSS. distinct from those which could be accused of Latinizing (Tregelles, *Horne*, p. 105).

13. The chief object of Griesbach in propounding his theory of recensions was to destroy the weight of mere numbers.[1] The critical result with him had far more interest than the historical process; and, apart from all consideration as to the origin of the variations, the facts which he pointed out are of permanent value. Others carried on the investigation from the point where he left it. Hug endeavoured, with much ingenuity, to place the theory on a historical basis (*Einleitung in N. T.* 1st ed. 1808; 3rd, 1826). According to him, the text of the N. T. fell into a state of considerable corruption during the second century. To this form he applied the term *κοινὴ ἔκδοσις* (*common edition*), which had been applied by Alexandrine critics to the unrevised text of Homer, and in later times to the unrevised text of the LXX. (i. 144). In the course of the third century this text, he supposed, underwent a threefold revision, by Hesychius in Egypt, by Lucian at Antioch, and by Origen in Palestine. So that our existing documents represent four classes: (1) The *unrevised*, D. 1, 13, 69 in the Gospels; D E_2 in the Acts; D_2 F_2 G_2 in the Pauline Epistles: the old Latin and Thebaic, and in part the Peshito Syriac; and the quotations of Clement and Origen. (2) The Egyptian recension of Hesychius; B C L in Gospels; A B C 17 in the Pauline Epistles; A B C Acts and Catholic Epistles; A C in the Apocalypse: the Memphitic version; and the quotations of Cyril. Alex. and Athanasius. (3) The Asiatic (Antioch-Constantinople) recension of Lucian; E F G H S V and the recent MSS. generally; the Gothic and Slavonic versions and the quotations of Theophylact. (4) The Palestinian recension of Origen (of the Gospels); A K M; the Philoxenian Syriac; the quotations of Theodoret and Chrysostom. But the slender external proof which Hug adduced in support of this system was, in the main, a mere misconception of what Jerome said of the labours of Hesychius and Lucian on the LXX. (*Praef. in Paralip.*; c. Ruff. ii. 27; and Ep. cvi. (135) §2. The only other passages are *De Viris illustr.* cap. lxxvii. Lucianus; *Praef. in quat. Ev.*); the assumed recension of Origen rests on no historical evidence whatever. Yet the new analysis of the internal character of the documents was not without a valuable result. Hug showed that the line of demarcation between the Alexandrine and Western families of Griesbach was practically an imaginary one. Not only are the extreme types of the two classes connected by a series of intermediate links, but many of the quotations of Clement and Origen belong to the so-called Western text. Griesbach in examining Hug's hypothesis, explained this phenomenon by showing that at various times Origen used MSS. of different types, and admitted that many Western readings are found in Alexandrine copies (*Meletem.* xlviii. cxcp. Lawrence, *Remarks on the Systematic Classification of MSS.* 1814).

14. Little remains to be said of later theories. Eichhorn accepted the classification of Hug (*Einleitung*, 1818-27). Matthaei, the bitter adversary of Griesbach, contented himself with asserting the paramount claims of the later copies against the more ancient, allowing so far their general difference (*Ueber die sog. Recensionen* 1804; *N. T.* 1782-88). Scholz returning to a simpler arrangement divided the authorities into two classes, Alexandrine and Constantinopolitan (*N. T.* i. pp. xv. ff.) and maintained the superior purity of the latter on the ground of their assumed unanimity. In practice he failed to carry out his principles; and the unanimity of the later copies has now been shown to be quite imaginary. Since the time of Scholz theories of recensions have found little favour. Lachmann, who accepted only ancient authorities, simply divided them into Eastern (Alexandrine) and Western. Tischendorf, with some reserve, proposes two great classes, each consisting of two pairs, the Alexandrine and Latin, the Asiatic and Byzantine. Tregelles, discarding all theories of recension as historic facts, insists on the general accordance of ancient authorities as giving an ancient text in contrast with the recent text of the more modern copies. At the same time he points out what we may suppose to be the "genealogy of the text." This he exhibits in the following form:

D — ℵ B Z; C L Ξ 1 33; P Q T R; X (Δ) 69 — A; K M H; E F G S U, &c.[2]

15. The fundamental error of the recension theories is the assumption either of an actual recension or of a pure text of one type, which was variously modified in later times, while the fact seems to be exactly the converse. Groups of copies spring not from the imperfect reproduction of the character of one typical exemplar, but from the multiplication of characteristic variations. They are the results of a tendency, and not of a fact. They advance *towards* and do not lead *from* that form of text which we regard as their standard. Individuals, as Origen, may have exercised an important influence at a particular time and place, but the silent and continual influence of circumstances was greater. A pure Alexandrine or Western text is simply a fiction. The tendency at Alexandria or Carthage was in a certain direction, and necessarily influenced the character of the current texts with accumulative force as far as it was unchecked by other influences. This is a general law, and the history of the apostolic books is no exception to it. The history of their text differs from that of other books chiefly in this, that, owing to the great multiplicity of testimony, typical copies are here represented by typical groups of copies, and the intermediate stages are occupied by mixed texts. But if we look beneath this complication general

[1] This he states distinctly (*Symb. Crit.* i. cxxii.):—'Praecipuus vero recensionum in criseos sacrae exercitio usus hic est, ut eorum auctoritate lectiones bonas, sed in paucis libris superstites defendamus adversus juniorum et vulgarium codicum innumerabilem poene turbam." Comp. id. ii. 624, n. The necessity of destroying this grand source of error was supreme, as may be seen not only from such canons as G. v. Maestricht (ii. §8, n.), but also from Wetstein's Rule xviii.. "Lectio pluribus codicum caeteris paribus praeferenda est."

[2] "Those codices are placed together which appear to demand such an arrangement; and those which stand below others are such as show still more and more of the intermixture of modernised readings" (Tregelles, *Horne* p. 106).

lines of change may be detected. All experience shows that certain types of variation propagate and perpetuate themselves, and existing documents prove that it was so with the copies of the N. T. Many of the links in the genealogical table of our MSS. may be wanting, but the specific relations between the groups, and their comparative antiquity of origin, are clear. This antiquity is determined, not by the demonstration of the immediate dependence of particular copies upon one another, but by reference to a common standard. The secondary uncials (E S U, &c.) are not derived from the earlier (B C A) by direct descent, but rather both are derived by different processes from one original. And here various considerations will assist the judgment of the critic. The accumulation of variations may be more or less rapid in certain directions. A disturbing force may act for a shorter time with greater intensity, or its effects may be slow and protracted. Corruptions may be obvious or subtle, the work of the ignorant copyist or of the rash scholar; they may lie upon the surface or they may penetrate into the fabric of the text. But on such points no general rules can be laid down. Here as elsewhere, there is an instinct or tact which discerns likenesses or relationships and refuses to be measured mechanically. It is enough to insist on the truth that the varieties in our documents are the result of slow and natural growth and not of violent change. They are due to the action of intelligible laws and rarely, if ever, to the caprice or imperfect judgment of individuals. They contain in themselves their history and their explanation.

16. From the consideration of the earliest history of the N. T. text we now pass to the aera of MSS. The quotations of DIONYSIUS ALEX. (†A.D. 264), PETRUS ALEX. (†c. A.D. 312), METHODIUS (†A.D. 311), and EUSEBIUS (†A.D. 340), confirm the prevalence of the ancient type of text; but the public establishment of Christianity in the Roman empire necessarily led to important changes. Not only were more copies of the N. T. required for public use (Comp. §3), but the nominal or real adherence of the higher ranks to the Christian faith must have largely increased the demand for costly MSS. As a natural consequence the rude Hellenistic forms gave way before the current Greek, and at the same time it is reasonable to believe that smoother and fuller constructions were substituted for the rougher turns of the apostolic language. In this way the foundation of the Byzantine text was laid, and the same influence which thus began to work, continued uninterruptedly till the fall of the Eastern empire. Meanwhile the multiplication of copies in Africa and Syria was checked by Mohammedan conquests. The Greek language ceased to be current in the West. The progress of the Alexandrine and Occidental families of MSS. was thus checked; and the mass of recent copies necessarily represent the accumulated results of one tendency.

17. The appearance of the oldest MSS. has been already described (§3). The MSS of the 4th century, of which *Cod. Vatican.* (B) may be taken as a type, present a close resemblance to these. The writing is in elegant continuous (capitals) uncials,[m] in three columns,[n] without initial letters or *iota subscripti*, or *ascripti*. A small interval serves as a simple punctuation; and there are no accents or breathings by the hand of the first writer, though these have been added subsequently. *Uncial* writing continued in general use till the middle of the 10th century.[o] One uncial MS. (S), the earliest dated copy, bears the date 949; and for service books the same style was retained a century later. From the 11th century downwards *cursive* writing prevailed, but this passed through several forms sufficiently distinct to fix the date of a MS. with tolerable certainty. The earliest cursive Biblical MS. is dated 964 A.D. (Gosp. 14, Scrivener, *Introduction*, p. 36 *note*), though cursive writing was used a century before (A.D. 888, Scrivener, *l. c.*). The MSS. of the 14th and 15th centuries abound in the contractions which afterwards passed into the early printed books. The material as well as the writing of MSS. underwent successive changes. The oldest MSS. are written on the thinnest and finest vellum: in later copies the parchment is thick and coarse. Sometimes, as in *Cod. Cotton.* (N = J), the vellum is stained. Papyrus was very rarely used after the 9th century. In the 10th century cotton paper (*charta bombycina*, or *Damascena*) was generally employed in Europe; and one example at least occurs of its use in the 9th century (Tischdf. *Not. Cod. Sin.* p. 54, quoted by Scrivener, *Introduction*, p. 21). In the 12th century the common linen or rag paper came into use; but paper was "seldom used for Biblical MSS. earlier than the 13th century, and had not entirely displaced parchment at the aera of the invention of printing, c. A.D. 1450" (Scrivener, *Introduction*, p. 21). One other kind of material requires notice, redressed parchment (παλίμψηστος, *charta deleticia*). Even at a very early period the original text of a parchment MS. was often erased, that the material might be used afresh (Cic. *ad Fam.* vii. 18; Catull. xxii.).[p] In lapse of time the original writing frequently reappears in faint lines below the later text, and in this way many precious fragments of Biblical MSS. which had been once obliterated for the transcription of other works have been recovered. Of these palimpsest MSS. the most famous are those noticed below under the letters C. R. Z. Ξ. The earliest Biblical palimpsest is not older than the 5th century (Plate i. fig. 3).

18. In uncial MSS. the contractions are usually limited to a few very common forms (ΘC, IC, ΠΗΡ, ΔΑΔ, &c., *i. e.* θεός, Ἰησοῦς, πατήρ, Δαυείδ; comp. Scrivener, *Introduction*, p. 43). A few more occur in later uncial copies, in which there are also some examples of the ascript *iota*.

[m] Jerome describes the false taste of many in his time (c. A.D. 400) with regard to MSS. of the Bible: "Habeant qui volunt veteres libros, vel in membranis purpureis auro argentoque descriptos, vel *uncialibus*, ut vulgo aiunt litteris onera magis exarata, quam codices; dummodo mihi mecum permittant pauperes habere schedulas, et non tam pulcros codices quam emendatos" (*Praef. in Judithæ*, tom. viii. 1084, ed. Migne).

[n] The Codex Sinaiticus (Cod. Frid. Aug.) has *four* columns; Cod. Alex. (A) *two*. Cf. Scrivener, *Introduction*, p. 25, &c. for other examples.

[o] A full and interesting account of the various changes in the uncial alphabet at different times is given by Scrivener, *Introduction*, pp. 27-36.

[p] This practice was condemned at the Quinisextine Council (A.D. 692), Can. 68; but the Commentary of Balsamon shows that in his time (†A.D. 1204) the practice had not ceased: σημείωσαι ταῦτα διὰ τοὺς βιβλιοπαλίλους τοὺς ἀναλείφοντας τὰς μεμβράνας τῶν θείων γραφῶν. A Biblical fragment in the British Museum has been erased, and used *twice* afterwards for Syrian writing (Add. 17, 136. Cod. Nb Tischdf.).

which occurs rarely in the Codex Sinaiticus.[q] Accents are not found in MSS. older than the 8th century.[r] Breathings and the apostrophus (Tischdf. *Proleg.* cxxxi.) occur somewhat earlier. The oldest punctuation after the simple interval, is a stop like the modern Greek colon (in A C D), which is accompanied by an interval, proportioned in some cases to the length of the pause.[s] In E (Gospp.) and B_2 (Apoc.), which are MSS. of the 8th century, this point marks a full stop, a colon, or a comma, according as it is placed at the top, the middle, or the base of the letter (Scrivener. p. 42).[t] The present note of interrogation (;) came into use in the 9th century.

19. A very ingenious attempt was made to supply an effectual system of punctuation for public reading, by Euthalius, who published an arrangement of St. Paul's Epistles in clauses (*στίχοι*) in 458, and another of the Acts and Catholic Epistles in 490. The same arrangement was applied to the Gospels by some unknown hand, and probably at an earlier date. The method of subdivision was doubtless suggested by the mode in which the poetic books of the O. T. were written in the MSS. of the LXX. The great examples of this method of writing are D (Gospels), H_2 (Epp.), D_2 (Epp.). The *Cod. Laud.* (E_2 Acts) is not strictly stichometrical, but the parallel texts seem to be arranged to establish a verbal connexion between the Latin and Greek (Tregelles, *Horne*, 187). The *στίχοι* vary considerably in length, and thus the amount of vellum consumed was far more than in an ordinary MS., so that the fashion of writing in "clauses" soon passed away; but the numeration of the *στίχοι* in the several books was still preserved, and many MSS. (*e.g.* Δ Ep., K Gosp.) bear traces of having been copied from older texts thus arranged.[u]

20. The earliest extant division of the N. T. into sections occurs in Cod. B. This division is elsewhere found only in the palimpsest fragment of St. Luke, Ξ. In the Acts and the Epistles there is a double division in B, one of which is by a later hand. The Epistles of St. Paul are treated as one unbroken book divided into 93 sections, in which the Epistle to the Hebrews originally stood between the Epistles to the Galatians and the Ephesians. This appears from the numbering of the sections, which the writer of the MS. preserved, though he transposed the book to the place before the pastoral epistles.[v]

21. Two other divisions of the Gospels must be noticed. The first of these was a division into "chapters" (*κεφάλαια, τίτλοι, breves*), which correspond with distinct sections of the narrative, and are on an average a little more than twice as long as the sections in B. This division is found in א, C, R, Z, and must therefore have come into general use some time before the 5th century.[w] The other division was constructed with a view to a harmony of the Gospels. It owes its origin to Ammonius of Alexandria, a scholar of the 3rd century, who constructed a Harmony of the Evangelists, taking St. Matthew as the basis round which he grouped the parallel passages from the other Gospels. Eusebius of Caesarea completed his labour with great ingenuity, and constructed a notation and a series of tables, which indicate at a glance the parallels which exist to any passage in one or more of the other Gospels, and the passages which are peculiar to each. There seems every reason to believe that the sections as they stand at present, as well as the ten "Canons," which give a summary of the Harmony, are due to Eusebius, though the sections sometimes occur in MSS. without the corresponding Canons.[x] The Cod. Alex. (A), and the Cottonian fragments (N), are the oldest MSS. which contain both in the original hand. The sections occur in the palimpsests C, R, Z, P, Q, and it is possible that the Canons may have been there originally, for the vermilion (*κιννάβαρις*, Euseb. *Ep. ad Carp.*), or paint with which they were marked would entirely disappear in the process of preparing the parchment afresh.[y]

22. The division of the Acts and Epistles into chapters came into use at a later time. It does not occur in A or C, which give the Ammonian sections, and is commonly referred to Euthalius (Comp. §19), who, however, says that he borrowed the divisions of the Pauline Epistles from an earlier father; and there is reason to believe that the division of the Acts and Catholic Epistles which he published was originally the work of Pamphilus the Martyr (Montfaucon, *Bibl. Coislin.* p. 78). The Apocalypse was divided into sections by Andreas of Caesarea about A.D. 500. This division consisted of 24 *λόγοι*, each of which was subdivided into three "chapters" (*κεφάλαια*).[z]

23. The titles of the sacred books are from their nature additions to the original text. The distinct names of the Gospels imply a collection, and the titles of the Epistles are notes by the possessors and not addresses by the writers ("Inscriptions a,

[q] As to the use of cursive MSS. in this respect of *iota ascript* or *subscript*, Mr. Scrivener found that "of forty-three MSS. now in England, twelve have no vestige of either fashion, fifteen represent the *ascript* use, nine the *subscript* exclusively, while the few that remain have both indifferently" (*Introduction*, p. 39). The earliest use of the subscript is in a MS. (71) dated 1160 (Scrivener, *l. c.*).

[r] Mr. Scrivener makes an exception in the case of "the first four lines of each column of the book of Genesis" in Cod. A, which, he says, is furnished with accents and breathings by the *first* hand (*Introduction*, p. 40). Dr. Tregelles, to whose kindness I am indebted for several remarks on this article, expressed to me his strong doubts as to the correctness of this assertion; and a very careful examination of the MS. leaves no question but that the accents and breathings were the work of the later scribe who accentuated the whole of the first three columns. There is a perceptible difference in the shade of the red pigment, which is decisively shown in the initial E.

[s] The division in John i. 3, 4, ὃ γέγονεν ἐν αὐτῷ ζωὴ ἦν (cf. Tregelles, *ad loc.*), Rom. viii. 20 (Origen), ix. 5, shows the attention given to this question in the earliest times

[t] Dr. Tregelles, whose acquaintance with ancient MSS. is not inferior to that of any scholar, expresses a doubt "whether this is at all uniformly the case."

[u] Comp. Tischdf. *N. T.* ed. 1859, under the subscriptions to the several books. Wetstein, *Prolegg.* pp. 100-102.

[v] The oldest division is not found in 2 Pet. (ed. Vercel. p. 125.) (Mr. Hort). It is found in Jude; 2, 3 John.

[w] The *κεφάλαια* do not begin with the beginning of the books (Griesbach, *Comm. Crit.* ii. 49). This is important in reference to the objections raised against Matt. i.

[x] These very useful canons and sections are printed in the Oxford Text (Lloyd) in Tischendorf (1859), and the notation is very easily mastered. A more complete arrangement of the canons, giving the order of the sections in each Evangelist, originally drawn up by Dr. Tregelles is found in Dr. Wordsworth's *Gk. Test.* vol. i.

[y] A comparative table of the ancient and modern divisions of the N. T. is given by Scrivener (*Introduction*, p. 58).

[z] For the later division of the Bible into our present chapters and verses, see BIBLE, i. 214.

Β', &c.). In their earliest form they are quite simple, *According to Matthew*, &c. (κατὰ Ματθαῖον κ.τ.λ.); *To the Romans*, &c. (πρὸς Ῥωμαίους κ.τ.λ.); *First of Peter*, &c. (Πέτρου α'); *Acts of Apostles* (πράξεις ἀποστόλων); *Apocalypse*. These headings were gradually amplified till they assumed such forms as *The holy Gospel according to John*; *The first Catholic Epistle of the holy and all-praiseworthy Peter*; *The Apocalypse of the holy and most glorious Apostle and Evangelist, the beloved virgin who rested on the bosom of Jesus, John the Divine*. In the same way the original subscriptions (ὑπογραφαί), which were merely repetitions of the titles, gave way to vague traditions as to the dates, &c., of the books. Those appended to the Epistles, which have been translated in the A. V., are attributed to Euthalius, and their singular inaccuracy (Paley, *Horae Paulinae*, ch. xv.) is a valuable proof of the utter absence of historical criticism at the time when they could find currency.

24. Very few MSS. contain the whole N. T., "twenty-seven in all out of the vast mass of extant documents" (Scrivener, *Introduction*, 61). The MSS. of the Apocalypse are rarest; and Chrysostom complained that in his time the Acts was very little known. Besides the MSS. of the N. T., or of parts of it, there are also Lectionaries, which contain extracts arranged for the Church-services. These were taken from the Gospels (εὐαγγελιστάρια), or from the Gospels and Acts (πραξαποστόλοι), or rarely from the Gospels and Epistles (ἀποστολοευαγγέλια). The calendars of the lessons (συναξάρια), are appended to very many MSS. of the N. T.: those for the saints'-day lessons, which varied very considerably in different times and places, were called Μηνολόγια (Scholz, *N. T.*, 453-493; Scrivener, 68-75).

25. When a MS. was completed it was commonly submitted, at least in early times, to a careful revision. Two terms occur in describing this process, ὁ ἀντιβάλλων and διορθωτής. It has been suggested that the work of the former answered to that of "the corrector of the press," while that of the latter was more critical (Tregelles, *Horne*, 85, 86). Possibly, however, the words only describe two parts of the same work. Several MSS. still preserve a subscription which attests a revision by comparison with famous copies, though this attestation must have referred to the earlier exemplars (Comp. Tischdf. Jude *subscript.*); but the Coislinian fragment (H_3) may have been itself compared, according to the subscription, "with the copy in the library at Caesarea, written by the hand of the holy Pamphilus." (Comp. Scrivener, *Introduction*, p. 47). Besides this official correction at the time of transcription, MSS. were often corrected by different hands in later times. Thus Tischendorf distinguishes the work of two correctors in C, and of three chief correctors in D_2. In later MSS. the corrections are often much more valuable than the original text, as in 67 (Epp.); and in the *Cod. Sinait.* the readings of one corrector (ℵ b) are frequently as valuable as those of the original text.[a]

The work of Montfaucon still remains the classical authority on Greek Palaeography (*Palaeographia Graeca*, Paris, 1708), though much has been discovered since his time which modifies some of his statements. The plates in the magnificent work of Silvestre and Champollion (*Paléographie Universelle*, Paris, 1841, *Eng. Trans.* by Sir F. Madden, London, 1850) give a splendid and fairly accurate series of facsimiles of Greek MSS. (Plates, liv.-xciv.). Tischendorf announces a new work on Palaeography (*N. T. Praef.* cxxxiii.), and this, if published, will probably leave nothing to be desired in the Biblical branch of the study.

26. The number of uncial MSS. remaining, though great when compared with the ancient MSS. extant of other writings, is inconsiderable.[b] Tischendorf (*N. T. Praef.* cxxx.) reckons 40 in the Gospels, of which 5 are entire, B K M S U; 3 nearly entire, E L Δ; 10 contain very considerable portions, A C D F G H V X Γ Λ; of the remainder 14 contain very small fragments, 8 fragments more (I P Q R Z) or less considerable (N T Y). To these must be added ℵ (*Cod. Sinait.*), which is entire; Ξ (?) a new MS. of Tischendorf (*Not. Cod Sin.* pp. 51-52), which is nearly entire; and Ψ (*Cod. Zacynth.*), which contains considerable fragments of St. Luke. Tischendorf has likewise obtained 6 additional fragments (*l. c.*). In the Acts there are 9 (10 with ℵ). of which 4 contain the text entire (ℵ A B), or nearly (E_2) so; 4 have large fragments, (C D H_2 G_2=L_2); 2 small fragments. In the Catholic Epistles 5, of which 4, A B K_2 G_2 = L_2 are entire; 1 (C) nearly entire. In the Pauline Epistles there are 14, 2 nearly entire, D_2 L_2; 7 have very considerable portions, A B C E_2 F_2 G_2 K_2 (but E_2 should not be reckoned); the remaining 5 some fragments. In the Apocalypse 3, two entire (A B_2), one nearly entire (C). To these three last classes must be added ℵ, which is entire.

27. According to date these MSS. are classed as follows:—

Fourth century. ℵ B.
Fifth century. A C, and some fragments including Q T.
Sixth century. D P R Z, E_2, D_2 H_2, and 4 smaller fragments.
Seventh century. Some fragments including Θ.
Eighth century. E L Λ Ξ, B_2 and some fragments.
Ninth century. F K M X T Δ, H_2 G_2=L_2, F_2 G_2 K_2 M_2 and fragments.
Tenth century. G H S U, (E_2).

28. A complete description of these MSS. is given in the great critical editions of the N. T.: here those only can be briefly noticed which are of primary importance, the first place being given to the latest discovered and most complete *Codex Sinaiticus*.

A (i). Primary Uncials of the Gospels.

ℵ (*Codex Sinaiticus* = *Cod. Frid. Aug.* of LXX.), at St. Petersburgh, obtained by Tischendorf from the convent of St. Catherine, Mount Sinai, in 1859. The fragments of LXX. published as *Cod. Frid. Aug.* (1846), were obtained at the same place by Tischendorf in 1844. The N. T. is entire, and the Epistle of Barnabas and parts of the Shepherd of

[a] Examples of the attestation and signature of MSS., with a list of the names of scribes, are given by Montfaucon (*Palaeographia*, pp. 39-108).

[b] Since the time of Wetstein the uncial MSS. have been marked by capital letters, the cursives by numbers (and later by small letters). In consequence of the confusion which arises from applying the same letter to different MSS., I have distinguished the different MSS. by the notation M, M_2, M_3, retaining the asterisk (as originally used) to mark the first, &c., hands.

Hermas are added. The whole MS. is to be published in 1862 by Tischendorf at the expense of the Emperor of Russia. It is probably the oldest of the MSS. of the N. T., and of the 4th century (Tischdf. *Not. Cod. Sin.* 1860).

A (*Codex Alexandrinus*, Brit. Mus.), a MS. of the entire Greek Bible, with the Epistles of Clement added. It was given by Cyril Lucar, patriarch of Constantinople, to Charles I. in 1628, and is now in the British Museum. It contains the whole of the N. T. with some chasms: Matt. i.–xxv. 6, ἐξέρχεσθε; John vi. 50, ἵνα–viii. 52, λέγει; 2 Cor. iv. 13, ἐπίστευσα–xii. 6, ἐξ ἐμοῦ. It was probably written in the first half of the 5th century. The N. T. has been published by Woide (fol. 1786), and with some corrections by Cowper (8vo. 1860).[a] Comp. Wetstein, *Prolegg.* pp. 13-30 (ed. Lotze). (Plate i. fig. 2.)

B (*Codex Vaticanus*, 1209), a MS. of the entire Greek Bible, which seems to have been in the Vatican Library almost from its commencement (c. A.D. 1450). It contains the N. T. entire to Heb. ix. 14, καθα: the rest of the Epistle to the Hebrews, the Pastoral Epistles, and the Apocalypse were added in the 15th century. Various collations of the N. T. were made by Bartolocci (1669), by Mico for Bentley (c. 1720), whose collation was in part revised by Rulotta (1720), and by Birch (1788). An edition of the whole MS., on which Mai had been engaged for many years, was published three years after his death in 1858 (V voll. 4to. ed. Vercellone; N. T. reprinted Lond. and Leipsic). Mai had himself kept back the edition (printed 1828-1838), being fully conscious of its imperfections, and had prepared another edition of the N. T., which was published also by Vercellone in 1859 (8vo.). The errors in this are less numerous than in the former collation; but the literal text of B is still required by scholars. The MS. is assigned to the 4th century (Tischdf. *N. T.* cxxxvi.-cxlix.).

C (*Codex Ephraemi rescriptus*. Paris, *Bibl. Imp.* 9), a palimpsest MS. which contains fragments of the LXX. and of every part of the N. T. In the 12th century the original writing was effaced and some Greek writings of Ephraem Syrus were written over it. The MS. was brought to Florence from the East at the beginning of the 16th century, and came thence to Paris with Catherine de' Medici. Wetstein was engaged to collate it for Bentley (1716), but it was first fully examined by Tischendorf, who published the N. T. in 1843: the O. T. fragments in 1845. The only entire books which have perished are 2 Thess. and 2 John, but lacunae of greater or less extent occur constantly. It is of about the same date as *Cod. Alex.*

D (*Codex Bezae*. Univ. Libr. Cambridge), a Graeco-Latin MS. of the Gospels and Acts, with a small fragment of 3 John, presented to the University of Cambridge by Beza in 1581. Some readings from it were obtained in Italy for Stephens' edition; but afterwards Beza found it at the sack of Lyons in 1562 in the monastery of St. Irenaeus. The text is very remarkable, and, especially in the Acts, abounds in singular interpolations. The MS. has many lacunae. It was edited in a splendid form by Kipling (1793, 2 vols. fol.), and no complete collation has been since made; but arrangements have lately been (1861) made for a new edition under the care of the Rev. F. H. Scrivener. The MS. is referred to the 6th century. Cf. Credner, *Beiträge*, i. 452-518; Bornemann, *Acta Apostolorum*, 1848; Schulz, *De Codice D, Cantab.* 1827.

L (*Paris. Cod. Imp.* 62), one of the most important of the late uncial MSS. It contains the four Gospels, with the exception of Matt. iv. 23-v. 14, xxviii. 17-20; Mark x. 16-20, xv. 2-20, John xxi. 15-25. The text agrees in a remarkable manner with B and Origen. It has been published by Tischendorf, *Monumenta Sacra Inedita*, 1846. Cf. Griesbach, *Symb. Crit.* i. lxvi.-cxli. It is of the 8th century.

R (*Brit. Mus. Add.* 17,211), a very valuable palimpsest, brought to England in 1847 from the convent of St. Mary Deipara in the Nitrian desert. The original text is covered by Syrian writing of the 9th or 10th century. About 585 verses of St. Luke were deciphered by Tregelles in 1854, and by Tischendorf in 1855. The latter has published them in his *Mon. Sacra Inedita*, ii. 1855. It is assigned to the 6th century. (Plate i. fig. 3.)

X (*Codex Monacensis*), in the University Library at Munich. Collated by Tischendorf and Tregelles. Of the 10th century.

Z (*Cod. Dublinensis rescriptus*, in the Library of Trin. Coll. Dublin), a palimpsest containing large portions of St. Matthew. It was edited by Barrett (1801); and Tregelles has since (1853) re-examined the MS. and deciphered all that was left undetermined before (*History of Printed Text*, pp. 166-9). It is assigned to the 6th century.

Δ (*Codex Sangallensis*), a MS. of the Gospels, with an interlinear Latin translation, in the Library of St. Gall. It once formed part of the same volume with G_3. Published in lithographed fac-simile by Rettig (Zurich, 1836).

Ξ (*Codex Zacynthius*), a palimpsest in possession of the Bible Society, London, containing important fragments of St. Luke. It is probably of the 8th century, and is accompanied by a *Catena*. The later writing is a Greek Lectionary of the 12th century. It has been transcribed and published by Tregelles (London, 1861).

The following are important fragments:—

I (Tischendorf), various fragments of the Gospels (Acts, Pauline Epistles), some of great value, published by Tischendorf, *Monumenta Sacra*, 1855.

N (*Cod. Cotton.*), (formerly J N), twelve leaves of purple vellum, the writing being in silver. Two leaves are in Brit. Mus. (Cotton. C. xv). Published by Tischendorf, *Mon. Sacr. inedd.*, 1846. Saec. vi.

N^b (Brit. Mus. *Add.* 17, 136), a palimpsest. Deciphered by Tregelles and Tischendorf, and published by the latter: *Mon. Sacr. inedd.* ii. Saec. iv.

[a] It is much to be regretted that the editor has followed the bad example of Card. Mai in introducing modern punctuation, breathings, and accents, which are by no means always indifferent (*e. g.* Luke vii. 12, αὐτῇ χήρᾳ is given without note, where probably the MS. represents αὐτῆ ἀν αὐτῆ) χήρα). It is scarcely less unfortunate that he has not always given the original punctuation, however absurd it may appear, and the few contractions which occur in the MS. With these drawbacks, the text seems to be given on the whole accurately.

[b] An edition of four great texts of the Gospels (Aleph, C, D) is at present (1861) in preparation at Oxford by the Rev. E. H. Hansell. The Greek text of D has been influenced in orthography by the Latin; *e. g.* ἐπτακόσιοι, λέπρωσος, φιλαγγελλίσους (Wetstein, *Prolegg.* ...), but the charge of more serious alterations from this cannot be maintained.

P Q (*Codd. Guelpherbytani*, Wolfenbüttel), two palimpsests, respectively of the 6th and 5th centuries. Published by Knittel, 1762 and P again, more completely, by Tischendorf, *Mon. Sacr. ined.* iii. 1860, who has Q ready for publication.

T (*Cod. Borgianus*: Propaganda at Rome), of the 5th century. The fragments of St. John, edited by Giorgi (1789); those of St. Luke, collated by B. H. Alford (1859). Other fragments were published by Woide. (Tischdf. *N. T. Proleg.* clxvii.).

Υ (*Cod. Barberini*, 225, Rome). Saec. viii Edited by Tischendorf, *Mon. Sacr. ined.* 1846.

Φ (*Cod. Tischendorf*, i., Leipsic). Saec. vii. Edited by Tischendorf, in *Mon. Sacr. ined.* 1846.

(ii.) The Secondary Uncials are in the Gospels:—

E (Basileensis, K. iv. 35, Basle). Collated by Tischendorf, Mueller, Tregelles. Saec. viii.

F (Rheno-trajectinus. Utrecht, formerly Borreali). Coll. by Heringa, Traj. 1843. Saec. ix.

G (Brit. Mus. Harl. 5684). Coll. by Tregelles and Tischendorf. Saec. ix. x.

H (Hamburgensis. Seidelii). Coll. by Tregelles, 1850. Saec. ix.

K (Cod. Cyprius. Paris, Bibl. Imp. 63). Coll. by Tregelles and Tischendorf. Saec. ix.

M (Cod. Campianus. Paris, Bibl. Imp. 48). Coll. by Tregelles, and transcribed by Tischendorf. Saec. x.

S (Vaticanus, 354). Coll. by Birch. Saec. x.

U (Cod. Navianus. Venice). Coll. by Tregelles and Tischendorf. Saec. x.

V (Mosquensis). Coll. by Matthaei. Saec. ix.

Γ (Bodleianus). Saec. ix. Cf. Tischdf., *N. T.* p. clxxiii. Coll. by Tischendorf and Tregelles. Fresh portions of this MS. have lately been taken by Tischendorf to St. Petersburgh.

Δ (Bodleianus). Saec. viii. (?). Cod. Tischendorf iii. (Bodleian). Saec. viii. ix. Coll. by Tischendorf and Tregelles.

Λ (St. Petersburgh). Saec. viii. ix. (?). A new MS. as yet uncollated.

B (i.). Primary Uncials of the Acts and Catholic Epistles.

א, A B C D.

E_a (*Codex Laudianus*, 35), a Graeco-Latin MS. of the Acts, probably brought to England by Theodore of Tarsus, 668, and used by Bede. It was given to the University of Oxford by Archbishop Laud in 1636. Published by Hearne, 1715; but a new edition has been lately undertaken (1861) by Scrivener, and is certainly required. Saec. vi. vii.

(ii.) The Secondary Uncials are—

G_a = L_a (Cod. Angelicus (Passionei) Rome). Coll. by Tischdf. and Treg. Saec. ix.

H_a (*Cod. Mutinensis*, Modena), of the Acts. Coll. by Tischdf. and Treg. Saec. ix.

K_a (Mosquensis), of the Catholic Epistles. Coll. by Matthaei. Saec. ix.

C (i.). Primary Uncials of the Pauline Epistles:

א A B C.

D_a (Codex Claromontanus, *i. e.* from Clermont, near Beauvais, Paris, Bibl. Imp. 107), a Graeco-Latin MS. of the Pauline Epistles, once (like D) in the possession of Beza. It passed to the Royal Library at Paris in 1707, where it has since remained. Wetstein collated it carefully, and, in 1852, it was published by Tischendorf, who had been engaged on it as early as 1840. The MS. was independently examined by Tregelles, who communicated the results of his collation to Tischendorf, and by their combined labours the original text, which has been altered by numerous correctors, has been completely ascertained. The MS. is entire except Rom. i. 1-7. The passages Rom. i. 27-30 (in Latin, i. 24-27) were added at the close of the 6th century, and 1 Cor. xiv. 13-22 by another ancient hand. The MS. is of the middle of the 6th century. Cf Griesbach, *Symb. Crit.* ii. 31-77.

F_a (*Codex Augiensis*. Coll. SS. Trin. Cant. B, 17, 1), a Graeco-Latin MS. of St. Paul's Epistles, bought by Bentley from the Monastery of Reichenau (Augia Major) in 1718, and left to Trin. Coll. by his nephew in 1786. This and the *Cod. Boernerianus* (G_a) were certainly derived from the same Greek original. The Greek of the Ep. to the Hebrews is wanting in both, and they have four common lacunae in the Greek text: 1 Cor. iii. 8-16, vi. 7-14; Col. ii. 1-8; Philem. 21-25. Both likewise have a vacant space between 2 Tim. ii. 4 and 5. The Latin version is complete from the beginning of the MS. Rom. iii. 19, *μα λεγει, dicit*. The MS. has been admirably edited by F. H. Scrivener, Cambr. 1859. It is assigned to the 9th century. The Latin version is of singular interest; it is closer to the best Hieronymian text than that in G_a, especially when the Greek text is wanting (Scrivener, *Cod. Aug.* xxviii.), but has many peculiar readings and many in common with G_a.

G_a (*Codex Boernerianus*. Dresden), a Graeco-Latin MS., which originally formed a part of the same volume with Δ. It was derived from the same Greek original as F_a, which was written continuously, but the Latin version in the two MSS. is widely different.* Δ and G_a seem to have been written by an Irish scribe in Switzerland (St. Gall) in the 9th century. The Greek with the *interlinear* Latin version was carefully edited by Matthaei, 1791. Scrivener has given the variations from F_a in his edition of that MS.

The following fragments are of great value:—

H_a (Codex Coislinianus. Paris, Bibl. Imp. 202), part of a stichometrical MS. of the 6th century, consisting of twelve leaves: two more are at St. Petersburgh. Edited by Montfaucon, *Bibl. Coislin.* 251-61; and again transcribed and prepared for the press by Tischendorf. It was compared, according to the subscription (Tischdf. *N. T.* p. clxxxix.), with the autograph of Pamphilus at Caesarea.

M_a (Hamburg; London), containing Heb. i. 1-iv. 3; xii. 20-end, and 1 Cor. xv. 52-2 Cor. i. 15 2 Cor. x. 13-xii. 5, written in bright red ink in the 10th century. The Hamburg fragments were collated by Tregelles: all were published by Tischendorf, *Anecdot. Sacr. et Prof.* 1855.

(ii.). The Secondary Uncials are:—

K_a, L_a.

E_a (*Cod. Sangermanensis*, St. Petersburgh), a Graeco-Latin MS., of which the Greek text was badly copied from D_a after it had been thrice corrected, and is of no value. The Latin text is of some slight value, but has not been well examined. Griesbach, *Symb. Crit.* ii. 77-85.

* At the end of the lacuna after Philemon 20 G_a adds, ad *Laodicenses incipit epistola* προς Λαοδικεας αρχεται επιστολη; from the form of the Greek name shows almost conclusively that the Greek words are only a translation of the Latin title which the scribe found in his Latin MS., in which as in many others, the apocryphal epistle to the Laodiceans was found.

D (i.). The Primary Uncials of the Apocalypse. ℵ A C.

(ii.). The Secondary Uncial is—

B_2 (*Codex Vaticanus* (Basilianus), 2066). Edited (rather imperfectly) by Tischendorf. *Mon. Sacr.* 1846, and by Mai in his edition of B. Tischendorf gives a collation of the differences, *N. T.* Praef. cxlii-iii.

29. The number of the cursive MSS. (*minuscules*) in existence cannot be accurately calculated. Tischendorf catalogues about 500 of the Gospels, 200 of the Acts and Catholic Epistles, 250 of the Pauline Epistles, and a little less than 100 of the Apocalypse (exclusive of lectionaries); but this enumeration can only be accepted as a rough approximation. Many of the MSS. quoted are only known by old references; still more have been "inspected" most cursorily; few only have been thoroughly collated. In this last work the Rev. F. H. Scrivener (*Collation of about* 30 *MSS. of the Holy Gospels*, Camb. 1853; *Cod. Aug., &c.*, Camb. 1859) has laboured with the greatest success, and removed many common errors as to the character of the later text.[f] Among the MSS. which are well known and of great value the following are the most important:—

A. Primary Cursives of the Gospels.

1 (Act. i.; Paul. i.; *Basileensis*, K. iii. 3). Saec. x. Very valuable in the Gospels. Coll. by Roth and Tregelles.

33 (Act. 13; Paul. 17; Paris, Bibl. Imp. 14). Saec. xi. Coll. by Tregelles.

59 (Coll. Gonv. et Cai. Cambr.). Saec. xii. Coll. by Scrivener, 1860, but as yet unpublished.

69 (Act. 31: Paul. 37; Apoc. 14; *Cod. Leicestrensis*). Saec. xiv. The text of the Gospels is especially valuable. Coll. by Treg. 1852, and by Scriv. 1855, who published his collation in *Cod. Aug. &c.*, 1859.

118 (Bodleian. Miscell. 13; Marsh 24). Saec. xiii. Coll. by Griesbach, *Symb. Crit.* i. ccii. ff.

124 (Caesar. Vindob. Nessel. 188). Saec. xii. Coll. by Treschow, Alter, Birch.

127 (Cod. Vaticanus, 349). Saec. xi. Coll. by Birch.

131 (Act. 70; Paul. 77; Apoc. 66; Cod. Vaticanus, 360). Saec. xi. Formerly belonged to Aldus Manutius, and was probably used by him in his edition. Coll. by Birch.

157 (Cod. Urbino-Vat. 2). Saec. xii. Coll. by Birch.

218 (Act. 65; Paul. 57; Apoc. 33; Caesar-Vindob. 23). Saec. xiii. Coll. by Alter.

238, 259 (Moscow, S. Synod. 42, 45). Saec. xi. Coll. by Matthaei.

262, 300 (Paris, *Bibl. Imp.* 53, 196). Saec. x. xi. Coll. (?) by Scholz.

346 (Milan. *Ambros.* 23). Saec. xii. Coll. (?) by Scholz.

2^{pe} (St. Petersburgh. *Petropol.* vi. 470). Saec. ix. Coll. by Muralt. (Transition cursive.)

c^{oer}, g^{oer} (Lambeth, 1177, 528, Wetstein. 71). Saec. xii. Coll. by Scrivener.

p^{oer} (Brit. Mus. Burney 20). Saec. xiii. Coll. by Scrivener.

w^{oer} (Cambr. Coll. SS. Trin. B. x. 16). Saec. xiv. Coll. by Scrivener.

To these must be added the Evangelistaria (B. M. Burney, 22), marked y^{oer}, collated by Scrivener.[g] (Plate ii. fig. 4.)

The following are valuable, but need careful collation:[h]

13 (Paris, Bibl. Imp. 50). Coll. 1797. Saec. xii. (Cf. Griesbach, *Symb. Crit.* i. cliv.-clvi.).

22 (Paris, Bibl. Imp. 72). Saec. xi.

28 (Paris, Bibl. Imp. 379). Coll. Scholz.

72 (Brit. Mus. Harl. 5647). Saec. xi.

106 (Cod. Winchelsea). Saec. x. Coll. Jackson (used by Wetstein), 1748.

113, 114 (B. M. Harl. 1810, 5540).

126 (Cod. Guelpherbytanus, xvi. 16). Saec. xi.

130 (Cod. Vaticanus, 359). Saec. xiii.

209 (Act. 95; Paul. 138; Apoc. 46; Venet. Bibl. S. Marci 10). Saec. xv. The text of the Gospels is especially valuable.

225 (Vienna, *Bibl. Imp.* Kollar. 9, Forles. 31). Saec. xii.

372, 382 (Rome, Vatican. 1161, 2070). Saec. xv. xiii.

405, 408, 409 (Venice, S. Marci, i. 10, 14, 15). Saec. xi., xii.

B. Primary Cursives of the Acts and Catholic Epistles.

13 = Gosp. 33, Paul. 17.

31 = Gosp. 69 (*Codex Leicestrensis*).

65 = Gosp. 218.

73 (Paul. 80. Vatican. 367). Saec. xi. Coll. by Birch.

95, 96 (Venet. 10, 11). Saec. xiv. xi. Coll. by Rinck.

180 (Argentor. Bibl. Sem. M.). Coll. by Arendt.

l^{oer} = p^{oer} 61 (Tregelles), (Brit. Mus. *Add.* 20,003). Saec. xi. Coll. by Scrivener.

a^{oer} (Lambeth, 1182). Saec. xii. Coll. by Scrivener.

c^{oer} (Lambeth, 1184). Coll. Sanderson ap. Scrivener.

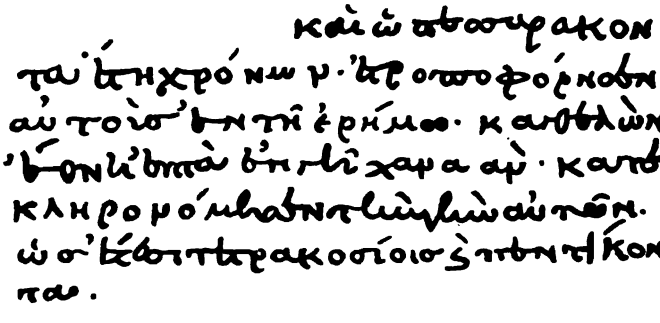
The following are valuable, but require more careful collation.

5 (Paris, *Bibl. Imp.* 106).

25, 27 (Paul. 31, Apoc. 7; Paul. 33. Brit. Mus.

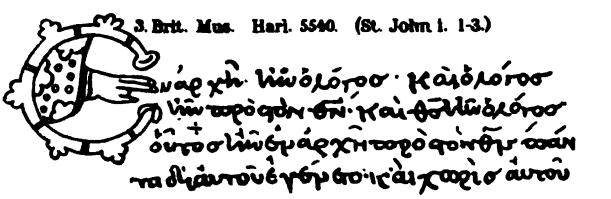
[f] Mr. Scrivener has kindly furnished me with the following summary of his catalogue of N. T. MSS., which is by far the most complete and trustworthy enumeration yet made (*Plain Introduction*, p. 226):—

	Uncial.	Cursive.	Duplicates already deducted.
Gospels	34	601	32
Act. Cath. Epp. . .	10	229	12
Paul	14	283	14
Apoc.	4	102	..
Evangelistaria . . .	58	183	6
Apostolos	7	65	..
Total	127	1463	64

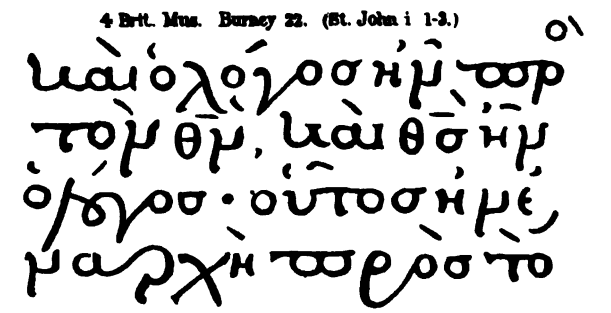


[g] The readings marked 102 (Matt. xxiv.-Mark vii. 1) which were taken by Wetstein from the margin of a printed copy, and said to have been derived from a Nicaean MS., cannot have been derived from any other source than an imperfect collation of B. I have noticed 85 places in which it is quoted in St. Mark, and in every one, except it. 22, it agrees with B. In St. Matthew it is noticed as agreeing with B 70 times, while it differs from it 5 times. These few variations are not difficult of explanation.

[h] It is to be hoped that scholars may combine to accomplish complete collations of the MSS. given in these lists. One or two summer vacations, with proper co-operation, might accomplish the work.



1 Brit. Mus. Harl. 5598. (St. John. i. 1, 2.)



2. Brit. Mus. Add. 20,003 (Acts xiii. 18-20.)

3. Brit. Mus. Harl. 5540. (St. John i. 1-3.)

4 Brit. Mus. Burney 22. (St. John i 1-3.)

Harl. 5537, 5620). Cf. Griesbach, *Symb. Crit.* ii. 164, 185.

29 (Paul. 35, Genev. 20) Saec. xi. xii.

36 (*Coll. Nov.* Oxon).

40 (Paul. 46, Apoc. 12. Alex. Vatican. 179). Saec. xi. Coll. by Zacagni.

66 (Paul. 67).

68 (Paul. 73, Upsal). Saec. xii. xi.

69 (Paul. 74, Apoc. 30, Guelph. xvi. 7). Saec. xiv. xiii.

81 (Barberini, 377). Saec. xi.

137 (Milan, *Ambros.* 97). Saec. xi. Coll. by Scholz.

142 (Mutinensis, 243). Saec. xii.[1]

C. Primary Cursives in the Pauline Epistles.

17 = Gosp. 33.

37 = Gosp. 69 (*Cod. Leicestrensis*).

57 = Gosp. 218.

108, 109 = Act. 95, 96.

115, 116 (Act. 100, 101, Mosqu. Matt. d. f.).

137 (Gosp. 263, Act. 117, Paris, Bibl. Imp. 61).

The following are valuable, but require more careful collation.

5 = Act. 5.

23 (Paris, Coislin. 28). Saec. xi. Descr. by Montfaucon.

31 (Brit. Mus. *Harl.* 5537) = l^{ser}. Apoc. Saec. xiii.

39 (Act. 33. Oxford, Coll. Lincoln. 2).

46 = Act. 40.

47 (Oxford, Bodleian. Roe 16). Saec. xi.

55 (Act. 46. Monacensis).

67 (Act. 66. Vindob. Lambec. 34). The corrections are especially valuable.

70 (Act. 67. Vindob. Lambec. 37).

71 (Vindob. Forlos. 19). Saec. xii.

73 (Act. 88).

80 (Act. 73. Vatican. 367).

177-8-9 (Mutin.).

D. Primary Cursives of the Apocalypse.

7 = l^{ser} (Act. 25. Brit. Mus. *Harl.* 5537) Saec. xi. Coll. by Scrivener.

14 = Gosp. 69 (*Cod. Leicestrensis*).

31 = c^{ser} (Brit. Mus. *Harl.* 5678). Saec. xv. Coll. by Scrivener.

38 (Vatican. 579). Saec. xiii. Coll. by B. H. Alford.

47 (Cod. Dresdensis). Saec. xi. Coll. by Matthaei.

51 (Paris, *Bibl. Imp.*). Coll. by Reiche.

g^{ser}. (Parham, 17). Saec. xi. xii. Coll. by Scrivener.

m^{ser}. (Middlehill) = 87. Saec. xi. xii. Coll. by Scrivener.

The following are valuable, but require more careful collation.

2 (Act. 10. Paul. 12. Paris. Bibl. Imp. 237).

6 (Act. 23. Paul. 28. Bodleian. Barocc. 3). Saec. xii. xiii.

11 (Act. 39. Paul. 45).

12 = Act. 40.

17, 19 (Ev. 35. Act. 14. Paul. 18; Act. 17. Paul. 21. Paris. Coislin. 199, 205).

28 (Bodleian. Barocc. 48).

36 (Vindob. Forlos. 29). Saec. xiv.

41 (Alex-Vatican. 68). Saec. xiv.

46 = Gosp. 209.

82 (Act. 179. Paul. 128. Monac. 211).

30. Having surveyed in outline the history of the transmission of the written text, and the chief characteristics of the MSS.[b] in which it is preserved,

[1] Three other MSS., containing the Catholic Epistles, require notice, not from their intrinsic worth, but from their connexion with the controversy on 1 John v. 7, 8.

34 (Gosp. 61, Coll. 88. Trin. Dublin, *Codex Montfortianus*). Saec. xv. xvi. There is no doubt that this was the *Codex Britannicus*, on the authority of which Erasmus, according to his promise, inserted the interpolated words, ἐν τῷ οὐρανῷ, πατὴρ, λόγος καὶ πνεῦμα ἅγιον καὶ οὗτοι οἱ τ. δ. δ. καὶ τ. δ. οἱ μ. ἐν τ. γ.; but did not omit, on the same authority (which exactly follows the late Latin MSS.), the last clause of ver. 8, καὶ οἱ τρ. —εἰσίν. The page on which the verse stands is the only glossed page in the volume. A collation of the MS. has been published by Dr. Dobbin, London, 1854.

162 (Paul. 200. Vat. Ottob. 298.) Saec. xv. A Graeco-Latin MS. It reads, ἀπὸ τοῦ οὐρανοῦ, πατὴρ, λόγος καὶ πνεῦμα ἅγιον καὶ οἱ τρεῖς εἰς τὸ ἓν εἰσι (Tregelles, *Horne*, p. 217). Scholz says that the MS. contains "innumerable transpositions," but gives no clear account of its character.

173 (Paul. 211. Naples, Bibl. Borbon.) Saec. xi. The interpolated words, with the articles, and the last clause of ver. 8, are given by a second hand (Saec. xvi.).

Codex Ravianus (110 Gosp.) is a mere transcript of the N. T. of the Complutensian Polyglott, with variations from Erasmus and Stephens. Comp. Griesbach, *Symb. Crit.* i. clxxxi.-clxxxii.

[b] The accompanying plates will give a good idea of the different forms of biblical Gk. MSS. For permission to take the tracings, from which the engravings have been admirably made by Mr. Netherclift, my sincere thanks are due to Sir F. Madden, K.H.; and I am also much indebted to the other officers of the MSS. department of the British Museum, for the help which they gave me in making them.

Fl. i. fig. 1. A few lines from the Λόγος ἐναγώνιος of Hyperides (col. 9, l. 4, of the edition of Rev. C. Babington), a papyrus of the first century, or not much later. In Mr. Babington's facsimile the ι *adscript* after νομω is omitted wrongly. It is in fact partly hidden under a fibre of the papyrus, but easily seen from the side. Two characteristic transcriptural errors occur in the passage: τῷ τοιτῳ τρόπῳ for τῷ τοίτου τρόπῳ, and (by itacism, §31) συνελόντας for συνελόντι.

Fig. 2. The opening verses of St. John's Gospel from the *Cod. Alex.* The two first lines are rubricated. The specimen exhibits the common contractions, ΘC, ΑΝΩΝ, and an example of itacism, χωρὶς. The stop at the end of the fifth line, οὐδὲ ἓν, is only visible in a strong light, but certainly exists there, as in C D I, &c.

Fig. 3. A very legible specimen of the Nitrian palimpsest of St. Luke. The Greek letters in the original are less defined, and very variable in tint: the Syriac somewhat heavier than in the engraving, which is on the whole very faithful. The dark lines shew where the vellum was folded to form the new book for the writings of Severus of Antioch. The same MS. contained fragments of the *Iliad*, edited by Dr. Cureton, and a piece of Euclid.

Pl. ii. fig. 1. Part of the first column of the famous Harleian *Evangelistarium*, collated by Scrivener. It is dated A.D. 995 (Scrivener, *Cod. Aug.* p. xlviii.). The letters on this page are all in gold. The initial letter is illuminated with red and blue. The MS. is a magnificent example of a service-book.

Fig. 2. From Tischendorf's valuable MS. of the Acts (81 Tregelles). It was written A.D. 1044 (Scrivener, *Cod. Aug.* lxix.). The specimen contains the itacisms χρεῶν (χρόνον) and πεντήκοντα.

Fig. 3. The beginning of St. John, from Cod. 114 of the Gospels (Griesbach, *Symb. Crit.* i. cxciii.), a MS. of the 13th cent.

Fig. 4. Part of the beginning of St. John, from the very valuable *Evangelistarium* y^{ser}. (Scrivener, *Collation*, &c., pp. lxi. ff.). The initial letter of the Gospel is a rude illumination. The MS. bears a date 1319; but Mr. Scrivener justly doubts whether this is in the hand of the original scribe.

we are in a position to consider the extent and nature of the variations which exist in different copies. It is impossible to estimate the number of these exactly, but they cannot be less than 120,000 in all (Scrivener, *Introduction*, 3), though of these a very large proportion consist of differences of spelling and isolated aberrations of scribes,[1] and of the remainder comparatively few alterations are sufficiently well supported to create reasonable doubt as to the final judgment. Probably there are not more than 1600–2000 places in which the true reading is a matter of uncertainty, even if we include in this questions of order, inflexion and orthography: the doubtful readings by which the sense is in any way affected are very much fewer, and those of dogmatic importance can be easily numbered.

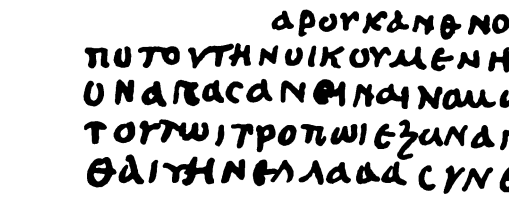
31. Various readings are due to different causes: some arose from accidental, others from intentional alterations of the original text. (i) Accidental variations or *errata*, are by far the most numerous class, and admit of being referred to several obvious sources. (α) Some are errors of *sound*. The most frequent form of this error is called *Itacism*, a confusion of different varieties of the I-sound, by which (οι, υ) η, ι, ει, ε, &c., are constantly interchanged. Other vowel-changes, as of ο and ω, ου and ω, &c., occur, but less frequently. Very few MSS. are wholly free from mistakes of this kind, but some abound in them. As an illustration the following variants occur in F_g in Rom. vi. 1-16: 1 *ἐρεῦμεν*. 2 *ὅτινες, εἵτινες* (*ἥτι*)· 3 *ἀγνοεῖται* (*-τε*). 5 *ἐσομαιθα*. 8 *ἀποθάνομεν*. 9 *ἀποθνήσκει, ἔτει*. 11 *ὑμῖς, λογίζεσθαι*. 13 *παραστήσαται*. 14 *ἔσται* (*-τε*). 15 *ὅτει*. 16 *οἴδαται, ὅτει, παρεισταίνεται* (*παριστάνετε*), *ἔσται, ὑπακούεται*. An instance of fair doubt as to the true nature of the reading occurs in ver. 2, where *ζήσωμεν* may be an error for *ζήσομεν*, or a real variant.[2] Other examples of disputed readings of considerable interest which involve this consideration of Itacism are found, Rom. xii. 2, *συσχηματίζεσθαι -θε*; xvi. 20, *συντρίψει -αι*. James iii. 3, *εἰ δέ* (*ἴδε*). Rom. v. 1, *ἔχωμεν, ἔχομεν* (cf. vi. 15). Luke iii. 12, 14; John xiv. 23; Hebr. vi. 3; James iv. 15 (*ποιήσωμεν -ομεν*). Matt. xxvii. 60, *καινῷ, κενῷ*. John xv. 4, *μείνῃ, μένῃ* (cf. 1 John ii. 27). Matt. xi. 16, *ἑτέροις, ἑταίροις*. Matt. xx. 15 *ἤ, εἰ*. 2 Cor. xii. 1, *δεῖ, δή*. 1 Tim. v. 21, *πρόσκλησιν, πρόσκλισιν*. 1 Pet. ii. 3, *χρηστὸς ὁ κύριος, χριστὸς ὁ κύριος*.

To these may be added such variations as Matt. xxvi. 29, &c. *γένημα, γέννημα*. 2 Pet. ii. 12, *γεγεννημένα, γεγενημένα*. Matt. i. 18; Luke i. 14, *γέννησις, γένεσις*. Matt. xxvii. 35, *βάλλοντες, βαλόντες*. 1 Pet. ii. 1, *φθόνος, φόνος*.

32. (β) Other variations are due to errors of *sight*. These arise commonly from the confusion of similar letters, or from the repetition or omission of the same letters, or from the recurrence of a similar ending in consecutive clauses which often causes one to be passed over when the eye mechanically returns to the copy (*ὁμοιοτέλευτον*). To these may be added the false division of words in transcribing the text from the continuous uncial writing. The uncial letters Θ, Ο, C. Ε. are peculiarly liable to confusion, and examples may easily be quoted to show how their similarity led to mistakes; 1 Tim. iii. 18, ΘC; 2 Cor. ii. 3, ЄΧΩ CΧΩ; Mark iv. 22, ЄΑΝ, ΟЄΑΝ, ΟCΑΝ.

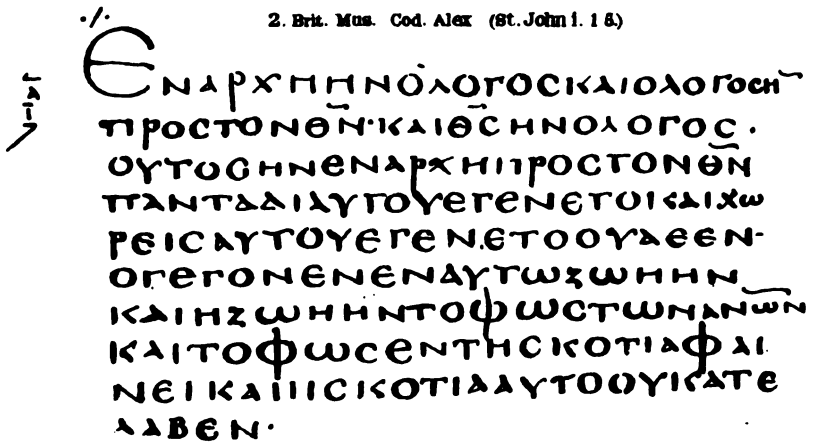
The repetition or omission of similar letters may be noticed in Matt. xxi. 18, ΕΠΑΝΑΓΑΓΩΝ, ΕΠΑΝΑΓΩΝ. Luke x. 27; Rom. xiii. 9; Tit. ii. 7, James i. 27, CЄΑΤΤΟΝ, ЄΑΤΤΟΝ (cf. Tischdf. *ad Rom.* xiii. 9). Luke vii. 21, ΕΧΑΡΙΣΑΤΟ ΒΛΕΠΕΙΝ, ΕΧΑΡΙΣΑΤΟ ΤΟ ΒΛΕΠΕΙΝ. Matt. viii. 17, ΣΤΝΙΕΤΕ, ΣΤΝΙΕΤΕ ΕΤΙ. Luke ii. 36, (ΑΤΤΗ) ΑΤΤΗ Τ. ΩΡΑ. Matt. xi. 23, ΚΑΦΑΡΝΑΟΤΜ ΜΗ, ΚΑΦΑΡΝΑΟΤΜ Η. 1 Thess. ii. 7, ΕΓΕΝΗΘΗΜΕΝ ΝΗΠΙΟΙ, ΕΓΕΝΗΘΗΜΕΝ ΗΠΙΟΙ. Luke ix. 49, ΕΚΒΑΛΛΟΝΤΑ ΔΑΙΜΟΝΙΑ, ΕΚΒΑΛΛΟΝΤΑ ΤΑ ΔΑΙΜ. Mark xv. 35, ΠΡΟCΕΛΘΩΝ, ΠΡΟΕΛΘΩΝ. 2 Cor. iii. 10, ΟΥ ΔΕΔΟΖΑΣΤΑΙ, ΟΥΔΕ ΔΕΔΟΖΑΣΤΑΙ. 1 Pet. iii. 20, ΑΠΑΞ ΕΔΕΧΕΤΟ, ΑΠΕΞΕΔΕΧΕΤΟ. Acts x. 36, ΤΟΝ ΛΟΓΟΝ ΑΠΕΣΤΕΙΛΕ, ΤΟΝ ΛΟΓΟΝ ΟΝ ΑΠΕΣΤΕΙΛΕ. Sometimes this cause of error leads to further change: 2 Cor. iii. 15, ΗΝΙΚΑ ΑΝ ΑΝΑΓΙΝΩΣΚΗΤΑΙ, ΗΝΙΚΑ ΑΝΑΓΙΝΩΣΚΕΤΑΙ.[3] Examples of omission from Homœoteleuton occur in John vii. 7 (in T); 1 John ii. 23, iv. 3; Apoc. xi. 1, 2, xiv. 1; Matt. v. 20 (D). Cf. 1 Cor. xv. 25-27, 54 (F_g, G_g); xv. 15 (Origen). And some have sought to explain on this principle the absence from the best authorities of the disputed clause in Matt. x. 23, and the entire verses, Luke xvii. 36, Matt. xxiii. 14.

Instances of false division are found, Mark xv. 6, *ὅντερ ἠτοῦντο, ὃν παρητοῦντο*. Phil. i. 1, *συνεπισκόποις, σὺν ἐπισκόποις*. Matt. xx. 23, *ἀλλοις, ἀλλ' οἷς*. Gal. i. 9, *προειρήκαμεν, προείρηται μέν*. Acts xvii. 25, *κατὰ πάντα, καὶ τὰ πάντα*. In a more complicated example, *σρα ω* (*συτηρα Ἰησοῦν*) is changed into *σριαν* (*συτηριαν*) in Acts xiii. 23; and the remarkable reading of Lat. authorities in 1 Cor. vi. 20 *et portate* arose from confounding *ἅρα τε* and *ἅρατε*. In some places the true division of the words is still doubtful. 2 Cor. xii. 19, *τάδε πάντα, τὰ δὲ πάντα*. Acts xvii. 26, *προστεταγμένους καιρούς, πρὸς τεταγμένους καιρούς*. In *Cod. Aug.* (F_g) the false divisions of the original scribe have been carefully corrected by a contemporary hand, and the frequency of their occurrence is an instructive illustration of the corruption to which the text was exposed from this source (*e. g.* in Gal. i. there are 15 such corrections, and four mistakes, vers. 13, 16, 18 are left uncorrected). Errors of breathing, though necessarily more rare, are closely connected with these: Matt. ix. 18, *εἷς ἐλθών, εἰσελθών*. John ix. 30, *ἐν τούτῳ, ἓν τοῦτο*. Luke vii. 12; Rom. vii. 10; 1 Cor. vii. 12, *αὕτη, αὐτῇ*. Mark xii. 31, *αὕτη, αὐτῇ*.



There are yet some other various readings which are errors of sight, which do not fall under any of the heads already noticed: *e. g.* 2 Pet. i. 3, *διὰ δόξῃ, διὰ δόξης*. 2 Cor. v. 10, *τὰ διὰ τοῦ σώμα-*

[1] The whole amount is considerably less in number than is found in the copies of other texts, if account be taken of the number of the MSS. existing. Comp. Norton, *Genuineness of the Gospels*, i. p. 191 n.



[2] The readings are taken from Mr. Scrivener's admirable transcript. In the same volume Mr. Scrivener has given valuable summaries of the frequency of the occurrence of the different forms of Itacism in other MSS. which he has collated.

[3] The remarkable reading in Matt. xxvii. 17, Ἰησοῦν Βαραββᾶν, seems to have originated in this way: ΥΜΙΝ ΒΑΡΑΒΒΑΝ being written ΥΜΙΝΙΝ ΒΑΡΑΒΒΑΝ, and hence ΥΜΙΝΙΝ, i. e. ὑμῖν Ἰησοῦν (Tregelles, and see...

3. Brit. Mus. Add. 17, 211. (St. Luke xx. 9, 10.)

3

τοῦ σώματος.[a] Rom. xii. 13, χρείαις, ἀνάγκαις. Hebr. ii. 9, χάριτι, χάριτι (?). And the remarkable substitution of καιρῷ for κυρίῳ in Rom. xii. 11 seems to have been caused by a false rendering of an unusual contraction. The same explanation may also apply to the variants in 1 Cor. ii. 1, μαρτύριον, μυστήριον. 1 Tim. i. 4, οἰκονομίαν, οἰκοδομίαν, οἰκοδομήν.

33. Other variations may be described as errors of *impression* or *memory*. The copyist after reading a sentence from the text before him often failed to reproduce it exactly. He transposed the words, or substituted a synonym for some very common term, or gave a direct personal turn to what was objective before. Variations of order are the most frequent, and very commonly the most puzzling questions of textual criticism. Examples occur in every page, almost in every verse of the N. T. The exchange of synonyms is chiefly confined to a few words of constant use, to variations between simple and compound words, or to changes of tense or number: λέγειν, εἰπεῖν, φάναι, λαλεῖν Matt. xii. 48, xv. 12, xix. 21; Mark xiv. 31; John xiv. 10, &c. ἐγείρω, διεγείρω Matt. i. 24. ἐγερθῆναι, ἀναστῆναι Matt. xvii. 9; Luke ix. 22. ἐλθεῖν, ἀπελθεῖν, ἐξελθεῖν Matt. xiv. 25; Luke xxiii. 33; Acts xvi. 39. Ἰ. Χ., Ἰησοῦς, Χριστός, ὁ κύριος Hebr. iii. 1; 1 Pet. v. 10; Col. iii. 17; Acts xviii. 25, xxi. 13. ὑπό, ἀπό, ἐκ Matt. vii. 4; Mark i. 26, viii. 31; Rom. xiii. 1, &c. δέκα, δέκατος, δίδωμι Luke x. 19; John vii. 19, xii. 49, &c. *sing.* and *plur.* Matt. iii. 8; 1 Pet. ii. 1; Matt. xxiv. 18. The third form of change to a more personal exhortation is seen constantly in the Epistles in the substitution of the pronoun of the first person (ἡμεῖς) for that of the second (ὑμεῖς): 1 Pet. i. 4, 10, 12, &c. To these changes may be added the insertion of pronouns of reference (αὐτός, &c.): Matt. vi. 4, xxv. 17, &c. μαθηταί, μαθηταὶ αὐτοῦ Matt. xxvi. 36, 45, 56; xxvii. 64, &c. πατήρ, πατήρ μου John vi. 65, viii. 28, &c. And it may be doubtful whether the constant insertion of connecting particles καί, δέ, γάρ, οὖν, is not as much due to an unconscious instinct to supply natural links in the narrative or argument, as to an intentional effort to give greater clearness to the text. Sometimes the impression is more purely *mechanical*, as when the copyist repeats a termination incorrectly: Apoc. xi. 9 (C); 1 Thess. v. 4 (?); 2 Pet. iii. 7 (?).[b]

34. (ii.) Of intentional changes some affect the expression, others the substance of the passage. (*a*) The intentional changes in language are partly changes of Hellenistic forms for those in common use, and partly modifications of harsh constructions. These may in many cases have been made unconsciously, just as might be the case if any one now were to transcribe rapidly one of the original MS. pages of Milton; but more commonly the later scribe would correct as mere blunders dialectic peculiarities which were wholly strange to him. Thus the forms τεσσεράκοντα, ἐραννᾶν, ἐκαθερίσθη, λεγίων, &c., ἦλθα, ἔπεσα, &c., and the irregular constructions of ἐάν, ὅταν, are removed almost without exception from all but a few MSS. Imperfect constructions are completed in different ways: Mark vii. 2, *add.* ἐμέμψαντο, or κατέγνωσαν; Rom. i. 32, *add.* οὐκ ἐνόησαν, &c.; 2 Cor. viii. 4, *add.* δέξασθαι; 1 Cor. x. 24, *add.* ἕκαστος. Apparent solecisms are corrected: Matt. v. 28, αὐτῆς for αὐτήν; xv. 32, ἡμέρας for ἡμέραι; Heb. iv. 2, συγκεκερασμένος for -μενους. The Apocalypse has suffered especially from this grammatical revision, owing to the extreme boldness of the rude Hebraizing dialect in which it is written: *e. g.* Apoc. iv. 1, 8, vi. 11, xi. 4, xxi. 14, &c. Variations in the orthography of proper names ought probably to be placed under this head, and in some cases it is perhaps impossible to determine the original form (Ἰσκαριώτης, Ἰσκαριόθ, Σκαριόθ; Ναζαρά, -αθ, -αθ, -αϊτ, -αϊτ).

35. (*β*) The changes introduced into the substance of the text are generally additions, borrowed either from parallel passages or from marginal glosses. The first kind of addition is particularly frequent in the Gospels, where, however, it is often very difficult to determine how far the parallelism of two passages may have been carried in the original text. Instances of unquestionable interpolation occur: Luke iv. 8, xi. 4; Matt. i. 25, v. 44, viii. 13, xxvii. 35 (49); Mark xv. 28; Matt. xix. 17 (compare Acts ix. 5, 6, xxii. 7, xxvi. 14). Similar interpolations occur also in other books: Col. i. 14; 1 Pet. i. 17; Jude 15 (Rom. xvi. 27); Apoc. xx. 2; and this is especially the case in quotations from the LXX., which are constantly brought into exact harmony with the original text: Luke iv. 18, 19, xix. 46; Matt. xii. 44, xv. 8; Heb. ii. 7, xii. 20.

Glosses are of more partial occurrence. Of all Greek MSS. *Cod. Bezae* (D) is the most remarkable for the variety and singularity of the glosses which it contains. Examples of these may be seen: Matt. xx. 28; Luke v. 5, xxii. 26-28; Acts i. 5, xiv. 2. In ten verses of the Acts, taken at random, the following glosses occur: Acts xii. 1, ἐν τῇ Ἰουδαίᾳ; 3, ἡ ἐπιχείρησις ἐπὶ τοὺς πιστούς; 5, πολλὴ δὲ προσευχὴ ἦν ἐν ἐκτενείᾳ περὶ αὐτοῦ; 7, ἐπέστη τῷ Πέτρῳ; 10, κατέβησαν τοὺς ζ' βαθμούς. Some simple explanatory glosses have passed into the common text: Matt. vi. 1, ἐλεημοσύνην for δικαιοσύνην; Mark vii. 5, ἀνίπτοις for κοιναῖς; Matt. v. 11, ψευδόμενοι: comp. John v. 4 (Luke xxii. 43, 44).

36. (*γ*) Many of the glosses which were introduced into the text spring from the ecclesiastical use of the N. T., just as in the Gospels of our own Prayer-Book introductory clauses have been inserted here and there (*e. g.* 3rd and 4th Sundays after Easter: "Jesus said to His disciples"). These additions are commonly notes of person or place: Matt. iv. 12, xii. 25, &c., ὁ Ἰησοῦς inserted; John xiv 1, καὶ εἶπεν τοῖς μαθηταῖς αὐτοῦ; Acts iii. 11, xxviii. 1 (cf. Mill, *Prolegg.* 1055-6). Sometimes an emphatic clause is added: Matt. xiii. 23, xxv. 29; Mark vii. 16; Luke viii. 15, xii. 21, ὁ ἔχων ὦτα κ.τ.λ.; Luke xiv. 24, πολλοὶ γάρ εἰσιν κλητοί κ.τ.λ. But the most remarkable liturgical insertion is the doxology in the Lord's Prayer, Matt. vi. 13; and it is probable that the interpolated verse Acts viii. 37 is due to a similar cause. An instructive example of the growth of such an addition may be seen in the readings of Luke i. 55, as given in the text of the Gospel and in the collections of ecclesiastical hymns.

[a] By a similar change Athanasius (*De Incarn. Verbi*, 5) and others give in Wisd. ii. 23, κατ' εἰκόνα τῆς ἰδίας ἰδιότητος for the reading, τῆς ἰδίας ἰδιότητος.

[b] It was apparently by a similar error (Tregelles, *Horne*, 227) that, in the A. V. of Hebr. x. 23, "the profession of our *faith*" stands for "the profession of our *hope*." The former is found in no document whatever

37. (β) Sometimes, though rarely, various readings noted on the margin are incorporated in the text, though this may be reckoned as the effect of ignorance rather than design. Signal examples of this confusion occur: Matt. xvii. 26, xxvi. 59, 60 (D); Rom. vi. 12. Other instances are found, Matt. v. 19; Rom. xiv. 9; 2 Cor. i. 10; 1 Pet. iii. 8.

38. (γ) The number of readings which seem to have been altered for distinctly dogmatic reasons is extremely small. In spite of the great revolutions in thought, feeling, and practice through which the Christian Church passed in fifteen centuries, the copyists of the N. T. faithfully preserved, according to their ability, the sacred trust committed to them. There is not any trace of intentional revision designed to give support to current opinions (Matt. xvii. 21; Mark ix. 29; 1 Cor. vii. 5, need scarcely be noticed). The utmost that can be urged is that internal considerations may have decided the choice of readings: Acts xvi. 7, xx. 28; Rom. v. 14; 1 Cor. xv. 51; 2 Cor. v. 7; 1 Tim. iii. 16; 1 John v. 7, in Latin copies; (Rom. viii. 11). And in some cases a feeling of reverence may have led to a change in expression, or to the introduction of a modifying clause: Luke ii. 33, Ἰωσὴφ for ὁ πατὴρ αὐτοῦ; ii. 43, Ἰωσὴφ καὶ ἡ μήτηρ αὐτοῦ for οἱ γονεῖς αὐτοῦ; John vii. 39, οὔπω γὰρ ἦν πνεῦμα δεδομένον; Acts xix. 2 (D); Gal. ii. 5; Mark xiii. 32, *om.* οὐδὲ ὁ υἱός (cf. Matt. xxiv. 36); Matt. v. 22, *add.* εἰκῇ; 1 Cor. xi. 29, *add.* ἀναξίως (Luke xxii. 43, 44, *om.*).

But the general effect of these variations is scarcely appreciable; nor are the corrections of assumed historical and geographical errors much more numerous: Matt. i. 11, viii. 28, Γεργεσηνῶν; xxiii. 35, *om.* υἱοῦ Βαραχίου; xxvii. 9, *om.* Ἱερεμίου, or Ζαχαρίου; Mark i. 2, ἐν τοῖς προφήταις for ἐν Ἡσ. τῷ πρ.; ii. 28, *om.* ἐπὶ Ἀβ. ἀρχιερέως; John i. 28, Βηθαβαρᾷ; v. 2, ἦν δέ for ἔστι δέ; vii. 8, οὔπω for οὐκ (?); viii. 57, τεσσεράκοντα for πεντήκοντα; xix. 14, ὥρα ἦν ὡς τρίτη for ἕκτη; Acts xiii. 33, τῷ δευτέρῳ for τῷ πρώτῳ.

39. It will be obvious from an examination of the instances quoted that the great mass of various readings are simply variations in form. There are, however, one or two greater variations of a different character. The most important of these are John vii. 53–viii. 12; Mark xvi. 9–end; Rom. xvi. 25–27. The first stands quite by itself; and there seems to be little doubt that it contains an authentic narrative, but not by the hand of St. John. The two others, taken in connexion with the last chapter of St. John's Gospel, suggest the possibility that the apostolic writings may have undergone in some cases authoritative revision: a supposition which does not in any way affect their canonical claims: but it would be impossible to enter upon the details of such a question here.

40. Manuscripts, it must be remembered, are but one of the three sources of textual criticism. The versions and patristic quotations are scarcely less important in doubtful cases.[1] But the texts of the versions and the Fathers were themselves liable to corruption, and careful revision is necessary before they can be used with confidence. These considerations will sufficiently show how intricate a problem it is to determine the text of the N. T., where "there is a mystery in the very order of the words," and what a vast amount of materials the critic must have at his command before he can offer a satisfactory solution. It remains to inquire next whether the first editors of the printed text had such materials, or were competent to make use of them.

II. The History of the Printed Text.

1. The history of the printed text of the N. T. may be divided into three periods. The first of these extends from the labours of the Complutensian editors to those of Mill: the second from Mill to Scholz: the third from Lachmann to the present time. The criticism of the first period was necessarily tentative and partial: the materials available for the construction of the text were few, and imperfectly known: the relative value of various witnesses was as yet undetermined; and however highly we may rate the scholarship of Erasmus or Beza, this could not supersede the teaching of long experience in the sacred writings any more than in the writings of classical authors. The second period marks a great progress: the evidence of MSS., of versions, of Fathers, was collected with the greatest diligence and success: authorities were compared and classified: principles of observation and judgment were laid down. But the influence of the former period still lingered. The old "received" text was supposed to have some prescriptive right in virtue of its prior publication, and not on the ground of its merits: this was assumed as the copy which was to be corrected only so far as was absolutely necessary. The third period was introduced by the declaration of a new and sounder law. It was laid down that no right of possession could be pleaded against evidence. The "received" text, as such, was allowed no weight whatever. Its authority, on this view, must depend solely on its critical worth. From first to last, in minute details of order and orthography, as well as in graver questions of substantial alteration, the text must be formed by a free and unfettered judgment. Variety of opinions may exist as to the true method and range of inquiry, as to the relative importance of different forms of testimony: all that is claimed is to rest the letter of the N. T. completely and avowedly on a critical and not on a conventional basis. This principle, which seems, indeed, to be an axiom, can only be called in question by supposing that in the first instance the printed text of the N. T. was guarded

[1] The history and characteristics of the Versions are discussed elsewhere. It may be useful to add a short table of the Fathers whose works are of the greatest importance for the history of the text. Those of the first rank are marked by capitals; the Latin Fathers by *italics*.

from the errors and imperfections which attended the early editions of every classical text; and next that the laws of evidence which hold good everywhere else fail in the very case where they might be expected to find their noblest and most fruitful application—suppositions which are refuted by the whole history of the Bible. Each of these periods will now require to be noticed more in detail.

(i) *From the Complutensian Polyglott to Mill.*

2. *The Complutensian Polyglott.*—The Latin Vulgate and the Hebrew text of the O. T. had been published some time before any part of the original Greek of the N. T. The Hebrew text was called for by numerous and wealthy Jewish congregations (Soncino, 1482-88), the Vulgate satisfied ecclesiastical wants; and the few Greek scholars who lived at the close of the 15th century were hardly likely to hasten the printing of the Greek Testament. Yet the critical study of the Greek text had not been wholly neglected. Laurentius Valla, who was second to none of the scholars of his age (comp. Russell's *Life of Bp. Andrewes*, pp. 282-310, quoted by Scrivener), quotes in one place (Matt. xxvii. 12) three, and in another (John vii. 29), seven Greek MSS. in his commentaries on the N. T., which were published in 1505, nearly half a century after his death (Michaelis, *Introd.* ed. Marsh, ii. 339, 340). J. Faber (1512) made use of five Greek MSS. of St. Paul's Epistles (Michaelis, p. 420). Meanwhile the Greek Psalter had been published several times (first at Milan, 1481?), and the Hymns of Zacharias and the Virgin (Luke i. 42-56, 68-80) were appended to a Venetian edition of 1486, as frequently happens in MS. Psalters. This was the first part of the N. T. which was printed in Greek. Eighteen years afterwards (1504), the first six chapters of St. John's Gospel were added to an edition of the poems of Gregory of Nazianzus, published by Aldus (Guericke, *Einl.* §41). But the glory of printing the first Greek Testament is due to the princely Cardinal XIMENES. This great prelate as early as 1502 engaged the services of a number of scholars to superintend an edition of the whole Bible in the original Hebrew and Greek, with the addition of the Chaldee Targum of Onkelos, the LXX. version, and the Vulgate. The work was executed at Alcala (Complutum), where he had founded a university. The volume containing the N. T. was printed first, and was completed on Jan. 10, 1514. The whole work was not finished till July 10, 1517, about four months before the death of the Cardinal. Various obstacles still delayed its publication, and it was not generally circulated till 1522, though Leo X. (to whom it was dedicated) authorized the publication March 22, 1520 (Tregelles, *Hist. of Printed Text of N. T.*; Mill, *Prolegg.*).

The most celebrated men who were engaged on the N. T., which forms the fifth volume of the entire work, were Lebrixa (Nebrissensis) and Stunica. Considerable discussion has been raised as to the MSS. which they used. The editors describe these generally as "copies of the greatest accuracy and antiquity," sent from the Papal Library at Rome; and in the dedication to Leo acknowledgment is made of his generosity in sending MSS. of both "the Old and N. T."[p] Very little time, however, could have been given to the examination of the Roman MSS. of the N. T., as somewhat less than eleven months elapsed between the election of Leo and the completion of the Complutensian Testament; and it is remarkable that while an entry is preserved in the Vatican of the loan and return of two MSS. of parts of the LXX. there is no trace of the transmission of any N. T. MS. to Alcala (Tischdf. *N. T.* 1859, p. lxxxii. n.). The whole question, however, is now rather of bibliographical than of critical interest. There can be no doubt that the copies, from whatever source they came, were of late date, and of the common type.[q] The preference which the editors avow for the Vulgate, placing it in the centre column in the O. T. "between the Synagogue and the Eastern Church, tanquam duos hinc et inde latrones," to quote the well-known and startling words of the Preface "medium autem Jesum, hoc est, Romanam sive Latinam ecclesiam" (vol. i. p. iii. b.), has subjected them to the charge of altering the Greek text to suit the Vulgate. But except in the famous interpolation and omission in 1 John v. 7, 8, and some points of orthography (Βεελζεβούβ, Βελίαλ, Tischdf. p. lxxxiii.) the charge is unfounded (Marsh, on Michaelis ii. p. 851, gives the literature of the controversy). The impression was limited to six hundred copies, and as, owing to the delays which occurred between the printing and publication of the book, its appearance was forestalled by that of the edition of Erasmus, the Complutensian N. T. exercised comparatively small influence on later texts, except in the Apocalypse (comp. §3). The chief editions which follow it in the main, are those of (Plantin, Antwerp, 1564-1612; Geneva, 1609-1632; Mainz, 1753 (Reuss, *Gesch. d. N. T.* §401; Le Long, *Biblioth. Sacra*, ed. Masch, i. 191-195); Mill regretted that it was not accepted as the standard text (*Proleg.* 1115); and has given a long list of passages in which it offers, in his opinion, better readings than the Stephanic or Elzevirian texts (*Proleg.* 1098-1114).

3. *The editions of Erasmus.*—The history of the edition of ERASMUS, which was the first *published* edition of the N. T., is happily free from all obscurity. Erasmus had paid consider-

[p] "Testari possumus, Pater sanctissime [*i. e.* Leo X.], maximum laboris nostri partem in eo praecipue versatam fuisse ut castigatissima omni ex parte vetustissimaque exemplaria pro archetypis haberemus, quorum quidem tam Hebraeorum quam Graecorum ac Latinorum multiplicem copiam variis ex locis non sine summo labore conquisivimus. Atque ex ipsis quidem Graeca Sanctitati tuae debemus: qui ex ista Apostolica Bibliotheca antiquissimos tum Veteris tum Novi Testamenti codices perquam humane ad nos misisti; qui nobis in hoc negocio maxime fuerunt adjumento" (*Prol.* iii. *a*). And again, i. *v. Praef.*: "Illud lectorem non lateat, non quaevis exemplaria impressioni huic archetypa fuisse, sed antiquissima emendatissimaque ac tantae praeterea vetustatis. Ne eis abrogare nefas videatur (πρὸς δυσκόλων καὶ βαβήλων, *sic*) quae sanctissimus in Christo pater Leo X. pontifex maximus huic instituto favere cupiens ex Apostolica Bibliotheca educta misit."

[q] One MS. is specially appealed to by Stunica in his controversy with Erasmus, the *Cod. Rhodiensis*, but nothing is known of it which can lead to its identification. The famous story of the destruction of MSS. by the fire-work maker, as useless parchments, has been fully and clearly refuted. All the MSS. of Ximenes which were used for the Polyglott are now at Madrid, but there is no MS. of any part of the Gk. Test. among them (Tregelles, *Hist. of Printed Text*, pp. 12-18). The edition has many readings in common with the Laudian MS. numbered 51 Gosp., 32 Acts, 38 Paul (Mill, *Prolog.* 1080, 1436-38). Many of the peculiar readings are collected by Hill (*Prolog.* 1063-1096).

able attention to the study of the N. T. when he received an application from Froben, a printer of Basle with whom he was acquainted, to prepare a Greek text for the press. Froben was anxious to anticipate the publication of the Complutensian edition, and the haste with which the work of Erasmus was completed, shows that little consideration was paid to the exigences of textual criticism. The request was made on April 17, 1515, while Erasmus was in England. The details of the printing were not settled in September in the same year, and the whole work was finished in February 1516 Tregelles, *Hist. of Printed Text*, 19, 20). The work, as Erasmus afterwards confessed, was done in reckless haste ("praecipitatum verius quam editum." Comp. *Epp.* v. 26; xii. 19), and that too in the midst of other heavy literary labours (*Ep.* i. 7. Comp. Wetstein, *Prolegg.* p. 166-7).[t] The MSS. which formed the basis of his edition are still, with one exception, preserved at Basle; and two which he used for the press contain the corrections of Erasmus and the printer's marks (Michaelis, ii. 220, 221). The one is a MS. of the Gospels of the 16th century of the ordinary late type (marked 2 Gosp. in the catalogues of MSS. since Wetstein); the other a MS. of the Acts and the Epistles (2 Acts. Epp.), somewhat older but of the same general character.[u] Erasmus also made some use of two other Basle MSS. (1 Gosp.; 4 Acts. Epp.); the former of these is of great value, but the important variations from the common text which it offers, made him suspect that it had been altered from the Latin.[v] For the Apocalypse he had only an imperfect MS. which belonged to Reuchlin. The last six verses were wanting, and these he translated from the Latin,[x] a process which he adopted in other places where it was less excusable. The received text contains two memorable instances of this bold interpolation. The one is Acts viii. 37, which Erasmus, as he says, found written in the margin of a Greek MS., though it was wanting in that which he used: the other is Acts ix. 5, 6, *σκληρόν σοι —ἀνάστηθι* for *ἀλλὰ ἀνάστηθι*, which has been found as yet in no Greek MS. whatsoever, though it is still perpetuated on the ground of Erasmus' conjecture. But he did not insert the testimony of the heavenly witnesses (1 John v. 7), an act of critical faithfulness which exposed him to the attacks of enemies. Among these was Stunica—his rival editor—and when argument failed to silence calumny, he promised to insert the words in question on the authority of any one Greek MS. The edition of Erasmus, like the Complutensian, was dedicated to Leo X.; and it is a noble trait of the generosity of Cardinal Ximenes, that when Stunica wished to disparage the work of Erasmus which robbed him of his well-earned honour, he checked him in the words of Moses. "I would that all might thus prophesy." Num. xi. 29 (Tregelles, p. 19). After his first edition was published Erasmus continued his labours on the N. T. *Ep.* iii. 31; and in March, 1519, a second edition appeared which was altered in about 400 places, of which Mill reckons that 330 were improvements (*Prolegg.* §1134). But his chief labour seems to have been spent upon the Latin version, and in exposing the "solecisms" of the common Vulgate, the value of which he completely misunderstood (comp. Mill, *Prolegg.* 1124-1133). These two editions consisted of 3300 copies, and a third edition was required in 1522, when the Complutensian Polyglott also came into circulation. In this edition 1 John v. 7 was inserted for the first time, according to the promise of Erasmus on the authority of the "Codex Britannicus" (i.e. Cod. Montfortianus), in a form which obviously betrays its origin as a clumsy translation from the Vulgate ("ne cui foret causa calumniandi." *Apol. ad Stunicam*, ad loc.).[z] The text was altered in about 118 places (Mill, *Prolegg.* 1128). Of these corrections 36 were borrowed from an edition published at Venice in the office of ALDUS, 1518, which was taken in the main from the first edition of Erasmus, even so as to preserve errors of the press, but yet differed from it in about 330 places, partly from error and partly on MS. authority (Mill, §1122). This edition is further remarkable as giving a few (19) various readings. Three other early editions give a text formed from the second edition of Erasmus and the Aldine, that of Hagenau, 1521, of Cephalaeus at Strasburg, 1524, of Bebelius at Basle, 1531. Erasmus at length

[t] A marvellous proof of haste occurs on the title-page, in which he quotes "Vulgarius" among the chief fathers whose authority he followed. The name was formed from the title of the see of Theophylact (Bulgaria), and Theophylact was converted into an epithet. This "Vulgarius" is quoted on Luke xi. 35, and the name remained unchanged in subsequent editions (Wetstein, *Proleg.* 169).

[u] According to Mill (*Proleg.* 1120), Erasmus altered the text in a little more than fifty places in the Acts, and in about two hundred places in the Epistles, of which changes all but about forty were improvements. Specimens of the corrections on the margin of the MS. are given by Wetstein (*Proleg.* p. 56, ed. Lotze). Of these several were simply on the authority of the Vulgate, one of which (Matt. ii. 11, *εἶδον* for *εἶδον*) has retained its place in the received text.

[v] The reading in the received text, Mark vi. 15, *ἢ ὡς εἷς τῶν προφητῶν*, in place of *ὡς εἷς τῶν προφητῶν*, is a change introduced by Erasmus on the authority of this MS., which has been supported by some slight additional evidence since. Mill (*Prolog.* §§1117, 18) states that Erasmus used the uncial Basle MS. of the Gospels (E), "correcting it rightly in about sixty-eight places, wrongly in about fifty-seven." This opinion has been refuted by Wetstein (*Proleg.* p. 50). The MS. was not then at Basle. "Hicce codex Basileensi Academiae dono datus est anno 1559 (Lotze ad Wetst. *l. c.*)

[x] Traces of this unauthorised retranslation remain in the received text: Apoc. xxii. 16, *ἐφραυσέ*. 17. *ἀλλὰ καὶ ἀλθέτω*; *λαμβανέτω τό*. 18. *συμμαρτυροῦμαι γαρ. ἐπιθῇ πρὸς ταῦτα*. 19. *ἀφαιρῇ βίβλου, ἀπὸ βίβλων τ.* Some of these are obvious blunders in rendering from the Latin, and yet they are consecrated by use.

[y] Luther's German version was made from this text (Reuss, *Gesch. d. H. S.* §400). One conjecture of Erasmus 1 Pet. iii. 20, *ἅπαξ ἐξεδέχετο*, supported by no MS., passed from this edition into the received text.

[z] In the course of the controversy on this passage the *Cod. Vatic.* B was appealed to (1521). Some years later (1534) Sepulveda describes the MS. in a letter to Erasmus, giving a general description of its agreement with the Vulgate, and a selection of various readings. In reply to this Erasmus appeals to a supposed *fœdus cum Graecis* made at the Council of Florence, 1439, in accordance with which Greek copies were to be altered to agree with the Latin; and argues that B may have been so altered. When Sepulveda answers that no such compact was made Erasmus replies that he had heard from Cuthbert Tonstall of Durham that it was agreed that the Greek MSS. should be corrected to harmonise with the Latin, and took the agreement for granted. Yet on this simple misunderstanding the credit of the oldest MSS. has been impugned. The influence of the idea in "*fœdus cum Graecis*" has survived all belief in the fact (Tregelles, *Horne*, iv. pp. xv.-xvii.

obtained a copy of the Complutensian text, and in his fourth edition in 1527, gave some various readings from it in addition to those which he had already noted, and used it to correct his own text in the Apocalypse in 90 places, while elsewhere he introduced only 16 changes (Mill, §1141). His fifth and last edition (1535) differs only in 4 places from the fourth, and the fourth edition afterwards became the basis of the received text. This, it will be seen, rested on scanty and late Greek evidence, without the help of any versions except the Latin, which was itself so deformed in common copies, as not to show its true character and weight.

4. *The editions of Stephens.*—The scene of our history now changes from Basle to Paris. In 1543, Simon de Colines (COLINAEUS) published a Greek text of the N. T., corrected in about 150 places on fresh MS. authority. He was charged by Beza with making changes by conjecture; but of the ten examples quoted by Mill, all but one (Matt. viii. 33, ἅπαντα for πάντα) are supported by MSS., and four by the Parisian MS. *Reg.* 85 (119 Gospp.).[a] The edition of Colinaeus does not appear to have obtained any wide influence. Not long after it appeared, R. Estienne (STEPHANUS) published his first edition (1546), which was based on a collation of MSS. in the Royal Library with the Complutensian text.[b] He gives no detailed description of the MSS. which he used, and their character can only be discovered by the quotation of their readings, which is given in the third edition. According to Mill, the text differs from the Complutensian in 581 places, and in 198 of these it follows the last edition of Erasmus. The former printed texts are abandoned in only 37 places in favour of the MSS., and the Erasmian reading is often preferred to that supported by all the other Greek authorities with which Stephens is known to have been acquainted: *e. g.* Matt. vi. 18, viii. 5, ix. 5, &c.[c] A second edition very closely resembling the first both in form and text, having the same preface and the same number of pages and lines, was published in 1549; but the great edition of Stephens is that known as the *Regia*, published in 1550.[d] In this a systematic collection of various readings, amounting, it is said, to 2194 (Mill, §1227), is given for the first time; but still no consistent critical use was made of them. Of the authorities which he quoted most have been since identified. They were the Complutensian text, 10 MSS. of the Gospels, 8 of the Acts, 7 of the Catholic Epistles, 8 of the Pauline Epistles, 2 of the Apocalypse, in all 15 distinct MSS. One of these was the *Codex Bezae* (D). Two have not yet been recognised (comp. Griesbach, N. T. ff. xxiv.–xxvi.). The collations were made by his son Henry Stephens; but they fail entirely to satisfy the requirements of exact criticism. The various readings of D alone in the Gospels and Acts are more than the whole number given by Stephens; or, to take another example, while only 598 variants of the Complutensian are given, Mill calculates that 700 are omitted (*Prolegg.* §1226). Nor was the use made of the materials more satisfactory than their quality. Less than thirty changes were made on MS. authority (Mill, 1228); and except in the Apocalypse, which follows the Complutensian text most closely, "it hardly ever deserts the last edition of Erasmus" (Tregelles). Numerous instances occur in which Stephens deserts his former text and *all his MSS.* to restore an Erasmian reading. Mill quotes the following examples among others, which are the most interesting, because they have passed from the Stephanic text into our A. V. Matt. ii. 11, εὗρον for εἶδον (without the authority of any Greek MS., as far as I know, though Scholz says "*cum codd. multis*"), iii. 8, καρποὺς ἀξίους for καρπὸν ἄξιον. Mark vi. 33 *add.* οἱ ὄχλοι: xvi. 8 *add.* ταχύ. Luke vii. 31 *add.* εἶπε δὲ ὁ κύριος. John xiv. 30 *add.* τοῦτον. Acts v. 23 *add.* ἔξω. Rom. ii. 5 *om.* καὶ before δικαιοκρισίας. James v. 9, κατακριθῆτε for κριθῆτε. Prescription as yet occupied the place of evidence; and it was well that the work of the textual critic was reserved for a time when he could command trustworthy and complete collations. Stephens published a fourth edition in 1537 (Geneva), which is only remarkable as giving for the first time the present division into verses.

5. *The editions of Beza and Elzevir.*—Nothing can illustrate more clearly the deficiency among scholars of the first elements of the textual criticism of the N. T. than the annotations of BEZA (1556). This great divine obtained from H. Stephens a copy of the N. T. in which he had noted down various readings from about twenty-five MSS. and from the early editions (Cf. Marsh, on Michaelis, ii. 858-60), but he used the collection rather for exegetical than for critical purposes. Thus he pronounced in favour of the obvious interpolations in Matt. i. 11; John xviii. 13, which have consequently obtained a place in the margin of the A. V., and elsewhere maintained readings which, on critical grounds, are wholly indefensible: Matt ii. 17; Mark iii. 16, xvi. 2. The interpolation in Apoc. xi. 11, καὶ ὁ ἄγγελος ἐστήκει has passed

[a] An examination of the readings quoted from Colinaeus by Mill shows conclusively that he used Cod. 119 of the Gospels, 10 of the Pauline Epistles (8 of the Acts, the MS. marked αά by Stephens), and probably 33 of the Gospels and 5 of the Catholic Epistles. The readings in 1 Cor. xiv. 2, 1 Pet. v. 2, 2 Pet. iii. 17, seem to be mere errors, and are apparently supported by no authority.

[b] This edition and its counterpart (1549) are known as the "*O mirificum*" edition, from the opening words of the preface: "O mirificam regis nostri optimi et praestantissimi principis liberalitatem," in allusion to the new fount of small Greek type which the king had ordered to be cut, and which was now used for the first time.

[c] The Complutensian influence on these editions has been over-estimated. In the last verses of the Apocalypse (§3) they follow what Erasmus supplied, and not any Greek authority" (Tregelles).

[d] Stephens' own description of his edition cannot be received literally. "Codices nacti aliquot ipsa vetustate graecissimos, quorum copiam nobis bibliotheca regia facile suppeditabit, ex iis ita hunc nostrum recensuimus, *ut nullam omnino litterarum secus esse pateremur, quam plures iique meliores libri, tanquam testes, comprobarent.* Adjuti praeterea sumus cum aliis (*i. e.* Erasmi) tum vero Complutensi editione, quam ad vetustissimos bibliothecae Leonis X. Pont. codices excudi jusserat Hispan. Card. Fr. Simenius: quos cum nostris miro consensu saepissime convenire ex ipsa collatione deprehendimus" (Pref. edit. 1546-9). In the preface to the third edition, he says that he used the same 16 copies for these editions as for that.

[e] "Novum Jesu Christi D. N. Testamentum. Ex Bibliotheca Regia. Lutetiae. Ex officinâ Roberti Stephani typographi regii, regiis typis. MDL." In this edition Stephens simply says of his "16 copies," that the first is the Complutensian edition, the second (*Codex Bezae*) "a most ancient copy, collated by friends in Italy; 3-8, 10, 15, copies from the Royal Library; "caetera sunt ea quae undique corrogare licuit" (Pref.).

into the text of the A. V. The Greek text of Beza (dedicated to Queen Elizabeth) was printed by H. Stephens in 1565, and again in 1576; but his chief edition was the third, printed in 1582, which contained readings from the *Codices Bezae and Claromontanus*. The reading followed by the text of A. V. in Rom. vii. 6 (ἀποθανόντας for ἀποθανόντες), which is supported by no Greek MS. or version whatever, is due to this edition. Other editions by Beza appeared in 1588-9, 1598, and his (third) text found a wide currency.* Among other editions which were wholly or in part based upon it, those of the ELZEVIRS alone require to be noticed. The first of these editions, famous for the beauty of their execution, was published at Leyden in 1624. It is not known who acted as editor, but the text is mainly that of the third edition of Stephens. Including every minute variation in orthography, it differs from this in 278 places (Scrivener, *N. T.* Cambr. 1860, p. vi.). In these cases it generally agrees with Beza, more rarely it differs from both, either by typographical errors (Matt. vi. 34, xv. 27; Luke x. 6 *add.* δ, xi. 12, xiii. 19; John iii. 6) or perhaps by manuscript authority (Matt. xxiv. 9, *om.* τῶν; Luke vii. 12, viii. 29; John xii. 17, ὅτι). In the second edition (Leyden, 1633) it was announced that the text was that which was universally received (*textum ergo habes nunc ab omnibus receptum*), and the declaration thus boldly made was practically fulfilled. From this time the Elzevirian text was generally reprinted on the continent, and that of the third edition of Stephens in England, till quite recent times. Yet it has been shown that these texts were substantially formed on late MS. authority, without the help of any complete collations or of any readings (except of D) of a first class MS., without a good text of the Vulgate, and without the assistance of oriental versions. Nothing short of a miracle could have produced a critically pure text from such materials and those treated without any definite system. Yet, to use Bentley's words, which are not too strong, "the text stood as if an apostle were R. Stephens' compositor." Habit hallowed what was commonly used, and the course of textual polemics contributed not a little to preserve without change the common field on which controversialists were prepared to engage.

ii. *From Mill to Scholz.*—6. The second period of the history of the printed text may be treated with less detail. It was influenced, more or less, throughout by the *textus receptus*, though the authority of this provisional text was gradually shaken by the increase of critical materials and the bold enunciation of principles of revision. The first important collection of various readings—for that of Stephens was too imperfect to deserve the name—was given by WALTON in the 6th volume of his Polyglott. The Syriac, Arabic, Aethiopic, and Persian versions of the N. T., together with the readings of *Cod. Alex.*, were printed in the 5th volume together with the text of Stephens. To these were added in the 6th the readings collected by Stephens, others from an edition by Wechel at Frankfort (1597), the readings of the *Codices Bezae* and *Claromont.*, and of fourteen other MSS. which had been collated under the care of Archbp. Ussher. Some of these collations were extremely imperfect (Scrivener, *Cod. Aug.* p. lxvii.; *Introduction*, p. 148), as appears from later examination, yet it is not easy to overrate the importance of the exhibition of the testimony of the oriental versions side by side with the current Greek text. A few more MS. readings were given by CURCELLAEUS (de Courcelles) in an edition published at Amsterdam, 1658, &c., but the great names of this period continue to be those of Englishmen. The readings of the Coptic and Gothic versions were first given in the edition of (Bp. Fell) Oxford, 1675; ed. Gregory, 1703; but the greatest service which Fell rendered to the criticism of the N.T. was the liberal encouragement which he gave to Mill. The work of MILL (cf. Oxon. 1707; Amstelod. ed. Kuster, 1710; other copies have on the title-page 1723, 1746, &c.) marks an epoch in the history

* The edition of Beza of 1589 and the third of Stephens may be regarded as giving the fundamental Greek text of the A. V. In the following passages in the Gospels the A. V. differs from Stephens, and agrees with Beza:—

Matt. ix. 33, *om.* ὅτι. Yet this particle might be omitted in translation.
" xxi. 7, ἐπεκάθισαν for ἐπεκάθισεν.
" xxiii. 13, 14, transposed in Steph.
Mark vi. 29, *om.* τῷ.
" viii. 24, ὡς δένδρα for ὅτι ὡς δένδρα.
" ix. 40, ἡμῶν for ὑμῶν, "against most MSS." as Beza remarks.
Luke i. 35, *add* ἐκ (not in 1ª ed.).
" ii. 22, αὐτῆς for αὐτῶν.
" x. 22, *om.* καὶ στραφεὶς — εἶπεν. Yet given in marg., and noticed by Beza.
" xv. 26, *om.* αὐτοῦ.
" xvii. 36, *add* verse. The omission noticed in marg. and by Beza.
" xx. 31, *add* καὶ. So Beza 1ª ed., but not 3ª (by error?)
John xiii. 30, ὅτε οὖν ἐξῆλθε. "Against all the old MSS." (Beza).
" xviii. 24, *add* οὖν.

In others it agrees with Stephens against Beza:—

Matt. i. 23. καλέσουσι for καλέσεις. The marg. may be intended to give the other reading.
" xx. 15, εἰ for ἤ.
Mark xvi. 20, *add* Ἀμήν at the end.
John iv. 5, Συχάρ for Σιχάρ.
John xviii. 20, πάντοτε for πάντοθεν. "So in the old MSS." (Beza).

In other parts of the N. T. I have noticed the following passages in which the A. V. agrees with the text of Beza's edition of 1589 against Stephens (Acts xvii. 26, xxi. 8 xxii. 25, xxiv. 13, 18; Rom. vii. 6 (note), viii. 11 (note), xii. 11, xvi. 20; 1 Cor. v. 11, xv. 31; 2 Cor. iii. 1, vi. 15, vii. 12, 16, xi. 10; Col. i. 1, 24, ii. 16; 1 Thess. ii. 13; 2 Thess. ii. 4; Tit. ii. 10; Hebr. ix. 2 (note); James ii. 19 (note), iv. 13, 15, v. 12; 1 Pet. i. 4 (note); 2 Pet. iii. 7; 1 John i. 4, ii. 23 (in italics), iii. 16; 2 John 3; 3 John 7; Jude 24; Apoc. iii. 1, v. 11, vii. 2, 16, 14, viii. 11, xi. 1, 2, xiii. 3, xiv. 18, xvi. 14, xvii. 4. On the other hand the A. V. agrees with Stephens against Beza, Acts iv. 32 xvi. 17, xxv. 6 (note), xxvi. 8; Rom. v. 17; 1 Cor. iii. 1, vii. 29, xi. 22, x. 38 (error of press?); 2 Cor. iii. 14; Gal. iv. 17 (note); Phil. i. 23; Tit. ii. 7; Hebr. x. 2; 1 Pet. ii. 21, iii. 21; 2 Pet. ii. 12; Apoc. iv. 10, ix. 2 xii. 14, xiv. 2, xviii. 6, xix. 1. The enumeration given by Scrivener (*A Supplement to the Authorised Version*, pp. 7, 8) differs slightly from this, which includes a few more passages; other passages are doubtful: Acts vii. 26, xv. 32, xix. 27; 2 Cor. xi. 1, xiii. 4; Apoc. iv. 8, xviii. 14. In other places, Matt. ii. 11, x. 10; John xviii. 1; Acts xxvii. 29; 2 Pet. i. 1. they follow neither. In James iv. 15, ζήσομεν seems to be a conjecture. The additional notes on readings, Matt. i. 11, xxvi. 26; Mark ix. 24; Luke ii. 38; John xviii. 13; Acts xxv. 6; Eph. vi. 9; James ii. 18; 2 Pet. ii. 2, 14, 18; 1 John ii. 23; 2 John 9, all come from Beza.

of the N. T. text. There is much in it which will not bear the test of historical inquiry, much that is imperfect in the materials, much that is crude and capricious in criticism, but when every drawback has been made, the edition remains a splendid monument of the labours of a life. The work occupied Mill about thirty years, and was finished only a fortnight before his death. One great merit of Mill was that he recognized the importance of each element of critical evidence, the testimony of MSS. versions and citations, as well as internal evidence. In particular he asserted the claims of the Latin version and maintained, against much opposition, even from his patron Bp. Fell, the great value of patristic quotations. He had also a clear view of the necessity of forming a general estimate of the character of each authority, and described in detail those of which he made use. At the same time he gave a careful analysis of the origin and history of previous texts, a labour which, even now, has in many parts not been superseded. But while he pronounced decided judgments on various readings both in the notes and, without any reference or plan, in the Prolegomena, he did not venture to introduce any changes into the printed text. He repeated the Stephanic text of 1550 without any intentional change, and from his edition this has passed (as Mill's) into general use in England. His caution, however, could not save him from vehement attacks. The charge which was brought against Walton[f] of unsettling the sacred text, was renewed against Mill, and, unhappily, found an advocate in Whitby (*Examen variantium lectionum J. Millii S. T. P.* annexed to his Annotations), a man whose genius was worthy of better things. The 30,000 various readings which he was said to have collected formed a common-place with the assailants of the Bible (Bentley, *Remarks*, iii. 348-358, ed. Dyce). But the work of Mill silently produced fruit both in England and Germany. Men grew familiar with the problems of textual criticism and were thus prepared to meet them fairly.

7. Among those who had known and valued Mill was R. BENTLEY, the greatest of English scholars. In his earliest work (*Epist. ad J. Millium*, ii. 362, ed. Dyce), in 1691, Bentley had expressed generous admiration of the labours of Mill, and afterwards, in 1713, in his *Remarks*, triumphantly refuted the charges of impiety with which they were assailed. But Mill had only "accumulated various readings as a promptuary to the judicious and critical reader;" Bentley would "make use of that promptuary and not leave the reader in doubt and suspense" (*Answer to Remarks*, iii. 503). With this view he announced, in 1716, his intention of publishing an edition of the Greek Testament on the authority of the oldest Greek and Latin MS., "exactly as it was in the best examples at the time of the Council of Nice, so that there shall not be twenty words nor even particles' difference" (iii. 477 to Archbp. Wake). Collations were shortly afterwards undertaken both at Paris (including C) and Rome (B), and Bentley himself spared neither labour nor money. In 1720 he published his Proposals and a Specimen (Apoc. xxii.). In this notice he announces his design of publishing "a new edition of the Greek and Latin as represented in the most ancient and venerable MSS. in Greek and Roman(?) capital letters." In this way "he believes that he has retrieved (except in a very few places) the true exemplar of Origen and is sure that the Greek and Latin MSS., by their mutual assistance, do so settle the original text to the smallest nicety as cannot be performed now in any *classic* author whatever." He purposed to add all the various readings of the first five centuries, "and what has crept into any copies since is of no value or authority." The proposals were immediately assailed by Middleton. A violent controversy followed, but Bentley continued his labours till 1729 (Dyce, iii. 483). After that time they seemed to have ceased. The troubles in which Bentley was involved render it unnecessary to seek for any other explanation of the suspension of his work. The one chapter which he published shows clearly enough that he was prepared to deal with variations in his copies, and there is no sufficient reason for concluding that the disagreement of his ancient codices caused him to abandon the plan which he had proclaimed with undoubting confidence (Scrivener, *Cod. Aug.* p. xix.). A complete account of Bentley's labours on the N. T. is prepared for publication (1861) by the Rev. A. A. Ellis, under the title *Bentleii Critica Sacra*.

8. The conception of Bentley was in advance both of the spirit of his age and of the materials at his command. Textual criticism was forced to undergo a long discipline before it was prepared to follow out his principles. During this time German scholars hold the first place. Foremost among these was BENGEL (1687-1752), who was led to study the variations of the N. T. from a devout sense of the infinite value of every divine word. His merit in discerning the existence of families of documents has been already noticed (i. §12); but the evidence before him was not sufficient to show the paramount authority of the most ancient witnesses. His most important rule was, *Proclivi scriptioni praestat ardua*; but except in the Revelation he did not venture to give any reading which had not been already adopted in some edition (*Prodromus N. T. Gr. recte cauteque adornandi*, 1725; *Nov. Testam.* 1734; *Apparatus criticus*, ed. 2da cura P. D. Burk, 1763). But even the partial revision which Bengel had made exposed him to the bitterest attacks; and Wetstein, when at length he published his great edition, reprinted the received text. The labours of WETSTEIN (1693-1754) formed an important epoch in the history of the N. T. While still very young (1716) he was engaged to collate for Bentley, and he afterwards continued the work for himself. In 1733 he was obliged to leave Basle, his native town, from theological differences, and his Greek Testament did not appear till 1751-2 at Amsterdam. A first edition of the *Prolegomena* had been published previously in 1730; but the principles which he then maintained were afterwards much modified by his opposition to Bengel (Comp. Preface to *N. T. cura Gerardi de Trajecto*, ed. 2da, 1735).[g] The great service which Wetstein

[f] Especially by the great puritan Owen in his *Considerations*. Walton replied with severity in *The Considerator considered*.

[g] Gerhard von Maestricht's *N. T.* first appeared in 711, with a selection of various readings, and a series of canons composed to justify the received text. Some of these canons deserve to be quoted, as an illustration of the bold assertion of the claims of the *printed* text, as such.

CAN. IX. "*Unus codex* non facit variantem lectionem *modo recepta lectio sit secundum analogiam fidei*" . . .

CAN. X. "Neque *duo codices* faciunt variantem lec-

rendered to sacred criticism was by the collection of materials. He made nearly as great an advance on Mill as Mill had made on those who preceded him. But in the use of his materials he showed little critical tact; and his strange theory of the *Latinization* of the most ancient MSS. proved for a long time a serious drawback to the sound study of the Greek text (*Prolegomena*, ed. Semler, 1766, ed. Lotze, 1831).

9. It was the work of GRIESBACH (1745-1812) to place the comparative value of existing documents in a clearer light. The time was now come when the results of collected evidence might be set out; and Griesbach, with singular sagacity, courtesy, and zeal, devoted his life to the work. His first editions (*Synopsis*, 1774; *Nov. Test.* ed. 1, 1777-5) were based for the most part on the critical collections of Wetstein. Not long afterwards MATTHAEI published an edition based on the accurate collation of Moscow MSS. (*N. T. ex Codd. Mosquensibus* Riga, 1782-88, 12 vols.; ed. 2da, 1803-7, 3 vols.). These new materials were further increased by the collections of Alter (1786-7), Birch, Adler, and Moldenhawer (1788-1801), as well as by the labours of Griesbach himself. And when Griesbach published his second edition (1796-1806, 2nd ed. of vol. i. by D. Schulz, 1827) he made a noble use of the materials thus placed in his hands. His chief error was that he altered the received text instead of constructing the text afresh; but in acuteness, vigour, and candour he stands below no editor of the N. T., and his judgment will always retain a peculiar value. In 1805 he published a manual edition with a selection of readings which he judged to be more or less worthy of notice, and this has been often reprinted (Comp. *Symbolae Criticae*, 1785-1793; *Opuscula*, ed. Gabler, 1824-5; *Commentarius Criticus*, 1798-1811; White's *Crisees Griesbachianae . . . Synopsis*, 1811).

10. The edition of SCHOLZ contributed more in appearance than reality to the furtherance of criticism (*N. T. ad fidem test. crit.* 1830-1836). This laborious scholar collected a greater mass of various readings than had been brought together before, but his work is very inaccurate, and his own collations singularly superficial. Yet it was of service to call attention to the mass of unused MSS.; and, while depreciating the value of the more ancient MSS., Scholz himself showed the powerful influence of Griesbach's principles by accepting frequently the Alexandrine in preference to the Constantinopolitan reading (i. §14. Comp. *Biblisch-Kritische Reise* . . . 1823; *Curae Criticae* . . . 1820-1845).

iii. *From Lachmann to the present time.*—11. In the year after the publication of the first volume of Scholz's N. T. a small edition appeared in a series of classical texts prepared by LACHMANN († 1851). In this the admitted principles of scholarship were for the first time applied throughout to the construction of the text of the N. T. The prescriptive right of the *textus receptus* was wholly set aside, and the text in every part was regulated by ancient authority. Before publishing his small edition (*N. T. Gr. ex recensione* C. Lachmanni, Berol. 1831) Lachmann had given a short account of his design (*Stud. u. Krit.* 1830, iv.), to which he referred his readers in a brief postscript, but the book itself contained no Apparatus or Prolegomena, and was the subject of great and painful misrepresentations. When, however, the distinct assertion of the primary claims of evidence throughout the N. T. was more fairly appreciated, Lachmann felt himself encouraged to undertake a larger edition, with both Latin and Greek texts. The Greek authorities for this, limited to the primary uncial MSS. (A B C D P Q T Z E_2 G_2 H_2, and the quotations of Irenaeus and Origen, were arranged by the younger Buttmann. Lachmann himself prepared the Latin evidence (Tregelles, *Hist of Gr. Text*, p. 101), and revised both texts. The first volume appeared in 1842, the second was printed in 1845, but not published till 1850, owing in a great measure to the opposition which Lachmann found from his friend De Wette (*N. T.* ii. *Praef.* iv.; Tregelles, p. 111). The text of the new edition did not differ much from that of the former; but while in the former he had used Western (*Latin*) authority only to decide in cases where Eastern (*Greek*) authorities were divided; in the latter he used the two great sources of evidence together. Lachmann delighted to quote Bentley as his great precursor (§7); but there was an important difference in their immediate aims. Bentley believed that it would be possible to obtain the true text directly by a comparison of the oldest Greek authorities with the oldest MSS. of the Vulgate. Afterwards very important remains of the earlier Latin versions were discovered, and the whole question was complicated by the collection of fresh documents. Lachmann therefore wished in the first instance only to give the current text of the *fourth* century, which might then become the basis of further criticism. This at least was a great step towards the truth, though it must not be accepted as a final one. Griesbach had changed the current text of the 15th and 16th centuries in numberless isolated passages, but yet the late text was the foundation of his own: Lachmann admitted the authority of antiquity everywhere, in orthography, in construction, in the whole complexion and arrangement of his text. But Lachmann's edition, great as its merits are as a first appeal to ancient evidence, is not without serious faults. The materials on which it was based were imperfect. The range of patristic citations was limited arbitrarily. The exclusion of the Oriental versions, however necessary at the time, left a wide margin for later change (t. i. *Praef.* p. xxiv.). The neglect of primary cursives often necessitated absolute confidence on slender MS. authority. Lachmann was able to use, but little fitted to collect, evidence (t. i. pp. xxv., xxxviii., xxxix.). It was, however, enough for him to have consecrated the highest scholarship by devoting it to the service of the N. T., and to have claimed the Holy Scriptures as a field for reverent and searching criticism. (The best account

tionem *contra receptam et editam et sani sensus lectionem* maxime in omittendo" . . .

CAN. xiv. "*Versiones* etiam antiquissimae *ab editis* et manuscriptis differentes . . . ostendunt ocitantiam interpretis.

CAN. xvii. "*Citationes Patrum* textus N. T. non facere debent variantem versionem."

CAN. xxix. "*Efficacior lectio textus recepti*"

As examples of Can. ix. we find, Matt. i. 16, γεννᾷ τὸν Ἰ. ὁ λεγ. χρ.; i. 25, om. τὸν πρωτότοκον; Rom. i. 3, ἐν ἁγιωσύνῃ. On 1 John v. 7, 8, the editor refers to the Complutensian edition, and adds: "Ex hac editionis, quae ad fidem praestantissimorum MSS. edita est, indole clarum habemus, quod in plurimis mendis ipsius locus inventus et lectus sit" (p. 35).

of Lachmann's plan and edition is in Tregelles. *Hist. of Printed Text*, 97-115. His most important critics are Fritzsche, *De Conformatione N. T. Critica*... 1841; Tischendorf, *Prolegg.* cii.-cxii.)

12. The chief defects of Lachmann's edition arise from deficiency of authorities. Another German scholar, TISCHENDORF, has devoted twenty years to enlarging our accurate knowledge of ancient MSS. The first edition of Tischendorf (1841[a]) has now no special claims for notice. In his second (Leipsic) edition (1849) he fully accepted the great principle of Lachmann (though he widened the range of ancient authorities), that the text "must be sought solely from ancient authorities, and not from the so-called received edition" (*Praef.* p. xii.), and gave many of the results of his own laborious and valuable collations. The size of this manual edition necessarily excluded a full exhibition of evidence: the editor's own judgment was often arbitrary and inconsistent; but the general influence of the edition was of the very highest value, and the text, as a whole, probably better than any which had preceded it. During the next few years Tischendorf prosecuted his labours on MSS. with unwearied diligence, and in 1855-9 he published his third (seventh[b]) critical edition. In this he has given the authorities for and against each reading in considerable detail, and included the chief results of his later discoveries. The whole critical apparatus is extremely valuable, and absolutely indispensable to the student. The text, except in details of orthography, exhibits generally a retrograde movement from the most ancient testimony. The Prolegomena are copious and full of interest.

13. Meanwhile the sound study of sacred criticism had revived in England. In 1844 TREGELLES published an edition of the Apocalypse in Greek and English, and announced an edition of the N. T.[1] From this time he engaged in a systematic examination of all unpublished uncial MSS., going over much of the same ground as Tischendorf, and comparing results with him. In 1854 he gave a detailed account of his labours and principles (*An Account of the Printed Text of the Greek New Testament*.... London), and again in his new edition of Horne's *Introduction* (1856). The first part of his Greek Testament, containing St. Matthew and St. Mark, appeared in 1857; the second, completing the Gospels, has just appeared (1861). In this he gives at length the evidence of *all* uncial MSS., and of some peculiarly valuable cursives: of all versions up to the 7th century: of all Fathers to Eusebius inclusive. The Latin Vulgate is added, chiefly from the *Cod. Amiatinus* with the readings of the Clementine edition. This edition of Tregelles differs from that of Lachmann by the greater width of its critical foundation; and from that of Tischendorf by a more constant adherence to ancient evidence. Every possible precaution has been taken to secure perfect accuracy in the publication, and the work must be regarded as one of the most important contributions, as it is perhaps the most exact, which has been yet made to the cause of textual criticism. The editions of Knapp (1797, &c.), Vater (1824), Matthäi (1803, &c.), and Hahn (1840, &c.) have no peculiar critical value. Meyer (1829, &c.) paid greater attention to the revision of the text which accompanies his great commentary; but his critical notes are often arbitrary and unsatisfactory. In the Greek Testament of Alford, as in that of Meyer, the text is subsidiary to the commentary; but it is impossible not to notice the important advance which has been made by the editor in true principles of criticism during the course of its publication. The fourth edition of the 1st vol. (1859) contains a clear enunciation of the authority of ancient evidence, as supported both by its external and internal claims, and corrects much that was vague and subjective in former editions. Other annotated editions of the Greek Testament, valuable for special merits, may be passed over as having little bearing on the history of the text. One simple text, however, deserves notice (Cambr. 1860), in which, by a peculiar arrangement of type, Scrivener has represented at a glance all the changes which have been made in the text of Stephens (1550), Elzevir (1624), and Beza (1565), by Lachmann, Tischendorf, and Tregelles.

14. Besides the critical editions of the text of the N. T. various collections of readings have been published separately, which cannot be wholly omitted. In addition to those already mentioned (§9), the most important are by Rinck, *Lucubratio Critica*, 1830; Reiche, *Codicum MSS. N. T. Gr. aliquot insigniorum in Bibl. Reg. Paris*... *collatio* 1847; Scrivener, *A Collation of about Twenty Greek MSS. of the Holy Gospels*... 1853; *A Transcript of the Cod. Aug., with a full Collation of Fifty MSS.* 1859; and E. de Muralt, of Russian MSS. (N. T. 1848). The chief contents of the splendid series of Tischendorf's works (*Codex Ephraemi Rescriptus*, 1843; *Codex Claromontanus*, 1852; *Monumenta sacra inedita*, 1846-1856; *Anecdota sacra et profana*, 1855; *Notitia Cod. Sinaitici*, 1860) are given in his own and other editions of the N. T. (The chief works on the history of the printed text are those of Tregelles, *Hist. of Printed Text*, 1854; Reuss, *Geschichte d. H. Schrift.* §§395 ff., where are very complete bibliographical references; and the Prolegomena of Mill, Wetstein, Griesbach, and Tischendorf. To these must be added the promised (1861) *Introduction* of Mr. Scrivener.

III. PRINCIPLES OF TEXTUAL CRITICISM.

The work of the critic can never be shaped by definite rules. The formal enunciation of principles is but the first step in the process of revision. Even Lachmann, who proposed to follow the most directly mechanical method, frequently allowed play to his own judgment. It could not, indeed, be otherwise with a true scholar; and if there is need anywhere for the most free and devout exercise of every faculty, it must be in tracing out the very words of the Apostles and of the Lord Himself. The justification of a method of revision lies in the result. Canons of criticism are more frequently corollaries than laws of procedure. Yet such canons are not without use in marking the course to be followed, but they are intended only to guide and not to dispense with the exercise of tact and scholarship. The student will judge for himself how far they are applicable in every particular case; and no exhibition of general principles can supersede the necessity of a careful examina-

[a] The second and third editions were Graeco-Latin editions, published at Paris in 1842, of no critical value (*Prolegg.* cxxiv.-v.). The fifth was a simple text, with the variations of Elzevir, chiefly a reprint of the (fourth) edition of 1849. The sixth was a Triglott N. T. 1854-6 (Greek, Latin, German); 1858 (Greek and Latin).

[1] Dr. Tregelles' first specimen was published in 183[illegible] (*Hist. of Printed Text*, p. 153).

tion of the characteristics of separate witnesses and of groups of witnesses. The text of Holy Scripture, like the text of all other books, depends on evidence. Rules may classify the evidence and facilitate the decision, but the final appeal must be to the evidence itself. What appears to be the only sound system of criticism will be seen from the rules which follow. The examples which are added can be worked out in any critical edition of the Greek Testament, and will explain better than any lengthened description the application of the rules.

1. *The text must throughout be determined by evidence without allowing any prescriptive right to printed editions.* In the infancy of criticism it was natural that early printed editions should possess a greater value than individual MSS. The language of the Complutensian editors, and of Erasmus and Stephens, was such as to command respect for their texts prior to examination. Comparatively few MSS. were known, and none thoroughly; but at present the whole state of the question is altered. We are now accurately acquainted with the materials possessed by the two latter editors and with the use which they made of them. If there is as yet no such certainty with regard to the basis of the Complutensian text, it is at least clear that no high value can be assigned to it. On the other hand we have, in addition to the early apparatus, new sources of evidence of infinitely greater variety and value. To claim for the printed text any right of possession is, therefore, to be faithless to the principles of critical truth. The received text may or may not be correct in any particular case, but this must be determined solely by an appeal to the original authorities. Nor is it right even to assume the received text as our basis. The question before us is not *What is to be changed?* but, *What is to be read?* It would be superfluous to insist on this if it were not that a natural infirmity makes every one unjustly conservative in criticism. It seems to be irreverent to disturb an old belief, when real irreverence lies in perpetuating an error, however slight it may appear to be. This holds good universally. In Holy Scripture nothing can be indifferent; and it is the supreme duty of the critic to apply to details of order and orthography the same care as he bestows on what may be judged weightier points. If, indeed, there were anything in the circumstances of the first publication of the N. T. which might seem to remove it from the ordinary fortunes of books, then it would be impossible not to respect the pious sentiment which accepts the early text as an immediate work of Providence. But the history shows too many marks of human frailty to admit of such a supposition. The text itself contains palpable and admitted errors (Matt. ii. 11, *εὗρον*; Acts viii. 37, ix. 5. 6; Apoc. v. 14, xxii. 11; not to mention 1 John v. 7), in every way analogous to those which occur in the first classical texts. The conclusion is obvious, and it is superstition rather than reverence which refuses to apply to the service of Scripture the laws which have restored so much of their native beauty to other ancient writings. It may not be possible to fix the reading in every case finally, but it is no less the duty of the scholar to advance as far as he can and mark the extreme range of uncertainty.

2. *Every element of evidence must be taken into account before a decision is made.* Some uncertainty must necessarily remain; for, when it is said that the text must rest upon evidence, it is implied that it must rest on an examination of its whole evidence. But it can never be said that the mines of criticism are exhausted. Yet even here the possible limits of variation are narrow. The available evidence is so full and manifold that it is difficult to conceive that any new authorities could do more than turn the scale in cases which are at present doubtful. But to exclude remote chances of error it is necessary to take account of every testimony. No arbitrary line can be drawn excluding MSS. versions or quotations below a certain date. The true text must (as a rule) explain all variations, and the most recent forms may illustrate the original one. In practice it will be found that certain documents may be neglected after examination, and that the value of others is variously affected by determinable conditions; but still, as no variation is inherently indifferent, no testimony can be absolutely disregarded.

3. *The relative weight of the several classes of evidence is modified by their generic character.* Manuscripts, versions, and citations, the three great classes of external authorities for the text, are obviously open to characteristic errors. The first are peculiarly liable to errors from transcription (comp. i. §31 ff.). The two last are liable to this cause of corruption and also to others. The genius of the language into which the translation is made may require the introduction of connecting particles or words of reference, as can be seen from the italicised words in the A. V. Some uses of the article and of prepositions cannot be expressed or distinguished with certainty in translation. Glosses or marginal additions are more likely to pass into the text in the process of translation than in that of transcription. Quotations, on the other hand, are often partial or from memory, and long use may give a traditional fixity to a slight confusion or adaptation of passages of Scripture. These grounds of inaccuracy are, however, easily determined, and there is generally little difficulty in deciding whether the rendering of a version or the testimony of a Father can be fairly quoted. Moreover, the most important versions are so close to the Greek text that they preserve the order of the original with scrupulous accuracy, and even in representing minute shades of expression, observe a constant uniformity which could not have been anticipated (Comp. Lachmann, *N. T.* i. p. xlv. ff.). It is a far more serious obstacle to the critical use of these authorities that the texts of the versions and Fathers generally are in a very imperfect state. With the exception of the Latin Version there is not one in which a thoroughly satisfactory text is available; and the editions of Clement and Origen are little qualified to satisfy strict demands of scholarship. As a general rule the evidence of both may be trusted where they differ from the late text of the N. T., but where they agree with this against other early authorities, there is reason to entertain a suspicion of corruption. This is sufficiently clear on comparing the old printed text of Chrysostom with the text of the best MSS. But when full allowance has been made for all these drawbacks, the mutually corrective power of the three kinds of testimony is of the highest value. The evidence of versions may show at once that a MS. reading is a transcriptural error (as John i. 14, *ὁ ἐστὼς* (B C); Jude 12 *ἀνεμοφθορα* \ 1 John i. 2, *καὶ ὑ ἑωράκαμεν* (B), v. 8, *οἱ*

σκοτία (A), iii. 21, ἔχει (B); 2 Pet. ii. 16, ἀνθρώπου; and the absence of their support throws doubt upon readings otherwise of the highest probability: 2 Pet. ii. 4, σειροῖς, ii. 6, ἀσεβέσιν. The testimony of an early Father is again sufficient to give preponderating weight to slight MS. authority: Matt. i. 18, τοῦ δὲ χριστοῦ ἡ γένεσις; and since versions and Fathers go back to a time anterior to any existing MSS., they furnish a standard by which we may measure the conformity of any MS. with the most ancient text. On questions of orthography MSS. alone have authority. The earliest Fathers, like our own writers, seem (if we may judge from printed texts) to have adopted the current spelling of their time, and not to have aimed at preserving in this respect the dialectic peculiarities of N. T. Greek. But MSS., again, are not free from special idiosyncrasies (if the phrase may be allowed) both in construction and orthography, and unless account be taken of these a wrong judgment may be made in isolated passages.

4. *The mere preponderance of numbers is in itself of no weight.* If the multiplication of copies of the N. T. had been uniform, it is evident that the number of later copies preserved from the accidents of time would have far exceeded that of the earlier, yet no one would have preferred the fuller testimony of the 13th to the scantier documents of the 4th century. Some changes are necessarily introduced in the most careful copying, and these are rapidly multiplied. A recent MS. may have been copied from one of great antiquity, but this must be a rare occurrence. If all MSS. were derived by successive reproduction from one source, the most ancient, though few, would claim supreme authority over the more recent mass. As it is, the case is still stronger. It has been shown that the body of later copies was made under one influence. They give the testimony of one church only, and not of all. For many generations Byzantine scribes must gradually, even though unconsciously, have assimilated the text to their current form of expression. Meanwhile the propagation of the Syrian and African types of text was left to the casual reproduction of an ancient exemplar. These were necessarily far rare than later and modified copies, and at the same time likely to be far less used. Representatives of one class were therefore multiplied rapidly, while those of other classes barely continued to exist. From this it follows that MSS. have no abstract numerical value. Variety of evidence, and not a crowd of witnesses, must decide on each doubtful point; and it happens by no means rarely that one or two MSS. alone support a reading which is unquestionably right (Matt. i. 25, v. 4, 5; Mark ii. 22, &c.).

5. *The more ancient reading is generally preferable.* This principle seems to be almost a truism. It can only be assailed by assuming that the recent reading is itself the representative of an authority still more ancient. But this carries the discussion from the domain of evidence to that of conjecture, and the issue must be tried on individual passages.

6. *The more ancient reading is generally the reading of the more ancient MSS.* This proposition is fully established by a comparison of explicit early testimony with the text of the oldest copies. It would be strange, indeed, if it were otherwise. In this respect the discovery of the *Codex Sinaiticus* cannot but have a powerful influence upon biblical criticism. Whatever may be its individual peculiarities, it preserves the ancient readings in characteristic passages (Luke ii. 14; John i. 4, 18; 1 Tim. iii. 16). If the secondary uncials (E F S U, &c.) are really the direct representatives of a text more ancient than that in ℵ B C Z, it is at least remarkable that no unequivocal early authority presents their characteristic readings. This difficulty is greatly increased by internal considerations. The characteristic readings of the most ancient MSS. are those which preserve in their greatest integrity those subtle characteristics of style which are too minute to attract the attention of a transcriber, and yet too marked in their recurrence to be due to anything less than an unconscious law of composition. The laborious investigations of Gersdorf (*Beiträge zur Sprach-Characteristik d. Schriftsteller d. N. T.* Leipzig, 1816) have placed many of these peculiarities in a clear light, and it seems impossible to study his collections without gaining the assurance that the earliest copies have preserved the truest image of the Apostolic texts. This conclusion from style is convincingly confirmed by the appearance of the genuine dialectic forms of Hellenistic Greek in those MSS., and those only, which preserve characteristic traits of construction and order. As long as it was supposed that these forms were Alexandrine, their occurrence was naturally held to be a mark of the Egyptian origin of the MSS., but now that it is certain that they were characteristic of a class and not of a locality, it is impossible to resist the inference that the documents which have preserved delicate and evanescent traits of apostolic language must have preserved its substance also with the greatest accuracy.

7. *The ancient text is often preserved substantially in recent copies.* But while the most ancient copies, as a whole, give the most ancient text, yet it is by no means confined exclusively to them. The text of D in the Gospels, however much it has been interpolated, preserves in several cases almost alone the true reading. Other MSS. exist of almost every date (8th cent. L Ξ, 9th cent. X Δ F_2 G_2, 10th cent. 1,106, 11th cent. 33, 22, &c.), which contain in the main the oldest text, though in these the orthography is modernised, and other changes appear which indicate a greater or less departure from the original copy. The importance of the best cursives has been most strangely neglected, and it is but recently that their true claims to authority have been known. In many cases where other ancient evidence is defective or divided they are of the highest value, and it seldom happens that any true reading is wholly unsupported by late evidence.

8. *The agreement of ancient MSS., or of MSS. containing an ancient text, with all the earliest versions and citations marks a certain reading.* The final argument in favour of the text of the most ancient copies lies in the combined support which they receive in characteristic passages from the most ancient versions and patristic citations. The reading of the oldest MSS. is, as a general rule, upheld by the true reading of Versions and the certain testimony of the Fathers, where this can be ascertained. The later reading, and this is not less worthy of notice, is with equal constancy repeated in the corrupted text of the Versions, and often in inferior MSS. of Fathers. The force of this combination of testimony can only be apprehended after a continuous examination of passages. A mere selection of texts conveys only a partial impression, and it is most important to ob-

serve the errors of the weightiest authorities when isolated, in order to appreciate rightly their independent value when combined. For this purpose the student is urged to note for himself the readings of a few selected authorities (A B C D L X 1, 33, 69, &c., the MSS. of the old Latin *a b c ff k*, &c., the best MSS. of the Vulgate, *am. for. harl.*, &c., the great Oriental versions) through a few chapters; and it may certainly be predicted that the result will be a perfect confidence in the text, supported by the combined authority of the classes of witnesses, though frequently one or two Greek MSS. are to be followed against all the remainder.

9. *The disagreement of the most ancient authorities often marks the existence of a corruption anterior to them.* But it happens by no means rarely that the most ancient authorities are divided. In this case it is necessary to recognise an alternative reading; and the inconsistency of Tischendorf in his various editions would have been less glaring, if he had followed the example of Griesbach in noticing prominently those readings to which a slight change in the balance of evidence would give the preponderance. Absolute certainty is not in every case attainable, and the peremptory assertion of a critic cannot set aside the doubt which lies on the conflicting testimony of trustworthy witnesses. The differences are often in themselves (as may appear) of little moment, but the work of the scholar is to present clearly in its minutest details the whole result of his materials. Examples of legitimate doubt as to the true reading occur Matt. vii. 14, &c.; Luke x. 42, &c.; John i. 18, ii. 8, &c.; 1 John iii. 1, v. 10, &c.; Rom. iii. 26, iv. 1, &c. In rare cases this diversity appears to indicate a corruption which is earlier than any remaining documents: Matt. xi. 27; Mark i. 27; 2 Peter i. 21; James iii. 6, iv. 14; Rom. i. 32, v. 6 (17), xiii. 5, xvi. 25 ff. One special form of variation in the most valuable authorities requires particular mention. An early difference of order frequently indicates the interpolation of a gloss; and when the best authorities are thus divided, any ancient though slight evidence for the omission of the transferred clause deserves the greatest consideration: Matt. i. 18, v. 32, 39, xii. 38, &c.; Rom. iv. 1, &c.; Jam. i. 22. And generally serious variations in expression between the primary authorities point to an early corruption by addition: Matt. x. 29; Rom. i. 27, 29, iii. 22, 26.

10. *The argument from internal evidence is always precarious.* If a reading is in accordance with the general style of the writer, it may be said on the one side that this fact is in its favour, and on the other that an acute copyist probably changed the exceptional expression for the more usual one: *e. g.* Matt. i. 24, ii. 14, vii. 21, &c. If a reading is more emphatic, it may be urged that the sense is improved by its adoption: if less emphatic, that scribes were habitually inclined to prefer stronger terms: *e. g.* Matt. v. 13, vi. 4, &c. Even in the case of the supposed influence of parallel passages in the synoptic Evangelists, it is by no means easy to resist the weight of ancient testimony when it supports the parallel phrase, in favour of the natural canon which recommends the choice of variety in preference to uniformity: *e. g.* Matt. iii. 6, iv. 9, viii. 32, ix. 11, &c. But though internal evidence is commonly only of subjective value, there are some general rules which are of very wide, if not of universal application. These have force to decide or to confirm a judgment; but in every instance they must be used only in combination with direct testimony.

11. *The more difficult reading is preferable to the simpler* (proclivi lectioni praestat ardua, Bengel). Except in cases of obvious corruption this canon probably holds good without exception, in questions of language, construction, and sense. Rare or provincial forms, irregular usages of words, rough turns of expression, are universally to be taken in preference to the ordinary and idiomatic phrase. The bold and emphatic agglomeration of clauses, with the fewest connecting particles, is always likely to be nearest to the original text. The usage of the different apostolic writers varies in this respect, but there are very few, if any, instances where the mass of copyists have left out a genuine connexion; and on the other hand there is hardly a chapter in St. Paul's Epistles where they have not introduced one. The same rule is true in questions of interpretation. The hardest reading is generally the true one: Matt. vi. 1, xix. 17, xxi. 31 (ὁ δεύτερος); Rom. viii. 28 (ὁ θεός); 2 Cor. v. 3; unless, indeed, the difficulty lies below the surface: as Rom. xi. 11 (καιρῷ for κυρίῳ), xii. 13 (μνείαις for χρείαις). The rule admits yet further of another modified application. The less definite reading is generally preferable to the more definite. Thus the future is constantly substituted for the pregnant present, Matt. vii. 8; Rom. xv. 18: compound for simple words, Matt. vii. 28, viii. 17, xi. 25; and pronouns of reference are frequently introduced to emphasize the statement, Matt. vi. 4. But caution must be used lest our own imperfect sense of the naturalness of an idiom may lead to the neglect of external evidence (Matt. xxv. 16, ἐκολήσεν wrongly for ἐκέρδησεν).

12. *The shorter reading is generally preferable to the longer.* This canon is very often coincident with the former one; but it admits also of a wider application. Except in very rare cases copyists never omitted intentionally, while they constantly introduced into the text marginal glosses and even various readings (comp. §13), either from ignorance or from a natural desire to leave out nothing which seemed to come with a claim to authority. The extent to which this instinct influenced the character of the later text can be seen from an examination of the various readings in a few chapters. Thus in Matt. vi. the following interpolations occur: 4 (αὐτός), ἐν τῷ φανερῷ. 5 (ἐν ὅτι ἐπ. ὁ ἐν τῷ φανερῷ. 10 ἐπὶ τῆς γ. 13 ὅτι σοῦ . . ἐστιν. 15 (τὰ παραπτ. αὐτῶν). 16 ὅτι ἐπ. 19 ἐν τῷ φανερῷ. The synoptic Gospels were the most exposed to this kind of corruption, but it occurs in all parts of the N. T. Everywhere the fuller, rounder, more complete form of expression is open to the suspicion of change; and the pre-eminence of the ancient authorities is nowhere seen more plainly than in the constancy with which they combine in preserving the plain, vigorous, and abrupt phraseology of the apostolic writings. A few examples taken almost at random will illustrate the various cases to which the rule applies: Matt. ii. 13, iv. 6, xii. 25; James iii. 12; Rom. ii. 1, viii. 28, x. 15, xv. 29 (comp. §13).

13. *That reading is preferable which explains the origin of the others.* This rule is chiefly of use in cases of great complication, and it would be impossible to find a better example than one which has been brought forward by Tischendorf for another purpose (N. T. *Praef.* pp. xxxiii-iv.). The common reading in Mark ii. 22 is ὁ οἶνος ἐκχεῖται καὶ

οἱ ἀσκοὶ ἀπολοῦνται, which is perfectly simple in itself, and the undoubted reading in the parallel passage of St. Matthew. But here there are great variations. One important MS. (L) reads ὁ οἶνος ἐκχεῖται καὶ οἱ ἀσκοί: another (D with it.) ὁ οἶνος καὶ ἀσκοὶ ἀπολοῦνται: another (B) ὁ οἶνος ἀπόλλυται καὶ οἱ ἀσκοί. Here, if we bear in mind the reading in St. Matthew, it is morally certain that the text of B is correct. This may have been changed into the common text, but cannot have arisen out of it. Compare James iv. 4, 12; Matt. xxiv. 38; Jude 18; Rom. vii. 25; Mark i. 16, 27.

[For the principles of textual criticism compare Griesbach, *N. T. Prolegg.* §3, pp. lviii. ff.; Tischendorf, *N. T. Prolegg.* xxxii.–xliv.; Tregelles, *Printed Text*, pp. 132 ff.; (Horne's) *Introduction*, pp. 342 ff. The *Crisis* of Wetstein (*Prolegg.* pp. 206–40, Lotze) is very unsatisfactory.]

IV. The Language of the New Testament.

1. The eastern conquests of Alexander opened a new field for the development of the Greek language. It may be reasonably doubted whether a specific Macedonian dialect is not a mere fiction of grammarians; but increased freedom both in form and construction was a necessary consequence of the wide diffusion of Greek. Even in Aristotle there is a great declension from the classical standard of purity, though the Attic formed the basis of his language; and the rise of the *common* or *Grecian* dialect (διάλεκτος κοινή, or ὁ Ἑλληνική) is dated from his time. In the writings of educated men who were familiar with ancient models, this "common" dialect always preserved a close resemblance to the normal Attic, but in the intercourse of ordinary life the corruption must have been both great and rapid.

2. At no place could the corruption have been greater or more rapid than at Alexandria, where a motley population, engaged in active commerce, adopted Greek as their common medium of communication. [Alexandria, i. p. 48.] And it is in Alexandria that we must look for the origin of the language of the New Testament. Two distinct elements were combined in this marvellous dialect which was destined to preserve for ever the fullest things of the Gospel. On the one side there was Hebrew conception, on the other Greek expression. The thoughts of the East were wedded to the words of the West. This was accomplished by the gradual translation of the Hebrew Scriptures into the vernacular Greek. The Greek had already lost the exquisite symmetry of its first form, so that it could take the clear impress of Hebrew ideas; and at the same time it had gained rather than lost in richness and capacity. In this manner what may be called the theocratic aspect of Nature and History was embodied in Greek phrases, and the power and freedom of Greek quickened and defined Eastern speculation. The theories of the "purists" of the 17th century (comp. Winer, *Grammatik*, §1; Ilgen, *Gesch. d. H. S.* §47) were based on a complete misconception of what we may, without presumption, feel to have been required for a universal Gospel. The message was not for one nation only, but for all; and the language in which it was promulgated—like its most successful preacher—united in one complementary attributes. [Hellenist, i. p. 783.]

3. The Greek of the LXX.—like the English of the A. V. or the German of Luther—naturally determined the Greek dialect of the mass of the Jews. It is quite possible that numerous provincialisms existed among the Greek-speaking Jews of Egypt, Palestine, and Asia Minor, but the dialect of their common Scriptures must have given a general unity to their language. It is, therefore, more correct to call the N. T. dialect Hellenistic than Alexandrine, though the form by which it is characterised may have been peculiarly Alexandrine at first. Its local character was lost when the LXX. was spread among the Greek Dispersion; and that which was originally confined to one city or one work was adopted by a whole nation. At the same time much of the extreme harshness of the LXX. dialect was softened down by intercourse with Greeks or graecising foreigners, and conversely the wide spread of proselytism familiarised the Greeks with Hebrew ideas.

4. The position of Palestine was peculiar. The Aramaic (Syro-Chaldaic), which was the national dialect after the Return, existed side by side with the Greek. Both languages seem to have been generally understood, though, if we may judge from other instances of bilingual countries, the Aramaic would be the chosen language for the common intercourse of Jews (2 Macc. vii. 8, 21, 27). It was in this language, we may believe, that our Lord was accustomed to teach the people; and it appears that He used the same in the more private acts of His life (Mark iii. 17, v. 41, vii. 34; Matt. xxvii. 46; John i. 43; cf. John xx. 16). But the habitual use of the LXX. is a sufficient proof of the familiarity of the Palestinian Jews with the Greek dialect; and the judicial proceedings before Pilate must have been conducted in Greek. (Comp. Grinfield, *Apology for the LXX.*, pp. 76 ff.)

5. The Roman occupation of Syria was not altogether without influence upon the language. A considerable number of Latin words, chiefly referring to acts of government, occur in the N. T., and they are probably only a sample of larger innovations (κῆνσος, λεγιών, κουστωδία, ἀσσάριον, κοδράντης, δηνάριον, μίλιον, πραιτώριον, φραγελλοῦν, St. Matt. &c.; κεντυρίων, σπεκουλάτωρ, τὸ ἱκανὸν ποιῆσαι, St. Mark; λέντιον, σουδάριον, τίτλος, St. John, &c.; λιβερτῖνος; κολωνία, συμικίνθιον, σικάριος, St. Luke; μάκελλον, μεμβράνα, St. Paul). Other words in common use were of Semitic (ἀρραβών, ζιζάνιον, κορβανᾶς, ραββεί), Persian (ἀγγαρεύω, μάγοι, πάρα, παράδεισος), or Egyptian origin (βδέλυγμα).

6. The language which was moulded under these various influences presents many peculiarities, both philological and exegetical, which have not yet been placed in a clear light. For a long time it has been most strangely assumed that the linguistic forms preserved in the oldest MSS. are *Alexandrine* and not in the widest sense *Hellenistic*, and on the other hand that the Aramaic modifications of the N. T. phraseology remove it from the sphere of strict grammatical analysis. These errors are necessarily fatal to all real advance in the accurate study of the words or sense of the apostolic writings. In the case of St. Paul, no less than in the case of Herodotus, the evidence of the earliest witnesses must be decisive as to dialectic forms. Egyptian scribes preserved the characteristics of other books, and there is no reason to suppose that they altered those of the N. T. Nor is it reasonable to conclude that the later stages of a language are governed by no law or that the introduction of fresh elements destroys the symmetry which is

reality it only changes. But if old misconceptions still linger, very much has been done lately to open the way to a sounder understanding both of the form and the substance of the N. T. by Tischendorf (as to the dialect, *N. T. Prolegg.* xlvi.-lxi..), by Winer (as to the grammatical laws, *Gramm. d. N. T. Sprachid.* 6th ed. 1855; comp. Green's *Grammar of N. T. dialect*, 1842), and by the later commentators (Fritzsche, Lücke, Bleek, Meyer, Alford). In detail comparatively little remains to be done, but a philosophical view of the N. T. language as a whole is yet to be desired. For this it would be necessary to take account of the commanding authority of the LXX. over the religious dialect, of the constant and living power of the spoken Aramaic and Greek, of the mutual influence of inflexion and syntax, of the inherent vitality of words and forms, of the history of technical terms, and of the creative energy of Christian truth. Some of these points may be discussed in other articles; for the present it must be enough to notice a few of the most salient characteristics of the language as to form and expression.

7. The formal differences of the Greek of the N. T. from classical Greek are partly differences of vocabulary and partly differences of construction. Old words are changed in orthography (1) or in inflection (2), new words (3) and rare or novel constructions (4) are introduced. One or two examples of each of these classes may be noticed. But it must be again remarked that the language of the N. T., both as to its lexicography and as to its grammar, is based on the language of the LXX. The two stages of the dialect cannot be examined satisfactorily apart. The usage of the earlier books often confirms and illustrates the usage of the later; and many characteristics of N. T. Greek have been neglected or set aside from ignorance of the fact that they are undoubtedly found in the LXX. With regard to the forms of words, the similarity between the two is perfect; with regard to construction, it must always be remembered that the LXX. is a translation, executed under the immediate influence of the Hebrew, while the books of the N. T. (with a partial exception in the case of St. Matthew) were written freely in the current Greek.

(1) Among the most frequent peculiarities of orthography of Hellenistic Greek which are supported by conclusive authority, are—the preservation of the *μ* before *ψ* and *φ* in *λαμβάνω* and its derivations, *λήμψεται*, *ἀντιλήμψεις*; and of *ν* in compounds of *συν* and *ἐν*, *συνζῆν*, *συνμαθητής*, *ἐνγεγραμμένη*. Other variations occur in *τεσσεράκοντα*, *ἐραυνᾶν*, &c., *ἐκαθερίσθη* &c. It is more remarkable that the aspirate appears to have been introduced into some words, as *ἐλπίς* (Rom. viii. 20; Luke vi. 35). The *ν ἐφελκυστικόν* in verbs (but not in nouns) and the *ς* of *οὗτος* are always preserved before consonants, and the hiatus (with *ἀλλὰ* especially) is constantly (perhaps always) disregarded. The forms in *-ει-*, *-ι-*, are more difficult of determination, and the question is not limited to later Greek.

(2) Peculiarities of inflection are found in *μαίρῃ*, *-ῃς*, *χεῖραν*(?), *συγγένῃν*(?), *βαθέως*, &c. These peculiarities are much more common in verbs. The augment is sometimes doubled: *ἀνεκατεστάθη*, sometimes omitted: *οἰκοδόμησεν*, *κατασχύνθη*. The doubling of *ῥ* is commonly neglected: *ἐράντισεν*. Unusual forms of tenses are used: *ἔστεσα*, *εἶπα*, &c.; unusual moods: *κοπάσῃ σωμαι* (1 Cor. xiii. 4?); and unusual conjugations: *νικοῦντι* for *νικῶντι*, *ἀλλόγα* for *ἀλλάγα*, *παρεισεδύησαν* for *παρεισέδυσαν* (Jude 4).

(3) The new words are generally formed according to old analogy—*οἰκοδεσπότης*, *εὐσημαίνω*, *καθημερινός*, *ἀποκαραδοκεῖν*; and in this respect the frequency of compound words is particularly worthy of notice. Other words receive new senses: *χρηματίζειν*, *ὀψάριον*, *περισπᾶσθαι*, *συνέσεως*; and some are slightly changed in form: *ἀνάθεμα* (*-ημα*), *ἐξάπινα* (*-ης*), *βασίλισσα* (comp. Winer, *Gramm.* §2).

(4) The most remarkable construction, which is well attested both in the LXX. and in the N. T., is that of the conjunctions *ἵνα*, *ὅταν*, with the present indicative: Gal. vi. 12(?), *ἵνα διώκωνται*, Luke xi. 2, *ὅταν προσεύχεσθε*, as well as with the future indicative (Comp. Tischdf. Mark iii. 2). *Ὅταν* is even found with the imperfect and aor. indic., Mark iii. 11, *ὅταν ἐθεώρουν*; Apoc. viii. 1. *ὅταν ἤνοιξεν*. Other irregular constructions in the combination of moods (Apoc. iii. 9) and in defective concords (Mark ix. 26) can be paralleled in classical Greek, though such constructions are more frequent and anomalous in the Apocalypse than elsewhere.

8. The peculiarities of the N. T. language which have been hitherto mentioned have only a rare and remote connexion with interpretation. They illustrate more or less the general history of the decay of a language, and offer in some few instances curious problems as to the corresponding changes of modes of conception. Other peculiarities have a more important bearing on the sense. These are in part Hebraisms (Aramaisms) in (1) expression or (2) construction, and in part (3) modifications of language resulting from the substance of the Christian revelation.

(1) The general characteristic of Hebraic expression is vividness, as simplicity is of Hebraic syntax. Hence there is found constantly in the N. T. a personality of language (if the phrase may be used) which is foreign to classical Greek. At one time this occurs in the substitution of a pregnant metaphor for a simple word: *οἰκοδομεῖν* (St. Paul), *στηλογχίζομαι* (Gospels), *πλατύνειν τὴν καρδίαν* (2 Cor. St. Paul), *πρόσωπον λαμβάνειν*, *προσωποληψία*, *προσωπολήμπτειν*. At another time in the use of prepositions in place of cases: *πράζειν ἐν μεγάλῃ φωνῇ*, *ἐν μαχαίρᾳ ἀπολέσθαι*, *δίδως ἀπὸ τοῦ αἵματος*. At another in the use of a new phrase for a preposition: *διὰ χειρῶν τινος γενέσθαι*, *ἀποστέλλειν σὺν χειρὶ ἀγγέλου*, *ἐν χειρὶ μεσίτου*, *φεύγειν ἀπὸ προσώπου τινός*. And sometimes the one personal act is used to describe the whole spirit and temper: *παρεκάθισα ἀπίσω τινός*.

(2) The chief peculiarities of the syntax of the N. T. lie in the reproduction of Hebrew forms. Two great features by which it is distinguished from classical syntax may be specially singled out. It is markedly deficient in the use of particles and of oblique and participial constructions. Sentences are more frequently co-ordinated than subordinated. One clause follows another rather in the way of constructive parallelism than by distinct logical sequence. Only the simplest words of connexion are used in place of the subtle varieties of expression by which Attic writers exhibit the interdependence of numerous ideas. The repetition of a key-word (John i. 1, v. 31, 32, xi 33, or of a

leading thought (John x. 11 ff., xvii. 14-19) often serves in place of all other conjunctions. The words quoted from another are given in a direct objective shape (John vii. 40, 41). Illustrative details are commonly added in abrupt parenthesis (John iv. 6). Calm emphasis, solemn repetition, grave simplicity, the gradual accumulation of truths, give to the language of Holy Scripture a depth and permanence of effect found nowhere else. It is difficult to single out isolated phrases in illustration of this general statement, since the final impression is more due to the iteration of many small points than to the striking power of a few. Apart from the whole context the influence of details is almost inappreciable. Constructions which are most distinctly Hebraic (πληθύνων πληθυνῶ, θανάτῳ τελευτᾶν, εὐδοκεῖν ἔν τινι, σὰρξ ἁμαρτίας, &c.) are not those which give the deepest Hebrew colouring to the N. T. diction, but rather that pervading monotony of form which, though correct in individual clauses, is wholly foreign to the vigour and elasticity of classical Greek. If the student will carefully analyse a few chapters of St. John, in whom the Hebrew spirit is most constant and marked, inquiring at each step how a classical writer would have avoided repetition by the use of pronouns and particles, how he would have indicated dependence by the use of absolute cases and the optative, how he would have united the whole by establishing a clear relation between the parts, he will gain a true measure of the Hebraic style more or less pervading the whole N. T. which cannot be obtained from a mere catalogue of phrases. The character of the style lies in its total effect and not in separable elements: it is seen in the spirit which informs the entire text far more vividly than in the separate members (comp. *Introduction to the Gospels*, pp. 241-252).

(3) The purely Christian element in the N. T. requires the most careful handling. Words and phrases already partially current were transfigured by embodying new truths and for ever consecrated to their service. To trace the history of these is a delicate question of lexicography which has not yet been thoroughly examined. There is a danger of confounding the apostolic usage on the one side with earlier Jewish usage, and on the other with later ecclesiastical terminology. The steps by which the one served as a preparation for the apostolic sense and the latter naturally grew out of it require to be diligently observed. Even within the range of the N. T. itself it is possible to notice various phases of fundamental ideas and a consequent modification of terms. Language and thought are both living powers, mutually dependent and illustrative. Examples of words which show this progressive history are abundant and full of instruction. Among others may be quoted, πίστις, πιστεύειν εἴς τινα; δίκαιος, δικαιόω; ἅγιος, ἁγιάζω; καλεῖν, κλῆσις, κλητός, ἐκλεκτός; ἀγάπη, ἐλπίς, χάρις; εὐαγγέλιον, εὐαγγελίζεσθαι, κηρύττειν, κήρυγμα; ἀπόστολος, πρεσβύτερος, ἐπίσκοπος, διάκονος; ἄρτον κλάσαι, βαπτίζειν, κοινωνία; σάρξ, ψυχή, πνεῦμα; σῶμα, σωτηρία, σῴζειν; λυτροῦσθαι, καταλλάσσειν. Nor is it too much to say that in the history of these and such like words lies the history of Christianity. The perfect truth of the apostolic phraseology, when examined by this most rigorous criticism, contains the fulfilment of earlier anticipations and the germ of later growth.

9. For the language of the N. T. calls for the exercise of the most rigorous criticism. The complexity of the elements which it involves makes the inquiry wider and deeper, but does not set it aside. The overwhelming importance, the manifold expression, the gradual development of the message which it conveys, call for more intense devotion in the use of every faculty trained in other schools, but do not suppress inquiry. The gospel is for the whole nature of man, and is sufficient to satisfy the reason as well as the spirit. Words and idioms admit of investigation in all stages of a language. Decay itself is subject to law. A mixed and degenerate dialect is not less the living exponent of definite thought, than the most pure and vigorous. Rude and unlettered men may have characteristic modes of thought and speech, but even (naturally speaking) there is no reason to expect that they will be less exact than others in using their own idiom. The literal sense of the apostolic writings must be gained in the same way as the literal sense of any other writings, by the fullest use of every appliance of scholarship, and the most complete confidence in the necessary and absolute connexion of words and thoughts. No variation of phrase, no peculiarity of idiom, no change of tense, no change of order, can be neglected. The truth lies in the whole expression, and no one can presume to set aside any part as trivial or indifferent.

10. The importance of investigating most patiently and most faithfully the literal meaning of the sacred text must be felt with tenfold force, when it is remembered that the literal sense is the outward embodiment of a spiritual sense, which lies beneath and quickens every part of Holy Scripture [OLD TESTAMENT]. Something of the same kind of double sense is found in the greatest works of human genius, in the *Orestea* for example, or *Hamlet*; and the obscurity which hangs over the deepest utterances of a dramatist may teach humility to those who complain of the darkness of a prophet. The special circumstances of the several writers, their individual characteristics reflected in their books, the slightest details which add distinctness or emphasis to a statement, are thus charged with a divine force. A spiritual harmony rises out of an accurate interpretation. And exactly in proportion as the spiritual meaning of the Bible is felt to be truly its primary meaning, will the importance of a sound criticism of the text be recognized as the one necessary and sufficient foundation of the noble superstructure of higher truth which is afterwards found to rest upon it. Faith in words is the beginning, faith in the WORD is the completion of Biblical interpretation. Impatience may destroy the one and check the other; but the true student will find the simple text of Holy Scripture ever pregnant with lessons for the present and promises for ages to come. The literal meaning is one and fixed: the spiritual meaning is infinite and multiform. The unity of the literal meaning is not disturbed by the variety of the inherent spiritual applications. Truth is essentially infinite. There is thus one sense to the words, but countless relations. There is an absolute fitness in the parables and figures of Scripture, and hence an abiding pertinence. The spiritual meaning is, so to speak, the life of the whole, living on with unchanging power through every change of race and age. To this we can approach only (on the human side) by unwavering trust in the ordinary laws of scholarship, which finds in Scripture its final consecration.

For the study of the language of the N. T., Tischendorf's 7th edition (1859), Grinfield's *Editio Hellenistica* (with the *Scholia*, 1843-8), Bruder's *Concordantiæ* (1842) and Winer's *Grammatik* (6th edition, 1853, translated by Masson, Edinb. 1859), are indispensable. To these may be added Trommius' *Concordantiæ . . . LXX interpretum*, 1718, for the usage of the LXX, and Suicer's *Thesaurus*, 1682, for the later history of some words. The lexicons of Schleusner to the LXX. (1820-1), and N. T. (1819) contain a large mass of materials, but are most uncritical. Those of Wahl (N. T. 1822; Apocrypha, 1853) are much better in point of accuracy and scholarship. On questions of dialect and grammar there are important collections in Sturz, *De Dialecto Maced. et Alex.* (1786); Thiersch, *De Pent. vers. Alex.* (1841); Lobeck's *Phrynichus* (1820), *Paralipomena Gr. Gr.* (1837), *Pathol. Serm. Gr. Prolegg.* (1843), *Pathol. Serm. Gr. Elem.* (1846). The Indices of Jacobson to the *Patres Apostolici* (1840) are very complete and useful. The parallels gathered by Ott and Krebs from Josephus, and by Loesner and Kühn from Philo have been fully used by most recent commentators. Further bibliographical references are given by Winer, *Gramm.* pp. 1-38; Reuss, *Gesch. d. Heil. Schrift*, pp. 28-37; Grinfield's *N. T. Editio Hellenistica*, Prnef.. xi., xii. [B. F. W.]

NEW YEAR. [TRUMPETS, FEAST OF.]

NEZI'AH (נְצִיחַ: Ναθιέ; Alex. Νεθιέ in Ezr.; Νισιά in Neh.: *Nasia*). The descendants of Neziah were among the Nethinim who returned with Zerubbabel (Ezr. ii. 54; Neh. vii. 56). The name appears as NASITH in 1 Esdr. v. 32.

NE'ZIB (נְצִיב: Ναασείβ; Alex. Νεσιβ: *Nesib*), a city of Judah (Josh. xv. 43 only), in the district of the Shefelah or Lowland, one of the same group with Keilah and Mareshah. To Eusebius and Jerome it was evidently known. They place it on the road between Eleutheropolis and Hebron, 7, or 9 (Euseb.), miles from the former, and there it still stands under the almost identical name of *Beit Nûsib*, or *Chirbeh Nasib*, 2¼ hours from *Beit Jibrin*, on a rising ground at the southern end of the *Wady es-Sûr*, and with Keilah and Mareshah within easy distance. It has been visited by Dr. Robinson (ii. 220, 1) and Tobler (*3te Wanderung*, 150). The former mentions the remains of ancient buildings, especially one of apparently remote age, 120 feet long by 30 broad. This, however—with the curious discrepancy which is so remarkable in Eastern explorers—is denied by the later traveller, who states that "but for the ancient name no one would suspect this of being an ancient site."

Nezib[a] adds another to the number of places which, though enumerated as in the Lowland, have been found in the mountains. [JIPHTAH; KEILAH.] [G.]

NIB'HAZ (נִבְחַז, and in some MSS. נִבְחָן and נִבְחָז: Νιβχάς or Ναιβάς; for which there is substituted in some copies an entirely different name, Ἀβαζέρ, Ναβαζέρ, or Ἐβλαζέρ, the latter being probably the more correct, answering to the Hebrew אֶבֶל־עֵצֶר, "grief of the ruler": *Nebahaz*), a deity of the Avites, introduced by them into Samaria in the time of Shalmaneser (2 K. xvii. 31). There is no certain information as to the character of the deity, or the form of the idol so named. The Rabbins derived the name from a Hebrew root *nâbach* (נָבַח), "to bark," and hence assigned to it the figure of a dog, or a dog-headed man. There is no *a priori* improbability in this; the Egyptians worshipped the dog (Plut. *De Is.* 44), and according to the opinion current among the Greeks and Romans they represented Anubis as a dog-headed man, though Wilkinson (*Anc. Egypt.* i. 44, Second Series) asserts that this was a mistake, the head being in reality that of a jackal. Some indications of the worship of the dog have been found in Syria, a colossal figure of a dog having formerly existed between Berytus and Tripolis (Winer, *Rosen*, *s. v.*). It is still more to the point to observe that on one of the slabs found at Khorsabad and represented by Botta (pl. 141), we have the front of a temple depicted with an animal near the entrance, which can be nothing else than a bitch suckling a puppy, the head of the animal having, however, disappeared. The worship of idols representing the human body surmounted by the head of an animal (as in the well-known case of Nisroch) was common among the Assyrians. According to another equally unsatisfactory theory, Nibhaz is identified with the god of the nether world of the Sabian worship (Gesen. *Thesaur.* p. 842). [W. L. B.]

NIB'SHAN (with the definite article, הַנִּבְשָׁן: Ναφλαζών; Alex. Νεβσαν: *Nebsan*). One of the six cities of Judah (Josh. xv. 62) which were in the district of the Midbar (A. V. "wilderness"), which probably in this one case only designates the depressed region on the immediate shore of the Dead Sea, usually in the Hebrew Scriptures called the *Arâbâh*. [Vol. i. 1156*b*.] Under the name of Nempsan or Nebsan it is mentioned by Eusebius and Jerome in the *Onomasticon*, but with no attempt to fix its position. Nor does any subsequent traveller appear to have either sought for or discovered any traces of the name. [G.]

NICA'NOR (Νικάνωρ: *Nicanor*), the son of Patroclus (2 Macc. viii. 9), a general who was engaged in the Jewish wars under Antiochus Eupator and Demetrius I. He took part in the first expedition of Lysias, B.C. 166 (1 Macc. iii. 38), and was defeated with his fellow-commander at Emmaus (1 Macc. iv.; cf. 2 Macc. viii. 9 ff.). After the death of Antiochus Eupator and Lysias, he stood high in the favour of Demetrius (1 Macc. vii. 26), who appointed him governor of Judaea (2 Macc. xiv. 12), a command which he readily undertook as one "who bare deadly hate unto Israel" (1 Macc. vii. 26). At first he seems to have endeavoured to win the confidence of Judas, but when his treacherous designs were discovered he had recourse to violence. A battle took place at Capharsalama, which was indecisive in its results; but shortly after Judas met him at Adasa (B.C. 161), and he fell "first in the battle." A general rout followed, and the 13th of Adar, on which the engagement took place, "the day before Mardocheus' day," was ordained to be kept for ever as a festival (1 Macc. vii. 49; 2 Macc. xv. 36).

[a] The word *netsib*, identical with the above name, is several times employed for a garrison or an officer of the Philistines (see 1 Sam. x. 5; xiii. 3, 4; 1 Chr. xi. 16). This suggests the possibility of Nezib having been a Philistine place. But the application of the term to the Philistines, though frequent, is not exclusive.

[a] If originally a Hebrew name, probably from the same root as Bashan—a sandy soil.

There are some discrepancies between the narratives in the two books of Maccabees as to Nicanor. In 1 Macc. he is represented as acting with deliberate treachery: in 2 Macc. he is said to have been won over to a sincere friendship with Judas, which was only interrupted by the intrigues of Alcimus, who induced Demetrius to repeat his orders for the capture of the Jewish hero (2 Macc. xiv. 23 ff.). Internal evidence is decidedly in favour of 1 Macc. According to Josephus (*Ant.* xii. 10, §4), who does not, however, appear to have had any other authority than 1 Macc. before him, Judas was defeated at Capharsalama; and though his account is obviously inaccurate (ἀναγκάζει τὴν Ἰούδαν . . . ἐπὶ τὴν ἄκραν φεύγειν), the events which followed (1 Macc. vii. 33 ff.; comp. 2 Macc. xiv. 33 ff.) seem at least to indicate that Judas gained no advantage. In 2 Macc. this engagement is not noticed, but another is placed (2 Macc. xiv. 17) before the connexion of Nicanor with Judas, while this was after it (1 Macc. vii. 27 ff.), in which "Simon Judas' brother" is said to have been "somewhat discomfited."

2. One of the first seven deacons (Acts vi. 5). According to the Pseudo-Hippolytus he was one of the seventy disciples, and "died at the time of the martyrdom of Stephen" (p. 953, ed. Migne). [B. F. W.]

NICODE'MUS (Νικόδημος: *Nicodemus*), a Pharisee, a ruler of the Jews, and[a] teacher of Israel (John iii. 1, 10), whose secret visit to our Lord was the occasion of the discourse recorded by St. John. The name was not uncommon among the Jews (Joseph. *Ant.* xiv. 3, §2), and was no doubt borrowed from the Greeks. In the Talmud it appears under the form נקדימון, and some would derive it from נקי, innocent, דם, blood (*i. e.* "Sceleris purus"); Wetstein, *N. T.* i. 150. In the case of Nicodemus Ben Gorion, the name is derived by R. Nathan from a miracle which he is supposed to have performed (Otho, *Lex. Rab.* s. v.).

Nicodemus is only mentioned by St. John, who narrates his nocturnal visit to Jesus, and the conversation which then took place, at which the Evangelist may himself have been present. The high station of Nicodemus as a member of the Jewish Sanhedrim, and the avowed scorn under which the rulers concealed their inward conviction (John iii. 2) that Jesus was a teacher sent from God, are sufficient to account for the secrecy of the interview. A constitutional timidity is discernible in the character of the enquiring Pharisee, which could not be overcome by his vacillating desire to befriend and acknowledge One whom he knew to be a Prophet, even if he did not at once recognise in him the promised Messiah. Thus the few words which he interposed against the rash injustice of his colleagues are cautiously rested on a general principle (John vii. 50), and betray no indication of his faith in the Galilean whom his sect despised. And even when the power of Christ's love, manifested on the cross, had made the most timid disciples bold, Nicodemus does not come forward with his splendid gifts of affection until the example had been set by one of his own rank, and wealth, and station in society (xix. 39).

In these three notices of Nicodemus a noble candour, and a simple love of truth shine out in the midst of hesitation and fear of man. We can therefore easily believe the tradition that after the resurrection (which would supply the last outward impulse necessary to confirm his faith and increase his courage) he became a professed disciple of Christ, and received baptism at the hands of Peter and John. All the rest that is recorded of him is highly uncertain. It is said, however, that the Jews, in revenge for his conversion, deprived him of his office, beat him cruelly, and drove him from Jerusalem; that Gamaliel, who was his kinsman, hospitably sheltered him until his death in a country house, and finally gave him honourable burial near the body of Stephen, where Gamaliel himself was afterwards interred. Finally, the three bodies are said to have been discovered on Aug. 3, A.D. 415, which day was set apart by the Romish Church in honour of the event (Phot. *Biblioth. Cod.* 171; Lucian, *De S. Steph. inventione*).

The conversation of Christ with Nicodemus is appointed as the Gospel for Trinity Sunday. The choice at first sight may seem strange. There are in that discourse no mysterious numbers which might shadow forth truths in their simplest relations; no distinct and yet simultaneous actions of the divine persons; no separation of divine attributes. Yet the instinct[b] which dictated this choice was a right one. For it is in this conversation alone that we see how our Lord himself met the difficulties of a thoughtful man; how he checked, without noticing, the self-assumption of a teacher; how he lifted the half-believing mind to the light of nobler truth.

If the Nicodemus of St. John's Gospel be identical with the Nicodemus Ben Gorion of the Talmud, he must have lived till the fall of Jerusalem, which is not impossible since the term γέρων, in John iii. 4, may not be intended to apply to Nicodemus himself. The arguments for their identification are that both are mentioned as Pharisees, wealthy, pious, and members of the Sanhedrim (*Taanith*, f. 19, &c. See Otho, *Lex. Rab.* s. v.); and that in *Taanith* the original name (altered on the occasion of a miracle performed by Nicodemus in order to procure rain) is said to have been בוני, which is also the name of one of five Rabbinical disciples of Christ mentioned in *Sanhed.* f. 43, 1 (Otho, s. v. *Christus*). Finally, the family of this Nicodemus are said to have been reduced from great wealth to the most squalid and horrible poverty, which however may as well be accounted for by the fall of Jerusalem, as by the change of fortune resulting from an acceptance of Christianity.

On the Gospel of Nicodemus, see Fabricius, *Cod. Pseudepigr.* i. 213; Thilo, *Cod. Apocr.* i. 478. In some MSS. it is also called 'The Acts of Pilate.' It is undoubtedly spurious (as the conclusion of it sufficiently proves), and of very little value. [F. W. F.]

NICOLA'ITANS (Νικολαΐται: *Nicolaitae*). The question how far the sect that is mentioned by this name in Rev. ii. 6, 15, was connected with the Nicolas of Acts vi. 5, and the traditions that have gathered round his name, will be discussed below. [NICOLAS.] It will here be considered how far we can get at any distinct notion of what the sect itself was, and in what relation it stood to the life of the Apostolic age.

It has been suggested as one step towards this result that the name before us was symbolic rather

[a] The article in John iii. 10 (ὁ διδάσκ.) is probably only generic, although Winer and Bp. Middleton suppose that it implies a rebuke.

[b] The writer is indebted for this remark to a MS. sermon by Mr Westcott.

than historical. The Greek Νικόλαος is, it has been said, an approximate equivalent to the Hebrew Balaam, the lord (Vitringa, deriving it from בָּעַל), or, according to another derivation, the devourer of the people (so Hengstenberg, as from בָּלַע).[a] If we accept this explanation we have to deal with one sect instead of two—we are able to compare with what we find in Rev. ii. the incidental notices of the characteristics of the followers of Balaam in Jude and 2 Peter, and our task is proportionately an easier one. It may be urged indeed that this theory rests upon a false or at least a doubtful etymology (Gesenius, *s. v.* בִּלְעָם, makes it = peregrinus), and that the message to the Church of Pergamos (Rev. ii. 14, 15) appears to recognise "those that hold the doctrine of Balaam," and "those that hold the doctrine of the Nicolaitanes," as two distinct bodies. There is, however, a sufficient answer to both these objections. (1) The whole analogy of the mode of teaching which lays stress on the significance of names would lead us to look, not for philological accuracy, but for a broad, strongly-marked *paronomasia*, such as men would recognise and accept. It would be enough for those who were to hear the message that they should perceive the meaning of the two words to be identical.[b] (2) A closer inspection of Rev. ii. 15 would show that the οὕτως ἔχεις, κ. τ. λ. imply the resemblance of the teaching of the Nicolaitans with that of the historical Balaam mentioned in the preceding verse, rather than any kind of contrast.

We are now in a position to form a clearer judgment of the characteristics of the sect. It comes before us as presenting the ultimate phase of a great controversy, which threatened at one time to destroy the unity of the Church, and afterwards to taint its purity. The controversy itself was inevitable as soon as the Gentiles were admitted, in any large numbers, into the Church of Christ. Were the new converts to be brought into subjection to the whole Mosaic law? Were they to give up their old habits of life altogether—to withdraw entirely from the social gatherings of their friends and kinsmen? Was there not the risk, if they continued to join in them, of their eating, consciously or unconsciously, of that which had been slain in the sacrifices of a false worship, and of thus sharing in the idolatry? The apostles and elders at Jerusalem met the question calmly and wisely. The burden of the Law was not to be imposed on the Gentile disciples. They were to abstain, among other things, from "meats offered to idols" and from "fornication" (Acts xv. 20, 29), and this decree was welcomed as the great charter of the Church's freedom. Strange as the close union of the moral and the positive commands may seem to us, it did not seem so to the synod at Jerusalem. The two sins were very closely allied, often even in the closest proximity of time and place. The fathomless impurity which overspread the empire made the one almost as inseparable as the other from its daily social life.

The messages to the Churches of Asia and the later Apostolic Epistles (2 Peter and Jude) indicate that the two evils appeared at that period also in close alliance. The teachers of the Church branded them with a name which expressed their true character. The men who did and taught such things were followers of Balaam (2 Pet. ii. 15; Jude 11). They, like the false prophet of Pethor, united brave words with evil deeds. They made their "liberty" a cloak at once for cowardice and licentiousness. In a time of persecution, when the eating or not eating of things sacrificed to idols was more than ever a crucial test of faithfulness, they persuaded men more than ever that it was a thing indifferent (Rev. ii. 13, 14). This was bad enough, but there was a yet worse evil. Mingling themselves in the orgies of idolatrous feasts, they brought the impurities of those feasts into the meetings of the Christian Church. There was the most imminent risk that its Agapae might become as full of abominations as the Bacchanalia of Italy had been (2 Pet. ii. 12, 13, 18; Jude 7, 8; comp. Liv. xxxix. 8-19). Their sins had already brought scandal and discredit on the "way of truth." And all this was done, it must be remembered, not simply as an indulgence of appetite, but as part of a system, supported by a "doctrine," accompanied by the boast of a prophetic illumination (2 Pet. ii. 1). The trance of the son of Beor and the sensual debasement into which he led the Israelites were strangely reproduced.

These were the characteristics of the followers of Balaam, and, worthless as most of the traditions about Nicolas may be, they point to the same distinctive evils. Even in the absence of any teacher of that name, it would be natural enough, as has been shown above, that the Hebrew name of ignominy should have its Greek equivalent. If there were such a teacher, whether the proselyte of Antioch or another,[c] the application of the name to his followers would be proportionately more pointed. It confirms the view which has been taken of their character to find that stress is laid in the first instance on the "deeds" of the Nicolaitans. To hate those deeds is a sign of life in a Church that otherwise is weak and faithless (Rev. ii. 6). To tolerate them is well nigh to forfeit the glory of having been faithful under persecution (Rev. ii. 14, 15). (Comp. Neander's *Apostelgesch.* p. 630, Gieseler's *Eccl. Hist.* § 29; Hengstenberg and Alford on Rev. ii. 6; Stier, *Words of the Risen Saviour*, x.) [E. H. P.]

NIC'OLAS (Νικόλαος: *Nicolaus*), Acts vi. 5. A native of Antioch, and a proselyte to the Jewish faith. When the church was still confined to Jerusalem he became a convert; and being a man of honest report, full of the Holy Ghost and of wisdom, he was chosen by the whole multitude of the dis-

[a] Cocceius (*Capitat. in Rev.* ii. 6) has the credit of being the first to suggest this identification of the Nicolaitans with the followers of Balaam. He has been followed by the elder Vitringa (*Dissert. de Argum. Epist. Petri poster.* in Hase's *Thesaurus*, ii. 987), Hengstenberg (*in loc.*), Stier (*Words of the Risen Lord*, p. 125 Eng. transl.), and others. Lightfoot (*Hor. Heb.*, in Act. Apost. vi. 5) suggests another and more startling *paronomasia*. The word, in his view, was chosen, as identical in sound with נִיכוֹלָא, "let us eat," and as thus marking out the special characteristic of the sect.

[b] Vitringa (*l. c.*) finds another instance of this indirect expression of feeling in the peculiar form, "Balaam the son of Bosor," in 2 Pet. ii. 15. The substitution of the latter name for the Beor of the LXX. originated, according to his conjecture, in the wish to point to his antitype in the Christian Church as a true בֶּן־בּוֹשׁ, a *filius ignominiae*.

[c] It is noticeable (though the documents themselves are not of much weight as evidence) that in two instances the Nicolaitans are said to be "falsely so called" (Pseudo-Ignat. *ad Trall.* xi., *Const. Apost.* vi. 8).

tiples to be one of the first seven deacons, and he was ordained by the apostles, A.D. 33.

A sect of Nicolaitans is mentioned in Rev. ii. 6, 15; and it has been questioned whether this Nicolas was connected with them, and if so, how closely.

The Nicolaitans themselves, at least as early as the time of Irenaeus (*Contr. Haer.* i. 26, §3), claimed him as their founder. Epiphanius, an inaccurate writer, relates (*Adv. Haer.* i. 2, §25, p. 76) some details of the life of Nicolas the deacon, and describes him as gradually sinking into the grossest impurity, and becoming the originator of the Nicolaitans and other immoral sects. Stephen Gobar (Photii *Biblioth.* §232, p. 291, ed. 1824) states—and the statement is corroborated by the recently discovered *Philosophumena*, bk. vii. §36—that Hippolytus agreed with Epiphanius in his unfavourable view of Nicolas. The same account is believed, at least to some extent by Jerome (*Ep.* 147, t. i. p. 1082, ed. Vallars. &c.) and other writers in the 4th century. But it is irreconcileable with the traditionary account of the character of Nicolas, given by Clement of Alexandria (*Strom.* iii. 4, p. 187, Sylb. and *apud Euseb. H. E.* iii. 29; see also Hammond, *Annot.* on Rev. ii. 4), an earlier and more discriminating writer than Epiphanius. He states that Nicolas led a chaste life and brought up his children in purity, that on a certain occasion having been sharply reproved by the apostles as a jealous husband, he repelled the charge by offering to allow his wife to become the wife of any other person, and that he was in the habit of repeating a saying which is ascribed to the apostle Matthias also,—that it is our duty to fight against the flesh and to abuse (παραχρῆσθαι) it. His words were perversely interpreted by the Nicolaitans as an authority for their immoral practices. Theodoret (*Haeret. Fab.* iii. 1), in his account of the sect repeats the foregoing statement of Clement; and charges the Nicolaitans with false dealing in borrowing the name of the deacon. Ignatius,[a] who was contemporary with Nicolas, is said by Stephen Gobar to have given the same account as Clement, Eusebius, and Theodoret, touching the personal character of Nicolas. Among modern critics, Cotelerius in a note on *Constit. Apost.* vi. 8, after reciting the various authorities, seems to lean towards the favourable view of the character of Nicolas. Professor Burton (*Lectures on Ecclesiastical History*, Lect. xii. p. 364, ed. 1833) is of opinion that the origin of the term Nicolaitans is uncertain; and that, "though Nicolas the deacon has been mentioned as their founder, the evidence is extremely slight which would convict that person himself of any immoralities." Tillemont (*H. E.* ii. 47), possibly influenced by the fact that no honour is paid to the memory of Nicolas by any branch of the Church, allows perhaps too much weight to the testimony against him; rejects peremptorily Cassian's statement—to which Neander (*Planting of the Church*, bk. v. p. 390, ed. Bohn) gives his adhesion—that some other Nicolas was the founder of the sect; and concludes that if not the actual founder, he was so unfortunate as to give occasion to the formation of the sect, by his indiscreet speaking. Grotius' view as given in a note on Rev. ii. 6, is substantially the same as that of Tillemont.

The name Balaam is perhaps (but see Gesen. *Thes.* 210) capable of being interpreted as a Hebrew equivalent of the Greek Nicolas. Some commentators think that this is alluded to by St. John in Rev. ii. 14; and C. Vitringa (*Obs. Sacr.* iv. 9) argues forcibly in support of this opinion. [W. T. B.]

NICOP'OLIS (Νικόπολις: *Nicopolis*) is mentioned in Tit. iii. 12, as the place where, at the time of writing the Epistle, St. Paul was intending to pass the coming winter, and where he wished Titus to meet him. Whether either or both of these purposes were accomplished we cannot tell. Titus was at this time in Crete (Tit. i. 5). The subscription to the Epistle assumes that the Apostle was at Nicopolis when he wrote; but we cannot conclude this from the form of expression. We should rather infer that he was elsewhere, possibly at Ephesus or Corinth. He urges that no time should be lost (σπούδασον ἐλθεῖν); hence we conclude that winter was near.

Nothing is to be found in the Epistle itself to determine which Nicopolis is here intended. There were cities of this name in Asia, Africa, and Europe. If we were to include all the theories which have been respectably supported, we should be obliged to write at least three articles. One Nicopolis was in Thrace, near the borders of Macedonia. The subscription (which, however, is of no authority) fixes on this place, calling it the Macedonian Nicopolis: and such is the view of Chrysostom and Theodoret. De Wette's objection to this opinion (*Pastoral Briefe*, p. 21), that the place did not exist till Trajan's reign, appears to be a mistake. Another Nicopolis was in Cilicia; and Schrader (*Der Apostel Paulus*, i. pp. 115-119) pronounces for this; but this opinion is connected with a peculiar theory regarding the Apostle's journeys. We have little doubt that Jerome's view is correct, and that the Pauline Nicopolis was the celebrated city of Epirus ("scribit Apostolus de Nicopoli, quae in Actiaco littore sita," Hieron. *Prooem.* ix. 195). For arrangements of St. Paul's journeys, which will harmonise with this, and with the other facts of the Pastoral Epistles, see Birks, *Horae Apostolicae*, pp. 296-304; and Conybeare and Howson, *Life and Epp. of St. Paul* (2nd ed.), ii. 564-573. It is very possible, as is observed there, that St. Paul was arrested at Nicopolis and taken thence to Rome for his final trial.

This city (the "City of Victory") was built by Augustus in memory of the battle of Actium, and on the ground which his army occupied before the engagement. It is a curious and interesting circumstance, when we look at the matter from a Biblical point of view, that many of the handsomest parts of the town were built by Herod the Great (Joseph. *Ant.* xvi. 5, §3). It is likely enough that many Jews lived there. Moreover, it was conveniently situated for apostolic journeys in the eastern parts of Achaia and Macedonia, and also to the northwards, where churches perhaps were founded. St. Paul had long before preached the Gospel, at least on the confines of Illyricum (Rom. xv. 19), and soon after the very period under consideration Titus himself was sent on a mission to Dalmatia (2 Tim. iv. 10).

Nicopolis was on a peninsula to the west of the bay of Actium, in a low and unhealthy situation, and it is now a very desolate place. The remains have been often described. We may refer to Leake's

[a] Usher conjectures that this reference is to the interpolated copy of the Epistle to the Trallians, ch. xi. (*Ignatii Epistolis* §6. *apud Coteler. Patr. Apost.* ii. 104, ed. 1724.)

Northern Greece, i. 178, and iii. 491 Bowen's *Athos and Epirus*, 211; Wolfe in *Journ. of R. Geog. Soc.* iii. 92; Merivale's *Rome*, iii. 327, 328; Wordsworth's *Greece*, 229-232. In the last mentioned work, and in the *Dict. of Greek and Roman Geog.* maps of the place will be found. [J. S. H.]

NI'GER (Νίγερ: *Niger*) is the additional or distinctive name given to the Symeon (Συμεών), who was one of the teachers and prophets in the Church at Antioch (Acts xiii. 1). He is not known except in that passage. The name was a common one among the Romans; and the conjecture that he was an African proselyte, and was called Niger on account of his complexion, is unnecessary as well as destitute otherwise of any support. His name, Symeon, shows that he was a Jew by birth; and as in other similar cases (*e. g.* Saul, Paul—Silas, Silvanus) he may be supposed to have taken the other name as more convenient in his intercourse with foreigners. He is mentioned second among the five who officiated at Antioch, and perhaps we may infer that he had some pre-eminence among them in point of activity and influence. It is impossible to decide (though Meyer makes the attempt) who of the number were prophets (προφῆται), and who were teachers (διδάσκαλοι). [H. B. H.]

NIGHT. The period of darkness, from sunset to sunrise, including the morning and evening twilight, was known to the Hebrews by the term לַיִל, *layil*, or לַיְלָה, *layĕlâh*. It is opposed to "day," the period of light (Gen. i. 5). Following the Oriental sunset is the brief evening twilight (נֶשֶׁף, *nesheph*, Job xxiv. 15, rendered "night" in Is. v. 11, xxi. 4, lix. 10), when the stars appeared Job iii. 9). This is also called "evening" (עֶרֶב, *'ereb*, Prov. vii. 9, rendered "night" in Gen. xlix. 27, Job vii. 4), but the term which especially denotes the evening twilight is עֲלָטָה, *ălâtâh* (Gen. xv. 17, A. V. "dark;" Ex. xii. 6, 7, 12). *'Ereb* also denotes the time just before sunset (Deut. xxiii. 11; Josh. viii. 29), when the women went to draw water (Gen. xxiv. 11), and the decline of the day is called "the turning of evening" (פְּנוֹת עֶרֶב, *pĕnôth 'ereb*, Gen. xxiv. 63), the time of prayer. This period of the day must also be that which is described as "night" when Boaz winnowed his barley in the evening breeze (Ruth iii. 2), the cool of the day (Gen. iii. 8), when the shadows begin to fall (Jer. vi. 4), and the wolves prowl about (Hab. i. 8; Zeph. iii. 3). The time of midnight (חֲצִי הַלַּיְלָה, *chătsi hallayĕlâh*, Ruth iii. 7, and חֲצוֹת הַלַּיְלָה, *chătsôth hallayĕlâh*, Ex. xi. 4) or greatest darkness is called in Prov. vii. 9 "the pupil of night" (אִישׁוֹן לַיְלָה, *ishôn layĕlâh*, A. V. "black night"). The period between midnight and the morning twilight was generally selected for attacking an enemy by surprise (Judg. vii. 19). The morning twilight is denoted by the same term, *nesheph*, as the evening twilight, and is unmistakeably intended in 1 Sam. xxxi. 12; Job vii. 4; Ps. cxix. 147; possibly also in Is. v. 11. With sunrise the night ended. In one passage, Job xxvi. 10 חֹשֶׁךְ, *chôshec*, "darkness" is rendered "night" in the A. V., but is correctly given in the margin.

For the artificial divisions of the night see the articles DAY and WATCHES. [W. A. W.]

NIGHT-HAWK (תַּחְמָס, *tachmâs*: γλαύξ; *noctua*). Bochart (*Hieroz.* ii. 830) has endeavoured to prove that the Hebrew word, which occurs only (Lev. xi. 16; Deut. xiv. 15) amongst the list of unclean birds, denotes the "male ostrich," the preceding term, *bath-yaănâh*[a] (*owl*, A. V.) signifying the female bird. The etymology of the word points to some bird of prey, though there is great uncertainty as to the particular species indicated. The LXX., Vulg., and perhaps Onkelos, understand some kind of "owl;" most of the Jewish doctors indefinitely render the word "a rapacious bird:" Gesenius (*Thes. s. v.*) and Rosenmüller (*Schol. ad Lev.* xi. 16) follow Bochart. Bochart's explanation is grounded on an overstrained interpretation of the etymology of the verb *châmas*, the root of *tachmâs*; he restricts the meaning of the root to the idea of acting "unjustly" or "deceitfully," and thus comes to the conclusion that the "unjust bird" is the male ostrich [OSTRICH]. Without stopping to consider the etymology of the word further than to refer the reader to Gesenius, who gives as the first meaning of *châmas* "be acted violently," and to the Arabic *chamasa*, "to wound with claws,"[b] it is not at all probable that Moses should have specified both the *male* and *female* ostrich in a list which was no doubt intended to be as comprehensive as possible. The not unfrequent occurrence of the expression "after their kind" is an argument in favour of this assertion. Michaelis believes some kind of swallow (*Hirundo*) is intended: the word used by the Targum of Jonathan is by Kitto (*Pict. Bib.* Lev. xi. 16) and by Oedmann (*Vermisch. Samm.* i. p. 3, c. iv.) referred to the swallow, though the last-named authority says, "it is uncertain, however, what Jonathan really meant." Buxtorf (*Lex. Rabbin.* s. v. חַמְסִיתָא) translates the word used by Jonathan, "a name of a rapacious bird, *harpyia*." It is not easy to see what claim the swallow can have to represent the *tachmâs*, neither is it at all probable that so small a bird should have been noticed in the Levitical law. The rendering of the A. V. rests on no authority, though from the absurd properties which, from the time of Aristotle, have been ascribed to the night-hawk or goat-sucker, and the superstitions connected with this bird, its claim is not so entirely destitute of every kind of evidence.

As the LXX. and Vulg. are agreed that *tachmâs* denotes some kind of owl, we believe it is safer to follow these versions than modern commentators. The Greek γλαύξ is used by Aristotle for some common species of owl, in all probability for the *Strix flammea* (white owl) or the *Syrnium stridula* (tawny owl);[c] the Veneto-Greek reads κόραξ, a synonym of ὄτος, Aristot., *i. e.* the owl *vulgaris*, Flem. (long-eared owl): this is the species which Oedmann (see above) identifies with *tachmâs*.

[a] בַּת־יַעֲנָה.

[b] خمش scalpsit, unguibus vulneravit *faciem*. See Freytag *s. v.*

[c] Not to be confounded with the Nycticorax of modern ornithology, which is a genus of *Ardeidæ* (herons).

"The name," he says, "indicates a bird which exercises power, but the force of the power is in the Arabic root *chamash*, 'to tear a face with claws.' Now, it is well known in the East that there is a species of owl or which people believe that it glides into chambers by night and tears the flesh off the faces of sleeping children." Hasselquist (*Trav.* p. 196, Lond. 1766) alludes to this nightly terror, but he calls it the "Oriental owl" (*Strix Orientalis*) and clearly distinguishes it from the *Strix otus*, Lin. The Arabs in Egypt call this infant-killing owl *massasa*, the Syrians *bana*. It is believed to be identical with the *Syrnium strihula*, out what foundation there may be for the belief in its child-killing propensities we know not. It is probable that some common species of owl is denoted by *tachmás*, perhaps the *Strix flammea* or the *Athene meridionalis*, which is extremely common in Palestine and Egypt. [OWL.] [W. H.]

NILE. 1. *Names of the Nile.*—The Hebrew names of the Nile, excepting one that is of ancient Egyptian origin, all distinguish it from other rivers. With the Hebrews the Euphrates, as the great stream of their primitive home, was always "the river," and even the long sojourn in Egypt could not put the Nile in its place. Most of their geographical terms and ideas are, however, evidently traceable to Canaan, the country of the Hebrew language. Thus the sea, as lying on the west, gave its name to the west quarter. It was only in such an exceptional case as that of the Euphrates, which had no rival in Palestine, that the Hebrews seem to have retained the ideas of their older country. These circumstances lend no support to the idea that the Shemites and their language came originally from Egypt. The Hebrew names of the Nile are *Shichôr*, "the black," a name perhaps of the same sense as Nile; *Yeôr*, "the river," a word originally Egyptian; "the river of Egypt;" "the Nachal of Egypt" (if this appellation designate the Nile, and Nachal be a proper name); and "the rivers of Cush," or "Ethiopia." It must be observed that the word Nile nowhere occurs in the A. V.

(*a.*) *Shichôr*, שִׁיחוֹר, שִׁחוֹר, שִׁחֹר, "the black," from שָׁחַר, "he or it was or became black." The idea of blackness conveyed by this word has, as we should expect in Hebrew, a wide sense, applying not only to the colour of the hair (Lev. xiii. 31, 37), but also to that of a face tanned by the sun (Cant. i. 5,), and that of a skin black through disease (Job xxx.). It seems, however, to be indicative of a very dark colour; for it is said in the Lamentations, as to the famished Nazarites in the besieged city, "Their visage is darker than blackness" (iv. 8). That the Nile is meant by Shihor is evident from its mention as equivalent to *Yeôr*, "the river," and as a great river, where Isaiah says of Tyre, "And by great waters, the sowing of Shihor, the harvest of the river (יְאֹר) [is] her revenue" (xxiii. 3); from its being put as the western boundary of the Promised Land (Josh. xiii. 3; 1 Chr. xiii. 5), instead of "the river of Egypt" (Gen. xv. 18); and from its being spoken of as the great stream of Egypt, just as the Euphrates was of Assyria (Jer. ii. 18). If, but this is by no means certain, the name Nile, Sihor, be really indicative of the colour of the river, it must be compared with the Sanskrit नील:, *Nîlah*, "blue" especially, probably "dark blue," also even "black," as नीलपक:, "black mud," and must be considered to be the Indo-European equivalent of Shihor. The signification "blue" is noteworthy, especially as a great confluent, which most nearly corresponds to the Nile in Egypt, is called the Blue River, or, by Europeans, the Blue Nile.

(*b.*) *Yeôr*, יְאוֹר, יְאֹר, is the same as the ancient Egyptian ATUR, AUR, and the Coptic ЄІЄРО, ІАРО, ІАРѠ (M), ІЄРО (S). It is important to notice that the second form of the ancient Egyptian name alone is preserved in the later language, the second radical of the first having been lost, as in the Hebrew form; so that, on this double evidence, it is probable that this commoner form was in use among the people from early times. *Yeôr*, in the singular, is used of the Nile alone, excepting in a passage in Daniel (xii. 5, 6, 7), where another river, perhaps the Tigris (comp. x. 4), is intended by it. In the plural, יְאֹרִים, this name is applied to the branches and canals of the Nile (Ps. lxxviii. 44; Ezek. xxix. 3, seqq., xxx. 12), and perhaps tributaries also, with, in some places, the addition of the names of the country, Mitsraim, Matsor, יְאֹרֵי מְצָרַיִם (Is. vii. 18, A. V. "rivers of Egypt"), יְאוֹרֵי מָצוֹר (xix. 6, "brooks of defence;" xxxvii. 25,[a] "rivers of the besieged places"); but it is also used of streams or channels, in a general sense, when no particular ones are indicated (see Is. xxxiii. 21; Job xxviii. 10). It is thus evident that this name specially designates the Nile; and although properly meaning a river, and even used with that signification, it is probably to be regarded as a proper name when applied to the Egyptian river. The latter inference may perhaps be drawn from the constant mention of the Euphrates as "the river;" but it is to be observed that Shihor, or "the river of Egypt," is used when the Nile and the Euphrates are spoken of together, as though *Yeôr* could not be well employed for the former, with the ordinary term for river, *nâhâr*, for the latter.[b]

(*c.*) "The river of Egypt," נְהַר מִצְרַיִם, is mentioned with the Euphrates in the promise of the extent of the land to be given to Abraham's posterity, the two limits of which were to be "the river of Egypt" and "the great river, the river Euphrates" (Gen. xv. 18).

(*d.*) "The Nachal of Egypt," נַחַל מִצְרַיִם, has generally been understood to mean "the torrent" or "brook of Egypt," and to designate a desert stream at Rhinocorura, now El-'Areesh, on the eastern border. Certainly נַחַל usually signifies a stream or torrent, not a river; and when a river, one of small size, and dependent upon mountain-rain or snow; but as it is also used for a valley, corresponding to the Arabic *wâdee* (وادي), which is in like manner employed in both senses, it may apply like it, in the case of

[a] In Is. xxxvii. 25 the reference seems to be to an Assyrian conquest of Egypt.

[b] The Nile was probably mentioned by this name in the original of Ecclesiasticus xxiv. 27, where the Greek text reads ὡς φῶς, פָּאֹר having been misunderstood (Gesenius, *Thes.* s. v.).

the Guadalquivir, &c., to great rivers. This name must signify the Nile, for it occurs in cases parallel to those where Shihor is employed (Num. xxxiv. 5, Josh. xv. 4, 47, 1 K. viii. 65, 2 K. xxiv. 7, Is. xxvii. 12), both designating the easternmost or Pelusiac branch of the river as the border of the Philistine territory, where the Egyptians equally put the border of their country towards Kanaan or Kanana (Canaan). It remains for us to decide whether the name signify the "brook of Egypt," or whether Nachal be a Hebrew form of Nile. On the one side may be urged the unlikelihood that the middle radical should not be found in the Indo-European equivalents, although it is not one of the most permanent letters; on the other, that it is improbable that *nahar* "river" and *nachal* "brook" would be used for the same stream. If the latter be here a proper name, Νεῖλος must be supposed to be the same word; and the meaning of the Greek as well as the Hebrew name would remain doubtful, for we could not then positively decide on an Indo-European signification. The Hebrew word *nachal* might have been adopted as very similar in sound to an original proper name; and this idea is supported by the forms of various Egyptian words in the Bible, which are susceptible of Hebrew etymologies in consequence of a slight change. It must, however, be remembered that there are traces of a Semitic language, apparently distinct from Hebrew, in geographical names in the east of Lower Egypt, probably dating from the Shepherd-period; and therefore we must not, if we take *nachal* to be here Semitic, restrict its meaning to that which it bears or could bear in Hebrew.

(*e.*) "The rivers of Cush," נַהֲרֵי כוּשׁ, are alone mentioned in the extremely difficult prophecy contained in Is. xviii. From the use of the plural, a single stream cannot be meant, and we must suppose "the rivers of Ethiopia" to be the confluents or tributaries of the Nile. Gesenius (*Lex.* s. v. נָהָר) makes them the Nile and the Astaboras. Without attempting to explain this prophecy, it is interesting to remark that the expression, "Whose land the rivers have spoiled" (vers. 2, 7), if it apply to any Ethiopian nation, may refer to the ruin of great part of Ethiopia, for a long distance above the First Cataract, in consequence of the fall of the level of the river. This change has been effected through the breaking down of a barrier at that cataract, or at Silsilis, by which the valley has been placed above the reach of the fertilizing annual deposit. The Nile is sometimes poetically called a sea, יָם (Is. xviii. 2; Nah. iii. 8; Job xli. 31; but we cannot agree with Gesenius, *Thes.* s. v., that it is intended in Is. xix. 5): this, however, can scarcely be considered to be one of its names.

It will be instructive to mention the present appellations of the Nile in Arabic, which may illustrate the Scripture terms. By the Arabs it is called Bahr-en-Neel, "the river Nile," the word "bahr" being applied to seas and the greatest rivers. The Egyptians call it Bahr, or "the river" alone; and call the inundation En-Neel, or "the Nile." This latter use of what is properly a name of the river resembles the use of the plural of *Yeôr* in the Bible for the various channels or even streams of Nile-water.

With the ancient Egyptians, the river was sacred, and had, besides its ordinary name already given, a sacred name, under which it was worshipped, HAPEE, or HAPEE-MU, "the abyss," or "the abyss of waters," or "the hidden." Corresponding to the two regions of Egypt, the Upper Country and the Lower, the Nile was called HAPEE-RES, "the Southern Nile," and HAPEE-MEHEET, "the Northern Nile," the former name applying to the river in Nubia as well as in Upper Egypt. The god Nile was one of the lesser divinities. He is represented as a stout man having woman's breasts, and is sometimes painted red to denote the river during its rise and inundation, or High Nile, and sometimes blue, to denote it during the rest of the year, or Low Nile. Two figures of HAPEE are frequently represented on each side of the throne of a royal statue, or in the same place in a bas-relief, binding it with water-plants, as though the prosperity of the kingdom depended upon the produce of the river. The name HAPEE, perhaps, in these cases, HEPEE, was also applied to one of the four children of Osiris, called by Egyptologers the genii of AMENT or Hades, and to the bull Apis, the most revered of all the sacred animals. The genius does not seem to have any connection with the river, excepting indeed that Apis was sacred to Osiris. Apis was worshipped with a reference to the inundation, perhaps because the myth of Osiris, the conflict of good and evil, was supposed to be represented by the struggle of the fertilizing river or inundation with the desert and the sea, the first threatening the whole valley, and the second wasting it along the northern coast.

2. *Description of the Nile.*—We cannot as yet determine the length of the Nile, although recent discoveries have narrowed the question. There is scarcely a doubt that its largest confluent is fed by the great lakes on and south of the equator. It has been traced upwards for about 2700 miles, measured by its course, not in a direct line, and its extent is probably upwards of 1000 miles more, making it longer than even the Mississippi, and the largest of rivers. In Egypt and Nubia it flows through a bed of silt and slime, resting upon marine or nummulitic limestone, covered by a later formation, over which, without the valley, lie the sand and rocky *débris* of the desert. Beneath the limestone is a sandstone formation, which rises and bounds the valley in its stead in the higher part of the Thebaid. Again beneath the sandstone is the breccia rock, which appears above it in the desert eastward of Thebes, and yet lower a group of ancient rocks, gneisses, quartzes, mica schists, and clay slate, resting upon the red granite and syenite that rise through all the upper strata at the First Cataract. The river's bed is cut through these layers of rock, which often approach it on either side, and sometimes confine it on both sides, and even obstruct its course, forming rapids and cataracts. To trace it downwards we must first go to equatorial Africa, the mysterious half-explored home of the negroes, where animal and vegetable life flourishes around and in the vast swamp-land that waters the chief part of the continent. Here are two great shallow lakes, one nearer to the coast than the other. From the more eastern (the Uherewe, which is at the equator), a chief tributary of the White Nile probably takes its rise, and the more western (the Ujeejee), may feed another tributary. These lakes are filled, partly by the heavy rains of the equatorial region, partly by the melting of the snows of the

[a] The geology of the Nile-valley is excellently given by Hugh Miller (*Testimony of the Rocks*, p. 468, seqq.).

lofty mountains discovered by the missionaries Krapf and Rebmann. Whether the lakes supply two tributaries or not, it is certain that from the great region of waters where they lie, several streams fall into the Bahr el-Abyad, or White Nile. Great, however, as is the body of water of this the longer of the two chief confluents, it is the shorter, the Bahr el-Azrak, or Blue River, which brings down the alluvial soil that makes the Nile the great fertiliser of Egypt and Nubia. The Bahr el-Azrak rises in the mountains of Abyssinia, and carries down from them a great quantity of decayed vegetable matter and alluvium. The two streams form a junction at Khartoom, now the seat of government of Soodán, or the Black Country under Egyptian rule. The Bahr el-Azrak is here a narrow river, with high steep mud-banks like those of the Nile in Egypt, and with water of the same colour; and the Bahr el-Abyad is broad and shallow, with low banks and clear water. Further to the north another great river, the Atbara, rising, like the Bahr el-Azrak, in Abyssinia, falls into the main stream, which, for the remainder of its course, does not receive one tributary more. Throughout the rest of the valley the Nile does not greatly vary, excepting that in Lower Nubia, through the fall of its level by the giving way of a barrier in ancient times, it does not inundate the valley on either hand. From time to time its course is impeded by cataracts or rapids, sometimes extending many miles, until, at the First Cataract, the boundary of Egypt, it surmounts the last obstacle. After a course of about 550 miles, at a short distance below Cairo and the Pyramids, the river parts into two great branches, which water the Delta, nearly forming its boundaries to the east and west, and flowing into the shallow Mediterranean. The references in the Bible are mainly to the characteristics of the river in Egypt. There, above the Delta, its average breadth may be put at from half a mile to three-quarters, excepting where large islands increase the distance. In the Delta its branches are usually narrower. The water is extremely sweet, especially at the season when it is turbid. It is said by the people that those who have drunk of it and left the country must return to drink of it again.

The great annual phenomenon of the Nile is the inundation, the failure of which produces a famine, for Egypt is virtually without rain (see Zech. xiv. 17, 18). The country is therefore devoid of the constant changes which make the husbandmen of other lands look always for the providential care of God. "For the land, whither thou goest in to possess it, [is] not as the land of Egypt, from whence ye came out, where thou sowedst thy seed, and wateredst [it] with thy foot, as a garden of herbs: but the land, whither ye go to possess it, [is] a land of hills and valleys, [and] drinketh water of the rain of heaven: a land which the LORD thy God careth for: the eyes of the LORD thy God [are] always upon it, from the beginning of the year even unto the end of the year" (Deut. xi. 10-12). At Khartoom the increase of the river is observed early in April, but in Egypt the first signs of rising occur about the summer solstice, and generally the regular increase does not begin until some days after, the inundation commencing about two months after the solstice. The river then pours, through canals and cuttings in the banks, which are a little higher than the rest of the soil, over the valley, which it covers with sheets of water. It attains to its greatest height about, or not long after, the autumnal equinox, and then falling more slowly than it had risen sinks to its lowest point at the end of nine months, there remaining stationary for a few days before it again begins to rise. The inundations are very various, and when they are but a few feet deficient or excessive cause great damage and distress. The rise during a good inundation is about 40 feet at the First Cataract, about 36 at Thebes, and about 4 at the Rosetta and Damietta mouths. If the river at Cairo attain to no greater height than 18 or 20 feet, the rise is scanty; if only to 2 or 4 more, insufficient, if to 24 feet or more, up to 27, good; if to a greater height, it causes a flood. Sometimes the inundation has failed altogether, as for seven years in the reign of the Fâtimee Khaleefeh El-Mustansir bi-lláh, when there was a seven years' famine; and this must have been the case with the great famine of Joseph's time, to which this later one is a remarkable parallel [FAMINE]. Low inundations always cause dearths; excessive inundations produce or foster the plague and murrain, besides doing great injury to the crops. In ancient times, when every square foot of ground must have been cultivated, and a minute system of irrigation maintained, both for the natural inundation and to water the fields during the Low Nile, and when there were many fish-pools as well as canals for their supply, far greater ruin than now must have been caused by excessive inundations. It was probably to them that the priest referred, who told Solon, when he asked if the Egyptians had experienced a flood, that there had been many floods, instead of the one of which he had spoken, and not to the successive past destructions of the world by water, alternating with others by fire, in which some nations of antiquity believed (Plat. *Timaeus*, 21 seqq.).

The Nile in Egypt is always charged with alluvium, especially during the inundation; but the annual deposit, excepting under extraordinary circumstances, is very small in comparison with what would be conjectured by any one unacquainted with subjects of this nature. Inquirers have come to different results as to the rate, but the discrepancy does not generally exceed an inch in a century. The ordinary average increase of the soil in Egypt is about four inches and a half in a century. The cultivable soil of Egypt is wholly the deposit of the Nile, but it is obviously impossible to calculate, from its present depth, when the river first began to flow in the rocky bed now so deeply covered with the rich alluvium. An attempt has however been made to use geology as an aid to history, by first endeavouring to ascertain the rate of increase of the soil, then digging for indications of man's existence in the country, and lastly applying to the depth at which any such remains might be discovered the scale previously obtained. In this manner Mr. Horner (*Phil. Transactions*, vol. 148), when his labourers had found, or pretended to find, a piece of pottery at a great depth on the site of Memphis, argued that man must have lived there, and not in the lowest state of barbarism, about 13,000 years ago. He however entirely disregarded various causes by which an object could have been deposited at such a depth, as the existence of canals and wells, from the latter of which water could be anciently as now drawn up in earthen pots from a very low level, and the occurrence of fissures in the earth. He formed his scale on the supposition that the ancient Egyptians placed a great statue before the principal temple of Memphis in such a position that the inundation each year reached its base, whereas

we know that they were very careful to put all their stone works where they thought they would be out of the reach of its injurious influence; and, what is still more serious, he laid stress upon the discovery of burnt brick even lower than the piece of pottery, being unaware that there is no evidence that the Egyptians in early times used any but crude brick, a burnt brick being as sure a record of the Roman dominion as an imperial coin. It is important to mention this extraordinary mistake, as it was accepted as a correct result by the late Baron Bunsen, and urged by him and others as a proof of the great antiquity of man in Egypt (*Quarterly Review*, Apr. 1859, No. cex.; *Modern Egyptians*, 5th ed., note by Ed., p. 593 seqq.).

In Upper Egypt the Nile is a very broad stream, flowing rapidly between high, steep mud-banks, which are scarped by the constant rush of the water, which from time to time washes portions away, and stratified by the regular deposit. On either side rise the bare yellow mountains, usually a few hundred feet high, rarely a thousand, looking from the river like cliffs, and often honeycombed with the entrances of the tombs which make Egypt one great city of the dead, so that we can understand the meaning of that murmur of the Israelites to Moses, "Because [there were] no graves in Egypt, hast thou taken us away to die in the wilderness?' (Ex. xiv. 11). Frequently the mountain on either side approaches the river in a rounded promontory, against whose base the restless stream washes, and then retreats and leaves a broad bay-like valley, bounded by a rocky curve. Rarely both mountains confine the river in a narrow bed, rising steeply on either side from a deep rock-cut channel through which the water pours with a rapid current. Perhaps there is a remote allusion to the rocky channels of the Nile, and especially to its primaeval bed wholly of bare rock, in that passage of Job where the plural of Yeor is used. "He cutteth out rivers (יְאֹרִים) among the rocks, and his eye seeth every precious thing. He bindeth the floods from overflowing" (xxviii. 10, 11). It must be recollected that there are allusions to Egypt, and especially to its animals and products, in this book, so that the Nile may well be here referred to, if the passage do not distinctly mention it. In Lower Egypt the chief differences are that the view is spread out in one rich plain, only bounded on the east and west by the desert, of which the edge is low and sandy, unlike the mountains above, though essentially the same, and that the two branches of the river are narrower than the undivided stream. On either bank, during Low Nile, extend fields of corn and barley, and near the river-side stretch long groves of palm-trees. The villages rise from the level plain, standing upon mounds, often ancient sites, and surrounded by palm-groves, and yet higher dark-brown mounds mark where of old stood towns, with which often "their memorial is perished" (Ps. ix. 6). The villages are connected by dykes, along which pass the chief roads. During the inundation the whole valley and plain is covered with sheets of water, above which rise the villages like islands, only to be reached along the half-ruined dykes. The aspect of the country is as though it were overflowed by a destructive flood, while between its banks, here and there broken through and constantly giving way, rushes a vast turbid stream, against which no boat could make its way, excepting by tacking, were it not for the north wind that blows ceaselessly during the season of the inundation, making the river seem more powerful as it beats it into waves. The prophets more than once allude to this striking condition of the Nile. Jeremiah says of Pharaoh-Necho's army, "Who [is] this [that] cometh up as the Nile [Yeor], whose waters are moved as the rivers? Egypt riseth up like the Nile, and [his] waters are moved like the rivers; and he saith, I will go up, [and] will cover the land; I will destroy the city and the inhabitants thereof" (xlvi. 7, 8). Again, the prophecy "against the Philistines, before that Pharaoh smote Gaza," commences, "Thus saith the LORD; Behold, waters rise up out of the north, and shall be as an overflowing stream (*nachal*),[a] and shall overflow the land, and all that is therein; the city, and them that dwell therein" (xlvii. 1, 2). Amos, also, a prophet who especially refers to Egypt, uses the inundation of the Nile as a type of the utter desolation of his country. "The LORD hath sworn by the excellency of Jacob, Surely I will never forget any of their works. Shall not the land tremble for this, and every one mourn that dwelleth therein? and it shall rise up wholly as the Nile (כְּאֹר); and it shall be cast out and drowned, as [by] the Nile (כִּיְאוֹר מִצְרָיִם) of Egypt" (viii. 7, 8; see ix. 5).

The banks of the river are enlivened by the women who come down to draw water, and, like Pharaoh's daughter, to bathe, and the herds of kine and buffaloes which are driven down to drink and wash, or to graze on the grass of the swamps, like the good kine that Pharaoh saw in his dream as "he stood by the river," which were "coming up out of the river," and "fed in the marsh-grass" (Gen. xli. 1, 2).

The river itself abounds in fish, which anciently formed a chief means of sustenance to the inhabitants of the country. Perhaps, as has been acutely remarked in another article, Jacob, when blessing Ephraim and Manasseh, used for their multiplying the term דָּגָה (Gen. xlviii. 16), which is connected with דָּג, a fish, though it does not seem certain which is the primitive; as though he had been struck by the abundance of fish in the Nile or the canals and pools fed by it. [MANASSEH, p. 2158.] The Israelites in the desert looked back with regret to the fish of Egypt: "We remember the fish, which we did eat in Egypt freely" (Num. xi. 5). In the Thebaïs crocodiles are found, and during Low Nile they may be seen basking in the sun upon the sand-banks. The crocodile is constantly spoken of in the Bible as the emblem of Pharaoh, especially in the prophecies of Ezekiel. [EGYPT, vol. i. p. 5[illegible].]

The great difference between the Nile of Egypt at the present day and in ancient times is caused by the failure of some of its branches, and the ceasing of some of its chief vegetable products; and the chief change in the aspect of the cultivable land, dependent on the Nile, is the result of the ruin of the fish-pools and their conduits, and the consequent decline of the fisheries. The river was famous for its seven branches, and under the Roman dominion eleven were counted, of which, however, three were but seven principal ones. Herodotus indeed that there were seven, of which he says that two the present Damietta and Rosetta branches, were originally artificial, and he therefore speaks

[a] The use of "*nachal*" here affords a strong argument in favour of the opinion that it is applied to the Nile.

"the five mouths" (ii. 10). Now, as for a long period past, there are no navigable and unobstructed branches but these two that Herodotus distinguishes as in origin works of man. This change was prophesied by Isaiah: "And the waters shall fail from the sea, and the river shall be wasted and dried up" (xix. 5). Perhaps the same prophet, in yet more precise words, predicts this, where he says, "And the LORD shall utterly destroy the tongue of the Egyptian sea; and with his mighty wind shall he shake his hand over the river, and shall smite it in the [or 'into'] seven streams, and make [men] go over dryshod ['in shoes']" (xi. 15). However, from the context, and a parallel passage in Zechariah (x. 10, 11), it seems probable that the Euphrates is intended in this passage by "the river." Ezekiel also prophesies of Egypt that the Lord would "make the rivers drought" (xxx. 12), here evidently referring to either the branches or canals of the Nile. In exact fulfilment of these prophecies the bed of the highest part of the Gulf of Suez has dried, and all the streams of the Nile, excepting those which Herodotus says were originally artificial, have wasted, so that they can be crossed without fording.

The monuments and the narratives of ancient writers show us in the Nile of Egypt in old times, a stream bordered by flags and reeds, the covert of abundant wild-fowl, and bearing on its waters the fragrant flowers of the various-coloured lotus. Now, in Egypt scarcely any reeds or water-plants—the famous papyrus being nearly if not quite extinct, and the lotus almost unknown—are to be seen, excepting in the marshes near the Mediterranean. This also was prophesied by Isaiah: "The papyrus-reeds (עָרוֹת) in the river (יְאֹר), on the edge of the river, and everything growing [lit. "sown"] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix. 7). When it is recollected that the water-plants of Egypt were so abundant as to be a great source of revenue in the prophet's time, and much later, the exact fulfilment of his predictions is a valuable evidence of the truth of the old opinion as to "the sure word of prophecy." The failure of the fisheries is also foretold by Isaiah (xix. 8, 10), and although this was no doubt a natural result of the wasting of the river and streams, its cause could not have been anticipated by human wisdom. Having once been very productive, and a main source of revenue as well as of sustenance, the fisheries are now scarcely of any moment, excepting about Lake Menzeleh, and in some few places elsewhere, chiefly in the north of Egypt.

Of old the great river must have shewn a more fair and busy scene than now. Boats of many kinds were ever passing along it, by the painted walls of temples, and the gardens that extended around the light summer pavilions, from the pleasure-galley, with one great square sail, white or with variegated pattern, and many oars, to the little papyrus skiff, floating on the water, and carrying the seekers of pleasure where they could shoot with arrows, or knock down with the throw-stick, the wild-fowl that abounded among the reeds, or engage in the dangerous chase of the hippopotamus or the crocodile. In the Bible the papyrus-boats are mentioned; and they are shewn to have been used for their swiftness to carry tidings to Ethiopia (Is. xviii. 2).

The great river is constantly before us in the history of Israel in Egypt. Into it the male children were cast; in it, or rather in some canal or pool, was the ark of Moses put, and found by Pharaoh's daughter when she went down to bathe. When the plagues were sent, the sacred river—a main support of the people—and its waters everywhere were turned into blood. [PLAGUES OF EGYPT.]

The prophets not only tell us of the future of the Nile; they speak of it as it was in their days. Ezekiel likens Pharaoh to a crocodile, fearing no one in the midst of his river, yet dragged forth with the fish of his rivers, and left to perish in the wilderness (xxix. 1-5; comp. xxxii. 1-6). Nahum thus speaks of the Nile, when he warns Nineveh by the ruin of Thebes: "Art thou better than No-Amon, that was situate among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall [was] from the sea?" (iii. 8). Here the river is spoken of as the rampart, and perhaps as the support of the capital, and the situation, most remarkable in Egypt, of the city on the two banks is indicated [NO-AMON]. But still more striking than this description is the use which we have already noticed of the inundation, as a figure of the Egyptian armies, and also of the coming of utter destruction, probably by an invading force.

In the New Testament there is no mention of the Nile. Tradition says that when Our Lord was brought into Egypt, His mother came to Heliopolis, [ON.] If so, He may have dwelt in His childhood by the side of the ancient river which witnessed so many events of sacred history, perhaps the coming of Abraham, certainly the rule of Joseph, and the long oppression and deliverance of Israel their posterity. [R. S. P.]

NIM'RAH (נִמְרָה: Νάμβρα; Alex. Αμβραμ *Nemra*), a place mentioned, by this name, in Num. xxxii. 3 only, among those which formed the districts of the "land of Jazer and the land of Gilead," on the east of Jordan, petitioned for by Reuben and Gad. It would appear from this passage to have been near Jazer and Heshbon, and therefore on the upper level of the country. If it is the same as BETH-NIMRAH (ver. 36) it belonged to the tribe of Gad. By Eusebius, however (*Onomast.* Νεβρά), it is cited as a "city of Reuben in Gilead," and said to have been in his day a very large place (κώμη μεγίστη) in [a] Batanaea, bearing the name of Abara. This account is full of difficulties, for Reuben never possessed the country of Gilead, and Batanaea was situated several days' journey to the N.W. of the district of Heshbon, beyond not only the territory of Reuben, but even that of Gad. A wady and a town, both called *Nimreh*, have, however, been met with in *Betheniyeh*, east of the *Lejah*, and five miles N.W. of *Kunawât* (see the maps of Porter, Van de Velde, and Wetzstein). On the other hand the name of *Nimrin* is said to be attached to a watercourse and a site of ruins in the Jordan valley, a couple of miles east of the river, at the embouchure of the *Wady Shoaib*. [BETH-NIMRAH.] But this again is too far from Heshbon in the other direction.

The name *Nimr* ("panther") appears to be a common one on the east of Jordan, and it must be left to future explorers (when exploration in that region becomes possible) to ascertain which (if either) of the places so named is the Nimrah in question. [G.]

NIM'RIM, THE WATERS OF (מֵי נִמְרִים: in Is. τὸ ὕδωρ τῆς Νεμηρείμ, Alex. τῆς Νεμρειμ;

[a] The present Greek text has Καναναια; but the correction is obvious.

in Jer. τὸ ὕδωρ Νεβρείν, Alex. Νεβρειμ: *Aquae Nemrim*), a stream or brook (not improbably a stream with pools) within the country of Moab, which is mentioned in the denunciations of that nation uttered, or quoted, by Isaiah (xv. 6) and Jeremiah (xlviii. 34). From the former of these passages it appears to have been famed for the abundance of its grass.

If the view taken of these denunciations under the head of MOAB (p. 392, 6) be correct, we should look for the site of Nimrim in Moab proper, *i. e.* on the south-eastern shoulder of the Dead Sea, a position which agrees well with the mention of the "brook of the willows" (perhaps *Wady Beni Hammed*) and the "borders of Moab," that is, the range of hills encircling Moab at the lower part of the territory.

A name resembling Nimrim still exists at the south-eastern end of the Dead Sea, in the *Wady en-Nemeirah* and *Burj en-Nemeirah*, which are situated on the beach, about half-way between the southern extremity and the promontory of *el-Lissan* (De Saulcy, *Voyage*, i. 284, &c.; Seetzen, ii. 354). Eusebius (*Onom.* Νεκηρίμ) places it N. of Soora, *i. e.* Zoar. How far the situation of *en-Nemeirah* corresponds with the statement of Eusebius cannot be known until that of Zoar is ascertained. If the *Wady en-Nemeirah* really occupies the place of the waters of Nimrim, Zoar must have been considerably further south than is usually supposed. On the other hand the name[b] is a common one in the transjordanic localities, and other instances of its occurrence may yet be discovered more in accordance with the ancient statements. [G.]

NIM'ROD (נִמְרֹד: Νεβρώδ: *Nemrod*), a son of Cush and grandson of Ham. The events of his life are recorded in a passage (Gen. x. 8 ff.) which, from the conciseness of its language, is involved in considerable uncertainty. We may notice, in the first place, the terms in ver. 8. 9, rendered in the A. V. "mighty" and "mighty hunter before the Lord." The idea of any moral qualities being conveyed by these expressions may be at once rejected; for, on the one hand, the words "before the Lord" are a mere superlative adjunct (as in the parallel expression in Jon. iii. 3), and contain no notion of Divine approval; and, on the other hand, the ideas of violence and insolence with which tradition invested the character of the hero, as delineated by Josephus[c] (*Ant.* i. 4, §2), are not necessarily involved in the Hebrew words, though the term *gibbôr*[d] is occasionally taken in a bad sense (*e. g.* Ps. lii. 1). The term may be regarded as betokening personal prowess with the accessory notion of gigantic stature (as in the LXX. γίγας). It is somewhat doubtful whether the prowess of Nimrod rested on his achievements as a hunter or as a conqueror. The literal rendering of the Hebrew words would undoubtedly apply to the former, but they may be regarded as a translation of a proverbial expression originally current in the land of Nimrod, where the terms significant of "hunter" and "hunting" appear to have been applied to the forays of the sovereigns against the surrounding nations.[e] The two phases of prowess, hunting and conquering, may indeed well have been combined in the same person in a rude age, and the Assyrian monuments abound with scenes which exhibit the skill of the sovereigns in the chase. But the context certainly favours the special application of the term to the case of conquest, for otherwise the assertion in ver. 8, "he began to be a mighty one in the earth," is devoid of point—while, taken as introductory to what follows, it seems to indicate Nimrod as the first who, after the flood, established a powerful empire on the earth the limits of which are afterwards defined. The next point to be noticed is the expression in ver. 10, "The beginning of his kingdom," taken in connexion with the commencement of ver. 11, which admits of the double sense: "Out of that land went forth Asshur," as in the text of the A. V., and "out of that land he went forth to Assyria," as in the margin. These two passages mutually react on each other; for if the words "beginning of his kingdom" mean, as we believe to be the case, "his *first* kingdom," or, as Gesenius (*Thes.* p. 1252) renders it "the territory of which it was at first composed," then the expression implies a subsequent extension of his kingdom, in other words, that "he went forth to Assyria." If, however, the sense of ver. 11 be, "out of that land went forth Asshur," then no other sense can be given to ver. 10 than that "the capital of his kingdom was Babylon," though the expression must be equally applied to the towns subsequently mentioned. This rendering appears untenable in all respects, and the expression may therefore be cited in support of the marginal rendering of ver. 11. With regard to the latter passage, either sense is permissible in point of grammatical construction, for the omission of the local affix to the word Asshur, which forms the chief objection to the marginal rendering, is not peculiar to this passage (comp. 1 K. xi. 17; 2 K. xv. 14), nor is it necessary even to assume a *prolepsis* in the

[b] A racy and characteristic passage, aimed at the *doctrina haereticorum*, and playing on the name as signifying a leopard, will be found in Jerome's Commentary on Is. xv. 6.

[c] The view of Nimrod's character taken by this writer originated partly perhaps in a false etymology of the name, as though it were connected with the Hebrew root *mârad* (מָרַד), "to rebel," and partly from the supposed connexion of the hero's history with the building of the tower of Babel. There is no ground for the first of these assumptions: the name is either Cushite or Assyrian. Nor, again, does the Bible connect Nimrod with the building of the tower; for it only states that Babel formed one of his capitals. Indications have, indeed, been noticed by Bunsen (*Bibelwerk*, v. 74) of a connexion between the two narratives; they have undoubtedly a common Jehovistic character; but the point on which he lays most stress (the expression in i. 2, "from the east," or "eastward" is in reality worthless for the purpose. The influence of the view taken by Josephus is curiously developed in the identification of Nimrod with the constellation Orion, the Hebrew name *cesil* (כְּסִיל), "foolish," being regarded as synonymous with Nimrod, and the giant form of Orion, together with its Arabic name, "the giant," supplying another connecting link. Josephus follows the LXX. in his form of the name, Νεβρώδης. The variation in the LXX. is of no real importance, as it may be paralleled by a similar exchange of β for מ in the case of Sabtah (Gen. x. 7; 1 Ch. i. 47), and, in a measure, by the insertion of the β before the liquids in other cases, such as Μαμβρῆ (Gen. xiv. 13). The variation hardly deserves the attention it has received in Rawlinson's *Herod.* i. 596.

[d] גִּבּוֹר.

[e] Tiglath-pileser I., for instance, is described as one that "pursues after" or "hunts the people of Bilin-Bagai." So also of other kings (Rawlinson's *Herod.* i. 597.)

application of the term Asshur to the land of Assyria at the time of Nimrod's invasion, inasmuch as the historical date of this event may be considerably later than the genealogical statement would imply. Authorities both ancient and modern are divided on the subject, but the most weighty names of modern times support the marginal rendering, as it seems best to accord with historical truth. The unity of the passage is moreover supported by its peculiarities both of style and matter. It does not seem to have formed part of the original genealogical statement but to be an interpolation of a later date;[f] it is the only instance in which personal characteristics are attributed to any of the names mentioned; the proverbial expression which it embodies bespeaks its traditional and fragmentary character, and there is nothing to connect the passage either with what precedes or with what follows it. Such a fragmentary record, though natural in reference to a single mighty hero, would hardly admit of the introduction of references to others. The only subsequent notice of the name Nimrod occurs in Mic. v. 6, where the "land of Nimrod" is a synonym either for Assyria, just before mentioned, or for Babylonia.

The chief events in the life of Nimrod, then, are (1) that he was a Cushite; (2) that he established an empire in Shinar (the classical Babylonia), the chief towns being Babel, Erech, Accad, and Calneh; and (3) that he extended this empire northwards along the course of the Tigris over Assyria, where he founded a second group of capitals, Nineveh, Rehoboth, Calah, and Resen. These events correspond to and may be held to represent the salient historical facts connected with the earliest stages of the great Babylonian empire. 1. In the first place, there is abundant evidence that the race that first held sway in the lower Babylonian plain was of Cushite or Hamitic extraction. Tradition assigned to Belus, the mythical founder of Babylon, an Egyptian origin, inasmuch as it described him as the son of Poseidon and Libya (Diod. Sicul. i. 28; Apollodor. ii. 1, §4; Pausan. iv. 23, §5); the astrological system of Babylon (Diod. Sicul. i. 81) and perhaps its religious rites (Hestiæus[g] ap. Joseph. *Ant.* i. 4, §3) were referred to the same quarter; and the legend of Oannes, the great teacher of Babylon, rising out of the Erythræan sea, preserved by Syncellus (*Chronogr.* p. 28), points in the same direction. The name Cush itself was preserved in Babylonia and the adjacent countries under the forms of Cossæi, Cissia, Cuthah, and Susiana or *Chuzistan*. The earliest written language of Babylonia, as known to us from existing inscriptions, bears a strong resemblance to that of Egypt and Ethiopia, and the same words have been found in each country, as in the case of *Mirikh*, the Meroë of Ethiopia, the Mars of Babylonia (Rawlinson, i. 442). Even the name Nimrod appears in the list of the Egyptian kings of the 22nd dynasty, but there are reasons for thinking that dynasty to have been of Assyrian extraction. Putting the above-mentioned considerations together, they leave no doubt as to the connexion between the ancient Babylonians and the Ethiopian or Egyptian stock (respectively the Nimrod and the Cush of the Mosaic table). More than this cannot be fairly inferred from the data, and we must therefore withhold our assent from Bunsen's view (*Bibelwerk*, v. 39) that the Cushite origin of Nimrod betokens the westward progress of the Scythian or Turanian races from the countries eastward of Babylonia; for, though branches of the Cushite family (such as the Cossæi) had pressed forward to the east of the Tigris, and though the early language of Babylonia bears in its structure a Scythic or Turanian character, yet both these features are susceptible of explanation in connexion with the original eastward progress of the Cushite race.

2. In the second place, the earliest seat of empire was in the south part of the Babylonian plain. The large mounds, which for a vast number of centuries have covered the ruins of ancient cities, have already yielded some evidences of the dates and names of their founders, and we can assign the highest antiquity to the towns represented by the mounds of *Niffer* (perhaps the early Babel, though also identified with Calneh), *Warka* (the Biblical Erech), *Mugheir* (Ur), and *Senkereh* (Ellasar), while the name of Accad is preserved in the title *Kinzi-Akkad*, by which the founder or embellisher of those towns was distinguished (Rawlinson, i. 435). The date of their foundation may be placed at about B.C. 2200. We may remark the coincidence between the quadruple groups of capitals noticed in the Bible, and the title *Kiprat* or *Kiprat-arba*, assumed by the early kings of Babylon and supposed to mean "four races" (Rawlinson, i. 438, 447).

3. In the third place, the Babylonian empire extended its sway northwards along the course of the Tigris at a period long anterior to the rise of the Assyrian empire in the 13th century B.C. We have indications of this extension as early as about 1860 when Shamas-Iva, the son of Ismi-dagon king of Babylon founded a temple at *Kileh-shergat* (supposed to be the ancient Asshur). The existence of Nineveh itself can be traced up by the aid of Egyptian monuments to about the middle of the 15th century B.C., and though the historical name of its founder is lost to us, yet tradition mentions a Belus as king of Nineveh at a period anterior to that assigned to Ninus (Layard's *Nineveh*, ii. 231), thus rendering it probable that the dynasty represented by the latter name was preceded by one of Babylonian origin.

Our present information does not permit us to identify Nimrod with any personage known to us either from inscriptions or from classical writers. Ninus and Belus are representative titles rather than personal names, and are but equivalent terms for "the lord," who was regarded as the founder of the empires of Nineveh and Babylon. We have no reason on this account to doubt the personal exist-

[f] The expressions גִּבּוֹר, חֹזֶל, and still more the use of the term יְהוָה, are regarded as indications of a Jehovistic original, while the genealogy itself is Elohistic. It should be further noticed that there is nothing to mark the connexion or distinction between Nimrod and the other sons of Cush.

[g] The passage quoted by Josephus is so fragmentary a character, that its original purport can hardly be guessed. He adduces it apparently to illustrate the name Shinar, but the context favours the supposition that the writer referred to the period subsequent to the flood, in which case we may infer the belief (1) that the population of Babylonia was not autochthonous, but immigrant; (2) that the point from which it immigrated was from the west Belus being identified with Zeus Enyalius.

ence[h] of Nimrod, for the events with which he is connected fall within the shadows of a remote antiquity. But we may, nevertheless, consistently with this belief, assume that a large portion of the interest with which he was invested was the mere reflection of the sentiments with which the nations of western Asia looked back on the overshadowing greatness of the ancient Babylonian empire, the very monuments of which seemed to tell of days when "there were giants in the earth." The feeling which suggested the colouring of Nimrod as a representative hero still finds place in the land of his achievements, and to him the modern Arabs[i] ascribe all the great works of ancient times, such as the *Birs-Nimrûd* near Babylon, *Tel Nimrûd* near *Baghdad*, the dam of *Suhr el Nimrûd* across the Tigris below *Mosul*, and the well-known mound of *Nimrûd* in the same neighbourhood. [W. L. B.]

NIM'SHI (נִמְשִׁי: Ναμεσσαί; in 2 Chr. Ναμεσσεί: *Namsi*). The grandfather of Jehu, who is generally called "the *son* of Nimshi" (1 K. xix. 16; 2 K. ix. 2, 14, 20; 2 Chr. xxii. 7).

NIN'EVEH (נִינְוֵה: Νινευΐ, Νῖνος: *Ninus, Ninos, Ninive*), the capital of the ancient kingdom and empire of Assyria; a city of great power, size, and renown, usually included amongst the most ancient cities of the world of which there is any historic record. The name appears to be compounded from that of an Assyrian deity, "Nin," corresponding, it is conjectured, with the Greek Hercules, and occurring in the names of several Assyrian kings, as in "Ninus," the mythic founder, according to Greek tradition, of the city. In the Assyrian Inscriptions Nineveh is also supposed to be called "the city of Bel."

Nineveh is first mentioned in the O. T. in connexion with the primitive dispersement and migrations of the human race. Asshur, or, according to the marginal reading, which is generally preferred, Nimrod, is there described (Gen. x. 11) as extending his kingdom from the land of Shinar, or Babylonia, in the south, to Assyria in the north, and founding four cities, of which the most famous was Nineveh. Hence Assyria was subsequently known to the Jews as "the land of Nimrod" (cf. Mic. v. 6), and was believed to have been first peopled by a colony from Babylon. The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period; as in Num. xxiv. 22, 24, and Ps. lxxxiii. 8: but after the notice of the foundation of Nineveh in Genesis no further mention is made of the city until the time of the book of Jonah, or the 8th century B.C., supposing we accept the earliest date for that narrative [JONAH], which, however, according to some critics, must be brought down 300 years later, or to the 5th century B.C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Nineveh," and his subjects "the people of Nineveh." Assyria is first called a kingdom in the time of Menahem, about B.C. 770. Nahum (? B.C. 645) directs his prophecies against Nineveh; only one against the king of Assyria, ch. iii. 18. In 2 Kings (xix. 36) and Isaiah (xxxvii. 37) the city is first distinctly mentioned as the residence of the monarch. Sennacherib was slain there when worshipping in the temple of Nisroch his god. In 2 Chronicles (xxxii. 21), where the same event is described, the name of the place where it occurred is omitted. Zephaniah, about B.C. 630, couples the capital and the kingdom together (ii. 13); and this is the last mention of Nineveh as an *existing* city. He probably lived to witness its destruction, an event impending at the time of his prophecies. Although Assyria and the Assyrians are alluded to by Ezekiel and Jeremiah, by the former as a nation in whose miserable ruin prophecy had been fulfilled (xxxi.), yet they do not refer by name to the capital. Jeremiah, when enumerating "all the kingdoms of the world which are upon the face of the earth" (ch. xxv.), omits all mention of the nation and the city. Habakkuk only speaks of the Chaldaeans, which may lead to the inference that the date of his prophecies is somewhat later than that usually assigned to them. [HABAKKUK.] From a comparison of these data, it has been generally assumed that the destruction of Nineveh and the extinction of the empire took place between the time of Zephaniah and that of Ezekiel and Jeremiah. The exact period of these events has consequently been fixed, with a certain amount of concurrent evidence derived from classical history, at B.C. 606 (Clinton, *Fasti Hellen.* i. 269). It has been shewn that it may have occurred 20 years earlier. [ASSYRIA.] The city was then laid waste, its monuments destroyed, and its inhabitants scattered or carried away into captivity. It never rose again from its ruins. This total disappearance of Nineveh is fully confirmed by the records of profane history. There is no mention of it in the Persian cuneiform inscriptions of the Achaemenid dynasty. Herodotus (i. 193) speaks of the Tigris as "the river upon which the town of Nineveh formerly stood." He must have passed, in his journey to Babylon, very near the site of the city - perhaps actually over it. So accurate a recorder of what he saw would scarcely have omitted to mention, if not to describe, any ruins of importance that might have existed there. Not two centuries had then elapsed since the fall of the city. Equally conclusive proof of its condition is afforded by Xenophon, who with the ten thousand Greeks encamped during his retreat on, or very near, its site (B.C. 401). The very name had then been forgotten, or at least the

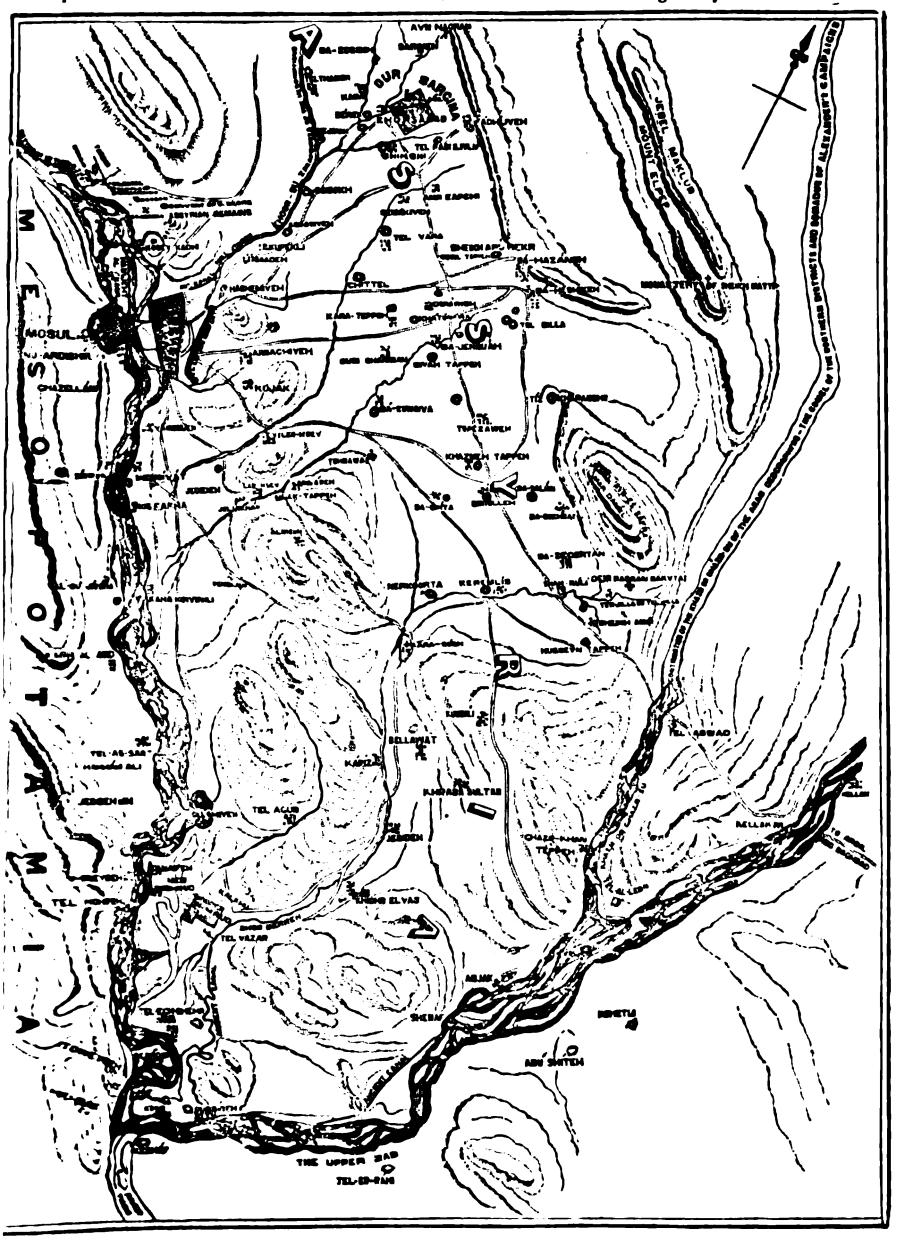
[h] We must notice, without however adopting, the views lately propounded by M. D. Chwolson in his pamphlet, *Ueber die Ueberreste der altbabylonischen Literatur*. He has discovered the name Nemrod or Nemroda in the manuscript works of an Arabian writer named Ibn-Wa'hschijjah, who professes to give a translation of certain original literary works in the Nabathaean language, one of which, "on Nabathaean agriculture," is in part assigned by him to a writer named Qut'ami. This Qut'ami incidentally mentions that he lived in Babylon under a dynasty of Canaanites, which had been founded by a priest named Nemrod. M. Chwolson assigns Ibn-Wa'hschijjah to the end of the 9th century of our new era, and Qut'ami to the early part of the 13th century B.C. He regards the term Nabathaean as meaning old Babylonian, and the works of Qut'ami as the remains of a Babylonian literature. He further identifies the Canaanite dynasty with the fifth or Arabian dynasty of Berosus, and adduces the legend of Cepheus, the king of Joppa, who reigned near the Mediterranean to the Erythraean sea, in confirmation of such a Canaanitish invasion. It would be beyond our province to discuss the various questions raised by this curious discovery. The result, if established, would be to bring the date of Nimrod down to about B.C. 1500.

[i] The Arabs retain Josephus' view of the impiety of Nimrod, and have a collection of legends respecting his idolatry, his enmity against Abraham, &c. (Layard's *Nineveh*, i. 24 note).

not appear to have been acquainted with it, for he calls one group of ruins "Larissa," and merely states that a second group was near the deserted town of Mespila (*Anab.* b. iii. 4, §7). The ruins, as he describes them, correspond in many respects with those which exist at the present day, except that he assigns to the walls near Mespila a circuit of six parasangs, or nearly three times their actual dimensions. Ctesias placed the city on the Euphrates (*Frag.* i. 2), a proof either of his ignorance or of the entire disappearance of the place. He appears to have led Diodorus Siculus into the same error (ii. 27, 28).* The historians of Alexander, with the exception of Arrian (*Ind.* 42, 3), do not even allude to the city, over the ruins of which the conqueror must have actually marched. His great victory of Arbela was won almost in sight of them. It is evident that the later Greek and Roman writers, such as Strabo, Ptolemy, and Pliny, could only have derived any independent knowledge they possessed of Nineveh from traditions of no authority. They concur, however, in placing it on the eastern bank of the Tigris. During the Roman period, a small castle or fortified town appears to have stood on some part of the site of the ancient city. It was probably built by the Persians (Amm. Marcell. xxiii. 22); and subsequently occupied by the Romans, and erected by the Emperor Claudius into a colony. It appears to have borne the ancient traditional name of Nineve, as well as its corrupted form of Ninos and Ninus, and also at one time that of Hierapolis. Tacitus (*Ann.* xii. 13), mentioning its capture by Meherdates, calls it "Ninos;" on coins of Trajan it is "Ninus," on those of Maximinus "Niniva," in both instances the epithet Claudiopolis being added. Many Roman remains, such as sepulchral vases, bronze and other ornaments, sculptured figures in marble, terracottas, and coins, have been discovered in the rubbish covering the Assyrian ruins; besides wells and tombs, constructed long after the destruction of the Assyrian edifices. The Roman settlement appears to have been in its turn abandoned, for there is no mention of it when Heraclius gained the great victory over the Persians in the battle of Nineveh, fought on the very site of the ancient city, A.D. 627. After the Arab conquest, a fort on the east bank of the Tigris bore the name of "Ninawi" (Rawlinson, *As. Soc. Journal*, vol. xii. 418). Benjamin of Tudela, in the 12th century, mentions the site of Nineveh as occupied by numerous inhabited villages and small townships (ed. Asher, i. 91). The name remained attached to the ruins during the Middle Ages; and from them a bishop of the Chaldaean Church derived his title (Assemani, iv. 459); but it is doubtful whether any town or fort was so called. Early English travellers merely allude to the site (Purchas, ii. 1387). Niebuhr is the first modern traveller who speaks of "Nuniyah" as a village standing on one of the ruins which he describes as "a considerable hill" (ii 353). This may be a corruption of "Nebbi Yunus," the Prophet Jonah, a name still given to a village containing his apocryphal tomb. Mr. Rich, who surveyed the site in 1820, does not mention Nuniyah, and no such place now exists. Tribes of Turcomans and sedentary Arabs, and Chaldaean and Syrian Christians, dwell in small mud-built villages, and cultivate the soil in the country around the ruins; and occasionally a tribe of wandering Kurds, or of Bedouins driven by hunger from the desert, will pitch their tents amongst them. After the Arab conquest of the west of Asia, Mosul, at one time the flourishing capital of an independent kingdom, rose on the opposite or western bank of the Tigris. Some similarity in the names has suggested its identification with the Mespila of Xenophon; but its first actual mention only occurs after the Arab conquest (A.H. 16, and A.D. 637). It was sometimes known as Athur, and was united with Nineveh as an episcopal see of the Chaldaean Church (Assemani, iii. 269). It has lost all its ancient prosperity, and the greater part of the town is now in ruins.

Traditions of the unrivalled size and magnificence of Nineveh were equally familiar to the Greek and Roman writers, and to the Arab geographers. But the city had fallen so completely into decay before the period of authentic history, that no description of it, or even of any of its monuments, is to be found in any ancient author of trust. Diodorus Siculus asserts (ii. 3) that the city formed a quadrangle of 150 stadia by 90, or altogether of 480 stadia (no less than 60 miles), and was surrounded by walls 100 feet high, broad enough for three chariots to drive abreast upon them, and defended by 1500 towers, each 200 feet in height. According to Strabo (xvi. 737) it was larger than Babylon, which was 385 stadia in circuit. In the O.T. we find only vague allusions to the splendour and wealth of the city, and the very indefinite statement in the book of Jonah that it was "an exceeding great city," or "a great city to God," or "for God" (*i. e.* in the sight of God), "of three days' journey;" and that it contained "six score thousand persons who could not discern between their right hand and their left hand, and also much cattle" (iv. 11). It is obvious that the accounts of Diodorus are for the most part absurd exaggerations, founded upon fabulous traditions, for which existing remains afford no warrant. It may, however, be remarked that the dimensions he assigns to the area of the city would correspond to the three days' journey of Jonah—the Jewish day's journey being 20 miles—if that expression be applied to the circuit of the walls. "Persons not discerning between their right hand and their left" may either allude to children, or to the ignorance of the whole population. If the first be intended, the number of inhabitants, according to the usual calculation, would have amounted to about 600,000. But such expressions are probably mere Eastern figures of speech to denote vastness, and far too vague to admit of exact interpretation.

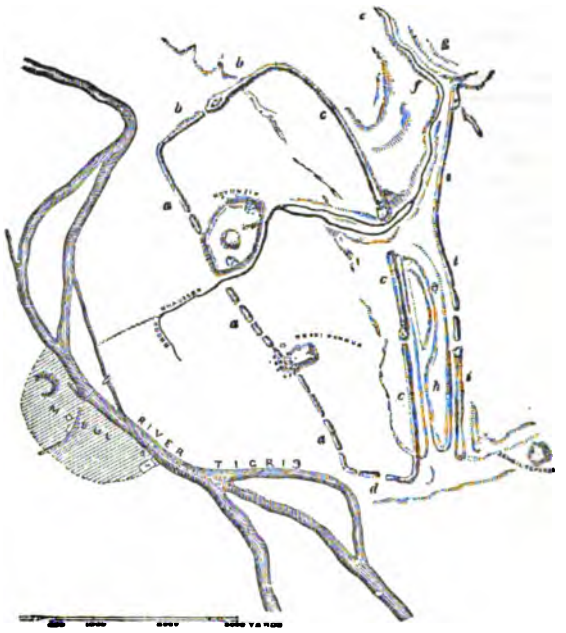
The political history of Nineveh is that of Assyria, of which a sketch has already been given. [ASSYRIA.] It has been observed that the territory included within the boundaries of the kingdom of Assyria proper was comparatively limited in extent, and that almost within the immediate neighbourhood of the capital petty kings appear to have ruled over semi-independent states, owning allegiance and paying tribute to the great Lord of the Empire, "the King of Kings," according to his Oriental title, who dwelt at Nineveh. (Cf. Is. x. 8: "Are not my princes altogether kings?") These petty kings were in a constant state of rebellion, which usually shewed itself by their refusal to pay the apportioned tribute—the principal link between the sovereign and the dependent states—and repeated expeditions were undertaken against them to enforce this act of obe



* In a fragment from Ctesias, preserved by Nicolaus Damascenus, the city is restored to its true site. (Müller, *Frag. Hist. Graec.* iii. 358.)

dience (Cf. 2 K. xvi. 7, xvii. 4, where it is stated that the war made by the Assyrians upon the Jews was for the purpose of enforcing the payment of tribute.) There was, consequently, no bond of sympathy arising out of common interests between the various populations which made up the empire. Its political condition was essentially weak. When an independent monarch was sufficiently powerful to carry on a successful war against the great king, or a dependent prince sufficiently strong to throw off his allegiance, the empire soon came to an end. The fall of the capital was the signal for universal disruption. Each petty state asserted its independence, until reconquered by some warlike chief who could found a new dynasty and a new empire to replace those which had fallen. Thus on the borders of the great rivers of Mesopotamia arose in turn the first Babylonian, the Assyrian, the Median, the second Babylonian, the Persian, and the Seleucid empires. The capital was however invariably changed, and generally transferred to the principal seat of the conquering race. In the East men have rarely rebuilt great cities which have once fallen into decay—never perhaps on exactly the same site. If the position of the old capital was deemed, from political or commercial reasons, more advantageous than any other, the population was settled in its neighbourhood, as at Delhi, and not amidst its ruins. But Nineveh, having fallen with the empire, never rose again. It was abandoned at once, and suffered to perish utterly. It is probable that, in conformity with an Eastern custom, of which we find such remarkable illustrations in the history of the Jews, the entire population was removed by the conquerors, and settled as colonists in some distant province.

The Ruins.—Previous to recent excavations and researches, the ruins which occupied the presumed site of Nineveh seemed to consist of mere shapeless heaps or mounds of earth and rubbish. Unlike the vast masses of brick masonry which mark the site of Babylon, they showed externally no signs of artificial construction, except perhaps here and there the traces of a rude wall of sun-dried bricks. Some of these mounds were of enormous dimensions—looking in the distance rather like natural elevations than the work of men's hands. Upon and around them, however, were scattered innumerable fragments of pottery—the unerring evidence of former habitations. Some had been chosen by the scattered population of the land as sites for villages, or for small mud-built forts, the mound itself affording means of refuge and defence against the marauding parties of Bedouins and Kurds which for generations have swept over the face of the country. The summits of others were sown with corn or barley. During the spring months they were covered with grass and flowers, bred by the winter rains. The Arabs call these mounds "Tel," the Turcomans and Turks "Teppeh," both words being equally applied to natural hills and elevations, and the first having been used in the same double sense by the most ancient Semitic races (cf. Hebrew תֵּל, "a hill," "a mound," "a heap of rubbish," Ez. iii. 15, Ezr. ii. 59; Neh. vii. 61; 2 K. xix. 12). They are found in vast numbers throughout the whole region watered by the Tigris and Euphrates and their confluents, from the Taurus to the Persian Gulf. They are seen, but are less numerous, in Syria, parts of Asia Minor, and in the plains of Armenia. Wherever they have been examined they appear to have furnished remains which identify the period of their construction with that of the alternate supremacy of the Assyrian, Babylonian, and Persian empires. They differ greatly in form, size and height. Some are mere conical heaps, varying from 50 to 150 feet high; others have a broad flat summit, and very precipitous cliff-like sides, furrowed by deep ravines worn by the winter rains. Such mounds are especially numerous in the region to the east of the Tigris, in which Nineveh stood, and some of them must mark the ruins of the Assyrian capital. There is no edifice mentioned by ancient authors as forming part of the city, which we are required, as in the case of Babylon, to identify with any existing remains, except the tomb, according to some, of Ninus, according to others of Sardanapalus, which is recorded to have stood at the entrance of Nineveh (Diod. Sic. ii. 7; Amyot. *Frag.* ed. Müller, p. 136). The only difficulty is to determine which ruins are to be comprised within the actual limits of the ancient city. The northern extremity of the principal collective of mounds on the eastern bank of the Tigris may be fixed at Shereef Khan, and the southern at Nimroud, about 6½ miles from the junction of the river with the great Zab, the ancient Lycus. Eastward they extend to Khorsabad, about 10 miles N. by E. of Shereef Khan, and to Karamless, about 15 miles N.E. of Nimroud. Within the area of the irregular quadrangle are to be found, in every direction, traces of ancient edifices and of former population. It comprises various separate and distinct groups of ruins, four of which, if not more, are the remains of fortified inclosures or strongholds, defended by walls and ditches, towers and ramparts. The principal are—1, the group immediately opposite Mosul, including the great mounds of Kouyunjik (also called by the Arabs, Armousheyah) and Nebbi Yunus; 2, that near the junction of the Tigris and Zab, comprising the mounds of Nimroud and Athur; 3, Khorsabad, about 10 miles to the east of the former river; 4, Shereef Khan, about 5½ miles to the north of Kouyunjik; and 5, Selamiyah, 3 miles to the north of Nimroud. Other large mounds are Baaskeikhah, and Karamless, where the remains of fortified inclosures may perhaps be traced, Baazani, Yarumjeh, and Bellawat. It is scarcely necessary to observe that all these names are comparatively modern, dating from after the Mohammedan conquest. The respective positions of these ruins will be seen in the accompanying map (p. 549). We will describe the most important.



The ruins opposite Mosul consist of an inclosure formed by a continuous line of mounds, resembling a vast embankment of earth, but marking the remains of a wall, the western face of which is interrupted by the two great mounds of Kouyunjik and Nebbi Yunus (p. 550). To the east of this inclosure are the remains of an extensive line of defences, consisting of moats and ramparts. The inner wall forms an irregular quadrangle with very unequal sides—the northern being 2333 yards, the western, or the river-face, 4533, the eastern (where the wall is almost the segment of a circle) 3300 yards, and the southern but little more than 1000; altogether 13,200 yards, or 7 English miles 4 furlongs. The present height of this earthen wall is between 40 and 50 feet. Here and there a mound more lofty than the rest covers the remains of a tower or a gateway. The walls appear to have been originally faced, at least to a certain height, with stone masonry, some remains of which have

been discovered. The mound of Kouyunjik is of irregular form, being nearly square at the S.W. corner, and ending almost in a point at the N.E. It is about 1300 yards in length, by 500 in its greatest width; its greatest height is 96 feet, and its sides are precipitous, with occasional deep ravines or watercourses. The summit is nearly flat, but falls from the W. to the E. A small village formerly stood upon it, but has of late years been abandoned. The Khosr, a narrow but deep and sluggish stream, sweeps round the southern side of the mound on its way to join the Tigris. Anciently dividing itself into two branches, it completely surrounded Kouyunjik. Nebbi Yunus is considerably smaller than Kouyunjik, being about 530 yards by 430, and occupying an area of about 40 acres. In height it is about the same. It is divided into two nearly equal parts by a depression in the surface. Upon it is a Turcoman village containing the apocryphal tomb of Jonah, and a burial-ground held in great sanctity by Mohammedans from its vicinity to this sacred edifice. Remains of entrances or gateways have been dis-

Plan of ruins which comprise ancient Nineveh.

covered in the N. and E. walls (*b*). The Tigris formerly ran beneath the W. wall, and at the foot of the two great mounds. It is now about a mile distant from them, but during very high spring floods it sometimes reaches its ancient bed. The W. face of the inclosure (*a*) was thus protected by

Plan of Kouyunjik and Nebbi Yunus.

the river. The N. and S. faces (*b* and *d*) were strengthened by deep and broad moats. The E. (*c*) being most accessible to an enemy, was most strongly fortified, and presents the remains of a very elaborate system of defences. The Khosr, before entering the inclosure, which it divides into two nearly equal parts, ran for some distance almost parallel to it (*f*), and supplied the place of an artificial ditch for about half the length of the E. wall. The remainder of the wall was protected by two wide moats (*h*), fed by the stream, the supply of water being regulated by dams, of which traces still exist. In addition, one or more ramparts of earth were thrown up, and a moat excavated between the inner walls and the Khosr, the eastern bank of which was very considerably raised by artificial means. Below, or to the S. of the stream, a third ditch, excavated in the compact conglomerate rock and about 200 feet broad, extended almost the whole length of the E. face, joining the moat on the S. An enormous outer rampart of earth, still in some places above 80 feet in height (*i*), completed the defences on this side. A few mounds outside this rampart probably mark the sites of detached towers or fortified posts. This elaborate system of fortifications was singularly well devised to resist the attacks of an enemy. It is remarkable that within the inclosure, with the exception of Kouyunjik and Nebbi Yunus, no mounds or irregularities in the surface of the soil denote ruins of any size. The ground is, however, strewed in every direction with fragments of brick, pottery, and the usual signs of ancient population.

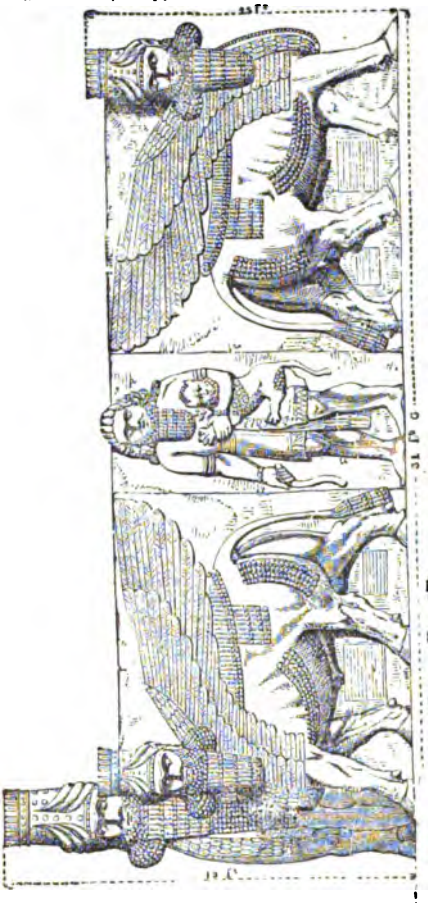
Nimroud consists of a similar inclosure of consecutive mounds —the remains of ancient walls. The system of defences is however very inferior in importance and completeness to that of Kouyunjik. The indications of towers occur at regular intervals; but may still be traced on the N. and E. sides. The area forms an irregular square, about 2331 yards by 2095, containing about 1000 acres. The N. and E. sides were defended by moats, the W. and S. walls by the river, which once flowed immediately beneath them. On the S.W. face is a great mound, 700 yards by 400, and covering about 60 acres, with a cone or pyramid of earth about 140 feet high rising in the N.W. corner of it. At the S.E. angle of the inclosure is a group of lofty mounds called by the Arabs, after Nimroud's lieutenant, Athur (cf. Gen. x. 11). According to the Arab geographers this name at one time applied to all the ruins of Nimroud (Layard, *Nin. and its Rem.* ii. 245, note). Within the inclosure a few slight irregularities in the soil mark the sites of ancient habitations, but there are no indications of ruins of buildings of any size. Fragments of brick and pottery abound. The Tigris is now 1½ mile distant from the mound, but sometimes reaches them during extraordinary floods.

The inclosure-walls of Khorsabad form a square of about 2000 yards. They show the remains of towers and gateways. There are apparently no traces of moats or ditches. The mound which gives its name to this group of ruins rises on the N.W. face. It may be divided into two parts or stages, the upper about 650 ft. square and 30 ft. high, and the lower adjoining it, about 1350 by 300. Its summit was formerly occupied by an Arab

Mound of Nimroud.

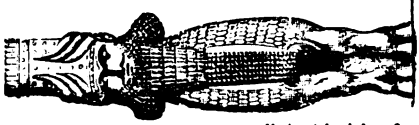
lage. In one corner there is a pyramid or cone, similar to that at Nimroud, but very inferior in height and size. Within the interior are a few mounds marking the sites of propylaea and similar detached monuments, but no traces of considerable buildings. These ruins were known to the early Arab geographers by the name of "Sareoun," probably a traditional corruption of the name of Sargon, the king who founded the palaces discovered there.

Shereef Khan, so called from a small village in the neighbourhood, consists of a group of mounds of no great size when compared with other Assyrian ruins, and without traces of an outer-wall. Selamiyah is an inclosure of irregular form, situated upon a high bank overlooking the Tigris, about 5000 yards in circuit, and containing an area of about 410 acres, apparently once surrounded by a ditch or moat. It contains no mound or ruin, and even the earthen rampart which marks the walls has in many places nearly disappeared. The name is derived from an Arab town once of some importance, but now reduced to a miserable village inhabited by Turcomans.



The greater part of the discoveries which, of late years, have thrown so much light upon the history and condition of the ancient inhabitants of Nineveh were made in the ruins of Nimroud, Kouyunjik, and Khorsabad. The first traveller who carefully examined the supposed site of the city was Mr. Rich, formerly political agent for the East India Company at Baghdad; but his investigations were almost entirely confined to Kouyunjik and the surrounding mounds, of which he made a survey in 1820. From them he obtained a few relics, such as inscribed pottery and bricks, cylinders, and gems. Some time before a bas-relief representing men and animals had been discovered, but had been destroyed by the Mohammedans. He subsequently visited the mound of Nimroud, of which, however, he was unable to make more than a hasty examination (*Narrative of a Residence in Kurdistan*, ii. 131). Several travellers described the ruins after Mr. Rich, but no attempt was made to explore them systematically until M. Botta was appointed French consul at Mosul in 1843. Whilst excavating in the mound of Khorsabad, to which he had been directed by a peasant, he discovered a row of upright alabaster slabs, forming the panelling or skirting of the lower part of the walls of a chamber. This chamber was found to communicate with others of similar construction, and it soon became evident that the remains of an edifice of considerable size were buried in the mound. The French Government having given the necessary funds, the ruins were fully explored. They consisted of the lower part of a number of halls, rooms, and passages, for the most part wainscoted with slabs of coarse gray alabaster, sculptured with figures in relief, the principal entrances being formed by colossal human-headed winged bulls. No remains of exterior architecture of any great importance were discovered. The calcined limestone and the great accumulation of charred wood and charcoal showed that the building had been destroyed by fire. Its upper part had entirely disappeared, and its general plan could only be restored by the remains of the lower story. The collection of Assyrian sculptures in the Louvre came from these ruins.

The excavations subsequently carried on by MM. Place and Fresnel at Khorsabad led to the discovery, in the inclosure below the platform, of propylaea, flanked by colossal human-headed bulls, and of other detached buildings forming the approaches to the palace, and also of some of the gateways in the inclosure-walls, ornamented with similar mythic figures.



M. Botta's discoveries at Khorsabad were followed by those of Mr. Layard at Nimroud and Kouyunjik, made between the years 1845 and 1850. The mound of Nimroud was found to contain the ruins of several distinct edifices, erected at different periods —materials for the construction of the latest having been taken from an earlier building. The most ancient stood at the N.W. corner of the platform, the most recent at the S.E. In general plan and in construction they resembled the ruins at Khorsabad—consisting of a number of halls, chambers, and galleries, panelled with sculptured and inscribed alabaster slabs, and opening one into the other by doorways generally formed by pairs of colossal human-headed winged bulls or lions. The exterior architecture could not be traced. The lofty cone or pyramid of earth adjoining this edifice covered the ruins of a building the basement of which was a square of 165 feet, and consisted, to the height of 20 feet, of a solid mass of sun-dried bricks, faced on the four sides by blocks of stone carefully squared, bevelled, and adjusted. This stone facing singularly enough coincides exactly with the height assigned by Xenophon to the stone plinth of the walls (*Anab.* iii. 4), and is surmounted, as he describes the plinth to have been, by a superstructure of bricks, nearly every kiln-burnt brick bearing an inscription. Upon this solid substructure there probably rose, as in the Babylonian temples, a succession of platforms or stages, diminishing in size, the highest having a shrine or altar upon it (BABEL; Layard, *Nin. and Bab.* ch. v.). A vaulted chamber or gallery, 100 feet long, 6 broad, and 12 high, crossed the centre of the mound on a level with the summit of the stone-masonry. It had evidently been broken into and rifled of its contents at some remote period, and may have been a royal sepulchre—the tomb of Ninus, or Sardanapalus, which stood at the entrance of Nineveh. It is the tower described by Xenophon at Larissa as being 1 plethron (100 feet) broad and 2 plethra high. It appears to have been raised by the son of the king who built the N.W. palace, and whose name in the cuneiform inscriptions is supposed to be identified with that of Sardanapalus. Shalmanubar or Shalmaneser,[b] the builder of this tomb or tower, also erected in the centre of the great mound a second palace, which appears to have been destroyed to furnish materials for later buildings. The black obelisk now in the British Museum was found amongst its ruins. On the W. face of the mound and adjoining the centre palace, are the remains of a third edifice, built by the grandson of Shalmanubar, whose name is read Iva-Lush, and who is believed to be the Pul of the Hebrew Scriptures. It contained some important inscribed slabs, but no sculptures. Essarhaddon raised (about B.C. 680) at the S.W. corner of the platform another royal abode of considerable extent, but constructed principally with materials brought from his predecessor's palaces. In the opposite or S.E. corner

[a] It must be observed, once for all, that whilst the Assyrian proper names are given in the text according to the latest interpretations of the cuneiform inscriptions, they are very doubtful.

are the ruins of a still later palace built by his grandson Ashur-emit-ili, very inferior in size and in splendour to other Assyrian edifices. Its rooms were small; it appears to have had no great halls,

Entrance, Kouyunjik.

and the chambers were panelled with slabs of common stone without sculpture or inscriptions. Some important detached figures, believed to bear the name of the historical Semiramis, were, however, found in its ruins. At the S.W. corner of the mound of Kouyunjik stood a palace built by Sennacherib (about B.C. 700), exceeding in size as in magnificence of decoration all others hitherto explored. It occupied nearly 100 acres. Although much of the building yet remains to be examined, and much has altogether perished, about 60 courts, halls (some nearly 150 feet square), rooms, and passages (one 200 feet long), have been discovered, all panelled with sculptured slabs of alabaster. The entrances to the edifice and to the principal chambers were flanked by groups of winged human-headed lions and bulls of colossal proportions—some nearly 20 feet in height; 27 portals thus formed were excavated by Mr. Layard. A second palace was erected on the same platform by the son of Essarhaddon, the third king of the name of Sardanapalus. In it were discovered sculptures of great interest and beauty, amongst them the series representing the lion-hunt now in the British Museum. Owing to the sanctity attributed by Mohammedans to the supposed tomb of Jonah, great difficulties were experienced in examining the mound upon which it stands. A shaft sunk within the walls of a private house led to the discovery of sculptured slabs; and excavations subsequently carried on by agents of the Turkish Government proved that they formed part of a palace erected by Essarhaddon. Two entrances or gateways in the great inclosure-walls have been excavated—one (at *b* on plan) flanked by colossal human-headed bulls and human figures. They, as well as the walls, appear, according to the inscriptions, to have been constructed by Sennacherib. No propylaea or detached buildings have as yet been discovered within the inclosure. At Shereff Khan are the ruins of a temple, but no sculptured slabs have been dug up there. It was founded by Sennacherib, and added to by his grandson. At Selamiyah no remains of buildings nor any fragments of sculpture or inscriptions have been discovered.

The Assyrian edifices were so nearly alike in general plan, construction, and decoration, that one description will suffice for all. They were built upon artificial mounds or platforms, varying in height, but generally from 30 to 50 feet above the level of the surrounding country, and solidly constructed of regular layers of sun-dried bricks, as at Nimroud, or consisting merely of earth and rubbish heaped up, as at Kouyunjik. The mode of raising the latter kind of mound is represented in a series of bas-reliefs, in which captives and prisoners are seen amongst the workmen (Layard, *Mon. of Nin.* 2nd series, pl. 14, 15). This platform was probably faced with stone-masonry, remains of which were discovered at Nimroud, and broad flights of steps (such as were found at Khorsabad) or inclined ways led up to its summit. Although only the general plan of the ground-floor can now be traced, it is evident that the palaces had several stories built of wood and sun-dried bricks, which, when the building was deserted and allowed to fall to decay, gradually buried the lower chambers with their ruins, and protected the sculptured slabs from the effects of the weather. The depth of soil and rubbish above the alabaster slabs varied from a few inches to about 20 feet. It is to this accumulation of rubbish above them that the bas-reliefs owe their extraordinary preservation. The portions of the edifices still remaining consist of halls, chambers, and galleries, opening for the most part into large uncovered courts. The partition walls were

from 6 to 15 feet in thickness, and are solidly built of sun-dried bricks, against which are placed the panelling or skirting of alabaster slabs. No windows have hitherto been discovered, and it is probable that in most of the smaller chambers light was only admitted through the doors. The wall, above the wainscoting of alabaster, was plastered, and painted with figures and ornaments. The pavement was formed either of inscribed slabs of alabaster, or large flat kiln-burnt bricks. It rested upon layers of bitumen and fine sand. Of nearly similar construction are the modern houses of Mosul, the architecture of which has probably been preserved from the earliest times as that best suited to the climate and to the manners and wants of an Oriental people. The rooms are grouped in the same manner round open courts or large halls. The same alabaster, usually carved with ornaments, is used for wainscoting the apartments, and the walls are constructed of sun-dried bricks. The upper part and the external architecture of the Assyrian palaces, both of which have entirely disappeared, can only be restored conjecturally, from a comparison of monuments represented in the bas-reliefs, and of edifices built by nations, such as the Persians, who took their arts from the Assyrians. By such means Mr. Fergusson has, with much ingenuity, attempted to reconstruct a palace of Nineveh (*The Palaces of Nineveh and Persepolis restored*). He presumes that the upper stories were built entirely of sun-dried bricks and wood—a supposition warranted by the absence of stone and marble columns, and of remains of stone and burnt-brick-masonry in the rubbish and soil which cover and surround the ruins; that the exterior was richly sculptured and painted with figures and ornaments, or decorated with enamelled bricks of bright colours, and that light was admitted to the principal chambers on the ground-floor through a kind of gallery which formed the upper part of them, and upon which rested the wooden pillars necessary for the support of the superstructure. The capitals and various details of these pillars, the friezes and architectural ornaments, he restores from the stone columns and other remains at Persepolis. He conjectures that curtains, suspended between the pillars, kept out the glaring light of the sun, and that the ceilings were of wood-work, elaborately painted with patterns similar to those represented in the sculptures, and probably ornamented with gold and ivory. The discovery at Khorsabad of an arched entrance of considerable size and depth, constructed of sun-dried and kiln-burnt bricks, the latter enamelled with figures, leads to the inference that some of the smaller chambers may have been vaulted.

The sculptures, with the exception of the human-headed lions and bulls, were for the most part in low relief. The colossal figures usually represent the king, his attendants, and the gods; the smaller sculptures, which either cover the whole face of the slab, or are divided into two compartments by bands of inscriptions, represent battles, sieges, the chase, single combats with wild beasts, religious ceremonies, &c. &c. All refer to public or national events; the hunting-scenes evidently recording the prowess and personal valour of the king as the head of the people—"the mighty hunter before the Lord." The sculptures appear to have been painted—remains of colour having been found on most of them. Thus decorated, without and within, the Assyrian palaces must have displayed a barbaric magnificence, not however devoid of a certain grandeur and beauty, which no ancient or modern edifice has probably exceeded. Amongst the small objects, undoubtedly of the Assyrian period, found in the ruins, were copper-vessels (some embossed and incised with figures of men and animals and graceful ornaments), bells, various instruments and tools of copper and iron, arms (such as spear and arrow heads, swords, daggers, shields, helmets, and fragments of chain and plate armour), ivory ornaments, glass bowls and vases, alabaster urns, figures and other objects in terra-cotta, pottery, parts of a throne, inscribed cylinders and seals of agate and other precious materials, and a few detached statues. All these objects show great mechanical skill and a correct and refined taste, indicating considerable advance in civilization.

These great edifices, the depositories of the national records, appear to have been at the same time the abode of the king and the temple of the gods—thus corresponding, as in Egypt, with the character of the monarch, who was both the political and religious chief of the nation, the special favourite of the deities, and the interpreter of their decrees. No building has yet been discovered which possesses any distinguishing features to mark it specially as a temple. They are all precisely similar in general plan and construction. Most probably a part of the palace was set apart for religious worship and ceremonies. Altars of stone, resembling the Greek tripod in form, have been found in some of the chambers—in one instance before a figure of the king himself (Layard, *Nin. and Bab.* 351). According to the inscriptions, it would, however, appear that the Assyrian monarchs built temples of great magnificence at Nineveh, and in various parts of the empire, and profusely adorned them with gold, silver, and other precious materials.

Site of the City.—Much diversity of opinion exists as to the identification of the ruins which may be properly included within the site of ancient Nineveh. According to Sir H. Rawlinson and those who concur in his interpretation of the cuneiform characters, each group of mounds we have described represents a separate and distinct city. The name applied in the inscriptions to Nimroud is supposed to read "Kalkhu," and the ruins are consequently identified with those of the Calah of Genesis (x. 11); Khorsabad is Sargina, as founded by Sargon, the name having been retained in that of Sarghun, or Saraoun, by which the ruins were known to the Arab geographers; Shereef Khan is Tarbisi. Selamiyah has not yet been identified, no inscription having been found in the ruins. The name of Nineveh is limited to the mounds opposite Mosul, including Kouyunjik and Nebbi Yunus. Sir H. Rawlinson was at one time inclined to exclude even the former mound from the precincts of the city (*Journ. of As. Soc.* xii. 418). Furthermore, the ancient and primitive capital of Assyria is supposed to have been not Nineveh, but a city named Asshur, whose ruins have been discovered at Kalah Sherghat, a mound on the right or W. bank of the Tigris, about 60 miles S. of Mosul. It need scarcely be observed that this theory rests entirely upon the presumed accuracy of the interpretation of the cuneiform inscriptions, and that it is totally at variance with the accounts and traditions preserved by sacred and classical history of the antiquity, size, and importance of Nineveh. The area of the inclosure of Kouyunjik, about 1800 acres, is far too small to represent the site of the city, built as it must have been in accordance with eastern customs and man-

ders, even after allowing for every exaggeration on the part of ancient writers. Captain Jones (*Topography of Nineveh, Journ. of R. Asiat. Soc.* xv. p. 324) computes that it would contain 174,000 inhabitants, 50 square yards being given to each person; but the basis of this calculation would scarcely apply to any modern Eastern city. If Kouyunjik represents Nineveh, and Nimroud Calah, where are we to place Resen, "a great city" between the two? (Gen. x. 12.) Scarcely at Selamiyah, only three miles from Nimroud, and where no ruins of any importance exist. On the other hand, it has been conjectured that these groups of mounds are not ruins of separate cities, but of fortified royal residences, each combining palaces, temples, propylaea, gardens, and parks, and having its peculiar name; and that they all formed part of one great city built and added to at different periods, and consisting of distinct quarters scattered over a very large area, and frequently very distant one from the other. Nineveh might thus be compared with Damascus, Ispahan, or perhaps more appropriately with Delhi, a city rebuilt at various periods, but never on exactly the same site, and whose ruins consequently cover an area but little inferior to that assigned to the capital of Assyria. The primitive site, the one upon which Nineveh was originally founded, may possibly have been that occupied by the mound of Kouyunjik. It is thus alone that the ancient descriptions of Nineveh, if any value whatever is to be attached to them, can be reconciled with existing remains. The absence of all traces of buildings of any size within the inclosures of Nimroud, Kouyunjik, and Khorsabad, and the existence of propylaea forming part of the approaches to the palace, beneath and at a considerable distance from the great mound at Khorsabad, seem to add weight to this conjecture. Even Sir H. Rawlinson is compelled to admit that all the ruins may have formed part of "that group of cities, which in the time of the prophet Jonah, was known by the common name of Nineveh" (*On the Inscriptions of Babylonia and Assyria, Journ. As. Soc.*). But the existence of fortified palaces is consistent with Oriental custom, and with authentic descriptions of ancient Eastern cities. Such were the residences of the kings of Babylon, the walls of the largest of which were 60 stadia, or 7 miles in circuit, or little less than those of Kouyunjik, and considerably greater than those of Nimroud [BABYLON]. The Persians, who appear to have closely imitated the Assyrians in most things, constructed similar fortified parks, or paradises—as they were called—which included royal dwelling places (Quint. Curt. l. 7, c. 8). Indeed, if the interpretation of the cuneiform inscriptions is to be trusted, the Assyrian palaces were of precisely the same character; for that built by Essarhaddon at Nebbi Yunus, is stated to have been so large that horses and other animals were not only kept, but even bred within its walls (Fox Talbot, *Assyr. Texts translated*, 17, 18). It is evident that this description cannot apply to a building occupying so confined an area as the summit of this mound, but to a vast inclosed space. This aggregation of strongholds may illustrate the allusion in Nahum (iii. 14), "Draw thee waters for the siege, fortify thy strong holds," and "repair thy fortified places." They were probably surrounded by the dwellings of the mass of the population, either collected in groups, or scattered singly in the midst of fields, orchards, and gardens. There are still sufficient indications in the country around of the sites of such habitations. The fortified inclosures, which including the residences of the king, his family or immediate tribe, his principal officers, and probably the chief priests, may also have served as places of refuge for the inhabitants of the city at large in times of danger or attack. According to Diodorus (ii. 9) and Quintus Curtius (v. 1), there was land enough within the precincts of Babylon, besides gardens and orchards, to furnish corn for the wants of the whole population in case of siege; and in the book of Jonah, Nineveh is said to contain, besides its population, "much cattle" (iv. 11). As at Babylon, no great consecutive wall of inclosure connects all the ruins, such as that described by Diodorus, has been discovered at Nineveh, and no such wall ever existed, otherwise some traces of so vast and massive a structure must have remained to this day. The river Gomel, the modern Ghazir, may have formed the eastern boundary or defence of the city. As to the claims of the mound of Kalah Sherghat to represent the site of the primitive capital of Assyria called Asshur, they must rest entirely on the interpretation of the inscriptions. This city was founded, or added to, they are supposed to declare, by one Shamas-Iva, the son and viceroy, or satrap, of Ismi-Dagon, king of Babylon, who reigned, it is conjectured, about B.C. 1840. Assyria and its capital remained subject to Babylonia until B.C. 1273, when an independent Assyrian dynasty was founded, of which fourteen kings, or more, reigned at Kalah Sherghat. About B.C. 930 the seat of government, it is asserted, was transferred by Sardanapalus (the second of the name, and the Sardanapalus of the Greeks) to the city of Kalkhu or Calah (Nimroud, which had been founded by an earlier monarch named Shalmanubar. There it continued about 200 years, when Sennacherib made Nineveh the capital of the empire [ASSYRIA]. These assumptions seem to rest upon very slender grounds; and Dr. Hincks altogether rejects the theory of the Babylonian character of these early kings, believing them to be Assyrian (*Report to Trustees of Brit. Mus. on Cylinders and Terra-Cottas*). It is believed that on an inscribed terra-cotta cylinder discovered at Kalah Sherghat, the foundation of a temple is attributed to this Shamas-Iva. A royal name similar to that of his father, Ismi-Dagon, is read on a brick from some ruins in southern Babylonia, and the two kings are presumed to be identical, although there is no other evidence of the fact (Rawl. *Herod.* i. p. 456, note 5); indeed the only son of this Babylonian king mentioned in the inscriptions is read Ibil-anu-duna, a name entirely different from that of the presumed viceroy of Asshur. It is by no means an uncommon occurrence that the same names should be found in royal dynasties of very different periods.* The Assyrian dynasties furnish more than one example. It may be further observed that no remains of sufficient antiquity and importance have been discovered as

* To support the theory of the ancient capital of Assyria being Asshur, a further identification is required of two kings whose names are read Tiglath-pileser, one found in a rock-cut inscription at Bavian in the mountains to the E. of Mosul, the other occurring on the Kalah Sherghat cylinder. M. Oppert has questioned the identity of the two (Rawl. *Herod.* i. 459, and note).

Kalah Sherghat to justify the opinion that it was the ancient capital. The only sculpture found in the ruins, the seated figure in black basalt now in the British Museum, belongs to a later period than the monuments from the N.W. palace at Nimroud. Upon the presumed identification above indicated, and upon no other evidence, as far as we can understand, an entirely new system of Assyrian history and chronology has been constructed, of which a sketch has been given under the title ASSYRIA (see also Rawlinson's *Herod.* vol. i. p. 489). It need only be pointed out here that this system is at variance with sacred, classical, and monumental history, and can scarcely be accepted as proven, until the Assyrian ruins have been examined with more completeness than has hitherto been possible, and until the decipherment of the cuneiform inscriptions has made far greater progress. It has been shown how continuously tradition points to Nineveh as the ancient capital of Assyria. There is no allusion to any other city which enjoyed this rank. Its name occurs in the statistical table of Karnak, in conjunction with Naharaina or Mesopotamia, and on a fragment recently discovered by M. Mariette, of the time of Thotmas III., or about B.C. 1490 (Birch, *Trans. R. Soc. of Lit.* ii. 345, second Series); and no mention has been found on any Egyptian monument of such cities as Asshur and Calah. Sir H. Rawlinson, in a paper read before the R. S. of Lit., has, however, contended that the Naharayn, Saenkar, and Assuri of the Egyptian inscriptions are not Mesopotamia, Singar, and Assyria, and that Nin-i-ia is not Nineveh at all, but refers to a city in the chain of Taurus. But these conclusions are altogether rejected by Egyptian scholars. Further researches may show that Sennacherib's palace at Kouyunjik, and that of Sardanapalus at Nimroud, were built upon the site, and above the remains of very much earlier edifices. According to the interpretation of the inscriptions, Sardanapalus himself founded a temple at "Nineveh" (Rawl. *Herod.* i. 462), yet no traces of this building have been discovered at Kouyunjik. Sargon *restored* the walls of Nineveh, and declares that he erected his palace "near to Nineveh" (*id.* 474), whilst Sennacherib only claims to have *rebuilt* the palaces, which were "rent and split from extreme old age" (*id.* 475), employing 360,000 men, captives from Chaldsea, Syria, Armenia, and Cilicia, in the undertaking, and speaks of Nineveh as founded of old, and governed by his forefathers, "kings of the old time" (Fox Talbot, on Bellino's cylinder, *Journ. of As. Soc.* vol. xviii.). Old palaces, a great tower, and ancient temples dedicated to Ishtar and Bar Sharu, also stood there. Hitherto the remains of no other edifices than those attributed to Sennacherib and his successors have been discovered in the group of ruins opposite Mosul.

Prophecies relating to Nineveh, and Illustrations of the O. T.—These are exclusively contained in the Books of Nahum and Zephaniah; for although Isaiah foretells the downfall of the Assyrian empire (ch. x. and xiv.), he makes no mention of its capital. Nahum threatens the entire destruction of the city, so that it shall not rise again from its ruins: "With an overrunning flood he will make an utter end of the place thereof." "He will make an utter end; affliction shall not rise up the second time" (i. 8, 9). "Thy people is scattered upon the mountains, and no one gathereth them. There is no healing of thy bruise" (iii. 8, 18). The manner in which the city should be taken seems to be indicated. "The defence shall be prepared" (ii. 5) is rendered in the margin, reading "the covering or coverer shall be prepared," and by Mr. Vance Smith (*Prophecies on Assyria and the Assyrians*, 242), "the covering machine," the covered battering-ram or tower supposed to be represented in the bas-reliefs as being used in sieges. Some commentators believe that "the overrunning flood" refers to the agency of water in the destruction of the walls by an extraordinary overflow of the Tigris, and the consequent exposure of the city to assault through a breach; others, that it applies to a large and devastating army. An allusion to the overflow of the river may be contained in ii. 6, "The gates of the rivers shall be opened, and the palace shall be dissolved," a prophecy supposed to have been fulfilled when the Medo-Babylonian army captured the city. Diodorus (ii. 27) relates of that event, that "there was an old prophecy that Nineveh should not be taken till the river became an enemy to the city: and in the third year of the siege the river being swoln with continued rains, overflowed part of the city, and broke down the wall for twenty stadia; then the king thinking that the oracle was fulfilled and the river became an enemy to the city, built a large funeral pile in the palace, and collecting together all his wealth, and his concubines and eunuchs, burnt himself and the palace with them all: and the enemy entered the breach that the waters had made, and took the city." Most of the edifices discovered had been destroyed by fire, but no part of the walls of either Nimroud or Kouyunjik appears to have been washed away by the river. The Tigris is still subject to very high and dangerous floods during the winter and spring rains, and even now frequently reaches the ruins. When it flowed in its ancient bed at the foot of the walls a part of the city might have been overwhelmed by an extraordinary inundation. The likening of Nineveh to "a pool of water" (ii. 8) has been conjectured to refer to the moats and dams by which a portion of the country around Nineveh could be flooded. The city was to be partly destroyed by fire, "The fire shall devour thy bars," "then shall the fire devour thee" (iii. 13, 15). The gateway in the northern wall of the Kouyunjik inclosure had been destroyed by fire as well as the palaces. The population was to be surprised when unprepared, "while they are drunk as drunkards they shall be devoured as stubble fully dry" (i. 10). Diodorus states that the last and fatal assault was made when they were overcome with wine. In the bas-reliefs carousing scenes are represented, in which the king, his courtiers, and even the queen, reclining on couches or seated on thrones, and attended by musicians, appear to be pledging each other in bowls of wine (Botta, *Mon. de Nin.* pl. 63-67, 112, 113, and one very interesting slab in the Brit. Mus., figured on p. 556). The captivity of the inhabitants, and their removal to distant provinces, are predicted (iii. 18). Their dispersion, which occurred when the city fell, was in accordance with the barbarous custom of the age. The palace-temples were to be plundered of their idols, "out of the house of thy gods will I cut off the graven image and the molten image" (i. 14), and the city sacked of its wealth: "Take ye the spoil of silver, take the spoil of gold" (ii. 9). For ages the Assyrian edifices have been despoiled of their sacred images; and enormous amounts of gold and silver were, according to tradition, taken to Ecbatana by the conquering Medes (Diod. Sic.

ii.). Only one or two fragments of the precious metals were found in the ruins. Nineveh, after its fall, was to be "empty, and void, and waste" (ii. 10); "it shall come to pass, that all they that look upon thee shall flee from thee, and say, Nineveh is laid waste" (iii. 7). These epithets describe the present state of the site of the city. But the fullest and the most vivid and poetical picture of its ruined and deserted condition is that given by Zephaniah, who probably lived to see its fall. "He will make Nineveh a desolation, and dry like a wilderness. And flocks shall lie down in the midst of her, all the beasts of the nations: both the cormorant and the bittern shall lodge in the upper

King feasting. From Kouyunjik.

lintels of it: their voice shall sing in the windows: desolation shall be in the thresholds: for he shall uncover the cedar work how is she become a desolation, a place for beasts to lie down in! every one that passeth by her shall hiss and wag his hand" (ii. 13, 14, 15). The canals which once fertilised the soil are now dry. Except when the earth is green after the periodical rains the site of the city, as well as the surrounding country, is an arid yellow waste. Flocks of sheep and herds of camels may be seen seeking scanty pasture amongst the mounds. From the unwholesome swamp within the ruins of Khorsabad, and from the reedy banks of the little streams that flow by Kouyunjik and Nimroud may be heard the croak of the cormorant and the bittern. The cedar-wood which adorned the ceilings of the palaces has been uncovered by modern explorers (Layard, *Nin. & Bab.* 357), and in the deserted halls the hyena, the wolf, the fox, and the jackall, now lie down. Many allusions in the O. T. to the dress, arms, modes of warfare, and customs of the people of Nineveh, as well as of the Jews, are explained by the Nineveh monuments. Thus (Nah. ii. 3), "the shield of his mighty men is made red, the valiant men are in scarlet." The shields and the dresses of the warriors are generally painted red in the sculptures. The magnificent description of the assault upon the city (iii. 1, 2, 3) is illustrated in almost every particular (Layard, *Nin. and its Rem.* ii., part ii., ch. v.). The mounds built up against the walls of a besieged town (Is. xxxvii. 33; 2 K. xix. 32; Jer. xxxii. 24, &c.), the battering-ram (Ez. iv. 2), the various kinds of armour, helmets, shields, spears, and swords, used in battle and during a siege; the chariots and horses (Nah. iii. 3; CHARIOT), are all seen in various bas-reliefs (Layard, *Nin. and its Rem.* ii., part ii., chaps. iv. and v.). The custom of cutting off the heads of the slain and placing them in heaps (2 K. x. 8) is constantly represented (Layard, ii. 184). The allusion in 2 K. xix. 28, "I will put my hook in thy nose and my bridle in thy lips," is illustrated in a bas-relief from Khorsabad (*id.* 376).

The interior decoration of the Assyrian palaces is described by Ezekiel, himself a captive in Assyria and an eye-witness of their magnificence (xxiii. 14, 15). "She saw men of sculptured workmanship upon the walls; likenesses of the Chaldaeans pictured in red, girded with girdles upon their loins, with coloured flowing head-dresses upon their heads, with the aspect of princes all of them" (Lay. *Nin. and its Rem.* ii. 307); a description strikingly illustrated by the sculptured likenesses of the Assyrian kings and warriors (see especially Botta, *Mon. de Nin.* pl. 12). The mystic figures seen by the prophet in his vision (ch. i.), uniting the man, the lion, the ox, and the eagle, may have been suggested by the engle-headed idols, and man-headed bulls and lions (by some identified with the cherubim of the Jews [CHERUB]), and the sacred emblem of the

Winged deity.

"wheel within wheel" by the winged circle or globe frequently represented in the bas-reliefs (Lay. *Nin. and its Rem.* ii. p. 465).

Winged globe.

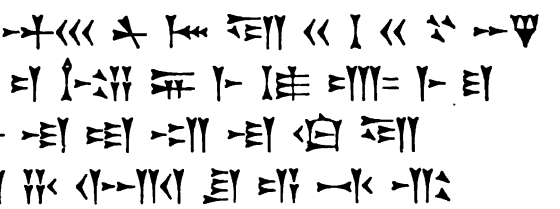
Arts.—The origin of Assyrian art is a subject at present involved in mystery, and one which offers a wide field for speculation and research. Those who derive the civilisation and political system of the Assyrians from Babylonia would trace their arts to the same source. One of the principal features of their architecture, the artificial platform serving as a substructure for their national edifices, may have been taken from a people inhabiting plains perfectly flat, such as those of Shinar, rather than an undulating country in which natural elevations are not uncommon, such as Assyria proper. But it still remains to be proved that there are artificial mounds in Babylonia of an earlier date than mounds on or near the site of Nineveh. Whether other leading features and the details of Assyrian architecture came from the same source, is much more open to doubt. Such Babylonian edifices as have been hitherto explored are of a later date than those of Nineveh, to which they appear to bear but little resemblance. The only features in common seem to be the ascending stages of the temples or tombs, and the use of enamelled bricks. The custom of panelling walls with alabaster or stone must have originated in a country in which such materials abound, as in Assyria, and not in the alluvial plains of southern Mesopotamia, where they cannot be obtained except at great cost or by great labour. The use of sun-dried and kiln-burnt bricks and of wooden columns would be common to both countries, as also such arrangements for the admission of light and exclusion of heat as the climate would naturally suggest.

In none of the arts of the Assyrians have any traces hitherto been found of progressive change. In the architecture of the most ancient known edifice all the characteristics of the style are already fully developed; no new features of any importance seem to have been introduced at a later period. The palace of Sennacherib only excels those of its remote predecessors in the vastness of its proportions, and in the elaborate magnificence of its details. In sculpture, as probably in painting also, if we possessed the means of comparison, the same thing is observable as in the remains of ancient Egypt. The earliest works hitherto discovered show the result of a lengthened period of gradual development, which, judging from the slow progress made by untutored men in the arts, must have extended over a vast number of years. They exhibit the arts of the Assyrians at the highest state of excellence they probably ever attained. The only change we can trace, as in Egypt, is one of decline or "decadence." The latest monuments, such as those from the palaces of Essarhaddon and his son, show perhaps a closer imitation of nature, especially in the representation of animals, such as the lion, dog, wild ass, &c., and a more careful and minute execution of details than those from the earlier edifices; but they are wanting in the simplicity yet grandeur of conception, in the invention, and in the variety of treatment displayed in the most ancient sculptures. This will at once be perceived by a comparison of the ornamental details of the two periods. In the older sculptures there occur the most graceful and varied combinations of flowers, beasts, birds, and other natural objects, treated in a conventional and highly artistic manner; in the later there is only a constant and monotonous repetition of rosettes and commonplace forms, without much display of invention or imagination compare Layard, *Mon. of Nineveh*, 1st series, especially plates 5, 8, 43-48, 50. with 2nd series, *passim;* and with Botta, *Monumens de Ninive*). The same remark applies to animals. The lions of the earlier period are a grand, ideal, and, to a certain extent, conventional representation of the beast—not very different from that of the Greek sculptor in the noblest period of Greek art (Layard, *Mon. of Nin.* 2nd series, pl. 2). In the later bas-reliefs, such as those from the palace of Sardanapalus III., now in the British Museum, the lions are more closely imitated from nature without any conventional elevation; but what is gained in truth is lost in dignity.

The same may be observed in the treatment of the human form, though in its representation the Assyrians, like the Egyptians, would seem to have been, at all times, more or less shackled by religious prejudices or laws. For instance, the face is almost invariably in profile, not because the sculptor was unable to represent the full face, one or two examples of it occurring in the bas-reliefs, but probably because he was bound by a generally received custom, through which he would not break. No new forms or combinations appear to have been introduced into Assyrian art during the four or five centuries, if not longer period, with which we are acquainted. We trace throughout the same eagle-headed, and fish-headed figures, the same divinities, the same composite forms at the doorways. In the earliest works, an attempt at composition, that is at a pleasing and picturesque grouping of the figures, is perhaps more evident than in the later,—as may be illustrated by the Lion-hunt from the N. W. Palace, now in the British Museum (Layard, *Mon. of Nin.* pl. 10). A parallel may in many respects be drawn between the arts of the Assyrians from their earliest known period to their latest, and those of Greece from Phidias to the Roman epoch, and of Italy from the 15th to the 18th century.

The art of the Nineveh monuments must in the present state of our knowledge be accepted as an original and national art, peculiar, if not to the Assyrians alone, to the races who at various periods possessed the country watered by the Tigris and Euphrates. As it was undoubtedly brought to its highest perfection by the Assyrians, and is especially characteristic of them, it may well and conveniently bear their name. From whence it was originally derived there is nothing as yet to show. If from Babylon, as some have conjectured, there are no remains to prove the fact. Analogies may perhaps be found between it and that of Egypt, but they are not sufficient to convince us that the one was the offspring of the other. These analogies, if not accidental, may have been derived, at some very remote period, from a common source. The two may have been offshoots from some common trunk which perished ages before either Nineveh or Thebes was founded; or the Phœnicians, as it has been suggested, may have introduced into the two countries, between which they were placed, and between which they may have formed a commercial link, the arts peculiar to each of them. Whatever the origin, the development of the arts of the two countries appears to have been affected and directed by very opposite conditions of national character, climate, geographical and geological position, politics, and religion. Thus, Egyptian architecture seems to have been derived from a stone prototype, Assyrian from a wooden one—in accordance with the physical nature of the two countries. Assyrian art is the type of power, vigour, and action; Egyptian that of

calm dignity and repose. The one is the expression of an ambitious, conquering, and restless nature; the other of a race which seems to have worked for itself alone and for eternity. At a late period of Assyrian history, at the time of the building of the Khorsabad palace (about the 8th century B.C.), a more intimate intercourse with Egypt through war or dynastic alliances than had previously existed, appears to have led to the introduction of objects of Egyptian manufacture into Assyria, and may have influenced to a limited extent its arts. A precisely similar influence proceeding from Assyria has been remarked at the same period in Egypt, probably arising from the conquest and temporary occupation of the latter country by the Assyrians, under a king whose name is read Asshur-bani-pal, mentioned in the cuneiform inscriptions (Birch, *Trans. of R. Soc. of Lit.*, new series). To this age belong the ivories, bronzes, and nearly all the small objects of an Egyptian character, though not apparently of Egyptian workmanship, discovered in the Assyrian ruins. It has been asserted, on the authority of an inscription believed to contain the names of certain Hellenic artists from Idalium, Citium, Salamis, Paphos, and other Greek cities, that Greeks were employed by Essarhaddon and his son in executing the sculptured decorations of their palaces (Rawl. *Herod.* i. 483). But, passing over the extreme uncertainty attaching to the decipherment of proper names in the cuneiform character, it must be observed that no remains whatever of Greek art of so early a period are known, which can be compared in knowledge of principles and in beauty of execution and of design with the sculptures of Assyria. Niebuhr has remarked of Hellenic art, that "anything produced before the Persian war was altogether barbarous" (34th Lecture on *Ancient History*). If Greek artists could execute such monuments in Assyria, why, it may be asked, did they not display equal skill in their own country? The influence, indeed, seems to have been entirely in the opposite direction. The discoveries at Nineveh show almost beyond a doubt that the Ionic element in Greek art was derived from Assyria, as the Doric came from Egypt. There is scarcely a leading form or a detail in the Ionic order which cannot be traced to Assyria—the volute of the column, the frieze of griffins, the honeysuckle-border, the guilloche, the Caryatides, and many other ornaments peculiar to the style.



The arts of the Assyrians, especially their architecture, spread to surrounding nations, as is usually the case when one race is brought into contact with another in a lower state of civilisation. They appear to have crossed the Euphrates, and to have had more or less influence on the countries between it and the Mediterranean. Monuments of an Assyrian character have been discovered in various parts of Syria, and further researches would probably disclose many more. The arts of the Phoenicians, judging from the few specimens preserved, show the same influence. In the absence of even the most insignificant remains, and of any implements which may with confidence be attributed to the Jews [ARMS], there are no materials for comparison between Jewish and Assyrian art. It is possible that the bronzes and ivories discovered at Nineveh were of Phoenician manufacture, like the vessels in Solomon's temple. On the lion-weights, now in the British Museum, are inscriptions both in the cuneiform and Phœnician characters. The Assyrian inscriptions seem to indicate a direct dependence of Judæa upon Assyria from a very early period. From the descriptions of the temple as "houses" of Solomon (cf. 1 K. vi., vii.; 2 Ch. iii., iv.; Joseph. viii. 2; Fergusson's *Palaces of Nineveh*; and Layard, *Nin. and Bab.* 642), it would appear that there was much similarity between them and the palaces of Nineveh, if not in the exterior architecture, certainly in the interior decorations, such as the walls panelled or wainscoted with sawn stones, the sculptures on the slabs representing trees and plants, the remainder of the walls above the skirting painted with various colours and pictures, the figures of the winged cherubim carved "all the house round," and especially on the doorways, the ornaments of open flowers, pomegranates, and lilies (apparently corresponding exactly with the rosettes, pomegranates, and honey-suckle ornaments of the Assyrian bas-reliefs, Botta, *Mon. de Nin.* and Layard, *Mon. Nin.*), and the ceiling, roof, and beams of cedar-wood. The Jewish edifices were however very much inferior in size to the Assyrian. Of objects of art (if we may use the term) contained in the Temple we have the description of the pillars, of the brass sea, and of various bronze or copper vessels. They were the work of Hiram, the son of a Phœnician artist by a Jewish woman of the tribe of Naphtali (1 K. vii. 14), a fact which gives us some insight into Phœnician art, and seems to show that the Jews had no art of their own, as Hiram was fetched from Tyre by Solomon. The Assyrian character of these objects is very remarkable. The two pillars and "chapiters" of brass are ornaments of lilies and pomegranates; the brass sea was supported on oxen, and its rim was ornamented with flowers of lilies, whilst the bases were graven with lions, oxen, and cherubim on the borders, and the plates of the ledges with cherubim, lions, and palm-trees. The vail of the temple, of different colours, had also cherubim wrought upon it. (Cf. Layard, *Nin. and Bab.* woodcut, p. 344, in which a large vessel, probably of bronze or copper, is represented supported upon oxen, and *Mon. Nin.* series 2, pl. 60, 65, 68,—in which vessels with embossed rims apparently similar to those of Solomon's temple are figured. Also series 1, pl. 43, 44, 48, in which embroideries with cherubim occur.)

The influence of Assyria to the eastward was even more considerable, extending far into Asia. The Persians copied their architecture (with such modifications as the climate and the building materials at hand suggested), their sculpture, probably their painting and their mode of writing, from the Assyrians. The ruined palaces of Persepolis show the same general plan of construction as those of Nineveh—the entrances formed by human-headed animals, the skirting of sculptured stone, and the inscribed slabs. The various relieve emblems and the ornamentation have the same Assyrian character. In Persia, however, a stone architecture prevailed, and the columns in that material have resisted to this day the ravages of time.

The Persians made an advance in one respect upon Assyrian sculpture, and probably painting likewise, in an attempt at a natural representation of drapery by the introduction of folds, of which there is only the slightest indication on Assyrian monuments. It may have been partly through Persia that the influence of Assyrian art passed into Asia Minor and thence into Greece; but it had probably penetrated far into the former country long before the Persian

domination. We find it strongly shown in the earliest monuments, as in those of Lycia and Phrygia, and in the archaic sculptures of Branchidae. But the early art of Asia Minor still offers a most interesting field for investigation. Amongst the Assyrians, the arts were principally employed, as amongst all nations in their earlier stages of civilisation, for religious and national purposes. The colossal figures at the doorways of the palaces were mythic combinations to denote the attributes of a deity. The "Man-Bull" and the "Man-Lion," are conjectured to be the gods "Nin" and "Nergal," presiding over war and the chace; the eagle-headed and fish-headed figures so constantly repeated in the sculptures, and as ornaments on vessels of metal, or in embroideries—Nisroch and Dagon. The bas-reliefs almost invariably record some deed of the king, as head of the nation, in war, and in combat with wild beasts, or his piety in erecting vast palace-temples to the gods. Hitherto no sculptures specially illustrating the private life of the Assyrians have been discovered, except one or two incidents, such as men baking bread or tending horses, introduced as mere accessories into the historical bas-reliefs. This may be partly owing to the fact that no traces whatever have yet been found of their burial places, or even of their mode of dealing with the dead. It is chiefly upon the walls of tombs that the domestic life of the Egyptians has been so fully depicted. In the useful arts, as in the fine arts, the Assyrians had made a progress which denotes a very high state of civilisation [ASSYRIA]. When the inscriptions have been fully examined and deciphered, it will probably be found that they had made no inconsiderable advance in the sciences, especially in astronomy, mathematics, numeration, and hydraulics. Although the site of Nineveh afforded no special advantages for commerce, and although she owed her greatness rather to her political position as the capital of the empire, yet, situated upon a navigable river communicating with the Euphrates and the Persian Gulf, she must have soon formed one of the great trading stations between that important inland sea, and Syria and the Mediterranean, and must have become a depôt for the merchandise supplied to a great part of Asia Minor, Armenia, and Persia. Her merchants are described in Ezekiel (xxvii. 24) as trading in blue clothes and broidered work (such as is probably represented in the sculptures), and in Nahum (iii. 16) as "multiplied above the stars of heaven." The animals represented on the black obelisk in the British Museum and on other monuments, the rhinoceros, the elephant, the double-humped camel, and various kinds of apes and monkeys, show a communication direct or indirect with the remotest parts of Asia. This intercourse with foreign nations, and the practice of carrying to Assyria as captives the skilled artists and workmen of conquered countries, must have contributed greatly to the improvement of Assyrian manufactures.

Writing and Language.—The ruins of Nineveh have furnished a vast collection of inscriptions partly carved on marble or stone slabs, and partly impressed upon bricks, and upon clay cylinders, or six-sided and eight-sided prisms, barrels, and tablets, which, used for the purpose when still moist, were afterwards baked in a furnace or kiln. (Cf. Ezekiel, iv. 1, "Take thee a tile . . . and pourtray upon it the city, even Jerusalem.") The cylinders are hollow, and appear, from the hole pierced through them, to have been mounted so as to turn round, and to present their several sides to the reader. The character employed was the arrow-headed or cuneiform—so called from each letter being formed by marks or elements resembling an arrow-head or a wedge. This mode of writing, believed by some to be of Turanian or Scythic origin, prevailed throughout the provinces comprised in the Assyrian, Babylonian, and the eastern portion of the ancient Persian empires, from the earliest times to which any known record belongs, or at least 20 centuries before the Christian era, down to the period of the conquests of Alexander; after which epoch, although occasionally employed, it seems to have gradually fallen into disuse. It never extended into Syria, Arabia, or Asia Minor, although it was adopted in Armenia.

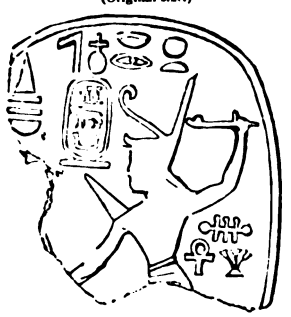
Specimen of the arrow-headed or cuneiform writing.

A cursive writing resembling the ancient Syrian and Phoenician, and by some believed to be the original form of all other cursive writing used in Western Asia, including the Hebrew, appears to have also been occasionally employed in Assyria, probably for documents written on parchment or papyrus, or perhaps leather skins. The Assyrian cuneiform character was of the same class as the Babylonian, only differing from it in the less complicated nature of its forms. Although the primary elements in the later Persian and so-called Median cuneiform were the same, yet their combination and the value of the letters were quite distinct. The latter, indeed, is but a form of the Assyrian. Herodotus terms all cuneiform writing the "Assyrian writing" (Herod. iv. 87). This character may have been derived from some more ancient form of hieroglyphic writing; but if so, all traces of such origin have disappeared. The Assyrian and Babylonian alphabet (if the term may be applied to above 200 signs) is of the most complicated, imperfect, and arbitrary nature—some characters being phonetic, others syllabic, others ideographic—the same character being frequently used indifferently. This constitutes one of the principal difficulties in the process of decipherment. The investigation first commenced by Grotefend (Heeren, *Asiatic Nations*, vol. ii. App. 2) has since been carried on with much success by Sir H. Rawlinson, Dr. Hincks, Mr. Norris, and Mr. Fox Talbot, in England, and by M. Oppert in France (see papers by those gentlemen in the *Journals of the Roy. As. Soc.*, in *Transactions of Royal Irish Academy*, in *Journal of Sacred Literature*, and in the *Athenaeum*). Although considerable doubt may still reasonably prevail as to the interpretation of details, as to grammatical construction, and especially as to the rendering of proper names, sufficient progress has been made to enable the student to ascertain with some degree of confidence the general meaning

and contents of an inscription. The people of Nineveh spoke a Semitic dialect, connected with the Hebrew and with the so-called Chaldee of the Books of Daniel and Ezra. This agrees with the testimony of the O. T. But it is asserted that there existed in Assyria, as well as in Babylonia, a more ancient tongue belonging to a Turanian or Scythic race, which is supposed to have inhabited the plains watered by the Tigris and Euphrates long before the rise of the Assyrian empire, and from which the Assyrians derived their civilisation and the greater part of their mythology. It was retained for sacred purposes by the conquering race, as the Latin was retained after the fall of the Roman Empire in the Catholic church. In fragments of vocabularies discovered in the record-chamber at Kouyunjik words in the two languages are placed in parallel columns, whilst a centre column contains a monographic or ideographic sign representing both. A large number of Turanian words or roots are further supposed to have existed in the Assyrian tongue, and tablets apparently in that language have been discovered in the ruins. The monumental inscriptions occur on detached stelae and obelisks, of which there are several specimens in the British Museum from the Assyrian ruins, and one in the Berlin Museum discovered in the island of Cyprus; on the colossal human-headed lions and bulls, upon parts not occupied by sculpture, as between the legs; on the sculptured slabs, generally in bands between two bas-reliefs, to which they seem to refer; and, as in Persia and Armenia, carved on the face of rocks in the hill-country. At Nimroud the same inscription is carved on nearly every slab in the N. W. palace, and generally repeated on the back, and even carried across the sculptured colossal figures. The Assyrian inscriptions usually contain the chronicles of the king who built or restored the edifice in which they are found, records of his wars and expeditions into distant countries, of the amount of tribute and spoil taken from conquered tribes, of the building of temples and palaces, and invocations to the gods of Assyria. Frequently every stone and kiln-burnt brick used in a building bears the name and titles of the king, and generally those of his father and grandfather are added. These inscribed bricks are of the greatest value in restoring the royal dynasties. The longest inscription on stone, that from the N. W. palace of Nineveh containing the records of Sardanapalus II., has 325 lines, that on the black obelisk has 210. The most important hitherto discovered in connexion with Biblical history, is that upon a pair of colossal human-headed bulls from Kouyunjik, now in the British Museum, containing the records of Sennacherib, and describing, amongst other events, his wars with Hezekiah. It is accompanied by a series of bas-reliefs believed to represent the siege and capture of Lachish (LACHISH; Layard, *Nin. and Bab.* p. 148-153).

Sennacherib on his Throne before Lachish.

A long list might be given of Biblical names occurring in the Assyrian inscriptions (*id.* [illegible]). Those of three Jewish kings have been read, Jehoash son of Khumri (Omri), on the black obelisk (Layard, *Nin. and Bab.* 613); Menahem on a slab from the S. W. palace, Nimroud, now in the British Museum (*id.* 617), and Hezekiah on the Kouyunjik records. The most important inscribed terra-cotta cylinders are — those from Kileh Sherghat, with the annals of a king, whose name is believed to read Tiglath Pileser, not the one mentioned in the 2nd Book of Kings, but an earlier monarch who is supposed to have reigned about B.C. 1110 (Rawl. *Herod.* i. 47); those from Khorsabad containing the annals of Sargon; those from Kouyunjik, especially one known as Bellino's cylinder, with the chronicles of Sennacherib; that from Nebi Yunus with the records of Esarhaddon, and the fragments of the cylinders with those of his son [illegible]



Jewish Captives from Lachish (Kouyunjik).

longest inscription on a cylinder is of 820 lines. Such cylinders and inscribed slabs were generally buried beneath the foundations of great public buildings. Many fragments of cylinders and a vast collection of inscribed clay tablets, many in perfect preservation, and some bearing the impressions of seals, were discovered in a chamber at Kouyunjik, and are now deposited in the British Museum. They appear to include historical documents, vocabularies, astronomical and other calculations, calendars, directions for the performance of religious ceremonies, lists of the gods, their attributes, and the days appointed for their worship, descriptions of countries, lists of animals, grants of lands, &c. &c. In this chamber was also found the piece of clay bearing the seal of the Egyptian king, So or Sabaco, and that of an Assyrian monarch, either Sennacherib or his son, probably affixed to a treaty between the two, which having been written on parchment or papyrus, had entirely perished (Layard, *Nin. and Bab.* p. 156).

Impressions of the Signets of the Kings of Assyria and Egypt. (Original size.)

Part of Cartouche of Sabaco, enlarged from the impression of his Signet.

The most important results may be expected when inscriptions so numerous and so varied in character are deciphered. A list of nineteen or twenty kings can already be compiled, and the annals of the greater number of them will probably be restored to the lost history of one of the most powerful empires of the ancient world, and of one which appears to have exercised perhaps greater influence than any other upon the subsequent condition and development of civilised man. [ASSYRIA.]

The only race now found near the ruins of Nineveh or in Assyria which may have any claim to be considered descendants from the ancient inhabitants of the country are the so-called Chaldæan or Nestorian tribes, inhabiting the mountains of Kurdistan, the plains round the lake of Ooroomiyah in Persia, and a few villages in the neighbourhood of Mosul. They still speak a Semitic dialect, almost identical with the Chaldee of the books of Daniel and Ezra. A resemblance, which may be but fan-

citul, has been traced between them and the representations of the Assyrians in the bas-reliefs. Their physical characteristics at any rate seem to mark them as of the same race. The inhabitants of this part of Asia have been exposed perhaps more than those of any other country in the world to the devastating inroads of stranger hordes. Conquering tribes of Arabs and of Tartars have more than once well-nigh exterminated the population which they found there, and have occupied their places. The few survivors from these terrible massacres have taken refuge in the mountain fastnesses, where they may still linger. A curse seems to hang over a land naturally rich and fertile, and capable of sustaining a vast number of human beings. Those who now inhabit it are yearly diminishing, and there seems no prospect that for generations to come this once-favoured country should remain other than a wilderness.

(Layard's *Nineveh and its Remains*; *Nineveh and Babylon*; and *Monuments of Nineveh*, 1st and 2nd Series; Botta's *Monument de Ninive*; Fergusson, *Palaces of Nineveh and Persepolis restored*; Vaux's *Nineveh and Persepolis*.) [A. H. L.]

NIN'EVITES (Νινευῖται: *Ninevitae*). The inhabitants of Nineveh (Luke xi. 30).

NI'SAN. [MONTHS.]

NIS'ROCH (נִסְרֹךְ: Μεσεσδχ, Mai's ed. Εσδρδχ; Alex. Εσορδχ in 2 K.; Νασαρδχ in Is.: *Nesroch*). The proper name of an idol of Nineveh, in whose temple Sennacherib was worshipping when assassinated by his sons, Adrammelech and Sharezer (2 K. xix. 37; Is. xxxvii. 38). Selden confesses his ignorance of the deity denoted by this name (*de Dis Syris*, synt. ii. c. 10); but Beyer, in his *Additamenta* (pp. 323-325) has collected several conjectures. Jarchi, in his note on Is. xxxvii. 38, explains Nisroch as "a beam, or plank, of Noah's ark," from the analysis which is given of the word by Rabbinical expositors (נסרא נוחא=נסרך). What the true etymology may be is extremely doubtful. If the origin of the word be Shemitic, it may be derived, as Gesenius suggests, from the Heb. נֶשֶׁר, which is in Arab. *nisr*, "an eagle," with the termination *ôch* or *âch*, which is intensive in Persian,[a] so that Nisroch would signify "the great eagle" (comp. ARIOCH). But it must be confessed that this explanation is far from satisfactory. It is adopted, however, by Mr. Layard, who identifies with Nisroch the eagle-headed human figure, which is one of the most prominent on the earliest Assyrian monuments, and is always represented as contending with and conquering the lion or the bull (*Nineveh*, ii. 458, 459). In another passage he endeavours to reconcile the fact that Asshur was the supreme god of the Assyrians, as far as can be determined from the inscriptions, with the appearance of the name Nisroch as that of the chief god of Nineveh, by supposing that Sennacherib may have been slain in the temple of Asshur, and that the Hebrews, seeing everywhere the eagle-headed figure, "may have believed it to be that of the peculiar god of the Assyrians, to whom they consequently gave a name denoting an eagle" (*Nin. & Bab.* 637, note). Other explanations, based upon the same etymology, have been given; such as that suggested by Beyer (*Addit.* p. 324), that Nisroch denotes "Noah's eagle," that is "Noah's bird," that is "Noah's dove," the

[a] So he says in his *Thes.*, but in his *Jessäa* (1. 976) he correctly calls it a diminutive.

love being an object of worship among the Assyrians (Lucian, *de Jov. trag.* c. 42); or that mentioned as more probable by Winer (*Realw.* s. v.), that it was the constellation Aquila, the eagle being in the Persian religion a symbol of Ormuzd. Parkhurst, deriving the word from the Chaldee root כָּרַךְ, *serac* (which occurs in Dan. vi. in the form סָרְכַיָּא, *sărecayyâ*, and is rendered in the A. V. "presidents"), conjectures that Nisroch may be the impersonation of the solar fire, and substantially identical with Molech and Milcom, which are both derived from a root similar in meaning to *serac*. Nothing, however, is certain with regard to Nisroch, except that these conjectures, one and all, are very little to be depended on. Sir H. Rawlinson says that Asshur had no temple at Nineveh in which Sennacherib could have been worshipping (Rawlinson, *Herod.* I. p. 590). He conjectures that Nisroch is not a genuine reading. Josephus has a curious variation. He says (Ant. X. 1 §5) that Sennacherib was buried in his own temple called *Arasce* (*ἐν τῷ ἰδίῳ ναῷ Ἀράσκῃ λεγομένῳ*). [W. A. W.]

NITRE (נֶתֶר, *nether*: ἅλκος, νίτρον: *nitrum*) occurs in Prov. xxv. 20, "As he that taketh away a garment in cold weather, and as vinegar upon *nether*, so is he that singeth songs to an heavy heart;" and in Jer. ii. 22, where it is said of sinful Judah, "though thou wash thee with *nether* and take thee much *borith* [SOAP], yet thine iniquity is marked before me." The substance denoted is not that which we now understand by the term *nitre*, *i. e.* nitrate of potassa—"saltpetre"—but the *νίτρον* or *λίτρον* of the Greeks, the *nitrum* of the Latins, and the *natron* or native carbonate of soda of modern chemistry. Much has been written on the subject of the nitrum of the ancients; it will be enough to refer the reader to Beckmann, who (*History of Inventions*, ii. 482, Bohn's ed.) has devoted a chapter to this subject, and to the authorities mentioned in the notes. It is uncertain at what time the English term *nitre* first came to be used for *saltpetre*, but our translators no doubt understood thereby the carbonate of soda, for *nitre* is so used by Holland in his translation of Pliny (xxxi. 10) in contradistinction to *saltpetre*, which he gives as the marginal explanation of *aphronitrum*.

The latter part of the passage in Proverbs is well explained by Shaw, who says (*Trav.* ii. 387), "the unsuitableness of the singing of songs to a heavy heart is very finely compared to the contrariety there is between vinegar and natron." This is far preferable to the explanation given by Michaelis (*De Nitro Hebraeor.* in *Commentat. Societ. Reg. praelect.* i. 166; and *Suppl. Lex. Heb.* p. 1704), that the simile alludes to the unpleasant smell arising from the admixture of the acid and alkali; it points rather to the extreme mental agitation produced by ill-timed mirth, the *grating* against the feelings, to make use of another metaphor. Natrum was and is still used by the Egyptians for washing linen, the value of soda in this respect is well known; this explains Jer. *l. c.*, "though thou wash thee with soda," &c. Hasselquist (*Trav.* 275) says that natrum is dug out of a pit or mine near Mantura in Egypt, and is mixed with limestone and is of a whitish-brown colour. The Egyptians use it, (1) to put into bread instead of east, (2) instead of soap, (3) as a cure for the toothache, being mixed with vinegar. Compare also Forskål (*Flor. Aegypt. Arab.* p. xlvi.), who gives its Arabic names, *atrun* or *natrun*.

Natron is found abundantly in the well-known soda lakes of Egypt described by Pliny (xxxi. 10) and referred to by Strabo (xvii. A. 1155. ed. Kramer), which are situated in the barren valley of *Bahr-bela-ma* (the Waterless Sea), about 50 miles W. of Cairo; the natron occurs in whitish or yellowish efflorescent crusts, or in beds three or four feet thick, and very hard (Volney, *Trav.* i. 15, which in the winter are covered with water about two feet deep; during the other nine months of the year the lakes are dry, at which period the natron is procured. (See Andréossi, *Mémoire sur la Vallée des Lacs de Natron*, in *Mém. sur l'Égypte*, i. 276, &c.; Berthollet, *Observat. sur le Natron*, *ibid.* p. 310; *Descript. de l'Égypte*, xxi. 505. [W. H.]

NO. [NO-AMON.]

NOADI'AH (נוֹעַדְיָה: Νωαδία: *Noadia*). 1. A Levite, son of Binnui, who with Meremoth, Eleazar, and Jozabad, weighed the vessels of gold and silver belonging to the Temple which were brought back from Babylon (Ezr. viii. 33). In 1 Esd. viii. 63, he is called "Moeth the son of Sabbaa."

2. (*Noadia*). The prophetess Noadiah joined Sanballat and Tobiah in their attempt to intimidate Nehemiah while rebuilding the wall of Jerusalem (Neh. vi. 14). She is only mentioned in Nehemiah's denunciation of his enemies, and is not prominent in the narrative.

NO'AH (נֹחַ: Νῶε; Joseph. Νέως: *Noë*), the tenth in descent from Adam, in the line of Seth, was the son of Lamech, and grandson of Methuselah. Of his father Lamech all that we know is comprised in the words that he uttered on the birth of his son, words the more significant when we contrast them with the saying of the other Lamech of the race of Cain, which have also been preserved. The one exults in the discovery of weapons by which he may defend himself in case of need. The other, a tiller of the soil, mourns over the curse which rests on the ground, seeing in it evidently the consequence of sin. It is impossible to mistake the religious feeling which speaks of "the ground which *Jehovah* hath cursed." Not less evident is the bitter sense of weary and fruitless labour, mingled with better hopes for the future. We read that on the birth of a son "he called his name Noah, saying, This shall comfort us, for our work and labour of our hands, because of (or from) the ground which Jehovah hath cursed." Nothing can be more exquisitely true and natural than the way in which the old man's saddened heart turns fondly to his son. His own lot had been cast in evil times; "but this," he says, "shall comfort us." One hardly knows whether the sorrow or the hope predominates. Clearly there is an almost prophetic feeling in the name which he gives his son, and hence some Christian writers have seen in the language a prophecy of the Messiah, and have supposed that as Eve was mistaken on the birth of Cain, so Lamech in like manner was deceived in the hope of Noah. But there is no reason to infer from the language of the narrative that the hopes of either were of so definite a nature. The knowledge of a personal Deliverer was not vouchsafed till a much later period.

In the reason which Lamech gives for calling his son Noah, there is a play upon the name which it is impossible to preserve in English. He calls his name Noah (נֹחַ, Noach, rest), saying, "This same

that comfort us" (יְנַחֲמֵנוּ, yenachamênû). It is quite plain that the name "rest," and the verb "comfort," are of different roots; and we must not try to make a philologist of Lamech, and suppose that he was giving an accurate derivation of the name Noah. He merely plays upon the name, after a fashion common enough in all ages and countries.

Of Noah himself from this time we hear nothing more till he is 500 years old, when it is said he begat three sons, Shem, Ham, and Japhet.[a]

Very remarkable, however, is the glimpse which we get of the state of society in the ante-diluvian world. The narrative it is true is brief, and on many points obscure: a mystery hangs over it which we cannot penetrate. But some few facts are clear. The wickedness of the world is described as having reached a desperate pitch, owing it would seem in a great measure to the fusion of two races which had hitherto been distinct. And further the marked features of the wickedness of the age were lust and brutal outrage. "They took them wives of all which they chose;" and, "the earth was filled with violence." "The earth was corrupt; for all flesh had corrupted his way upon the earth." So far the picture is clear and vivid. But when we come to examine some of its details, we are left greatly at a loss. The narrative stands thus:

"And it came to pass when men (the Adam) began to multiply on the face of the ground and daughters were born unto them; then the sons of God (the Elohim) saw the daughters of men (the Adam) that they were fair, and they took to them wives of all that they chose. And Jehovah said, My spirit shall not for ever rule (or be humbled) in men, seeing that they are [or, in their error they are] but flesh, and their days shall be a hundred and twenty years. The Nephilim were in the earth in those days; and also afterwards when the sons of God (the Elohim) came in unto the daughters of men (the Adam), and children were born to them, these were the heroes which were of old, men of renown."

Here a number of perplexing questions present themselves: Who were the sons of God? Who the daughters of men? Who the Nephilim? What is the meaning of "My spirit shall not always rule, or dwell, or be humbled in men;" and of the words which follow, "But their days shall be an hundred and twenty years?"

We will briefly review the principal solutions which have been given of these difficulties.

a. Sons of God and daughters of men.

Three different interpretations have from very early times been given of this most singular passage.

1. The "sons of Elohim" were explained to mean sons of princes, or men of high rank (as in Ps. lxxxii. 6, *b'né 'Elyón*, sons of the Most High) who degraded themselves by contracting marriages with "the daughters of men." *i. e.* with women of inferior position. This interpretation was defended by Ps. xlix. 3, where "sons of men," *b'né ádám*, means "men of low degree," as opposed to *b'né ísh*, "men of high degree." Here, however, the opposition is with *b'né ha-Elohim*, and not with *b'né ísh*, and therefore the passages are not parallel. This is the interpretation of the Targum of Onkelos, following the oldest Palestinian Kabbala, of the later Targum, and of the Samaritan Vers. So also Symmachus, Saadia, and the Arabic of Erpenius, Aben Ezra, and R. Sol. Isaaki. In recent times this view has been elaborated and put in the most favourable light by Schiller (*Werke*, x. 401, &c.); but it has been entirely abandoned by every modern commentator of any note.

2. A second interpretation, perhaps not less ancient, understands by the "sons of Elohim," angels. So some MSS. of the LXX., which according to Procopius and Augustine (*De Civit. Dei*, xv. 23), had the reading ἄγγελοι τοῦ Θεοῦ, whilst others had υἱοὶ τοῦ Θεοῦ, the last having been generally preferred since Cyril and Augustine; so Joseph. *Ant.* i. 3; Philo *De Gigantibus* [perhaps Aquila, who has υἱοὶ τοῦ Θεοῦ, of which however Jerome says, *Deos intelligens angelos sive sanctos*]; the Book of Enoch as quoted by Georgius Syncellus in his Chronographia, where they are termed οἱ ἐγρήγοροι, "the watchers" (as in Daniel); the Book of Jubilees (translated by Dillmann from the Ethiopic); the later Jewish Hagada, whence we have the story of the fall of Shamchazai and Azazel,[b] given by Jellinek in the *Midrash Abchir*; and most of the older Fathers of the Church, finding probably in their Greek MSS. ἄγγελοι τοῦ Θεοῦ, as Justin, Tatian, Athenagoras, Clemens Alex., Tertullian, and Lactantius. This view, however, seemed in later times to be too monstrous to be entertained. R. Sim. b. Jochai anathematized it. Cyrill calls it ἀτοπώτατον. Theodoret (*Quaest. in Gen.*) declares the maintainers of it to have lost their senses, ἐμβρόντητοι καὶ ἄγαν ἠλίθιοι; Philastrius numbers it among heresies, Chrysostom among blasphemies. Finally, Calvin says of it, "Vetus illud commentum de angelorum concubitu cum mulieribus sua absurditate abunde refellitur, ac mirum est doctos viros tam crassis et prodigiosis deliriis fuisse olim fascinatos." Notwithstanding all which, however, many modern German commentators very strenuously assert this view. They rest their argument in favour of it mainly on these two particulars; first, that "sons of God" is everywhere else in the O. T. a name of the angels; and next, that St. Jude seems to lend the sanction of his authority to this interpretation. With regard to the first of these reasons, it is not even certain that in all other passages of Scripture where "the sons of God" are mentioned angels are meant.

[a] In marked contrast with the simplicity and soberness of the Biblical narrative, is the wonderful story told of Noah's birth in the book of Enoch. Lamech's wife, it is said, "brought forth a child, the flesh of which was white as snow, and red as a rose; the hair of whose head was white like wool, and long; and whose eyes were beautiful. When he opened them he illuminated all the house like the sun. And when he was taken from the hands of the midwife, opening also his mouth, he spoke to the Lord of righteousness." Lamech is terrified at the prodigy, and goes to his father Mathusala, and tells him that he has begotten a son who is unlike other children. On hearing the story, Mathusala proceeds, at Lamech's entreaty, to consult Enoch, "whose residence is with the angels." Enoch explains that, in the days of his father Jared, "those who were from heaven disregarded the word of the Lord . . . laid aside their class and intermingled with women;" that consequently a deluge was to be sent upon the earth, whereby it should be "washed from all corruption;" that Noah and his children should be saved and that his posterity should beget on the earth giants, not spiritual, but carnal (Book of Enoch, ch. cv. p. 161-3).

[b] In Beresh. Rab. in Gen. vi. 2, this Azazel is declared to be the tutelary deity of women's ornaments and paint and is identified with the Azazel in Lev xvi. 8.

It is not absolutely *necessary* so to understand the designation either in Ps. xxix. 1 or lxxxix. 6, or even in Job i., ii. In any of these passages it might mean holy men. Job xxxviii. 7, and Dan. iii. 25, are the only places in which it *certainly* means angels. The argument from St. Jude is of more force; for he does compare the sin of the angels to that of Sodom and Gomorrha (*τούτοις* in ver. 7 must refer to the angels mentioned in ver. 6), as if it were of a like unnatural kind. And that this was the meaning of St. Jude is rendered the more probable when we recollect his quotation from the Book of Enoch where the same view is taken. Further, that the angels had the power of assuming a corporeal form seems clear from many parts of the O. T. All that can be urged in support of this view has been said by Delitzsch in his *Die Genesis ausgelegt*, and by Kurtz, *Gesch. des Alten Bundes*, and his treatise, *Die Ehen der Söhne Gottes*. And it must be confessed that their arguments are not without weight. The early existence of such an interpretation seems at any rate to indicate a starting-point for the heathen mythologies. The fact, too, that from such an intercourse "the mighty men" were born, points in the same direction. The Greek "heroes" were sons of the gods; *οὐκ οἶσθα* says Plato in the Cratylus, *ὅτι ἡμίθεοι οἱ ἥρωες; πάντες δήπου γεγόνασιν ἐρασθέντες ἢ θεὸς θνητῆς ἢ θνητοὶ θεᾶς*. Even Hesiod's account of the birth of the giants, monstrous and fantastic as it is, bears tokens of having originated in the same belief. In like manner it may be remarked that the stories of *incubi* and *succubi*, so commonly believed in the middle ages, and which even Heidegger (*Hist. Sacr.* i. 289) does not discredit, had reference to a commerce between demons and mortals of the same kind as that narrated in Genesis.[e]

Two modern poets, Byron (in his drama of *Cain*) and Moore (in his *Loves of the Angels*), have availed themselves of this last interpretation for the purpose of their poems.

3. The interpretation, however, which is now most generally received, is that which understands by "the sons of the Elohim" the family and descendants of Seth, and by "the daughters of man (Adam)," the women of the family of Cain. So the Clementine Recognitions interpret "the sons of the Elohim" as Homines justi qui angelorum vixerant vitam. So Ephrem, and the Christian Adam-Book of the East: so also, Theodoret, Chrysostom, Cyril of Alexandria, Jerome, Augustine, and others; and in later times Luther, Melancthon, Calvin, and a whole host of recent commentators. They all suppose that whereas the two lines of descent from Adam—the family of Seth who preserved their faith in God, and the family of Cain who lived only for this world—had hitherto kept distinct, now a mingling of the two races took place which resulted in the thorough corruption of the former, who falling away, plunged into the deepest abyss of wickedness, and that it was this universal corruption which provoked the judgment of the Flood.

4. A fourth interpretation has recently been advanced and maintained with considerable ingenuity, by the author of the *Genesis of the Earth and Man*. He understands by "the sons of the Elohim" the "servants or worshippers of *false gods*" [taking Elohim to mean not God but gods], whom he supposes to have belonged to a distinct pre-Adamite race. "The daughters of men," he contends, should be rendered "the daughters of Adam or the Adamites," women, that is, descended from Adam. These last had hitherto remained true in their faith and worship, but were now perverted by the idolaters who intermarried with them. But this hypothesis is opposed to the direct statements in the early chapters of Genesis, which plainly teach the descent of all mankind from one common source.

Whichever of these interpretations we adopt (the third perhaps is the most probable), one thing at least is clear, that the writer intends to describe a fusion of races hitherto distinct, and to connect with this two other facts; the one that the offspring of these mixed marriages were men remarkable for strength and prowess (which is only in accordance with what has often been observed since, viz., the superiority of the mixed race as compared with either of the parent stocks); the other, that the result of this intercourse was the thorough and hopeless corruption of both families alike.

b. But who were the Nephilim? It should be observed that they are not spoken of (as has sometimes been assumed), as the offspring of the "sons of the Elohim" and "the daughters of men." The sacred writer says, "the Nephilim were on the earth in those days," before he goes on to speak of the children of the mixed marriages. The name, which has been variously explained, only occurs once again in Num. xiii. 33, where the Nephilim are said to have been one of the Canaanitish tribes. They are there spoken of as "men of great stature," and hence probably the rendering *γίγαντες* of the LXX. and "the giants" of our A. V. But there is nothing in the word itself to justify this interpretation. If it is of Hebrew origin (which however may be doubted) it must mean either "fallen," *i. e.* apostate ones; or those who "fall upon" others, violent men, plunderers, freebooters, &c. It is of far more importance to observe that if the Nephilim of Canaan were descendants of the Nephilim in Gen. vi. 4, we have here a very strong argument for the non-universality of the Deluge.

c. In consequence of the grievous and heavy wickedness of the world at this time, God resolves to destroy it. "My spirit," He says, "shall not always "dwell" (LXX. Vulg. Saad.)—or "bear sway" (Onk.) in man—inasmuch as he is but flesh. The meaning of which seems to be that whilst God had given His Spirit in man, *i. e.* not only the breath of life, but a spiritual part capable of recognising, loving, and worshipping Him, man had so much sunk down into the lowest and most debasing of sensual pleasures, as to have almost extinguished the spiritual light within him; as one of the Fathers says: "mens victa libidine fit caro: the soul and spirit became transubstantiated into flesh. Then follows: "Yet his days shall be a hundred and twenty years," which has been interpreted by some to mean, that so long a time of grace shall be given for repentance, viz. 120 years before the Flood shall come; and by others, that the duration of human life shall in future be limited to this term of years, instead of extending over centuries as before. This last seems the most natural interpretation of the Hebrew words. Of Noah's life during this age of almost universal apostasy we are told but little. It is merely said, that he was a righteous man and perfect in his generations (*i. e.* amongst his contemporaries), and that he, like Enoch, walked with God. The last expressive phrase is used of none other but

[e] Thomas Aquin. (pars I. qu. 51, art. 3) argues that it was possible for angels to have children by mortal women.

three two only. To him God revealed His purpose to destroy the world, commanding him to prepare an ark for the saving of his house. And from that time till the day came for him to enter into the Ark, we can hardly doubt that he was engaged in active, but as it proved unavailing efforts to win those about him from their wickedness and unbelief. Hence St. Peter calls him "a preacher of righteousness." Besides this we are merely told that he had three sons, each of whom had married a wife; that he built the Ark in accordance with Divine direction; and that he was 600 years old when the Flood came.

Both about the Ark and the Flood so many questions have been raised, that we must consider each of these separately.

The Ark.—The precise meaning of the Hebrew word (תֵּבָה, *têbâh*) is uncertain. The word only occurs here and in the second chapter of Exodus, where it is used of the little papyrus boat in which the mother of Moses entrusted her child to the Nile. In all probability it is to the old Egyptian that we are to look for its original form.

Bunsen, in his vocabulary,[d] gives *tba*, "a chest," *tpé*, "a boat," and in the Copt. Vers. of Exod. ii. 3, 5, ΘΗΒΙ, is the rendering of *têbâh*. The LXX. employ two different words. In the narrative of the flood they use *κιβωτός*, and in that of Moses *θῆβις*, or according to some MSS. *θηβή*. The Book of Wisdom has *σχεδία*; Berosus and Nicol. Damasc. quoted in Josephus, *πλοῖον* and *λάρναξ*. The last is also found in Lucian, *De Deâ Syr.* c. 12. In the Sibylline Verses the ark is *δουράτεον δῶμα*, *οἶκος* and *κιβωτός*. The Targum and the Koran have each respectively given the Chaldee and the Arabic form of the Hebrew word.

This "chest," or "boat," was to be made of gopher (*i. e.* cypress) wood, a kind of timber which both for its lightness and its durability was employed by the Phoenicians for building their vessels. Alexander the Great, Arrian tells us (vii. 19), made use of it for the same purpose. The planks of the ark, after being put together, were to be protected by a coating of pitch, or rather bitumen (כֹּפֶר, LXX. *ἄσφαλτος*), which was to be laid on both inside and outside, as the most effectual means of making it water-tight, and perhaps also as a protection against the attacks of marine animals. Next to the material, the method of construction is described. The ark was to consist of a number of "nests" (קִנִּים), or small compartments, with a view no doubt to the convenient distribution of the different animals and their food. These were to be arranged in three tiers, one above another; "with lower, second, and third (stories) shalt thou make it." Means were also to be provided for letting light into the ark. In the A. V. we read, "A *window* shalt thou make to the ark, and in a cubit shalt thou finish it above:"—words which it must be confessed convey no very intelligible idea. The original, however, is obscure, and has been differently interpreted. What the "window," or "light-hole" (צֹהַר, *tsôhar*) was, is very puzzling. It was to be at the top of the ark apparently. If the words "unto a cubit (אֶל־אַמָּה) shalt thou finish it *above*," refer to the window and not to the ark itself, they seem to imply that this aperture, or skylight, extended to the breadth of a cubit the whole length of the roof.[e] But if so, it could not have been merely an open slit, for that would have admitted the rain. Are we then to suppose that some transparent, or at least translucent, substance was employed? It would almost seem so.[f] A different word is used in chap. viii. 6, where it is said that Noah opened the window of the ark. There the word is חַלּוֹן (*challôn*), which frequently occurs elsewhere in the same sense. Certainly the story as there given does imply a transparent window as Saalschütz (*Archaeol.* i. 311) has remarked.[g] For Noah could watch the motions of the birds outside, whilst at the same time he had to open the window in order to take them in. Supposing then the *tsôhar* to be, as we have said, a skylight, or series of skylights running the whole length of the ark (and the fem. form of the noun inclines one to regard it as a collective noun), the *challôn*[h] might very well be a single compartment of the larger window, which could be opened at will. But besides the window there was to be a door. This was to be placed in the side of the ark. "The door must have been of some size to admit the larger animals, for whose ingress it was mainly intended. It was no doubt above the highest draught mark of the ark, and the animals ascended to it probably by a sloping embankment. A door

[d] *Egypt's Place*, &c., i. 482.

[e] Knobel's explanation is different. By the words, "to a cubit (or within a cubit) shalt thou finish it above," he understands that, the window being in the side of the ark, a space of a cubit was to be left between the top of the window and the overhanging roof of the ark which Noah removed after the flood had abated (viii. 13). There is however no reason to conclude, as he does, that there was only one light. The great objection to supposing that the window was in the side of the ark, is that then a great part of the interior must have been left in darkness. And again we are told (viii. 13), that when the Flood abated Noah removed the covering of the ark, to look about him to see if the earth were dry. This would have been unnecessary if the window had been in the side. "Unto a cubit shalt thou finish it above" can hardly mean, as some have supposed, that the roof of the ark was to have this pitch; for, considering that the ark was to be 50 cubits in breadth, a roof of a cubit's pitch would have been almost flat.

[f] Symm. renders the word *διαφανές*. Theodoret has merely *θύραν*; Gr. Venet. *φωταγωγόν*; Vulg. *fenestram*. The LXX. translate, strangely enough, *ἐπισυνάγων ποιήσεις τὴν κιβωτόν*. The root of the word indicates that the *tsôhar* was something *shining*. Hence probably the Talmudic explanation, that God told Noah to fix precious stones in the ark, that they might give as much light as midday (Sanh. 108 *b*).

[g] The only serious objection to this explanation is the supposed improbability of any substance like glass having been discovered at that early period of the world's history. But we must not forget that even according to the Hebrew chronology the world had been in existence 1656 years at the time of the Flood, and according to the LXX., which is the more probable, 2262. Vast strides must have been made in knowledge and civilization in such a lapse of time. Arts and sciences may have reached a ripeness, of which the record, from its scantiness, conveys no adequate conception. The destruction caused by the Flood must have obliterated a thousand discoveries, and left men to recover again by slow and patient steps the ground they had lost.

[h] A different word from either of these is used in vii. 11 of the windows of heaven, אֲרֻבֹּת, *'arubbôth* (from אָרַב, "to interweave") lit. "net works" or "gratings" (Gen. *Thes.* in v.)

in the side is not more difficult to understand than the port holes in the sides of our vessels."[1]

Of the shape of the ark nothing is said; but its dimensions are given. It was to be 300 cubits in length, 50 in breadth, and 30 in height. Supposing the cubit here to be the cubit of natural measurement, reckoning from the elbow to the top of the middle finger, we may get a rough approximation as to the size of the ark. The cubit, so measured (called in Deut. iii. 11, "the cubit of a man"), must of course, at first, like all natural measurements, have been inexact and fluctuating. In later times no doubt the Jews had a standard common cubit, as well as the royal cubit and sacred cubit. We shall probably, however, be near enough to the mark if we take the cubit here to be the common cubit, which was reckoned (according to Mich., Jahn, Gesen. and others) as equal to six hand-breadths, the hand-breadth being 3½ inches. This therefore gives 21 inches for the cubit.[k] Accordingly the ark would be 525 feet in length, 87 feet 6 inches in breadth, and 52 feet 6 inches in height. This is very considerably larger than the largest British man-of-war. The Great Eastern, however, is both longer and deeper than the ark, being 680 feet in length (691 on deck), 83 in breadth, and 58 in depth. Solomon's Temple, the proportions of which are given 1 K. vi. 2, was the same height as the ark, but only one-fifth of the length, and less than half the width.

It should be remembered that this huge structure was only intended to float on the water, and was not in the proper sense of the word a ship. It had neither mast, sail, nor rudder; it was in fact nothing but an enormous floating house, or oblong box rather, "as it is very likely," says Sir W. Raleigh, "that the ark had *fundum planum*, a *flat bottom*, and not raysed in form of a ship, with a sharpness forward, to cut the waves for the better speed." The figure which is commonly given to it by painters, there can be no doubt is wrong. Two objects only were aimed at in its construction: the one was that it should have ample stowage, and the other that it should be able to keep steady upon the water. It was never intended to be carried to any great distance from the place where it was originally built. A curious proof of the suitability of the ark for the purpose for which it was intended was given by a Dutch merchant, Peter Jansen, the Mennonite, who in the year 1604 had a ship built at Hoorn of the same proportions (though of course not of the same size) as Noah's ark. It was 120 feet long, 20 broad, and 12 deep. This vessel, unsuitable as it was for quick voyages, was found remarkably well adapted for freightage. It was calculated that it would hold a third more lading than other vessels without requiring more hands to work it. A similar experiment is also said to have been made in Denmark, where, according to Reyher, several vessels called "fleuten" or floats were built after the model of the ark.

After having given Noah the necessary instructions for the building of the ark, God tells him the purpose for which it was designed. Now for the first time we hear how the threatened destruction was to be accomplished, as well as the provision which was to be made for the repeopling of the earth with its various tribes of animals. The earth is to be destroyed by water. "And I, behold I do bring the flood (הַמַּבּוּל)—waters upon the earth—to destroy all flesh wherein is the breath of life ... but I will establish my covenant with thee, &c." (vi. 17, 18). The inmates of the ark are then specified. They are to be Noah and his wife, and his three sons with their wives:—whence it is plain that he and his family had not yielded to the prevailing custom of polygamy. Noah is also to take a pair of each kind of animal into the ark with him that he may preserve them alive; birds, domestic animals (בְּהֵמָה),[m] and creeping things are particularly mentioned. He is to provide for the wants of each of these stores "of every kind of food that is eaten." It is added, "Thus did Noah; according to all that God (Elohim) commanded him, so did he."

A remarkable addition to these directions occurs in the following chapter. The pairs of animals are now limited to one of *unclean* animals, whilst of *clean* animals and birds (ver. 2), Noah is to take to him seven pairs (or as others think, seven individuals, that is three pairs and one supernumerary male for sacrifice).[n] How is this addition to be accounted for? May we not suppose that we have here traces of a separate document interwoven by a later writer with the former history? The passage indeed has not, to all appearance, been incorporated intact, but there is a colouring about it which seems to indicate that Moses, or whoever put the Book of Genesis into its present shape, had here consulted a different narrative. The distinct use of the Divine names in the same phrase, vi. 22, and vii. 5—of the former Elohim, in the latter Jehovah—suggests

[1] Kitto, *Bible Illustrations, Antediluvians*, &c., p. 142. The Jewish notion was that the ark was entered by means of a ladder. On the steps of this ladder, the story goes, Og, king of Bashan, was sitting when the Flood came; and on his pledging himself to Noah and his sons to be their slave for ever, he was suffered to remain there, and Noah gave him his food each day out of a hole in the ark (Pirk. R. Eliezer).

[k] See Winer, *Realw.* "Elle." Sir Walter Raleigh, in his *History of the World*, reckons the cubit at 18 inches. Dr. Kitto calls this a safe way of estimating the cubit in Scripture, but gives it himself as = 21·888 inches. For this inconsistency he is taken to task by Hugh Miller, who adopts the measurement of Sir W. Raleigh.

[l] Augustine (*De Civ. D.* lib. xv.) long ago discovered another excellence in the proportions of the ark; and that is, that they were the same as the proportions of the perfect human figure, the length of which from the sole to the crown is six times the width across the chest, and ten times the depth of the recumbent figure measured in a right line from the ground.

[m] Only tame animals of the larger kinds are expressly mentioned (vi. 20); and if we could be sure that no others were taken, the difficulties connected with the necessary provision, stowage, &c., would be materially lessened. It may, however, be urged that in the first instance "every living thing of all flesh" (vii. 19) was to come into the ark, and that afterwards (vii. 14) "every living thing" is spoken of not as including, but as distinct from the tame cattle, and that consequently the latter is that wild animals were meant.

[n] Calv., Ges., Tuch, Baumg., and Delitzsch, understand seven individuals of each species. Del. argues that if we take שִׁבְעָה here to mean seven pairs, we must also take the שְׁנַיִם before to mean two pairs (and Origen does so take it, *cont. Cels.* iv. 41). But without arguing with Knobel, that the repetition of the numeral in the one case, and not in the other, *may perhaps* be designed to denote that here pairs are to be understood, at any rate the addition "male and his female" renders this the more probable interpretation.

that this may have been the case.[a] It does not follow, however, from the mention of clean and unclean animals that this section reflects a Levitical or post-Mosaic mind and handling. There were sacrifices before Moses, and why may there not have been a distinction of clean and unclean animals? It may be true of many other things besides circumcision; Moses gave it you, not because it was of Moses, but because it was of the fathers.

Are we then to understand that Noah literally conveyed a pair of all the animals of the world into the ark? This question virtually contains in it another, viz., whether the deluge was universal, or only partial? If it was only partial, then of course it was necessary to find room but for a comparatively small number of animals; and the dimensions of the ark are ample enough for the required purpose. The argument on this point has already been so well stated by Hugh Miller in his Testimony of the Rocks, that we need do little more than give an abstract of it here. After saying that it had for ages been a sort of stock problem to determine whether all the animals in the world by sevens, and by pairs, with food sufficient to serve them for a twelvemonth could have been accommodated in the given space, he quotes Sir W. Raleigh's calculation on the subject.[b] Sir Walter proposed to allow "for eighty-nine distinct species of beasts, or lest any should be omitted, for a hundred several kinds." He then by a curious sort of estimate, in which he considers "one elephant as equal to four beeves, one lion to two wolves," and so on, reckons that the space occupied by the different animals would be equivalent to the spaces required for 91 (or say 120) beeves, four score sheep, and three score and four wolves. "All these two hundred and eighty beasts might be kept in one storey, or room of the ark, in their several cabins; their meat in a second; the birds and their provision in a third, with space to spare for Noah and his family, and all their necessaries." "Such," says Hugh Miller, "was the calculation of the great voyager Raleigh, a man who had a more practical acquaintance with *stowage* than perhaps any of the other writers who have speculated on the capabilities of the ark, and his estimate seems sober and judicious." He then goes on to show how enormously these limits are exceeded by our present knowledge of the extent of the animal kingdom. Buffon doubled Raleigh's number of distinct species. During the last thirty years so astonishing has been the progress of discovery, that of mammals alone there have been ascertained to exist more than eight times the number which Buffon gives. In the first edition of Johnston's *Physical Atlas* (1848), one thousand six hundred and twenty-six different species of mammals are enumerated; and in the second edition (1856), one thousand six hundred and fifty-eight species. To these we must add the six thousand two hundred and sixty-six birds of Lesson, and the six hundred and fifty-seven or (subtracting the sea-snakes, and perhaps the turtles), the six hundred and forty-two reptiles of Charles Bonaparte.

Take the case of the *clean* animals alone, of which there were to be seven introduced into the ark. Admitting, for argument sake, that only seven individuals, and not seven pairs, were introduced, the number of these alone, as now known, is sufficient to settle the question. Mr. Waterhouse, in the year 1856, estimated the oxen at twenty species; the sheep at twenty-seven species; the goats at twenty; and the deer at fifty-one. "In short, if, excluding the lamas and the musks as doubtfully *clean*, tried by the Mosaic test, we but add to the sheep, goats, deer, and cattle the forty-eight species of unequivocally *clean* antelopes, and multiply the whole by seven, we shall have as the result a sum total of one thousand one hundred and sixty-two individuals, a number more than four times greater than that for which Raleigh made provision in the ark." It would be curious to ascertain what number of animals could possibly be stowed, together with sufficient food to last for a twelvemonth, on board the Great Eastern.

But it is not only the inadequate size of the ark to contain all, or anything like all, the progenitors of our existing species of animals, which is conclusive against a universal deluge. Another fact points with still greater force, if possible, in the same direction, and that is the manner in which we now find these animals distributed over the earth's surface. "Linnaeus held, early in the last century, that all creatures which now inhabit the globe had proceeded originally from some such common centre as the ark might have furnished; but no zoologist acquainted with the distribution of species can acquiesce in any such conclusion now. We now know that every great continent has its own peculiar fauna; that the original centres of distribution must have been not one, but many; further that the areas or circles around these centres must have been occupied by their pristine animals in ages long anterior to that of the Noachian Deluge; nay that in even the latter geologic ages they were preceded in them by animals of the same general type." Thus, for instance, the animals of S. America, when the Spaniards first penetrated into it, were found to be totally distinct from those of Europe, Asia, or Africa. The puma, the jaguar, the tapir, the lama, the sloths, the armadilloes, the opossums, were animals which had never been seen elsewhere. So again Australia has a whole class of animals, the marsupials, quite unknown to other parts of the world. The various species of kangaroo, phascolomys, dasyurus, and perameles, the flying phalangers, and other no less singular creatures, were the astonishment of naturalists when this continent was first discovered. New Zealand likewise, "though singularly devoid of indigenous mammals and reptiles . . . has a scarcely less remarkable fauna than either of these great continents. It consists almost exclusively of birds, some

[a] It is remarkable, moreover, that whilst in ver. 2 it is said, "Of *every clean beast* thou shalt take to thee by sevens," in vers. 8, 9, it is said, "Of *clean beasts*, and of beasts that are not clean," &c. "there went in *two and two* unto Noah into the ark." This again looks like a compilation from different sources.

[b] The earliest statement on the subject I have met with is in the Pirke R. Eliezer, where it is said that Noah took 72 kinds of birds, and 365 species of beasts, with him into the ark.

[c] Heidegger in like manner (*Hist. Sacr.* i. p. 518) thinks he is very liberal in allowing 300 kinds of animals to have been taken into the ark, and considers that this would give 50 cubits of solid contents for each kind of animal. He then subjoins the far more elaborate and really very curious computation of Joh. Temerarius in his *Chronol. Demonstr.*, who reckons after Sir W. Raleigh's fashion, but enumerates all the different species of known animals (amongst which he mentions Pegasi, Sphinxes, and Satyrs) the kind and quantity of provision, the method of stowage, &c. See Heidegger, as above, pp. 506, 7, and 518-21.

of them so ill provided with wings, that, like the *weka* of the natives, they can only run along the ground." And what is very remarkable, this law with regard to the distribution of animals does not date merely from the human period. We find the gigantic forms of those different species which during the later tertiary epochs preceded or accompanied the existing forms, occupying precisely the same habitats. In S. America, for instance, there lived then, side by side, the gigantic sloth (megatherium) to be seen in the British Museum, and the smaller animal of the same species which has survived the extinction of the larger. Australia in like manner had then its gigantic marsupials, the very counterpart in everything but in size of the existing species. And not only are the same mammals found in the same localities, but they are surrounded in every respect by the same circumstances, and exist in company with the same birds, the same insects, the same plants. In fact so stable is this law that, although prior to the pleistocene period we find a different distribution of animals, we still find each separate locality distinguished by its own species both of fauna and of flora, and we find these grouped together in the same manner as in the later periods. It is quite plain, then, that if all the animals of the world were literally gathered together in the ark and so saved from the waters of a universal deluge, this could only have been effected (even supposing there was space for them in the ark) by a most stupendous miracle. The sloth and the armadillo must have been brought across oceans and continents from their South American home, the kangaroo from his Australian forests and prairies, and the polar bear from his icebergs, to that part of Armenia, or the Euphrates valley, where the ark was built. These and all the other animals must have been brought in perfect subjection to Noah, and many of them must have been taught to forget their native ferocity in order to prevent their attacking one another. They must then further, having been brought by supernatural means from the regions which they occupied, have likewise been carried back to the same spots by supernatural means, care having moreover been taken that no trace of their passage to and fro should be left.

But the narrative does not compel us to adopt so tremendous an hypothesis. We shall see more clearly when we come to consider the language used with regard to the Flood itself, that even that language, strong as it undoubtedly is, does not oblige us to suppose that the Deluge was universal. But neither does the language employed with regard to the animals lead to this conclusion. It is true that Noah is told to take two "of every living thing of all flesh," but that could only mean two of every animal *then known* to him, unless we suppose him to have had supernatural information in zoology imparted—a thing quite incredible. In fact, but for some misconceptions as to the meaning of certain expressions, no one would ever have suspected that Noah's knowledge, or the knowledge of the writer of the narrative, could have extended beyond a very limited portion of the globe.

Again, how were the carnivorous animals supplied with food during their twelve months' abode in the ark? This would have been difficult even for the very limited number of wild animals in Noah's immediate neighbourhood. For the very large numbers which the theory of a universal Deluge supposes, it would have been quite impossible, unless again we have recourse to miracle. We either maintain that they were miraculously supplied with food, or that for the time being the nature of their teeth and stomach was changed, so that they were able to live on vegetables. But these hypotheses are so extravagant, and so much unsupported by the narrative itself, that they may be safely dismissed without further comment.

The Flood.—The ark was finished, and all its living freight was gathered into it as in a place of safety. Jehovah shut him in, says the chronicler speaking of Noah. And then there ensued a solemn pause of seven days before the threatened destruction was let loose. At last the Flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description which in a modern historian or poet would have occupied the largest space. We have nothing of the death-struggle; we hear not the cry of despair; we are not called upon to witness the frantic agony of husband and wife, and parent and child, as they fled in terror before the rising waters. Nor is a word said of the sadness of the one righteous man who, safe himself, looked upon the destruction which he could not avert. But an impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. This is heightened by the contrast and repetition of two ideas. On the one hand we are reminded no less than six times in the narrative in chaps. vi., vii., viii., who the tenants of the ark were (vi. 18-21, vii. 1-3, 7-13-16, viii. 16, 17, 18, 19), the favoured and rescued few; and on the other hand the total and absolute blotting out of everything else is not less emphatically dwelt upon (vi. 13, 17, vii. 4, 21-23). This evidently designed contrast may especially be traced in chap. vii. First, we read in ver. 6, "And Noah was six hundred years old when the flood came,—waters upon the earth." Then follows an account of Noah and his family and the animals entering into the ark. Next verses 10-12 resume the subject of ver. 7: "And it came to pass after seven days that the waters of the flood were upon the earth. In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month, on the selfsame day were all the fountains of the great deep broken up, and the windows (or floodgates) of heaven were opened. And the rain was upon the earth forty days and forty nights." Again the narrative returns to Noah and his companions and their safety in the ark (vv. 13-16). And then in ver. 17 the words of ver. 7 are resumed, and from thence to the end of the chapter a very simple but very powerful and impressive description is given of the appalling catastrophe: "And the flood was forty days upon the earth; and the waters increased and bare up the ark, and it was lift up from off the earth. And the waters prevailed and increased exceedingly upon the earth: and the ark went on the face of the waters. And the waters prevailed very exceedingly upon the earth, and all the high mountains that [were] under the whole heaven were covered. Fifteen cubits upwards did the waters prevail; and the mountains were covered. And all flesh died which moveth upon the earth, of fowl, and of cattle, and of wild beasts, and of every creeping thing that creepeth upon the earth, and every man. All in whose nostrils was the breath of life, of all that was in the dry land, died. And every sub-

stance which was on the face of the ground was blotted out, as well man as cattle and creeping thing and fowl of the heaven: they were blotted out from the earth, and Noah only was left, and they that were with him in the ark. And the waters prevailed on the earth a hundred and fifty days."

The waters of the Flood increased for a period of 150 days (40+150, comparing vii. 12 and 24). And then "God remembered Noah," and made a wind to pass over the earth, so that the waters were assuaged. The ark rested on the seventeenth day of the seventh month[r] on the mountains of Ararat. After this the waters gradually decreased till the first day of the tenth month, when the tops of the mountains were seen. It was then that Noah sent forth, first, the raven,[s] which flew hither and thither, resting probably on the mountain-tops, but not returning to the ark; and next, after an interval of seven days (cf. ver. 10), the dove, "to see if the waters were abated from the ground" (*i. e.* the lower plain country). "But the dove," it is beautifully said, "found no rest for the sole of her foot, and she returned unto him into the ark." After waiting for another seven days he again sent forth the dove, which returned this time with a fresh (טָרָף) olive-leaf in her mouth, a sign that the waters were still lower.[t] And once more, after another interval of seven days, he sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. No picture in natural history was ever drawn with more exquisite beauty and fidelity than this: it is admirable alike for its poetry and its truth.

On reading this narrative it is difficult, it must be confessed, to reconcile the language employed with the hypothesis of a partial deluge. The difficulty does not lie in the largeness of most of the terms used, but rather in the precision of one single expression. It is natural to suppose that the writer, when he speaks of "all flesh," "all in whose nostrils was the breath of life," refers only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended. Thus, for instance, it is said that "*all countries* came into Egypt to Joseph to buy corn;" and that "a decree went out from Caesar Augustus that *all the world* should be taxed." In these and many similar passages the expressions of the writer are obviously not to be taken in an exactly literal sense. Even the apparently very distinct phrase "*all* the high hills that were *under the whole heaven* were covered" may be matched by another precisely similar, where it is said that God would put the fear and the dread of Israel upon *every nation under heaven*. It requires no effort to see that such language is framed with a kind of poetic breadth. The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the sea [ARARAT], it would have been quite impossible for this to have been covered, the water reaching 15 cubits, *i. e.* 26 feet above it, unless the whole earth were submerged. The author of the *Genesis of the Earth, &c.*, has endeavoured to escape this difficulty by shifting the scene of the catastrophe to the low country on the banks of the Tigris and Euphrates (a miraculous overflow of these rivers being sufficient to account for the Deluge), and supposing that the "fifteen cubits upward" are to be reckoned, not from the top of the mountains, but from the surface of the plain. By "the high hills" he thinks may be meant only slight elevations, called "high" because they were the highest parts overflowed. But fifteen cubits is only a little more than twenty-six feet, and it seems absurd to suppose that such trifling elevations are described as "all the high hills under the whole heaven." At this rate the ark itself must have been twice the height of the highest mountain. The plain meaning of the narrative is, that far as the eye could sweep, not a solitary mountain reared its head above the waste of waters. On the other hand, there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain-range, such as the Zagros range for instance, may be intended. And in the absence of all geographical certainty in the matter it is better to adopt some such explanation of the difficulty. Indeed it is out of the question to imagine that the ark rested on the top of a mountain which is covered for 4000 feet from the summit with perpetual snow, and the descent from which would have been a very serious matter both to men and other animals. The local tradition, according to which fragments of the ark are still believed to remain on the summit, can weigh nothing when balanced against so extreme an improbability. Assuming, then, that the Ararat here mentioned is not the mountain of that name in Armenia, we may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian gulf, or further. As the inundation is said to have been caused by the breaking up of the fountains of the great deep, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an inrush of the waters of the Persian gulf, similar to what occurred in the Runn of Cutch, on the eastern arm of the Indus; in 1819, when the sea flowed in, and in a few hours converted a tract of land, 2000 square miles in area, into an inland sea or lagoon (see the account of this subsidence of the Delta of the Indus in Lyell's *Principles of Geology*, pp. 460-3).

It has sometimes been asserted that the facts of

[r] It is impossible to say how this reckoning of time was made, and whether a lunar or a solar year is meant. Much ingenuity has been expended on this question (see Delitzsch's *Comment.*), but with no satisfactory results.

[s] The raven was supposed to foretell changes in the weather both by its flight and its cry (Aelian, *H. A.* vii. 7; Virg. *Georg.* i. 382, 410). According to Jewish tradition, the raven was preserved in the ark in order to be the progenitor of the birds which afterwards fed Elijah by the brook Cherith

[t] The olive-tree is an evergreen, and seems to have the power of living under water, according to Theophrastus (*Hist. plant.* iv. 8) and Pliny (*H. N.* xiii. 50), who mention olive-trees in the Red Sea. The olive grows in Armenia, but only in the valleys on the south side of Ararat, not on the slopes of the mountain. It will not flourish at an elevation where even the mulberry, walnut, and apricot are found (Ritter, *Erdkunde* x. 220).

geology are conclusive against the possibility of a universal deluge. Formerly, indeed, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth of the Scripture narrative. And so troublesome and inconvenient a proof did it seem to Voltaire, that he attempted to account for the existence of fossil shells by arguing that either they were those of fresh-water lakes and rivers evaporated during dry seasons, or of land-snails developed in unusual abundance during wet ones; or that they were shells that had been dropped from the hats of pilgrims on their way from the Holy Land to their own homes; or in the case of the ammonites, that they were petrified reptiles. It speaks ill for the state of science that such arguments could be advanced, on the one side for, and on the other against, the universality of the Deluge. And this is the more extraordinary—and the fact shows how very slowly, where prejudices stand in the way, the soundest reasoning will be listened to—when we remember that so early as the year 1517 an Italian named Fracastoro had demonstrated the untenableness of the vulgar belief which associated these fossil remains with the Mosaic Deluge. "That inundation," he observed, "was too transient; it consisted principally of fluvintile waters; and if it had transported shells to great distances, must have strewed them over the surface, not buried them at vast depths in the interior of mountains. . . . But the clear and philosophical views of Fracastoro were disregarded, and the talent and argumentative powers of the learned were doomed for three centuries to be wasted in the discussion of these two simple and preliminary questions: first, whether fossil remains had ever belonged to living creatures; and secondly, whether, if this be admitted, all the phenomena could not be explained by the deluge of Noah" (Lyell, *Principles of Geology*, p. 20, 9th ed.). Even within the last thirty years geologists like Cuvier and Buckland have thought that the *superficial deposits* might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousands of years before the time of Noah, and indeed before the creation of man. Hence the geologic diluvium is to be carefully distinguished from the historic. And although, singularly enough, the latest discoveries give some support to the opinion that man may have been in existence during the formation of the drift,[a] yet even then that formation could not have resulted from a mere temporary submersion like that of the Mosaic Deluge, but must have been the effect of causes in operation for ages. So far then, it is clear, there is no evidence now on the earth's surface in favour of a universal deluge.

But is there any positive geological evidence against it? Hugh Miller and other geologists have maintained that there is. They appeal to the fact that in various parts of the world, such as Auvergne in France, and along the flanks of Aetna, there are cones of loose scoriae and ashes belonging to long extinct volcanoes, which must be at least triple the antiquity of the Noachian Deluge, and which yet exhibit no traces of abrasion by the action of water. These loose cones, they argue, must have been swept away had the water of the Deluge ever reached them. But this argument is by no means conclusive. The heaps of scoriae are, we have been assured by careful scientific observers, not of that loose incoherent kind which they suppose. And it would have been quite possible for a gradually advancing inundation to have submerged these, and then gradually to have retired without leaving any mark of its action. Indeed, although there is no proof that the whole world ever was submerged at one time, and although, arguing from the observed facts of the geological cataclysms, we should be disposed to regard such an event as in the highest degree improbable, it cannot, on geological grounds alone, be pronounced impossible. The water of the globe is to the land in the proportion of three-fifths to two-fifths. There already existed therefore, in the different seas and lakes, water sufficient to cover the whole earth. And the whole earth might have been submerged for a twelvemonth, as stated in Genesis, or even for a much longer period, without any trace of such submersion being now discernible.

There is, however, other evidence conclusive against the hypothesis of a universal deluge. Take it apart. "The first effect of the covering of the whole globe with water would be a complete change in its climate, the general tendency being to heat and equalize the temperature of all parts of its surface. *Pari passu* with this process . . . would ensue the destruction of the great majority of marine animals. And this would take place, partly by reason of the entire change in climatal conditions too sudden and general to be escaped by migration, and, in still greater measure, in consequence of the sudden change in the depth of the water. For multitudes of marine animals can only live between tide-marks, or at depths less than fifty fathoms; and as by the hypothesis the land had to be depressed many thousands of feet in a few months and to be raised again with equal celerity, it is clear that the animals could not possibly have accommodated themselves to such vast and rapid changes. All the littoral animals, therefore, would have been killed. The race of acorn-shells and periwinkles would have been exterminated, and all the coral reefs of the Pacific would at once have been converted into dead coral, never to grow again. But so far is this from being the case, that acorn-shells, periwinkles, and coral still survive, and there is good evidence that they have continued to exist and flourish for many thousands of years. On the other hand Noah was not directed to take marine animals of any kind into the ark, nor indeed is it easy to see how they could have been preserved.

"Again, had the whole globe been submerged, the sea-water covering the land would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind has occurred.

"Lastly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months

[a] In a valuable paper by Mr. Joseph Prestwich (recently published in the *Philosophical Transactions*), it is suggested that in all probability the origin of man will have to be thrown back into a greatly earlier antiquity than that usually assigned to it, but the pleistocene deposits to be brought down to a much more recent period, geologically speaking, than geologists have hitherto allowed.

would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture.

"There are, then, it must be confessed, very strong grounds for believing that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local: suppose, for instance, the valley of the Euphrates to have been submerged; and then the necessity for preserving all the species of animals disappears. For, in the first place, there was nothing to prevent the birds and many of the large mammals from getting away; and in the next, the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insignificant."

All these considerations point with overwhelming force in the same direction, and compel us to believe, unless we suppose that a stupendous miracle was wrought, that the Flood of Noah (like other deluges of which we read) extended only over a limited area of the globe.

It now only remains to notice the later allusions to the catastrophe occurring in the Bible, and the traditions of it preserved in other nations besides the Jewish.

The word specially used to designate the Flood of Noah (הַמַּבּוּל, *hammabbûl*) occurs in only one other passage of Scripture, Ps. xxix. 10. The poet here sings of the Majesty of God as seen in the storm. It is not improbable that the heavy rain accompanying the thunder and lightning had been such as to swell the torrents, and perhaps cause a partial inundation. This carried back his thoughts to the Great Flood of which he had often read, and he sang, "Jehovah sat as king at the Flood," and looking up at the clear face of the sky, and on the freshness and glory of nature around him, he added, "and Jehovah remaineth a king for ever." In Is. liv. 9, the Flood is spoken of as "the waters of Noah." God Himself appeals to His promise made after the Flood as a pledge of His faithfulness to Israel: "For this is as the waters of Noah unto me: for as I have sworn that the waters of Noah should no more go over the earth; so have I sworn that I would not be wroth with thee nor rebuke thee."

In the N. T. our Lord gives the sanction of His own authority to the historical truth of the narrative, Matt. xxiv. 37 (cf. Luke xvii. 26), declaring that the state of the world at His Second Coming shall be such as it was in the days of Noah. St. Peter speaks of the "long suffering of God," which "waited in the days of Noah while the ark was a preparing, wherein few, that is, eight souls were saved by water," and sees in the waters of the flood by which the ark was borne up a type of baptism, by which the Church is separated from the world. And again, in his Second Epistle (ii. 5) he cites it as an instance of the righteous judgment of God who spared not the old world, &c.

The traditions of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, whence they were carried by the different families of men as they scattered east and west, or whether they were of national growth, and embody merely records of catastrophes, such as especially in mountainous countries are of no rare occurrence. In some instances no doubt the resemblances between the heathen and the Jewish stories are so striking as to render it morally certain that the former were borrowed from the latter. We find, indeed, a mythological element, the absence of all moral purpose, and a national and local colouring, but, discernible amongst these, undoubted features of the primitive history. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost amongst these is the Chaldean. It is preserved in a Fragment of Berosus, and is as follows: "After the death of Ardates, his son Xisuthrus reigned eighteen sari. In his time happened a great Deluge: the history of which is thus described. The Deity Kronos appeared to him in a vision, and warned him that on the 15th day of the month Daesius there would be a flood by which mankind would be destroyed. He therefore enjoined him to write a history of the beginning, course, and end of all things; and to bury it in the City of the Sun at Sippara; and to build a vessel (σκάφος) and to take with him into it his friends and relations; and to put on board food and drink, together with different animals, birds, and quadrupeds; and as soon as he had made all arrangements, to commit himself to the deep. Having asked the Deity whither he was to sail? he was answered, 'To the gods, after having offered a prayer for the good of mankind.' Whereupon, not being disobedient (to the heavenly vision), he built a vessel five stadia in length, and two in breadth. Into this he put everything which he had prepared, and embarked in it his wife, his children, and his personal friends. After the flood had been upon the earth and was in time abated, Xisuthrus sent out some birds from the vessel, which not finding any food, nor any place where they could rest, returned thither. After an interval of some days Xisuthrus sent out the birds a second time, and now they returned to the ship with mud on their feet. A third time he repeated the experiment and then they returned no more: whence Xisuthrus judged that the earth was visible above the waters; and accordingly he made an opening in the vessel (?), and seeing that it was stranded upon the site of a certain mountain, he quitted it with his wife and daughter, and the pilot. Having then paid his adoration to the earth, and having built an altar and offered sacrifices to the gods, he, together with those who had left the vessel with him, disappeared. Those who had remained behind, when they found that Xisuthrus and his companions did not return, in their turn left the vessel and began to look for him, calling him by his name. Him they saw no more, but a voice came to them from heaven, bidding them lead pious lives, and so join him who was gone to live with the gods; and further informing them that his wife, his daughter, and the pilot had shared the same honour. It told them, moreover, that they should return to Babylon, and how it was ordained that they should take up the writings that had been buried in Sippara and impart them to mankind, and that the country where they then were was the land of Armenia. The rest having heard these words, offered sacrifices to the gods, and taking a circuit journeyed to Babylon. The vessel being thus stranded in Armenia, some part of it still remains in the mountains of the Corcyraeans (or Cordyaeans, *i. e.* the Kurds or Kurdistan) in Armenia;

and the people scrape off the bitumen from the vessel and make use of it by way of charms. Now, when those of whom we have spoken returned to Babylon, they dug up the writings which had been buried at Sippara; they also founded many cities and built temples, and thus the country of Babylon became inhabited again" (Cory's *Ancient Fragments*,[a] pp. 26-29). Another version abridged, but substantially the same, is given from Abydenus (*Ibid.* pp. 33, 34). The version of Eupolemus (quoted by Eusebius, *Praep. Evang.* x. 9) is curious: "The city of Babylon," he says, "owes its foundation to those who were saved from the Deluge; they were giants, and they built the tower celebrated in history." Other notices of a Flood may be found (a) in the Phoenician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned (see the quotation from Sanchoniathon in Cory, as above, p. 13): (b) in the Sibylline Oracles, partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. In these mention is made of the Deluge, after which Kronos, Titan, and Japetus ruled the world, each taking a separate portion for himself, and remaining at peace till after the death of Noah, when Kronos and Titan engaged in war with one another (*Ib.* p. 52). To these must be added (c) the Phrygian story of king Annakos or Nannakos (Enoch) in Iconium, who reached an age of more than 300 years, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. Very curious, as showing what deep root this tradition must have taken in the country, is the fact that so late as the time of Septimius Severus, a medal was struck at Apamea, on which the Flood is commemorated. "The city is known to have been formerly called 'Kibôtos' or 'the Ark;' and it is also known that the coins of cities in that age exhibited some leading point in their mythological history. The medal in question represents a kind of square vessel floating in the water. Through an opening in it are seen two persons, a man and a woman. Upon the top of this chest or ark is perched a bird, whilst another flies towards it carrying a branch between its feet. Before the vessel are represented the same pair as having just quitted it, and got upon the dry land. Singularly enough, too, on some specimens of this medal the letters **NΩ**, or **NΩE**, have been found on the vessel, as in the annexed cut. (See Eckhel iii. pp. 132, 133; Wiseman, *Lectures on Science and Revealed Religion*, ii. pp. 128, 129.) This fact is no doubt remarkable, but too much stress must not be laid upon it; for, making full allowance for the local tradition as having occasioned it, we must not forget the influence which the Biblical account would have in modifying the native story.

Coin of Apamea in Phrygia, representing the Deluge.

As belonging to this cycle of tradition, must be reckoned also (1) the Syrian, related by Lucian (*De Deâ Syrâ*, c. 13), and connected with a great chasm in the earth near Hieropolis into which the waters of the Flood are supposed to have drained; and (2) the Armenian quoted by Josephus (*Ant.* i. 3) from Nicolaus Damascenus, who flourished about the age of Augustus. He says: "There is above Minyas in the land of Armenia, a great mountain, which is called Baris [*i. e.* a ship], to which it is said that many persons fled at the time of the Deluge, and so were saved; and that one particular was carried thither upon an ark (τὴν λάρνακα), and was landed upon its summit: and that the remains of the vessel's planks and timbers were long preserved upon the mountain. Perhaps this was the same person of whom Moses the Legislator of the Jews wrote an account."

A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian is mixed up with its cosmogony, and hence loses anything like an historical aspect. "The world having been corrupted by Ahriman, it was necessary to bring over it a universal flood of water that all impurity might be washed away. The rain came down in drops as large as the head of a bull; the earth was under water to the height of a man, and the creatures of Ahriman were destroyed."

The Chinese story is, in many respects, singularly like the Biblical, according to the Jesuit M. Martinius, who says that the Chinese computed it to have taken place 4000 years before the Christian era. Fóh-he, the reputed author of Chinese civilization, is said to have escaped from the waters of the Deluge. He reappears as the first man of the production of a renovated world, attended by seven companions—his wife, his three sons, and three daughters, by whose intermarriage the whole circle of the universe is finally completed (Farrar, *Christ and other Masters*, iii. 16).

The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the Mahábhárata. We are there told that Brahma, having taken the form of a fish, appeared to the pious Manu (Satya, *i. e.* the righteous, as Noah is also called) on the banks of the river Vîrana. Thence, at his request, Manu transferred him when he grew bigger to the Ganges, and finally to the sea, he was too large even for the Ganges, to the ocean. Brahma now announces to Manu the approach of the Deluge, and bids him build a ship and put into it all kinds of seeds together with the seven Rishis, or holy beings. The Flood begins and covers the whole earth. Brahma himself appears in the form of a horned fish, and the vessel being made fast to him he draws it for many years, and finally lands on the loftiest summit of Mount Himavat (*i. e.* the

[a] We have here and there made an alteration, where the translator seemed to us not quite to have caught the meaning of the original.

[b] Dr. Gutzlaff, in a paper 'On Buddhism in China,' communicated to the Royal Asiatic Society (*Journal*, xvi. 39), says that he saw in one of the Buddhist temples, "in beautiful stucco, the scene where Kwan-yin, the Goddess of Mercy, looks down from heaven upon the family boat in his ark, amidst the raging waves of the deluge: the dolphins swimming around as his last means of safety, and the dove with an olive-branch in its beak flying towards the vessel. Nothing could have exceeded the beauty of the execution."

Himalaya). Then, by the command of God, the ship is made fast, and in memory of the event the mountain called Naubandhana (i. e. *ship-binding*). By the favour of Brahma, Manu, after the Flood, creates the new race of mankind, which are hence termed Manudsha, *i. e.* born of Manu (Bopp, *die Sündfluth*). The Purânic or popular version is of much later date, and is, "according to its own admission, coloured and disguised by allegorical imagery." Another and perhaps the most ancient version of all is that contained in the Çatapat'ha-Bráhmána. The peculiarity of this is that its locality is manifestly *north* of the Himalaya range, over which Manu is supposed to have crossed into India. Both versions will be found at length in Hardwick's *Christ and other Masters*, ii. 145-152.

The account of the Flood in the Koran is drawn apparently, partly from Biblical, and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving (Sale's Koran, ch. xi. p. 181). He is said to have tarried among his people one thousand, save fifty years (ch. xxix. p. 327). The people scoffed at and derided him; and "thus were they employed until our sentence was put in execution and the oven poured forth water." Different explanations have been given of this oven which may be seen in Sale's note. He suggests (after Hyde, *de Rel. Pers.*) that this idea was borrowed from the Persian Magi, who also fancied that the first waters of the Deluge gushed out of the oven of a certain old woman named Zala Cûfa. But the word *Tannûr* (oven), he observes, may mean only a receptacle in which waters are gathered, or the fissure from which they broke forth.[a] Another peculiarity of this version is that Noah calls in vain to one of his sons to enter into the ark: he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. The ark, moreover, is said to have rested on the mountain Al Jûdi, which Sale supposes should be written Jordi or Giordi, and connects with the Gordyaei, Cardu, &c., or Kurd Mountains on the borders of Armenia and Mesopotamia (ch. xi. pp. 181-183, and *notes*).

A third cycle of traditions is to be found among the American nations. These, as might be expected, show occasionally some marks of resemblance to the Asiatic legends. The one in existence among the Cherokees reminds us of the story in the Mahábhárata, only that a dog here renders the same service to his master as the fish does there to Manu. "This dog was very pertinacious in visiting the banks of a river for several days, where he stood gazing at the water and howling piteously. Being sharply spoken to by his master he ordered home, he revealed the coming evil. He preceded his prediction by saying that the escape of his master and family from drowning depended upon their throwing *him* into the water; that to escape drowning himself he must take a boat and put into it all he wished to save: that it would then rain hard a long time, and a great overflowing of the land would take place. By obeying this prediction the man and his family were saved, and from them the earth was again peopled." (Schoolcraft, *Notes on the Iroquois*, pp. 358, 359.)

"Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coxcox, viz., the Aztecs, the Mixtecs, the Zapotecs, the Tlascaltecs, and the Mechoacans. The Noah, Xisuthrus, or Manu of these nations is termed Coxcox, Teo-Cipactli, or Tezpi. He saved himself with his wife Xochiquetzatl in a bark, or, according to other traditions, on a raft. The painting represents Coxcox in the midst of the water waiting for a bark. The mountain, the summit of which rises above the waters, is the peak of Colhuacan, the Ararat of the Mexicans. At the foot of the mountain are the heads of Coxcox and his wife. The latter is known by two tresses in the form of horns, denoting the female sex. The men born after the Deluge were dumb: the dove from the top of a tree distributed among them tongues, represented under the form of small commas." Of the Mechoacan tradition he writes, "that Coxcox, whom they called Tezpi, embarked in a spacious *acalli* with his wife, his children, several animals, and grain. When the Great Spirit ordered the waters to withdraw, Tezpi sent out from his bark a vulture, the zopilote or *vultur aura*. This bird did not return on account of the carcases with which the earth was strewed. Tezpi sent out other birds, one of which, the hummingbird, alone returned, holding in its beak a branch clad with leaves. Tezpi, seeing that fresh verdure covered the soil, quitted his bark near the mountain of Colhuacan" (*Vues des Cordillères et Monumens de l'Amérique*, pp. 226, 227). A peculiarity of many of these American Indian traditions must be noted, and that is, that the Flood, according to them, usually took place in the time of the First Man, who, together with his family escape. But Müller (*Americanischen Urreligionen*) goes too far when he draws from this the conclusion that these traditions are consequently cosmogonic and have no historical value. The fact seems rather to be that all memory of the age between the Creation and the Flood had perished, and that hence these two great events were brought into close juxtaposition. This is the less unlikely when we see how very meagre even the Biblical history of that age is.

It may not be amiss, before we go on to speak of the traditions of more cultivated races, to mention the legend still preserved among the inhabitants of the Fiji islands, although not belonging to our last group. They say that, "after the islands had been peopled by the first man and woman, a great rain took place by which they were finally submerged; but before the highest places were covered by the waters, two large double canoes made their appearance. In one of these was Rokora the god of carpenters, in the other Rokola his head workman, who picked up some of the people and kept them on board until the waters had subsided, after which they were again landed on the island. It is reported that in former times canoes were always kept in readiness against another inundation. The persons thus saved, eight in number, were landed at Mbenga, where the highest of their gods is said to have made his first appearance. By virtue of this tradition, the chiefs of Mbenga take rank before all others and have always acted a conspicuous part among the Fijis. They style themselves *Ngali-duva-ki-langi* —subject to Heaven alone" (Wilkes, *Exploring Expedition*).

[a] The road from Salzburg to Bad-Gastein passes by two very singular fissures made in the limestone by the course of the stream, which are known by the name of "Die Ofen," or "the Ovens."

One more cycle of traditions we shall notice—that, viz., of the Hellenic races.

Hellas has two versions of a flood, one associated with Ogyges (*Jul. Afric.* as quoted by Euseb. *Praep. Ev.* x. 10) and the other, in a far more elaborate form, with Deucalion. Both, however, are of late origin,—they were unknown to Homer and Hesiod. Herodotus, though he mentions Deucalion as one of the first kings of the Hellenes, says not a word about the Flood (i. 56). Pindar is the first writer who mentions it (*Olymp.* ix. 37ff.). In Apollodorus (*Biblio.* i. 7) and Ovid (*Metam.* i. 260) the story appears in a much more definite shape. Finally, Lucian gives a narrative (*De Dea Syr.* c. 12, 13), not very different from that of Ovid, except that he makes provision for the safety of the animals which Ovid does not. He attributes the necessity for the Deluge to the exceeding wickedness of the existing race of men, and declares that the earth opened and sent forth waters to swallow them up, as well as that heavy rain fell upon them. Deucalion, as the one righteous man, escaped with his wives and children and the animals he had put into the chest (λάρναξ), and landed, after nine days and nine nights, on the top of Parnassus, whilst the chief part of Hellas was under water, and nearly all men perished, except a few who reached the tops of the highest mountains. Plutarch (*de Sollert. Anim.* §13) mentions the dove which Deucalion made use of to ascertain whether the flood was abated.

Most of these accounts, it must be observed, localize the Flood, and confine it to Greece or some part of Greece. Aristotle speaks of a local inundation near Dodona only (*Meteorol.* i. 14).

It must also be confessed, that the later the narrative, the more definite the form it assumes, and the more nearly it resembles the Mosaic account.

It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt. They knew, however, of the flood of Deucalion, but seem to have been in doubt whether it was to be regarded as partial or universal, and they supposed it to have been preceded by several others.

Everybody knows Ovid's story of Deucalion and Pyrrha. It may be mentioned, however, in reference to this as a very singular coincidence that, just as, according to Ovid, the earth was repeopled by Deucalion and Pyrrha throwing the bones of their mother (*i. e.* stones) behind their backs, so among the Tamanaki, a Carib tribe on the Orinoko, the story goes that a man and his wife escaping from the flood to the top of the high mountain Tapanacu, threw over their heads the fruit of the Mauritin-palm, whence sprung a new race of men and women. This curious coincidence between Hellenic and American traditions seems explicable only on the hypothesis of some common centre of tradition.

After the Flood.—Noah's first act after he left the ark was to build an altar, and to offer sacrifices. This is the first altar of which we read in Scripture, and the first burnt sacrifice. Noah, it is said, took of every clean beast, and of every clean fowl, and offered burnt offerings on the altar. And then the narrative adds with childlike simplicity: "And Jehovah smelled a smell of rest (or satisfaction), and Jehovah said in His heart, I will not again curse the ground any more for man's sake: for the imagination of man's heart is evil from his youth; neither will I again smite any more every thing as I have done." Jehovah accepts the sacrifice of Noah as the acknowledgment on the part of man that he desires reconciliation and communion with God; and therefore the renewed earth is no more be wasted with a plague of waters, but as long as the earth shall last, seed-time and harvest, cold and heat, summer and winter, day and night shall not cease.

Then follows the blessing of God (Elohim) upon Noah and his sons. They are to be fruitful and multiply: they are to have lordship over the lower animals; not, however, as at the first by natural right, but by terror is their rule to be established. All living creatures are now given to man for food, but express provision is made that the blood (which is the life) should not be eaten. This does not seem necessarily to imply that animal food was not eaten before the flood, but only that permanent use of it was sanctioned by divine permission. The prohibition with regard to blood reappears with fresh force in the Jewish ritual (Lev. iii. 17, 26, 27, xvii. 10-14; Deut. xii. 16, 23, 24, xv. 23), and seemed to the Apostles so essentially human as well as Jewish that they thought it ought to be enforced upon Gentile converts. In later times the Greek Church urged it as a reproach against the Latin that they did not hesitate to eat things strangled (*suffocata in quibus sanguis tenetur*).

Next, God makes provision for the security of human life. The blood of man, in which is his life, is yet more precious than the blood of beasts. When it has been shed God will require it, whether of beast or of man: and man himself is to be the appointed channel of Divine justice upon the homicide: "Whoso sheddeth man's blood, by man shall his blood be shed; for in the image of God made He man." Hence is laid the first foundation of the civil power. And just as the priesthood is declared to be the privilege of all Israel but made representative in certain individuals, so the civil authority is declared to be a right of human nature itself, before it is delivered over into the hands of a particular executive.

Thus with the beginning of a new world God gives, on the one hand, a promise which secures the stability of the natural order of the universe, and on the other hand, consecrates human life with special sanctity as resting upon these two points, the brotherhood of men, and man's likeness to God.

Of the seven precepts of Noah, as they are called, the observance of which was required of all proselytes, three only are here expressly mentioned, the abstinence from blood; the prohibition of murder; and the recognition of the civil authority. The remaining four: the prohibition of idolatry, blasphemy, of incest, and of theft rested apparently on the general sense of mankind.

It is in the terms of the blessing and the covenant made with Noah after the Flood that we find the strongest evidence that in the sense of the writer it was universal, *i.e.*, that it extended to all the then *known world*. The literal truth of the narrative obliges us to believe that *the whole human race*, except eight persons, perished by the waters of the flood. Noah is clearly the head of a new human family, the representative of the whole race, and as such that God makes His covenant with them, and hence selects a *natural* phenomenon as the token of that covenant, just as later in making a national covenant with Abraham, He made the sign of the

be an arbitrary sign in the flesh. The bow in the cloud, seen by every nation under heaven, is an unfailing witness to the truth of God. Was the rainbow, then, we ask, never seen before the flood? Was this "sign in the heavens" beheld for the first time by the eight dwellers in the ark when, after their long imprisonment, they stood again upon the green earth, and saw the dark humid clouds spanned by its glorious arch? Such seems the meaning of the narrator. And yet this implies that there was no rain before the flood, and that the laws of nature were changed, at least in that part of the globe, by that event. There is no reason to suppose that in the world at large there has been such change in meteorological phenomena as here implied. That a certain portion of the earth should never have been visited by rain is quite conceivable. Egypt, though not absolutely without rain, very rarely sees it. But the country of Noah and the Ark was a mountainous country; and the ordinary atmospherical conditions must have been suspended, or a new law must have come into operation after the flood, if the rain then first fell, and if the rainbow had consequently never before been painted on the clouds. Hence, many writers have supposed that the meaning of the passage is, not that the rainbow now appeared for the first time, but that it was now for the first time invested with the sanctity of a sign; that not a new phenomenon was visible, but that a new meaning was given to a phenomenon already existing. It must be confessed, however, that this is not the *natural* interpretation of the words: "This is the sign of the covenant which I do set between me and you, and every living thing which is with you for everlasting generations: my bow have I set in the cloud, and it shall be for the sign of a covenant between me and the earth. And it shall come to pass that when I bring a cloud over the earth, then the bow shall be seen in the cloud, and I will remember my covenant which is between me and you and every living thing of all flesh," &c.

Noah now for the rest of his life betook himself to agricultural pursuits, following in this the tradition of his family. It is particularly noticed that he planted a vineyard, and some of the older Jewish writers, with a touch of poetic beauty, tell us that he took the shoots of a vine which had wandered out of paradise wherewith to plant his vineyard.[a] Whether in ignorance of its properties or otherwise, we are not informed, but he drank of the juice of the grape till he became intoxicated and shamefully exposed himself in his own tent. One of his sons, Ham, mocked openly at his father's disgrace. The others, with dutiful care and reverence, endeavoured to hide it. Noah was not so drunk as to be unconscious of the indignity which his youngest son had put upon him; and when he recovered from the effects of his intoxication, he declared that in equital for this act of brutal unfeeling mockery, a curse should rest upon the sons of Ham, that *he* who knew not the duty of a child, should see his own son degraded to the condition of a slave. With the curse on his youngest son was joined a blessing on the other two. It ran thus, in the old poetic or rather rhythmical and alliterative form into which the more solemn utterances of antiquity commonly fell. And he said:—

> Cursed be Canaan,
> A slave of slaves shall he be to his brethren.

And he said:—

> Blessed be Jehovah, God of Shem,
> And let Canaan be their slave!
> May God enlarge Japhet,[b]
> And let him dwell in the tents of Shem,
> And let Canaan be their slave!

Of old a father's solemn curse or blessing was held to have a mysterious power of fulfilling itself. And in this case the words of the righteous man, though strictly the expression of a wish (Dr. Pye Smith is quite wrong in translating all the verbs as futures; they are optatives) did in fact amount to a prophecy. It has been asked why Noah did not curse Ham, instead of cursing Canaan. It might be sufficient to reply that at such times men are not left to themselves, and that a divine purpose as truly guided Noah's lips then, as it did the hands of Jacob afterwards. But, moreover, it was surely by a righteous retribution that he, who as youngest son had dishonoured his father, should see the curse light on the head of his own youngest son. The blow was probably heavier than if it had lighted directly on himself. Thus early in the world's history was the lesson taught practically which the law afterwards expressly enunciated, that God visits the sins of the fathers upon the children. The subsequent history of Canaan shows in the clearest manner possible the fulfilment of the curse. When Israel took possession of his land, he became the slave of Shem: when Tyre fell before the arms of Alexander, and Carthage succumbed to her Roman conquerors, he became the slave of Japhet: and we almost hear the echo of Noah's curse in Hannibal's *Agnosco fortunam Carthaginis*, when the head of Hasdrubal his brother was thrown contemptuously into the Punic lines.[c]

It is uncertain whether in the words "And let him dwell in the tents of Shem," "God," or "Japhet," is the subject of the verb. At first it seems more natural to suppose that Noah prays that God would dwell there (the root of the verb is the same as that of the noun *Shechinah*). But the blessing of Shem has been spoken already. It is better therefore to take Japhet as the subject. What then is meant by his dwelling in the tents of Shem? Not of course that he should so occupy them as to thrust out the original possessors; nor even that they should melt into one people; but as it would seem, that Japhet may enjoy the *religious privileges* of Shem. So Augustine: "Latificet Deus Japheth et habitet in tentoriis Sem. id est, in Ecclesiis quas filii Prophetarum Apostoli construxerunt." The Talmud sees this blessing fulfilled in the use of the Greek language in sacred things, such as the translation of the Scriptures. Thus Shem is blessed with the knowledge of Jehovah: and Japhet with temporal increase and dominion in the first instance, with the further hope of sharing afterwards in spiritual advantages. After this prophetic blessing we hear no more of the patriarch but the sum of his

[a] Armenia, it has been observed, is still favourable to the growth of the vine. Xenophon (*Anab.* iv. 4, 9) speaks of the excellent wines of the country, and his account has been confirmed in more recent times (Ritter, *Erdk.* ii. 554. 319, &c.). The Greek myth referred the discovery and cultivation of the vine to Dionysos, who according to one version brought it from India (Diod. Sic. iii. 32), according to another from Phrygia (Strabo, x. 469). Asia at all events is the acknowledged home of the vine.

[b] There is an alliterative play upon words here which cannot be preserved in a translation.

years. "And Noah lived after the flood three hundred and fifty years. And thus all the days of Noah were nine hundred and fifty years: and he died."

For the literature of this article the various commentaries on Genesis, especially those of modern date, may be consulted. Such are those of Tuch, 1838; of Baumgarten, 1843; Knobel, 1852; Schröder, 1846; Delitzsch, 3d ed. 1860. To the last of these especially the present writer is much indebted. Other works bearing on the subject more or less directly are Lyell's *Principles of Geology*, 1853; Pfaff's *Schöpfungs Geschichte*, 1855; Wiseman's *Lectures on Science and Revealed Religion*; Hugh Miller's *Testimony of the Rocks*. Hardwick's *Christ and other Masters*, 1857; Müller's *Die Americanischen Urreligionen*; Bunsen's *Bibelwerk*, and Ewald's *Jahrbücher*, have also been consulted. The writer has further to express his obligations both to Professor Owen and to Professor Huxley, and especially to the latter gentleman, for much valuable information on the scientific questions touched upon in this article. [J. J. S. P.]

NO'AH (נֹעָה: Νουά: *Noa*). One of the five daughters of Zelophehad (Num. xxvi. 33, xxvii. 1, xxxvi. 11, Josh. xvii. 3).

NO-A'MON, NO (נֹא אָמוֹן: μερὶς Ἀμμών: *Alexandria* (*populorum*), Nah. iii. 8: נֹא: Διόσπολις: *Alexandria*, Jer. xlvi. 25, Ez. xxx. 14, 15, 16), a city of Egypt, Thebae (Thebes), or Diospolis Magna. The second part of the first form is the name of AMEN, the chief divinity of Thebes, mentioned or alluded to in connexion with this place in Jeremiah, "Behold, I will punish Amon [or 'the multitude,' with reference to Amen[a]] in No, and Pharaoh, and Egypt, with their gods, and their kings" (*l. c.*); and perhaps also alluded to in Ezekiel (xxx. 15). [AMON.] The second part of the Egyptian sacred name of the city, HA-AMEN, "the abode of Amen," is the same. There is a difficulty as to the meaning of No. It has been supposed, in accordance with the LXX. rendering of No-Amon by μερὶς Ἀμμών, that the Coptic ⲛⲟϥ, ⲛⲟⲩϥ, *funis*, *funiculus*, once *funis mensorius* (Mic. ii. 4), instead of ⲛⲟϥ ⲛ̀ⲣⲱⲙⲓ. might indicate that it signified "portion," so that the name would mean "the portion of Amon." But if so, how are we to explain the use of No alone? It thus occurs not only in Hebrew, but also in the language of the Assyrian inscriptions, in which it is written Ni'a, according to Sir Henry Rawlinson ('Illustrations of Egyptian History and Chronology,' &c., *Trans. Roy. Soc. Lit.*, 2nd Ser. vii. p. 166).[b] The conjectures that Thebes was called ⲡ ϩⲓ ⲙ ⲁⲙⲟⲩⲛ, "the abode of Amen," or, still nearer the Hebrew, ⲛⲁ ⲁⲙⲟⲩⲛ, "the [city] of Amen," like ⲛⲁϩⲥⲓ, "the [city] of Isis," or, as Gesenius prefers, ⲙⲙⲁ ⲁⲙⲟⲩⲛ, "the place of Amen" (*Thes.* s. v.), are all liable to two serious objections, that they neither represent the Egyptian name, nor afford an explanation of the use No alone. It seems most reasonable to suppose that No is a Semitic name, and that Amon is added in Nahum (*l. c.*) to distinguish Thebes from any other place bearing the same name, or on account of the connection of Amen with that city. Thebes also bears in ancient Egyptian the common name of doubtful signification, AP-T or T-AP, which the Greeks represented by Thebae. The whole metropolis, on both banks of the river, was called TAP. (See Brugsch, *Geogr. Inschr.* i. pp. 175, seqq.

Jerome supposes No to be either Alexandria or Egypt itself (*In Jesaiam*, lib. v. t. iii. col. 125, ed. Paris, 1704). Champollion takes it to be Diospolis in Lower Egypt (*L'Égypte sous les Pharaons*, ii. p. 131); but Gesenius (*l. c.*) well observes that it would not then be compared in Nahum to Nineveh. This and the evidence of the Assyrian record leave no doubt that it is Thebes. The description of No-Amon, as "situate among the rivers, the waters round about it" (Nah. *l. c.*), remarkably characterizes Thebes, the only town of ancient Egypt which we know to have been built on both sides of the Nile, and the prophecy that it should "be rent asunder" (Ez. xxx. 16) cannot fail to appear remarkably significant to the observer who stands amidst the vast ruins of its chief edifice, the great temple of Amen, which is rent and shattered as if by an earthquake, although it must be held to refer primarily, at least, rather to the breaking up or capture of the city (comp. 2 K. xxv. 4, Jer. lii. 7), than to its destruction. See THEBES. [R. S. P.]

NOB (נֹב: Νομβά; Alex. Νοβά, exc. Neh. 1 Sam. xxiii. 11, Νόβ Neh. xi. 32: *Nobe*, *Nov* Neh.) was a sacerdotal city in the tribe of Benjamin, and situated on some eminence near Jerusalem. That it was on one of the roads which led from the north to the capital, and within sight of it, is certain from the illustrative passage in which Isaiah (x. 28-32) describes the approach of the Assyrian army:—

> "He comes to Ai, passes through Migron,
> At Michmash deposits his baggage;
> They cross the pass, Geba is our night-station;
> Terrified is Ramah, Gibeah of Saul flees.
> Shriek with thy voice, daughter of Gallim;
> Listen, O Laish! Ah, poor Anathoth!
> Madmenah escapes, dwellers in Gebim take flight.
> Yet this day he halts at Nob:
> He shakes his hand against the mount, daughter of Zion,
> The hill of Jerusalem."

In this spirited sketch the poet sees the enemy pouring down from the north; they reach at last the neighbourhood of the devoted city; they take possession of one village after another; while the inhabitants flee at their approach, and the country with cries of terror and distress. It is implied here clearly that Nob was the last stage in their line of march, whence the invaders could see Jerusalem, and whence they could be seen; they "shook the hand" in proud derision at the enemies. Lightfoot also mentions a Jewish tradition (*Opp.* ii. p. 203) that Jerusalem and Nob were within sight of each other.

Nob was one of the places where the tabernacle or ark of Jehovah, was kept for a time during the days of its wanderings before a home was provided

[a] The former is the more probable reading, as the gods of Egypt are mentioned almost immediately after.

[b] Sir Henry Rawlinson identifies Ni'a with No-Amon. The whole paper (pp. 137, seqq.) is of great importance, as illustrating the reference in Nahum to the capture of Thebes, by shewing that Egypt was conquered by both Esarhaddon and Asshur-bani-pal, and that the latter twice took Thebes. If these wars were after the prophet's time, the narrative of them makes it more probable than it before seemed that there was a still earlier conquest of Egypt by the Assyrians.

[a] "The full idea," says Gesenius, "is that they hurry off to conceal their treasures."

for it on mount Zion (2 Sam. vi. 1 &c.). A company of the Benjamites settled here after the return from the exile (Neh. xi. 32). But the event for which Nob was most noted in the Scripture annals, was a frightful massacre which occurred there in the reign of Saul (1 Sam. xxii. 17-19). David had fled thither from the court of the jealous king; and the circumstances under which he had escaped being unknown, Ahimelech, the high priest at Nob, gave him some of the shew-bread from the golden table, and the sword of Goliath which he had in his charge as a sacred trophy. Doeg, an Edomite, the king's shepherd, who was present, reported the affair to his master. Saul was enraged on hearing that such favour had been shown to a man whom he hated as a rival; and nothing would appease him but the indiscriminate slaughter of all the inhabitants of Nob. The king's executioners having refused to perform the bloody deed (1 Sam. xxii. 17), he said to Doeg, the spy, who had betrayed the unsuspecting Ahimelech, "Turn thou, and fall upon the priests. And Doeg the Edomite turned, and he fell upon the priests, and slew on that day fourscore and five persons that did wear a linen ephod. And Nob, the city of the priests, smote he with the edge of the sword, both men and women, children and sucklings, and oxen, and asses, and sheep, with the edge of the sword." Abiathar, a son of Ahimelech, was the only person who survived to recount the sad story.

It would be a long time naturally before the doomed city could recover from such a blow. It appears in fact never to have regained its ancient importance. The references in Is. x. 32, and Neh. xi. 32, are the only later allusions to Nob which we find in the O. T. All trace of the name has disappeared from the country long ago. Jerome states that nothing remained in his time to indicate where it had been. Geographers are not agreed as to the precise spot with which we are to identify the ancient locality. Some of the conjectures on this point may deserve to be mentioned. "It must have been situated," says Dr. Robinson (*Researches*, vol. i. p. 464), "somewhere upon the ridge of the Mount of Olives, north-east of the city. We sought all along this ridge, from the Damascus road to the summit opposite the city, for some traces of an ancient site which might be regarded as the place of Nob; but without the slightest success." Kiepert's Map places Nob at *El-Isdwieh*, not far from *Anâtâ* about a mile north-west of Jerusalem. Tobler (*Topographie von Jerus.* ii. §719) describes this village as beautifully situated, and occupying unquestionably an ancient site. But it must be regarded as fatal to this identification that Jerusalem is not to be seen from that point. *El-Isdwieh* is in a valley, and the *dramatic* representation of the prophet would be unsuited to such a place. Mr. Porter (*Handb.* ii. 324) expresses the confident belief that Nob is to be sought on a low round tell, a little to the right of the northern road and opposite to *Shâfât*. He found there several cisterns hewn in the rock, large building stones, and various other indications of an ancient town. The top of this hill affords an extensive view, and Mount Zion is distinctly seen, though Jerusalem and Olivet are hid by an intervening ridge.

The Nob spoken of above is not to be confounded with another which Jerome mentions in the plain of Sharon, not far from Lydda. (See Von Raumer's *Palaestina*, p. 196.) No allusion is made to this latter place in the Bible. The Jews after recovering the ark of Jehovah from the Philistines would be likely to keep it beyond the reach of a similar disaster; and the Nob which was the seat of the sanctuary in the time of Saul, must have been among the mountains. This Nob, or Niobe as Jerome writes, now *Beit Nûba*, could not be the village of that name near Jerusalem. The towns with which Isaiah associates the place put that view out of the question. [H. B. H.]

NO'BAH (נֹבַח: Ναβώθ, Ναβαί; Alex. Ναβωθ, Ναβεθ: *Noba*). The name conferred by the conqueror of KENATH and the villages in dependence on it on his new acquisition (Num. xxxii. 42). For a certain period after the establishment of the Israelite rule the new name remained, and is used to mark the course taken by Gideon in his chase after Zebah and Zalmunna (Judg. viii. 11). But it is not again heard of, and the original appellation, as is usual in such cases, appears to have recovered its hold, which it has since retained; for in the slightly modified form of *Kunâwat* it is the name of the place to the present day (see *Onomasticon*, Nabo).

Ewald (*Gesch.* ii. 268, *note* 2) identifies the Nobah of Gideon's pursuit with Nophah of Num. xxi. 30, and distinguishes them both from Nobah of Num. xxxii. 42, on the ground of their being mentioned with Dibon, Medeba, and Jogbehah. But if Jogbehah be, as he elsewhere (ii. 504, *note* 4) suggests, *el-Jebeibeh*, between *Ammân* and *es-Salt*, there is no necessity for the distinction. In truth the lists of Gad and Reuben in Num. xxxii. are so confused that it is difficult to apportion the towns of each in accordance with our present imperfect topographical knowledge of those regions. Ewald also (ii. 392 *note*) identifies Nobah of Num. xxxii. 42 with *Nawa* or *Neve*, a place 15 or 16 miles east of the north end of the Lake of Gennesaret (Ritter, *Jordan*, 356). But if Kenath and Nobah are the same, and *Kunâwat* be Kenath, the identification is both unnecessary and untenable.

Eusebius and Jerome, with that curious disregard of probability which is so puzzling in some of the articles in the *Onomasticon*, identify Nobah of Judg. viii. with Nob, "the city of the Priests, afterwards laid waste by Saul" (*Onom.* Νομβά and "Nabbe sive Noba"). [G.]

NO'BAH (נֹבַח: Ναβαῦ: *Noba*). An Israelite warrior (Num. xxxii. 42 only), probably, like Jair, a Manassite, who during the conquest of the territory on the east of Jordan possessed himself of the town of Kenath and the villages or hamlets dependent upon it (Heb. "daughters"), and gave them his own name. According to the Jewish tradition (*Seder Olam Rabba*, ix.) Nobah was born in Egypt, died after the decease of Moses, and was buried during the passage of the Jordan.

It will be observed that the form of the name in the LXX. is the same as that given to Nebo. [G.]

NOD. [CAIN.]

NO'DAB (נוֹדָב: Ναβαβαίοι: *Nodab*), the name of an Arab tribe mentioned only in 1 Chr. v. 19, in the account of the war of the Reubenites, the Gadites, and the half of the tribe of Manasseh, against the Hagarites (verses 9-22); "and they made war with the Hagarites, with Jetur, and Nephish, and *Nodab*" (ver. 19). In Gen. xxv. 15 and 1 Chr. i. 31, Jetur, Naphish, and Kedemah are the last three sons of Ishmael, and it has been therefore supposed that Nodab also was

name of his sons. But we have no other mention of Nodab, and it is probable, in the absence of additional evidence, that he was a grandson or other descendant of the patriarch, and that the name, in the time of the record, was that of a tribe sprung from such descendant. The Hagarites, and Jetur, Nephish, and Nodab, were pastoral people, for the Reubenites dwelt in their tents throughout all the east [land] of Gilead (ver. 10), and in the war a great multitude of cattle—camels, sheep, and asses—were taken. A hundred thousand men were taken prisoners or slain, so that the tribes must have been very numerous; and the Israelites "dwelt in their steads until the captivity." If the Hagarites (or Hagarenes) were, as is most probable, the people who afterwards inhabited Hejer [HAGARENES], they were driven southwards, into the north-eastern province of Arabia, bordering the mouths of the Euphrates, and the low tracts surrounding them. [JETUR; ITURAEA; NAPHISH.] [E. S. P.]

NO'Ë (Νῶε: *Noë*). The patriarch Noah (Tob. iv. 12; Matt. xxiv. 37, 38; Luke iii. 36, xvii. 26, 27).

NO'EBA (Νοεβά: *Nachoba*) = NEKODA 1 (1 Esdr. v. 31; comp. Ezr. ii. 48).

NO'GAH (נֹגַהּ: Ναγαί, Ναγέθ: *Noge, Noga*). One of the thirteen sons of David who were born to him in Jerusalem (1 Chr. iii. 7, xiv. 6). His name is omitted from the list in 2 Sam. v.

NO'HAH (נֹחָה: Νωά: *Nohaa*). The fourth son of Benjamin (1 Chr. viii. 2).

NON (נוּן: Νούν: *Nun*). Nun, the father of Joshua (1 Chr. vii. 27).

NOPH, MOPH (נֹף: Μέμφις: *Memphis*, Is. xix. 13, Jer. ii. 16, Ez. xxx. 13, 16; מֹף: Μέμφις: *Memphis*, Hos. ix. 6), a city of Egypt, Memphis. These forms are contracted from the ancient Egyptian common name, MEN-NUFR, or MEN-NEFRU, "the good abode," or perhaps "the abode of the good one:" also contracted in the Coptic forms ⲙⲉⲛⲫⲓ, ⲙⲉⲛⲫⲉ, ⲙⲉⲛϩⲉ, ⲙⲉⲛϩⲉ (M), ⲙⲉⲛϥⲉ (S); in the Greek Μέμφις; and in the Arabic *Menf*, منف.[a] The Hebrew forms are to be regarded as representing colloquial forms of the name, current with the Shemites, if not with the Egyptians also. As to the meaning of Memphis, Plutarch observes that it was interpreted to signify either the haven of good ones, or the sepulchre of Osiris (καὶ τὴν μὲν πόλιν οἱ μὲν ὅρμον ἀγαθῶν ἑρμηνεύουσιν, οἱ δ' [ἰδί]ως τάφον Ὀσίριδος, *De Isida et Osiride*, 20). It is probable that the epithet "good" refers to Osiris, whose sacred animal Apis was here worshipped, and here had its burial-place, the Serapeum, whence the name of the village Busiris (PA-HESAR? "the [abode?] of Osiris"), now represented by ruins not in exact site, by Aboo-Seer,[b] probably (again) a quarter of Memphis. As the great upper Egyptian city is characterized in Nahum as "situate among the rivers" (iii. 8), so in Hosea the lower Egyptian one is distinguished by its Necropolis, in this passage as to the fugitive Israelites: "Mizraim shall gather them up, Noph shall bury them;" for its burial-ground, stretching for twenty miles along the edge of the Libyan desert, greatly exceeds that of any other Egyptian town. (See Brugsch, *Geogr. Inscr.* i. pp. 234, seqq., and MEMPHIS.) [R. S. P.]

NO'PHAH (נֹפַח, Nôphach; the Samar. has the article, הַנֹּפַח: αἱ γυναῖκες, Alex. αἱ γ. αὐτῶν *Nophe*), a place mentioned only in Num. xxi. 30, in the remarkable song apparently composed by the Amorites after their conquest of Heshbon from the Moabites, and therefore of an earlier date than the Israelite invasion. It is named with Dibon and Medeba, and was possibly in the neighbourhood of Heshbon. A name very similar to Nophah is Nobah, which is twice mentioned; once as bestowed by the conqueror of the same name on Kenath (a place still existing more than 70 miles distant from the scene of the Amorite conflict), and again in connexion with Jogbehah, which latter, from the mode of its occurrence in Num. xxxii. 35, would seem to have been in the neighbourhood of Heshbon. Ewald (*Gesch.* ii. 268 *note*) does so (though without giving his grounds) that Nophah is identical with the latter of these. In this case the difference would be a dialectical one, Nophah being the Moabite or Amorite form. [NOBAH.] [G.]

NOSE-JEWEL (נֶזֶם, pl. constr. נִזְמֵי: ἐνώτια: *inaures*: A. V., Gen. xxiv. 22; Ex. xxxv. 22; "earring;" Is. iii. 21; Ez. xvi. 12, "jewel on the forehead:" rendered by Theod. and Symm. ἐνώτιον, Ges. 870). A ring of metal, sometimes of gold or silver, passed usually through the right nostril, was worn by way of ornament by women in the East. Its diameter is usually 1 in. or 1½ in., but sometimes as much as 3½ in. Upon it are strung beads, coral, or jewels. In Egypt it is now almost confined to the lower classes. It is mentioned in the Mishna, *Shabb.* vi. 1; *Celim*, xi. 8. Layard remarks that no specimen has been found among Assyrian remains. (Burckhardt, *Notes on Bed.* i. 51, 232; Niebuhr, *Descr. de l'Arab.* p. 57; Voyage, i. 133, ii. 56; Chardin, *Voy.* viii. 200; Lane, *Mod. Eg.* i. 78; *App.* iii. p. 226; Smalcholtz, *Syr. Arch.* i. 3, p. 25; Layard, *Nin. & Bab.* p. 544.) [H. W. P.]

NUMBER.[b] Like most Oriental nations, it is probable that the Hebrews in their written calculations made use of the letters of the alphabet. That they did so in post-Babylonian times we have conclusive evidence in the Maccabean coins: and it is highly probable that this was the case also in earlier times, both from internal evidence, of which

[a] This Arabic name affords a curious instance of the use of Semitic names of similar sound but different signification in the place of names of other languages.

[b] 1. חֵקֶר, ἀριθμός, properly enquiry, investigation (Ges. p. 515).

2. מִכְסָה, ἀριθμός, *numerus*.

3. מְנִי, Τύχη, *Fortuna*, probably a deity (Ges. p. 798); rendered "number," Is. lxv. 11.

4. מִנְיָן, Chald. from same root as (3).

5. מִסְפָּר.

6. מִסְפֹּרֶת in plur. Ps. lxxi. 15, ἐφεξῆς, *literatura*.

7. מִסְפָּר.

To number is (1) מָנָה, ἀριθμέω, *numero*. (2) חָשַׁב, λογίζομαι, *i. e.* value, account, as in Is. xiii. 17. In Ps. count, or number, which is the primary notion of the word (Ges. p. 631).

we shall presently speak, and also from the practice of the Greeks, who borrowed it with their earliest alphabet from the Phoenicians, whose alphabet again was, with some slight variations, the same as that of the Samaritans and Jews (Chardin, *Voy.* ii. 421, iv. 288 and foll., Langlés; Thiersch, *Gr. Gr.* §xii., lxiii. pp. 23, 153; Jelf, *Gr. Gr.* i. 3; Müller, *Etrusker*, ii. 317, 321; *Eng. Cycl.*, "Coins," "Numeral Characters;" Lane, *Mod. Eg.* i. 91; Donaldson, *New Cratylus*, pp. 146, 151; Winer, *Zahlen*).

But though, on the one hand, it is certain that in all existing MSS. of the Hebrew text of the O. T. the numerical expressions are written at length (Lee, *Hebr. Gram.* §§19, 22), yet, on the other, the variations in the several versions between themselves and from the Hebrew text, added to the evident inconsistencies in numerical statement between certain passages of that text itself, seem to prove that some shorter mode of writing was originally in vogue, liable to be misunderstood, and in fact misunderstood by copyists and translators. The following may serve as specimens:—

1. In 2 K. xxiv. 8 Jehoiachin is said to have been 18 years old, but in 2 Chr. xxxvi. 9 the number given is 8.

2. In Is. vii. 8 Vitringa shows that for threescore and five one reading gives sixteen and five, the letter *jod* י (10) after *shesh* (6) having been mistaken for the Rabbinical abbreviation by omission of the *mem* from the plural *shishim*, which would stand for sixty. Six + ten was thus converted into sixty + ten.

3. In 1 Sam. vi. 19 we have 50,070, but the Syriac and Arabic versions have 5070.

4. In 1 K. iv. 26 we read that Solomon had 40,000 stalls for chariot-horses, but 4000 only in 2 Chr. ix. 25.

5. The letters *vau* (6) and *zayin* (7) appear to have been interchanged in some readings of Gen. ii. 2.

These variations, which are selected from a copious list given by Glass (*De Causis Corruptionis*, i. §3, vol. ii. p. 188, ed. Dathe), appear to have proceeded from the alphabetic method of writing numbers, in which it is easy to see how, *e. g.*, such letters as *vau* (ו) and *jod* (י), *nun* (נ) and *caph* (כ), may have been confounded and even sometimes omitted. The final letters also, which were unknown to the early Phoenician or Samaritan alphabet, were used as early as the Alexandrian period to denote hundreds between 500 and 1000.[a]

But whatever ground these variations may afford for reasonable conjecture, it is certain, from the fact mentioned above, that no positive rectification of them can at present be established, more especially as there is so little variation in the numbers quoted from the O. T., both in N. T. and in the Apocrypha; *e. g.* (1) Num. xxv. 9, quoted 1 Cor. x. 8. (2) Ex. xii. 40, quoted Gal. iii. 17. (3) Ex. xvi. 35 and Jos. xcv. 10), quoted Acts xiii. 18. (4) Gen. xvii. 1, quoted Rom. iv. 19. (5) Num. i. 46, quoted Exclus. xvi. 10.

Josephus also in the main agrees in his statements of numbers with our existing copies.

There can be little doubt, however, as was remarked by St. Augustine (*Civ. D.* x. 13, §1), that some at least of the numbers mentioned in Scripture are intended to be representative rather than determinative. Certain numbers, as 7, 10, 40, 100, were regarded as giving the idea of completeness. Without entering into his theory of this usage, we may remark that the notion of representative numbers in certain cases is one extremely common among Eastern nations, who have a prejudice against counting their possessions accurately; that it enters largely into many ancient systems of chronology, and that it is found in the philosophical and metaphysical speculations not only of the Pythagorean and other ancient schools of philosophy, both Greek and Roman, but also in those of the later Jewish writers, of the Gnostics, and also of such Christian writers as St. Augustine himself (August. *De Doctr. Christ.* ii. 16, 25; *Civ. D.* xv. 30; Philo, *De Mund. Opif.* i. 21; *De Abrah.* ii. 5; *De Sept. Num.* ii. 281, ed. Mangey; Joseph. *B. J.* vii. 5, §5; Mishna, *Pirke Aboth*, v. 7, 8; Irenaeus, i. 3, ii. 1, v. 29, 30; Hieronym. *Com. in* Is. iv. 1, vol. iv. p. 72, ed. Migne; Arist. *Metaphys.* i. 5, 6, xii. 6, 8; Aelian, *V. H.* iv. 17; Varro, *Hebdom.* fragm. i. p. 255, ed. Bipont.; Niebuhr, *Hist. of Rome*, ii. 72, ed. Hare; Burckhardt, *Trav. in Arabia*, i. 75; *Syria*, p. 560, comp. with Gen. xiii. 16 and xxii. 17; also see papers on Hindoo Chronology in Sir W. Jones's Works, Suppl. vol. ii. pp. 968, 1017).

We proceed to give some instances of numbers used *a.* representatively, and thus probably by design indefinitely, or *b.* definitely, but, as we may say preferentially, *i.e.*, because some meaning (which we do not in all cases understand) was attached to them.

1. *Seven*, as denoting either plurality or completeness, is so frequent as to make a selection only of instances necessary, *e. g. seven-fold*, Gen. iv. 24; *seven times*, *i. e.* completely, Lev. xxvi. 24; Ps. xii. 6; *seven* (*i.e.* many) *ways*, Deut. xxviii. 25. See also 1 Sam. ii. 5; Job v. 19, where six also is used; Prov. vi. 16, ix. 1; Eccl. xi. 2, where eight also is named; Is. iv. 1; Jer. xv. 9; Mic. v. 5; also Matt. xii. 45, *seven spirits*; Mark xvi. 9, *seven devils*; Rev. iv. 5, *seven Spirits*, xv. 1, *seven plagues*. Otho, *Lex. Rabb.* p. 411, says that Scripture uses seven to denote plurality. See also Christian authorities quoted by Suicer, *Thes. Eccl.* s. v. ἑβδομος, Hofmann, *Lex.* s. v. "Septem," and the passages quoted above from Varro, Aristotle, and Aelian, in reference to the heathen value for the number 7.

2. *Ten* as a preferential number is exemplified in the Ten Commandments and the law of Tithe. It plays a conspicuous part in the later Jewish ritual code. See Otho, *Lex. Rabb.* p. 410.

3. *Seventy*, as compounded of 7 × 10, appears frequently, *e.g.*, *seventy fold* (Gen. iv. 24; Matt. xviii. 22). Its definite use appears in the offerings of 70 shekels (Num. vii. 13, 19, and foll.); the 70 elders (xi. 16); 70 years of captivity (Jer. xxv. 11). To these may be added the 70 descendants of Noah (Gen. x.), and the alleged Rabbinical qualification for election to the office of Judge among the 71 members of the Great Sanhedrim, of the knowledge of 70 languages (*Sanh.* ii. 6; and Carpzov, *App. Bibl.* p. 576). The number of 72 translators may perhaps also be connected with the same idea.

4. *Five* appears in the table of punishments, of legal requirements (Ex. xxii. 1; Lev. v. 16, xxii 14, xxvii. 15; Num. v. 7, xviii. 16), and in the five empires of Daniel (Dan. ii.).

5. *Four* is used in reference to the 4 winds (Dan. vii. 2); and the so-called 4 corners of the earth; the 4 creatures, each with 4 wings and 4 faces, of Ezekiel (i. 5 and foll.); 4 rivers of Paradise (Gen

[a] ך ם ן ף ץ 500, ך 600, ן 700, ף 800, ץ 900.

li. 10); 4 beasts (Dan. vii., and Rev. iv. 6); the 4 equal-sided Temple-chamber (Ez. xl. 47).

3. *Three* was regarded, both by the Jews and other nations, as a specially complete and mystic number (Plato, *De Leg.* iv. p. 715; Dionys. Halic. iii. c. 12). It appears in many instances in Scripture as a definite number, *e. g.* 3 feasts (Ex. xxiii. 14, 17; Deut. xvi. 16), the triple offering of the Nazarite, and the triple blessing (Num. vi. 14, 24), the triple invocation (Is. vi. 3; Rev. i. 4), Daniel's 3 hours of prayer (Dan. vi. 10, comp. Ps. lv. 17), the third heaven, (2 Cor. xii. 2), and the thrice-repeated vision (Acts x. 16).

7. *Twelve* (3 × 4) appears in 12 tribes, 12 stones in the high-priest's breast-plate, 12 Apostles, 12 foundation-stones, and 12 gates (Rev. xxi. 19-21); 12,000 furlongs of the heavenly city (Rev. xxi. 16); 144,000 sealed (Rev. vii. 4).

8. *Forty* appears in many enumerations; 40 days of Moses Ex. (xxiv. 18); 40 years in the wilderness (Num. xiv. 34); 40 days and nights of Elijah 1 K. xix. 8); 40 days of Jonah's warning to Nineveh Jon. iii. 4); 40 days of temptation (Matt. iv. 2). Add to these the very frequent use of the number 40 in regnal years, and in political or other periods (Judg. iii. 11, xiii. 1; 1 Sam. iv. 18; 2 Sam. v. 4, xv. 7; 1 K. xi. 42; Ez. xxix. 11, 12; Acts xiii. 21).

9. *One hundred.*—100 cubits' length of the Tabernacle-court (Ex. xxvii. 18); 100 men, *i. e.* a large number (Lev. xxvi. 8); Gideon's 300 men (Judg. vii. 6); the selection of 10 out of every 100, (xx. 10); 100 men (2 K. iv. 43); leader of 100 men (1 Chr. xii. 14); 100 stripes (Prov. xvii. 10); 100 times (Eccl. viii. 12); 100 children (vi. 3); 100 cubits' measurements in Ezekiel's Temple (Ez. xl., xli., xlii.); 100 sheep (Matt. xviii. 12); 100 pence (Matt. xviii. 28); 100 measures of oil or wheat (Luke xvi. 6, 7).

10. Lastly, the mystic number 666 (Rev. xiii. 18), of which the earliest attempted explanation is the conjecture of Irenaeus, who of three words, Euanthas, Lateinos, and Teitan, prefers the last as fulfilling its conditions best. (For various other interpretations see Calmet, Whitby, and Irenaeus, *De Antichrist.* v. c. 29, 30).

It is evident, on the one hand, that whilst the representative, and also the typical character of certain numbers must be maintained (*e. g.*, Matt. xix. 28), there is, on the other, the greatest danger of over-straining any particular theory on the subject, and of thus degenerating into that subtle trifling, from which neither the Gnostics, nor some also of their orthodox opponents were exempt (see Clem. Alex. *Strom.* vi. c. 11, p. 782, ed. Potter and August. *l. c.*), and of which the Rabbinical writings present such striking instances. [CHRONOLOGY, CENSUS.] [H. W. P.]

NUMBERING. [CENSUS.]

NUMBERS (וַיְדַבֵּר, from the first word; or בְּמִדְבַּר, from the words בְּמִדְבַּר סִינַי, in i. 1; Ἀριθμοί: *Numeri*: called also by the later Jews סֵפֶר הַפְּקוּדִים, or הַפְּקֻדִים), the Fourth Book of the Law or Pentateuch. It takes its name in the LXX. and Vulg. (whence our 'Numbers') from the double numbering or census of the people; the first of which is given in chaps. i.–iv., and the second in chap. xxvi.

A. *Contents.*—The Book may be said to contain generally the history of the Israelites from the time of their leaving Sinai, in the second year after the Exodus, till their arrival at the borders of the Promised Land in the fortieth year of their journeying. It consists of the following principal divisions:—

I. The preparations for the departure from Sinai (i. 1–x. 10).

II. The journey from Sinai to the borders of Canaan (x. 11–xiv. 45).

III. A brief notice of laws given, and events which transpired, during the thirty-seven years' wandering in the wilderness (xv. 1–xix. 22).

IV. The history of the last year, from the second arrival of the Israelites in Kadesh till they reach "the plains of Moab by Jordan near Jericho" (xx. 1–xxxvi. 13).

I. (*a.*) The object of the encampment at Sinai has been accomplished. The Covenant has been made, the Law given, the Sanctuary set up, the Priesthood consecrated, the service of God appointed, and Jehovah dwells in the midst of His chosen people. It is now time to depart in order that the object may be achieved for which Israel has been marshalled. That object is the occupation of the Promised Land. But this is not to be accomplished by peaceful means, but by the forcible expulsion of its present inhabitants; for "the iniquity of the Amorites is full," they are ripe for judgment, and this judgment Israel is to execute. Therefore Israel must be organized as Jehovah's army: and to this end a numbering of all who are capable of bearing arms is necessary. Hence the book opens with the numbering of the people,[a] chapters i.–iv. These contain, first, the census of all the tribes of Israel, amounting in all to six hundred and three thousand five hundred and fifty, with the exception of the Levites, who were not numbered with the rest (chap. i.); secondly, the arrangement of the camp, and the order of march (chap. ii.); thirdly, the special or separate census of the Levites, who are claimed for God instead of all the first-born, the three families of the tribe having their peculiar offices in the Tabernacle appointed them, both when it was at rest and when they were on the march (chaps. iii., iv.).

(*b.*) Chapters v., vi. Certain laws apparently supplementary to the legislation in Leviticus: the removal of the unclean from the camp (v. 1-4); the law of restitution (v. 5-10); the trial of jealousy (v. 11-31), the law of the Nazarite (vi. 1-21); the form of the priestly blessing (vi. 22-27).

(*c*) Chapters vii. 1–x. 10. Events occurring at this time, and regulations connected with them. Chap. vii. gives an account of the offerings of the princes of the different tribes at the dedication of the Tabernacle; chap. viii. of the consecration of the Levites (ver. 89 of chap. vii., and verses 1-4 of chap. viii. seem to be out of place); chap. ix. 1-14, of the second observance of the Passover (the first in the wilderness) on the 14th day of the second month, and of certain provisions made to meet the case of those who by reason of defilement were unable to keep it. Lastly, chap. ix. 15-23, tells how the cloud and the fire regulated the march and the encampment; and x. 1-10 how two silver trumpets were employed to give the signal for public assemblies, for war, and for feasts.

II. March from Sinai to the borders of Canaan.

(*a.*) We have here, first, the order of march described (x. 14-28); the appeal of Moses to his father-in-law, Hobab, to accompany them in their journeys; a request urged probably because [illegible]

[a] See Kurtz, *Gesch. des Alten Bundes*, ii. 220.

desert life, he would be well acquainted with the best spots to encamp in, and also would have influence with the various wandering and predatory tribes who inhabited the peninsula (29-32); and the chant which accompanied the moving and the resting of the ark (vers. 35, 36).

(*b.*) An account of several of the stations and of the events which happened at them. The first was at Taberah, where, because of their impatient murmurings, several of the people were destroyed by lightning (these belonged chiefly, it would seem, to the motley multitude which came out of Egypt with the Israelites); the loathing of the people for the manna; the complaint of Moses that he cannot bear the burden thus laid upon him, and the appointment in consequence of seventy elders to serve and help him in his office (xi. 10-29); the quails sent, and the judgment following thereon, which gave its name to the next station, Kibroth-hat-taavah (the graves of lust), xi. 31-35 (cf. Ps. lxxviii. 30, 31, cvi. 14, 15); arrival at Hazeroth, where Aaron and Miriam are jealous of Moses, and Miriam is in consequence smitten with leprosy (xii. 1-15); the sending of the spies from the wilderness of Paran (*et Tyh*), their report, the refusal of the people to enter Canaan, their rejection in consequence, and their rash attack upon the Amalekites, which resulted in a defeat (xii. 16–xiv. 45).

III. What follows must be referred apparently to the thirty-seven years of wanderings; but we have no notices of time or place. We have laws respecting the meat and drink offerings, and other sacrifices (xv. 1-31); an account of the punishment of a Sabbath-breaker, perhaps as an example of the presumptuous sins mentioned in vers. 30, 31 (xv. 32-36); the direction to put fringes on their garments as mementos (xv. 37-41); the history of the rebellion of Korah, Dathan, and Abiram, and the murmuring of the people (xvi.); the budding of Aaron's rod as a witness that the tribe of Levi was chosen (xvii.); the direction that Aaron and his sons should bear the iniquity of the people, and the duties of the priests and Levites (xviii.); the law of the water of purification (xix.).

IV. (*a.*) The narrative returns abruptly to the second encampment of the Israelites in Kadesh. Here Miriam dies, and the people murmur for water, and Moses and Aaron, "speaking unadvisedly," are not allowed to enter the Promised land (xx. 1-13). They intended perhaps, as before, to enter Canaan from the south. This, however, was not to be permitted. They therefore desired a passage through the country of Edom. Moses sent conciliatory message to the king, asking permission to pass through, and promising carefully to abstain from all outrage, and to pay for the provisions which they might find necessary. The jealousy, however, of this fierce and warlike people was roused. They refused the request, and turned out in arms to defend their border. And as those almost impassible mountain-passes could have been held by a mere handful of men against a large and well-armed army, the Israelites abandoned the attempt as hopeless and turned southwards, keeping along the western borders of Idumaea till they reached Ezion-geber (xx. 14-21).

In their way southwards they stop at Mount Hor, or rather at Moserah, on the edge of the Edomite territory; and from this spot it would appear that Aaron, accompanied by his brother Moses and his son Eleazar, quitted the camp in order to ascend the mountain. Mount Hor lying itself within the Edomite territory, whilst it might have been perilous for a larger number to attempt to penetrate it, these unarmed wayfarers would not be molested, or might escape detection. Bunsen suggests that Aaron was taken to Mount Hor, in the hope that the fresh air of the mountain might be beneficial to his recovery; but the narrative does not justify such a supposition.

After Aaron's death, the march is continued southward; but when the Israelites approach the head of the Akabah at the southernmost point of the Edomite territory, they again murmur by reason of the roughness of the way, and many perish by the bite of venomous serpents (xx. 22–xxi. 9). The passage (xxi. 1-3) which speaks of the Canaanite king of Arad as coming out against the Israelites is clearly out of place, standing as it does *after* the mention of Aaron's death on Mount Hor. Arad is in the south of Palestine. The attack therefore must have been made whilst the people were yet in the neighbourhood of Kadesh. The mention of Hormah also shows that this must have been the case (comp. xiv. 45). It is on this *second* occasion that the name of Hormah is said to have been given. Either therefore it is used proleptically in xiv. 45, or there is some confusion in the narrative. What "the way of Atharim" (A. V. "the way of the spies") was, we have no means now of ascertaining.

(*b.*) There is again a gap in the narrative. We are told nothing of the march along the eastern edge of Edom, but suddenly find ourselves transported to the borders of Moab. Here the Israelites successively encounter and defeat the kings of the Amorites and of Bashan, wresting from them their territory and permanently occupying it (xxi. 10-35). Their successes alarm the king of Moab, who, distrusting his superiority in the field, sends for a magician to curse his enemies; hence the episode of Balaam (xxii. 1–xxiv. 25). Other artifices are employed by the Moabites to weaken the Israelites, especially through the influence of the Moabitish women (xxv. 1), with whom the Midianites (ver. 6) are also joined; this evil is averted by the zeal of Phinehas (xxv. 7, 8); a second numbering of the Israelites takes place in the plains of Moab preparatory to their crossing the Jordan (xxvi.). A question arises as to the inheritance of daughters, and a decision is given thereon (xxvii. 1-11); Moses is warned of his death, and Joshua appointed to succeed him (xxvii. 12-23). Certain laws are given concerning the daily sacrifice, and the offerings for sabbaths and festivals (xxviii., xxix.); and the law respecting vows (xxx.); the conquest of the Midianites is narrated (xxxi.); and the partition of the country east of the Jordan among the tribes of Reuben and Gad, and the half tribe of Manasseh (xxxii.). Then follows a recapitulation, though with some difference, of the various encampments of the Israelites in the desert (xxxiii. 1-49); the command to destroy the Canaanites, (xxxiii. 50-56); the boundaries of the Promised Land, and the men appointed to divide it (xxxiv.); the appointment of the cities of the Levites and the cities of refuge (xxxv.); further directions respecting heiresses, with special reference to the case mentioned in chap. xxvii., and conclusion of the book (xxxvi.).

B. *Integrity.*—This, like the other books of the Pentateuch, is supposed by many critics to consist of a compilation from two or three, or more, earlier documents. According to De Wette, the following portions are the work of the Elohist [PENTATEUCH]:—Chap. i. 1–x. 28; xiii. 2-16 (in its ori

ginal, though not in its present form); xv.; xvi. 1, 2-11, 16-23, 24 (?); xvii.–xix.; xx. 1-13, 22-29; xxv.–xxxi. (except perhaps xxvi. 8-11); xxxii. 5, 28-42 (vers. 1-4 uncertain); xxxiii.–xxxvi. The rest of the book is, according to him, by the Jehovist or later editor. Von Lengerke (*Kenaan*, s. lxxxi.) and Stähelin (§23) make a similar division, though they differ as to some verses, and even whole chapters. Vaihinger (in Herzog's *Encyclopädie*, art. "Pentateuch") finds traces of three distinct documents, which he ascribes severally to the pre-Elohist, the Elohist, and the Jehovist. To the first he assigns chap. x. 29-36; xi. 1-12, 16 (in its original form); xx. 14-21; xxi. 1-9, 13-35; xxxii. 33-42; xxxiii. 55, 56. To the Elohist belong chap. i. 1–x. 28; xi. 1–xii. 16; xiii. 1–xx. 13; xx. 22-29; xxi. 10-12; xxii. 1; xxv. 1–xxxi. 54; xxxii. 1-32; xxxiii. 1–xxxvi. 19. To the Jehovist, xi. 1–xii. 16 (*überarbeitet*); xxii. 2–xxiv. 25; xxxi. 8, &c.

But the grounds on which this distinction of documents rests are in every respect most unsatisfactory. The use of the divine names, which was the starting-point of this criticism, ceases to be a criterion; and certain words and phrases, a particular manner or colouring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later document. Thus, for instance, Stähelin alleges as reasons for assigning chaps. xi. xii. to the Jehovist, the coming down of Jehovah to speak with Moses, xi. 17, 25; the pillar of a cloud, xii. 5; the relation between Joshua and Moses, xi. 28, as in Ex. xxxiii. xxxiv.; the seventy elders, xi. 16, as Ex. xxiv. 1, and so on. So again in the Jehovistic section, xiii. xiv., he finds traces of "the author of the First Legislation" in one passage (xiii. 2-17), because of the use of the word מַטֶּה, signifying "a tribe," and נָשִׂיא, as in Num. i. and vii. But נָשִׂיא is used also by the supposed supplementist, as in Ex. xxii. 27, xxxiv. 31; and that מַטֶּה is not peculiar to the older documents has been shown by Keil (*Comm. on Joshua*, s. xix.). Von Lengerke goes still further, and cuts off xiii. 2-16 altogether from what follows. He thus makes the story of the spies, as given by the Elohist, strangely maimed. We only hear of their being sent to Canaan, but nothing of their return and their report. The chief reason for this separation is that in xiii. 27 occurs the Jehovistic phrase, "flowing with milk and honey," and some references to other earlier Jehovistic passages. De Wette again finds a repetition in xiv. 26-38 of xiv. 11-25, and accordingly gives these passages to the Elohist and Jehovist respectively. This has more colour of probability about it, but has been answered by Ranke (*Untersuch.* ii. s. 197 ff.). Again, chap. xvi. is supposed to be a combination of two different accounts, the original or Elohistic document having contained only the story of the rebellion of Korah and his company, whilst the Jehovist mixed up with it the insurrection of Dathan and Abiram, which was directed rather against the temporal dignity than against the spiritual authority of Moses. But it is against this view, that, in order to justify it, verses 12, 14, 27, and 32, are treated as interpolations. Besides, the discrepancies which it is alleged have arisen from the fusing of the two narratives disappear when fairly looked at. There is no contradiction, for instance, between xvi. 19, where Korah appears at the tabernacle of the congregation, and ver. 27, where Dathan and Abiram stand at the door of their tents. In the last passage Korah is not mentioned, and, even if we suppose him to be included, the narrative allows time for his having left the Tabernacle and returned to his own tent. Nor again, does the statement, ver. 35, that the 250 men who offered incense were destroyed by fire, and who had, as we learn from ver. 2, joined the leaders of the insurrection, Korah, Dathan, and Abiram, militate against the narrative in ver. 1, according to which Dathan and Abiram and all that appertained unto Korah were swallowed up alive by the opening of the earth. Further, it is clear, as Keil remarks (*Einleit.* 34), that the entire document (*die Grundschrift*) implies that persons belonging to the other tribes were mixed up in Korah's rebellion, because they say to Moses and Aaron (ver. 3), "*All* the congregation is holy," which justifies the statement in vers. 1, 2, that, besides Korah the Levite, the Reubenites Dathan, Abiram, and On, were leaders of the insurrection.

In chap. xii. we have a remarkable instance of the jealousy with which the authority of Moses was regarded even in his own family. Considering the almost absolute nature of that authority, this is perhaps hardly to be wondered at. On the other hand, as we are expressly reminded, there was everything in his personal character to disarm jealousy. "Now the man Moses was very meek above all the men which were upon the face of the earth," says the historian (ver. 3). The pretext for the outburst of this feeling on the part of Miriam and Aaron was that Moses had married an Ethiopian woman (a woman of Cush). This was probably, as Ewald suggests, a second wife married after the death of Zipporah. But there is no reason for supposing, as he does (*Gesch.* ii. 228, note), that we have here a confusion of two accounts. He observes that the words of the brother and sister, "Hath the Lord indeed spoken only by Moses, hath He not also spoken by us?" show that the real ground of their jealousy was the apparent superiority of Moses in the prophetical office, whereas, according to the narrative, their censure was occasioned by his marriage with a foreigner and a person of inferior rank. But nothing, surely, can be more natural than that the long pent-up feeling of jealousy should have fastened upon the marriage as a pretext to begin the quarrel, and thus have shown itself in its true character in the words recorded by the historian.

It is not perhaps to be wondered at that the episode of Balaam (xxii. 2–xxiv. 25) should have been regarded as a later addition. The language is peculiar, as well as the general cast of the narrative. The prophecies are vivid and the diction of them highly finished: very different from the rugged, vigorous fragments of ancient poetry which meet us in chap. xxi. On these grounds, as well as on the score of the distinctly Messianic character of Balaam's prophecies, Ewald gives this episode to his Fifth Narrator, or the latest editor of the Pentateuch. This writer he supposes to have lived in the former half of the 8th century B.C., and hence he accounts for the reference to Assyria and the Cypriotes (the Kittim); the latter nation then, that time probably infesting as pirates the coast of Syria, whereas Assyria might be joined with Eber, because as yet the Assyrian power, though hostile to the southern nations, was rather friendly than otherwise to Judah. The allusions to Edom and Moab as vanquished enemies have reference, it is said, to the time of David (Ewald Gesch.

i. 143 ff., and compare ii. 277 ff.). The prophecies of Balaam therefore, on this hypothesis, are *vaticinia ex eventu*, put into his mouth by a clever, but not very scrupulous, writer of the time of Isaiah, who, finding some mention of Balaam as a prince of Midian in the older records, put the story into shape as we have it now. But this sort of criticism is so purely arbitrary that it scarcely merits a serious refutation, not to mention that it rests entirely on the assumption that in prophecy there is no such thing as prediction. We will only observe that, considering the peculiarity of the man and of the circumstances as given in the history, we might expect to find the narrative itself, and certainly the poetical portions of it, marked by some peculiarities of thought and diction. Even granting that this episode is not by the same writer as the rest of the book of Numbers, there seems no valid reason to doubt its antiquity, or its rightful claim to the place which it at present occupies. Nothing can be more improbable than that, as a later invention, it should have found its way into the Book of the Law.

At any rate, the picture of this great magician is wonderfully in keeping with the circumstances under which he appears and with the prophecies which he utters. This is not the place to enter into all the questions which are suggested by his appearance on the scene. How it was that a heathen became a prophet of Jehovah we are not informed; but such a fact seems to point to some remains of a primitive revelation, not yet extinct, in other nations besides that of Israel. It is evident that his knowledge of God was beyond that of most heathen, and he himself could utter the passionate wish to be found in his death among the true servants of Jehovah; but, because the soothsayer's craft promised to be gainful, and the profession of it gave him an additional importance and influence in the eyes of men like Balak, he sought to combine it with his higher vocation. There is nothing more remarkable in the early history of Israel than Balaam's appearance. Summoned from his home by the Euphrates, he stands by his red altar-fires, weaving his dark and subtle sorceries, or goes to seek for enchantment, hoping, as he looked down upon the tents of Israel among the acacia-groves of the valley, to wither them with his word, yet constrained to bless, and to foretell their future greatness.

The Book of Numbers is rich in fragments of ancient poetry, some of them of great beauty, and all throwing an interesting light on the character of the times in which they were composed. Such, for instance, is the blessing of the high-priest (vi. 24-26):—

> "Jehovah bless thee and keep thee:
> Jehovah make His countenance shine upon thee,
> And be gracious unto thee:
> Jehovah lift up His countenance upon thee,
> And give thee peace."

Such too are the chants which were the signal for the Ark to move when the people journeyed, and for it to rest when they were about to encamp:—

> "Arise, O Jehovah! let Thine enemies be scattered:
> Let them also that hate Thee flee before Thee."

And,

> "Return, O Jehovah,
> To the ten thousands of the families of Israel!"

In chap. xxi. we have a passage cited from a book called the 'Book of the Wars of Jehovah.' This was probably a collection of ballads and songs composed on different occasions by the watch-fires of the camp, and for the most part, though not perhaps exclusively, in commemoration of the victories of the Israelites over their enemies. The title shows us that these were written by men imbued with a deep sense of religion, and who were therefore foremost to acknowledge that not their own prowess, but Jehovah's Right Hand, had given them the victory when they went forth to battle. Hence it was called, not 'The Book of the Wars of Israel,' but 'The Book of the Wars of Jehovah. Possibly this is the book referred to in Ex. xvii. 14, especially as we read (ver. 16) that when Moses built the altar which he called Jehovah-Nissi (Jehovah is my banner), he exclaimed, "Jehovah will have war with Amalek from generation to generation." This expression may have given the name to the book.

The fragment quoted from this collection is difficult, because the allusions in it are obscure. The Israelites had reached the Arnon, "which," says the historian, "forms the border of Moab, and separates between the Moabites and Amorites." "Wherefore it is said," he continues, "in the Book of the Wars of Jehovah,

> 'Vaheb in Suphah and the torrent-beds;
> Arnon and the slope of the torrent-beds
> Which turneth to where Ar lieth,
> And which leaneth upon the border of Moab.'"

The next is a song which was sung on the digging of a well at a spot where they encamped, and which from this circumstance was called Beêr, or 'The Well.' It runs as follows:—

> "Spring up, O well! sing ye to it:
> Well, which the princes dug,
> Which the nobles of the people bored
> With the sceptre-of-office, with their staves."

This song, first sung at the digging of the well, was afterwards no doubt commonly used by those who came to draw water. The maidens of Israel chanted it one to another, verse by verse, as they toiled at the bucket, and thus beguiled their labour. "Spring up, O well!" was the burden or refrain of the song, which would pass from one mouth to another at each fresh coil of the rope, till the full bucket reached the well's mouth. But the peculiar charm of the song lies not only in its antiquity, but in the characteristic touch which so manifestly connects it with the life of the time to which the narrative assigns it. The one point which is dwelt upon is, that the leaders of the people took their part in the work, that they themselves helped to dig the well. In the new generation, who were about to enter the Land of Promise, a strong feeling of sympathy between the people and their rulers had sprung up, which augured well for the future, and which left its stamp even on the ballads and songs of the time. This little carol is fresh and lusty with young life; it sparkles like the water of the well whose springing up first occasioned it; it is the expression, on the part of those who sung it, of lively confidence in the sympathy and co-operation of their leaders, which, manifested in this one instance, might be relied upon in all emergencies (Ewald, *Gesch.* ii. 264, 5).

Immediately following this 'Song of the Well,' comes a song of victory, composed after a defeat of the Moabites and the occupation of their territory. It is in a taunting, mocking strain; and is commonly considered to have been written by some *Israelitish* bard on the occupation of the Amorite territory.

Yet the manner in which it is introduced would rather lead to the belief that we have here the translation of an old Amorite ballad. The history tells us that when Israel approached the country of Sihon they sent messengers to him, demanding permission to pass through his territory. The request was refused. Sihon came out against them, but was defeated in battle. "Israel," it is said, "smote him with the edge of the sword, and took his land in possession, from the Arnon to the Jabbok and as far as the children of Ammon; for the border of the children of Ammon was secure (*i. e.* they made no encroachments upon Ammonitish territory). Israel also took all these cities, and dwelt in all the cities of the Amorites in Heshbon, and all her daughters (*i. e.* lesser towns and villages)." Then follows a little scrap of Amorite history: "For Heshbon is the city of Sihon, king of the Amorites, and he had waged war with the former king of Moab, and had taken from him all his land as far as the Arnon. *Wherefore* the ballad-singers (המשלים) say,—

'Come ye to Heshbon,
Let the city of Sihon be built and established!
For fire went forth from Heshbon,
A flame out of the stronghold (קריה) of Sihon,
Which devoured Ar of Moab,
The lords[a] of the high places of Arnon.
Woe to thee, Moab!
Thou art undone, O people of Chemosh!
He (*i. e.* Chemosh thy god) hath given up his sons as fugitives,
And his daughters into captivity,
To Sihon king of the Amorites.
Then we cast them down[b]; Heshbon perished even unto Dibon.
And we laid (it) waste unto Nophah, which (reacheth) unto Medeba.'"

If the song is of Hebrew origin, then the former part of it is a biting taunt, "Come, ye Amorites, into your city of Heshbon, and build it up again. Ye boasted that *ye* had burnt it with fire and driven out its Moabite inhabitants; but now *we* are come in our turn and have burnt Heshbon, and driven you out as ye once burnt it and drove out its Moabite possessors."

C. The alleged discrepancies between many statements in this and the other books of the Pentateuch, will be found discussed in other articles, DEUTERONOMY; EXODUS; PENTATEUCH. [J. J. S. P.]

NUME'NIUS (Νουμήνιος: *Numenius*), son of Antiochus, was sent by Jonathan on an embassy to Rome (1 Macc. xii. 16) and Sparta (xii. 17), to renew the friendly connexions between these nations and the Jews, c. B.C. 144. It appears that he had not returned from his mission at the death of Jonathan (1 Macc. xiv. 22, 23). He was again despatched to Rome by Simon, c. B.C. 141 (1 Macc. xiv. 24), where he was well received and obtained letters in favour of his countrymen, addressed to the various Eastern powers dependent on the Republic, B.C. 139 (1 Macc. xv. 15 ff.). [LUCIUS.] [B. F. W.]

NUN (נוּן, or נֻן, 1 Chr. vii. 27: Ναυη: *Nun*). The father of the Jewish captain Joshua (Ex. xxxiii. 11, &c.). His genealogical descent from Ephraim is recorded in 1 Chr. vii. Nothing is known of his life, which was doubtless spent in Egypt. The mode of spelling his name in the LXX. has not been satisfactorily accounted for. Gesenius asserts that it is a very early mistake of transcribers, who wrote NATH for NATN. But Ewald (*Gesch.* ii. 296) gives some good etymological reasons for the most probable opinion that the final N is omitted intentionally. [W. T. B.]

NURSE.[c] It is clear, both from Scripture and from Greek and Roman writers, that in ancient times the position of the nurse, wherever one was maintained, was one of much honour and importance. (See Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 3 Macc. i. 20; Hom. *Od.* ii. 361, xix. 15, 251, 466; Eurip. *Ion*, 1357; *Hippol.* 267 and foll.; Virg. *Aen.* vii. 1.) The same term is applied to a foster-father or mother, *e. g.*, Num. xi. 12; Ruth iv. 16; Is. xlix. 23. In great families male servants, probably eunuchs in later times, were entrusted with the charge of the boys, 2 K. x. 1, 5. [CHILDREN.] See also *Kitto*, iv. p. 63, Tegg's ed.; Mrs. Poole, *English in Eg.* iii. p. 201. [H. W. P.]

NUTS. The representative in the A. V. of the words *botnim* and *egôz*.

1. *Botnim* (בָּטְנִים: τερέβινθος: *terebinthus*). Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, mention is made of *botnim*. There can scarcely be a doubt that the *botnim* denote the fruit of the Pistachio tree (*Pistacia vera*), though most

Pistacia vera.

modern versions are content with the general term *nuts*. (See Bochart, *Chanaan*, i. 10.) For other attempted explanations of the Hebrew term, see Celsius, *Hierob.* i. 24. The LXX. and Vulg. read

[a] Or "the possessors of, the men of, the high places," &c.

[b] So in Zunz's Bible, and this is the simplest rendering. Ewald and Bunsen: "We burned them." Others: "We shot at them."

[c] 1. אֹמֶן, *m.*, τιθηνός, *nutrix, nutritius*; אֹמֶנֶת, *f.*, τιθανός, *nutria*, from אָמַן, to carry (see Is. xlix. 4)

2. מֵינֶקֶת, part. f. Hiph., from יָנַק, "suck," with אֹמֶנֶת, γυνὴ τροφεύουσα (Ex. ii. 7). Connected with this is the doubtful verb נָנַק, θηλάζω *nutrio* (Gen. xxi.).

3. In N. T. τροφός, *nutrix* (1 Thess. ii. 7).

terebinth, the Persian version has *pusteh*, from which it is believed the Arabic *fostak* is derived, whence the Greek πιστάκια, and the Latin *pistacia*; the *Pistacia vera* in form not unlike the *P. terebinthus*, another species of the same genus of plants; it is probable therefore that the *terebinthus* of the LXX. and Vulg. is used generically, and is here intended to denote the Pistachio-tree, for the terebinth does not yield edible fruit.[a] Syria and Palestine have been long famous for Pistachio-trees, see Dioscorides (i. 177) and Pliny (xiii. 5), who says "Syria has several trees that are peculiar to itself; among the nut-trees there is the well-known pistacia;" in another place (xv. 22) he states that Vitellius introduced this tree into Italy, and that Flaccus Pompeius brought it at the same time into Spain. The district around Aleppo is especially celebrated for the excellence of the Pistachio nuts, see Russell (*Hist. of Alep.* i. p. 82, 2nd ed.) and Galen (*de Fac. Alim.* 2, p. 612), who mentions Berrhoea (Aleppo) as being rich in the production of these trees; the town of Batna in the same district is believed to derive its name from this circumstance: Betonim, a town of the tribe of Gad (Josh. xiii. 26), has in all probability a similar etymology. [BETONIM.] Bochart draws attention to the fact that pistachio-nuts are mentioned together with almonds in Gen. xliii. 11, and observes that Dioscorides, Theophrastus, and others, speak of the pistachio-tree conjointly with the almond-tree; as there is no mention in early writers of the *Pistacia vera* growing in Egypt (see Celsius, *Hierob.* i. 27), it was doubtless not found there in Patriarchal times, wherefore Jacob's present to Joseph would have been most acceptable. There is scarcely any allusion to the occurrence of the *Pistacia vera* in Palestine amongst the writings of modern travellers; Kitto (*Phys. Hist. Pal.* p. 323) says "it is not much cultivated in Palestine, although found there growing wild in some very remarkable positions, as on Mount Tabor, and on the summit of Mount Attaroth" (see Burckhardt, *Syria*, p. 334). Dr. Thomson (*The Land and the Book*, p. 267) says that the terebinth-trees near Mais el Jebel had been grafted with the pistachio from Aleppo by order of Ibrahim Pasha, but that "the peasants destroyed the grafts, lest their crop of oil from the berries of these trees should be diminished." Dr. Hooker saw only two or three pistachio-trees in Palestine. These were outside the north gate of Jerusalem. But he says the tree is cultivated at Beirut and elsewhere in Syria. The *Pistacia vera* is a small tree varying from 15 to 30 ft. in height; the male and female flowers grow on separate trees; the fruit, which is a green-coloured oily kernel, not unlike an almond, is enclosed in a brittle shell. Pistachio-nuts are much esteemed as an article of diet both by Orientals and Europeans; the tree, which belongs to the Natural Order *Anacardiaceae*, extends from Syria to Bokhara, and is naturalised over the South of Europe; the nuts are too well-known to need minute description.

2. *Egôz* (אֱגוֹז: καρύα: *nux*) occurs only in Cant. vi. 11, "I went into the garden of nuts." The Hebrew word in all probability is here to be understood to refer to the *Walnut-tree*; the Greek καρύα is supposed to denote the tree, κάρυον the nut (see Soph. *Fr.* 892). Although κάρυον and *nux* may signify any kind of *nut*, yet the *walnut*, as *the* nut κατ' ἐξοχήν, is more especially that which is denoted by the Greek and Latin terms (see Casaubon *on Athenaeus*, ii. 65; Ovid, *Nux Elegia*; Celsius, *Hierob.* i. 28). The Hebrew term is evidently allied to the Arabic *jauz*, which is from a Persian word of very similar form; whence Abu'l Fadli (in Celsius) says "the Arabs have borrowed the word *Gjaus* from the Persian, in Arabic the term is *Chusf*, which is a tall tree." The *Chusf* or *Chasf*, is translated by Freytag, "an esculent nut, the walnut." The Jewish Rabbis understand the walnut by *Egôz*.

According to Josephus (*B. J.* iii. 10, § 8) the walnut-tree was formerly common, and grew most luxuriantly around the lake of Gennesareth; Schulz, speaking of this same district, says he often saw walnut-trees growing there large enough to shelter four-and-twenty persons. See also Kitto (*Phys. Hist. Pal.* p. 250) and Burckhardt (*Syria*, p. 265). The walnut-tree (*Juglans regia*) belongs to the Natural Order *Juglandaceae*; it is too well-known to require any description. [W. H.]

NYM'PHAS (Νυμφᾶς: *Nymphas*), a wealthy and zealous Christian in Laodicea, Col. iv. 15. His house was used as a place of assembly for the Christians; and hence Grotius making an extraordinarily high estimate of the probable number of Christians in Laodicea, infers that he must have lived in a rural district.

In the Vatican MS. (B) this name is taken for that of a woman; and the reading appears in some Latin writers, as pseudo-Ambrose, pseudo-Anselm, and it has been adopted in Lachmann's N. T. The common reading, however, is found in the Alexandrian MS. and in that of Ephrem Syrus (A and C), and is the only one known to the Greek Fathers.

[W. T. B.]

O

OAK. The following Hebrew words, which appear to be merely various forms of the same root,[a] occur in the O. T. as the names of some species of oak, viz. *êl*, *êlâh*, *êlôn*, *tlân*, *allâh*, and *allôn*.

1. *El* (אֵיל: LXX. Vat. τερέβινθος; Alex. τεοὐμινθος; Aq., Sym., Theod., δρῦς: *campestria*) occurs only in the sing. number in Gen. xiv. 6 ("El-paran"). It is uncertain whether *êl* should be joined with Paran to form a proper name, or whether it is to be taken separately, as the "terebinth," or the "oak," or the "grove" of Paran. Onkelos and Saadias follow the Vulg., whence the "plain" of the A. V. (margin); (see Stanley, *S. & P.* 519, 520, App.). Rosenmüller (*Schol.* ad l. c.) follows Jarchi (*Comment. in Pent.* ad Gen. xiv. 6), and is for retaining the proper name. Three plural forms of *êl* occur: *êlim*, *êlôth*, and *êlath*. *Elim*, the second station where the Israelites halted

[a] The Arabic بطم (*butm*) appears to be also used specially. It is more generally applied to the terebinth, but may comprehend the pistachio-tree, as Gesenius conjectures, and Dr. Royle (Kitto's *Cycl.*) has proved. He says the word is applied in some Arabic works to a tree which has green-coloured kernels. This must be the *Pistacia vera*.

[a] From אוּל, אִיל or אָלַל, "to be strong."

after they had crossed the Red Sea, in all probability derived its name from the seventy palm-trees there; the name *êl*, which more particularly signifies an "oak," being here put for any grove or plantation. Similarly the other natural form, *êlôth* or *êlath*, may refer, as Stanley (*S. & P.* p. 20) conjectures, to the palm-grove at Akaba. The plural *êlîm* occurs in Is. i. 29, where probably "oaks" are intended in Is. lxi. 3, and Ez. xxxi. 14, any strong flourishing trees may be denoted.

2. *Êlâh* (אֵלָה: τερέβινθος, δρῦς, Ἠλά, δένδρον, δένδρον συσκιάζον Symm.; πλάτανος in Hos. iv. 13; δένδρον σύσκιον: *terebinthus, quercus*: "oak," "elah," "teil-tree" in Is. vi. 13; "elms" in Hos. iv. 13). There is much difficulty in determining the exact meanings of the several varieties of the term mentioned above: the old versions are so inconsistent that they add but little by way of elucidation. Celsius (*Hierob.* i. 34) has endeavoured to shew that *êl*, *êlim*, *êlôn*, *êlâh*, and *allâh*, all stand for the terebinth-tree (*Pistacia terebinthus*), while *allôn* alone denotes an oak. Royle (in Kitto's *Cyc.* art. "Alah") agrees with Celsius in identifying the *êlâh* (אֵלָה) with the terebinth, and the *allôn* (אַלּוֹן) with the oak. Hiller (*Hierophyt.* i. 348) restricts the various forms of this word to different species of oak, and says no mention is made of the terebinth in the Hebrew Scriptures. Rosenmüller (*Bib. Not.* p. 237) gives the terebinth to *êl* and *êlâh*, and the oak to *allâh*, *allôn*, and *êlôn* (אֵילוֹן).

For the various opinions upon the meaning of these kindred terms, see Gesen. *Thes.* pp. 47, 51, 103, and Stanley, *S. & P.* p. 519.

That various species of oak may well have deserved the appellation of mighty trees is clear from the fact, that noble oaks are to this day occasionally seen in Palestine and Lebanon. On this subject we have been favoured with some valuable remarks from Dr. Hooker, who says, "The forests have been so completely cleared off all Palestine, that we must not look for existing evidence of what the trees were in biblical times and antecedently. In Syria proper there are only three common oaks. All form large trees in many countries, but very rarely now in Palestine; though that they do so occasionally is proof enough that they once did." Abraham's oak, near Hebron, is a familiar example of a noble tree of one species. Dr. Robinson (*Bib. Res.* ii. 81) has given a minute account of it; and "his description," says Dr. Hooker, "is good, and his measurements tally with mine." If we examine the claims of the terebinth to represent the *êlâh*, as Celsius and others assert, we shall see that in point of size it cannot compete with some of the oaks of Palestine; and that therefore, if *êlâh* ever denotes the terebinth, which we by no means assert it does not, the term etymologically is applicable to it only in a second degree; for the *Pistacia terebinthus*, although it also occasionally grows to a great size, "spreading its boughs," as Robinson (*Bib. Res.* ii. 222) observes, "far and wide like a noble oak," yet it does not form so conspicuously a good tree as either the *Quercus pseudo-coccifera* or *Q. aegilops*. Dr. Thomson (*The Land and the Book*, p. 243) remarks on this point: "There are more mighty oaks here in this immediate vicinity (*Mejdel es-Shems*) than there are terebinths in all Syria and Palestine together. I have travelled from end to end of these countries, and across them in all directions, and speak with absolute certainty." At p. 600, the same writer remarks, "We have oaks in Lebanon twice the size of this (Abraham's oak), and every way more striking and majestic." Dr. Hooker has no doubt that Thomson is correct in saying there are far finer oaks in Lebanon; "though," he observes, "I did not see any larger, and only one or two at all near it. Cyril Graham told me there were forests of noble oaks in Lebanon north of the cedar valley." It is evident from these observations that two oaks (*Quercus pseudo-coccifera* and *Q. aegilops*) are well worthy of the name of mighty trees; though it is equally true that over a greater part of the country the oaks of Palestine are at present merely bushes.

Quercus pseudo-coccifera.

3. *Êlôn* (אֵילוֹן: ἡ δρῦς ἡ ὑψηλή, ἡ βαλανος Ἠλών: *convallis illustris, quercus*) occurs frequently in the O. T., and denotes, there can be little doubt, some kind of oak. The A. V., following the Targum, translates *êlôn* by "plain." (See Stanley, *S. & P.* 520, App.)

4. *Îlân* (אַיִל: δένδρον: *arbor*) is found only in Dan. iv. as the tree which Nebuchadnezzar saw in his dream. The word appears to be used for any "strong tree," the oak having the best claim to the title, to which tree probably indirect allusion may be made.

5. *Allâh* (אַלָּה: ἡ τέρμινθος; Aq. and Symm. ἡ δρῦς: *quercus*) occurs only in Josh. xxiv. 26, and is correctly rendered "oak" by the A. V.

6. *Allôn* (אַלּוֹן: ἡ βάλανος, δένδρον βαλάνου, δρῦς: *quercus*) is uniformly rendered "oak" by the A. V., and has always been so understood by commentators. It should be stated that *allôn* occurs in Hos. iv. 13, as distinguished from the other form *êlâh*; consequently it is necessary to suppose that two different trees are signified by the terms. We believe, for reasons given above, that the difference is specific, and not generic—that two species of oaks are denoted by the Hebrew terms: *allôn* may stand for an evergreen oak, as the *Quercus pseudo-coccifera*, and *êlâh* for one of the deciduous kinds. The *Pistacia vera* could never be mistaken for an oak. If, therefore, specific allusion was ever made to this tree, we cannot help believing that it would have

been under another name than any one of the numerous forms which are used to designate the different species of the genus *Quercus*; perhaps under a Hebrew form allied to the Arabic *butm*, "the terebinth." The oak-woods of Bashan are mentioned in Is. ii. 13, Ez. xxvii. 6, Zech. xi. 2. The oaks of Bashan belong in all probability to the species known as *Quercus aegilops*, the Valonia oak, which is said to be common in Gilead and Bashan. Sacrifices were offered under oaks (Hos. iv. 13; Is. i. 29); of oak-timber the Tyrians manufactured oars (Ez. xxvii. 6), and idolaters their images (Is. xliv. 14); under the shade of oak-trees the dead were sometimes interred (Gen. xxxv. 8; see also 1 Sam. xxxi. 13).

Quercus aegilops.

Another species of oak, besides those named above, is the *Quercus infectoria*, which is common in Galilee and Samaria. It is rather a small tree in Palestine, and seldom grows above 30 ft. high, though in ancient times it might have been a noble tree.

For a description of the oaks of Palestine, see Dr. Hooker's paper read before the Linnean Society, June, 1861. [W. H.]

OATH.[a] I. The principle on which an oath is held to be binding is incidentally laid down in Heb. vi. 16, viz. as an ultimate appeal to divine authority to ratify an assertion (see the principle stated and defended by Philo, *De Leg. Alleg.* iii. 73, i. 128, ed. Mang.). There the Almighty is represented as promising or denouncing with an oath, i. e. doing so in the most positive and solemn manner (see such passages as Gen. xxii. 16, xii. 7, compared with xxiv. 7; Ex. xvii. 16 and Lev. xxvi. 4 with Dan. ix. 11; 2 Sam. vii. 12, 13, with Acts ii. 30; Ps. cx. 4 with Heb. vii. 21, 28; Is. xlv. 23; Jer. xxii. 5, xxxii. 22). With this Divine asseveration we may compare the Stygian oath of Greek mythology (Hom. *Il.* xv. 37; Hes. *Theog.* 793, 805; see also the *Laws of Menu*, c. viii. 110; Sir W. Jones, *Works*, iii. 291).

II. On the same principle, that oath has always been held most binding which appealed to the highest authority, both as regards individuals and communities. (*a*.) Thus believers in Jehovah appealed to Him, both judicially and extra-judicially, with such phrases as "The God of Abraham judge;" "As the Lord liveth;" "God do so to me and more also;" "God knoweth," and the like (see Gen. xxi. 23, xxxi. 53; Num. xiv. 2, xxx. 2; 1 Sam. xiv. 39, 44; 1 K. ii. 42; Is. xlviii. 1, lxv. 16; Hos. iv. 15). So also our Lord himself accepted the high-priest's adjuration (Matt. xxvi. 63), and St. Paul frequently appeals to God in confirmation of his statements (Acts xxvi. 29; Rom. i. 9, ix. 1; 2 Cor. i. 23, xi. 31; Phil. i. 8; see also Rev. x. 6). (*b*.) Appeals of this kind to authorities recognised respectively by adjuring parties were regarded as bonds of international security, and their infraction as being not only grounds of international complaint, but also offences against divine justice. So Zedekiah, after swearing fidelity to the king of Babylon, was not only punished by him, but denounced by the prophet as a breaker of his oath (2 Chr. xxxvi. 13; Ez. xvii. 13, 18). Some, however, have supposed that the Law forbade any intercourse with heathen nations which involved the necessity of appeal by them to their own deities (Ex. xxiii. 32; Selden, *De Jur. Nat.* ii. 13; see Liv. i. 24; *Laws of Menu*, viii. 113; *Dict. of Antiq.* "Jus Jurandum").

III. As a consequence of this principle, (*a*) appeals to God's name on the one hand, and to heathen deities on the other, are treated in Scripture as tests of allegiance (Ex. xxiii. 13, xxxiv. 6; Deut. xxix. 12; Josh. xxiii. 7, xxiv. 16; 2 Chr. xv. 12, 14; Is. xix. 18, xlv. 23; Jer. xii. 16; Am. viii. 14; Zeph. i. 5). (*b*) So also the sovereign's name is sometimes used as a form of obligation, as was the case among the Romans with the name of the emperor; and Hofmann quotes a custom by which the kings of France used to appeal to themselves at their coronation (Gen. xlii. 15; 2 Sam. xi. 11, xiv. 19; Martyr. S. Polycarp. c. ix.; Tertull. *Apol.* c. 32; Suet. *Calig.* c. 27; Hofmann, *Lex.* art. "Juramentum"; *Dict. of Antiq.* u. a.; Michaelis, *On Laws of Moses*, art. 256, vol. iv. 102, ed. Smith).

IV. Other forms of oath, serious or frivolous, are mentioned; as, by the "blood of Abel" (Selden, *De Jur. Nat.* v. 8); by the "head;" by "Heaven," the "Temple," &c., some of which are condemned by our Lord (Matt. v. 33, xxiii. 16-22; and see Jam. v. 12). Yet He did not refuse the solemn adjuration of the high-priest (Matt. xxvi. 63, 64; see Juv. *Sat.* vi. 16; Mart. xi. 94; Mishna, *Sanh.* iii. 2, compared with Am. viii. 7; Spencer, *De Leg Hebr.* ii. 1-4).

As to the subject-matter of oaths the following cases may be mentioned:—

1. Agreement or stipulation for performance of certain acts (Gen. xiv. 22, xxiv. 2, 8, 9; Ruth i. 17; 1 Sam. xiv. 24; 2 Sam. v. 3; Ezr. x. 5; Neh. v. 12, x. 29, xiii. 25; Acts xxiii. 21; and see Joseph. *Vit.* c. 53).

2. Allegiance to a sovereign, or obedience from an inferior to a superior (Eccl. viii. 2; 2 Chr. xxxvi. 13; 1 K. xviii. 10). Josephus says the Essenes considered oaths unnecessary for the initiated, though they required them previously to initiation (*B. J.* ii. 8, §§6, 7; *Ant.* xv. 10, §4; Philo, *Quod omnis probus*, I. 12, ii. 458, ed. Mangey.)

a 1. אָלָה, *ápd, maledictio, juramentum*, with affinity אֵל, the name of God (Ges. pp. 44, 99).

2. שְׁבוּעָה and שְׁבֻעָה, from שָׁבַע, "seven," the sacred number (Ges. pp. 1354, 1356), ὅρκος, *juramentum*.

3. Promissory oath of a ruler (Josh. vi. 26; 1 Sam. xiv. 24, 28; 2 K. xxv. 24; Matt. xiv. 7). Priests took no oath of office (Heb. vii. 21).

4. Vow made in the form of an oath (Lev. v. 4).

5. Judicial oaths. (*a*) A man receiving a pledge from a neighbour was required, in case of injury happening to the pledge, to clear himself by oath of the blame of damage (Ex. xxii. 10, 11; 1 K. viii. 31; 2 Chr. vi. 22). A wilful breaker of trust, especially if he added perjury to his fraud, was to be severely punished (Lev. vi. 2-5; Deut. xix. 16-18). (*b*) It appears that witnesses were examined on oath, and that a false witness, or one guilty of suppression of the truth, was to be severely punished (Lev. v. 1; Prov. xxix. 24; Michaelis, *l. c.* art. 256, iv. 109; Deut. xix. 16-19; Grotius, in *Crit. Sacr.* on Matt. xxvi. 63; Knobel on Lev. v. 1, in *Kurzg. Exeg. Hdb.*). (*c*) A wife suspected of incontinence was required to clear herself by oath (Num. v. 19-22).

It will be observed that a leading feature of Jewish criminal procedure was that the accused person was put upon his oath to clear himself (Ex. xxii. 11; Num. v. 19-22; 1 K. viii. 31; 2 Chr. vi. 22; Matt. xxvi. 63).

The forms of adjuration mentioned in Scripture are—1. Lifting up the hand. Witnesses laid their hands on the head of the accused (Gen. xiv. 22; Lev. xxiv. 14; Deut. xxxii. 40; Is. iii. 7; Ez. xx. 5, 6; Sus. v. 35; Rev. x. 5; see Hom. *Il.* xix. 254; Virg. *Aen.* xii. 196; Carpzov, *Apparatus*, p. 652).

2. Putting the hand under the thigh of the person to whom the promise was made. As Josephus describes the usage, this ceremony was performed by each of the contracting parties to each other. It has been explained (*a*) as having reference to the covenant of circumcision (Godwyn, *Moses and Aaron*, vi. 6; Carpzov, *l. c.* p. 653); (*b*) as containing a principle similar to that of phallic symbolism (Her. ii. 48; Plut. *Is. et Osir.* vii. 412, ed. Reiske; Knobel on Gen. xxiv. 2, in *Kurzg. Exeg. Hdb.*); (*c*) as referring to the promised Messiah (Aug. *Qu. in Hept.* 62; *Civ. Dei*, xvi. 33). It seems likely that the two first at least of these explanations may be considered as closely connected, if not identical with each other (Gen. xxiv. 2, xlvii. 29; Nicolaus, *De Jur.* xi. 6; Ges. p. 631, *s. v.* יָרֵךְ; Fagius and others in *Crit. Sacr.*; Joseph. *Ant.* i. 16, §1).

3. Oaths were sometimes taken before the altar, or, as some understand the passage, if the persons were not in Jerusalem, in a position looking towards the Temple (1 K. viii. 31; 2 Chr. vi. 22; Godwyn, *l. c.* vi. 6; Carpzov, p. 654; see also Juv. *Sat.* xiv. 219; Hom. *Il.* xiv. 272).

4. Dividing a victim and passing between or distributing the pieces (Gen. xv. 10, 17; Jer. xxxiv. 18). This form was probably used to intensify the imprecation already ratified by sacrifice according to the custom described by classical writers under the phrases ὅρκια τέμνειν, *foedus ferire*, &c. We may perhaps regard in this view the acts recorded Judg. xix. 29, 1 Sam. xi. 7, and perhaps Herod. vii. 39.

As the sanctity of oaths was carefully inculcated by the Law, so the crime of perjury was strongly condemned; and to a false witness the same punishment was assigned which was due for the crime to which he testified (Ex. xx. 7; Lev. xix. 12; Deut. xix. 16-19; Ps. xv. 4; Jer. v. 2, vii. 9; Ez. xvi. 59; Hos. x. 4; Zech. viii. 17). Whether the "swearing" mentioned by Jeremiah (xxiii. 10) and by Hosea (iv 2) was false swearing, or profane abuse of oaths, is not certain. If the latter, the crime is one which had been condemned by the Law (Lev xxiv. 11, 16; Matt. xxvi. 74).

From the Law the Jews deduced many special cases of perjury, which are thus classified:—1. *Jus jurandum promissorium*, a rash inconsiderate promise for the future, or false assertion respecting the past (Lev. v. 4). 2. *Vanum*, an absurd self-contradictory assertion. 3. *Depositi*, breach of contract denied (Lev. xix. 11). 4. *Testimonii*, judicial perjury (Lev. v. 1; Nicolaus and Selden, *De Juramentis*, in Ugolini, *Thesaurus*, xxvi.; Lightfoot, *Hor. Hebr.* on Matt. v. 33, vol. ii. 292; Mishna, *Sheb.* iii. 7, iv. 1, v. 1, 2; Otho, *Lex. Rabb.*, art. "Juramentum").

Women were forbidden to bear witness on oath, as was inferred from Deut. xix. 17 (Mishna, *Sheb.* iv. 1).

The Christian practice in the matter of oaths was founded in great measure on the Jewish. Thus the oath on the Gospels was an imitation of the Jewish practice of placing the hands on the boss of the Law (P. Fagius, on *Onkel. ad* Ex. xiii. 1; Justinian, *Nov.* c. viii. Epil.; Matth. Paris, *Hist.* p. 916).

Our Lord's prohibition of swearing was clearly always understood by the Christian Church as directed against profane and careless swearing, not against the serious judicial form (Bingham, *Antiq. Eccl.* xvi. 7, §4, 5; Aug. *Ep.* 157, c. v. 40); and thus we find the fourth Council of Carthage (c. 61) reproving clerical persons for swearing by created objects.

The most solemn Mohammedan oath is made on the open Koran. Mohammed himself used the form, "By the setting of the stars" (Chardin, *Voy.* vi. 87; Sale's *Koran*, lvi. p. 437).

Bedouin Arabs use various sorts of adjuration, one of which somewhat resembles the oath "by the Temple." The person takes hold of the middle tent-pole, and swears by the life of the tent and its owners (Burckhardt, *Notes on Bed.* i. 127, foll.; see also another case mentioned by Burckhardt, *Syria*, p. 398).

The stringent nature of the Roman military oath, and the penalties attached to infraction of it, are alluded to, more or less certainly, in several places in N. T., *e. g.* Matt. viii. 9, Acts xii. 19, xvi. 27, xxvii. 42; see also Dionys. Hal. xi. 43, and Aul. Gell. xvi. 4. [PERJURY.] [H. W. P.]

OBADI'AH (עֹבַדְיָה: Ἀβδία: *Obdia*). The name of Obadiah was probably as common among the Hebrews as Abdallah among the Arabians, both of them having the same meaning and etymology.

1. The sons of Obadiah are enumerated in a corrupt passage of the genealogy of the tribe of Judah (1 Chr. iii. 21). The reading of the LXX., and Vulg. was בְּנוֹ, "his son," and of the Peshito Syriac בַּר, "son of," for בְּנֵי, "sons of;" so that according to the two former versions Obadiah was the son of Arnan, and according to the last the son of Jesaiah.

2. (Ἀβδιού: *Obadia.*) According to the received text, one of the five sons of Izrahiah, a descendant of Issachar and a chief man of his tribe (1 Chr. vii. 3). Four only, however, are mentioned, and the discrepancy is rectified in four of Kennicott's MSS., which omit the words "and the sons of Izrahiah" thus making Izrahiah brother

and not father, of Obadiah, and both sons of Uzzi. The Syriac and Arabic versions follow the received text, but read "four" instead of "five."

3. (Ἀβδιά: *Obdia.*) One of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).

4. A Levite, son of Shemaiah, and descended from Jeduthun (1 Chr. ix. 16). He appears to have been a principal musician in the Temple choir in the time of Nehemiah (Neh. xii. 25). It is evident, from a comparison of the last-quoted passage with 1 Chr. ix. 15-17 and Neh. xi. 17-19, that the first three names "Mattaniah, and Bakbukiah, Obadiah," belong to ver. 24, and the last three, "Meshullam, Talmon, Akkub," were the families of porters. The name is omitted in the Vat. MS. in Neh. xii. 25, where the Codex Fred. Aug. has Ὀβδίας and the Vulg. *Obdia.* In Neh. xi. 17, "Obadiah the son of Shemaiah," is called "ABDA the son of Shammua."

5. (*Obdias.*) The second in order of the lion-faced Gadites, captains of the host, who joined David's standard at Ziklag (1 Chr. xii. 9).

6. One of the princes of Judah in the reign of Jehoshaphat, who were sent by the king to teach in the cities of Judah (2 Chr. xvii. 7).

7. (Ἀβαδία: *Obedia.*) The son of Jehiel, of the sons of Joab, who came up in the second caravan with Ezra, accompanied by 218 of his kinsmen (Ezr. viii. 9).

8. (Ἀβδία: *Obdias.*) A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). [W. A. W.]

9. (Ὀβδιού: *Abdias.*) The prophet Obadiah.

We know nothing of him except what we can gather from the short book which bears his name. The Hebrew tradition adopted by St. Jerome (*In Abd.*), and maintained by Abarbanel and Kimchi, that he is the same person as the Obadiah of Ahab's reign, is as destitute of foundation as another account, also suggested by Abarbanel, which makes him to have been a converted Idumaean, "the hatchet," according to the Hebrew proverb, "returning into the wood out of which it was itself taken" (Abarb. *In Obad apud* Pfeifferi, *Opera*, p. 1092, Ultraj. 1704). The question of his date must depend upon the interpretation of the 11th verse of his prophecy. He there speaks of the conquest of Jerusalem and the captivity of Jacob. If he is referring to the well-known captivity by Nebuchadnezzar he must have lived at the time of the Babylonish captivity, and have prophesied subsequently to the year B.C. 588. If, further, his prophecy against Edom found its first fulfilment in the conquest of that country by Nebuchadnezzar in the year B.C. 583, we have its date fixed. It must have been uttered at some time in the five years which intervened between these two dates. Jaeger argues at length for an earlier date. He admits that the 11th verse refers to a capture of Jerusalem, but maintains that it may apply to its capture by Shishak in the reign of Rehoboam (1 K. xiv. 25; 2 Chr. xii. 2); by the Philistines and Arabians in the reign of Jehoram (2 Chr. xxi. 16); by Joash in the reign of Amaziah (2 Chr. xxv. 22); or by the Chaldaeans in the reign of Jehoiakim and of Jehoiachin (2 K. xxiv. 2 and 10). The Idumaeans might, he argues, have joined the enemies of Judah on any of these occasions, as their inveterate hostility from an early date is proved by several passages of Scripture, *e. g.* Joel iii. 19; Am. i. 11. He thinks it probable that the captivity referred to by Obadiah is the capture of Jerusalem by the Ephraimites in the reign of Amaziah (2 Chr. xxv. 22). The utmost force of these statements is to prove a possibility. The only argument of any weight for the early date of Obadiah is his position in the list of the books of the minor prophets. Why should he have been inserted between Amos and Jonah if his date is about B.C. 585? Schnurrer seems to answer this question satisfactorily when he says that the prophecy of Obadiah is an amplification of the last five verses of Amos, and was therefore placed next after the book of Amos. Our conclusion is in favour of the later date assigned to him, agreeing herein with that of Pfeiffer, Schnurrer, Rosenmüller, De Wette, Hendewerk, and Maurer.

The book of Obadiah is a sustained denunciation of the Edomites, melting, as is the wont of the Hebrew prophets (cf. Joel iii., Am. ix.), into a vision of the future glories of Zion, when the arm of the Lord should have wrought her deliverance and have repaid double upon her enemies. Previous to the captivity, the Edomites were in a similar relation to the Jews to that which the Samaritans afterwards held. They were near neighbours, and they were relatives. The result was that intensified hatred which such conditions are likely to produce, if they do not produce cordiality and good-will. The Edomites are the types of those who ought to be friends and are not—of those who ought to be helpers, but in the day of calamity are found "standing on the other side." The prophet first touches on their pride and self-confidence, and then denounces their "violence against their brother Jacob" at the time of the capture of Jerusalem. There is a sad tone of reproach in the form into which he throws his denunciation, which contrasts with the parallel denunciations of Ezekiel (xxv. and xxxv.), Jeremiah (Lam. iv. 21), and the author of the 137th Psalm, which seem to have been uttered on the same occasion and for the same cause. The psalmist's "Remember the children of Edom, C Lord, in the day of Jerusalem, how they said Down with it, down with it, even to the ground!" coupled with the immediately succeeding imprecation on Babylon, is a sterner utterance, by the side of which the "Thou shouldest not" of Obadiah appears rather as the sad remonstrance of disappointment. He complains that they looked on and rejoiced in the destruction of Jerusalem; that they triumphed over her and plundered her; and that they cut off the fugitives who were probably making their way through Idumaea to Egypt.

The last six verses are the most important part of Obadiah's prophecy. The vision presented to the prophet is that of Zion triumphant over the Idumaeans and all her enemies, restored to her ancient possessions, and extending her borders northward and southward and eastward and westward. He sees the house of Jacob and the house of Joseph (here probably denoting the ten tribes and the two) consuming the house of Esau as fire devours stubble (ver. 18). The inhabitants of the city of Jerusalem, now captive at Sepharad, are to return to Jerusalem, and to occupy not only the city itself, but the southern tract of Judaea (ver. 20). Those who had dwelt in the southern tract are to overrun and settle in Idumaea (ver. 19). The former inhabitants of the plain country are also to establish themselves in Philistia (ib.). To the north the tribe of Judah is to extend itself as far as the fields of Ephraim and Samaria, while Benjamin, thus displaced, takes possession of Gilead (ib.). The captives of the ten

tribes are to occupy the northern region from the borders of the enlarged Judah as far as Sarepta near Sidon (ver. 20). What or where Sepharad is no one knows. The LXX., perhaps by an error of a copyist, read 'Εφραθά. St. Jerome's Hebrew tutor told him the Jews held it to be the Bosporus. St. Jerome himself thinks it is derived from an Assyrian word meaning "bound" or "limit," and understands it as signifying "scattered abroad." So Maurer, who compares οἱ ἐν τῇ διασπορᾷ of Jam. i. 1. Hardt, who has devoted a volume to the consideration of the question, is in favour of Sipphara in Mesopotamia. The modern Jews pronounce for Spain. Schultz is probably right in saying that it is some town or district in Babylon, otherwise unknown.

The question is asked, Have the prophet's denunciations of the Edomites been fulfilled, and has his vision of Zion's glories been realised? Typically, partially, and imperfectly they have been fulfilled, but, as Rosenmüller justly says, they await a fuller accomplishment. The first fulfilment of the denunciation on Edom in all probability took place a few years after its utterance. For we read in Josephus (*Ant.* x. 9, §7) that five years after the capture of Jerusalem Nebuchadnezzar reduced the Ammonites and Moabites, and after their reduction made an expedition into Egypt. This he could hardly have done without at the same time reducing Idumæa. A more full, but still only partial and typical, fulfilment would have taken place in the time of John Hyrcanus, who utterly reduced the Idumæans, and only allowed them to remain in their country on the condition of their being circumcised and accepting the Jewish rites, after which their nationality was lost for ever (Joseph. *Ant.* xiii. 9, §1). Similarly the return from the Babylonish captivity would typically and imperfectly fulfil the promise of the restoration of Zion and the extension of her borders. But "magnificentior sane est haec promissio quàm ut ad Sorobabelica aut Macabaica tempora referri possit," says Rosenmüller on ver. 21. And "necessitas cogit ut omnia ad praedicationem evangelii referamus," says Luther.

The full completion of the prophetical descriptions of the glories of Jerusalem—the future golden age towards which the seers stretched their hands with fond yearnings—is to be looked for in the Christian, not in the Jewish Zion—in the antitype rather than in the type. Just as the fate of Jerusalem and the destruction of the world are interwoven and interpenetrate each other in the prophecy uttered by our Lord on the mount, and His words are in part fulfilled in the one event, but only fully accomplished in the other; so in figure and in type the predictions of Obadiah may have been accomplished by Nebuchadnezzar, Zerubbabel, and Hyrcanus, but their complete fulfilment is reserved for the fortunes of the Christian Church and her adversaries. Whether that fulfilment has already occurred in the spread of the Gospel through the world, or whether it is yet to come (Rev. xx. 4), or whether, being conditional, it is not to be expected save in a limited and curtailed degree, is not to be determined here.

The book of Obadiah is a favourite study of the modern Jews. It is here especially that they read the future fate of their own nation and of the Christians. Those unversed in their literature may wonder where the Christians are found in the book of Obadiah. But it is a fixed principle of Rabbinical interpretation that by Edomites is prophetically meant Christians, and that by Edom is meant Rome. Thus Kimchi, on Obadiah, lays it down that all that the prophets have said about the destruction of Edom in the last times has reference to Rome. So Rabbi Bechai, on Is. lxvi. 17; and Abarbanel has written a commentary on Obadiah resting on this hypothesis as its basis. Other examples are given by Buxtorf (*Lex. Talm.* in voc. אֱדוֹם, and *Synagoga Judaica*). The reasons of this Rabbinical dictum are as various and as ridiculous as might be imagined. Nachmanides, Bechai, and Abarbanel say that Janus, the first king of Latium, was grandson of Esau. Kimchi (on Joel iii. 19) says that Julius Cæsar was an Idumæan. Scaliger (*Not. Chron. Euseb.* n. 2152) reports, "The Jews, for those who are comparatively ancient and those who are modern, believe that Titus was an Edomite, and when the prophets denounce Edom they frequently refer it to Titus." Aben Ezra says that there were no Christians except such as were Idumæans up to the time of Constantine, and that Constantine having embraced their religion the whole Roman empire became entitled Idumæan. St. Jerome says that some of the Jews read רוֹמָה, Rome, for דוּמָה, Dumah, in Is. xxi. 11. Finally, some of the Rabbins and with them Abarbanel, maintain that it was the soul of Esau which lived again in Christ.

The colour given to the prophecies of Obadiah, when looked at from this point of view, is most curious. The following is a specimen from Abarbanel on ver. 1:—"The true explanation, as I have said, is to be found in this: The Idumæans, by which, as I have shown, all the Christians are to be understood (for they took their origin from Rome), will go up to lay waste Jerusalem, which is the seat of holiness, and where the tomb of their god Jesus is, as indeed they have several times gone up already." Again, on ver. 2: "I have several times shown that from Edom proceeded the kings who reigned in Italy, and who built up Rome to be great among the nations and chief among the provinces; and in this way Italy and Greece and all the western provinces became filled with Idumæans. Thus it is that the prophets call the whole of that nation by the name of Edom." On ver. 8: "There shall not be found counsel or wisdom among the Edomite Christians when they go up to that war." On ver. 19: "Those who have gone as exiles into the Edomites', that is, into the Christians' land, and have there suffered affliction, will deserve to have the best part of their country and their metropolis, Mount Seir." On ver. 20: "Sarepta" is "France," "Sepharad" is "Spain." The "Mount of Esau" in ver. 21, is "the city of Rome," which is to be judged; and the Saviours are to be "the [Jewish] Messiah and his chieftains," who are to be "Judges."

The first nine verses of Obadiah are so similar to Jer. xlix. 7, &c., that it is evident that one of the two prophets must have had the prophecy of the other before him. Which of the two wrote first is doubtful. Those who give an early date to Obadiah thereby settle the question. Those who place it later leave the question open, as he would in that case be a contemporary of Jeremiah. Luther holds that Obadiah followed Jeremiah. Schnurrer thinks it more probable that Jeremiah's prophecy is an altered form of Obadiah's. Eichhorn, Schmidt, Rosenmüller, and Maurer agree with him.

10. (עֹבַדְיָהוּ: Ἀβδιού: *Abdias.*) An officer of high rank in the court of Ahab, who is described as "over the house," that is, apparently, lord high chamberlain, or mayor of the palace (1 K. xviii. 3). His influence with the king must have been great to enable him to retain his position, though a devout worshipper of Jehovah, during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred of them in caves, and fed them there with bread and water. But he himself does not seem to have been suspected (1 K. xviii. 4, 13). The occasion upon which Obadiah appears in the history shows the confidential nature of his office. In the third year of the terrible famine with which Samaria was visited, when the fountains and streams were dried up in consequence of the long-continued drought, and horses and mules were perishing for lack of water, Ahab and Obadiah divided the land between them and set forth, each unattended, to search for whatever remnants of herbage might still be left around the springs and in the fissures of the river beds. Their mission was of such importance that it could only be entrusted to the two principal persons in the kingdom. Obadiah was startled on his solitary journey by the abrupt apparition of Elijah, who had disappeared since the commencement of the famine, and now commanded him to announce to Ahab, "Behold Elijah!" He hesitated, apparently afraid that his long-concealed attachment to the worship of Jehovah should thus be disclosed and his life fall a sacrifice. At the same time he was anxious that the prophet should not doubt his sincerity, and appealed to what he had done in the persecution by Jezebel. But Elijah only asserted the more strongly his intention of encountering Ahab, and Obadiah had no choice but to obey (1 K. xviii. 7-16). The interview and its consequences belong to the history of Elijah [vol. i. p. 527]. According to the Jewish tradition preserved in Ephrem Syrus (Assemani, *Bibl. Or. Clem.* p. 70), Obadiah the chief officer of Ahab was the same with Obadiah the prophet. He was of Shechem in the land of Ephraim, and a disciple of Elijah, and was the third captain of fifty who was sent by Ahaziah (2 K. i. 13). After this he left the king's service, prophesied, died, and was buried with his father. The "certain woman of the wives of the sons of the prophets" who came to Elisha (2 K. iv. 1) was, according to the tradition in Rashi, his widow.

11. (Ἀβδίας.) The father of Ishmaiah, who was chief of the tribe of Zebulon in David's reign (1 Chr. xxvii. 19).

12. A Merarite Levite in the reign of Josiah, and one of the overseers of the workmen in the restoration of the Temple (2 Chr. xxxiv. 12). [W. A. W.]

OBAL (עוֹבָל: Ἐυδλ: *Ebal*). A son of Joktan, and, like the rest of his family, apparently the founder of an Arab tribe (Gen. x. 28), which has not yet been identified. In 1 Chr. i. 22 the name is written EBAL (עֵיבָל: Alex. Γουλαν: *Hebal*), which Knobel (*Genesis*) compares with the *Gebanitae* of Pliny, a tribe of Southern Arabia. The similarity of the name with that of the *Avalitae*, a troglodyte tribe of East Africa, induced Bochart (*Phaleg*, ii. 23) to conjecture that Obal migrated thither and gave his name to the *Sinus Abalites* or *Avalites* of Pliny (vi. 34). [W. A. W.]

OBDI'A ('Οβδία: *Obia*). Probably a corruption of Obaia, the form in which the name HABAIAH appears (comp. 1 Esdr. v. 38 with Ezr. ii. 61).

O'BED (עוֹבֵד: Ὠβήδ: *Obed*). **1.** Son of Boaz and Ruth the Moabitess (Ruth iv. 17). The circumstances of his birth, which make up all that we know about him, are given with much beauty in the book of Ruth, and form a most interesting specimen of the religious and social life of the Israelites in the days of Eli, which a comparison of the genealogies of David, Samuel, and Abiathar shows to have been about the time of his birth. The famine which led to Elimelech and his sons migrating to the land of Moab may naturally be assigned to the time of the Philistine inroads in Eli's old age. Indeed there is a considerable resemblance between the circumstances described in Hannah's song (1 Sam. ii. 5), "They that were hungry ceased, so that the barren hath born seven," and those of Obed's birth as pointed at, Ruth i. 6, and in the speech of the women to Naomi: "He shall be unto thee a restorer of thy life, and a nourisher of thine old age; for thy daughter-in-law which loveth thee, which is better to thee than seven sons, hath borne him:" as well as between the prophetic saying (1 Sam. ii. 7), "The Lord maketh poor, and maketh rich: He bringeth low, and lifteth up. He raiseth up the poor out of the dust, and lifteth up the beggar from the dunghill, to set them among princes, and to make them inherit the throne of glory:" and the actual history of the house of Elimelech, whose glory was prayed for by the people, who said, on the marriage of Ruth to Boaz, "The Lord make the woman that is come into thine house like Rachel and like Leah, which two did build the house of Israel, and do thou worthily in Ephratah, and be famous in Bethlehem." The direct mention of the Lord's Christ in 1 Sam. ii. 10, also connects the passage remarkably with the birth of that child who was grandfather to King David, and the lineal ancestor of Jesus Christ.

The name of Obed occurs only Ruth iv. 17, and in the four genealogies, Ruth iv. 21, 22; 1 Chr. ii. 12; Matt. i. 5; Luke iii. 32. In all these five passages, and in the first with peculiar emphasis, he is said to be *the father of Jesse*. It is incredible that in David's reign, when this genealogy was compiled, his own grandfather's name should have been forgotten, and therefore there is no escape from the conclusion that Obed was literally Jesse's father, and that we have all the generations recorded from Nahshon to David. [JESSE; NAHSHON.] [A. C. H.]

2. (Alex. Ἰωβήδ.) A descendant of Jarha, the Egyptian slave of Sheshan in the line of Jerahmeel. He was grandson of Zabad, one of David's mighties (1 Chr. ii. 37, 38).

3. (Ὠβήθ; Alex. Ἰωβήδ.) One of David's mighty men (1 Chr. xi. 47).

4. (Ὠβήδ; Alex. Ἰωβήδ.) One of the gatekeepers of the Temple: son of Shemaiah the firstborn of Obed-edom (1 Chr. xxv. 7).

5. (Alex. 'Ιωβήδ.) Father of Azariah, one of the captains of hundreds who joined with Jehoiada in the revolution by which Athaliah fell (2 Chr. xxiii. 1). [W. A. W.]
